OF CLEMSON A. & M. COLLEGE, CLEMSON, S. C.
dedicated to...
ARTHUR BUIST BRYAN, who mastered the difficult art of interpreting scientific facts through the medium of the written word to the farmers and students of agriculture who must make use of them. Associate Professor of English and Editor of the Agricultural Extension Service, his work is of enduring significance to the people of the state.

FRED HARVEY HALL CALHOUN, Dean of the School of Chemistry and Professor of Geology, known fondly as “Rock” to his students, who has served in many capacities since coming to Clemson in 1904, including Track Coach, Vice-Director of the Agricultural Department, and Director of Resident Teaching in Agriculture.

SAMUEL WILDS EVANS, who served as Assistant Bookkeeper, College Treasurer, and Secretary of the Board of Trustees has held positions of great responsibility and trust, and who has with great integrity guarded and protected the funds of the institution and the official records of the Board of Trustees.

DAVID WISTAR DANIEL, Professor of English, Dean and subsequently Dean Emeritus of the School of Arts and Sciences, who has for forty-nine years made himself indispensable both to his students as a teacher and to audiences throughout the country as a speaker by his profound knowledge and trenchant wit.

That “instructing our youth in the way it should go” is an unselfish task that is taken for granted by some and denied by others. Certainly few ever become students through aspiring to become benefactors of mankind. Nevertheless, the activity of learning has a result as inevitable as the tides of the ocean—it enables a man to
improve his lot and that of his fellows, should he be so inclined. The true greatness of these who are here venerated is seen in the fact that they not only imparted the ability to aid mankind to their students but also, by precept and example, inspired them to do so.

Their names are familiar to all Clemson men; their spirits have become irrevocably enmeshed in the traditions of the school. Indeed, they might be said to be traditions themselves did we not know them as warm, flesh-and-blood personal friends; as friends of those who need friendship as well as of those who have friendship to give. The 1948 Taps portrays the Clemson which is so largely a result of their work as it is in the first year following their termination of active service. May this book be a perpetual monument to their labors!
these divisions
Fourth Barracks
A scared freshman's first view of Clemson is the clock tower of Tillman Hall which dominates the campus and which will probably dominate his life for the next four—or more—years. In its shadow he will stand in lines to matriculate and register; beneath it he will attend many classes; and by the mellow tones of its clock he may mark the rapid passing of those dance weekends spent with the lass of his dreams.

In the barracks behind the tower he finds his home. If he is lucky, he is given a room in one of the modern structures, but he may find himself in the same barracks that Grandpa occupied. Although he probably won't think so when he finds himself rooming beside a leather-lunged hog-caller given to practicing at midnight, it is really unimportant where he is assigned, for during his four-year struggle for knowledge he will probably live in nearly all of the barracks, and will be given ample opportunity to choose his "ole ladies". In these brick buildings he will learn to live in close comradeship with his fellow man, make his attempts at study, and exchange the "facts of life" with his fellow students in many bull sessions and card games.

First and Second Barracks
The Physics Building
Necessary though it is, the barracks life is but an adjunct to the serious purpose of college life—training. Within these walls we are quizzed, flunked, and, with luck, passed. But more important, we become proficient in some skill or profession which will enable us to make a living and do our share of the work of the world. To the freshman and to those of us who have not allowed ourselves to become disillusioned these buildings are places of awe, storehouses of the knowledge of the ages, and a source of power and wealth to all who have the perseverance to grasp them. For the rest of us, they are places of drudgery where, men in authority have decreed, we must spend an allotted number of hours before we may pull down the high salaries supposedly associated with college degrees.
The Outdoor Theatre

The Y.M.C.A.
For most, the initial plunge into college life is an occasion demanding great readjustment. From the comparative intimacy of family life the freshman is thrust into a world of a bewildering multitude of people, with whom he must work peaceably. Learning this process of getting along with people is one of the most valuable lessons to be learned in life, and although it is mastered but slowly by some, only a rare "rat" indeed does not soon find that a little finesse can save a world of woe in his dealings with upperclassmen.

Entrance into college life keeps one busy. In fact, events crowd each other in such profusion that the freshman is surprised to discover one day that his shorn head is no longer bare and that the day has arrived to invite his high school flame up to Autumn Ball. Football games and the concert series are included in his activities. The facilities of the well-equipped gym are open to him, and he has the privilege of entering intramural and intercollegiate sports. Should this be too strenuous for the freshman, he may retire to "Holtzy's Hangout", where he may indulge in swimming, ping-pong, movies, pool, and sundry other activities sponsored by the "Y".

By the end of the year, the daily sight of the same familiar campus scenes, the ritual of eating together, playing together, drilling together, and worshipping together combine in the comradeship of shared experience to kindle the spark which transforms a high school kid into a Clemson man.

The Administration and academic policies of Clemson are decided upon in the offices in old Tillman Hall. Here the President, the heads of the various departments, and the other college officials meet and guide the institution through the many and varied problems that arise. From these offices in the main building the maze of red tape goes out to entwine each of the seven schools, the students, and all activities. In spite of the seeming confusion much progress is made toward the ideal of a bigger and better Clemson.
OUR PRESIDENT

When all classes are forgotten, all books are burned, and our heads are decked with grey, we shall continue to hold in highest esteem our friend and president, Dr. R. F. Poole.

As a graduate of our Alma Mater, he knows our trials, problems, and temptations—and he usually has a plausible solution for each. Under Dr. Poole’s administration Clemson has grown continually, until today it is one of the top ranking A&M colleges in the nation. His thoughts have been motivated toward a greater institution, and his efforts have been toward the fulfillment of this ambition.

From farm boy to president—this is the story of Dr. Poole.
BOARD OF DEANS AND DIRECTORS

In every intricate organization problems arise periodically which deserve consideration in order that they may be mitigated or corrected. At Clemson these problems are solved by the Board of Deans and Directors, a group of men amassed from the seven schools and their subordinate departments. This group meets every Wednesday, or at the call of the President, to discuss and take action on such educational or administrative problems as may be submitted to them.

As its decisions and ensuing actions directly affect thousands of students, it is of the utmost importance that the board act wisely and with care. Since its members are representative of the various schools, the board constitutes a cross-section of Clemson, and is therefore fully qualified to act as it sees fit.

In the past years many matters have been handled with the hearty support of the student body. The board is often praised and occasionally criticized. By sheer perseverance it has secured for Clemson new buildings, the latest equipment, and a fine teaching staff.
OFFICE OF THE BUSINESS MANAGER

The expansion at Clemson has been made possible only through the able and untiring efforts of such capable men as our business manager, Mr. J. C. Littlejohn. Credit is also due the members of his staff who have increased the efficiency of this expansion and improvement program.

Comparable to the problem of the little old woman in the shoe, who had so many children she didn’t know what to do, is the task which Mr. Littlejohn faces in overseeing the feeding and housing of an immense family of 3,000. His more important task of keeping Clemson and its many organizations out of the red is a Herculean task.

The business manager’s office is an important factor in the administrative structure of the institution, and the efficiency with which this work is carried on is a tribute to the entire staff.
THE REGISTRAR'S OFFICE

The registrar's office is the office that keeps records on the 3,000 plus of us currently enrolled and on those who have attended Clemson in the past. Mr. Metz, the registrar and officer of admissions, also passes on all applications of prospective students, over 20,000 of which have been received in the past few years. Only a few of these could be accepted.

