DEDICATION

KNOWING that to Senator Benjamin Ryan Tillman we are profoundly indebted for the conception of the great educational plan of our College; and that to his untiring energies is due in great part the present success of the institution; and feeling keenly a desire to show our appreciation of a life spent so unselfishly in the interest of our Alma Mater; to him we dedicate this record of our Academic, Athletic, and Social life.
Hon. B. R. Tillman

BENJAMIN RYAN TILLMAN, industrial, educational and political reformer and Statesman, twice Governor of his native State, now serving his third term as a Senator of the United States, was born in Edgefield County (then District), South Carolina, August 11, 1847. The subject of this short sketch was the youngest of eleven children and was but two years old when his father died. The father, whose name in full was given the baby boy, was, we read, “a farmer, a man of bright mind and nervous temperament and a great reader.” The mother, Sophia Ann (Hancock) Tillman, “was a woman of phenomenal strength, mentally, morally, physically and, in every way and for good, she impressed herself powerfully on her son.” Often has Senator Tillman been heard to say that all that he is he attributes to his mother and to his wife.

Ben Tillman’s early life was passed in the country, on his mother’s plantation, with eighty slaves. George Galphin, at Bethany Academy, gave him his schooling. The lad had the use of a good library, and read “voraciously,” especially works of fiction and poetry.

In July, 1864, he stopped school to join the Confederate Army, was stricken with a severe illness which caused the loss of his left eye and kept him an invalid for two years.

For wellnigh twenty years he was a farmer in his native county. He took an active part in the stirring days of Reconstruction, and has published some valuable reminiscenses of the disturbances at Hamburg and Ellerton of the times of negro ascendancy, when was endangered the civilization of the Cavalier and the Puritan.

The immediate success of Clemson College (which opened its doors in July, 1893), far beyond the wildest dreams of its founders, induced Governor Tillman during his administration to recommend and secure the establishment of a similar school for girls and young women at the Winthrop Normal and Industrial College of South Carolina. Fort Hill! Rock Hill! What short, suggestive names! Elevation! Strength! Everlastingness!

Would you see Benjamin Ryan Tillman’s monument? Look around the walls of Winthrop and Clemson. Better still, consider the lives of thousands and thousands of our girls and our boys, our young women and our young men; and their ever-widening and enriching influences on things material and mental and moral and spiritual of our commonwealth.

In the fall of 1893, when Clemson was but a few weeks old, Governor Tillman heard a Clemson student—a poor boy from near the seacoast—deliver, at a literary society celebration in the Chapel, a speech on Education and Progress. Pronouncing it the finest college boy’s speech that he had ever listened to, the Governor quietly handed the College Treasurer ten dollars, with the request that he place it to the credit of the boy’s account and say nothing about it to anyone.

When asked what advice he would give young Americans, Senator Tillman answered: “Be in earnest; be willing to work and to stick to it; to learn to speak the truth and practice no guile; to deal honestly with all men, and to live soberly and simply.”
Greeting

To Clemson men
friends of Clemson men.

Geting. I hope we this
volume of Tales to offer a full
of novel freshness—regarding the
sameness of college life, in
regards to the fact that it was
produced during the fresh
moments of other rigorous, arduous
studies. I hereby invite you
in read our book & know
that an agitation as one
enjoy it, we deem it
a success.

Academic Department  

English  

Professor  
Charles Manning Furman, A.B.  
Furman University; law student, two years. Served four years in the Confederate Army, attaining successively the rank of Second Lieutenant, First Lieutenant and Captain of Company "H," Sixteenth South Carolina Regiment. Before being transferred to this Regiment he served in the Palmetto Guards and Earle's Light Battery; lawyer, fourteen years; educator, twenty-five years.

Associate Professor  
David Wistar Daniel, A.M.  
Wofford College, '92; A.M., Vanderbilt University, '01. Educational work.

Assistant Professor  
Thomas Wadlington Keitt (V.M.I.)  
Virginia Military Institute, '78. Assistant Professor of Modern Languages, Virginia Military Institute; Principal of Rutherford Academy; County Superintendent of Education, Newberry County; Assistant Professor English, Clemson College.

Assistant Professor  
Arthur Buist Bryan, B.S.  
Clemson College, '98; B.Litt., University of Nashville, '01; Graduate Student, University of Chicago, by residence work during summer quarters and by correspondence.

Assistant Professor  
Mark Edward Bradley  
Erskine College, '98; Teacher in public schools of Abbeville; Assistant Professor English, Clemson College.

History and Political Economy  

Professor  
William Shannon Morrison, A.B.  
Graduated at Wofford College; for seven years Principal High Schools at Wellford, S.C.; organizer and for two years Principal of City Schools at Spartanburg, S.C.; organizer and for seven years Principal of the City Schools of Greenville, S.C. Professor of History and Political Economy at Clemson College from '95 until the present time.
Assistant Professor

ALESTER GARDEN HOLMES, B.S.

Graduate South Carolina Military Academy. Principal of school at Pendleton, S. C., later at Belton, and then Principal of Downer Institute, Beech Island, S. C. Assistant Master, Sewanee Grammar School, Sewanee, Tenn.; Instructor in Mathematics, A. M. College of North Carolina, Raleigh N. C. Clemson College since '06.

Mathematics

Professor

SAMUEL MANER MARTIN, B.S.

Graduate Citadel, '96; Post-graduate Course in Mathematics at Cornell and Harvard; taught two years in graded school at Johnston, S. C.; Major, Corps of Cadets, Clemson College, '08-'02.

Associate Professor

AUGUSTUS G. SHANKLIN, B.S.

Graduate South Military Academy; Cornell Summer School, '08; Columbia University Summer School, '10.

Assistant Professor

JOSEPH EVERETT HUNTER, B.S.

Clemson College, '96; public schools of Newberry County, '96-'00; Post-graduate Course in Mathematics, University of Chicago, summers '02-'04; Clemson College since '01.

Assistant Professor

Burr Harrison Johnstone, A.B.

Graduate The Citadel, '09; Commandant Welsh Neck High School, '09-'01; school work in South Carolina and Georgia, '01-'03; Assistant Professor Mathematics, Georgia School of Technology, '03-'06; Professor Mathematics, Georgia Military Academy, '06-'07; Professor Mathematics, Bingham School, '08; attended University of Chicago Summer Quarters, '09-'10.

Assistant Professor

Andrew Bramlett, B.S.

University of South Carolina, '84; Post-graduate Course, Universities of Chicago and Cornell; Teacher and Superintendent of public schools, Newberry, S. C.; University of Virginia Summer Quarter, '11.

Physics

Professor

THOMAS GRAYSON POATS, M.E., E.E.

University of Virginia, M. E., E. E., '06; taught in Schools of Mines, University of Missouri, '92-'95; Instructor in Department of Engineering, University of Virginia, '05-'06; Clemson College since '07.

Agricultural Department

Geology

Fred Harvey Hall Calhoun, Ph.D.

Professor of Geology and Mineralogy

Acting Director of Department

B. S., University of Chicago, '98; Ph. D., '02; Instructor, University of Chicago, '00-'02; Assistant Professor of Geology and Physics, Illinois College, '02-'04; Professor of Geology and Mineralogy, Clemson College, '04 until the present time; Assistant Geologist, United States Geological Survey, '01; Instructor, University of Chicago Correspondence School, '00; Professor Geology, University Summer School, '05-'06; Instructor Field Geology, University of Chicago Summer School, '07; Member of American Association for the Advancement of Science.
Veterinary Science

M. Ray Powers, D.V.S.
Associate Professor Veterinary Science
State Veterinarian: Wyoming Seminary, Kingston, Pa., '02; New York University, D. V. S., '06; House Surgeon, American Veterinary College, '05-'06; Clemson College, '06 until the present time.

Robert Oliver Feeley, D.V.S.
Assistant Professor
Assistant State Veterinarian: D. V. S., New York University, '06; Member American Veterinary Medical Association; South Carolina Medical Association; Clemson College, '11—.

William Forrest Burleigh, D.V.M.
Assistant Professor
Assistant State Veterinarian: D. V. M., New York State Veterinary College, Cornell; Summer Quarter, Cornell University, '11; Clemson College, '11—.

Agronomy

John McGuire Napier, M.S.
Assistant Professor Agronomy
B. S., Clemson College, '08; M. S., University of Wisconsin, '09; Assistant Agronomist, University of Wisconsin, '10; Member American Breeders' Association; American Society of Agronomists, Clemson College, '11 until present time.

Murray Starr Gardiner, B.S.
Assistant in Agronomy and Farm Mechanics
B. S., Purdue University; Assistant in Agronomy, University of Missouri, '10; Clemson College, '11—.

Botany and Forestry

John Galentine Hall, M.A.
Associate Professor Botany and Forestry
M. A., Harvard University; A. B., Kansas State University; Student Assistant, Kansas State University, '94-'95; Assistant in Botany, Harvard, '04-'08; Assistant Professor, Plant Pathology, A. and M. College of North Carolina, '06-'10; Member American Phytopathological Society; Author of six books on the Diseases of Plants; Clemson College, '10 until present time.

Andrew Ballard Massey, B.S.
Instructor in Bacteriology
B. S., North Carolina A. and M. College, '09; Assistant in Entomology, Florida Experiment Station, '09; Member American Breeders' Association; Clemson College, '10—.

Entomology

Albert Frederick Conradi, M.S.
Associate Professor Entomology
State Entomologist: B. S., Ohio State University, '01; Lake Laboratory, summer '00: Woods Hole, summer '01; M. S., New Hampshire State College, '02; Instructor Zoology and Entomology, New Hampshire State College, '01-'02; Instructor Zoology and Entomology, A. and M. College of Texas, '03-'04; Professor Zoology and Entomology, A. and M. College of Texas, '04-'07; State Entomologist of Texas, '04-'07; Clemson College since '07.
Animal Husbandry and Dairying

ARCHIBALD SMITH, B.S.
Associate Professor Animal Husbandry and Dairying
B. S., Ontario Agricultural College; Quebec Dairy College; Superintendent Western School; Professor Animal Husbandry, A. and M. College of Mississippi; Professor Dairy Husbandry, A. and M. College of Mississippi; Member American Society of Animal Nutrition; American Breeders' Association; Clemson College since '10.

JUNIUS MILTON BURGESS, B.S.
Assistant Professor Animal Husbandry and Dairying
B. S., Clemson College, '02; Assistant in Animal Husbandry and Dairying, Clemson, '03; Assistant Professor Agriculture, Clemson, '08-'10; Assistant Professor Animal Husbandry and Dairying, Clemson, '10-'11; Summer Quarter, University of Illinois; Member American Society of Animal Nutrition; Secretary and Treasurer South Carolina Livestock Association; Clemson College since '03.

THOMAS FLETCHER JACKSON, M.S.
Assistant in Animal Husbandry
B. S. and M. S., A. and M. College of Mississippi; Clemson College since '10.

Horticulture

CLARENCE CORNELIUS VINCENT, M.S.
Associate Professor Horticulture
B. S., Oregon Agricultural College; M. S., Oregon Agricultural College; M. S. A., Cornell University; Assistant Horticulturist, Oregon Agricultural College; Assistant Horticulturist, University of Idaho; Associate Professor of Horticulture, Clemson College, '11—.

LOLA ALEXANDER NIXIN, B.S.
Assistant in Horticulture
B. S., a. and M. College of North Carolina; Cornell University, '06-'08; Professor Agriculture, and Horticulture, Arkansas State Normal College, '08-'09; Professor Agriculture and Horticulture, Winthrop College, '09-'12; Member National Educational Association; Clemson College since '11.

Chemical Department

MARK BERNARD HARDIN
Professor Emeritus of Chemistry
First Distinguished Graduate, V. M. L. 1838; Assistant Professor Latin, V. M. L., '38-'39; Assistant Professor Latin and Chemistry, V. M. L., '39-'60; Adjunct Professor Chemistry, V. M. L., '60-'61; Major of Artillery, Confederate Army, '60-'65; Analytical Chemist, New York, '65-'67; Professor General and Applied Chemistry, V. M. L., '67-'90; Professor of Chemistry, Chief Chemist, Clemson College, '02-'10; Professor Emeritus Chemistry, Clemson College, '10--; Member Association of Official Agricultural Chemists; Charter Member American Chemical Society, '76—; resignation, '11; Corresponding Member New York Academy of Science; Vice-President Clemson College; Clemson College, '90, until present time.
Richard Newman Brackett, Ph.D.

Director of Department
Professor of Chemistry

A. B., Davidson College, '83; Ph. D., Johns Hopkins University, '87; State Chemist; Chief Chemist, Arkansas Geological Survey, '87-'91; Fellow American Association for the Advancement of Science, '91—; Member American Chemical Society, '94—; Member Association of Official Agricultural Chemists; Discoverer of Newtonite and Rectorite (two new minerals): Associate Professor Chemistry, '91-'11; Professor Chemistry, '11—; Clemson College, '91, until present time.

David Hill Henry, B.S.
Associate Professor of Chemistry

B. S., Clemson College, '98; Post-graduate, Clemson College; Assistant Chemist, '99-'10; Associate Professor of Chemistry, '10—; Member American Chemical Society; President Alumni Association, '05—; University of Chicago, summer '08; Clemson College since '99.

Guy Fleming Lipscomb, B.S.
Assistant Professor of Chemistry

B. S., Alabama Polytechnic Institute; Princeton University; Assistant in Chemistry, Alabama Polytechnic Institute; Assistant in Chemistry, Princeton University; Assistant Professor of Chemistry, Clemson College, '10—.

John Harris Mitchell, M.S.
Assistant Professor of Chemistry

B. S. and M. S., Alabama Polytechnic Institute; Assistant in Chemistry, Alabama Polytechnic Institute; Assistant in Chemistry, University of Illinois; Assistant Chemist in Analytical Department, Clemson College, '03-'11; Assistant Professor Chemistry, Clemson College, '11—.

Benjamin Freeman, B.S.
Assistant in Chemistry

B. S., Clemson College; Assistant in Chemistry, '05-'10; Assistant Chemist, '10—; Clemson College since '05.

Engineering Department

Walter Merritt Riggs, B.S., E.M.E., LL.D.
President
Consulting Professor of Engineering

B. S., Alabama Polytechnic Institute; E. and M. E., Cornell University; Instructor in Physics and Electrical Engineering, Alabama Polytechnic Institute; Assistant in Mechanical and Electrical Engineering, Clemson College, '96-'01; Professor Mechanical Engineering and Director Engineering Department, '01-'09; Director Engineering Department and Acting President, '09-'10; Member American Institute Engineers; Society for Promotion of Engineering Education; President C. A. C. Athletic Association for sixteen sessions; President C. A. C. Glee Club, '96-'07; President Clemson College, '11—

Samuel Broadus Earle, A.M., M.E.
Director of Department
Professor Mechanical and Electrical Engineering

B. A. and M. A., Furman University, '93-'99; M. E., Cornell University, '02; Associate Member American Society of Mechanical Engineers; Applicant Society for Promotion of Engineering Education; Member American Society for Advancement of Science; Associate Professor Mechanical Engineering, '02-'10; Director Engineering Department, '10—.

Frank Townes Dargan, M.S.
Acting Associate Professor of Electrical Engineering

B. S., M. M. P., and M. S., Furman University; Instructor Furman University; Summer Session, University of Michigan; four Summer Sessions, Cornell University; Applicant the Society for the Promotion of Engineering Education; Applicant American Institute of Electrical Engineers; Assistant Professor Mathematics, Clemson College, '01-'02; Instructor Mechanical Drawing, Clemson College, '02-'04; Assistant Professor Electrical Engineering, Clemson College, '04-'05; Assistant Professor Electrical Engineering, Clemson College, '05-'11; Acting Professor Electrical Engineering, Clemson, '11—.
RUDOLPH EDWARD LEE, B.S.

Associate Professor Drawing, Designing, and College Architecture

B. S., Clemson College; S. C. M. A.; Zonarian Art College; Cornell University; University of Pennsylvania; Tutor Preparatory Department, Clemson College, '97-'98; Instructor in Drawing, Clemson College, '98-'00; Assistant Professor Drawing, Clemson College, '00-'01; Associate Professor Drawing, Clemson College, '04—.

WILLISTON WIGHTMAN KLUGH, B.S.

Assistant Professor of Drawing and Designing

B. S., Clemson College, '96; Vanderbilt University; Cornell University; Assistant Instructor in Drawing, Clemson College, '99-'00; Instructor in Drawing, Clemson College, '00-'01; Assistant Professor Drawing, Clemson College, '01—.

JOHN WEEAMS GANTT

Assistant Professor of Forge and Foundry

Miller School; Post-graduate, Miller School; Massachusetts Institute of Technology; Instructor in Woodwork, Clemson College, '01-'04; Instructor in Drawing, Clemson College, '04-'05; Assistant Professor Forge and Foundry, Clemson College, '05—.

STYLES TRENXTON HOWARD, B.M.E.

Assistant Professor Machine Shop Work

B. M. E., Kentucky State College; Instructor in Woodwork, Clemson College, '04-'05; Assistant Professor Machine Shop Work, Clemson College, '05—.

ANDREW BURCHELL GARDNER

Assistant Professor Woodwork

University of Kentucky; Assistant in Drawing, Forge, and Woodwork, Clemson College, '05-'07; Assistant in Woodwork, Clemson College, '07-'09; Assistant Professor Woodwork, Clemson College, '09—.

MAHLON THOMAS BIRCH, B.S.

Instructor in Drawing

B. S., Mississippi A. and M. College, '09; Post-graduate, Mississippi A. and M. College; Instructor in Drawing, Clemson College, '09—.

GEORGE HAMITON FOLK, B.S.

Instructor in Woodwork

B. S., Clemson College, '07; Instructor of Woodwork, Clemson College, '09—.

DAVID NIVIN HARRIS, B.S.

Instructor in Drawing

B. S., Clemson College, '08; Instructor in Drawing, Clemson College, '10—.

JOHN FRANKLIN ALLISON, B.S.

Instructor in Forge and Foundry

B. S., Maryland Agricultural College; Instructor in Forge and Foundry, Clemson College, '11-'12.

Civil Engineering

H. E. HOUSTON, C.E.

Professor Civil Engineering

C. E., Washington and Lee University; Professor Mathematics, Pantops Academy, '93-'95; Head of Mathematics and Surveying, Toledo Polytechnic School, '00-'02; Professor Mathematics, Toledo Polytechnic School, '02-'03; Assistant Professor Applied Mathematics and Civil Engineering, Clemson College, '03-'07; Associate Professor Civil Engineering, Clemson College, '07-'08; Professor Civil Engineering, Clemson College, '08—.
Francis Raymond Sweeney, B.S.
Instructor in Civil Engineering
B.S., Clemson College; Instructor in Civil Engineering, Clemson College, '09—.

Textile Department
Charles Stebbins Doggett
Director Department
Professor Textile Chemistry and Dyeing
Oberlin College, '76-'78; Leeds University, England, '83-'84; Swiss Federal Polytechnic College, '84-'85; University of Munich, '85-'86; Royal Prussian Polytechnic Academy, '86; Director Textile Department and Professor of Textile Chemistry, Clemson College, '05—.

Claude Wightman McSwain, B.S.
Assistant Professor Weaving and Designing
B.S., Clemson College; Member Southern Manufacturers' Association; Assistant Professor Weaving and Designing, Clemson College, '05—.

Fred Taylor
Assistant Professor Carding and Spinning
Honor Graduate, New Bedford Textile School; Instructor in Mill Calculations, New Bedford School; Assistant Professor Carding and Spinning, Clemson College, '10—.

Preparatory Department
Lawrence Alexander Sease, B.S.
Assistant Professor English
Head Master of the Preparatory Department
B.S., Clemson College; Cornell University; public and graded school work; Member South Carolina Teachers' Association; Assistant Professor English, Clemson College, '08—.

Benjamin Johnstone Wells, L.L., A.B.
Instructor Preparatory Class
L.L. A.B., University of South Carolina; public and graded school work; Instructor Preparatory Class, Clemson College, '10—.

Military Department
Marcus Butler Stokes
Captain 10th Infantry United States Army, Commandant of Cadets, and Professor of Military Science and Tactics
U.S. M. A., '92; U.S. Naval Academy; Second Lieutenant Tenth Infantry U.S. Army; service in U.S. from '92-'98; First Lieutenant Tenth Infantry, '98; Volunteer Service as Major and Lieut.-Colonel in South Carolina, Georgia and Florida, '98; Cuban Service, '98-'02; Captain Tenth Infantry, '01; Philippine Service, '02-'03; Service in U.S., '03-'06; Alaskan Service, '06-'08; Service in U.S., '08-'09; Commandant of Cadets and Professor of Military Science and Tactics, Clemson College, '09-'12.

Sam Levi Duckett
Military Assistant to the Commandant
B.S., South Carolina Military Academy, '10; Principal Union High School, '10-'11; Assistant to the Commandant, Clemson College, '11—.
The South Carolina Experiment Station

Joseph Nelson Harper, M.S.A.
Director and Agriculturist

Charles Carter Newman, B.S.
Horticulturist

Henry Walter Barre, M.S.
Botanist and Plant Pathologist

Albert Frederick Conradi, M.S.
Entomologist and Zoologist

Thomas Ellison Keitt, B.S.
Chemist

Archibald Smith
Animal Husbandman to the Station

William D. Garrison, B.S.
Superintendent Coast Experiment Station

John N. Hook
Secretary and Librarian

William Andrew Thomas, B.S.
Field Entomologist

William Barre Aull, B.S.
Assistant to Botanist

Lawrence Orr Watson, B.S.
Field Pathologist

Elbert Reid Lloyd, Jr., B.S.
Assistant in Animal Husbandry

Frank Green Tarbox, B.S.
Assistant to Agriculturist

Burns Gillison
Foreman Experiment Station Farm

Miss Helen C. Bradford
Stenographer

Division of Farmer's Institutes and Extension Work

Christopher Bradshaw Haddon, B.S.
Special Agent in Charge of Boys' and Girls' Demonstration Work in Co-operation United States Farm Demonstration Work

Thomas Fletcher Jackson, B.S.
Assistant in Animal Husbandry

Ralph Hedges Mason, B.S.
Junior Dairyman, United States Department of Agriculture
Lola Alexander Nivin, B.S.
Assistant in Horticulture

James Albert Dew, B.S.
Assistant in Entomology

Miss Dorothy Montgomery
Stenographer

Fertilizer Control

Richard Newman Brackett, Ph.D.
Chief Chemist

Benjamin F. Robertson, B.S.
Chemist

Coke Smith Lykes, B.S.
Assistant Chemist

Claude Furman Inman, B.S.
Assistant Chemist

John Treutlen Foy, B.S.
Assistant Chemist

Hugh Milton Stackhouse
Secretary to the Board of Fertilizer Control

William Benjamin West
Chief Fertilizer Inspector

Miss Margaret Gasque
Stenographer to the Secretary of the Board of Fertilizer Control

State Control Officers

Dr. Richard Newman Brackett
State Chemist

Albert Frederick Conradi, M.S.
State Entomologist

Wilson P. Gee, M.S.
Assistant State Entomologist

Dr. M. Ray Powers
State Veterinarian
Dr. Robert Oliver Feeley
Assistant State Veterinarian

Dr. William Forrest Burleigh
Assistant State Veterinarian

Students Assistants and Laboratory

Eddie H. Schuler, B.S.
Mechanical and Electrical Laboratory Assistant

Henry C. Eagerton, B.S.
Student Assistant to Entomologist

James W. Harrison, B.S.
Student Assistant to Director of Engineering Department

George Cochran Fant, B.S.
Student Assistant, Physics Division

John Dreher Schuler, B.S.
Student Assistant, Agricultural Department

Landy Boyd Altman, B.S.
Student Assistant, Agricultural Department

HENRY ABRAM ADAMS
Meriwether, S. C.

