Engineering, "the art of directing the Great Sources of Power in Nature for the use and convenience of man," has been in evidence from the earliest of times; in fact its practice has been an imperative necessity in man's long and bitter struggle for existence in which it has been the mind of man pitted against the brute strength of his enemies.

The first great triumphs of engineering, those inventions that may truly be termed original, were in all probability accidental. The fearfully amazed discoverer of fire has left the world his accomplishments but not his name; the originator of the bow and arrow has departed unknown; the inventor of the first crude water craft, as well as the first to put a sail to the wind, has been lost in obscurity; and the fabricator of the first rough and clumsy wheel from a tree trunk has passed on unreverenced. The debt that we owe these unknown, unsung, and unhonored genii, who are lost to the world forever, is perhaps our civilization, for without their primitive start we, too, would plod the paths of their progenitors.

The brain behind the hand that developed, shaped and molded these crude, but nevertheless momentous, inventions into shapely, beautiful and intricate machines has evolved a language, a system of writing, and a system of mathematics—the language of the sciences. In their trail have followed the classical arts and the sciences—the foundation of modern engineering.
Many of the engineering works of antiquity, which required no mean engineering skill, are today inspiring monuments to the profound integrity and perseverance of the engineers of another day. Among their remarkable accomplishments may be mentioned the Hanging Gardens of Babylon, the harbors and temples of Rome, and the Pyramids of Egypt, "the most prodigious of all human constructions," which according to Herodotus, the Greek historian, the Great Pyramid required the labor of one hundred thousand men for twenty years. Medieval Europe leaves us castles and cathedrals of unique beauty.

Modern engineering, following in the footsteps of the astute scientists—mathematicians, physicists, and chemists—has acquired enormous proportions in diversified fields which include civil, electrical, mechanical, mining, marine, agricultural, chemical, and military engineering. The interworking of these branches has formed the basic foundation of ourindomitable industries and transportation facilities—our national wealth. The Panama Canal—"the greatest engineering achievement in history"—the Boulder Dam, the Golden Gate Bridge, the Holland Tunnel, and the Empire State Building are products of their combined ingenuities. The dawn of engineering is scarcely upon us; our scratch on the surface predicts an infinitely vast future.

THE CAMPUS

In the following pages we have not sought out new beauty spots; Clemson's splendor does not age nor pall on one. With the aid of the Stanley Studios of Atlanta, we present, from a new perspective, the same staid scenes, as they glow in the softness of dawn or slumber in the lengthening shadows of twilight.
ALMA MATER

Where the Blue Ridge yawns its greatness,
Where the Tigers play;
Here the sons of dear old Clemson
Reign supreme always.

Chorus:

Dear old Clemson, we will triumph,
And with all our might,
That the Tiger's roar may echo
O'er the mountain height.

We will dream of greater conquests
For our past is grand,
And her sons have fought and conquered
Every foreign land.

Where the mountains smile in grandeur
O'er the hill and dale,
Here the Tiger's lair is nesting
Swept by storm and gale.

We are brothers strong in manhood,
For we work and strive;
And our Alma Mater reigneth
Ever in our lives.

A. C. Corcoran, '19
"THE TIE THAT BINDS," the common brotherhood of educated men, the fraternity of intelligence, has not been lost by the introduction into colleges of a wide and varied curriculum. In earlier days all college graduates had taken the same subjects; all had studied the classics and moral philosophy. The classic allusions in the orations of Burke and Webster were understood by their readers. Milton's work on freedom of the press he called the Areopagitica—a word understood then but not used now.

Science has supplanted the classics and some feel that college men no longer possess the unity of the former generation. Today there are technical, vocational, and professional colleges, and independent schools in the same college or university. The students in one school may never come to know the students and teachers in the other schools. Nevertheless, there still remains a unity on a different basis.

The scientific method of approach to all problems furnishes the common bond. Research, investigation, observation, fact-finding, and interpretation make up the procedure of the educated modern. The result of this scientific method is that the sciences continually undergo changes, that most of our so-called history has to be rewritten, that economic and governmental machinery demands revision, and that even so conservative a subject as Theology must be revised. The scientific method of investigation is the commune vinculum that unites all scholars today and supplies the common method of attacking all problems.
FIFTY YEARS AGO Clemson College existed only in the mind of Thomas G. Clemson, a pioneer in that growing group of men who believed that the time was at hand when the colleges should prepare the youth of the nation to take their places in what was then thought to be a rapidly changing era. There had come into being a new spirit in the policy and purposes of education. Science, a kind of poor relation in the hierarchy, was knocking loudly at the doors of the cathedrals of education where it received no enthusiastic welcome because some of its early findings had cast into the rubbish heap ancient and respectable traditions. This new type of education has played a leading role in the greatest agricultural and industrial development recorded in history.

What is fifty years, or even a hundred years, in the life of a nation or the development of a great educational institution? Those who have witnessed the passing tread of Clemson men testify that the long line has marched out into the state, the nation and the world to put into practice the new principles founded upon the study of the sciences. Just so will the line of march continue and each year new contributions be made for the purpose of keeping knowledge at work for the improvement of that great mass of citizenry who live by the soil or the shop and without whose welfare real self government cannot endure for long.
THOMAS G. CLEMSON, scientist and public benefactor, in his will said:

"Feeling a great sympathy for the farmers of the state . . . and believing that there can be no permanent improvement in agriculture without a knowledge of those sciences which pertain particularly thereto, I determined to devote the bulk of my property to the establishment of an Agricultural College on the Fort Hill place."

The desire to benefit agriculture and the method of accomplishing this purpose, as expressed by Dr. Clemson in his will, have been the guiding principles of the trustees and of the officers of the institution since it formally opened its doors in 1893. Both in training young men and in discovering, assembling, and disseminating new scientific facts and principles the institution is serving well the purpose its founder expressed.

The 1600 young men who have graduated in agriculture and the 12,000 or more ex-students and graduates of other schools of this college occupy positions of leadership and influence, not only in South Carolina but in the National Capital and in other states. Clemson has more graduates engaged in teaching, research, extension and other professional phases of agriculture than has any other Southern college or university.

The research department of Clemson College has published during this period 300 bulletins, 46 annual reports, 53 circulars, and 40 articles in scientific journals. These researches are furnishing the background for the new agriculture which Dr. Clemson visualized nearly half a century ago.
THE SCHOOL OF GENERAL SCIENCE

FROM THE FOUNDING of the college until 1914 the president of the college served as head of the "Academic Department." Beginning in 1914, heads of divisions served as acting directors. In 1918 the present Dean was made director. The name of the department was changed to "Arts and Science" in 1925 and to the "School of General Science" in 1932.

Until 1925, this was a service department, but since that time it has also offered a four-year course leading to the Bachelor of Science degree and three-year pre-professional courses for those who wish to prepare for medicine, law, dentistry, etc.

The personnel of the faculty of the School of General Science is made up of teachers who have had special training in their respective fields. All have degrees from colleges and universities of recognized standards and all have done post-graduate work in universities. Seven of the staff have the Ph.D. degree, nine have the M.A. degree, and all others have the B.A. or B.S. degree.
SCHOOL OF CHEMISTRY AND GEOLOGY

IMMEDIATELY FOLLOWING the founding of Clemson College in 1889, the Chemistry Department was formed. The first Chemistry Building was erected in 1890, three years before the college formally opened its doors to students. Ten years later the building was enlarged to the present structure. The first faculty, consisting of Colonel M. B. Martin and Dr. R. N. Brackett, reported for duty in 1891. In 1933 the School of Chemistry and Geology was formed, and the present dean, Dr. F. H. H. Calhoun, succeeded Dr. Brackett.