Other members of the staff are faithful Miss Sloan, who handles all manuscripts; Mr. Vickery, assistant registrar; and Mr. Berry, whose work is confined to the basement office.

This office receives and records in permanent form the scholastic standing of all students, and reports to the faculty those entitled to graduation. Because of the increased post war enrollment the paper work incident to admissions, standings, and graduations has grown tremendously; but in spite of this, the registrar's office has found time to revise and streamline our outmoded registration system.

To a Clemson man Mr. Metz is one of the most important figures in the administration, both during the college years and after, when his report of our record to a prospective employer may secure or lose for us a job.

The Senior Council

The Senior Council is composed of the officers of the senior class and seven members elected at large from the senior class by secret ballot.

The council is more than a disciplinary group; it is also a channel through which students may petition authority and is a motivating force for improvements on the campus. The members earnestly endeavor to observe, study, and find remedies for problems which present themselves during the school year.

During the past year, the senior council has recommended changes on the campus that have been salient in coping with the present expansion and with the two existing groups, the vets and cadets in the college.

As the desire for a representative student government has developed, the senior council has been instrumental in promoting the idea.

AND OCCASIONALLY THEY WORK
The Veterans' Executive Committee has been instrumental in bringing the veteran group together on matters of mutual interest to the veterans here at Clemson.

Among the activities undertaken during the past year have been the reburial of the war dead in this area and the promotion of the maintenance of the veteran insurance. More money, the cry heard loudest, was of course supported and petitioned by this committee.

The most time-consuming task confronting the committee was the support and establishment of the student cooperative to bring Clemson school supplies on a competitive basis.

Many problems concerning veterans and their families have been handled by the committee in cooperation with the American Legion.

AT LAST THE DIRECTORY IS OUT
Blue Key

Service is the keynote, and hard work and perspiration are the prerequisites for membership in this national leadership fraternity. The goal of this service fraternity is the betterment of Clemson College and the welfare of its students.

This organization does not duplicate the activities of any other club, but seeks to coordinate the activities of all the clubs. In the past year Blue Key has been especially helpful in building better relations between Clemson and its athletic opponents.

The "Blue Key Directory" continues to be one of the major projects of the group. The master schedule for club meeting dates on the campus and the information booths have also been of special significance.

In bringing together the most representative men in all phases of collegiate life, the Blue Key is an organization which molds the sentiment of the institution on questions of local and intercollegiate interest.

The Tiger Brotherhood was founded not by a national charter but by a sincere feeling on the part of the students and faculty to bring about a better relationship between the faculty and student body. This group was organized in 1928 as a local organization for the purpose of instigating and maintaining a high standard of ethics and morals on the campus. These students are chosen on the basis of service to the community, personality, and character.

Worthy projects undertaken by the organization during the past year have been the installation of a much-needed telephone for local calls at the guard room, the promotion of fire-prevention week on the campus, and the arrangement for the orchestration of the music for a new Alma Mater.

On the lighter side the members have enjoyed the intermission parties, arguing with Reynolds, and frequent socials—these are only a few of the projects and good times undertaken by this brotherhood of Clemson men.

WHAT SOME PEOPLE WON'T DO FOR TIGER BROTHERHOOD KEYS!!!
AN AFTER MEETING BULL SESSION

Alpha Phi Omega, composed of former Boy Scouts, has as its purpose service to the student body, to the faculty, to the community, and the nation. Since the Gamma Lambda chapter was organized on the Clemson campus in 1936, the members have striven to carry out these purposes.

During the past year this club has supported the relief program for Europe and has initiated the annual drive for the needy of the community. In line with their desire to serve the student body and the college, the fraternity published a booklet of club information and sponsored a much-needed clean-up campaign prior to homecoming.

Membership in this service fraternity is based on an individual's former scouting record and on his earnest desire to serve humanity.
Brain bustin'
Offering six degrees in the various phases of engineering, the Clemson School of Engineering has the largest enrollment of any of the seven schools at Clemson. Under the supervision of Dean S. B. Earle and Vice-Dean J. H. Sams, a staff of seventy-six gives the student the option of earning his sheepskin in Architectural, Electrical, Civil, Chemical, or Mechanical Engineering, or in Architecture.

During their four- or five-year course in Riggs Hall, men learn the principles of both basic engineering and modern equipment. Although working under somewhat crowded conditions at the present, these students become familiar with both practical engineering and the engineering of many "deals".

All over the campus "Engine House" men are recognized by their ever-present slipsticks and their constant moan of "I should change to Arts and Sciences".
ARCHITECTURE DEPARTMENT

Design, drafting, and rendering: these three words alone give a picture of the architect's existence in college and in practice.

Beginning in his first year, the prospective architect is submitted to increasing doses of mathematics, graphic statics, and strength and materials. Art and culture are absorbed en masse from such international figures as "The Saint", Mr. St. Hubert, visiting professor from France.

Peripatetic "Andy" Anderson is ever-present to give encouragement and advice to his wards. His patience and amiability are a part of the drafting room atmosphere. Mr. R. E. Lee, head of the department, has for years been an integral part of its proceedings. Every student becomes acquainted with "Pop", either socially or in the classroom. Rendering and life drawing, essential features in the architect's curriculum, are introduced by Mr. Petroff, better known as "Pete".

If a student should feel that he is lacking in any portion of architecture, or wishes to acquire a more versatile background after four years of study, he may continue for a fifth. Needless to say, the majority are anxious to begin actual practice immediately upon graduation.
CIVIL ENGINEERING DEPARTMENT

How deep is the river? How high is the Engine House? Lift that tripod, tote that chain! So goes the song of the bridge builders' school. Conductor Will Clarke leads the boys through their daily rehearsals on the second floor of the "House of Blue Slips".

After proving that the Calhoun mansion hasn't moved more than ten feet from the position it held in 1889, aspirants for the degree in civil engineering move on to study the moulding of steel, water, earth, and cement into their more useful shapes. Answers to questions such as "Will three feet of snow cave in the roof of the Main Building?" are answered by men like Trively, Ford, and Rostron.

All engineering students spend four hours a week during one semester carrying a long barber pole around the campus. It was one of these advocates of more rainy days who observed, "If the plot in front of Riggs Hall had as many stakes sticking out of it as it has had stuck in it, it would look like the back of a porcupine."
As the staccato rattle of circuit breakers ceased and the smoke cleared away, "Smiley" Giles stood frowning at a charred ammeter in his hand, muttering "The circuit is obviously faulty." Although such occurrences are frequent, they are usually blamed on the volunteers from the ME department who insist upon taking EE courses purely for the grade points.

If one escapes the hazards of machinery lab, he might venture into the electronics department, being careful not to stumble over any wires. The voltage is only a few thousand volts—it merely knocks you down, then the current stomps you. These wires might be part of Mr. Hallmark's latest frequency modulation method of writing his name with the oscilloscope.

Headed by Professor S. R. "Slim" Rhodes, the Electrical Engineering Department is the second largest in the School of Engineering, and with the addition of much war surplus equipment can boast of one of the college's finest labs. The department's curriculum includes fundamental studies pertinent to the field of electrical engineering, and also a selected group of broadening and cultural courses.