Textile Engineering; Corporal, Sergeant: Student Press Association; Corresponding Secretary, Member Investigating Committee, Columbian Literary Society; Bible Class; Junior Textile Science Club; Senior Textile Science Club; President Edgefield County Club; Senior Dancing Club; Senior Privates; Gymnasium Team, '10-'11.

"Harry" has been one of the Class of '12 since the fall of 1908. Some say he is a hard student, but peculiar to say, he has never been known to study later than 8:30 o'clock. His favorite pastime is letter writing, and he has gained a marked proficiency in this particular line. Letters to the right of him and cards to the left of him is the way in which you usually find him. He prefers to have his name on the sick list rather than to attend drill, especially if it be a very hot or a very cold day. In view of his extensive studies in the textile arts, he will invent a machine whereby the superintendent may start a cotton mill from his bedside at six o'clock and remain in bed until eight o'clock.

"In my younger days, I was a timid boy."

THOMAS CRAWFORD ADAMS
Rock Hill, S. C.

Textile Engineering; Corporal, First Sergeant, Captain; Captain Picked Company; Y. M. C. A.: Sophomore Dancing Club; Junior Dancing Club; Senior Dancing Club; Cotillion Club; Commencement, Marshall, '10-'11; President Junior Textile Science Club; President Senior Textile Science Club; Vice-President York County Club; The Boulevard; Pennant Club.

Where did "Doc" or "Dutch" come from? The Hill of Rocks undoubtedly! His fine physique, accompanied by a sound mind and commanding figure have made him the conspicuous Captain of the Picked Company. Seldom is there such a character at Clemson as "Tom," who came here about the middle of the present century. Until his Junior year, he was a diligent student and devoted all of his time to his studies, but during his Senior year he contracted a severe case of "effeminitis," and his studies have suffered accordingly. Doc is an all-round good fellow, and is liked by all who know him. May we have more like him. Doc will invent a process of making silk from cotton and will be heralded as a benefactor by the women of the world.

"The man who gets a wife, Gets a noble thing."
James Norwood Ancrum
Camden, S. C.

Agriculture III; Literary Staff Taps, '11-'12; Literary Critic Calhoun Literary Society; Junior Chemistry Club; Senior Chemistry Club; Senior Privates.

"Norwood," "Jane," or "Jonathan" is easily recognized by the absence of a cap, except on the extreme back part of his head, and the habit he has of exposing his dainty little ankles by the rolling of his trousers to prodigious heights. His power of argument is phenomenal and, in some cases, convincing. As a joketeller, he has had possession of "Fido" for several years. Jane's ability is of the very highest, and his scholarship is exceptionally good. Difficult, indeed, would it be to find one who is his superior as an entertaining conversationalist. His Arabian Tales of the happenings in and around Camden are truly the productions of a genius. Give him his pipe, a book or a magazine, and his mandolin, and the sun may set in the East for all that he knows. Jane's success is assured, if he does not become a professional fisherman, or a vendor of peanut butter and crackers.

"I cannot tell how the truth may be; I say the tale as 'twas said to me."

Harry Walker Anderson
Walterboro, S. C.

Textile Engineering; Secretary and Treasurer, Vice-Director of the Brotherhood of St. Andrew; Bible Class Leader, '10-'11, '11-'12; Missions Committee Y. M. C. A., '11-'12; Pendleton Guards; Sophomore, Junior and Senior Dancing Club; Senior Privates.

Harry has had many interesting experiences at Clemson, having served under two Presidents and three Commandants. He is intimately acquainted with the present Commandant, having had frequent interviews with him as to where he should room, and whether or not it were more important to have a parade of his own in Columbia, or attend the street parade of the corps. Harry is fond of poetry, particularly of writing it. His poems have never been published, but all the girls he meets are familiar with it. With his violin and his poetry, Harry is sure to make a player-poet of some note.

"Our doubts are traitors and make us lose the good we oft might win by fearing to attempt."
Barnwell Rhett Bacot
Charleston, S. C.

Civil Engineering; Corporal, Sergeant, Captain; Y. M. C. A.; Pendleton Guards; Senior Dancing Club; Cotillion Club; Senior Civils; Class Football, '10-'11; Scrub Football. '10-'11.

Rhett hails from the "Bottry," as is indicated by his gigantic stature. His military bearing was soon found out and, consequently, he was made a First Sergeant. Rhett, however, preferred to work for Uncle Sam, and he soon resigned. The Commandant could not, however, afford to lose this military genius, so he became a Captain, much to the delight of those who wish to beat out of reveille. He has proved of what mettle he is in many a hard-fought game. His favorite expression of "For the love of Mike" keeps those on the sidelines posted as to where he is in the game. Rhett's modesty, unselfishness and the conscientious way in which he always performs his duty have won for him the respect and admiration of his classmates. Therefore, his future is certain to be rewarded with success.

"And behold, there arose a military genius."

Joel Ashford Bates
St. Mathews, S. C.

Agriculture III; Corporal, Sergeant, Lieutenant; Junior Class Cooperative Committee; Sophomore Dancing Club; Junior Dancing Club; Senior Dancing Club; German Club; Junior Chemistry Club; Senior Chemistry Club; Scrub Football, '08; Varsity Football, '09-'10; Scrub Baseball, '09-'10; Varsity Football, '11.

"Pip," "Joe," or "Baby Face" are all exceeding descriptive of this youth who has lumbered along through college, changing from a cute, tender "rat" to a star fullback on the Varsity. Still he has by no means lost his baby face on the gridiron. As a dancer, he has risen to no little gracefulness. Joe is so good natured that he has on only a very few occasions been known to stay awake for more than ten minutes at a time in class room. He is easily led around by the "jeans." On the football field he won the well deserved title of "War Horse." Joe will either manufacture the latest models of trousers, or coach some football team.

"Here, take this and buy yourself a toothpick."
Allen Stanley Bedell  
Greenville, S. C.

Civil Engineering, Chemistry and Geology; German Club; Senior Dancing Club; Calhoun Commercial Club; House of Mirth.

This youth is a good illustration of the fact that a very large man can be put in a very small suit of clothes. While five feet is a very liberal estimate of "Runt's" longest dimension, he has the mental and moral ability of a much larger man. Runt arrived at Clemson some four years ago, via Porter's and Georgia Tech. Since that time he has been in hot pursuit of the civil and metallurgical courses, with good prospects of overtaking both of them. For the past two years Allen has been a day cadet, living at Calhoun, because that place is one mile nearer Greenville than is Clemson.

"Give me the ocular proof."

Thomas Ernest Bell  
Hartsville, S. C.

Agriculture II; Corporal, Sergeant, Lieutenant; Recording Secretary, Literary Critic; Vice-President Calhoun Literary Society; Y. M. C. A.; President Jas. H. Carlisle Sunday School Class; President Darlington County Club; Billet Doux Authors; Junior Veterinary Science Club; Sophomore Tennis Club; Pendleton Guards; Senior Bulls; Class Football, '09-'11; Varsity Football, '11-'12.

If you don't like Ernest, you can't like anybody. He is so good and genial a fellow, that you cannot help liking him. His greatest delight is whipping a whole score of his county friends and minding the door at the same time. His appetite is both liberal in its magnanimity and cosmopolitan in its adaptation; hence his very natural desire to return to the soil and raise livestock, vegetables and fruits. His experience in football will serve him well in coping with the Southern Mule and other obstacles on the road to fame. He will sit up until midnight to gratify his letter-writing propensities. His farm near Hartsville will be a Mecca for the hungry and thirsty.

"A spacious farm, a good piano, a ——, and the world is mine."
Paul Lee Bissell
Charleston, S. C.

Civil Engineering, Chemistry and Geology; Class Artist, '10-'11; Chairman Senior Class Committee, '10-'11; Art Editor Taps '11; Glee Club, '09-'10; President, '10-'12; German Club; Calhoun Commercial Club; Junior Hop Committee, '09-'11; Senior Dancing Club; Scrub Football, '08; Scrub Baseball, '08-'10; Varsity Football, '09-'11; Captain Varsity Squad, '11-'12.

Probably the briefest and, at the same time the most accurate, description that can be given of Paul is a statement once made by one of his friends: “Everything that Paul does is done well—and he does everything.” This lad from the “Bottry” isn’t simply an athlete, an artist and a musician, but he is among the best athletes, the best artists, and the best musicians in college. Likewise, when he chooses to take the trouble, he is a student of exceptional ability.

James Wiley Blackwell
Darlington, S. C.

Mechanical-Electrical Engineering; Corporal, Drum Major; Pendleton Guards; Secretary-Treasurer German Club, '10-'11; President German Club, '11-'12; President Junior Electrical Science Club; President Senior Electrical Science Club; Sophomore, Junior and Senior Dancing Clubs; Darlington County Club; Darlington Bunch, '09-'10; Senior Privates; Assistant Manager Commencement Hop, '10-'11; Commencement Marshall, '10-'11.

“Old Lady,” “Black,” or “Jamie” fit equally well one who has, by his numerous good qualities, his force of character and his personality won the respect and esteem of a large number of friends. He is a studious, ambitious and tireless worker. He has a heart to resolve, a head to contrive and a hand to execute. It is conjectured that he got the name “Old Lady” from the shy dimples which he has. His ready tongue has made of him a well known personage among the fairer sex. It is not known whether he will run a dancing school, or sell “Dopes” and sandwiches.

“I was born for courts or great affairs,
I pay my debts, believe, and say my prayers.”
Oren Bradford Brodie

Clemson College, S. C.

Civil Engineering; Corporal, Sergeant; President Cotillion Club, '11-'12; President Senior Dancing Club; House of Mirth; Senior Privates; Sophomore Dancing Club; Junior Dancing Club; Commencement Marshal, '10-'11; Manager Junior-Senior Hop, '10-'11; Assistant Business Manager Tiger, '10-'11; Boulevard, '10.

"Pete," the noble and the true, entered the Prep Kingdom, not knowing any better when he reached here direct from the Sand Hills. He has spent a great part of his life at Clemson, prolonged probably by frequent pleasure trips to Seneca and neighboring towns; not, however to Pendleton on April the first, as a special message from the "Board of Arbitration" said to him: "Stay Here!". All who have had the pleasure of knowing Pete have freely given him the respect and esteem that he deserves. Likewise, he has been a competent and faithful leader in many phases of college life. On referring to almost any "Hobo," it will be found that his record as a Civil Engineer has been among the best. Possessing the character and business qualities that Pete does, there is no doubt as to his future.

"Let the World Glide."

Andrew Joseph Brown

Liberty, S. C.

Mechanical-Electrical Engineering; Sergeant, Lieutenant; Junior and Senior Electrical Science Club; Bowery Rounders; Vice-President Pickens County Club, '10-'11; President Pickens County Club, '11-'12.

"Joe," the future Westinghouse shark, hails from Liberty. He came to Clemson an innocent, unsophisticated youth from the hills, but association with "B J.," "E. E." and "Crip" has sent him to the bad. He occasionally surprises himself—as well as everybody else—by answering a question in Electricity. He is the greatest talker in the Class, but never says anything, unless it is in the recitation room, and not then, until all the rest have flunked out. Joe is modest and every inch a gentleman, and this accounts for his large number of friends.

"Oh, what may man within him hide.
The angel on the outward side."
George Walker Byars
Gaffney, S. C.
Agriculture I; Corporal, Lieutenant: Class Poet, '08-'09; Class Historian, '09-'10; Secretary and Treasurer Class '10-'11, '11-'12; Senior Cooperative Committee, '11-'12; Corresponding Secretary Calhoun Society: Y. M. C. A.: Sunday School: Bible Class; Sophomore, Junior and Senior Dancing Clubs; Cotillion Club; Secretary and Treasurer Cherokee County Club, '09-'10, '10-'11: Glee Club, '10-'11, '11-'12; Clemson Minstrels, '10-'11: Clemson Comedy Co., '11-'12: Pennant Club; House of Mirth: Senior Bulls' Club.

George, as everyone knows him, entered Prep some six or seven years ago with the fixed determination of specializing in Agriculture but, instead, he specialized in Fresh Math for three years, under "Little Joe"; whereas, he is now learning "Horse Dentistry" under "Doc." We know him as an easy, good natured, witty fellow, because he is not at all adverse to the ladies, his friends hear from him many a thrilling exploit along this line. He is well known for his habit of wearing a different tie each day. He has the proper mixture of bluff and ability and, therefore, we predict for him a telling success in life.

"Chew my tobacco and spit my juice,
Don't ask me why—it ain't no use."

Wendell Mason Byrd
Darlington, S. C.
Mechanical-Electrical Engineering; Sergeant: Junior Electrical Science Club; Senior Electrical Science Club; Darlington County Club; Senior Privates.

It is not definitely known how or why this wonderful specimen of the species of birds came to Clemson. However, it is generally known that he was found and captured in the wilds around Darlington. He escaped and flew to Clemson in the fall of 1908. While here, Wendell has made numerous and lasting friends. With his genial disposition, his strong character and his winning ways, no one would make a better friend. He is known to all the cadets as "The man who never worries": not even reveille or chapel seems to stir him in the least. It is not known what line he will follow after graduation, but we predict a grand success in the line he chooses.

"He who wins what we prize
Is a hero in our eyes."
John Calhoun Caldwell  
Campobello, S. C.

Civil Engineering; Corporal, First Sergeant, Captain; V. M. C. A.; Civil Engineering Club, ’11-'12; Rickety Rackety Eight; Junior Tennis Club; ’23” Club; Spartanburg County Club; Representative at Inter-Collegiate Tennis Meet.

As the gentle breezes blew over the upper portion of the Piedmont region, they brought to this youth the first faint whisperings of Clemson, a school which would satisfy his greatest ambition—that of becoming a Civil Engineer. For four years now John has been in Clemson, where he has studied “Hobo,” played tennis, drilled his Company and sent innumerable letters to the Tarheel State. John has rather an enviable record both in scholastic and military lines, for his reports have been filled with “I's,” and a Captaincy has crowned his military efforts. He will never be satisfied until many great engineering feats have been accomplished by his quick brain and skilled hand.

“He did the utmost bounds of knowledge find,  
Yet found them not so large as was his mind.”

Robert Deaver Caldwell  
Blacksburg, S. C.

Agriculture III; Rifle Team, ’10-'11; Junior Chemistry Club; Senior Chemistry Club; “23” Club.

Deaver is a native of Asheville, N. C. At an early age he moved to the grand Palmetto State. After two years of recreation at the College of Charleston, he decided to come to Clemson. He is an exceptionally good student and has a good record. His favorite pastime is hunting and performing freak experiments in the Chemical Laboratory. We predict for Deaver a successful career in life, realizing that his ambition is that of a grower of fruit.

“Silence is more musical than any song.”
Spencer Morgan Connor
Smoaks, S. C.

Agriculture I; Sergeant, Lieutenant; Y. M. C. A.; Junior Clodhoppers; Senior Agronomy Club; Junior Dancing Club; Senior Dancing Club; Pendleton Guards.

This jolly good fellow, who came to Clemson in '06, is one of the few remaining members of the Pendleton Guards. Spencer will throw aside his textbooks any time to help plan a joke on our Y. M. C. A. President. He spends a large part of his time in in 138, smoking his pipe and dreaming of the days when he will own a model country home and can lead a life befitting a man of his leisurely inclined disposition. Spencer reached the height of his military career when he was appointed Second Lieutenant of "I" Company. His task after graduating will be the making of Smoaks into a city.

"My girl and my pipe, and the world is all right."

Mars Leroy Cooper
Blythewood, S. C.

Agriculture I; Corporal, Sergeant; Calhoun Literary Society; Y. M. C. A.; Bible Class; Sunday School; Junior Agronomy Club; Senior Agronomy Club; President Fairfield County Club; Senior Privates.

This fair flower blossomed for some years in the backwoods of Fairfield County, but, on catching a gleam of sunshine from the outer world, he flourished so luxuriantly that he had to be transplanted to Clemson, where he has brought forth some good fruit. When not at classes, Mars can be found in his room, gazing intently at a certain photograph, or else writing to the original. He is a man with a soul, a mind and a will—but with very little tongue. After graduation, he will return to the good old farm and revolutionize the agricultural industry of Fairfield County.

"Let me be no assistant for a State,
But keep a farm and a pasture great."
HENRY STEWART COVINGTON
Bennettsville, S. C.

Agriculture II: Sergeant; Chaplain Calhoun Society; '11-'12; Y. M. C. A.; '08-'12; Bible Class; Vice-President Marlboro County Club; '11-'12; Junior Veterinary Science Club; Senior Bulls; Senior Privates.

Henry, or "Bub," is the jolliest, most good natured man in the Class. Everyone knows what to him is the garden spot of the universe. His liking for potatoes is equalled only by his desire to sleep, while the unfortunate have to attend reveille. As a pessimist, he is a signal failure, but in appreciating and telling a good one he is a great success. The world at large will be a loser when he puts into execution his intention of settling down in Marlboro County and starting a chemical laboratory. His liking for Chemistry is almost beyond human understanding. However, his liking for stock-judging almost equals his liking for chemical equations. Bub's scholarship is far above the average, as are the number of his friends. For Bub the future is bright, if he does not become persuaded by some one to enter the ministry, or to grow a new kind of potato.

"Large is his bounty, his soul sincere."

JAMES ROY CRAWFORD
Clinton, S. C.

Civil Engineering: Sergeant, Captain; Class Cooperative Committee; Assistant Business Manager Taps, '11-'12; Business Manager Chronicle; Recording Secretary; Marshall; President Calhoun Literary Society; Y. M. C. A.; Head Waiter; '11-'12; "23" Club; Laurens County Club; Junior Civil Engineering Club; Senior Civil Engineering Club.

"Jim," with his jovial good nature and winning manners, has won for himself many friends and not a few honors. He is thoroughly business-like in all of his undertakings, and this probably accounts for his position as Business Manager of the Chronicle. Jim's chief failing seems to lie in his gross inclination towards B. S.—his development in that direction being nothing short of marvelous. His peculiarity lies in the fact that he has no natural antipathy for the fair ones; however, he has been known to become desperate on the subject at times. It is hoped that he will make as great a success in life as he has made as a Captain and a student.

"What shall I do to be forever known.
And make the age to come my own?"
Louis St. John David

Greenville, S. C.

Civil Engineering; Corporal, Sergeant, Captain; German Club; Senior Dancing Club; Junior Dancing Club; Sophomore Dancing Club; House of Mirth; Art Staff "Taps"; Rickety Rackety Eight; Senior Civil Engineering Club; Junior Civil Engineering Club.

"Zip," or "B," as he is sometimes called, journeyed to Clemson in the fall of 1908 from the Metropolis—Greenville. There is no more studious Senior in college than Zip. He has won fame as a soldier, rising from a private to Captain. In literature his work consists of missives, which are sent from the Gulf of Mexico to Chesapeake Bay, in care of a two-cent stamp. He can sketch and illustrate in a finished manner, and it is said that he once drew a cup of coffee with a pencil. That he is a professional heart-breaker, a brazen fascinator of femininity and the Beau Brummel of Tigerville cannot be denied. He has been charged by the post-office authorities with cruelty to its carriers. We do not know whether his talents will be devoted to love—for he is especially fond of pretty pictures and pretty girls—or to the achievement of something in the engineering world.

"Men have died from time to time, and worms have eaten them, but not from love."

Howard Symmes Davis

Charleston, S. C.

Mechanical-Electrical Engineering; First Lieutenant and Chief Musician; Y. M. C. A.; Manager Clemson College Orchestra; House of Mirth; The Trio; Sophomore Dancing Club; Junior Dancing Club; Junior Electrical Science Club; Senior Electrical Club; Pendleton Guards.

Howard, better known as "Molly," or "Muss," blew in from Charleston several years ago, and at once started to do great things. Besides his accomplishments in the scholarship line, which are marred only now and then by numerical errors, Molly is a musician and a narrator, as well as a critic of high degree. Those who have not heard his lectures on "What Is to Be Seen Across the Pond," or have not read his criticisms on "Humanity," have indeed missed something. Molly intends to follow a profitable business—to wait for a profitable Leap Year, and then—to live.

"I am not at all frightened, you understand;
But if I am called on to fight for the land,
I want to be ready to play in the band."
JOHN MILLER DREHER
Irmo, S. C.

Chemistry and Geology; Corporal, Sergeant; Y. M. C. A.; President Lexington County Club, '11-'12.

"Sarge" was originally a hoosier of the mountains of West Virginia, but owing to the severe climate he was compelled to migrate to the sunny Palmetto State. After attaining the requisite education, Sarge joined, in Fresh, the Class of '12. The Ancient Mystery of Geology he selected as his shrine and right well has he worshipped at this shrine, as is shown by his record, attained with an expenditure of very little effort. Sarge is a recognized authority on smoking tobacco and the mail route to a nearby female college. His pipe and his girl are sufficient for him. He will discover a gold mine, but whether it will be of earth or flesh, we know not.

"If the world lay at my feet, I would invest it in tobacco."

THOMAS SMITH EVANS, JR.
Cheraw, S. C.

Agriculture I; Sergeant, Lieutenant; Marlboro County Club; Sophomore, Junior and Senior Dancing Clubs; Cotillion Club; Hop Committee; Junior Agronomy Club; Senior Agronomy Club.

This is a farmer captain of industry, from Cheraw, S. C. After causing the panic of 1907, he retired from the commercial world and went to Clemson in 1909 to fathom the mysteries of science. That "Borate" has a wonderful intellect is shown by the fact that he has spent only three years in getting his "dip," whereas it takes the average man four. His friendship for everybody but the professors is lasting. Though a Lieutenant, he is not generally considered a military man, but he established a record for himself while O. D. at the State Fair. He is a close student of Agriculture and, if success will only crown his efforts, he will surely make old Marlboro County the Garden Spot of the World.

"A heart to resolve, a head to contrive, and a hand to execute."
JOHN FURMAN EZZEL
Cherokee, S. C.