The first and most important objective is to turn out MEN OF CHARACTER, for men of character develop into GOOD STUDENTS. It has been found that men of character and honesty of purpose are always conscientious, hard-working, honest students. Given good students it is possible to turn out GOOD CHEMISTS thoroughly trained in fundamentals, whose adaptability, honesty, cooperative spirit and loyalty will be an asset not only to themselves but to everyone with whom they may be associated.
COURSES IN MECHANICAL and Electrical Engineering were offered when Clemson opened for students. The course in Civil Engineering was added a few years later, followed shortly by the course in Architecture. These courses have been popular from the beginning. Many of the graduates have made remarkable successes, some of them of a national character. It is the purpose of this school to fit men for the various fields of engineering and architecture. Particularly in the early days, few engineering positions were available in South Carolina. This condition has gradually improved so that many of our graduates now reside in the state and it is our hope that our graduates may, after they have had some experience, develop a varied industry in South Carolina. Results along this line have been gratifying, but we are hoping to further develop the engineering possibilities of this state.

Whether the graduate follows engineering or not, the engineering curricula offer excellent educational training, whatever the man's life work may be.
Colonel T. S. Moorman, P.M.S. & T.

SCHOOL OF MILITARY SCIENCE

CLEMSON COLLEGE has been, since its inception, an essentially military school, and the military training of its students always has been a distinguishing feature of its curriculum, and, as a rule, a source of pride to its students and its friends throughout the South.

This training is now, and always in the past has been, conducted by Regular Army personnel detailed by the War Department.

Immediately after the first organization by the War Department of the Reserve Officer’s Training Corps, a unit of that Corps was established and has since been maintained at Clemson. From 1921 to 1927, both years inclusive, the War Department annually classified the R. O. T. C. units at the various colleges maintaining them, the highest award under that classification being that of "Distinguished College," which award Clemson won each of the aforementioned years. Since the discontinuance of the use of that term, Clemson has been given a rating of "Excellent" by War Department inspectors each year. This is the highest rating awarded.

The military administration of the corps of cadets is supervised by the commandant, while the actual military instruction is given by the Professor of Military Science and Tactics, and his commissioned and enlisted assistants.
AT AN EARLY DATE Clemson recognized her responsibility in the training of teachers for the public schools. Soon after the passage of the Nelson Amendment to the Morrill Act a limited number of courses was offered. With the passage of the Smith-Hughes Act in 1917, more definitely planned teacher-training work was organized and specific courses for the training of teachers of vocational agriculture and vocational industrial education were offered.

The percentage of men trained in these fields who have found employment in the public schools of this and other states is very high. Advance-

ment for these men within the public schools and in related vocational fields has been most encouraging.

With the approval of the 1931 certification regulations by the State Board of Education of South Carolina, President Sikes appointed a committee to make a study of Clemson's teacher-training facilities. This committee recommended in its report that all teacher-training work be coordinated and that the work be broadened to meet the needs of the State and certification requirements. Upon the recommendation of the President in 1933, the Board of Trustees established the School of Vocational Education.
Clemson Textile School was the third to be founded in America and the first founded by a Land Grant College. Its establishment in 1898 was largely due to Mr. D. A. Tompkins, a pioneer in textile engineering in the South. Today the school has 267 students.

The textile school today has three departments: the Department of Carding and Spinning, the Department of Weaving and Designing, and the Department of Textile Chemistry and Dyeing.

The textile industry is demanding more and better technically trained men today than ever before. Clemson textile graduates are meeting this demand. Practically 95 per cent. of the textile graduates of the last five classes have gone into the textile industry and are making good. The work of the National Recovery Act has clearly demonstrated that textile education must in the future include not only knowledge of manufacturing processes and of economic trends, but also a knowledge of working people and all their hopes and expectations. Clemson Textile School is making every effort to meet the needs of the industry in the face of these new conditions.

REVEILLE

WE ARE a varied crew of diverse interests, but we are made equal on our first day by one powerful denominator; we are all frightened. We are spoiled, and the habiliments that mean rank and position in the world we left behind are snatched from us and replaced by clothes of equal quality. Our quarters are all the same and our food cannot be distinguished from that of our neighbor. We are the embodiment of the dream of democracy as far as externals are concerned, for we all start a new life on an even footing. (The inner qualities that will in time shuffle some of us to the top of the heap are not at the outset apparent.)

The weeks become months. The bond of fear which held us together in the first hectic weeks is broken as we discover that the ogres who towered over us when first we groveled in the dust are human after all; but in its place a new feeling has grown and we are now united in progressive purpose.

This is the halcyon year. The duties and responsibilities which will later assume monstrous proportions are now in embryo, and to us they are unimportant. We are learning to lead by being led, and our cares are few. We feel that we are suppressed, and perhaps we are. But we are happy for now, while we are under many restrictions; we are tasting of that new freedom and companionship which family life never allows.

So we play and laugh. But with the laughter we are learning much. Aside from the academic knowledge that we are acquiring, we are learning to live with people whose interests vary from our own. Also we are learning tolerance and restraint. We are unconsciously absorbing much from the object lessons which surround us. We end this year with a type of knowledge gained only in the laboratory of Life.

DRILL

THIS YEAR we are aware of an inevitable result. Leaders have sprung from the ranks of men who started on equal footing. This is a good sign, for we begin to fall into place according to our ability. The men who will be outstanding in the last two years of this life, and perhaps in a later life, are becoming apparent. There will be changes; unknown individuals will spring into view and some of these leaders will drop from sight, but the same group will stand out in the final analysis.

This year we become aware of a new responsibility. In the first awakening we take ourselves too seriously and we are impressed with our importance beyond measure. As the months wear on we discover that we are after all only cogs and our first frenzy diminishes.

This is the hectic year. There is work to be done, an appalling amount of work to be done, and so little time to do it. Life is not long enough to work out the ambitions we have suddenly acquired. The few duties we have make us long for more. The mild esteem in which the freshmen hold us makes us want for more power.

So we frantically work. The year passes quickly amidst our frenzied endeavor. We find time to play, but the play begins to become a means to an end. We learn much this year also, but most of the lessons are bitter for they crumble cherished illusions. The wisdom gained in this year is gained from trial and error, and some of the errors have hurt. We are cynical as only sophomores can be cynical.

PARADE

NOW OUR AMBITIONS are crystallized and we have a more definite aim. There is more time, for we have discovered that our ambitions went perhaps too lofty; that the joy of accomplishment comes from the striving and not from the reaching of the goal. We have found our fields of endeavor and we are no longer stabbing in the dark. We know what we are doing and work ceases to be labor.

We learn to accept responsibility and to wear it lightly. We discover, in some measure, our capabilities and we stop attempting the impossible. We know that we are important to the life of the school, that we are essential in toto, but we have also learned that none of us as an individual is indispensable. We have learned confidence without conceit.

This is the earnest year. We truly apply ourselves to our work, but we know now that work and play are separate and distinct. So, we conscientiously apply ourselves to our work and just as earnestly apply ourselves to our play.

We are more experienced now and no longer are we cynical. If we disbelieve in the institutions we bitterly scorned before, we no longer have the desire to destroy them, rather we wish to gently change them. Our vision is broader and we have a keener insight into our own lives. We realize our own faults and we are more tolerant of the faults of others. We still work for we still have ideals. But we have lost the mad frenzy of last year and replaced it with calm determination. We have gained vision in this year, and we have laid the foundation for a philosophy of life.

TAPS

WE ARE BROADENING now the scope of the vision gained in the past three years. We are tying up the loose threads and are preparing to round out an important segment of our life. We have confidence now, but we realize that it is soon to be exploded. We suddenly realize that we are the leaders and models of a large group of people. This is, in a sense, only the return of the realization which turned our heads two years ago. Now, however, there is foreboding of what is to come.

In this year we suffer with mankind and we turn our attention to reform within our own walls. We prove our right to the eminent positions by bringing about beneficial changes in the established regime. We make mistakes, but our mistakes are more than made up by the good we have wrought. We carry our share of the liberalization of Clemson, a movement which has gained steadily in power for the last decade.

This is the successful year. Now we have reached the culmination of four years’ work and we sit high on the pedestal of our own making. But along with our sense of power comes the realization that we are important only in our own little sphere and that we are on the threshold of a new world in which we will start again at the bottom.