ELECTRICAL ENGINEERING DEPARTMENT

PROFESSOR S. R. RHODES
Head of Department

The Department of Mechanical Engineering is headed by Professor B. E. "Sterno" Fernow, whose courses in steam led him once to dub himself "Inferno". The growth of interest in this course coupled with the overflow of students following the war has led to a doubling of the physical equipment of this department within the past year; and, exclusive of buildings, this equipment now has a value exceeding $100,000, including a new laboratory equipped with new diesel and gasoline engines and a new $10,000 boiler.

This department is one of the largest in the School of Engineering, and by itself is larger than some schools in the college, on the basis of the first semester enrollment. This is as it should be, since it reflects the importance of mechanical engineering in industry. Many industries which are nominally devoted to fields only slightly related to M.E., such as electrical power production, are very largely M.E. problems. In the electric power plant the major portion of the equipment consists of the steam boiler or water turbine and their accessories.

A thumbnail description of this course is sometimes given by students from other departments to explain why they consider it a "crip". Quote: "The Profs make the student so mad that he boils, thus enabling him to understand the principles of the boiler. That generates steam, so at once the student is enabled to steam through his course without further difficulty."

MECHANICAL ENGINEERING DEPARTMENT
DRAWING AND DESIGN DEPARTMENT

Squares, triangles, and cubes rotate in wild disorder inside the freshman’s head. No engineer misses taking Drawing and Design.

Trains forever pulling into stations represent a fine example of perspective. Art gum is indispensable. Students learn the A, B, C's of lettering all over again under Doug Bradbury.

Further on, the courses become more technical. T-squares and drawing boards appear, and the room becomes a porcupine of upright pencils.

Wee Willie Klugh, an old Clemson grad and head of the department, personally coaches the advanced boys. With Wee Willie as impetus, they whip off detail and assembly drawings by the stack.

"Oh, my aching back!" may be a common complaint, but there is compensation in flaunting intricate drawings of machine parts under sceptical noses and bragging "I did it!"

Whether his intention is to become a draftsman or not, the engineer will continually find uses for Drawing and Design.
Leaping flame, erupting ash, the deafening clash of metal upon metal—this is the forge shop. Dubbed "Heat and Beat", forge practice gives the prospective engineer a working knowledge of the properties of the most common metals. A sister course to "Heat and Beat" is "Stack and Pack", where students learn the rudiments of foundry practice under the tutelage of jovial Prof. J. H. Couch.

Advanced students enter the domain of "Musical Ed" Freeman—machine shop practice. There they become familiar with the operation of lathes, drills, milling machines, and shapers.
CHEMICAL ENGINEERING DEPARTMENT

It may be reasonably stated that this subject, composed of chemistry and engineering interwoven, constitutes an obstacle that only the brave encounter, and only the “brains” survive.

CERAMICS DEPARTMENT

Clay from the Piedmont region is transformed by students into useful pottery and bricks. The South is learning not to neglect its natural resources.

HYDRAULICS DEPARTMENT

Processes with such forbidding titles as “force systems and their action on rigid bodies at rest” are made clear to young students by Curtis and his staff.
As its title denotes, Clemson places emphasis on agriculture, as well as engineering. Clemson provides intensive courses in Agricultural Engineering, Agronomy, Agricultural Economics, Animal Husbandry, Botany, Dairying, Entomology, Horticulture, and Poultry.

It is the job of Mr. Herbert P. Cooper, Dean of the School of Agriculture and Director of the Experiment Station, to integrate all of the departments into a smoothly functioning machine. Mr. William B. Aull, Vice-Dean of the school, also divulges the intimate secrets of bacteria to the students.

All is not limited to the classroom, however. In the afternoons groups of the students may be seen engaged in the science of spraying trees and grafting. In the Dairy Department, they get a working knowledge of the production of milk, butter, and ice cream. Spaced throughout the semester are occasional field trips. These provide instruction in its most appealing form.
Do you know how to keep a tractor ticking? If you intend to become an agriculturist you will have to know this and many other items. The trend in farm management is toward the mechanical side, and the Department of Agricultural Engineering is the place to get your information.

In addition to the purely mechanical part of farming, the Ag boys get instruction in the prevention of soil erosion, irrigation, and the most efficient utilization of farm buildings. The dynamite ditch is an absorbing problem in drainage.

The steep hills around Clemson offer the student an excellent practice lab for erosion. The neat terraces constructed in the college fields are evidence of the work being demonstrated.
HORTICULTURE DEPARTMENT

In the winding labyrinths of the Ag building dwell the greenfingered hopeful horticulturists. There the future custodians of our botanical world patiently gather knowledge on plant breeding, propagation, and landscape design. Mr. A. M. Musser, head of the department, guides his wards along the paths towards fame and fortune in the many fields which are open to the greenhouse gang.

After four years of absorbing facts on flora, the boys are prepared to get out and raise—if you’ll pardon the expression—Heliotrope.

DAIRY DEPARTMENT

The Dairy Department offers to students a combined course in dairy production and dairy products work. Graduates are qualified for positions as dairy farmers, milk plant operators, research workers, and scores of other positions in the field of dairy industries.

The bases for these jobs are laid in “Buck” Breazeale’s sophomore course where the student first employs the fundamentals of dairying. The next milestones encountered are “Big Ben” Goodale’s courses in which the student learns to make that good “Clemson Ice Cream”, and “Chief” LaMaster’s courses in feeding and management.
The Animal Husbandry major must know, among other things, his three “Fs”—Feeds, Fertilizers, and Farm Management. Even psychology is a necessity. You can fool some of the animals . . . .

If you can't fool them, cut them up. That's another art the boys learn while serving their time. This mass slaughter goes on in the basement of Long Hall under the guise of Farm Meats.

Mr. L. V. Starkey, Head of the Department, also instructs the students in beef production and feeds. Mr. E. R. Hauser shows them the finer points of animal judging. The world needs men well-versed in this profession, and Clemson is putting them out.

ANIMAL HUSBANDRY DEPARTMENT

AGRONOMY DEPARTMENT

The Agronomy Department produces our plant breeders, soil analysts, and crop specialists. Sounds simple to the layman, but every student of Agronomy knows better.

The carefree freshman years are passed in blithely learning required subjects. During the next few years courses become more difficult, and emphasis is placed on initiative.

Mr. H. P. Cooper, Head of the Agronomy Department, has a full-time position as supervisor. Mr. G. H. Collings, self-styled “Lord”, spreads the gospel of the soil to his flock. Mr. J. W. Jones shows his students why they are as they are and how to avoid it in their offspring. Don't depend on chance—see Jones first!
AGRICULTURAL ECONOMICS DEPARTMENT

The Agricultural Economics and Rural Sociology Department, headed by Dr. G. H. Aull, has won acclaim throughout the South. It is one of the first departments here to establish graduate training.

BOTANY DEPARTMENT

The boys of the Botany Department resemble a group of Ferdinands in their search for the perfect flora. Of course the smelling is all in the day’s work in the Botany Department. It is not strange that the students in this department are green, for after all, they are constantly in contact with the green things of the world. The love life of the pansies is a source of delight to the proteges of Profs Rosenkrans, Whitney, Rutledge, and Armstrong.