Agriculture I; Sergeant, Lieutenant; Secretary-Treasurer Sophomore Class; President Junior Class; Business Manager Tiger, '11-'12; Recording Secretary, Literary Critic. Orator's Medal, '12; President Columbia Society; Y. M. C. A. Cabinet: "23" Club; Spartanburg County Club; Pendleton Guards; Junior Agronomy Club; Senior Agronomy Club; Class Football, '08-'09; Varsity Football, '09-'10; Track, '09-'12; Captain Track Team, '11-'12; College Record Hammer Throw; Two S. I. A. A. Medals, '10-'11.

This smiling Spartan youth acquired his powerful physique by climbing the foothills of the Blue Ridge. "Sam" is a great admirer of a good joke, as well as being a good athlete and debator. He frequently takes long flights into the realms of oratory for the edification of his friends, but he is never happier than when he is crossing swords with "Daddy"—his argumentative roommate. On account of his very low stature—6 feet, 3/2 inch—he will enter the ministry or study law, after which he will become mayor of Cherokee.

"The fool hath planted in his memory an army of big words."

WALLACE DEAN EZZEL
Mayo, S. C.

Agriculture III; Corporal, Sergeant, Lieutenant; Vice-President, Debater Columbia Literary Society; Junior Chemistry Club; Senior Chemistry Club; President Spartanburg County Club; "23" Club; Sophomore and Junior Class Football Teams.

Desiring to become a greater conqueror in various lines, "W. D." forsook the shady nooks of upper Spartanburg County and wended his way to Clemson in '07. Since that time he has been an ardent supporter of "The Tigers." except for a brief furlough granted him for his brave stand at Old Pendleton. But with the typical Spartan spirit, he resumed his studies after his furlough and, considering his efforts, he has achieved a remarkable success. Like many other peculiar compounds, he is liable to explode at almost any time. As a chemist, he would probably have achieved a marked success had he not spent so much time writing letters. Only the future can tell what this "X" will be.

"Creatures like these can break with ease Feminine hearts wherc'er they please."
Arlington Pope Fant

S. C.

Agriculture 1; Corporal, First Sergeant, Major; Vice-President Junior Class; President Senior Class; Chairman Honor Committee; President Woodrow Wilson Club; Chairman Class Ring Committee; Class Cooperative Committee; Advertising Manager Taps, '12; Y. M. C. A.; Junior and Senior Agronomy Clubs; Secretary and Treasurer Cotillion Club, '10-'11; Vice-President Cotillion Club; Junior Hop Committee; Secretary-Treasurer Sophomore, Junior and Senior Dancing Clubs; First Sergeant Pendleton Guards; Commander Pendleton Guards; President Electric City Club; Secretary and Treasurer College Rifle Team; Secretary and Treasurer Anderson County Club; K Club; Pennant Club; V. S. of "E" Co.; Scrub Baseball, '10-'11; Athletic Council, '11-'12.

The "Electric City" has every reason to feel proud of this distinguished son of hers. Besides the many class honors that he has had conferred upon him, he has had an enviable military career, starting with the charge on Pendleton Heights and ending with a Major's commission. "Ape" is respected and esteemed by all of his classmates, but he is the only man in the Class who believes that Kentucky is more famous in one sense than is South Carolina.

"Titles of honor add not to his worth, Who is an honor to his title."

Claude Banks Faris

Fort Mill, S. C.

Agriculture 1; Sergeant, Captain, Class Poet, '10-'12; Literary Staff Taps, '11; Editor-in-Chief Taps, '12; Reporter to Tiger; Declaimer's Medal in Annual Celebration, '12; Prosecuting Critic; Censor; Reporting Critic; Marshall; Secretary; President Palmetto Literary Society; Vice-President Y. M. C. A.; Bible Class Leader; Sophomore Tennis Club; "23" Club; College Tennis Club; Bohemians; York County Club; Junior Agronomy Club; Senior Agronomy Club; Class Football, '09-'11.

"C. B.," or "Bones" is one of our most successful captains. He is most active in all phases of college work, especially in the capacity of a reformer! He seems to have a natural hatred for all kinds of bugs, as he has been known to travel miles upon miles in order to kill just one bug. His worst failing is undoubt-edly his hot-air propensities, the most striking examples of which are his hot-air Sunday School talks. The solar plexus of "Sam" or " Gus" is often the recipient of many blows which come from his unquestioned strength.

"As true as steel, and every whiz as firm."
CHRISTIAN SOJOURNER FOLK

Denmark, S. C.

Agriculture I; Palmetto Literary Society; Y. M. C. A.; Bible Class; Sunday School; Vice-President Bamberg County Club; Junior Agronomy Club; Senior Agronomy Club; Senior Privates.

“Chris.” or more commonly known as “Hawk,” is a farmer from birth. He has specialized in corn judging, being able to score the grain before the cork has been pulled. After graduation, “Hawk” will settle down near the little City of Denmark and lead the life of a country gentleman. Then, indeed, will his corn-judging ability stand him in good stead. Hawk will go down in history as a respector of authority.

“His words set the world to thinking.”

HENRY ALONZO FREEMAN

Princeton, S. C.

Agriculture III; Calhoun Literary Society; Y. M. C. A.; Bible Class; Sunday School; Student Press Association; Laurens County Club; “23” Club; Anti-Street Parade Club; Junior Chemistry Club; Senior Chemistry Club; Senior Privates; Junior Class Football.

Be not afraid, he has been tamed by four years’ stay at Clemson, though you will probably not believe it. “Monk” hails from the pine-covered hills of Laurens. His powerful frame and matchless vocabulary were developed by a close association with an excellent specimen of the Southern mule. He is very modest and does not like to show off his fine military carriage, especially in street parades. As a detective, he is wonderful, having on several occasions trailed to—and brought from unknown haunts—large quantities of milk and butter. He will shine as a chemist or a military scientist.

“Wit and humor covereth a multitude of sins.”
John Harold Gage
Union, S. C.

Mechanical-Electrical Engineering; Corporal, Sergeant, Lieutenant; First Lieutenant Picked Company; Y. M. C. A.; Senior Dancing Club; Junior and Senior Electrical Science Clubs; President Union County Club; Pendleton Guards; Track Team, '09-12.

"General," as he is usually called, is universally known to hail from Union; at least, those who have ever heard him talk—and that is every one in college. His ambition to become a great electrical engineer, his noble head and large amount of good luck, put him with ease in the Senior Class, and he has been taking his ease ever since. Harold has taken part in every track meet for the past three years and we hope to see his name enrolled among the winners at the next Olympic Games. Because of his great energy and endurance, we expect to see him in the near future filling the position of President of the General Electric Company.

"A winning way stands high today."

Richard Wells Galphin
Holly Hill, S. C.

Agriculture I: Sergeant; Calhoun Literary Society; Y. M. C. A.; Sunday School; Bible Class; Vice-President Orangeburg County Club; Junior Agronomy Club; Senior Agronomy Club; Senior Privates.

"Sarge," better known as "Reverent," comes to us from the lower part of Orangeburg County. In his Junior year, while trying to put Calhoun on limits, he suffered severe injuries by being pushed off the sidewalk. After he had fully recovered from his injuries, he felt that he was not able to spend as much time in military affairs as he formerly had. "Reverent" is so fond of the subject of Economics that he is continually discussing the cold-blooded science with his professor, even after the said professor has told him all that he knows on the subject. After the trials and tumults of college life are over, Sarge is likely to go back to the farm and win fame as a farm demonstrator and a judge of cattle.

"Smooth runs the water where the brook is deep."
Larry Cowan Gilstrap
Pickens, S. C.

Agriculture II; Sergeant; Palmetto Literary Society; Y. M. C. A.; Bible Class; Junior Veterinary Science Club; Senior Veterinary Science Club; Pickens County Club; Senior Privates.

"Ichabod" came strolling into college some time in the past—it is not known definitely when. No one was afraid of him, for he looked as if he would not harm even an old boy, all of which goes to show that appearances are very fickle. His progress toward his "dip" has been as steady as the swing of the stars. His good nature has never been ruffled in the least. Larry is a military genius but, sad to say, this fact has never been discovered by the Commandant. His highest ambition is to be School Commissioner of Pickens County.

"Judge him not by his appearance."

Arthur Kelly Goldfinch
Conway, S. C.

Textile Engineering; Sergeant, First Lieutenant; Chronicle Staff, '11-'12; Taps Staff, '11-'12; Corresponding Secretary, Chaplain Calhoun Society; Treasurer Y. M. C. A., '11-'12; Secretary-Treasurer Sunday School, '11-'12; Bible Class Leader, '10-'11, '11-'12; Delegate State Sunday School Convention, '10-'11; President Horry County Club, '11-'12; "23" Club; Vice-President Senior Textile Science Club.

"Author," more familiarly known as "Old Lady," received his preparatory training at Borroughs High School, Conway, S. C. He entered Clemson College in 1908, a very quiet, shy little "rat." During four years at college, he has made a most enviable record. Because he has acquitted himself like a man, he has made many true friends, both among the students and the faculty, being the special pet of the Professor of History and Economics. That he will be successful in life can be safely predicted, and his greatest achievement will be the erection of the first million-dollar cotton mill in Conway.

"Be courageous! Strive with manly power against sickly fantasies, and enter, as I do, hopefully into active life."
William Roy Gray

Gray Court, S. C.

Agriculture I: Corporal, First Sergeant, Captain; President Laurens County Club; Class Football, '09-'10; Captain Class Football Team, '10-'11; Varsity Football Team, '11-'12.

A son of whom old Gray Court may well be proud is "Bill." He came to Clemson in '07, but was disabled in the memorable charge on Pendleton Heights. On his return, his heroism was not forgotten by the authorities, and for his valor he was awarded a Corporal. With this as a start and by a strict observance of all military rules, he rose to the rank of Second Captain. Bill has preserved great secrecy about his love affairs, but the secret will be out soon after he leaves college. No doubt he would star in the medical profession, but we have a greater need for him in the Agricultural lines—a wise choice has he made.

"He who deserves well, needs not another's praise."

Carl Martin Hall

Anderson, S. C.

Agriculture II: Sergeant; Columbian Literary Society; Y. M. C. A.; Senior Privates; Electric City Club; Anderson County Club; Junior Agronomy Club; Senior Bulls; Student Press Association.

Near the world-famed village of Starr did this piece of humanity discover America. After staying at Clemson a year, he decided that the Starr light was too weak for him; so he migrated to the Electric City. "Hall, C." or "C. M." is a hard-working student, who has made a specialty of dairying, especially milk drinking. He is very military, seldom ever being absent from reveille. He is one of "Doc's" most regular patients, and he can be seen almost any time loa sing around the dining room of the hospital. Altho' not a marked athlete, he seems to get a very large amount of exercise from the weekly chimes at the veterinary hospital. He will develop a peculiar strain of animal, known as the gasoline mule.

"Resolved to ruin or to rule the State."
Evey Eugene Hall
Fort Mill, S. C.

Agriculture I: Literary Staff Taps, '12: Prosecuting Critic, Debater's Annual Celebration. Secretary, President Palmetto Literary Society; Y. M. C. A.; Sunday School; Junior Agronomy Club; Senior Agronomy Club; "23" Club; Senior Privates; Students-Press Association.

In September, 1908, he came to Clemson and joined in the scrap for a "dip" and learning. He is a man of great letter writing ability. Had he spent half the time on books that he has spent on billet-doux, he would have stood at the head of his Class. He has always been a private and his own boss, and has never regretted it. The amount of syrup that he can consume to the square minute is far more than the capacity of any other man at college. "Gus" is not of the faint-hearted breed and does not fear to put his theories into practice. He has been known to chase a spore of anthracnose for a hundred yards with hat in one hand and a microscope in the other.

"Give me, kind heaven, a private station,
A mind serene for contemplation."

Robert Ruffner Hall
Chester, S. C.

D. D. C.
Senior Privates: Cotillion Club; Senior Electricals: Honk Honk Association.

"Bob" first went to Davidson, where he advanced as far as Soph. Becoming tired of college, he went to work and, in the meantime, he got married. After several years, he again decided to try college life and joined us in Sophomore. Mr. Hall has been accused of serving punishment inflicted upon him by his brother-in-law by repairing an automobile belonging to the said brother-in-law—"Der Captain." You may judge him to be rather old, but Bob is still one of the boys.

"Take my life, but save my pipe."
EUGENE EARL HAMLIN
Anderson, S. C.

Civil Engineering; Sergeant, Lieutenant; Palmetto Literary Society; Vice-President Electric City Club; President Anderson County Club; Sophomore Dancing Club; Junior Dancing Club; Senior Dancing Club; Junior Civil Science Club; Senior Civil Science Club.

"Runt," or "Mouse" might well be termed the mascot of the Class, since he is both small and cute. However, he resents stoutly the charge of being classed as small. Has a merry laugh at almost any time, especially when he is within the range of a good joke. As a consumer of sandwiches—well, he at least has the habit. Runt has an exceptionally large amount of ability expressed in terms of gray matter and, consequently, he will receive his "dip" with a good record and the expenditure of very little effort. His peculiarity is the custom he has of always attending dinner and reveille, which habit he formed despite influences to the contrary. Mouse has an exceptionally bright future before him, and it can be dimmed only by his following his inclinations and setting up a sandwich stand.

"He made an instrument to know
If the moon shine at full or no."

DEWITT TALMAGE HARDIN
Lowndesville, S. C.

Agriculture II; Sergeant, Lieutenant; Picked Company; Athletic Editor Tiger, '11-'12; Prosecuting Critic, Literary Critic, Diploma and Medal Committees Palmetto Literary Society; Sophomore, Junior and Senior Dancing Clubs; Sophomore Tennis Club; Junior Agronomy Club; Senior Bulls; Pendleton Guards; Manager Corn Judging Team; Secretary and Treasurer Abbeville County Club; Class Football, '09-'10.

"Pete," or "D. T.," is a worthy representative of Lowndesville and is one of those ambitious youngsters who makes a show in everything he undertakes and, therefore, should make a model farmer. He is likewise expert in corn judging, being able to tell every time whether or not the sample is pop corn or bottled corn. He has a rustic, woodland air and unassuming manner, except when you try to bluff him. Drinking "dopes" is a pastime with him, but making away with lemonade is a business. His graceful carriage is his idol, and right well does he worship his idol. Pete has the ability to succeed in whatever line he may choose.

"A man with determination and stickability—that's me."
George Long Hardy  
*Johnston, S.C.*

Textile Engineering: Sergeant; Columbian Literary Society; Student Press Association; '10-'12; Junior Textile Science Club; Senior Textile Science Club; Clemson College Post X. G. S. C.; Edgefield County Club; "23" Club; Senior Privates.

This man possesses a countenance that has never been blemished by any disappointments in life, though you might with difficulty believe it. He received his early education at the Johnston High School in the County of Edgefield, which has the honor of producing our greatest statesman of today. Perhaps this fact will be an inspiration for this already promising youth to become famous. As to what line of work he is likely to follow, we are not prepared to say. Numerous conversations with him lead us to believe that his ambition is to do anything from hoboeing around the world to becoming rich, dealing in real estate.

"O heart of man! Canst thou not be Blithe as the air is, and as free?"

John Gray Harris  
*Owings, S.C.*

Agriculture II: Calhoun Literary Society; Y. M. C. A.; Sunday School; Junior Veterinary Science Club; "23" Club; Pendleton Guards; Senior Bulls; Senior Privates.

"Big Un," innocent and unsophisticated, broke loose from his guards in the Styx of Laurens County and, unfortunately (for all concerned), fell into Clemson in '07. However, he soon learned the feelings of a patriot, and for his brave stand at Pendleton he was rewarded with a well deserved furlough. As soon as his furlough had expired, he joined the Class of '14. He has the instinct of a wild animal; so we cannot help predicting that he will return to his native wilds and there raise livestock to the glory of himself, Clemson College and Laurens County.

"Nature turns and wonders at her own productions."
JOHN EDWARD HARTLEY
Batesburg, S. C.

Mechanical-Electrical Engineering; German Club; "A" Company Sports; Sophomore, Junior and Senior Dancing Clubs; Senior Privates; Junior Electrical Science Club; Senior Electrical Science Club.

In the fall of 1908 "Ed" informed the inhabitants of Batesburg that they would have to get some one else to run the town, as he was leaving for Clemson. To Clemson he came with the full intention of preparing himself to take Thomas Edison's place in the world. Ed's ability and determination to overcome any obstacle make his success certain. Besides his success in Engineering and love affairs, he has on several occasions rendered invaluable assistance to the authorities. His greatest ambition is to occupy the Chair of Political Economies at Clemson.

"He will churn the Atlantic with the North Pole for a dasher."

HARLOCK WALTER HARVEY
Pineopolis, S. C.

Agriculture I: Sergeant; Calhoun Literary Society; Y. M. C. A.; Senior Privates; Junior Clodhoppers; Senior Agronomy Club; Pendleton Guards.

This good looking lad called "Sarge," or Harvey, comes from the fastnesses of Berkeley County, he being one of the '07 veterans—one of the Three Hundred who raided Pendleton, April 1, 1908. He has the greatest hatred for the institution known as Reveille, as he thinks that it is a product of the brain of a creature of the lower regions, but by many and frequent attentions to the First Sergeant he has gone thus far without becoming a member of that institution. Since he is taking special work in field crops, it is probable that he will, by failing to remove one blade of grass, cause two blades to grow where one grew before, and be hailed as an up-to-date farmer.

"Oh! does Genius dwell in such a lonely palace?"
Claude Jacques Hayden  
Cope, S. C.

Agriculture III; Literary Critic; Prosecuting Critic, Recording Secretary, Orator, '12; Vice-President Columbian Society; Y. M. C. A.; Sunday School; "23" Club; Orangeburg County Club; Junior and Senior Chemistry Clubs; Sophomore and Junior Dancing Clubs; Senior Privates; Class Football, '09-'10; Track, '10-'12; Varsity Football, '11-'12.

"Varsity" is essentially an athletic man, for he has always done his best to put Clemson to the front in all athletics, especially in football and track. Many are the tired nights that he has spent after an afternoon of training. In military lines he has risen no higher than an instructor of rats in the mystic art of drilling. But we believe that this has been his misfortune and not his fault, as he and the commandant are very chummy, except when he is serving confinements for "Bone's" yelling. His course in Horticulture at Ohio will fit him for life's work, which we believe will be for him a work of pleasure and success.

"For I am fearfully and wonderfully made."

Jacob Herbert Hayden  
Cope, S. C.

Agriculture II; Calhoun Literary Society; Y. M. C. A.; Sunday School; Bible Class; "23" Club; Orangeburg County Club; Junior Veterinary Science Club; Senior Bulls; Corn Judging Team, '12; Class Football, '08-'09; Senior Privates.

"Dumpy," better known to his classmates as "64," is always more than anxious to introduce to the rats his dear friend, "Nancy Hanks." Although 64 is one of the smallest men in the Class, his voice is neither small nor weak, and almost any time he can be heard endeavoring to create the impression that he is as great in authority and mind as he is small in stature. Dumpy, with the assistance of a well known member of the Senior Class, cornered the market in bananas, peanuts and crackers. Under the salesmanship of Dumpy and the management of his silent partner, the business was soon in a thriving condition. Bankruptcy resulted from the interference of a well known figure on the campus. As a merchant prince or a veterinarian, 64 will shine as a candle under a bushel.

"Little—but loud."
Wilbur Haile Hayes
Whitestone, S. C.

Agriculture I; Vice-President Palmetto Literary Society; Vice-President Spartanburg County Club; "23" Club; Junior Agronomy Club; Senior Agronomy Club; Senior Privates; Track Team.

Early in life "Little Willie" had a dream of better things farther West. When about sixteen years of age, he boarded a monster, which other people called a train. The conductor, seeing the bright sparkle in his eye, put him off at Calhoun, and he followed the large crowd of boys to the place of many straps and stern faces. It is here that he has labored faithfully for the last four years and, despite many days spent in the hospital, he will become a citizen in June. He will return home and develop wonderfully the cotton field of which he spoke so eloquently as a rat.

"A tender smile, Our sorrow's only balm."

Monie Sanders Haynesworth
Darlington, S. C.

Mechanical Electrical Engineering; Junior and Senior Electrical Engineering Clubs; Sophomore, Junior and Senior Dancing Clubs; Darlington County Club; German Club; Darlington Bunch; Senior Privates.

"Moony," with a personality which is attractive and with an exceptionally good nature, has won his way with ease into the companionship and confidence of all who have known him. If men are known by their works, how are we to know Moony? He is a diligent student and never forgets anything, but always worries his roommate by keeping the light on too late. With his luck and good nature we are sure that Moony will make himself famous as an electrical engineer.

"If St. Peter should have the bad taste to shut him out of Heaven, he would be lucky enough to find another and better entrance!"
George James Hearsey

Blenheim, S. C.

Agriculture III; Class Historian, '10-'11; Vice-President Class, '11-'12; Literary Staff Taps, '11-'12; Exchange Editor Chronicle, '11-'12; Athletic Editor Tiger, '11-'12; Literary Critic, Debater, Annual Celebration Calhoun Literary Society; Y. M. C. A.; Bible Class; Terrible Twelve; Sophomore Dancing Club; Junior Dancing Club; Senior Dancing Club; President Junior Chemistry Club; President Senior Chemistry Club; President Marlboro County Club, '11-'12; Vice-President Senior Privates.

The call of "Pluck," "Jim," or Hearsey will bring this jolly fellow running to any spot, especially if there is anything to laugh at. Hearsey entered Clemson in the fall of 1908; since then his genial manners, pleasant smile and infectious laugh have won him many friends. He is a bright student and well liked by all of the professors. His life work will probably be farming, at which, no doubt, he will be very successful. However, his Scientific course at Clemson and post-graduate course at the University of Illinois, which he expects to take after leaving here, will not be wasted. For he will always be known as the cross-roads authority on any scientific matter.

"'Tis good to laugh, at any rate, and if a straw can tickle a man, it is an instrument of happiness."

David B. Hill

Bamberg, S. C.

Mechanical-Electrical Engineering; Sergeant, Lieutenant; Taps Staff, '11-'12; Sergeant-at-Arms; Declainer; Orator; Chairman Committee on Amendments to Constitution and By-Laws; Recording Secretary; President Calhoun Literary Society; Y. M. C. A.; Bible Class Leader; Glee Club; President Bamberg County Club; Barracks Electrician; Winner Rayhill Medal, '12.

David, "D. B.,” or “Bunker” undoubtedly came from the sticks of Bamberg County, as is evidenced by his attainments in the singing line and the habit of tinkering with everything in sight. However, his voice won him a place on the Glee Club, and his tinkering ability the position of Barracks Electrician. As an orator he has achieved some note. His liking for short circuits is shocking in attempting to convert himself into an arc to show his brightness. As an electrician he will achieve a marked success by inventing a new stove for cooking with the use of electricity.

"All men are admired either because they are courteous, or because they are good looking."
Harry Mayne Hutson
Aiken, S. C.