Now we approach the end of these four years. The bond of fellowship which has grown stronger with the years will never be entirely broken, but it will grow thin as the fates separate us. When we go out from these portals now we leave for the last time as students and we leave behind us the satisfaction that came with the knowledge that we were necessary. When we return we will come as alumni, outsiders to a degree, and we will see others doing the things we did for so long.

We leave Clemson with the same trepidation with which we entered her halls. To us at first she represented the unknown and we were frightened; now she is the known and we go out from her to know not what. We trade reality for dreams and memories.

It now becomes the duty of the historian to make a statement which seems true because of its constant use. But there is no other sentence which expresses our thought; so, with apologies, we, the senior class, say that we are grateful to Clemson and to each other for making the difficult transitional years of our lives pleasant and profitable.

Third Battalion

Page 127
ON SEPTEMBER 5, 1934, we came to Clemson, an unruly mob of “Last Year’s High School Seniors.” We looked around, expressed our disapproval, and settled down to a long grind of college life.

For a week we lived a life of ease. We made new acquaintances among the other “Rats,” and we spent many hours wandering around the campus getting used to the place.

Then the Sophomores, Juniors, and Seniors began to arrive, and our tortures began. They beat us with brooms, dust-pans, and coat-hangers; they made us push match-sticks down the halls with our noses; they made us sing songs which had no rhyme or reason; they taught us to play coo-coo, and we took it (we had to); but when the dust of battle had cleared away, we were still living, and we found that we had united, four hundred and fifty strong.

By the end of September the army had us well in hand. We learned to salute, to keep our trousers pressed, to have our buttons shined, our hair combed, and our shoes polished. We loved to drill, and Saturday morning Inspection was our favorite sport. We could execute a snappy inspection arms without even blushing! We were soldiers!

State Fair arrived. We went to Columbia and then to our homes. What a surprise awaited us! We found that despite our buttons and “the something about a soldier,” that our girls had deserted us for boys who could see them more than once a month. But we soon became used to this and when we returned to the college, the Anderson and Greenville “femmes” discovered us and many more hearts were broken by the gallant “Rats” of Clemson.

When we look back on this freshman year of ours, we realize that there will never be another year in our lives to equal it. Through all the pain and misery of the “pep meetings” and the discipline of the Army, the spirit of the Class of ’38 shines through.

“WE CAME; WE SAW; WE CONQUERED!”

WILLIAM C. WILES, Historian.

REALIZING that the paramount objective of the R. O. T. C. is the training of reserve officers the present staff of the P. M. S. and T., acting on suggestions from the senior privates, evolved the experimental unit known as the Senior Demonstration Company.
Second Platoon

SENIOR DEMONSTRATION COMPANY

Company, which is composed of the fourth year men who do not hold officers' positions in the corps of cadets. While not attaining the fondest hopes of its instigators, the potentialities of this organization have not been overlooked.
SENIOR PLATOON

TWO years ago the present Seniors voluntarily organized a Sophomore Platoon, and, drilling under Senior Officers, gave an exhibition drill with the Senior Platoon of that year. Interest in the platoon increased with the promotion of the sophomores to juniors, which necessitated competitive eliminations for membership before exhibition drills at the various parades and during commencement week. Cadet A. W. Allison was elected leader.

The platoon, while primarily a fancy drill organization, won third place in the close order drill competition at the Fourth Corps Area R. O. T. C. Camp, and its intricate fancy maneuvers were superlatively commended by all. This year the platoon, known as the Senior Platoon, has drilled before some twenty-five thousand enthusiastic spectators at football games in Asheville, North Carolina; Savannah, Georgia; and at Clemson’s two home games.

November 12, 1934

Editor, The Tiger:

I am writing to you to inquire about the annual beauty contest which is taking place in the coming week. I understand that the contest is to be held on the evening of the Taps’ Ball and that the winners will be announced at that time.

I am interested in this contest because I believe it is a great opportunity for the students to express their opinions and to participate in the selection of the most beautiful girls on campus. I would like to know more about the rules and procedures of the contest.

Sincerely yours,

FOOTBALL
COMING here in the capacity of Head Coach in 1931, after several years of assisting Wallace Wade at Alabama, Jess Neely found conditions at Clemson characteristic of the times. The Athletic Association was in arrears, and there was little playing material for the various athletic teams.

Coach Neely has truly shown himself to be the man of the hour, for he has balanced the budget; and the caliber of the teams representing Clemson has shown constant improvement, while the football team now has a schedule second to none in the South. Twice has his baseball team won the State Championship, and this fall his football team has received South Carolina’s highest football honors.

Coach Neely has justly won a permanent place in the hearts of the cadets, and it is gratifying to know that this shrewd and keen executive and inspiring and capable coach is to remain at the helm of Clemson’s athletics.
ONCE in the proverbial blue moon there rises from the ranks of men that rare combination—gentleman, scholar, athlete. Such an individual is Henry Woodward, captain of Clemson's 1934 State championship football team.

A student of magnetic personality, Woodward's intelligence and ability have made for him an enviable record in the social, scholastic, military, and athletic life of the college. His friends are legion, and he is respected by all who know him for what he is—a leader among men.

Second Row: Lewis, King, Black, Dillard, Watson, McConnell, S. W., Berry, Stiford, Buscher, Horton, Short, Folger, Cathcart.
Third Row: Lawton, Lantford, Robinson, Maness, McConnell, T. S., Robinson, E. D., Jeter, Snyder, Bryant, Sigars, Price, Oily, Ford.
THE Order of the "C," suggested by Professor John Lane, and conducted throughout the past football season by The Tiger, campus publication, is a mythical decoration awarded after each gridiron encounter to the Clemson player selected by Coach Neely as the "best blocker."

The idea back of this innovation is based on the need of recognition for the forgotten men—the linemen and those of the backfield who give up their chance of ball-carrying to open holes for their teammates in the forces of the opposition.

The local coaching staff and members of the football team express themselves as highly pleased with The Order, and ask that it be continued in the future.

CLEMSON, 6—P. C., 0

BEFORE AN OPENING day crowd of five thousand football fans, the Tigers started off their "suicide" schedule with a 6 to 0 victory over P. C.

Early in the first quarter Clemson advanced the ball from their own forty-yard marker in an unbroken sixty-yard march down the field, for a touchdown, with McCown, Berry, and Shore doing the ground gaining. "Nat" Berry went over for the touchdown, but Fellers' kick was a bit wide to annex the point.

For the remainder of the game the two teams played even ball. Many substitutions were made during the encounter due to the unusual heat of the afternoon.

Captain Henry Woodward was ushered into the game shortly before the half and displayed fine form as he advanced the ball on two attempts deep into P. C. territory as the half ended.

Kissam was awarded the Order of the "C."

"Nat" Berry Gets Off A Long One.
CLEMSON, 7—GA. TECH, 12

AFTER THE LISTLESS victory over P. C., in which the Tigers were playing under the vicious rays of Old Sol, the Bengals took to the road and did not return until the Homecoming against Furman.

Their first stopover was at Atlanta, where the Neelymen were defeated by a highly over-rated Tech team by a score of 12 to 7.

Immediately after they had taken possession of the ball, the Jackets caught the Tigers flatfooted as McKay faded back and hurled a long pass to Perkerson good for forty-eight and a score. The point was nullified as Clemson charged in hard and broke up the play.

Instead of being discouraged by this quick turn of events, the Tech touchdown served only as a stimulant for the fighting Tigers and they roared forth with their ace, Randy Hinson, who again and again electrified the crowd with his spectacular runs. On one occasion he gathered in Perkerson's punt on his own forty-yard line and returned the oval fifty-three yards to the Tech seven-yard line where he was tackled. Here the Clemson running attack bogged down and the ball went to Tech on the one-yard line.