SEVENTY-FIVE HORSES AT WORK.
POULTRY DEPARTMENT

Under the auspices of none other than Chicken Morgan, himself, the Poultry Department works toward the goal of a bigger and better chicken in every pot. The methods used in this project are many and varied.

There are times when some of the students come in from chicken labs looking as if they have been used as specimens for study instead of the chickens. This is a true sign that these men have been hard at work under the direction of Prof. Morgan.

After a student has finished a course in the chicken department, he is qualified to let one in on the good know as to what makes a chicken tick—or is it cackle?

ENTOMOLOGY DEPARTMENT

It is the objective of the Entomology Department to teach the numerous students interested in the field of insect study the way of the local pests (insects, that is). The students under the guidance of Profs Ware, Dunavan, McFall, and Warnhoff learn early to distinguish between the dive bombing mosquito and the praying mantis. After this task is accomplished, they learn to annihilate the more biting of the two.
We call them “lintheads” around here, but in the field of textiles they have no peer. In one of the most modern and expansive textile schools in the country, the major follows fibers from field to fabric.

Days are spent in serious consideration of the theoretical and practical aspects of the field. Deep in the catacombs of the textile building, men delve into the art of chemistry and dyeing. Fabrics are immersed into boiling vats from which they emerge a brilliant hue. The “Czar” initiates the chosen few to the secrets of alchemy. Dog Curtiss tells about the second law of motion. Spare time is spent in manipulating jacquards.

In the evenings students see spots. Filling in those little squares is tedious work, but fabric design is just another must in textiles.

In the summers most of the boys try their hand in the mill—experience, contacts, and all of that.

Ultimately, the lintheads graduate and take their places in the rapidly advancing textile industry of the South.
TEXTILES

TEXTILE CHEMISTRY AND DYEING DEPARTMENT

Chemistry in any form is either fascinating or starkly theoretical to students. Textile Chemistry and its associate, Textile Dyeing, can be more appealing, as they show signs of a definite application. A man who decides to work in this field knows where he’s going. What he doesn’t realize at first is that, to get there, he will have to take courses almost identical to those of a pure chemistry major. Although he gets organic by merely being in the textile field, he escapes apprenticeship under Pete.

In the lab the students do the rainbow one better. Skeins of freshly dyed wool can be seen drying prior to display mounting in manilla folders. After the training the boys receive under the Czar, they are able to create at a moment’s notice a veritable Jacob’s coat. Life would be drab without the textile chemist to impregnate it with his brilliant array of colors.

MR. J. LINDSAY, JR.

THE CHEMISTRY AND DYEING FACULTY: J. H. LANGSTON, A. CZARNITZESI, AND J. LINDSAY, JR., INSPECT SOME DYEING WORK.
TEXTILE MANAGEMENT DEPARTMENT

This department is devoted to studies in Mill Management, Costing, Time Study, Testing, and Research.

In the course on mill management our Professor Eaton draws on his wide academic and mill experience to bring the students an over-all picture of the mill and its layout, stressing such phases as control of labor costs, selection of materials, and use of budgets.

Costing, under Professor Campbell, deals with distribution of cost to the individual processes, cost control, and determining the total costs of different yarns and fabrics.

Time study covers rating of the laborer's work loads, job analysis in which each step of a task is timed to enable setting up fair wage scales. This work is headed by Mr. Carson.

In keeping with the modern emphasis in the mills, the textile testing courses have been expanded. Various tests on fibers, yarns, and fabrics are taught by Dean Brown and Mr. Graham. Professor Heyn, whose work has been widely published in Europe, continues his fiber studies at Clemson. He offers a course on natural fibers and in textile microscopy teaches the students the importance of this tool to the industry.

In the field of research, Professor Heyn, in cooperation with the Physics Department, carries on fiber studies with the X-ray and the electron microscope. Dean Brown and Mr. Graham are developing some new textile testing apparatus and certain improvements on looms.
WEAVING AND DESIGNING DEPARTMENT

This department deals with the principles of weaving and design and the construction of various types of fabrics with respect to texture, design, color, appearance, and end use. Patterns range from small stripes and figures on dobby looms to large-figured designs woven on Jacquard machines.

The department is also concerned with the preparation of yarns for weaving. Warp preparation includes processes necessary to strengthen the warp yarn and put it in a convenient form for weaving. Filling preparation is a winding process to put this type of yarn in the form of small packages for insertion in loom shuttle to form the horizontal system of threads for woven fabric structure.

YARN MANUFACTURING DEPARTMENT

It is in this department that raw cotton from the bale is processed into usable yarns for weaving or knitting. Staple cut rayon and many mixtures of natural and synthetic fibers are made into yarn on cotton machinery. Cotton must be cleaned before it can be spun and Mr. Thomson, Mr. Wilson, and Mr. Jones teach the courses related to opening, cleaning, and drafting of the fibers.

Mr. Blair is our expert on combing, and Mr. Hendricks supervises the roving department.

Mr. Gage teaches spinning and has general supervision of the Yarn Manufacturing laboratories.

Students who do not desire to specialize directly in one of the technical branches of learning may substitute one of the curricula offered by the School of Arts and Sciences. In this manner they gain insight into the various fields, and thus are enabled to choose their life's work more intelligently.

The Modern Language Department, featuring French, German, and Spanish, furnishes a great deal of culture to the student who is willing to devote his time to memorizing the myriads of irregular verb forms. Economics and sociology are especially important as the business world is based upon them. Pre-medicine is available to prospective physicians. The juggling of equations and integrals keeps the mathematics major confused. The English major revels in Shakespeare and Chaucer. The intrigues of history and government puzzle some students. Acceleration, gravity, and force diagrams haunt the dreams of the Industrial Physics major.

Over all this Dr. F. M. Kinard, Dean of the School of Arts and Sciences, must reign, giving advice and encouragement when necessary.
PHYSICS DEPARTMENT

The Physics Department figures as heavily into every student's schedule as any other department on the campus, because it has a course to fit about every curricula in the catalog.

Under the able tutelage of such men as Huff, Lindsey, and Menius, the student can get acquainted with the whole field of Physics from elementary mechanics up to and including the Quantum Theory. The physics major starts out learning to use the meter stick and ends up using the electron microscope. Staunch believers in putting knowledge to work, the "wheels" in the department see that practical work takes its toll of the students' time. Many memories, happy and otherwise, are associated with those dragging afternoon labs; fighting with obstinate balances, applying the "finagle constant" to outrageously inaccurate readings, and sneaking a last year's experiment out to find the answer to one of the concluding thoughts. With all its trials and tribulations, getting through with all the physics building has to offer gives a man a sense of achievement. Until he does complete the course, the aspiring undergraduate can only voice the eternal lament: "the only thing that will save me is for him to grade on the curve."
MATHEMATICS DEPARTMENT

Clemson has a wide assortment of instructors in this field. "Speedy" Brewster has been accused of writing on the board with one hand while erasing with the other. Mr. Stanley has an unlimited store of energy which seems to receive an extra spurt in calculus class.