Agriculture III; Corporal, First Sergeant, Captain; Chief Marshall Commencement, '11; Sophomore, Junior and Senior Dancing Clubs; Vice-President Senior Dancing Club; Junior and Senior Chemistry Clubs; German Club; Assistant Manager Baseball Team, '10-'11.

Harry, having a great ambition for military, came to Clemson and found a military career that led to a Captaincy. He is very fond of referring to Aiken as the garden spot of the universe, and his friends have come to the conclusion that he really believes it. He is happiest when he executes in the dancing hall his own version of the "Boston Dip." Many a "rat" has he instructed in the art of dancing, much to his own benefit, being senior partner in the famous "Hutson Bros. Dancing School." He is also extensively known as "Fig Newton"—why, he alone can tell. Harry will either teach a dancing school, or be a wholesale dealer in Fig Newtons.

"On, on with the dance—Work never hurt this man."

*O'Neal Jacobs
Newberry, S. C.

Agriculture III; Corporal, First Sergeant, Captain; Y. M. C. A.; Junior Chemistry Club; Senior Chemistry Club; Senior Pri-

vates.

"Jake" is one of Newberry's best. Early in his college course—in fact, as early as his "rat" year, he was awarded the title of "Major." This title he received because of his military figure and his great ambition to become a military authority. Fast, indeed, did he rise in military lines until he reached the goal of his ambition—a Captaincy. His jolly good nature and winning ways are irresistible, and to know him is always to like him. His adherence to principle is far above the average. His power of keeping the "rats" in the straight and narrow way is almost superhuman in its efficiency. Only the application of his native ability is necessary to his complete success.

"Thought is deeper than all speech; Feeling deeper than all thought; Souls to souls can never teach; What unto themselves was taught."

*Left College, February 1, 1912
HENRY CALDWELL JENNINGS  
Cope, S. C.

Agriculture I; Corporal, Sergeant, Lieutenant; Literary Staff Taps, '11-'12; Chief Literary Staff Chronicle, '11-'12; Censor, Literary Critic, Vice-President Palmetto Literary Society; Y. M. C. A.; Bible Class; President Orangeburg County Club.

"Squirrel" is a man whom anyone is proud to call friend. Being of a distinctly pugilistic turn of mind, it is well for the community at large that he has such an even disposition; else the damage that he would do would be appalling. For theories in Agriculture, Squirrel cannot be beat, and when he publishes his bulletin—"Pecan Culture in South Carolina"—we expect our State to lead in this industry in a very few years. Our estimation of Orangeburg County rises when we learn that this is one of her products. If Squirrel does not succeed as the man with the two-horse cultivator, he can easily fill the position of the white man's only hope.

"He knew what's what, and that's as high As metaphysic wit can fly."

ROBERT MCKAY JETER  
Columbia, S. C.

Agriculture III; Recording Secretary, President Columbian Literary Society; Bible Class; "23" Club; Junior Chemistry Club; Senior Chemistry Club; Richland County Club; Senior Privates; Class Football, '09-'10

"Jet" entered college as a modest fellow with a retiring disposition, but he soon became well known on account of his literary ability. The speeches that he makes in his room about twelve o'clock at night would bring tears to the eyes of an Egyptian mummy. He is never talkative except in class room, where he shows off his literary training. The questions he asks and the arguments he brings up would puzzle the brain of a Solomon. Jet spends his Saturdays, Sundays and vacant hours reading the "dope" columns in the sporting papers. He will become famous as the "dope" editor of The Police Gazette and as a propagator of seedless persimmons.

"His thoughts are so deep, that they never come to the surface."
EDGAR PATTERSON JOSLEY
Lamar, S. C.

Agriculture II; Sergeant, Captain; Honor Board; Reporter to Tiger, Marshall Annual Celebration; President Calhoun Literary Society; Y. M. C. A.; Bible Class; Sophomore, Junior and Senior Dancing Clubs; Vice-President Terrible Twelve; "A" Company Sports; Misogamists' Club; Billet Doux Authors; Junior Veterinary Science Club; President Senior Bulls; Darlington County Club.

Stop! Look and listen! What was that I heard? Why, it was only Edgar, "way down in the tobacco fields of Darlington County, pulling the bell cord over old Mike. Because of his success as a practical farmer and because of his great love for the mule, he decided to study Animal Husbandry. He is particularly fond of Math and, after consulting Colonel Shanklin, he decided to specialize in Trig! His jolly disposition and open heart have won for him a host of friends. His power of "spelling" will win him his way when he represents his County in the Legislature. "Ed" intends to engage in scientific farming and stock raising; and he may be found in Georgia.

"What care I, when I can lie down and rest,
Kill time, and take life at its best."

HARRY ORCHARD KAIGLER
Sandy Run, S. C.

Civil Engineering; Junior Civil Engineering Club; Senior Civil Engineering Club; "23" Club; Pendleton Guards; Senior Privates.

Harry is a relic of '06, and he has, during his stay at Clemson, made every effort to get his classmates to use better brands of tobacco. He is an unquestioned authority on tobacco, having studied it from both a practical and a theoretical standpoint. During his Senior year, he became very popular with the faculty, having formed an alliance in trade with the energetic owner of the Cadet Exchange, and a very intimate friendship with the "hobo" element of the faculty. Harry's reputation in Civil Engineering is firmly established. He has already signed a contract to build the power plant, which will convert the elements of the air into available plant food.

"I would fain die a dry death."

**Harold Stevens Kennerly**

Greenwood, S. C.

Agriculture I; Corporal, Sergeant, Lieutenant; Calhoun Literary Society; Clemson College Corn Judging Team, '11-'12; Assistant Manager Baseball Team, '10-'11; Manager Baseball Team, '11-'12; Assistant Cheer Leader, '11-'12.

"Skeet," "Hoodlums," "Dick"—just pick the name that you like best—he answers to all of them equally well. He is small, but the ferocious looks and stern commands that he gives are enough to make the largest "rat" tremble and obey at once. While the line of B. S. that he hands the professors is so good that they give him the benefit of the doubt and think that he knows. Skeet is some roofer as well as a singer of some note, and he has been known to cheer a losing team to victory. His business ability is above the ordinary, and we prophecy for him a successful business career, provided he does not go to the Philippines and try to civilize the natives by teaching them singing.

"For I am nothing if not critical."

*Left College, March 1, 1912*

---

**William Reed LaMotte**

Darlington, S. C.

Mechanical-Electrical Engineering; German Club; Secretary and Treasurer Junior and Senior Electrical Science Clubs; Sophomore, Junior and Senior Dancing Clubs; Vice-President Darlington County Club; Darlington Bunch; Senior Privates.

"Short" is a man of wise judgment, a faithful friend and an agreeable companion. He is genial, good natured and amiable, with a personality above the average in strength. Short is especially noted for his professional creation of "short circuits," for never troubling trouble until trouble troubles him, and for never shirking his duties except when he is room orderly. With the best wishes of his Class, he goes out into life, and whatever profession he may follow, we predict for him a successful career.

"The man worth while is the man who can smile when everything goes dead wrong."
DAN LAMONT LATIMER
Lowndesville, S. C.

Textile Engineering; Sergeant; Prosecuting Critic Palmetto Literary Society; Junior Dancing Club; Senior Dancing Club; Junior Textile Science Club; Senior Textile Science Club; Vice-President Abbeville County Club.

"Dan" was admitted to college only after the authorities had given his case very serious consideration and had decided that, though he belied his looks, he was perfectly harmless. They also saw at once that he was fitted for some great work in textile lines—such as sweeping the floors of great cotton mills. As a mathematician under "Little Joe," he was a prodigy. It is a debatable question as to what he will do when he has received his B. S. In fact, his most intimate friends cannot tell which way he leans. However, his roommate claims that he is "Kith-leaning!"

"I would not assert with a peremptory tone.
A chin upon the face of my own."

JOHN R. W. LINDLER
Gilbert, S. C.

Civil Engineering; Corporal, Sergeant; Columbian Literary Society; Y. M. C. A.; Junior Civils; Lexington County Club; Senior Privates.

"Johnny" received his early training at the Gilbert Academy. Following the rainbow of the broad future that unfolded before him, he entered the Freshman Class and became a faithful member of the Civil section. Hitting the atmosphere in his Junior year blasted his hopes for military fame, and from the shock he has never recovered. Very secretive, indeed, is he concerning the workings of his finer feelings; and, consequently, as to whether or not he has any, remains a mystery. Johnny is a hard worker, and no doubt his earnest effort will be rewarded—and that very soon, with the Chair of History and Political Economy in some university, or as Commissioner of Drainage and Mosquito Killing he will be hailed as a benefactor by the seaboard countries.

"On the fields of Lexington will I battle with the harmless elements."
JAMIE TOLBERT LAZAR
Allendale, S. C.

Agriculture I; Corporal, Color-Sergeant, Lieutenant; Class Tiger Reporter; Literary Staff Taps, '12; Orator Annual Celebration Calhoun Literary Society; Y. M. C. A.; S. C. I. O. A. Executive Committee; Senior Dancing Club; Cotillion Club; Vice-President Woodrow Wilson Club; Jolly Minstrels Comedy Co.; Dope Club; Pendleton Guards; Junior Agronomy Club; Senior Agronomy Club; President Barnwell County Club.

"Jim" as he is known by his classmates—but substitute "y" for "ar" in his surname, and you have him as he is. He came to Clemson to study Agriculture and to ride on a passenger train. His pal, however, took the brace-rods and made Jim ride on the trucks; consequently, he did not enjoy the trip. But since at Clemson, he has made a very creditable impression among the students, faculty and, especially, the natives.

"To know him is to like him; Have I not said enough!"

JOHN GARNETT LAWTON
Garnett, S. C.

Agriculture III; Bible Class; Y. M. C. A.; Sophomore, Junior and Senior Dancing Clubs; Pendleton Guards; Vice-President Hampton County Club; Dope Club; Senior Privates; Scrub Football, '08-'09.

"Garnet," or "Bone Head" is a member of the Old Guard that made that memorable charge on Pendleton one fair April day. His available time while at Clemson has been taken up in a close study of Military Science, in which he has become very proficient. Bone has an aversion to being called red-headed, stating that his hair is simply auburn. His one failing is a suspicion of all firearms—due to a near-accident in his Junior year. Although he has been known to study on only a very few occasions, his record is above the average. Garnet’s highest ambition is to settle down and run a deer farm, with tobacco raising as a side-line.

"Gee! ain’t it great to be crazy."
Elmer Goudelock Littlejohn

Jonesville, S. C.

Mechanical-Electrical Engineering; Corporal, Sergeant-Major, Major; Y. M. C. A.; Sunday School; Penman Club; Junior Electrical Science Club; Senior Electrical Science Club; Cotillion Club.

Here is a rival of Abraham Lincoln in length and lankness. Elmer is another son of the Old Dominion who wandered into our midst some few years ago to become an electrician. He has played well the role of a student, and in every call—either on recitation or parade—he would respond in that positive manner, "Here." Elmer is a man who believes in never violating the rules and regulations, and one who never visits the postoffice at the midnight hour for mail of any description. He will be remembered as a student of exceptional qualities and, on account of his singular personality and keen intellect, he will make long strides in the race of life.

"Of fertile mind, of massive heart,
He always acted well his part."

Eugene Douglas Mays

Greenwood, S. C.

Agriculture I; Sergeant, Lieutenant; Class Lawyer, '11-'12; Y. M. C. A.; Pendleton Guards; Junior Agronomy Club; Senior Agronomy Club; X Club.

The scene now changes. We have before us the hero of the tragedy, "Four Years in the Red Hills of Oconee." "Wreck" is one of the few of that vast mob from Greenwood who has reached within hailing distance of his "dip." No one ever supposed that this beautiful blonde had any military aspirations until he captured a pair of sergeant chevrons, with the aid of Lieutenant Sims. Wreck's favorite pastime is calling on "rats" for their general orders when he is on duty as O. D. However, his greatest pleasure is derived from riding in red automobiles.

"Shall I like a hermit dwell;
On a rock or in a cell?"
Samuel Albert Miller  
Columbia, S. C.

Textile Engineering; Corporal, Sergeant; Y. M. C. A.; Pendleton Guards.

"Sam" entered Clemson in '06. He hit Prep low and hard and reaped his reward by being promoted to Fresh in '07; but, like many others, he journeyed to Pendleton and, on returning, he received "the well done" of the college authorities and a holiday for one year. Since his return to college, he has by dint of chewing much "apple" and "Tinsley" managed to surmount all obstacles, and now he is confidently expecting to receive his pardon in June. Sam is a jolly good fellow and has made many friends while at Clemson. His highest ambition is to be foreman of a spinning room and to be able to wear lavender silk.

"Let it go or stay, so I wake to the higher aims."

J. E. Moore Mitchell  
Edisto Island, S. C.

Mechanical-Electrical Engineering; Corporal, Regimental Sergeant-Major, Captain-Adjutant; Y. M. C. A.; Sophomore Dancing Club; Senior Dancing Club; Cotillion Club; Pennant Club; Junior Electrical Science Club; Senior Electrical Science Club; Buns of 162; Class Football, '10-'11.

Behold this bold, bad weapon of Cupid! "Mitch" determined in the fall of '07 to be a Crusoe no longer; so he left the lonely Edisto Island for Clemson to obtain knowledge by which to reach the one goal of his life—to possess some money and a little wife. After having practiced and revised the United States drill regulations, he proved himself a competent leader of parades, both at college and abroad. He has all the good qualities that one could wish for in a friend. Although he was detained from college for one year, his record is good, which is due to his ability, coupled with a large amount of luck. Mitch will quickly acquire the position that he desires—the illuminating of the "Botty," both intellectually and electrically.

"A weather-beaten lover, but once known,  
Is sport for every girl to practice on."
Otis Frederick McCrary
Greenville, S. C.

Agriculture 1; Sergeant, Lieutenant; Class Tiger Reporter, '12; Staff Taps, '12; Chronicle Staff, '12; Debater's Medal; Recording Secretary, Presiding Officer Annual Celebration, '12; President Columbian Literary Society; Y. M. C. A.; Bible Class Leader, '11-'12; Vice-President Students' Press Association; "23" Club; Senior Agronomy Club.

Back in the dim and distant '80s this fellow saw the light of day surrounded by the mountains in the City of Asheville, N. C. Inspired by the towering peaks, this mountaineer early decided to become a great man. As the first step toward this, he moved to Greenville, S. C. and took up the task of becoming accustomed to living in a civilized community. Becoming partially civilized, he came to Clemson in '08 and took up the study of Agriculture. "Daddy," as he is best known, is a hard worker and delights in oratory and debate. His power of saying a witty thing at the right time is unlimited. He is so popular with the authorities of several cities that he has on several occasions been given free rides around the city by them. After having taught school for some time, "Daddy" will become a great lawyer and defend the just and the unjust of his home town.

"Judge not by appearances, for the unpolished stone may be the diamond in the rough."

Redmond Joseph McIntosh
Columbia, S. C.

Mechanical-Electrical Engineering; Junior Dancing Club; Senior Dancing Club; Junior Electrical Science Club; Senior Electrical Science Club; Pendleton Guards; President Richland County Club.

"Mac," after having been in college for one year, developed desires Napoleonic; so he joined the Pendleton Guards. His hopes were, however, blasted, for he was given a sixty-day furlough. At first he took the Textile course but, on becoming entangled in some telephone wires in Columbia, he decided that the Electrical course would suit him better, which course he immediately followed. Mac is an all-round telephone man, and we predict that he will some day be the president of the A. T. & T. Co.

"The name is Sroteh.
But the best of me is Irish."
WILLIAM GREGORY PERRY
Greenville, S. C.

Civil Engineering; Corporal, Sergeant; Commencement Marshall, '11; Cotillion Club; Sophomore, Junior and Senior Dancing Clubs; Pendleton Guards; Scrub Football, '09; Scrub Baseball, '11; Varsity Football, '11; D. D. C.

"Bill" has the record in two respects: First, he has a good foundation, and perhaps the largest understanding of any man in the Class; second, he is one of the two who has been shipped only twice—and yet he graduates with honors. He is a member of the Pendleton Guards and an active member of the Seneca sports. Bill compares favorably with any other member of his Class as a Civil Engineer, and he also has the ability and qualifications to put his knowledge into practice successfully. He always takes an active part in athletics, and for the past year he has been one of the stars on the Varsity football team. In the turkey-trot and the grizzly bear stunt he is at his best. On account of his small feet, we feel sure that Bill will glide along peacefully and prosperously.

"He that taketh chances shall succeed."

WALLACE HENRY PRIVETTE
Darlington, S. C.

Agriculture II; Corporal, Sergeant, Battalion Adjutant; Calhoun Literary Society; Y. M. C. A.; Bible Class; Billet Doux Authors; Junior Veterinary Science Club; Secretary and Treasurer Senior Bulls.

"'Guttz'—Wallace H. Privette, by gosh," is a poet by nature and a farmer by occupation and, judging from his come-easy-go-easy disposition, he has chosen the proper profession. As a D. V. M. he would shine, but he has heard the farm a-calling and will heed nothing else. His ready wit and his good nature are sure to take him through life successfully.

"Give me two or three dozen bananas, and a light lunch will I make unto myself."
Hubert Timothy Prosser  
_AL_, S. C.

Agriculture I; Corporal, Regimental Quartermaster Sergeant, Regimental Quartermaster and Captain; President Sophomore Class; Chairman Co-operative Committee, '09-'12; Class Ring Committee, '11-'12; Hop Committee, '10-'11; Assistant Business Manager _Chronicle_, '10-'11; TAPS Staff, '10-'11; Business Manager TAPS, '11-'12; Π Δ Ζ; Recording Secretary, Critic-Debater, Palmetto Society; Y. M. C. A. Cabinet, '10-'12; Sunday School; Bible Class Leader; Glee Club, '07-'12; Manager Glee Club, '11-'12; Clemson Minstrels, '10-'11; Manager Minstrel Comedy Co., '11-'12; Pennant Club, '09-'12; Terrible Twelve; Rifle Team; Senior Agronomy Club; Pendleton Guards; Bohemians; "A" Co. Sports; Sophomore, Junior and Senior Dancing Clubs; Misogamists' Club; Executive Committee South Carolina College Press Association, '10-'11; Corresponding Secretary S. C. I. O. A., '11-'12; Class Track Team, '09-'10; C. A. C. Athletics Council, '09-'10; Cheer Leader, '11-'12.

"H. T.," or Hubert, spent two years at Wofford, traveled one year and came to Clemson to do things. His meritorious achievements speak for him. Though Hubert is an expert penman and accountant, he expects to get his LLM. from the University of Virginia and return to Florence.

"A penman, politician and a business man, And to the ladies he lends a hand."

Thomas Craig Redfern  
_Clemson College, S. C._

D. D. C.

Agriculture II; Corporal, Sergeant Major, Batallion Adjutant; _Tiger_ Reporter, '08-'09; Local Editor _Tiger_, '11-'12; Calhoun Literary Society; Y. M. C. A.; Sunday School; President Sophomore and Junior Dancing Clubs; Senior Dancing Club; Pendleton Guards; President Junior Veterinary Club; Senior Bulls; Pennant Club; Rickety Rackety Eight; Cotillion Club.

"Tom" is a favorite with the Pros. Since his bluff was called by one, this fair youth has not worked. Tom made quite a hit in Greenville, but failed to follow it up to Sweet Briar. Outside of the above-named performances, he has done nothing of note, except teach the light fantastic step. Tom is a character who is good because he is not bad, and is too lazy to become worse. However, he is a good fellow to have as a friend and is faithful to everybody and everything except work. As a physician to mules and horses, he will achieve a marked success.

"O, what a great boy am I!"
Tandy Roy Reid
Campobello, S. C.

Agriculture III: Class Reporter Tiger, '10-'11: Editor-in-Chief Tiger, '11-'12; Taps Staff, '12; Debater, President Columbian Literary Society; Winner Debater's Medal Columbian Society; Y. M. C. A.: "23" Club; Junior Chemistry Club; Secretary and Treasurer Senior Chemistry Club; Senior Privates.

Tandy Roy is a product of the "Dark Corner" of Greenville County; hence his desire for light, especially the light given at Clemson. Here he has enjoyed for four years the smiles of the faculty. Most of his Senior year has been taken up in chasing that cruel beast of the tropics—the Tiger; but not cruel now, for his master mind has completely tamed that beast. Likewise he has succeeded in winning for himself in the mystic sphere of Chemistry the highest honors. His ability as a Chemist assures him a marked success in life.

"I'll make me glorious by my pen,
And famous by my books."

William Harrell Rentz
Varaville, S. C.

Civil Engineering; Corporal, First Sergeant, Captain, Sergeant; Chief Artist Taps, '12; Junior Dancing Club; Senior Dancing Club; Cotillion Club; Band; Dramatic Club; President Junior Civics; Pendleton Guards.

"John," as he is known among his fellow students, came from the famous hamlet of Yarnville. As a lad he came, with the determination of being a Civil Engineer, an artist and a musician. His talent for art has made him famous, and in no way could it have been made more manifest than in his having been chosen as chief of the Art Staff of Taps, '12. Thinking he had the making of a musician in him, he bought himself a trombone; but, on account of his being subject to chapped lips, he was compelled to give up his trombone playing—much to the gratification of his neighbors and friends. To see him jig and to hear his puns would make one believe that he were a celebrated "end man" in one of the famous minstrels. For his display of energy while at college he deserves a great deal of credit. John is the first man to paint stage scenery in the history of the college; therefore, we all look to see his name on the best paintings in the large art galleries of the world.

"An artist, a musician and a comedian, all in one,
Who has in stock ten million pounds of fun."
Francis Washington Risher
Smouks, S. C.
Agriculture I; Reporting Critic, Sergeant-at-Arms, Prosecuting Critic, Corresponding Secretary, Vice-President Chief Marshall Annual Celebration Columbian Society; Y. M. C. A. Cabinet; Bible Class Leader; Delegate to Montreat Conference; Delegate State Sunday School Convention; Junior Clodhoppers; Secretary Students' Press Association; Senior Agronomy Club; Senior Privates; Corn Judging Team.

"George," or "Booker" is from the Smoky section of Colleton County. In the fall of '07 he entered Clemson, but lost one year on account of sickness. He has made good in all phases of college life. One of Booker's greatest projects will be the draining of the marshes of his County. As an orator he will achieve no little note; therefore, we expect to hear from him very soon in the legislative halls of his State. As a legislator Booker will have passed a bill providing that Senior Privates shall be exempt from drilling at Clemson.

"'Tis worth that makes the man."

Thomas Raysor Risher, Jr.
Round, S. C.
Agriculture III; "23" Club; Sophomore Dancing Club; Junior Chemistry Club; Senior Chemistry Club; Senior Privates; Class Football, '09, '10; Scrub Football, '11; Scrub Baseball, '10.