In the second quarter Tech again scored on a sustained march down the field, which featured "Sundial" Martin going over for the touchdown. Martin's try for the extra point failed.

Going into the second half, the Bengals roared forth their defiance as Randy Hinson again brought the crowd to its feet with a scintillating eighty-yard jaunt for a touchdown after he intercepted a Jacket pass on his twenty-yard line. Stan Fellers cleanly sliced the uprights for the extra point. For the remainder of the game Clemson played brilliant ball with their spinners and off tackle plays especially effective.

This game proved that under the tutelage of Jess Neely the Tigers had advanced a long way and were no longer to be considered a setup for the other teams of the conference, but to be looked upon as a team hard to beat.

The spectacular playing of Randy Hinson stamped him as one of the greatest players romping the gridirons of the South.

"Mac" Folger was awarded the Order of the "C."
CLEMSON, 6—DUKE, 20

MAKING THEIR INITIAL appearance of the year as a contender for Southern Conference honors, the Tigers invaded the stronghold of the Duke aggregation at Durham and returned home on the short end of a 20 to 6 score.

Early in the first quarter the Blue Devils, led by "Corkey" Cornelius, brilliant All-Southern back, quickly pushed over the first score of the game. The try for conversion failed.

For the remainder of the period the Tigers and Wademen battled on fairly even terms with Clemson advancing at one stage of the game up to the Duke forty-yard line, where the Devils braced and the Tigers were forced to punt.

Again, in the second quarter, the Duke Juggernaut smashed and tore its way through a Tiger line that gave inches grudgingly but finally succumbed as Parker crashed over for the score, and this time the extra point was added. At this point Wallace Wade withdrew his first team and the enraged Tigers started a drive of their own which never relented until the final stripe was crossed. Randy Hinson again started to function as he did in the Georgia Tech game, ably supported by Mac Folger and "Slick" McCown. This forty-two-yard march culminated in Hinson's going from the four-yard line on a beautiful weak-side reverse play. Fellers' try for the extra point was blocked.

The second half again found Cornelius wreaking havoc with the Tigers as he returned a punt sixty-five yards for a touchdown behind beautiful interference. The try for conversion was good.

While Clemson suffered defeat at the hands of a great team, mention should be made of the great fighting spirit shown by the Tigers. Hinson, Kissam, Brown, and Folger were the outstanding players for the Jungaleers.

T. I. Brown was awarded the Order of the "C."

CLEMSON, 0—KENTUCKY, 7

IN ONE OF THE hardest fought battles of the year the Kentucky Wildcats outlucked a powerful and dangerous Clemson aggregation by a score of 7 to 0 at Lexington.

The lone touchdown came within two minutes of the close of the final quarter as the Wildcats intercepted a Tiger pass on their own forty-seven-yard line. Here "Abie" Ayres and his henchmen, held powerless all day by the hard charging Clemson team, unleashed an aerial attack which continually clicked and climaxed in "Bob" Pritchard sliding off right tackle from the eight-yard line for the score. Ayers' try for conversion was good.

Early in the first quarter Randy Hinson started the Tigers' first offensive drive of the game by returning a punt seventeen yards to enter Kentucky territory. It looked as if the Jungaleers were going places as "Bill" Dillard picked up fifteen yards on a spinner. Here the Wildcats' defense stiffened and Clemson was forced to punt. The remainder of the half saw the teams seesawing back and forth in midfield with neither team showing any marked superiority.

Ayres kicked off to Dillard to start off the second half and the "Mighty Molecule" returned to the Kentucky forty-three-yard line before he was dropped by the Wildcat safety man. However, the threat was short-lived as the Wildcats braced and Stevens and Johnson settled down to a punting duel until the final break of the game, which produced the only score of the day.

Stan Fellers, "Catfish" Watson, and Roddy Kissam protected the Clemson flanks in a grand manner, driving the Wildcat plays into the line repeatedly. Black, Brown, and McConnell played in the Kentucky backfield nearly as much as the Wildcat backs themselves. Harry Shore, playing his first game at guard, showed remarkable versatility by yielding little ground through his position.

In the backfield "Bill" Dillard, Randy Hinson, and "Ripper" Folger were outstanding.

Bill Dillard was awarded the Order of the "C."
EIGHTEEN THOUSAND enthusiastic football fans crowded Columbia’s new stadium to witness the mighty Tiger team roll up a 19 to 0 victory over its ancient foeman from the University of South Carolina.

In this game Clemson rose to the top of the South Carolina football heap and demonstrated, once and for all, that it had a formidable team, adept in every department of the football repertoire.

Clemson started scoring hostilities immediately as "Bill" Dil-lard took the opening kickoff and returned sixteen yards to the forty-three-yard stripe. On the next play Hinson gave the assembled corps of cadets a tremendous thrill when he rounded right end for a forty-three-yard gallop, placing the ball on the seven-yard line. At this point the Gamecocks’ defense held, and Henry Woodward called on Stan Fellers to try a placement. Stan responded by kicking the ball between the uprights for three points, and Clemson was away to a flying start which it never relinquished throughout the duration of the game.

In the first period "Slick" McCown crashed over for another touchdown, after Woodward, on a series of thrilling runs, had placed the ball on the four-yard line. Fellers converted. There was no further scoring in the fracas until the final period when Woodward, playing his last game against the Gamecocks, climaxed a spectacular march as he drove and smashed his way over for a touchdown from the nine-yard line. Fellers’ try for the extra point was blocked.

In the final minutes of play Stan Fellers added another three points to the Tiger total by virtue of a field goal from the twenty-three-yard line.

The entire Bengal team played brilliant football with Woodward, Fellers, and McCown taking their places in the sun as the game’s outstanding performers. Harry Shore stood out in the forward wall.

The entire team was awarded the Order of the “C.”
CLEMSON, 12—N. C. STATE, 6

THE FOLLOWING WEEK found the roving Jungaleers pitted against the mighty N. C. State Wolfpack at Raleigh. Thousands of spectators saw State’s Homecoming ruined by a roaring Clemson Tiger who defeated the Pack by a 12 to 6 count.

The Tigers started scoring proceedings in the opening minutes of play after Brown had recovered a State fumble in midfield. Randy Hinson started things off by hurling a bullet pass to Kissam which was good for thirty-four yards. Hinson was injured on the play and “Nat” Berry replaced him at quarter. “Bill” Dillard and “Slick” McCown drove up to the State two-yard line, from which point McCown smashed over for the score. Fellers’ try for conversion failed.

In the second quarter the Tigers again started a sustained march down the field. After an exchange of punts which placed the ball on Clemson’s thirty-yard line, Harry Shore, that consistent all-around player, pulled out of line from his guard position and whipped a pass to Folger which was good for fifteen yards. The Staters found themselves fighting with their backs against the wall as Stevens crashed through center for eighteen yards, placing the oval on State’s twenty-nine-yard line. “General” Lee scored on the next play, a spectacular forward-lateral pass, Berry to Stevens to Lee. Fellers again failed to convert as the half ended.

Following the intermission, the Wolfpack tried desperately to tally, but great defensive work by the Tigers stopped each threat until the final minutes of play when the Raleigh eleven scored on a long pass, Hayden to Dusty. Dusty’s try for conversion was blocked by McCown.

The work of McCown and Folger in the backfield and the playing of Shore and Black in the line were the outstanding features of the tilt.

This game ended Clemson’s Southern Conference schedule and once more the Tigers took their rightful place in Southern Conference standings, ranked with the great teams in this section of the country.

“Stump” Black was awarded the Order of the “C.”
CLEMSON, 0—ALABAMA, 40

TURNING WHAT SEEMED to be a close game from first-half indications into a complete rout in the second half, with superior reserves Alabama defeated the fighting Bengals by a score of 40 to 0.

The defeat was not an inglorious one as the Crimson Tide had one of the greatest teams ever produced in the South and swept every team it met from its path with the same great display of offensive power with which it headed for the national championship. "Dixie" Howell, Demyanovitch, Hutson, and Lee, each an All-American player, raised havoc with the Tigers, but after the game was over the 'Bama players knew that they had been in a severe battle, due to the indomitable fighting spirit of the Neely team.