Equations, graphs and powers are complete mysteries at first. For many a sturdy fellow, calculus is the last stand. A smattering of eager beavers bravely advance into differential equations and intermediate calculus.

As civilization advances, mathematics increases in importance. Like the automobile and telephone, it is here to stay.

SOCIAL SCIENCES DEPARTMENT

Of prime importance to us, especially in this unpredictable hour, is the study of history. Misery Holmes saturates the Social Science major in the History of South Carolina. With this off the list the students forge ahead like bloodhounds on the scent. Lovers of Latin America snap their castanets and duck below the border with Prof. Epting to study that South American way.

The mercenary minds go for Money and Banking under Powers. Idealistic persons turn to the subject of economics. It may appear dull, but we all profit from their efforts.
THE ENGLISH DEPARTMENT

Clemson possesses a determined English staff. A college grad is expected to have a sound command of grammar. The staff sees that he gets one... or else!

Prof. John Lane holds that five o'clock class. In it students learn a little grammar and lots of practical knowledge.

Remember Public Speaking? Legs shook—tongues twisted. Shakespeare and Chaucer show us that there aren't so many new ideas.

Any way you look at the situation, English grammar and literature are indispensable.

MODERN LANGUAGE DEPARTMENT

As most students know to their despair, Foreign languages constitute an obstacle. Memorizing is only part of the problem.

"P. Doggie" Rhyne, Head of the Department, spices his lectures with acid wit. German, the language of a thousand endings, confuses an equal number of students. "Let's see now, I could add an 'en', 'er', 'es', 'em', or 'et' to this word if I knew if it was masculine, feminine or neuter." The classroom slogan: "Rauchen Ist in Meinem Zimmer Verboten". (No Smoking.)

For "Slim" Dean the boys wear out the backs of their French and Spanish books looking up forgotten words. C'est la vie!

Madame Epting really holds court in her salle de classe, although the boys would rather be in the salle a manger (mess hall).

But as Slim says, "You don't have to know the language".

The School of Vocational Education trains our future teachers. More and more the general public is beginning to realize the importance of their work.

Bachelor of Science degrees are offered in Vocational Agricultural Educational, Education, and Industrial Education. The Agricultural Education boys, in addition to large doses of directed teaching, learn about bacteria and good beekeeping. Students of Education exercise their brains over statistics and psychology. Physics, electricity, and building construction befuddle the Industrial Education major.

You name the subject—they’ve had it! The freshman wades through the usual courses, plus botany and zoology. Sophomores get a taste of chemistry in Doc Shirmer’s Qual and Quant labs. (His bark is worse than his bite.) The law of diminishing returns is pondered over in Mc’s economic class. Browning and Coleridge dominate literature.
The junior year slopes off into history and the biological sciences. Bacteria are hunted relentlessly in the afternoon. Minerals are prised out of rocks. Practice teaching in the senior year breaks the monotony, and sometimes provides unusual entertainment.

Devotees of music become familiar with Brahms, Beethoven, and Boogie Woogie. The Music Appreciation course introduces polyphonic (many-voiced) music and harmony. Hugh McGarity, pianist par excellence, purposely makes the course a little stiff, we suspect. That eliminates it for a cripp, men.

From all of this, you can get a general idea of what the education of a teacher consists. They like it.

At the beck and call of teachers of vocational subjects, the Itinerant Teacher Training Department, composed of members of the staff of Agricultural Education, stand ready to cooperate. The staff aids by organizing classes or actually teaching. Beginning teachers find their help useful while they are gaining experience in their task. There are many ways in which the service is of importance to both school and teacher; these are only a few.
The School of Chemistry, some students aver, possesses the unique distinction of having flunked more Clemson men than any other school, including that of thought. Whether true or not, it is certain that the student must be at least a graduate sine laude of the school of thought in order to pass chemistry. Pass they must; for all students at some time in their college career take "rat" chemistry as an essential part of the general education all college men should have.

If they survive the initial course there are many remaining. "Qual" and "Quan" by courtesy of Doctors Schirmer and Mitchell allow the would-be-chemist to analyze his talents and desires in regard to further chemical work. Organic, capably "organized" by Dr. Caro-
ACADEMICS

AND GEOLOGY

demos, and Physical by Dr. Pollard give sound basic knowledge in those important branches of chemistry. Advanced work in organic and inorganic chemistry round out the curriculum.

Although the crowded conditions at the College have taxed the facilities of the school, which is still recovering from the losses engendered by the burning of the chemistry building, the School of Chemistry has carried on ably under the leadership of Dr. F. H. H. Calhoun, and, since Dr. Calhoun’s retirement, of Dr. Hunter. The enormous amount of chemical knowledge and labor requisite to the production of the atomic bomb and of atomic power encourages belief that this school will be of even greater importance in the future. It must train the men who, through the exploitation of atomic power, will add much to our military safety and economic security. In any event, the present-day importance of chemistry in our daily lives renders indispensable the continuance of the excellent job of training chemists that this school is accomplishing.
As Clemson passes its peak of enrollment, the School of Military Science assumes a rôle of increasing importance. Colonel Thackston in his last year at Clemson has consolidated his work of post-war organization. The accent has been on new equipment and technique.

The rôle played by the Air Corps in World War II has pointed the need for a new division. This contingency was met and the Air Corps branch of the R. O. T. C. joined the established Infantry, Signal Corps, and Quartermaster.

An aspect of military training that is so well realized by our staff is its application to civilian, as well as military, life. The lesson of courtesy can well be applied to any field, and a man who can give, as well as take orders will find a secure spot for himself in life.

BANG! BANG!—YOU'RE DEAD, "DOGGIE"
Students in all branches of the R. O. T. C. receive intense training in military training and tactics throughout their college career. The department is fortunate in having combat-wise officers as instructors. One who has drunk from a lister bag and eaten C-rations can speak much more convincingly about sanitation under battle conditions. A man who has depended upon the functioning of his carbine for his very life well understands the importance of its care.

In addition to a general military education, each student is instructed as to the ways of his chosen branch. Problems of leadership and personnel management are discussed in the classroom by future officers of the Infantry. Training in technique as applied to the Signal Corps serves as an important part of the preparation for service in that field. The topic of distribution of supplies in occupied territories familiarizes the student with questions that may later arise coincident with the duties of a Quartermaster officer.

As the nucleus of a nascent army in time of emergency, the value of military training cannot be over emphasized.

VETS OF CLEMSON.
SGT. DAVIS—RED TAPE CUTTER.
Some Clemson men actually maintain a 6.5 grade point ratio for three years. To prove this the Phi Kappa Phi was one of the largest organizations on the campus this year. Outstanding students with sound character from the senior class who have a 6.5 g. p. r. are eligible for Phi Kappa Phi.

The first chapter of Phi Kappa Phi was initiated at the University of Maine in 1897. Forty-one years later, in 1938, the Clemson chapter was organized for those students who came up to these high standards of scholarship. Since that time, the "brains" of all branches of learning have been brought together by the ties of this honorary.

OFFICERS G. E. METZ, F. M. KINARD, C. B. GREEN, AND F. B. SCHIRMER MEET WITH A STUDENT MEMBER.
Shaved heads, squared shoulders, pep meetings, drill, et al . . . in spite of all this some industrious "new boys" manage to qualify for this society as recognition for scholastic efforts in the freshman year.