"T. R.,” or "Tom" is a man of far more than the average amount of ability, and his record shows this fact most clearly. He is never happier than when he is listening to "Monk" pull off a good one on some one else. For Industrial Chemistry he has cultivated a wonderful liking, especially for the very brief exams given on the subject. Of the blue grass region of Kentucky he is more than passingly fond; in fact, we should not be at all surprised to learn of his going out there as soon as he graduates. With his ability and large store of humor and good nature, Tom is sure to succeed—even in Kentucky.

"I want a wife of yielding will,
Of firm yet placid mind;
With all my faults to love me still,
With sentiment refined."
FLOYD LYNN ROSS
Gaffney, S. C.

Agriculture II; First Lieutenant and Battalion Adjutant; Class Poet, '09-'10; Class Historian, '11-'12; Class Co-operative Committee, '10-'12; Advertising Manager Tiger '11-'12; Recording Secretary, Declaimer's Medal, '10-'11, Vice-President, President Callhoun Society; Y. M. C. A.; Bible Class; Terrible Twelve; Junior Veterinary Science Club; Senior Bulls; Glee Club, '08-'12; Vice-President Cherokee County Club; Clemson Minstrels, '10-'11; Secretary Buxton Authors; Lieutenant Picked Company; Jolly Minstrels Comedy Company, '11-'12; Honor Committee, '11-'12; Cheer Leader, '11-'12.

Somewhere about the middle of the first decade of the twentieth century this man of much voice landed at Clemson and began to look around. Electricity first attracted him, but proved too shocking. As a mathematician he startled "Little Joe." Notwithstanding, Floyd has the stuff in him that men are made of and we feel safe in saying that his voice and singing will make his fortune.

"I may not be handsome, but I swear that I have a distinguished look."

NAPOLeON KeeVER ROWELL
Marion, S. C.

Agriculture I; Corporal, Sergeant, Lieutenant; Corresponding Secretary, Treasurer Vice-President Callhoun Society; Y. M. C. A. Cabinet; Bible Class Leader; Sunday School; Junior and Senior Agronomy Clubs; Secretary-Treasurer Student Press Association; Vice-President Swamp Fox Club; Senior Dancing Club.

"Major," as his name implies, is very military in appearance—but in appearance only—for he has never known to burn anyone. Still, Major has the happy faculty of making people (including the Commandant) think that he is military. He has always applied himself in his studies, and we know that he has gotten all out of his course that he could. When called on in class room, Major makes various and sundry noises until he collects his thoughts. He will either become the Commandant of Marion Military Academy, or spend his life showing the farmers of the State how they should not farm.

"In his lesser works he shows his power."
XERES MARION SCHEUWHIZZLIET

Twirler Town, B. B.

Athletic Science Course; State League; Southern League; National League; Member Famous Twirlers' Society; Fellow American Society for Advancement of Pitching; Pennant Winning Club; "B. C. T. M."

This lad did not care to come in, but we needed him. His pugnitude is very striking, and he is a near relative of Cristy Mathewson. Though his summers number among the teens, he handles the "pill" exceedingly cleverly. Modesty has kept his name from being used to advertise some make of bats or balls. His favorite ball, however, is a home-rolled one, with a rock center. He is a very successful "slab" artist, getting more hits with a well seasoned rail than any other kind of bat. On account of his numerous benders, he is often worked and, if his arm is not ruined by overwork, we predict a successful baseball career.

"What, ha! Mr. Umpire! let us play ball."

JOHN ALVA SIMPSON

Honea Path, S. C.

Mechanical-Electrical Engineering; Corporal, First Sergeant, Captain; Junior Electrical Science Club; Senior Electrical Science Club; Vice-President Anderson County Club; Scrub Football.

"Simp" is a true relic of the cyclone that hit Honea Path several years ago; but do not think him to be cyclonic, for he is far from it—except on the football field. Honea Path had no hold on him, so he decided to study Electricity and go far off to work. His mind once made up, he went to work—always attending to his own affairs and no one else's—and because of this, he easily rose to the rank of Captain. A very fine captain does he make, and many a day will it be before he is forgotten by the men in his Company. It is to be feared that he has in some way developed a new and greater love for Honea Path: therefore, there is some doubt as to whether he will go far off to work, as he at first intended. As a friend he is unsurpassed, and few men are given to be as well liked as is Simp.

"He that hath knowledge spareth his tongue."
ANSEL GILCHRIST SMALL

Galirant's Ferry, S. C.

Agriculture I; Sergeant, Lieutenant; Tiger Reporter for Y. M. C. A.; Corresponding Secretary, Chaplain, Vice-President Calhoun Society; President, Secretary, Montreal Delegate Y. M. C. A.; Sunday School; Bible Class Leaders; Secretary Normal Bible Class; Student Press Association; Junior Agronomy Club; Senior Agronomy Club.

This tall fellow will answer to any of the following names: "Big Small," "Y. M. C. A.," or "Parson." He is from that remote place called the Independent Republic. On entering college he joined the Y. M. C. A. and has been closely connected with it ever since. He has no military aspirations at all, but several offices have been thrust upon him. He made himself famous leading the corps in singing. He will instruct the youth of Horry County in propagation of flowers, or become a preacher and instruct them in the nobler teaching.

A Christian is the gentlest of men, but, then, he is a man.

EDWIN AUGUSTUS SOMPAYRAC

Society Hill, S. C.

Mechanical-Electrical Engineering; Chaplain Junior Class; Junior and Senior Electrical Science Clubs; Sophomore, Junior and Senior Dancing Clubs; Secretary-Treasurer Senior Privates; Lieutenant Pendleton Guards; Vice-President German Club; Darlington County Club.

"Ed," or "Sompy"—and he is equally well known by either—is a man possessing all the good qualities that go to make the great and near-great. He entered Clemson with a purpose in view and has lived his college life with that purpose ever before him. It has been said that it is far better to be born lucky than rich, but here is a man who has far more than his share of either. For he is lucky beyond ordinary human understanding, and rich in the qualities of mental, moral and physical manliness. As a friend he rings true, and as a companion he is all right. Ed will probably follow Electrical lines, but in whatever line he engages he is certain to be successful.

"I hope that I shall possess firmness and virtue enough to maintain what I consider the most enviable of all titles, that of an honest man."
Charles Harmon Stanton
Clio, S. C.

Agriculture III; Corporal, Sergeant, Lieutenant; Palmetto Literary Society; Y. M. C. A.; Marlboro County Club; Junior Chemistry Club; Senior Chemistry Club.

Harmon is one of those beings who have the happy faculty of always being the same fellow, whether it rain or shine. His progress through college has been even and uninterrupted by any mishaps. His chief delight is dwelling at some length on the glories both present and past of Marlboro County, especially that part which centers around Clio. As a peddler of pennants and other college paraphernalia and as a singer of ballads he has been a pronounced success. His failing is never being able to stay in his own room for many consecutive minutes and having an uncontrollable desire to liven up the hours spent in class room with his unexcelled contralto voice. As a merchant, or as a tiller of the fertile soil around Clio, he will go down in history as a successful man.

"But hearing oftentimes
The still, sad music of humanity."

Joseph Norton Stribling
Walhalla, S. C.

Civil Engineering; Corporal, Sergeant, Lieutenant; Associate Editor Tiger, Circulating Manager Chronicle, Literary Staff Taps, '12; Reporting, Prosecuting, and Literary Critics, Debater Annual Celebration, '12; President Palmetto Literary Society; Y. M. C. A.; Sunday School; Bible Class Leader.

Truly must we say of "Strib" that he is among the strongest and most manly of our Class. He is deservedly very popular with all the boys, even from the "rats" through the Seniors. He does endless amounts of work on all lines which tend to further the interests of the college. Strib is no shirker of class-room duty and is never happier than when he is doing something to help another. Owing to his oratorical propensities, it is safe to predict for him a brilliant ministerial career.

"An honest man, close buttoned to the chin,
Broadcloth without and a warm heart within."
EDGAR WARTMANN TISON
Savannah, Ga.

Mechanical-Electrical Engineering; Sergeant, First Sergeant, Major; Chaplain Senior Class; Y. M. C. A.; Junior Electrical Science Club; Senior Electrical Science Club; Sophomore, Junior and Senior Dancing Clubs; German Club; House of Mirth; Scrub Football.

This, a great military genius, commonly known as "Major," shows what Clemson can do with a product of the marshes around Savannah. Like his probable model, Bonaparte, Major has risen from the ranks. Nor is he any less an electrical wonder. His smiling countenance and easy manner have won for him the highest esteem of all those who know him; still, he has been very unsuccessful in his love affairs while at college—the reason remaining a mystery. He is one of the hardest and most conscientious workers in his Class, and the prediction that he will make of life an overwhelming success, is safe.

"Better to have loved and lost
Than never to have loved at all."

DOUGLAS TOMPKINS
Rock Hill, S. C.

Textile Engineering; Y. M. C. A.; Junior and Senior Dancing Clubs; Junior and Senior Textile Science Clubs; Cotillion Club; Clemson Minstrels, '10-'11; President York County Club, '10-'12; Vice-President Bowery Rounders, '09-'10; Class Football, '08-'11.

"Doug," "Toots," or "Martha" possesses peculiar characteristics that differentiate him from common men; for, to him, a joke is an insult, society is boring, and woman-kind is frivolous. He is an authority on courtship and opposes woman suffrage and co-education. Had Doug lived in the time of Plato and Aristotle, we would have called him a sophist. Had he lived in the time of Luther, we would have called him a reformer, but, as he is a product of the twentieth century—the time of Mutt and Jeff—we will call him funny. Because of his long chin, we may safely say that he will quickly root his way to the top of the Textile industry.

"He doth indeed show some sparks that are like wit."
Burwell Jefferson Truesdale

Kershaw, S. C.

Mechanical-Electrical Engineering; Sergeant; Junior Electrical Science Club; Senior Electrical Science Club; Bowery Rounders; Senior Privates.

"Jason," as his most intimate friends know him, is very much addicted to the habit of sleeping through reveille. Should you be so bold as to wake him for reveille, he would respond in a drowsy tone: "Confinements be darned! Let me sleep." Consequently, he spends most of his time serving confinements. His love affairs also consume a large part of his time but, wonderful to say, he has been engaged only once, and from the great number of letters that he received at that time it is evident that this event caused great consternation among his friends. His first step toward military fame was his appointment as a Sergeant; but, alas, his hopes were blighted when he failed to be appointed as a Lieutenant. Therefore, the envious gazes that he bestows on the shoulder bars of some of his classmates are not to be wondered at. His jovial good nature is sure to win him a large place in life.

"Please go 'way and let me sleep. Confinements disturb not my slumbers deep."

Rush Free Ulmer

Brunson, S. C.

Agriculture III; Corporal, Sergeant; Columbian Literary Society; Y. M. C. A.; Junior Chemistry Club; Hampton County Club; Students' Press Association; Senior Privates.

If the town of Brunson is as pleasant and so full of knowledge as Rush says it is, we cannot see why he left it to come to Clemson in his pursuit of knowledge. After a brief sojourn at Furman he entered the Class of '12, and ever since he has been a loyal member of the Chemistry section. Scarcely can he be called studious, for a great part of his time is taken up writing letters, yet he is a good student in spite of this. Rush has developed into an excellent pugilist, and on one occasion he gave a free exhibition of his wonderful fighting powers. After graduating he will either go to Utah or become a professional "bone roller."

"A merry heart maketh a cheerful countenance."
JOHN BUCHANAN WAKEFIELD
Antreville, S. C.

Textile Engineering: Corporal, First Sergeant, Captain; Hop Committee, '11; President Sophomore Tennis Club; President Abbeville County Club; Cotillion Club; Pennant Club; Sophomore, Junior and Senior Dancing Clubs; Junior and Senior Textile Science Clubs.

"Johnnie" was born in the village of Abbeville, S. C., and the worst part of it is that he admits it without a tremor. He drifted along through life without any purpose until the possibilities of the Textile man dawned upon him, and he chose Cleson as his place, for the study of his chosen profession. His military aspirations have been his guiding star and this accounts for his Captaincy of "K" Company. Johnnie is pre-eminently a ladies' man, and much of his time has been taken up trying to decide which one of the fair sex shall be the fortunate one.

"Of stature small, of achievements great."

J. HOY S. WESSINGER
Lexington, S. C.

Agriculture II: Columbian Literary Society; Junior Veterinary Science Club; Senior Bulls; Lexington County Club; "23" Club; Senior Privates.

Hoy or "Wes," with the fixed purpose of becoming a veterinarian, swapped the grey soils of Lexington for the red hills of Oconee. After four years of clinics he has learned to prescribe for only one disease—a hungry horse. Although you may not believe it, he is somewhat of a literary genius. Failing to obtain a Corporal in Soph, he gave up all hopes that he may have had for military honors. Wes is very fond of exercise, but he has always refused to take any about reveille time. With his vast knowledge of Agriculture he will make the Lexington acres to blossom as the desert.

"Take noisy, vexing greatness they that please,
Give me obscure and safe and silent ease."
James Minor Workman
Mayesville, S. C.
Textile Engineering; Corporal, First Sergeant, Captain; Editor-in-Chief Chronicle, ’11-’12; Chief Literary Staff Taps, ’11-’12; Class Reporter Tiger, ’09-’10; President Student Press Association; Reporting Critic, Censor, Secretary, President, Debater’s Medal, ’11; Orator, ’12; Palmetto Society; Social Committee Y. M. C. A., ’09-’10; Y. M. C. A. Cabinet, ’11-’12; Sunday School, ’08-’12; Bible Class Leader, ’10-’12; Secretary and Treasurer Junior and Senior Textile Science Clubs; Vice-President Sumter County Club, ’10-’11; President Sumter County Club, ’11-’12.

Minor is a man whom everyone looks upon as one who always does what he thinks is his duty, regardless of fear or favor. This fact is evidenced most clearly in the life that he has lived since at Clemson. He is in no way averse to taking part and doing his share in any of the purely voluntary works of college life that go to make for the reputation of the college or the students. As a military man he has been very successful. Nothing but success can await a man of his high ideals.

"Make every failure a stepping-stone to success."

Leon France Yates
Darlington, S. C.
Textile Engineering; Corporal, Sergeant, Lieutenant; Reporting Critic, Treasurer Palmetto Society; Y. M. C. A.; Bible Class Leader; Delegate State Sunday School Convention, ’10-’11; Junior Textile Science Club; Senior Textile Science Club; Darlington County Club.

Behold the maid of the Class! This title was won by his somber appearance and sedate manners. There is no one more studious and attentive to his duties than is he. His industry and kind heart have won the respect of all his fellows. Assisted by Cupid, his meek and saintly manners have affected more than one heart in the State. His greatest ambition is to settle down and become President of the Hartsville Cotton Mills.

"By meekness are coronets won."
George Henry Zerbst
Charleston, S. C.

Agriculture III: Corporal, Sergeant, Lieutenant; Prosecuting Critic, Vice-President Palmetto Literary Society; Y. M. C. A.; Junior Chemistry Club; Senior Chemistry Club; Glee Club; "23" Club.

This light-haired youth of German ancestry received his early education in the high schools of Charleston. In 1908 he finally tore himself away from the wonderful "Bottry" and came to Clemson. A true German, he delights to spend his time playing on the college piano, when he is not in his room bringing forth peculiar sounds from a violin. Study? Well, decidedly yes. As a result of his study anything less than ninety-five causes him to shed bitter tears—very seldom indeed does he weep. His feminine correspondents are scattered from Charleston to Ontario and, consequently, he is kept busy keeping his correspondence straight. "Professor" will become either a second "Dickie" or a musical genius.

"Him for the studious shade
Kind nature form'd."

The Fate of a Sport

This sport was a member of a certain well-known college. One night he wended his way to see the College Widow. The night passed off beautifully, but for a peculiar accident which happened to the young swain as he took his leave. He met a ferocious billy goat at the gate, and in the words of the lady the following happened: "The goat buried the previous end of his anatomy against the boy's afterwards with an earnestness and velocity which, backed by the ponderosity of the goat's avoirdupois, imparted a momentum that was not relaxed until he landed on the terra firma beyond the pale of the goat's jurisdiction."
WILLIAM ARTHUR HOUCK
Lenoir, N. C.

Ph. B. Univ. of N. C.
Special
Agriculture II; Senior Bulls; Senior Privates; President Truth Busters; Grand Chancellor Crap-Shooters; Manager Happy Valley Stock Farm.

Twenty-six years ago the lone hills of Lenoir produced a worthy Tarheel. After completing his studies in the high schools and having acquired Napoleonic aspirations, he entered Fishburne Military Academy, where he distinguished himself as a student and as a soldier. After having received a Ph. B. at the University of North Carolina he hobbed through southern climes studying agricultural conditions. Though he has been a "rat" at Clemson only since September, 1911, still he has won for himself many friends in this short time. It can be said truly that "Bill" has done more work in one session of the college than has anyone who ever received a B. S. here. Soon Bill may be found troddling over the fields of North Carolina, viewing with pride the herds and fields of waving grain that are his.

"And twenty of these puny lies
I'll tell."

JOHN ROSSITER FIZER
Branchville, S. C.

Special
Graduate Textile Industry, '11; Mechanical and Electrical Engineering; Diploma in Columbian Literary Society, '11; Art Department Taps, '11; Y. M. C. A.; Bible Class Leader, '11; Junior Textile Science Club; Senior Textile Science Club; Sophomore Tennis Club; Junior Tennis Club; Senior Privates.

Fizer graduated in the Textile Industry course in '11; however, his affection was so great for Clemson that he decided to come back this year and take a course in Electrical Engineering. His two hobbies are work and more work and he has indulged in them ever since he entered college. "Ross" is an expert in the art of photography and has spent much time in beautifying the physiognomies of his classmates, thereby winning many friends. We predict for him a bright and successful future.

"A little learning is a dangerous thing.
Drink deep: or taste not of the Pierian Spring."
SENIOR CLASS COMMITTEE
COURSES
AGRICULTURE I
AGRICULTURE II
AGRICULTURE III
CHEMISTRY & GEOLOGY
MECH. & ELECTRICAL
CIVIL ENGINEERING
TEXTILE INDUSTRY
Course I

"There was not a man to till the ground."

This broad Course in Agriculture covers the whole field of Natural Sciences which are tributary to the Agricultural Industry. Formerly, this Course embraced also the special lines now given in Courses II and III. The students taking this Course receive special training in Agriculture, Horticulture, Botany, Bacteriology and Entomology. After graduation, they are particularly well prepared to take post-graduate work of various kinds, and also to take positions with the United States Department of Agriculture, or with State Experiment Stations. More students are enrolled in this than in either of the other two Courses in Agriculture. The "Straights", as these students are called, are often jokingly said to be pursuing "the line of least resistance." However, here are some of the studies which they have: Mathematics, English, History, Forge Work, Wood Work, Mechanical and Free Hand Drawing, Bookkeeping, Botany, Agriculture, Chemistry, Physics, Zoology, Horticulture, Dairying, Veterinary Science, Forestry, Political Economy, Animal Husbandry, Geology, Bacteriology, Military Science and Entomology.

Among the Professors who urge the "Straights" along the flowery path of knowledge are: Professors Bramlett, Bryan, Colonel Hardin, Morrison, Allison, Harris, Gardner, Kline, Hunter, Hall, Napier, Brackett, Poats, Gee, Vincent, Burgess, Powers, Massey, Calhoun, Captain Stokes, Daniel, Keitt, Johnstone, Shanklin, Martin, and Bradley.

Course II

"When our old cow doesn't give milk, we take it from her."

The fact that this Course is numbered second does not signify that it is by any means second in importance. While it is somewhat similar to the other Agricultural Courses, yet it differs from them in that it deals chiefly with Veterinary Science and Animal Husbandry. It treats both subjects from the practical as well as the theoretical side, and gives the student valuable experience in Veterinary Surgery and feeding and care of animals. The students thus prepared usually enter the wide field of Veterinary Surgery and, through further practice, become horse doctors of no little repute. No one can deny that the "Bulls" have a most interesting as well as humane subject. Owing to the fact that their Course is similar to Course I until they have finished the Sophomore Class, they receive the same training as those in that Course. This means, of course, that the Professors are practically the same for each Course. However, a few who are especially concerned with the "Bulls" are Dr. M. Ray Powers, Dr. R. O. Feeley, Professors A. Smith, J. M. Burgess, A. B. Massey, J. G. Hall, J. M. Napier, F. H. H. Calhoun, C. B. Haddon and A. H. Jackson.

Course III

"Chemistry is H.E.L.A."

This is a broad Course with a specialization in Chemistry. It embraces a thorough Course in Chemistry and not quite so broad a Course in Agriculture as in Course I. Three hours a week in practical Chemistry is given in the Sophomore year, six hours a week in the Junior year and six in the Senior year. It embraces the analysis of fertilizers, water, soils, and feed stuffs. It also includes general instruction in the use of chemical apparatus and explanation of chemical terms. Together with this, Chemistry is given one year in Mineralogy. Crystallography, Assaying and Blow-Pipe Analysis. Besides the general academic studies, this Course includes in agricultural lines: Agronomy, Botany, Entomology, Bacteriology, Animal Husbandry and Dairying. Graduates in this Course are fit for work in commercial or Government laboratories; or to act as instructors in Chemistry in the Prep schools or smaller colleges. After finishing this Course, a degree of Ph. D. in Chemistry can be obtained from the larger Northern Universities after two years' work. Besides the above-mentioned subjects, students in this Course receive instruction in Wood Work, Forge Work, Mechanical Drawing, Free Hand Drawing, Bookkeeping, German, Surveying and Physics.

Agriculture and Chemistry

Professor G. F. Lipscomb
Professor D. H. Henry
Course IV

This is one of the hardest courses at Clemson, but when one finishes in this Course he feels that his fitness and training for his life's work have fully repaid him for all of the study he has put into it. This Course is intended to equip the student for engaging in manufacturing operations involving Metallurgy or other branches of inorganic Chemistry, or for employment as assayer or chemist in connection with mining operations. It also furnishes the basis upon which he may readily specialize in mining or geology, with a view to conducting actual mining enterprises or to employment in responsible positions in National Surveys. Some graduates in this Course are making good as mining engineers, while others are filling professors' chairs.

The student is well grounded in the principles of Chemistry, Physics, Mechanics, Geology and Mineralogy, but the principal stress is laid on Geology and Metallurgical Chemistry. He also acquires a valuable practical knowledge of Surveying, Mechanical Engineering, Foundry Practice, Drawing and Designing, in addition to the pursuit of courses in English, History, Political Economy and other subjects of general educational value.