Hinson again was the spark plug of the Bengal offense as he shook himself loose for a near-touchdown journey in the opening of the third quarter when he returned the 'Bama kickoff fifty-five yards before he was downed by Howell, the only man between him and a Clemson touchdown.

As the battle raged the "Tide" kept trying to pile up a tremendous score, and the Tigers fought back just as tenaciously, but in the final quarter the Alabamans scored twenty points as the Purple and Gold defense crumbled under the pressure of Frank Thomas' array of stars.

No one was awarded the Order of the "C."
NEXT WEEK the Neelymen, smarting from the Alabama avalanche, turned their attention to the Mercer Bears, whom they defeated, 32 to 0. During the entire season the Clemson team had shown tremendous scoring potentialities, but had never been able to click consistently. In this game our vaunted line and talented backs put on an exhibition of high powered football, running up the largest score ever in this series against a spirited but overpowered Mercer team at Savannah. Clemson started the scoring early in the second quarter after an exchange of punts had placed the ball on the Mercer thirty-yard line. "Nat" Berry started things off by slicing off tackle for twelve yards to place the ball in scoring position. On the next play Randy Hinson, behind perfect interference, stepped off the remaining distance to the goal line. Fellers' try for the extra point was good.

For the rest of the half the Tigers ran roughshod over the Bears, only to have their running attack slowed down within the enemy's twenty-yard line.

Following the interval, the Clemson powerhouse again started to function smoothly, and headed goalward, with Stevens and McCown forming the spearhead of the attack, placing the ball on the eighteen-yard stripe. Hinson quickly made it a first down on the next play; then Berry smashed over for another six points. Fellers again converted.

In the final quarter the Tigers put on an exhibition of scoring seldom seen on any field as they rapidly piled up three more touchdowns before the end of the game. The highlight of the final attack was "Streak" Lawton's seventy-five-yard return of a punt for a touchdown in the waning minutes of play.

The entire backfield was outstanding with Alex Stevens' fine punting continually keeping the Bears in their own territory. "Robbie" Robinson was awarded the Order of the "C."
CLEMSON, 7—FURMAN, 0

THANKSGIVING FOUND the stage set for a triumphant Homecoming as Clemson returned to Riggs' Field for its final game against Furman. The Bengals defeated their traditional foe by a score of 7 to 0, thus hurdling the last obstacle in their path to the State Championship.

The game was played on a sluggish field, soggy from a two-day deluge of rain which considerably slowed up the offensive tactics of the teams.

The only score of the day was made midway through the first quarter. Furman had the ball and was advancing into Tiger territory when it tried a lateral pass, which Fellers, one of the outstanding flankmen in the state, intercepted and stepped sixty-two yards for a touchdown. Fellers and his now highly-respected toe kicked the extra point.

Clemson for the rest of the game showed marked superiority in every department of play, except punting, where Roy Stevens, of Furman, stood out as a defensive mountain.

The half ended all too soon as far as the Bengals were concerned, as they had advanced the ball up to the one-yard stripe as the second quarter ended.

During the second half the Tigers continually played on the offensive, but slippery footing and great defensive work by the Hurricane balked their attempts to put over another score.

Outstanding for the Royal Bengals was the ball-carrying of Alex Stevens, playing his last game for Clemson. The entire backfield, composed of Hinson, Woodward, Dillard, McCown, and Horton was a virtual powerhouse during the game.

In the line the work of Shore, Black, Brown and Fellers bordered on the brilliant as they dropped Furman backs repeatedly for losses.

With its last game ending in a victory, the Clemson team eased into the State Championship and received favorable comment from sports writers throughout the South as the best team that has roared for Clemson in a decade.

"Slick" McCown was awarded the Order of the "C."

OPENING the collegiate season with an invasion of the hardwood trails of Tennessee, and sweeping back through the Palmetto State, Joe Davis' Bengal basketeers have nine straight wins chalked up in their favor as this book goes to press.

With a powerful aggregation composed of Dillard, Dobson, Pennington, forwards; Swails, center; Woodward, Brown, Spearman, guards; and a strong reserve force of Bowie, Wieters, Bryce, Wall, and Rice, the Clemson quint has at least come into its own.

Josh Cody's powerful Vanderbilt five was the first to taste defeat at the hands of the locals, and fell in Nashville by a 32-22 score. Until the halfway gun, the Jungaleers found difficulty in sinking their shots,

but in the final period the Clemsonites turned on the proverbial steam, and left the Commodores behind. Swails led scoring with 11 points.

At Cookeville the following night the Davismen continued their campaign, and trounced Tennessee Poly, 29-19. Scoring was low on both fives, and Swails with 6 tallies to his name took individual honors.

Journeying up into the hills of the state the Purple and Gold quint met and swamped Sewance, 40-16. Fast floorwork on the part of Dillard and Swails netted 6 points and scoring honors for each.

The Tigers breezed into Knoxville, and brought to a perfect close their four-game jaunt by marking up

a 40-33 win over the Tennessee Vols. Pennington, Wall, and Swails were outstanding.

Returning to the local court, Clemson's hardwood artists took their fifth straight game with a 43-29 victory over Georgia Tech. Over 3,000 eager fans watched Swails, lanky pivoter, sink 21 points as his team-mates outmaneuvered the Yellow Jacket quint.

Rambling over to Spartanburg the Davis five trounced the Wofford Terriers, 51-40. Swails bolstered his already high record with 20 additional points. Dynamic Bill Dillard dropped in 18 counters for second place.

Imbued with a winning spirit the Tiger cage team played to North Carolina State and sank the Wolf-
FOLLOWING a month of intensive training, the Tiger cindermen embarked on what was to prove one of the most successful seasons in Clemson athletics for the year.

The initial encounter of the season found Clemson's track hopes in Athens competing in the oldest form of athletics with the University of Georgia. Cold weather in Tigertown had taken its toll in sore muscles, stiff legs, and resulting injuries. When the last event was over, Clemson sat on the small end of a 76 1/3 to 49 2/3 verdict. The next Saturday found the thinclads pitted against the powerful Golden Tornado of Georgia Tech. Unable to hit their stride, the Tigers fell before Tech 87 to 44. Perrin Walker, sophomore sensation from Tech, succeeded in defeating Clemson's great sprinter, "Mountain Goat" Lynn, by a scant margin in the century and furlong.

Here the losing streak ended, and in rapid succession Presbyterian College was crushed 87 to 44, South Carolina defeated 77 to 49, and Furman completely routed as Clemson's victory went to the extent of a 109 to 17 win.

After the Furman triumph, Clemson
went the next Saturday to the state meet in Clinton, a heavy favorite for first honors. On the first day of the meet Clemson freshmen easily won the state championship as Clemson, Carolina, and Presbyterian led in the numbers of men qualifying to remain in varsity competition for the day following. At the end of a gala day of athletic endeavor, Clemson and Carolina stood deadlocked for the State title at 48 1/2 points each. This marked the first tie in the history of South Carolina state meets.

Two weeks later at the Southern Conference meet in Durham, Captain Lynn dashed to a second place in the 100-yard dash, and a victory in the 220. Robinson chalked up a fourth in the 440, as did McConnell and Blackwell in the discus and javelin respectively. The Clemson relay team finished third, and Lipscomb tied for third, fourth and fifth in the high jump.

Lynn went to the Penn Relays in Philadelphia to end the Tigers’ track activities for the year. Here Lynn repeated his performance in the same carnival the season before, by dashing to a third place against one of the strongest fields of sprinters in the entire nation.
ALTHOUGH somewhat weakened by the graduation of some outstanding leather slingers, the hard-hitting, fast-stepping aggregation of Bengal ring-men have pounded their way to two victories and a tie as Taps goes to press. The team, composed of Williams, Altman, Dawson, Griner, Lofton, Kissam, McConnell, and Henley, shows considerable promise, and the Tigers should emerge at the end of the season with a clean slate.