The qualifications for membership in the local chapter, which was started in 1938, are based solely on the grade point ratio. The requirement is a cumulative 7.5 ratio for either a student's first semester or his first two semesters.

The society was founded at the University of Illinois in order to recognize and promote high scholarship among first-year men, and to provide a medium for the exchange of ideas with undergraduates of other American universities and colleges.
Classes were sponsored by the members of Phi Eta Sigma in chemistry, math, and English for freshmen who desired outside help.

GIGNILLIAT GIVES AN "ATOM" THE ACID TEST
Alpha Chi Sigma is an honorary fraternity for chemists, having 53 collegiate chapters and 29 professional chapters distributed from coast to coast. In its membership it attempts to include those men of outstanding character and chemical ability who plan to make some phase of chemistry their life work, or who are already in this profession. In common with members of all fraternities, AXE members enjoy a brotherhood fellowship enriching their college days. They maintain a contact with their brothers in professional life that enhances the free interchange of ideas, facts, and opportunities so essential to scientific progress. These thereby enrich their post-collegiate days.

Frequent socials aid in rounding out the fraternal life, as do trips to other schools for district and national conclaves which enable members to exchange ideas and to evaluate their own training beside that of others. In addition, contact with the faculty, many of whom are fraternity members, aids in better faculty-student relationships.
Alpha Zeta was organized on the Clemson campus as a national honorary agricultural fraternity for the purpose of recognizing students in the School of Agriculture who are outstanding in scholarship, personality, character, and extra-curricular activities. Everyone, literally, is taken into consideration—from alpha to zeta.

To be tapped by this agricultural fraternity is one of the highest achievements which a student in the department may attain. Current questions in agriculture are discussed and debated upon in the regular meetings of the group. Speakers in the various phases of agriculture have left dents in the minds of these men who will obviously be the leading economists, rural sociologists, agronomists, veterinarians, entomologists, botanists, and others too numerous to mention.

In this new era in agriculture, scientific thought and practice is becoming the rule rather than the exception, as it was previously. This awareness originates in such groups as these potential soil tillers. The fraternity serves not as a goal to be reached but as a stimulus to further effort which will not terminate with graduation at Clemson.
The Minarets was organized by a group of students interested in furthering pleasant relationships among those students, faculty, and professional men connected with the architectural department. Since its formation, the society has aided students of architecture in becoming better acquainted with the many aspects of their profession. As evidence of this, the organization features at its meetings practicing building and landscape architects, interior decorators, and contractors.

Three members of the architecture faculty have been taken into the fraternity during the year to add a bit of spice to the meetings—that French titter-tat and that Yale wit. St. Hubert, better known as the "Saint", has brought his talents to flower on the walls of the clubroom. The two Yale men are Professors Petroff and Gates. One of the projects for the past year was the exhibit from the Robert Lee Art Galleries in Washington, D. C.

R. T. THOMAS

ALLAH BE PRAISED.
The wheels turn, the spindles spin . . . and behind all of this are the members of Phi Psi, Clemson's first Greek letter fraternity. The first chapter of Phi Psi was organized in 1903 at Philadelphia Textile School, and has enjoyed a steady growth since that time. In addition to the student branches, there are alumni chapters throughout the nation.

Clemson inaugurated its lota chapter in 1927. A group is selected for membership annually. High scholastic records, personality, and character are the prime requisites to membership. Phi Psi members are brought together with the idea of working for high standards in textile work and textile education.

Twenty years have passed since the founding of Tau Beta Pi, honorary engineering fraternity. This fact alone proves the stability and strength of its purpose.

As in the past, Tau Beta Pi emphasizes desirable traits of character and leadership. Also, to be considered eligible for initiation the student must be a senior in electrical, mechanical, or civil engineering, and in the upper fourth of his class. Only by extreme diligence and perseverance can the engineering student hope to qualify; therefore this distinction is well deserved.

Membership in Tau Beta Pi does not guarantee success, but it could be accurately predicted that the majority of these young men will become leaders in the engineering world of tomorrow. Great accomplishments are expected of them, and justly. To be marked by Tau Beta Pi is not a temporary distinction, nor will it fade with the passing years.

J. W. EVANS
President

A teacher, whether mother, priest, or schoolmaster, is the dearest thing in life and one for which no set of values is too high. Today more than ever before, the greatest challenge in history exists to young men in the teaching profession. To be sure, the satisfaction comes not in the monetary rewards but in the feeling that one has made a contribution to the society of a better nation and world.

Toward these ends, the Kappa chapter of Alpha Tau Alpha, national agricultural education fraternity was organized in 1930. Students who show promise of becoming the educational leaders of tomorrow are pledged to membership in this society. Men with experience in the field share with this group the problems and experiences which they have had.

"So the twig is bent, the tree's inclined." Education is the basis for a better world and a better democracy.
SIGMA TAU EPSILON

To be tapped by the Sigma Tau Epsilon is the highest honor within the Arts and Sciences school. To be eligible a student must be in the junior or senior classes and have maintained a prescribed grade point ratio up to that time.

The purposes of this fraternity are varied—the development of high standards of scholarship, character, a spirit of fellowship among members, and the maintenance of ethical ideals and principles.

This year the members of the fraternity have tutored other members of the Arts and Sciences schools in an effort to bring up the standards of all students in the school. In the past two years since the origination of the school, it has become one of the more diversified and largest schools in the college. This organization taps members twice a year.

FACULTY MEMBERS: M. E. Bradley, J. E. Carson, Jr., L. G. Kelly, F. M. Kinard, J. D. Lane, I. S. Slobodien, and K. N. Vickery.
The American Institute of Electrical Engineers was organized in 1884 to represent the electrical engineering profession. It has as its objects the advancement of the theory and practice of electrical engineering and of the allied arts and sciences, the maintenance of a high professional standing among its members, and the individual development of the engineer.

In the past this group has given its members the opportunities of visiting places of engineering interest; of listening to the presentation of reports, abstracts, and papers; and of making personal contacts with leading men in the electrical field of engineering.

The students often have chances to "exercise their lungs" by the presentation of their ideas and investigations.

AIEE POSES IN THE MU BETA PSI ROOM.
PREREQUISITE FOR AMERICAN SOCIETY OF AGRICULTURAL ENGINEERS.
Clemson’s chapter of A.S.A.E. was initiated in 1931 under the direction of the Agricultural Engineering department. Since its beginning, this society has been influential in bringing the students and faculty members in Agricultural Engineering into closer relationship with the field.

These men will undoubtedly be the leading builders of dams, irrigation canals, and farm and experiment buildings in the south and in the nation in the future. With the use of the gas engine and electricity, farming has had many new outlets.

This has broadened the engineering field in agriculture enough to warrant specialization in the field.

Many speakers and leading agricultural engineers of the nation come to the campus to advise and inform these students.
As the oldest national engineering society in the United States, the American Society of Civil Engineers stands second to none. The Clemson College Chapter was founded to acquaint the engineering students with the professional aspects of engineering, and give them some hint as to what will be expected of them in the future. It also affords the student an opportunity to make professional contacts and to interchange ideas with men practicing in the field.