Besides the academic professors, the followers of this Course receive instruction from Drs. F. H. H. Calhoun and R. N. Brackett, Professors S. B. Earle, T. G. Poats, J. W. Gantt, R. E. Lee, W. W. Klugh and D. H. Henry.
Chemistry and Geology

A. S. Bedell

In Terms of Calhoun

There are rivers of all lengths and sizes and of all degrees of wetness. There are rivers that dabble in real estate and rivers that play hide-and-seek with you today, and tomorrow follow you around like a pet dog with dynamite tied to its tail. Some rivers are perpetually dissatisfied with their beds, and get up in the middle of the night and seek a new bed, all littered with forests, cornfields, brick houses, railroad ties and telegraph poles. Quite naturally, life along such rivers has in it an element of uncertainty: for you may go home and find a government steamboat pulling up snags out of your erstwhile cabbage patch. In farming, you never know whether you are going to harvest corn or catfish. The appetite of such rivers is magnanimous and cosmopolitan—boats, levees, railroad tracks, barns and villages being equally relished by it. These rivers often crack in going around their bends—they are so muddy. By taking the course in Geology you can, by a few simple facts learned in this Course, make such rivers, no matter how obstinate, obey your will. Without Geology you are powerless.
Course V

"Who enters here leaves all hope behind."

Since Electrical Engineering is founded upon the laws and principles of Mechanical Engineering, the Engineering Faculty have deemed it wise to combine the two Courses. The students who have graduated from College in this Course are filling responsible positions in both Mechanical and Electrical Engineering. The purpose of this Course is not to turn out skilled artisans, but to train those faculties of mind which can be reached but through work of the hand. The field of Mechanical Engineering seems now to be opening up greater chances of promotion than those of Electrical Engineering, due perhaps to the fact that the former is yet in its infancy. The underlying principles of Engineering are based upon Mathematics and, therefore, this subject is stressed throughout the Course, and embraces the following studies: Algebra, Geometry (Plane and Solid), Descriptive Geometry, Trigonometry, Analytics, Calculus, Mechanics, Electrical Engineering and Mechanical Engineering. Besides these subjects of Mathematics, they have a complete Course in English, History, Political Economy, Geology and Military Science. They share the instruction of all the Professors named under Course VI.

"I wish, said the man marked deficient—
For his knowledge was not quite proficient—
That in adjusting a level, I wish like the devil.
A word to the 'Y's' were sufficient."

Course VI

To that one to whom the word Math implies no horror, this Course appeals with greatest force. For it is in Mathematics that those of this Course revel—the chief feature of the Course being Math, both pure and applied. To these also the word "Construction" is vital, for they delight in their studies of location, construction, mapping and maintaining roads, railroads, streets, etc. Among their interesting problems, they study strength of materials, masonry construction, foundations on land and in water, analytic and graphic investigations of stresses in girders, roofs and bridges, and the design of these structures, the principles of hydraulics as applied to dams, canals, reservoirs, municipal waterworks and the development of water power. For their training in those subjects they depend upon Field Practice, Mechanical and Free Hand Drawing, Machine Design, Architectural Drawing, Pattern Making, Forge, Foundry, Machine Shop, Mechanical Laboratory, Physics, Geology, Steam and Gas Engine Theory, Descriptive Geometry, Trigonometry, Analytical, Calculus, Mechanics and Civil Engineering. The members of the Faculty who are immediately concerned with the "Civils" are: Professors Hale Houston, S. B. Earle, R. E. Lee, F. H. H. Calhoun, S. Howard, F. R. Sweeney, T. G. Poats and also all those Professors who are concerned with the academic students.

Course VII

The Textile Department is destined to become more and more important every year, as its mission is to fit men for executive positions in our Textile Industry—that branch of manufacturing which is destined to play so powerful a part in the moulding of the future South. This Course cannot attempt to fit men in four years to become superintendents, but it does give such training as will enable the student to apply principles in his latter practice and, so, rapidly rise to this and like positions.

Professor C. S. Dogget gives regular lectures on Organic Chemistry (very general) and explains the importance of dyeing in a clean laboratory; Professor C. W. McSwain delivers valuable lectures (breaking the monotony with smiles) and teaches the art of combining colors and interlacing threads; Professor Fred Taylor wonders "What those boys are going to do when they get in the mill," and tries to help them solve the problem; Professor W. S. Morrison teaches the "Textiles" to see "history making all around them" and "economics in everything."; Professor C. M. Furman lectures on English Literature and proper conduct in classroom; Professor D. W. Daniel demonstrates the proper method of blackboard erasing and protests against loud socks; Professor S. B. Earle applies steam tests (usually too heavy for the light heads of the care-free "Textiles"), and the other Professors—they do various other things too numerous to be mentioned, and some of them too sad to be remembered.

Junior

Oh, jealous Junior! You who on your sweet self would set such a price, knowing that we cannot help but pay—how you have cheapened paradise! How sold for naught that priceless gift which, spent with due respective thrift, had made Preps, Fresh and Sophs divine. In other words, oh! Junior, why do you soar to such dizzy heights—endangering your own precious lives, as well as the lives of those upon whom you might descend?

But stoop for a moment, gaseous Junior, for I have somewhat to whisper in thine ear—

Knowest thou not that aviation is disastrous?
That frequently gaseous substances explode?
That jealousy is deadly?
That in all thy getting thou must get understanding?
That the stiff neck shall be bent as the crossbow?
That no bird can fly so high but that he must return to mother earth for water?

That a small pinhole can let the wind out of the largest balloon?

Then learn a lesson, oh, Junior full of thy own wisdom, and soar not thee higher than man's head.

The Sophomore

VERILY, in this day and generation, the College raiseth up its Sophomores in the knowledge of nothing save cigarettes and cusswords. It permit-teth him to loaf at the drug stores and sandwich counters, where he imbibeth slops and hookworms.

When he reacheth College, he attaineth a uniform, which he turneth up at the bottom two furlongs above the feet. He displayeth a pair of noisy sox, with purple and gold background and violets to the front. Yea, the ill-kept ankles are an abomination. He delighteth in wearing a non-regulation collar, about which he entwineth a tie of greenest hue.

The inside of his head resembleth the inside of a pumpkin.

He falleth in love with a giggling, gum-chewing girl, with pink ribbons in her hair. He sitteth up late at night to write poetry about her and giveth no thought to Trig. He craveth for an automobile, that he might ride her forth in the springtime. His mind turn-eth to the vanities of life and not to the high cost of corn bread.

He thinketh his Father a plodder and his Mother a back number. He scattereth her pin money as a cyclone scattereth a rail fence. He pictureth to himself great riches suddenly acquired.

Verily, verily, he needeth a board applied vigorously to the southwest corner of his Anatomy.

The Freshman

The Freshman, species, *verdant roden'is*; variety *Clemsonia*, is found in the regions of waste and tall timber of the great State of South Carolina. He belongs to that class of animals known as the Rodents, and may be recognized by his ratlike appearance and habits.

In color, the Freshman is green. The head, resembling the pumpkin in size and content, is composed largely of skull. Because of this fact, scientists class him among the boneheads. The animal's brain partakes of the verdure of his body, and is almost the size of that of a parrot, although in extreme cases it has been known to be as large as that of the monkey. Upon examination, it is found that his green matter contains no convolutions of wisdom whatever.

A long protuberance, called a neck, supports his head. Upon each side of this neck, we find a gawky arm, having the motion similar to that of a Dutch windmill. His body and legs look like a barrel of beer on a pair of stilts, while his pedal extremities have the shape and size of gunboats.

In September of each year, the Freshmen migrate in vast hordes from their native haunts to Clemson College. Here they are taught the intricate arts of describing semicircles, barking at the moon, being turned without being killed, buying electricity by the gallon, and many other branches of Science, until at last they attain sufficient knowledge to enable them to pass from the state of emerald rawness to that of Foolish Wisdom.

URING the week of September 12th-19th, inclusive, a very large addition was made to "The Royal Family" of Clemson. There were brought to the royal castle eighty fine healthy princes. "Queen" Wells and "King" Sease were very proud of their lusty children.

True to the instinct of children, they were very sleepy; and even "King’s" sonorous voice did not suffice to keep them from visiting the land of dreams in the classroom. Those who were not sleeping were amusing themselves by making "Queen" dodge erasers and chalk.

The Preps received their first lesson in political speech-making from their private tutors, the Sophs, on Wednesday night. It is remarkable how soon they learned to mount the table and address the Sophs.

Thursday was the day for the Preps’ first Geometry lesson. They were taught to describe "a semicircle on a plane"—"as a solid." They soon decided that a "ninety-degree angle" is much more comfortable than a "thirty."

The "Royal Children" were well trained in Military Science. It was a source of grievous complaint that the "shot-guns" were "choke-bored." Their greatest ambition as cadets was to be Corporals; several of their number wrote very strong pleas for such appointments.

The Preps compose the largest section in College. The entire Prep Class takes as its fortress and stronghold the Textile Building; therefore, in their simple minds, they are all "Textile Students." It is the sincerest wish of all that at the end of another year they will have imbibed enough of the wisdom of their wise parents—"King" and "Queen"—to fit them for the arduous job of governing their successors.
Misery says gone forever is the once famous Clemson spirit.

Prof. Gardiner is using a great deal of useless profanity.

Nap has an idea that he is not acquainted with the smartest man in the world.

Capt. Duckett says that "Bonehead" Lawton smokes too many cheap cigarettes.

Dr. Powers has just gone to Columbia to treat a mule suffering from staggars.

Prof. Bryan beats his wife and also the guests at the game of euchre.

Dr. Redfern deplores the man who drinks carbolic acid.

By mistake, Pres. Riggs poured lemon juice in his coffee when he learned that a baby's eye had been injured by a student.
Sam Earle sells his automobile and rides a mule.

At last the devil claims all those who refuse the Gospel, says Bob Sweeney.

Dr. Calhoun claims that the present site buried three miles beneath the surface!

Prof. Bramlett states that the entire Textile building should be washed and thoroughly disinfected.

Dr. Brackett now, weighing 400 pounds.

Prof. Lipscomb drank all the alcohol in the Lab., and also 10 gallons of \( \mathrm{H}_2\mathrm{SO}_4 \) was missing.

Prof. Gee found that historic animals were accustomed to eating toads.

Archibald Smith died from eating too much cotton seed meal.

Wanted 100 tons of corn silage for feeding the Cadet mess hall—Shortie.

Prof. Niven dismissed for being too rough and disorderly.

Even the pigs won't eat cheese. Prof. Burgess whose cheese is so famous.

Prof. Henry thinks he has found out why the light from burning alcohol is so bright.

Prof. Hall lives entirely on such foods which supply are free from Fungi.

Birch has no time for the man who chews “Brown Mule.”

Prof. Keitt kills more time reading than almost any student.

Prof. Daniels says that makes too much noise at the Lyceum entertainments.

Prof. Massey is destroyed by bacteria.

Capt. Stokes himself gave notice that anyone who violates paragraph 143 shall be punished.
With “Shortie” at The Play

“Lo! 'twas gala night
Within these lonesome latter years;
The Class of '12 amazed, affright,
Sat in a theatre to see
A play of hopes and fears.”

And we, the Class of '12, looked, and lo, there was a vast throng of formless things flitting about the stage like shadowy dreams of the past. At length these vanished and, in their stead, arose a giant, whose very rudeness and overbearing filled us with awe. He held in his hand a huge scroll, and when he spoke in his thundering tones we knew that it was none other than the grim monster "Military," who had crushed us and bruised us for wellnigh four long years.

Our hearts sank within us as he paused, then began: “Young men, it becomes my painful duty to read the contents of this scroll and, in the fear of my Maker, I dare not flinch when duty calls. During the four short years of your life at Clemson you have accumulated—and again I kiss the Holy Book—one hundred thirteen thousand, five hundred fifty-four demerits; served one million seven hundred and twenty-two thousand five hundred ninety confinements — seventy-seven and one half years, and squandered nine hundred fifty-nine golden hours. You have spent eight thousand
hours in the Hospital, where you consumed seven hundred thousand Pills.” He disappeared ere he had scarcely finished the gigantic statement, and we were left to look at each other in bewilderment.

Again the writhing, formless things appeared, but as the nervous movements dragged on, their bodies assumed the shape of sheep, swine, fowls, etc. They commenced tramping over the stage, which was strewn with groaning grist, flour, beans, potatoes and other catabales. The scene changed and we beheld a herd of cattle, seven thousand fifty-six strong, coming down from the mountain.

As their forms drew nearer, their lowing and tramping became distinctly audible. Coming on, they entered the stage with all their vast hosts already assembled, and all of one accord made obeisance to a giant monster who bolted out in front of us. This giant also held in his hand a scroll, from which he read: “Upon sworn oath do I hereby charge you Class of ’12 with the blood of all these living things I have shown you. You alone are guilty; it is you who have consumed these things: One hundred tons of lard; one hundred fifty barrels of sugar; thirty thousand pounds of chicken; forty-five thousand pounds of turkey; two thousand five hundred dozen gallons of peaches; two thousand five hundred dozen gallons of pears; fifty-seven thousand dozen gallons of tomatoes; fifty-seven thousand dozen bunches of bananas; twenty-five thousand pounds of raisins; five thousand sacks of rice; five thousand hogs; twenty-five thousand sheep; ten thousand bushels of beans; eleven thousand eight barrels of flour; two thousand six hundred pounds mince-meat; two thousand pounds of prunes; two thousand five hundred sacks of grist; three million bushels of sweet potatoes; two hundred forty thousand five hundred bushels of Irish potatoes; fifty thousand pounds of hams; five hundred forty thousand gallons of syrup; seven thousand fifty-six head of cattle; nine hundred seven thousand two hundred gallons of milk, and nine thousand four hundred gallons of coffee.”

When he finished, a weird shriek came from the throats of the animals assembled on the stage. We almost started from our seats in terror, but were held down by some unknown power. Then the animals began leaving the stage, one by one. When the last one had disappeared, the great giant came forward and broke the uncomfortable silence with this challenge:

“And now, Class ’12, I dare you challenge the truth of my statements. My numbers are based upon figures taken from the book of the Steward. Are you guilty or not guilty? I hold your future destiny in my hands.”

“Oh! ha! ha! ha! ha! Vot a joke I have had on you dickenses!” We looked and saw “Shortie” wabbling from behind the curtain: “But it’s true, though, boys, and not a one of you can deny that you have eaten Clemson College out of a home! ha! ha! ha! ha! Vot a joke I had on you! You get scared nearly to death at vot you have done eat! ha! ha! ha!”

The Morning Sun had risen high,  
When, waking with a start and sigh,  
A Senior Private learned that he  
Had slept quite throughout Reveille.  
He dressed himself and bathed his face—  
Made up his bed with skill and grace;  
Then, waiting for the breakfast bell,  
He yawned a long-drawn, “Well! well! well!  
It's Sunday!”  

He found the breakfast ill prepared,  
Yet willingly of it he shared,  
And, drifting to his room again,  
There, seated on the window main,  
He wondered what such stillness meant,  
If on some prank the world was bent—  
When sweetly from across the way  
The little church bell seemed to say:  
“'tis Sunday.”  

The Barracks bell then rent the air,  
And bade the sick ones all repair  
To “Doc’s” own office o'er the way,  
Where Pills by tons are stored away.  
Guard Mount, Sunday School and Church
Seemed gone in but a single lurch.
The dinner followed.  "What? Desert?"
"Why, yes," they answered with a spurt.
"It's Sunday."

Then basking in the sun awhile,
He pondered on this Clemson style;
He wondered how that in a land
Where freedom rules on every hand
A fellow must endure this fuss.
Get "hossed" by any little cuss.
His wrath rolled up at such abuse—
"But, hold!" says he, "Hang out your truce—
"It's Sunday."

Of all the afternoons he knew,
This for him was far most blue.
For on this Holy Sabbath Day,
He served confinements—for to pay
The unsophisticated fee
Of having slept through Reveille.
Was there a frown upon his face?
Oh, no!  This never is the case
On Sunday

The afternoon in its great flight
Gave barely time for him to write
A letter home—though not defer
The one to—er—er—well, to Her!
Retreat; then supper; Bible groups;
Consumed the other time in swoops.
Then off to bed, and sleeping sound
Till early morn—when, lo! he found
'Twas Monday.
Headquarters Corps of Cadets,
Commandant's Office.

Clemson College, S C, Jan. 5, 1912.

General Order No 35.

The roll call of the Staff, Rand, and Companies will hereafter be made from printed rosters.

Commencing with the name of the senior sergeant, the first sergeant will call the name of each cadet in the company in a deliberate manner, placing a check against the name of every cadet not actually present and in ranks, whether cadet is absent by authority or not.

Captains of the companies or the senior officer present will be responsible for the attendance of lieutenants at formations and will sign and deliver in person, lists to the Officer of the Day in reporting the company.

BY ORDER OF CAPTAIN STOKES,
Cadet Captain, Corps of Cadets,

ADJUTANT.
THE SATURDAY EVENING POST

Editorials

A Good System

The recent introduction of the check-roll system at each formation was received with much applause by the students. The Senior Privates were especially delighted at this fine feature. We think that it is splendid that now we have a system by which everybody is forced to attend each formation—especially reveille. It is a great blessing that the imposing privileges generally taken by the Senior Privates have been done away with. Everyone is offering a prayer of thanks that the College authorities have had the backbone to stand up for and introduce such a perfect system!

A College Museum

During the past year a large collection of assorted material has been accumulated in the quartermaster's department. This collection is comprised of oil stoves, electric irons, cooking utensils, cards, dice, pistols, knives, forks, spoons, watches, fist knucks, firebrands, bottles, old shoes, etc. The disposal of this material is a stupendous task, requiring much time and expenditure of thought and money. We think that a good way to dispose of this material would be to fit up a museum with it—calling this museum "A Collection of Illegitimates, Collected at Clemson College During the Session of 1914-'15." A small admission fee might be charged by the keepers of the relic room to cover the large expense and fatigue necessarily involved in making this collection. It is said that the collectors were often in perilous positions while securing the relics.

A Balanced Ration

We recently heard many comments on the fine fare that the student body is receiving in the mess-hall. The College authorities are conducting a series of tests as to what foods go to make a balanced, nutritive ration most economically. Several very remarkable results have been attained; chief among them was the disproval of the old proverb that man cannot live upon bread alone—they have proved beyond a shadow of a doubt that this is possible. The method of procedure was to feed good bread and in small quantities, the other food being in such a condition that no one could eat it. They found that the students ate the bread ravenously and with relish, leaving the other things alone. Close observation was kept during the experiments, and they found that the boys as a whole grew fat and kept in good condition. We heartily commend the attitude of the boys during these experiments; they looked upon it from the scientific viewpoint, and were ready to offer themselves as a living sacrifice, and die as martyrs to a scientific cause.

A Beautiful Campus

We have a Campus beautiful by nature, but it can be easily improved. Dame Nature has done a good job, but "Doc" Lewis is beating the Old Lady at her own game. We, however, stand in awe at the huge undertaking of moving so much dirt from one spot and putting it on another, then moving it back again. This gives the convicts something to do, and we believe that they should be kept busy all the time. The method of leaving parts of the Campus all torn up for a long period probably seems peculiar at first to those who haven't given the matter deep thought. We have made thorough investigations into this matter and have arrived at the conclusion that it is done for its psychological effect. An old eyesore suddenly beautified appears very beautiful indeed—the contrast being so great. This fact is employed in the landscape gardening and Campus engineering practiced on our Campus. Favorable comment has been heard from all sides, and we agree with those whose artistic sense has been so highly developed that the improvement is truly great.

A Deep Subject

The recent announcement that a Course in the study of negro life was open to a limited number of students created a great hullabaloo and came near causing a riot. While there was some cause for such action, we must condemn the students for acting in such a boisterous manner while applying for membership to the classes. The introduction of this subject created a great deal of discussion on the Hill; however, the majority seem to be in favor of studying the subject. We are greatly in favor of it ourselves, but must admit that it has its "dark" sides.
Serious and Frivolous Facts about the Great and the Near-Great

The Stranger

When the students first returned to Clemson in the fall of 1911, they noticed a tall, erect, good-looking stranger walking about the campus. This stranger’s Napoleonic air and stern expression rather awed one at first. They could not place him among the old college authorities. Some said that he was the new sergeant who was to take care of the guns and the college property, but such a good-looking man would scarcely take a job of that kind.

"Who is that duck, anyhow?" the question soon arose.

"Why, he is Sam Duckett," was the forthcoming reply.

"Well, who in the dickens is Sam Duckett?"

"Sam Duckett! You never heard of Sam Duckett, the great football player of the Citadel? Man, wake up!"

"Well, what is he doing up here?"

"Oh, he is the new Assistant Commandant."

"Gee, don't you know that this place will be military this year. We sure had better brace up if we want to stay out of confinements!"

"Thus Cap’t Duckett made his debut at Clemson. Since then, all the boys have come to the conclusion that all his stern looks were largely bluff, and that he doesn’t mean anything serious. However, if you see him coming, you had better throw down your cigarette at once. He says that Bus Owens is the only one that he can’t catch, as Bus has a peculiar trick of hiding it. Cap’t Duckett doesn’t believe, of course, that anyone should smoke—except himself.

His Career in College Work

When he first entered college, he had in view a military career. That is why he selected the Citadel. He lived up to his ideals at college by graduating as first ranking captain. After graduation, he looked around for a place in which to further his military propensities. On account of the foolish laws of the United States he could get nothing better than a Second Lieutenant in the regular army, and as that seemed rather a come-down for him, he decided to teach school for a year and, in the meantime, look around for a suitable military position. Finally, he decided to come to Clemson, since he would have a large body of men under his command there.

After arriving at Clemson, he soon let it be known that he was an authority on all military matters. The boys soon found out that they could not fool him on any of the regulations. Every day he brought up some new wrinkle in military lines to the members of the guard.

Cap’t Duckett first attained fame for himself when he broke up an old established custom of the guard room—the assumed privilege of the Officer of the Guard’s going to the store during study hours in order to inspect for cadets off limits.

"Mr. Folk, where have you been?"

"To the store, sir," was the reply.

"Don’t you know better than that?"

"That is my privilege, sir."

"Well, you had better consider yourself under arrest. Report to classes immediately!" was the grim reply.

It has been suspected that the real reason for such action was the fact that the O. G. failed to take the Assistant Commandant to the store with him. Everybody wondered what would happen next. The above suspicion was knocked in the head when it became known that he had burnt the O. G. for smoking in the guard room. The O. G. was smoking a cigar, and every one knows that the Captain smokes only pipe and cigarette. However, it was not wounded feelings, arising from the fact that the O. G. failed to offer him the brother to the cheroot, that caused this untimely act. After this, the students came to the conclusion that he really meant business, and they all govern themselves accordingly.

However, during the Fair Trip, Cap’t Duckett changed his ways, and we came to the conclusion that he was a good fellow after all. During the Fair the Captain showed us all how to have a really good time and we still believe that it was at the Fair that he began "knocking down" reports.

"Isn’t the Major General of the Clemson Corps just a darling!" a girl was heard to remark on the streets of Columbia.

"Who do you mean?" was the reply.

"Mr. Duckett, of course!"

"O.—Oh!" was the only reply.

RIVERS—Manager

No office in college athletics carries with it so much hard work, so little thanks and so little glory as that of the Football Manager. Henry’s only thought was his Team’s comfort. He was always on the job, kept the Team well equipped and saw to their every need.