Opening against a powerful Duke team the Jungaleers eked out a 4-4 tie in the local ring. In the bantamweight division Williams cleverly outpointed Alterman for a decision, while Lofton punched his way to a Tiger victory over Mann, the Golden Glove Champion, in one of the fastest and hardest bouts of the encounter. Kissam in the middleweight and Henley in the heavyweight fought three hard rounds for a decision.

The following week the Bengal leather pushers exhibited fine form and excellent ring tactics to crumple the visiting Georgia Bulldogs 6½-1½. Williams boxed to a draw. Altman, revenging the defeat at
the hands of Lloyd in his first fight of the season, aggressively forced the Bulldog around the squared circle for the first round and then returned to inflict the only K. O. of the evening in the second. Dawson, with clever boxing and fast-flying gloves, outpointed his opponent; Lofton continued to let fly those long and hard lefts and rights to win a fast fight. In the upper divisions, McConnell, Kissam, and Henley outfought their adversaries for three more Jungaleer victories.

The South Carolina Gamecocks invaded Tigertown with one of the strongest teams in the state only to return to Columbia on the short end of a 6-2 score. Dawson and Lofton took the honors of the encounter by scoring technical knockouts. Altman, showing excellent form both offensively and defensively, easily won a decision. McConnell, sophomore middleweight, fighting his second bout for Clemson, treated the Gamecock with some fast boxing and a barrage of hard punches for three whirlwind rounds and a victory for the Tigers.
BASEBALL

COMPELLED to find seven new men to fill the places left vacant by graduation, Jess Neely went to work early on his 1934 baseball team and at the end of the season had his boys perched squarely on the .500 mark. Playing seventeen games, the Tigers won eight, lost eight and played N. C. State eleven innings to a 7-7 draw.

Clemson opened the season at home by dropping an exciting 7-6 decision to a strong nine representing Duke University but came back the following afternoon to slaughter the Dukes 10 to 5.

The Palmetto League season opened when Newberry came to Tigertown to down the Neely team 11 to 9 by virtue of Ayoub's terrific homer to right field in the eighth. Furman dropped over the way a day later and took the Bengals in camp, 8 to 7. Two days later Chick Doak brought his N. C. State Wolfpack down and fought the Tigers eleven innings with each team registering 7 runs.

Leaving the home lot for the first time, the Tigers invaded Erskine to hand the Flying Fleet a 5 to 3 de-
BASEBALL

feat and then directed the big guns on Clinton to lambast the Presbyterian pitching staff for a 15 to 8 victory.

Grayson Wolfe made his final appearance against the Tigers and defeated them at Clemson, 8 to 1, while Furman entertained the Bengals in Greenville to the tune of another 8 to 7 victory for the Baptists. Erskine journeyed to Clemson and the two teams battled through 12 fast innings with Clemson finally easing out a 3 to 2 decision, only to suffer a 5 to 4 defeat at the hands of the Newberry Indians a few days later.

At Clemson, P. C. suffered an 8 to 2 loss and Wofford came over to be blanked, 5 to 0, by Bill Croxton’s fast ball. In Columbia the Gamecocks again took the Tigers in tow, this time 6 to 4. Clemson wound up the Palmetto league exactly on the .500 mark by defeating Wofford in Spartanburg, 9 to 6.
Just hitting their stride, the Bengals decided to match blows with the University of Georgia at the Rotarian convention in Gainesville. A Georgia homer in the opening inning gave the Bulldogs a 2-run lead that was held until the Tiger snarled in the eighth for 5 runs and a victory by that score. The following day a two-run rally in the eighth gave the Georgians a 4 to 3 victory in the final of two of the best college games that state has seen in some time.

Randy Hinson, brilliant sophomore center fielder, led the Tigers for the season with a batting average of .362, while "Bull" Durham, another sophomore, trailed him with an average of .306. Chavous and Croxton, with averages of .300, were the only other men to hit above that mark.
MINOR SPORTS
COMING back after an absence of two years from collegiate competition, the Bengal tennis team swept through the state to become undisputed rulers of the courts for 1934. In their march to the state title the racqueters won eleven out of twelve encounters.

Beginning early in April the Tigers defeated the Anderson County Club in two encounters; Erskine in turn dropped two; P. C. was blanked at Clemson and at Clinton. Furman entered the one reverse of the season by taking a 5-4 decision on the local courts. The return match in Greenville went to the Jungaleers by the same margin. Wofford fell next and then in a swing down the state—Carolina and the College of Charleston were added to the list.

Following the season, most of the players entered the Collegiate Tournament held on Furman’s courts in Greenville. In the singles Woodward went to the quarter finals only to lose to his teammate, Horton, in a match in which both players held match point several times. Horton went on to win the singles title by defeating Clinkscales of Furman in the finals. In the doubles Woodward and Spann went to the semi-finals where they lost to Stephens and Clinkscales of Furman in a bitter five-set match.
LED by Captain Mark Van de Erve, the Clemson Varsity Swimming Team brought the State Championship to Jungletown after a very successful season.

The team opened the season in a meet with Emory, easily defeating the visiting men. Georgia, the next on the schedule, defeated the Clemson Tanksters by the slim measure of five points. P. C. and Furman followed in line and were handily beaten.

A triangular meet was next arranged between Georgia, Furman, and Clemson. Georgia again placed first, with Clemson a close second.

Clemson, rated as the dark horse in the conference meet at Charlottesville, Virginia, could not attend due to treacherous weather. The following week found the Tigers stacked against P. C. in a return match, and the Bengals again emerged victorious.

In another triangular meet among P. C., Furman, and Clemson, the Jungaleers defeated their opponents while setting six new state records. The last meet of the season was at Gainesville, Florida, and the Tigers were defeated by the strong 'Gators.

Among the outstanding men on the team were Goodson, Dickson, and Allison. Dickson and Allison were undefeated in the 220 for the entire season. The free-style relay team composed of Goodson, Van de Erve, Dickson, and Allison suffered only one defeat in eight starts.

Van de Erve, Basha, Thomas, and Jackson in the free style, McHugh in the backstroke, and Thackston and Fletcher in diving were consistent point getters for the Tigers.

THE purpose of the Clemson College Rifle Team is to establish at Clemson a group of expert rifle marksmen to represent Clemson in competition with other colleges for State, Corps Area, and National Honors.

The team for the school year 1933-34 made a creditable showing in all inter-collegiate matches, and took first place in the competition for South Carolina State Championship.

Interest in Rifle Marksmanship in general, and the College Rifle Team in particular, was developed to a much higher degree during the past year than ever before, due to active cooperation of the Department of Military Science and Tactics, as represented by Captain J. P. Gammon and Sgt. A. J. Kline.
THE Clemson College Golf Team is a recent innovation, but despite its infancy it has proved to be an able organization. Matches with Carolina, Furman, Davidson, and the Anderson Country Club were played during the 1934 season, and although the team did not win all of them, it improved as the season progressed.

The main loss to the team by last year’s graduation was “Charley” Moss, but despite this a successful season seems to be in store. With several promising sophomores eligible, it appears that the four places allowable are open to keen competition.

Matches with all the state teams and with several out-of-state teams have been scheduled for the coming season.

INTRAMURAL SPORTS

Intramural Governing Board

THE Intramural Governing Board at Clemson is a group organized to map out the policies and functions of the Intramural Athletic Program. The Board is composed of the Company Athletic Officers and the Intramural Director. Each competitive unit has its Company Athletic Officer to represent it on the Board. The duties of the Company Athletic Officer are mainly of an administrative and organizing capacity; he sees that teams are organized for all sports, that captains and managers are properly elected, and that information from the Intramural Office is passed on to his men. He seeks to create as much interest as possible in his particular Company towards the participation in the various Intramural Sports offered.