Membership is limited to civil engineering majors of the sophomore, junior, and senior classes, with it go the responsibilities and rewards of an engineer. Many hours will later be spent in planning and the execution of the plans, but the satisfaction obtained in viewing a completed project is sufficient payment.
The A.S.M.E. binds the mechanical engineers at Clemson together for the purpose of gaining further information and ethical knowledge of their chosen field of endeavor.

This organization affords to its members the first opportunity to become formally affiliated with the profession. It is here that the practical side of engineering is brought to junior and senior mechanical engineering students.

Admission to the South Carolina chapter of the American Society of Mechanical Engineers is based upon character, scholarship, and personality. The society has chapters in the leading universities and colleges in the nation. No measure may be made of the worth of such a professional organization, as the benefits go far beyond our college careers.

KLINCK AND COMMITTEE AT WORK.
Fertilizers, choice of crops, selection of seeds ... these are the vocations of the leading agronomists today. To the support of these ideas, the Kappa Alpha Sigma chapter of the American Society of Agronomy was organized in 1935.

Membership to this society is limited to the agronomy students who show promise of becoming outstanding in their chosen field. Scholarship, character, and personality are taken into consideration in the selection of members.

As with other professional organizations of the campus, this club seeks to bring a closer union among students. In addition to classwork and lecture, members also come into contact with successful men in the profession and become familiar with the code of ethics essential to a well-rounded career in agronomy. One of the main guiding forces in the Kappa Alpha Sigma is Dr. Collings, known widely on the campus as the "Lord". There is never a dull moment with such an interesting sponsor.

THE LATEST DEVELOPMENTS ARE ...
The Animal Husbandry Club was organized in 1932 to bring the students registered in this course into closer contact. These students discuss the various phases of livestock production, exchange ideas, and promote the use of better methods among Clemson grads. Speakers are often brought before this group as an aid in preparing the students for their profession.

This door swings inward to the future leaders on the vocation of Animal Husbandry. In planning a sound economic and political future for the United States and the rest of the world, such specialists as these men will be needed.

In an organization of this type membership is composed of college students whose minds are open to new ideas and opinions by progressive agriculturalists today.

All phases of agriculture require a rational attitude and must be reasoned out rather than hurriedly accepted as tradition. The improvement of livestock by proper breeding and feeding is an outstanding example of this trend to accept the new improved methods. The leading students in the department here at Clemson will inevitably bring about even greater changes in the future.
DAIRY CLUB

The Dairy Club continues to be one of the most active departmental clubs on the campus. Too, this organization is the oldest of the professional clubs at Clemson.

Professor "Big Ben" Goodale played an essential part in the growth of this organization.

Frequently held meetings are devoted to student programs, socials, and discussions by men in the dairy industry.

In this way the students keep informed on latest developments in the dairy industry which may be found in no classroom.

"BOSSY"—THE CLUB MASCOT. NO DOUBT?
Forecast for the future . . . Low farm prices? Subsidy payments? Tax reductions?—Such questions as these are typical of those discussed by the members of the Economics Society at regular meetings and forums.

This organization includes Agricultural Economics majors and Arts and Science Economics majors. These men will be the future statisticians, economic prognosticators, and accountants whether on agriculture or industry. The predictions of the economists have a constant effect on the nation's business and agricultural economy.

Economics was once only theory advanced by so-called "quacks". Since that time these theories have been improved, and their application to any modern or ancient society has been shown to be valid.

It is not difficult to realize that the field is comparatively new, particularly the field of Agricultural Economics. More and more the industrialists and agriculturalists are becoming aware of the credibility of the predictions and statistics of men in this profession.

MEMBERS WHOSE PICTURES DO NOT APPEAR: C. C. Bell, L. J. Bell, H. O. Crawford, C. L. Crenshaw, J. O. Gerald, J. R. Lacy, F. M. McConnel, J. R. Shillinglaw, F. E. Wookcook.
The goal of the collegiate F.F.A. chapter is to encourage cooperation and better understanding among students who plan to enter the field of agricultural education. The organization was chartered at Clemson in 1937. Membership is limited to only those students of the sophomore, junior, and senior classes enrolled in Vocational Agricultural Education. Monthly meetings are held and here the students are taught to organize, prepare, and conduct interesting programs. The members have as their advisors, members of the education department who present interesting problems which confront teachers in this line of work. Thus the student gets a few outside hints which he might never derive from classroom exercises.

In the field of education, agricultural education leaders will be in great demand, and in addition to their regular salaries they will receive subsidies from the federal government.

MEMBERS WHOSE PICTURES DO NOT APPEAR: R. C. Chastain, and E. E. Lane.
HORTICULTURE CLUB

As with other phases of agriculture, horticulture is undergoing vast changes in this period of agricultural transition. The most modern equipment and chemicals are being used to produce the highest yield with the strongest qualities.

In order to create and further interest in horticultural subjects among Clemson students, the Horticulture Club came into existence. Membership in this organization is open to any Clemson student interested in the field of horticulture.

Meetings are held semi-monthly, featuring discussions of topics relevant to the field being spotlighted. The group was inactive during the war, but was reactivated last year under the guidance of Professor Sefick of the horticulture department.

PRACTICAL APPLICATION OF HORTICULTURE CLUB PRINCIPAL.

These potential dentists and surgeons only begin here at Clemson. There's a long trail awinding—until that M.D. degree will be awarded. The purposes of the Delta Sigma Nu are many: To promote fellowship among the members of the Pre-Medical school, to familiarize these members with medical subjects, to promote further study of medicine, and finally to aid the prospective medical student in selecting subjects in keeping with medical training.

Before the war the group was known as the Pre-Med Club, but became completely inactive during the war period. When the club was reactivated last spring, the name was changed to Delta Sigma Nu. The medical profession can always use new blood, and doctors have been scarce in the past decade.

The members of this society are working toward the day when they take the oath of Hippocrates, and assume their place in the field of medicine.

LADDER...
The Senior Class Officers were elected late in the spring of 1947 to serve as leaders of their class throughout this year. These men serve in a dual capacity as class officers and Senior Council members. In the former rôle they have administered the various class activities which consist of handling graduation invitations, representing the school as student body officers, and working with both the administration and the student body on various problems during the year. In their capacity as Senior Council members they have sat in on the council meetings and have acted as officers of the council. In cooperation with the council they have assisted in the good will campaigns sponsored by Blue Key, worked on the disciplinary cases, assisted in the clean-up campaign administration, and worked on the new student government plan.

WHO'S WHO

To be tapped by the order of Who's Who in American Universities and Colleges is one of the highest attainments which a Clemson student may earn. To qualify, a student must have maintained a 5.5 g.p.r. and must be outstanding in some group of college activities. Personality, character, and leadership are of utmost importance in selecting the group to be recognized.

Who's Who is a nationally recognized organization to which outstanding juniors and seniors in most of the leading colleges and universities of the country are selected on a uniform basis. The group is not active: it is purely honorary. These men will undoubtedly be leaders in society, business, and politics tomorrow—always working toward a goal to better the democratic institution.

FRANK CILLESPIE
Enjoys athletics and good grades as well . . . always receptive toward a good joke . . . a real asset to Clemson.
Likes: Any card game . . . vacant periods.
Dislikes: Long faces . . . tall gals.