BISSELL—Captain, Quarterback

Captain Bissell finishes a brilliant football career, after playing as consistent a game through three years as one could ask. He possessed every necessary qualification as a Captain and a player. His return of punts in every game was phenomenal, and no team we met could boast of so clever an open field runner. On defensive he was a star, being a fierce tackler and a good judge of plays. As Captain, he commanded the respect of all his fellow players, was a good leader and set an example of the highest possible standard. His loss will be a severe one.

BRITT—Right Tackle, Captain-Elect

“Ben” looms up as our best all-round performer in the line. During the past two years his advancement in tackle play has been brilliant. Next year will be his last and, no doubt, he will continue to excel in the position. At carrying the ball from tackle he was seldom denied the required distance, and his work on defense was a feature of many games. As Captain, we predict he will make a good leader.

BATES—Fullback

“Joe’s” last year was full of promise. The end of a remarkable career as a wonderful Fullback was brought to an abrupt close by his disqualification just before the all-important game—Clemson vs. Carolina. Joe’s football reputation consisted of punting, forward passing and running the line plunging, together with fine defensive work. That alone shows what a severe loss the Team suffered.

WEBB—Fullback

In Claire, Clemson can boast of its most valuable Freshman in years. He assumed the responsibility of the position left vacant by Bates’ disqualification, and his play would do credit to a veteran. He gained a vast amount of ground through the line and around ends, and his forward pass was fast and accurate. A brilliant career awaits him.

JAMES—Halfback

“Jimmy” played his first year of varsity football and lacks only experience to make a fine Back. He was in a majority of the games, and on almost every occasion played a great offensive game. Next year should be a “banner” year for him.

KANGETER—Halfback

“Johnny” played up to his former standard on all occasions. He continued his fine defensive work of last year, was a clever interferer and gained considerable ground on his line plunges. He will be of great value next year, since his experience makes him one of the few seasoned veterans in the squad.

COLES—Halfback

“Pony” once more used what few pounds he possesses to great advantage. He was one of the fastest Backs in the squad and added many yards for his Team by fleetness of foot. His defensive work was remarkable for a man of so little weight.

HAYDEN—Center

Hayden, although a Senior, played his first varsity ball. His rapid improvement in mastering the center position was one of the season’s features. At following the ball he was a marvel, and on several occasions he was down under punts with the “neds.” He will be missed very much.
PERRY T.—Right Guard

"Tom's" initial season was an exceptionally good one. He developed into a consistent lineman, with an abundance of spirit. This year's experience will make him a most dependable Guard next season. His defense was good, often breaking up plays before they were started.

SCHILLETTER—Left Guard

"Shorty" made his first varsity appearance and probably showed more improvement for the season than any other member of the squad. For his weight he was remarkably fast, was always found in every line play and worked hard and willingly all season. He has three more years to play.

GANDY—Left Tackle

"Hop" improved with the season's advance, and at its close he had developed into a splendid Tackle. Being always willing and a fine ground-gainer, this, together with his powerful defense made him a most valuable lineman.

LEWIS—Right End

"Alex" was the squad's lightweight—but when that is said, you have mentioned every football fault he possesses. He was the most alert, was fast, a good tackler and the best forward pass receiver of the year. He has a brilliant career before him.

PERRY—Right End

"Bill" Perry's end play was great. He possessed enough weight to hinder any kind of interference, was in every play, and could advance the ball with lots of power. Not once was he drawn in, using excellent judgment on all occasions, which is a most valuable qualification for end playing.

GRAY—Left End

"Bill's" work was of the stone-wall variety on defense. He broke up plays, checked interference and tackled hard and sure. He would be at his best next year, but graduation will rob him of a longer career.

CARSON—Sub-Lineman

"Doc" served his second year as varsity lineman and played his usual good game. He was unable to do himself justice until the latter part of the year, being troubled with numerous minor injuries. Next year he will prove a most valuable man at Center, having had a great deal of experience.

MELLETT—Sub-Lineman

Frank's first varsity experience consisted of some very clever work "subbing" for both Tackles. He was very fast at running with the ball from tackle, and his improvement was rapid. He should enjoy a good season in 1912.

BELL—Sub-Guard

Bell worked hard and willingly and, when aroused sufficiently, played a strong defensive game. This is his last year (though his first) on varsity. His case was one of many, where a man waits until his Senior year to try for the Team. Had Bell started earlier, he would doubtless have been among Clemson's leading linemen.

FARIS—Sub-End Tackle

Faris lacked experience, but possessed a wonderful amount of energy, which should stand him in good stead next year. He was a fierce tackler and a good ground-gainer.

CAUGHMAN—Sub-Back

"Kenny" would have enjoyed a much finer season had it not been his misfortune to get a bad "Charley Horse" early in the season, which stayed with him and kept him from doing himself justice. He runs strongly, tackles hard and is fast.
Sketch of the 1911 Season

One more football season is over, and we feel that we can say "well done" to our comrades, who have been on the field fighting to uphold Clemson's athletic record. They suffered some defeats, but the fighting spirit was there until the last. Not alone do the players deserve praise—for we can see Athletics rising to a higher plane through the direction of Coach Dobson, to whom we are indebted for the following sketch of the season:

Clemson's football condition remained about the same as the standard set by the 1910 Team. The schedule also was about the same, so far as the construction was concerned. Still, there was a marked improvement in every one of our opponents. The most notable fact about the Team was its inexperience. Of the nineteen men in the varsity squad, fourteen played their first year on the varsity. While this makes a fair nucleus for next year, still, of that number of new men, four were Seniors and will graduate in June, while only three were Freshmen. However, the material returning next fall will have had for the most part a fair amount of experience. From the class teams it will be necessary to find something above the average to fill such positions as those left by Captain Bissell, Bates, Hayden, Gray and "Bill" Perry. It is too early to make any predictions regarding possible material from class elevens, but such men as Bethune, Martin and Logan are sure to be of some value next year.

Reviewing the season, game by game, we see an apparent rise and fall in the Team's performance. The first game—with the big, experienced Auburn Team—as was expected, was an overwhelming victory for our Alabama rivals. The final score was Clemson 0, Alabama 29. The following week, Howard met defeat in a rough, poorly played game, featured by our superior defense and occasional spurts of good, offensive football: Clemson 15, Howard 0. Florida, our newly acquired
friend, took us by surprise; winning by a score of six to five in a game all Clemson's until the last few minutes.

All the week following the Florida game, hard work was the order of preparation for Carolina; and how well we prepared can be judged better by the score than through any other source—Clemson 27, Carolina 0. Two days later we met the Citadel eleven and, after a stubborn fight, defeated them by a comfortable score of 18 to 0. Five days later, at Augusta, the Georgia Team defeated us on a wet, slippery field, which condition, together with their abundance of weight, aided them materially in running up a large score of 25 to 0.

If ever a team was fortunate, Mercer was, in the game at Columbus, Ga. They outweighed us fifteen pounds per man, but this advantage hardly offset our speed, since they had very little. Nine of their points were scored by goals from placement and one touchdown from an official's error. The other being the result of a fine bit of running by a Mercer back. We carried the ball from our own sixteen yard line and scored without losing possession of it during that long march down the field. Next fall we hope to increase the score, which was Clemson 6, Mercer 20.

Once more—though sad to relate—we are forced to chronicle our fourth consecutive defeat in Atlanta. It looked as though Dame Fortune were going to smile upon us this time when the first quarter ended with a score 0—0. And still the end of our first half caused much rejoicing among our followers, for Tech had only added a safety and touchdown for a total of eight points. But, in the second half, that powerful and well coached Yellow Jacket machine got under way, and before long had run the total score up to thirty-two. Never did a Clemson Team fight harder. The odds in weight were too much; then, again—and above all—Tech had experience and an abundance of well executed plays.

It is not necessary to say more, though—as is the usual custom—we might add, "Wait till next year."

Baseball Sketch, 1911

To sum up the virtues of the 1911 Team we would say it was an excellent fielding, hard hitting, fast base-running club, with a nicely balanced pitching staff.

"Doc" Ezell and Lachicotte stood the brunt of the work, but they were ably assisted by Schroder; the trio making an ideal corps of college twirlers. Their benders and fast ones were received by Bates and Jenkins, both of whom acquitted themselves well.

The infield was a stone wall on defense and an active quartette at the bat and on the bases. Thomas, Harris, Tupper and McCown were the regulars, Coles and Hiers serving in the utility role.

To the outfield much credit must be given for their accuracy and speed in handling flies and long hits, coupled with the ability to hit opportunely. Cochrane, Rivers and Captain Connelly took care of this department, with Schroder acting as sub-outfielder.

No dispute could arise regarding the Tigers' claim for State honors. Every opponent was defeated, and only one game was lost—to Wofford—though two of a series of three games were won by Clemson.

Though seven of this squad will not be found on the 1912 Team, still we are going to work to make this year a repetition of the 1911 season.

Sketch of the Season

The Track Team of 1911 had the same grand success as the teams of the past two years—all victories. Great and glorious were our S. I. A. A. and A. A. U. victories, on account of the many competitors. The success of our Track Team has been wonderful, but it is no more than right that it should be so; for the ever-watchful, trained and experienced eye of our Coach, Dr. F. H. H. Calhoun, has ever been the keynote of our success. Great credit is due him for the development of Track athletics at Clemson. He will have this year the able assistance of Professor Gardner who, in 1910, was Captain of Purdue’s team.

During the Track season of 1911, Clemson won two dual meets and wound up the season by winning the S. I. A. A. and the A. A. U. championships; the former for the third time in succession.

The first Meet was held at Tech in Atlanta. The “Yellow Jackets” put up a strong fight, but were defeated by a score of 66 to 42.

The Clemson-Carolina Meet, held at Clemson, May 1st, was easily won by the “Tigers,” the score being 98 to 19.

The annual S. I. A. A. Meet was pulled off in Birmingham, May 6th. At the same time the A. A. U. Meet was pulled off. Clemson took first in the S. I. A. A.; defeating her nearest opponent by 15 points. Seven other Southern Colleges took part in the Meet. In the A. A. U. Meet, ten teams competed for first place; Clemson winning out by a score of 38. Auburn coming second.

Of the stars who have placed Clemson so high in Track work during the past three years, many have performed for their last time for Clemson. The success of the 1912 Team must, therefore, depend largely upon new men. Of last year’s Team, Lewis (holder of both the S. I. A. A. and A. A. U. record for the mile run) will compete in the distance runs. Ward (joint holder of the half-mile record with Greene of Auburn) will be a running mate for Lewis; Ezell, Gandy and Kaminer will take care of the weight events; Provost and Ward in the high hurdles; Bissell in the sprints and low hurdles; Kangether in the pole vault; Melver in the high jump, and Brodie in the sprints and broad jump.

Many Freshmen have had experience on their high school teams, and from these we expect great things. The men who must uphold Clemson’s magnificent record of the past five years, during which time she has lost no dual meet and has won the Intercollegiate championship for three consecutive years, must be drawn chiefly from the Freshman Class. The loss of so many point winners leaves places vacant that either this year or next year must be filled by members of the lower classes.
Basketball Sketch, 1912

No few men ever exhibited more genuine college spirit than the members of Clemson's first Basketball Team. Nor has any team shown more ability in so short a time. The Team is well balanced. Captain James Erwin is without doubt the best offensive player in the State, while his brother John follows him closely in every respect. Kangeter takes care of the Left Guard and is the most aggressive man in the squad—offensively and defensively. Hydrick makes an ideal defensive guard; Evans, Provost and Ward all take care of the forward in good style.

Scores, 1912

Erwin, J. O., Forward
Provost, Forward
Kangeter, Left Guard
Hydrick, Right Guard
Substitutes, Ward and Evans
At last has Clemson gained the place where she demands recognition in Tennis as in other branches of athletics. At the State Intercollegiate Tournament held at Spartanburg, in November, 1911, J. O. Erwin, J. W. Erwin and J. C. Caldwell were Clemson’s representatives; and they figured prominently in the contest for the cup.

The cup for Doubles was won by the Newberry representative; but in the Singles J. O. Erwin won from Grier, of Erskine, by a score of three sets to one. Considering the limited number of tennis courts at Clemson, we should be unusually proud of this record.

It is to be hoped that the results of this Tournament will encourage the Athletic Association to take steps toward constructing some new courts. All the courts here now are owned by the Y. M. C. A. The tennis spirit is growing at Clemson, and the four courts now here will be even more inadequate in the future than they have been in the past.

RACCOONS WIN BEST GAME OF THE SEASON

"Mick Chick" Penalized Twice for Slugging.

One of the best and most sensational football games of the season was played on the Campus on Saturday afternoon, when the Baboons and the Raccoons met for their annual game. The two teams were evenly matched in size and speed, and each fought to a finish, though the Raccoons succeeded in winning the game by a narrow margin: the final score being Raccoons 99, Baboons 97. The game was called at three o'clock. Each team fought its hardest in defending its own goal and trying to gain over the line of the opposing team, and the result of this hard fighting is shown by the small score made. There were several brilliant, heady plays made during the game, and both teams showed up several stars. "Guttz", for the Baboons, deserves first place among the stars for energy and speed. His long runs and his great energy throughout the game are responsible for one of the seventeen touchdowns made by his team. For the Raccoons, "Dicky" was easily the star. The great ability with which he generalized his team and his own plunging of the line will give him a place among the best of the strong, quick and heady players. "King S." also deserves credit for the way he worked his team. Foots was easily the star at center. This lad, though young in the football world, has developed into an All-Southern center. He firmly braces himself, snaps the ball quickly and allows no line rush to go over him.

Other stars for the Baboons were "Hobo," "Sam" and Archibald, and the men who did the star work for the Raccoons were "Little Joe", "Rastus", Wells and "Prep."

The game, though a good one, was marred at times by rough and brutal playing. Each team was penalized several times for some dirty playing. The Baboons were penalized twice because of the slugging of "Mick Chick," the right end, and once for rough work of "Stud" at tackle. The Raccoons were penalized because of the slugging of Hall at center, and again because of a foul by "Rastus" at right end. At one time it was feared that the exhibition of football would end in a free-for-all fight.

DEAD BODY FOUND! FOUL PLAY SUSPECTED

On Sunday afternoon, the most atrocious crime in the annals of the Delinquency Sheet was revealed. The finding of a dead body near the dairy barn gave evidences of a most startling murder. The head was completely severed from the body and gave evidences of having been taken off in a most cruel and barbaric manner. No motive for the crime, nor any clues as to who the murderers are, have as yet been discovered. That the crime was the result of foul play is shown by the condition of the body. As there are no proofs or clues at the scene of the murder, there seems to be little chance of fixing the crime upon anyone. The Sloan-Duckett Detective Agency has taken the case in hand, and the two principal members of the Agency are giving the matter their entire attention. It is hoped that within a few days that these shrewd detectives will develop some clues that will enable them to trace the horrible deed to its source. Undoubtedly the crime was committed in the open daylight. Bloodhounds were secured, but no trail which they could follow was found. Every effort is being made to apprehend the guilty parties. Meanwhile, the excitement over the crime is not very intense, as the murdered body was only that of a big, fat red rooster.

THE CLEMSON MINSTREL COMEDY CO.
WILL PRESENT
"SOME FACULTY FARCES"

In the Memorial Hall
To-night at 8:30

Don't fail to see the last act, in which by a roll of the dice the Discipline Committee metes out justice.

Tickets now On Sale at
GUARD ROOM
The details of the game will not be given; suffice it to say that the game was exciting all the way through, and the small score speaks for the hard playing of each team. No player was put out nor substituted during the whole game.

The line-up was as follows:

Baboons

"King S." Q. B. "Dicky"
"Jo" L. H. B. "Little Joe"
"Father K." R. H. B. Keug
"Gutzi S." F. B. Wells

Foots M. C. Hall

"Sam" R. G. "Prep"

Vincent L. G. "Dave"

Archimedes R. T. "Gee"

"Stud" L. T. "Sweeney"

"Mick Chick" R. E. "Rasties"

"Hobo" L. E. "Nap"

Referee, Dargan, Clemson; Umpire, "Baldhead, B."; Field Judge, "Daddy F."; Head Linesman, A. Schellette.

ON THE SIDE

Prof. Massey—"Do you sow celery seed broadcast?"

Senior Lawton—"No sir, you sow them in a hot-bed."

Dr. Calhoun—"Mr. Prosser, what would be the condition of the earth were it deprived of its atmosphere?"

Prosser (after serious thinking)—"Why, it would be rather unhealthy."

Prof. Burgess—"Mr. Faris, what is a continental food?"

Faris—"Why, er, it is a food that is raised on the continent."

Senior Jennings (in Botany Class)—"Professor, how can you tell the edible mushrooms from the poisonous varieties?"

Prof. Hall—"Eat them and if they kill you, they are poisonous, and if not, they are edible."

Prof. Massey—"Mr. Jeter, what are catch crops?"

Jeter—"Catch crops are crops which catch things out of the atmosphere."

Life is short—only four letters in it. Three quarters of it is a "lie," and one half of it is an "if."

The College has been very fortunate this year in having a bull dog to guard the mess hall. Being a very ferocious animal, he has succeeded in keeping order in the mess hall so far. His growl is the command for silence. The lease which the College has on this animal will expire this session, and it cannot be renewed.

Captains Stokes and Duckett, working together, have succeeded in putting out an inquisitive method of roll-call, which is designed to get all cadets to formations. The method—the work of two ingenious minds—will be both patented and copyrighted.

Honors for original scientific investigation are to be awarded to the members of the Chemistry section. The sixteen men in this group have spent much time in the lecture room and in the laboratories, working out problems of Chemistry. The final conclusions—and perhaps the most important one that these men have reached—is that Chemistry is HELD.

Recent investigations have revealed the fact that reveille is controlled by a trust, but, as the higher authorities hold the controlling interest, the courts will not interfere with the workings of this monopolistic body. The masses have to acquiesce in the wishes of the few and contribute their part to the daily reveille formations. The boycott plan does not work in this case, because the five and tens are dealt out freely to those who try it.

"Sam" Ezell has at last worked out the reasons for his great height. After years of research work along this line he has at last determined the fact that two factors are at work on him. The force of gravity which tends to pull him down and an ethereal force which tends to draw him up. The two forces working in opposition to each other have drawn him out to his present length.

"Bud" Fisher has lost out. The originator of the "Mutt" and "Jeff" cartoons has given up his cartoon work, because another has been able to depict "Mutt" and "Jeff" and fit them to some practical purpose. This other one is Harry Huttson who, after much practice, has been able to succeed Mr. Fisher as the "Mutt" and "Jeff" artist. Harry has worked till twelve o'clock at night adorning the bulletin board with the pictures of the two characters—"Mutt" and "Jeff".

CLASSIFIED

WANTED—To know What's the news on the Rialto?—W. D. Ezell.

WANTED—To know who to thank for a box of chocolate fudge.—J. F. Ezell.

WANTED—A chance to see whether or not we could hold down a job.—Seniors.

SOCIAL

The most delightful card-party of the season was held in President Rigg's office on Monday afternoon, February 5th. Sixteen invited guests assembled to enjoy the hospitality of the renowned entertainer. As each guest had made about the same score, no first prize was given, but consolation prizes were given to all. The host himself served a dainty lunch of talk, flavored with hot air. As a souvenir of the party and a remembrance to his guests, the host had each guest to sign his name to a card before leaving the office.

Captain M. B. Stokes entertained the members of the Senior Class in the Chapel for an hour today. Captain Stokes is an original entertainer, and his entertainments are enjoyed so much that each guest wishes that he would not have another one.

more strength and roared louder than ever. Another year has been added to the age of this beast, and he is now nearing the size of his parents.

At this time Clemson men, especially members of the Senior Class, are facing a perilous situation. This year is Leap Year; it is the year when another fellow's sister has the privilege of dropping out careless reminders to the bashful or negligent young man who has been too nervous or too careless to say the thing that the sister of the other fellow wants him to say. If the reminder is not enough, this same sister of another fellow may—just because February has twenty-nine days—say the thing that, for perhaps three years, she has been wanting the negligent fellow to say. She may ask him an all-important question. And right here is where the Clemson men are in such great danger, for they have not been taught the art of saying "no" to the other fellow's sister; and the sisters of the other fellows do fall before the majestic cadets. Now, these same sisters have the privilege of telling the cadets of this, simply because 1912 can be divided by four without a remainder. Now let The Tiger sound its warning to Clemson men: Don't break the heart of the young or old maiden who unluckily falls on her knees before you, confuses her affections for you and asks you to allow her to be your protection for all life. Don't break the heart of the dear by a stern "no," or don't exclaim, "Oh, dear, this is too sudden!" You had an idea that she would do this when Leap Year came. Don't allow the soft, effusive tones of the maiden to so distract your mind that you cannot give her an answer that comes from serious deliberation; but think seriously for a while, and then tell her to "go ask papa."

Then—but of course you should not give your father the tip to refuse for you—if the father refuses to allow her to become your protection, don't allow yourself to stray off in the fields, where she may swoop down upon you in her aeroplane and bear you away with her to the home of a minister. The romantic, up-to-date girl is likely to bear you away during this Leap Year; therefore, the thing for you to do is to watch for the danger.

Now, these warnings are for a purpose, for there is more than one maiden who is romantic and beautiful; so, if you become too much enraptured with the first one that you meet, perhaps you won't see the others. There are other chances. You will not always be bashful, negligent or careless. Await your time, make yourself think that, because there are 366 days in 1912, that it is the last year; Play far from the peril of 1912, which may more properly be called the Leap Year Peril.

Y. M. C. A.

Before a crowded house of twenty-three hearers last evening one of our own men made a long address of six and one half minutes on the subject of "The Needs of the Day: a Closer Association with Color and Odors." In his usual graceful and pleasing manner "Parson" introduced the speaker of the evening. Then the speaker arose and addressed his audience in part as follows:

"Fellows, the most vital, omniverous and odoriferous question of today now looms large upon our horizon; and I come before you tonight to ask your aid in helping to find the solution to the grave question of the present age. That question is as follows: What are we to do with our friend, the negro? Fellows, most of you know that I have had a lengthy discussion of this question with the greatest enthusiast on the negro question that you have on your faculty. Fellows, I have talked with him long and often, but the old duffer still thinks that I am wrong. Oh, the brainlessness of some brainy men! Fellows, we have got to solve the problem, and my great brain has worked out the solution of it. It is this: You Chemistry men must do some original work and find some solvent that will dissolve the black pigment out of his skin. You Electricians must produce the current which, sent through his body, will straighten out the kinks of his hair (voice from the audience: "Rather the one that will send him to H—")! and you Civil Engineers must take a line of levels and make computations to determine the amount of lip and nose to remove so as to make them of a normal size. Now, then, who will volunteer to solve the problem of how to remove the natural aromatic odors attendant upon him? Fellows, you must do these things, or we must take the negro as he is—color, kinks and all, and associate with him till we no longer think of these things.