INTRAMURAL SPORTS

Through the foresight of Mr. P. B. Holtzendorf and under the direction of Fred Kiecher, the Program of Intramural Sports now in operation at Clemson College has been made possible. The program could never have reached its present proportions without the splendid spirit of cooperation shown by Dr. Lee Milford, Dean of Student Health and Physical Education; Mr. J. C. Littlejohn, Business Manager; Mr. Jess Noyes, Head Coach, and his staff; Col. R. J. West, Commandant, and his staff; Dr. E. W. Sikes, President of Clemson College; and many Clemson students and friends who have generously given of their time and energy towards the development of this work.

On Saturday Afternoon Hike . . .

Intramural athletics were first placed on an organized basis by the Clemson College Y. M. C. A. in the Fall of 1931. Intramural games in football, basketball, baseball, tennis, boxing, track and swimming were played prior to 1931 but not with any regularity of continuity from year to year. No adequate records have been kept of these intramural games; only through The Tiger and TAPS can they be traced.

A complete record of all intramural games played, write-ups, pictures of various teams and individuals, and information of interest is kept on file and will be preserved for future reference.

A variety of sports is offered, including team games, sports of individual performance, sports of high recreational value, sports requiring low as well as high skills and sports requiring different levels of organization. The following sports are on the Intramural Program: though some are not shown in this book: Volley-ball, Basketball, Golf, Tennis, Swimming, Ping Pong, Touch Football, Playground Baseball, Archery, Boxing, Handball, Badminton, Hiking, Horseshoes, Tetherball, Foul Shooting, Speedball, Rifles, Marsh-mallow and Track.

Continued support is needed from students, faculty and friends to keep this worth while work growing. An educational project that reaches seven hundred and fifty Clemson students for finer living deserves to be endorsed and supported.

EVERY THURSDAY NIGHT The Tiger, voice of the Clemson Student body and winner of first place at the 1934 meet of the South Carolina College Press Association, roars out campus news to its 2,000 readers.

The staff of the publication is composed of students from every school of the college. The paper is run by students without faculty censorship of any sort.
ASSOCIATE TIGER STAFF

THE ASSOCIATE STAFF of The Tiger is composed of freshmen, sophomores, and juniors who are interested in the "putting out" of Clemson's weekly newspaper.

The editor, associate editors, business manager, and circulation manager of the publication usually come from the ranks of this group, since promotion in this field of student activity is based on actual work and knowledge.

A place on the associate staff is open to any member of the Corps who is inclined toward pen-wielding, and who wishes to express himself through the columns of The Tiger.

FIRST REGIMENTAL

Africam, the University of South Carolina's student newspaper, reports that the first regimental meeting of the year will be held on Tuesday, May 10, at 7:30 p.m. in the Alumni Center. Members will gather to discuss the future of the regiment and its upcoming events.

TIGERS MEET DUKES

The Clemson Tigers will face the Duke Blue Devils in Durham on Saturday, May 11, in a crucial ACC game. The Tigers are looking to maintain their streak of conference wins as they prepare for the upcoming NCAA tournament.

FALL SPORTS MEET

The fall sports meet will be held on Saturday, May 11, at 1:30 p.m. in Memorial Stadium. Teams from across the country will compete in various sports, including football, soccer, and volleyball.

TIGERS MEET GC

The Clemson Tigers will play the Georgia Tech Yellow Jackets on Saturday, May 11, in a conference game. The Tigers are aiming to secure their place in the ACC championship.

沧州大学: 你看起来很聪明！
Aside from acting in the capacity of financial adviser to Taps and The Tiger, Clemson's genial business manager, J. C. Littlejohn, is one of the staunchest supporters of the two publications. He is never too busy to discuss the many and varied problems confronting the editors, and his helpful suggestions and sound and sage advice are in part responsible for the excellence of the college annual and the college newspaper.

BLUE KEY is a national honorary leadership fraternity having as its principles service and leadership. It is nonpolitical and selects its members from a representative group of leaders in college life. It strives to promote the welfare of the student body and the best interests of the institution.

With the idea of service uppermost in the minds of its members, the local chapter of Blue Key lends support to any worthwhile plan for bettering Clemson as the student body.

During the academic year the organization has conducted an anti-cheating campaign, issued a student-professor directory, sponsored talks to undergraduate groups, and in numerous small ways has rendered aid to visiting alumni and Clemson supporters.

TAU BETA PI is a national honorary engineering fraternity. It was founded at Lehigh University in 1885 and now embraces sixty-seven active chapters. The Alpha Chapter of South Carolina, located at Clemson College, was chartered in 1928. The purpose of Tau Beta Pi is to mark in a fitting manner those who have conferred honor upon their Alma Mater by distinguished scholarship and exemplary character as undergraduates in engineering, and to foster a spirit of liberal culture in the engineering colleges of America. Only students in the highest twenty-five percent of the Senior Civil, Electrical, and Mechanical Engineering classes are eligible for membership, and of these only students possessing character, integrity and responsibility are elected.

PHI PSI, a national honorary textile fraternity founded at the Philadelphia Textile School in 1903, has exhibited a steady and widespread growth, and at present includes eight active chapters from Texas to Massachusetts, besides several progressive alumni chapters. The Iota Chapter of Clemson College was granted a charter in 1927, and since its inception it has played a dual role. Professionally it maintains a high scholastic standing, on which membership is based, and it takes a keen interest in current textile problems, while its numerous outside activities and club rooms serve a much needed social want.
SCABBARD AND BLADE is a national honorary military fraternity. Membership is composed of the outstanding military leaders at Clemson. The purposes of this fraternity are to promote military leadership and a spirit of national defense.
THE MINARET CLUB

ALTHOUGH PROFESSIONAL in its membership, which is open to all students of architecture, the Minaret Club is fundamentally a social organization and functions as such. The club was founded by the architectural students of the class of 1923 for the purpose of creating a spirit of cooperation within the department by means of a wide range of extra-curricula activities and a well-planned schedule of social functions; in this way many valuable contacts are made which do not enter into the daily routine.
THE ATHANOR, the chemistry club at Clemson, was organized in 1931 by the Chemistry Class of 1934. The purpose of the Athanor is to promote higher scholarship, social interests, and a spirit of friendship and service among those students whose major interests lie in the field of chemistry.
THE PURPOSE of Alpha Zeta is to promote higher ideals among agricultural students, to encourage and foster scholastic endeavors, and to establish a brotherhood of the soil.

Alpha Zeta is the national honorary fraternity of America and Clemson is proud of the chapter established here. Membership in the fraternity is based primarily on character, leadership and personality from the upper two-fifths of the scholastic rating of the agricultural class.
CENTRAL DANCE ASSOCIATION

THE CENTRAL DANCE ASSOCIATION of Clemson College was organized in the fall of 1932 for the purpose of furthering the welfare of dances on the campus. It is composed of twelve members, nine of whom are Seniors and the remaining three are Juniors. The members are selected by recommendation of the Graduating C. D. A. from the rising Senior class and are appointed by the commandant.

The Central Dance Association conducts and supervises every dance held on the campus. The dances are conducted on a nonprofiteering basis. The accounts of all expenditures and receipts are kept by the treasurer and are accessible to any cadet who wishes to consult them.

ALPHA TAU ALPHA

ALPHA TAU ALPHA is the National Professional Agricultural Education Fraternity among men who are teaching, or are preparing themselves to become teachers of vocational agriculture in the high schools of our State. Its purpose is to promote the highest ideals and standards of this field of work. It aspires to lead those who have chosen the vocation of agriculture into fuller lives of success and happiness by a better understanding of their profession.
STARTING OUT with rejuvenated life and energy at the beginning of the year, the Block "C" Club decided to make something of itself rather than be content with being merely a name. The objects of the club are:

1. To promote congeniality and friendship;
2. To foster clean sportsmanship in all branches of athletics;
3. To encourage conduct at all times becoming a gentleman and a true sportsman;
4. To impress upon its members the importance of maintaining a high standard of scholarship and to assist in every possible way to achieve this aim;
5. To promote the advancement and welfare of Clemson College at all times.
The Chester County Club has been instrumental in building up a fellowship among the members. The annual Christmas dance and other dances sponsored during the summer vacation have accomplished much towards this and also toward interesting high school students in Clemson.
INTERNATIONAL RELATIONS CLUB

THE INTERNATIONAL RELATIONS CLUB is a national organization for the purpose of studying and discussing national and international problems. The Clemson College Chapter was organized in the spring of 1933 under the sponsorship of the Carnegie Endowment for International Peace. The club is limited to twenty members and a "B" average is necessary for eligibility to membership.
SIGMA EPSILON

SIGMA EPSILON is a social fraternity organized for the purpose of promoting good fellowship and brotherly feeling among its members. This club developed at Clemson in 1930 under the name of Sigma Theta, but in 1931 a reorganization took place, a new chapter was drawn up, and the name was changed to Sigma Epsilon.
SIGMA PHI

SIGMA PHI is the oldest social fraternity on the campus. Its purpose is to create a spirit of fraternal friendship for the promotion of the welfare of its members. Stilled for many years by prejudice, Sigma Phi is now coming into prominence among the other fraternities on the campus.
KAPPA PHI

KAPPA PHI is a local social fraternity organized in 1921. The purpose of the club is to create a better fellowship and a higher degree of friendship among cadets at Clemson. Since its organization Kappa Phi has been very successful in its attempt to set higher standards of social life on the Clemson campus.
ALPHA CHI PSI

ALPHA CHI PSI, one of the oldest local fraternities on the campus, was organized April 10, 1930, for the primary purpose of petitioning a national social fraternity. The character of the student is the outstanding element considered in the selection of Alpha Chi Psi members.
HORTICULTURE CLUB

Top Row: D. T. Pope, President, V. J. Linder, Vice-President, J. M. Lemmon, Secretary and Treasurer.

THE CLEMSON COLLEGE HORTICULTURE CLUB was organized for the purpose of stimulating interest in horticulture and promoting a bond of fellowship between the students and faculty members at Clemson. Any student who is thinking of specializing in horticulture is eligible for membership and is urged to join the club. Meetings are held semi-monthly in the Dairy Building.
The student branch of the American Society of Agricultural Engineers at Clemson was founded in 1931. The purposes of this organization are as follows: (1) To stimulate interest in those phases of engineering connected with agriculture. (2) To provide training in public speaking. (3) To promote good fellowship among cadets taking Agricultural Engineering.

All upperclassmen majoring in Agricultural Engineering are eligible for membership.
THE CLEMSON COLLEGE branch of the American Institute of Electrical Engineers is composed of instructors and engineering juniors and seniors who are members of the national institution. This branch is maintained with the aim of acquainting the students with current engineering practices and problems.

The 1934 Jungaleers, under the direction of J. F. James, played for dances in all parts of the state, acquiring an enviable reputation for brilliant dance music. They are considered one of the finest strictly collegiate orchestras in the South. Under the capable management of A. C. Watson, the band has been able to renovate their amplifying system and to purchase much new equipment. These improvements, with a change in personnel, are responsible for the fine appearance and outstanding performance of the orchestra. 1934 has been the most successful year ever enjoyed by the Jungaleers.
THE CLEMSON COLLEGE Alumni Corporation is an organization incorporated under the laws of South Carolina and is composed entirely of men who have attended Clemson College. The objects of the organization are to foster and encourage all of the interests of the College, and to bind the men together into an organization for the mutual benefit, both social and material, of all concerned. The parent organization is governed by a board of directors composed of fifteen members from every section of the country, who elect the officers and direct the affairs of the Association. The officers at present are W. D. Barnett, of Columbia, S. C., Class of 1910, President; L. R. Booker, of Clemson College, S. C., Class of 1925, Vice-President; Frank Jervey, of Washington, D. C., Class of 1914, Vice-President; J. H. Woodward, Clemson College, S. C., Class of 1903, Secretary and Treasurer. The Corporation is made up of Clemson Clubs all over the country that have their own officers and that are subject to and cooperate with the parent organization.
ALUMNI CLUB

THE ALUMNI ASSOCIATION has aided materially in getting students to come to Clemson. It has contributed to and aided in the erection of the present Y. M. C. A. building on the campus. It has recently formed what is called the Alumni Foundation which has as its object the creation of a fund for the use of the college in whatever manner the organization deems best. It is at the present time erecting the Physical Education Building on the campus. The organization stands pledged at all times to cooperate with all departments of the college for furthering the interests of the college and the individual student.

McCLELLAN IN REVIEW—Four reasons why Clemson won the Field Day Meet—They can't make me do this, no?—"Life Argentine" about to kill the goat—Altman hangs up his gloves to become a dude rancher—These boys aim high and accurate—A no ram check please don't rain the theater—A tent beside the road where the race of men go by—Sherman was right—Our fate rested behind yonder doors—The Post Band breezes in the shade at the Field Day Meet—Just another bushel to go—and don't forget the dishes—Just to show that the R.O.T.C. can pitch something besides parties—The L.S.U. boys do their stuff—Triplett out for an airing—Allison and cohorts are put to the acid test.
ON THE DOUBLE—Handsome Harry on the lookout for stricken Clemsonites—Aspiring pugilists have it out—Who said, "Home sweet home"?—Chic sales numbers this one—After a good night's rest?—Where there's a Liberty there's trouble—An army fights on its stomach—Fire at "Will," can't find him—Where the hardrocks shed briny tears—What "Price" glory—"They asked for it; let them have it," Maggie's drawers—"We're tenting tonight on the old camp grounds—Thode begins to droop while getting his six weeks' credit—Mark sixty—Tobey looks as though he enjoys camp—At least Babb and Lofton smile—Coleman sues the J-
This was no "gentleman's camp"—Off for the range—One way to beat out of church at camp, the caves—"Mother" McGee rates this one excellent—Furled tents, and does it look like rain?—I will walk my post in a military manner, etc., twelve times—One way of playing tag with Ole Sol—"Be it ever so humble"—Ready for anything including a night in Anniston—"I foxed 'em; I didn't pay my TAPS space"—Spuds fell on Alabama—Sarge spends one week end at Clemson—"Put your trust in God, but keep your powder dry"—Cochran and shipmates go native—The sky is the limit—What a feat!

THE LAST WORD

SINCE THE DAY that some embryonic historian conceived of the idea of producing a graphic and pictorial recording of a year’s happenings of college in what is termed an "annual," the retiring editor has been bound by some antiquated and moth-eaten custom to list his staff members and write pages thanking each for his diligence, co-operation and efficiency.

In the case of the 1935 Taps, the archaic tradition is no more. To thank those who have labored long and willingly along with those who have taken their jobs all too lightly smacks of hypocrisy. To rub a rasp over feelings is not my objective. But to be honest and give credit only where it is due, according to the old maxim, would surely cause smudges of scarlet to mantle the cheeks of some of my cohorts. Those who have fulfilled their duties have as compensation the knowledge of a job well done. They need no written corsages or bouquets. On the other hand those who have shirked their task realize it and no amount of balm would aid the situation.

If any thanks at all are to be given they must rightfully be bestowed upon those who, while not directly connected with the yearbook, have demonstrated their interest in it. Walt Dargan and Wrigley’s, his company, will always be admired for their excellent engraving. Earl Sanders, Johnny Long and Foote & Davies are to be commended for the highly satisfactory manner in which the annual was printed. To Stanley Marques and the members of his studio goes much credit for efficient picture-taking service. Mr. D. J. Watson deserves commendation for his help in getting ads. And last, but certainly not least, tribute is paid to Mr. J. C. Littlejohn, Taps advisor, whose helpful suggestions and untiring efforts were most valuable.

The Taps’ office is closed. The typewriters are covered. The book is off the press. The realization brings happiness and a bit of sentimentality. It has been a lot of work, but much fun!