"Fellows, I tell you we must help this black brother of ours. The question comes home to us when one of our own kitchen negroes is skimmed out of his pennies by one of our own high and mighty ones. Think of it, fellows, these negroes lost thirty-five cents at one time, because our own mighty Sam L. knew the trick of turning the coin when matching with these.
poor ignorant friends of mine. Fellows, now we want you to study this question, and what we organize five classes down in barracks, and I shall teach one of them, but don’t all of you try to join my class. The book used will be the one entitled: “The Kick and Sniff Problem of the South.” All of you will be given a chance to enroll when we return to barracks. Now let us stand and sing, “Blest Be the Tie That We Can’t Get to Bind.”

The address seems to have made quite an impression, as two out of the crowded house of twenty-three hearing volunteered to leave their doors unlocked when the canvassers called on them.

CLASSIFIED

Wanted—Some way to get news.—Editor Tiger.

Wanted—A few second-hand baby carriages, in order to supply the increase in the faculty trade.—Winslow Sloan.

Wanted—Some pretty girl to exert her lea-year privileges.—Hayes.

Wanted—More flies in the pudding—The Corps.

Wanted—Someone to give Prof. A. Smith an ear for music.—Chemistry Section.

For Rent—An old shoe. Suitable for a battleship. Apply to Hayden.

Wanted—A satisfactory translation of a Winthrop Blue Book.—Stribling.

Lost—In Columbia, S. C., my chance to see the Clemson-Tech game.—“Monk” Freeman.

Stolen—Our big cinch. Handsome reward offered for the return of the treasure—Lieutenants.

Wanted—To know the whereabouts of the Woodrow Wilson Club. Finder will please notify A. P. Funt. President-elect.

Wanted—To know the way to make the world think that we know something.—Seniors.

Wanted—The Dudley-Huck Company to return to the College for another show.—Risher and Pennell.

Wanted—Some of the privileges that we have heretofore so much about.—Seniors.

Lost—Many golden hours of blessed sleep while working for Taps, 1912—Taps Staff.

Lost—A chew of Brown’s Mule. Finder will return to “Bo Pig” and receive reward.

Wanted—A position as a yarn-teller. I am a professional in this line. Satisfaction guaranteed.—Railroad Hall.

Wanted—To know who sent a valentine to Prof. Dargan.—Ed. Hartley.

For Sale—A recently discovered sure cure for insomnia. Apply to “Baldrick” Johnson.

Wanted—A position in the out-field with the New York Giants. Guaranteed to cover more ground than anyone else.—“Molly” Davis.

Wanted—Just a “60” on all my subjects.—Truechale.

Wanted—A 7½§ cap in sound condition.—“Dilory” Hill.

Wanted—To know leading character in “Well, Sir.”

Wanted—A “chum.”—Aeroplane Zip.

Specimen Examination Questions

(1). Calculate the annual rate of increase of the sap of a two-year persimmon tree growing in a mud bank. Express answer in gills.

(2). Find the amount of energy expended by a brown spotted pig in rooting a hole nine inches deep. Express answer in horsepower, and also make drawings to show the movements of the pig.

(3). Calculate the square root of a sweet potato ten inches long and three inches in diameter, if potato grows on hillside. Express in Watts the heat produced when fed to a black pig seven weeks old.

(4). If the temperature of the interior of the earth is 9000 degrees, what will a Centigrade thermometer register at the North Pole the first of January? State briefly the average velocity of the winds blowing across the Sahara Desert at the same time.

(5). Given a plain slide valve, Erie City, Corliss Engine 102 x 32”, boiler pressure 90 lbs., back pressure 14 lbs. Calculate by use of this data, slide rule, planimeter and pony brake how much steam will have to be added to that already supplied in barracks to keep an Eskimo from freezing.

(6). Discuss at length the effect, cost, advisability and importance of feeding ground oak leaves to billygoats, and tell its effect on their horns.

(7). How long will it take a grain of sand getting into a stream in the Rocky Mountains to reach the Gulf of Mexico? Make diagram showing seventeen possible ways that it might get there.

(8). A Curtis Turbine runs at 3500 R. P. M., and is directly connected to a grindstone. Calculate the speed at which the Brush-o-mobiles on the Campus should run.

(9). Give an accurate ration for a dairy cow giving one quart of milk per day, if she is dehorned and has a black spot on her left side.
(10). Describe in detail the movements made by a horse when administered one half pint of gasoline in a quart of concentrated nitric acid.

(11). If it takes three hours for a locomotive on the Blue Ridge Railway to run from Pendleton to Seneca (17 miles), how high is the chimney at the College Central Light and Power Plant?

(12). Is water useful? If so, discuss in detail how, why, when, where, to whom and for what purposes. Find the exact time that it will take a drop to pass through a mud bank twelve feet thick.

(13). Given a certain 240-volt Shunt Motor running at 1300 R. P. M. and consuming 1700 Watts per hour. By the use of this data, tell how long it will take the Professor of Electrical Engineering to finish telling his trip to the plant of the General Electric Company at Schenectady.

(14). Give word for and what the author says about: “The wants of man” and “the expenditure for luxuries.”

(15). Give thirteen different ways in which the law of gravitation affects capitalistic production. Discuss each in detail.

(16). Give in detail the advanced theory as to the presence of corns, bunions and ingrowing toenails in horses, tom cats and guinea pigs.

(17). Discuss the economic importance of hydrogen, and give seven different processes by which it can be converted into H2S. Express in your own words the odor and taste of H2S. What, how, when?

(18). In a large test tube I have: H2O, KOH, Fe2SO4, K2SO4, HNO3, (H2S & HCN) and five thousand molecules of C12H22O11. Give names and chemical composition of the resulting substances. Find atomic and molecular weights and time required to convince a Senior Chemical of his ignorance of Chemistry.

(19). How far is it ten miles away?

Y. M. C. A.

The Y. M. C. A. stands for the upbuilding of the moral character of the corps. Its aim is to help each and every one to build his character; to help each and every one to understand more fully his relation to his Maker; to help every one to realize personal obligation to his God. This, after all, is the foundation of true character. Every work of the Association has as its ultimate object the building of character, by leading each cadet to a purer and more consecrated life. This work is a failure so far as it falls short of these attainments. This is fully realized. The Association is doing all in its power to bring the corps to a higher plane of morals. But such work in so large a body, so frequently changing in personnel, is of necessity slow in accomplishing tangible results. Yet the work is going on, and its results are more in evidence this year than ever before.

It is the endeavor of the Association to have a speaker of ability and reputation to address the meetings every Sunday evening. After these meetings the Bible Study groups assemble. Here is found the secret of the success of the work, for knowledge of the Bible has ever been the source of all its good work. As the men see the good work that the Association is forwarding, they realize more fully its value. Each year the enrollment increases. It is hoped that the day is not far distant when the name of every cadet will appear on this roll.

The parlor sofa held the twain
Miranda and her lovesick swain.
He and she.

But hark! a step upon the stair—
And papa finds them sitting there—
He and she.

We laugh at our professor's jokes,
No matter what they be;
Not because we think them funny,
But just for policy.

Both boys had been rude to their mother, who put them early to bed; with stern promises about father. Later, the restless lads heard father's step in the lower hall and were more than ever uneasy.

"I'm goin' ter pretend I'm asleep," said Willie.
"I'm not," said practical Maurice. "I'm going to get up and put something on."

"Mention the name of some well known Greek," said the teacher of a juvenile class in history.
"George," spoke up the curly-haired little boy.
"George who?"
"I don't know the rest of his name, ma'am. He comes around to our house every Thursday with bananas and oranges."

MAUD—"Do tell me, Alice, did Charley go down on his knees to you when he proposed?"

ALICE—"Nonsense! Why, how could he have gone down on his knees to me? Why, I—s well, where do you suppose I was, anyway?"

"Apples wuz de cause er de fall er Adam, wuzn't they?"
"Yes—apples and peaches."

"Peaches?"
"Ter be sho'. Las' Sunday I heard de ole deacon say dat Eve sho' wuz a peach!"

When a minister marrying a negro couple started to ask the woman, "Do you take this man for better or for worse?" the woman startled the clergyman by blurtting out: "No, judge, I wants him jest as he is. If he gits any better he'll die, and if he gits any wuss I'll kill him myself."

"I have a terrible cold," he complained.
"My head feels all stopped up."
"Have you tried a vacuum cleaner?" she queried sweetly.

PROFESSOR—"Mr. P—, construct a sentence using the word each."

STUDENT—"Professor, does your head each?"

PHYSICIAN—"What are you doing in that tub? You'll catch your death."

PATIENT—"But, doctor, didn't you tell me to take the pills in water?"

CHINAMAN—"You tell me where railroad depot?"

CITIZEN—"What's the matter, John, lost?"

CHINAMAN—"No! Me here. Depot lost."

"Did you know Mrs. Cohen had a hobble skirt on today?"
"Yes, I asked her how she was feeling and she said she couldn't kick."

A prominent man called to condole with a lady on the death of her husband and concluded by saying: "Did he leave you much?"
"Nearly every night," was the reply.
I told you, English class.

Lives of football men remind us
We can buck and knock a slug,
And departing leave behind us
Footprints on another's mug.

Went to see the football game,
Thought I could play the same;
So in haste I joined the eleven:
I am writing this from heaven.

"Did you hear the sad sea meaning,
Ever meaning soft and low;
'Tis because a fat old father
Stepped upon its undertow."

There was a young lady named Fitch,
Who heard a loud snoring, at which
She took off her hat
And found that a rat
Had fallen asleep at the switch.

A man had been seriously ill for a long while,
but had at last recovered. When he was convalescent, he said to some of his friends who called upon him: "Yes, I was so near the other shore:
I could hear the bells ringing to welcome me."

"Were they fire bells, papa," asked his little son, quietly.

The Girl—"No, I don't fall in love with every Tom, Dick and Harry I meet."

The Man—"That's right. My name is Jack."

Professor—"Mr. Hilton, you will kindly outline briefly the fundamental law against bigamy."

Bilton—"Yes, you will find it in the Bible.
It says no man can serve two masters."

"Johnny," said the minister, reprovingly, as he met an urchin carrying a string of fish one Sunday afternoon. "Did you catch those today?"

The Westerner led his gawky, overgrown son into a country schoolhouse. "This boy's arter larning," he announced. "What's yer bill o' fare?"

"Our curriculum, sir," corrected the teacher, "embraces geography, physiology, arithmetic, algebra, trigonometry."

"That'll do. Load him up heavy with trigonometry. He's the only poor shot in the family."

A Western physician received the following from a brother physician: "Dear Doc: I have a Bashunt whose physical signs show that the windpipe has ulcerated off and his lungs have dropped into his stomach. I have given him everything without effect. His father is wealthy and honorable in sentences as he is a member of assembly, and good nose I don't want to lose him what shall I do ans by return mail."

Yours frat,
"Doc Tishbein."

"Now, Lottie," said the teacher to a pupil in the juvenile class, "can you tell me what 'vice versa' means?"

"Yes ma'am," answered the little miss. "It means sleeping with your feet toward the head of the bed."

“Rat” Smith

It was in Columbia that I first saw him. I was standing with a number of Clemson men waiting for the “Carolina Special,” which was to take us to the end of our journey—in short, to the City of Calhoun, the nearest station to Clemson College. He was walking up and down the shed in a rather uncertain manner and would run up to some of the trainmen whenever he heard a bell and ask if that were the “Clemson train.” I chanced to be standing near the path he kept patrolling and, after passing me some half dozen times, he seemed to feel that he ought to make my acquaintance.

On one of these tours he stopped abruptly in front of me and stared. I confess I returned the stare, and I rather think that I had more ground to stare than he. However, we can never see ourselves as others see us. He was nearly six feet in height and well built. He held his shoulders well back and his head high. His suit was a bright blue, his necktie a flaming red, his socks green and his shoes a dusty patent. But it was his headgear that attracted my attention most—for he wore a Clemson cap.

I don’t know how long we looked at each other, but I do remember hearing him say:
"Howdy; be you going to Clemson?"

"Yes sir," I replied, "are you going up?"

"Yes sir, I thought I would run up and see if those fellows up there could learn me anything what I don’t know 'bout farming."

"So you have lived on a farm?"

"Yes sir, and a big farm, too. Pa’s got 'bout fifty acres, counting swamp and all, down in Horry County."

"Well, not to change the subject mysteriously, but where did you get that cap?"

"Oh, thar’s no mystery 'bout it. I got it from a friend o’ mine what went to Clemson last year, two years ago. You see, I ‘lowed if I wore this here cap, them old boys wouldn’t know that I was a rat. I guess they’ll find I’s too sharp for ‘em."

"You think so?"

"I know it. Why don’t you get a cap and fool ‘em, too?"

I suppressed a smile with difficulty. There was I—a dignified Senior—taken for a rat. But we cannot see ourselves as others see us.

My friend did not seem to notice that I did not reply, but went on:

"Maybe I might be able to help you out, seein’ I’ll be an old boy. I always make all the boys at home stan’ ‘round! If you ever need any help, jest call on Jack Smith."

I thanked him and excused myself to buy my ticket.

* * * * * * *

It was eleven thirty that night when I next saw my new friend. About two hundred of us had come in on the late train, and we had been notified that we must matriculate and pay our dues before we would be assigned to rooms in barracks. Now this seems a very simple requirement, but for two hundred men to go through this takes up several hours and requires the assistance of several officers to preserve order. I happened to be one of those pressed into service, and in this way came to meet again “Cadet Jack Smith.” I saw him as soon as he entered the treasurer’s office, for his blue cap added to his six feet made him easily recognizable. He was in the long line of men who, having signed the matriculation card in the hall, were slowly moving past the teller’s window, having exchanged their money for a precious receipt. As he turned from the window, he espied me standing by the door of the Commandant’s office and advanced confidently.

"How are you making it?” he asked.

"Very well. How are you getting on, and how did you find out you had to come up here? Why didn’t you go to bed?"

"I did. I came along with the crowd. They were wondering if we would have to ‘tricate, and some says yes we would and some says no. Well, I ‘lowed I’d turn in and I soon got me a room; but hit warn’t long afore some of them fellows turned me out again. I had just ’bout dropped off to sleep when all of a sudden I was layin’
flat on the floor with my mattress on top of me, and that little bed scattered all over the floor. I got up and was tryin' to get things together, when an old boy come in and says, 'Well, I'll be ___. Rat, what does you think you are doing in my room?' I told him I didn't know it was his room. Then he said he'd jest give me five minutes to get out. He didn't see my cap on the shelf and he looked so mean I 'lowed I wouldn't say nothing 'bout it. He went to undressin', and the faster he took off, the faster I put on. When I got dressed I got to the door, and then I asked him if he knewed where I could room. He looked hard at me and then he seen my cap. He asked me where I got it, and I told him as it belonged to a friend of mine. Then he said as he didn't give a hurrah. I could sleep in the woods, or I could come up here and get Spokes to give me a room. I come, and somebody told me how to 'triculate.' So, if you want to 'triculate,' I'll show you how. You jest ask that little man in the hall for one of those er cards, and he will say, 'Sit down here and fill up them ere blanks and sign your name on that ere bottom line.' You does it, and comes on in here and swaps your money for this paper and this card. But I forgot to tell you 'bout that pledge he makes you sign. Hit says you won't haze or maltreat any new cadets, but, mind you, it didn't say a word er 'bout hazin' old boys—little old boys, you know. Now I say, let's have some fun; but say, what 'bout you roomin' wid me?'

I quickly decided that it was time for me to assert myself, so I told my friend to wait on me a minute. I stepped over to the Assistant Commandant and asked him to put this particular man in my company. I would see that he learned to respect me. Then I informed Mr. Smith that I had another roommate in view and advised him to secure his room at once. He passed on into the office and the expression on his face I thought indicated that he had discovered his mistake.
It was about eight o'clock Friday night, as I passed down hall number thirteen, that my attention was attracted by the sound of a guitar in the room on my right. As I passed, someone inside flung the door open and I saw, within, some ten or twelve boys lounging around the room, and Jack Smith standing on the table playing and singing "Home, Sweet Home." The leader in the crowd, Brown, explained that Rat Smith had come in and tried to pass himself off as an old boy, but one of the rats he tried to paddle exposed him. Then Brown ordered Rat Smith to show us how he could write his name on the floor with his nose. This he did, with surprising quickness. Then he was requested to "get over a chair," while all the boys present emphatically spelled their names for him in a very *impressive* manner. This ceremony completed, Brown decided to have some more music and asked Rat Smith if he knew "Who Are You With Tonight?" Rat Smith had never heard of this song, so he naturally misunderstood Brown's meaning, and replied:

"Yes; but I hope that I will not be wid 'em another night."

We all roared with laughter at Brown's evident chagrin, but heard him reply in thunderous tones:

"RAT! What makes you so fresh?"

Smith seemed very much confused, but blurted out, apologetically:

"I didn't mean to crack a joke on you. I guess my being fresh comes with my being a Freshman."

We all laughed at Brown's rising anger and, of course, this only spurred him on to find some way of out-playing the rat in this impromptu match of wits.

"Rat," he began, "you think you are funny."

"Wal, not as funny as you look like you feel."
This brought the rat a round of applause, to Brown’s evident disgust. He decided to try an old game.

"Rat," he said, pointing to me, "ask that fellow for a bath ticket."

Smith did so.

"What do you want with it?" I asked.

"Mr. Brown needs it," he replied, dryly.

Brown by this time was furious.

"Rat Smith," he said, "you go to the Commandant’s office and get me a pan full of reveille. I’ll meet you at the guard-room."

The rat started on his mission and the crowd broke up, jeering Brown good naturedly.

* * * * * * * * *

Rat Smith was prominent in a squad of recruits drilling the next week. When the squad was first formed he chanced to be in the middle of the front rank; and so, when the squad was sized up, he was placed on the right end. Since this made him a pivot man, and numerous explanations were given as to the movements of pivot men, Mr. Smith was at once very much impressed with the importance of his position. After he had been drilling two weeks he came around to my room "to talk over the movements and drills." He explained to me how his drill master made a mistake the day before, and how he had corrected him. Then he told me that he was drilling "like a corporal." I congratulated him on his progress, and then he told me:

"I want a corporal next year."

"Well, I hope you will be successful in getting it."

"You has to send in an application, doesn’t you?"

"No, you don’t have to."

"Well, you can, can’t you?"

"Oh, yes."

"I done sent in mine yesterday."

"What did you say in it?"

"I jest wrote something like this:

‘To the Commandant:

Dear Captain,

I have great pleasure in applying for the first corporal in “A” company for next year. I know how to drill.

Respectfully,

Jackson Smith.’"
"Have you heard from it?" I asked.
"Not yet; guess I will soon."
The year passed on. The Fair Trip was enjoyed immensely by Rat Smith. His experiences there space does not permit us to give. Smith's military aspirations led him to earn the nickname of "Long Corporal." This came about by his believing one of the boys who told him that he had the appointment. Accordingly, "Long Corporal" secured some corporal's stripes, sewed them on and actually went up to the Commandant and asked for a "drill book." The Commandant absent-mindedly took down Smith's name and told him to "come back next week."

However, "Long Corporal's" dream was soon shattered when his classmates that night transferred his stripes to another part of his anatomy. But with commencement came his reward, for he did get a corporal—even though it was fifth rank in "M" Company.

Appendix

The idea of an appendix to Tars, '12, was suggested by a friendly ex-member of the faculty, who promised to prepare it, but, owing to the fact that he has since been detained at "Sing Sing" on the trumped-up charge of vagrancy, we must offer apologies for its absence in this book. The very fact that he was not immediately executed shows that the charge was not fully sustained. The Staff hastens to his assistance.

JAY-SMITH CLOTHING COMPANY

"The Store of Style and Quality"
"MY SON": Before Insuring, Investigate

The Mutual Benefit Life Insurance Co.,
OF NEWARK, N. J.

Mr. H. G. Quick, Dist. Mgr.,
Mutual Benefit Life Insurance Co., Elmira, N. Y.

Dear Sir:—It is with grateful appreciation that I acknowledge receipt of the check from The Mutual Benefit Life Insurance Company of Newark, N. J., for $10,131.70, which you handed me today, representing the insurance in your Company carried by my son, the late Prof. Ross G. Marvin.

While this seems like a large amount of money, it is insignificant in comparison to the value of his life to his loved ones. I was not in favor of his taking this insurance, but I now realize the wisdom of his action.

I feel that too much cannot be said in favor of life insurance, and especially your Company, which I know from experience has given us every dollar that we are entitled to, and $131.70 more than we expected.

Sincerely yours,

Mrs. Mary J. Marvin,
No. 409 DeWitt Ave.

Prof. Ross G. Marvin was drowned in the Arctic Sea on April 10, 1909. The proofs of death were signed by Commander Peary, himself, with whom Prof. Marvin made his first and last trip to the land of the midnight sun. Prof. Marvin had paid the Company five semi-annual premiums, amounting to $539.50, which is $9,592.20 less than his estate received from the Company.

The Mutual Benefit Life Insurance Company is old, true and tried, and has earned the title, THE LEADING ANNUAL DIVIDEND COMPANY.

M. M. MATTISON, General Agent
Anderson, S. C.
This is my Twentieth Year at Clemson College: our interests are the same: I cater to the officers, employees and cadets for my business—and I get it.

Upto-the-minute line of Skirts, Underwear, Neckerchief, Collars, Hosiery, etc.

We sell the famous “Crossett” Shoe that “makes life’s work easy.” The best shoe on earth for $4.00.

“Troymore,” of Philadelphia, for style, fit and workmanship; the all-wool line of clothing; $12.50 to $40.00.

All the traveling salesmen tell us we have the fanciest and best lot of Groceries any where nearer than Greenville. (They should know.)

We have quite a number of customers in near-by towns that come after them—must be some reason.

We sell many other things that we have not room to mention. Give us a call or send your orders. Either will be appreciated.

We are Agents for “Pittsburg Perfect” Fence, Eastman Kodak Co., Fuller & Johnson Gasoline Engines, “White Rose” brand of Coffee, Tea, Canned Fruits and Vegetables.

Our Tobacco Department excels, both in price and quality. Think of buying such cigars as Cinco, El Toro, Hoffman House, LaFolwin, (clear Havana), Franklin, Astor, and many others at $4.75 per 100; $1.50 for 50. Where else can you buy them at this price? Royal Robe Cigar, 5c straight.

Send your Mail Orders. We will deliver them at this price.

Will be glad to order anything for our customers that we do not carry in stock, and will save you money on it.

The Man Who Reads is the Man Who Leads

In these days of keen competition and careful preparation, the man who succeeds in engineering must keep his knowledge right up to the minute. He must follow all new developments, all new methods and everything important that takes place in his chosen field.

All of your needs are met by one of the following:

Electric World, Weekly. $3.00 a year
Covers the entire electrical art and industry

Electric Railway Journal, Weekly. $3.00 a year
Authority on all matters relating to the construction, operation, maintenance, and management of electric railways

The Engineering Record, Weekly. $3.00 a year

Special rates to students