VAN THORNHILL
Senior class presy . . . whatever problems life brings, this amiable fellow, a sincere and appreciative friend, will take in his stride.
Likes: Southern Gentlemen . . . home with his wife.
Dislikes: Noisy people . . . cue balls.

ED RHYNE
New ideas and a yeoman for progress characterize Ed . . . likeable personality . . . keen wit.
Likes: Wine, Judy, and song . . . arguments.
Dislikes: Inactivity in student activities . . . cheating.

JIM SULTIS
His ever-cheerful personality and athletic ability have won him many lifelong friends . . . a member of Tiger Brotherhood and Phi Kappa Phi.
Likes: Life at the hotel . . . clean athletics.
Dislikes: Rumors . . . bad manners.
JOHNNY EVANS
President of the Blue Key... leaves for teaching profession... precise... thinks every problem can be solved on a slide rule... cadet parson.
Likes: Ellen... Math.
Dislikes: Too much of anything.

ZEKE SIOKOS
That broad grin... cadet major... honors every semester... EE major... always joking.
Likes: The third floor.
Dislikes: Chaperones... labs.

JACK TRESOCOT
Vice-president of the Senior Class... always ready for a good joke... active in the C.D.A... good dancer.
Likes: All that goes with dances... swimming.
Dislikes: Binding contracts... onions.

FRANCIS HUTTO
Chemistry "queer"... mind above matter... gadgeteer... a smile for everyone.
Likes: Study... formulas.
Dislikes: Poor sportsmanship.

ROBERT CHRISTENBERRY
A star of the intelligencia... a keen wit... member of Phi Psi and Phi Kappa Phi.
Likes: The loom... the "femmes"... prosperity.
Dislikes: Shaving... fantasy.

DON SHARP
Casual and sure of himself... common sense along with book "larnin"... President of Kappa Alpha Sigma.
Likes: Horizontal engineering... green pastures.
Dislikes: Inactivity in student activities... horsey women.

FRED NORRIS
Senior council member... reticent... active in Baptist deputations... Alpha Zeta.
Likes: Orderliness... mail... music.
Dislikes: "Balleyhoo"... Saturday classes.
GILBERT HARDEE
State and local B.S.U. president...track man...president of junior class...neat in appearance...amicable to everyone.
Likes: To sing...conventions...religious work.
Dislikes: People who boast...dishonesty...profanity.

HAROLD LANDRITH
Cleverness exceeded only by his likeable personality...president of CFS...one of Shakespeare's actors.
Likes: Grades...sport clothes.
Dislikes: Disorder...smart alecs..."ham".

JOHN O. LEWIS
Editor of the Taps...campus politician...trombone shark.
Likes: Journalism...sleep...bow ties.
Dislikes: Loud mouths...show offs.

JOHN MARTIN
Small but atomic...good bluffer...turned pro his senior year...organized radio club.
Likes: People (girls, anything)...flying.
Dislikes: P.T. or any other physical exertion.

JIMMY YOUNG
"Wheel of the Y.M.C.A."...Blue Key...retiring...hopes to be an agricultural economist.
Dislikes: Icy roads...vulgarity.

GEORGE BRADLEY
One of the brains...student engineering instructor...excellent judge of beautiful women and fine horses.
Likes: Redheads...good times...good music.
Dislikes: "Cantankerous" automobiles...wasting time.
HANK WALKER
Always ready for a good joke or a Block "C" intermission party . . . good nature has won him a host of friends.
Likes: Athletics . . . food.
Dislikes: Clemson weather . . . concerts.

STACKWELL PENNINGTON
Tapped by the bent of Tau Beta Pi . . . athletically inclined . . . high honors man.
Likes: Parties . . . afternoon sleep.
Dislikes: Sub-par golf scores.

AL ROBINSON
Past president of P.S.A. . . . company commander . . . Scabbard and Blade . . . meticulous in dress . . . musically inclined.
Likes: The fairer sex . . . Stan Kenton.
Dislikes: Monday mornings . . . asparagus.

GRAHAM REYNOLDS
Editor of the "Tiger" . . . Tiger Brotherhood prexy . . . revolutionary thinker . . . self-confident.
Likes: Efficiency . . . house parties.
Dislikes: Long-winded speakers . . . women who smoke.

BILL GIGNILLIAT
Calm and collected . . . good company . . . enjoys chemistry.
Likes: Week-ends . . . steaks.
Dislikes: Pop quizzes . . . turnips . . . red tape.
CLASS HISTORY

To write a history of our Senior Class would be to write a memory of joys and sorrows, of changes and interruptions and all the things which go into making one's college years the best years of his life . . . but there is something eccentric and exceptional about our college career, for many of us our college careers started way back in '41 and a few of us even before . . . some of us came in '42, '43, '44, but our college life was of short duration because there came a call for help in a world torn by war, and many Clemson men left to answer this call. Some of our classmates never came back . . . they gave their all . . . then there are some of us who came in '45 and after an accelerated college career have reached the final goal with the same ones who started, some four, five, and six years ago.

There have come about many changes in our dear Alma Mater since we began . . . the distinctive traditional Clemson uniforms went out in '43 and reappeared again in '47 . . . the influx of veterans returning sent our enrollment figures from a low ebb of 300 students during the war to a record enrollment of 3,200 at present . . . with this increase in enrollment came new housing projects, classrooms, pre-fabs and faculty members.

We saw our matriculation become mechanized and pass from the usual all-day affairs of standing in line to a mere matter of 20 minutes or so. We saw most of our leading fraternities become deactivated during the war years and begin to rise again in '46 with new blood, vigor, and a desire to make Clemson greater than ever before.

Now as we look back, it seems that our Senior Class could be compared with a rolling snowball that began to move back in '45. Since then it has steadily gained in size and momentum until today, as we approach the final goal, we're bigger, more powerful, more determined to face the uncertain future before us than any class yet. We are the class of '48. The biggest in the history of Clemson.

FRED K. NORRIS,
Historian.
OTHO ALEXANDER  "Bruno"  Central, South Carolina
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN VOCATIONAL AGRICULTURAL EDUCATION
Private; Private; Veteran; Veteran; F.F.A. 2, 3, 4.

FRANK MORGAN ALLEN  "Doc"  Central, South Carolina
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN ARTS AND SCIENCES
Private; Veteran; Veteran; Veteran.

GEORGE WOODRUFF ANDERSON  "Andy"  Gastonia, North Carolina
CANDIDATE FOR DEGREE OF BACHELOR OF MECHANICAL ENGINEERING
Private; Veteran; Veteran; Veteran; A.S.M.E. 4; Gamma Kappa Alpha 2, 3, 4.

JAMES BRAMLETT ANDERSON  "Jack"  Fairforest, South Carolina
CANDIDATE FOR DEGREE OF BACHELOR OF TEXTILE ENGINEERING
Private; Sergeant; Technical Sergeant; Private; Executive Sergeants' Club 3, 4; Best-Drilled Platoon 2; B.S.U. 1, 2, Secretary 3, Treasurer 4.
NAT SIMPSON ANDERSON  "Net"  Piedmont, South Carolina
CANDIDATE FOR DEGREE OF BACHELOR OF TEXTILE ENGINEERING
Private; Corporal; Veteran; High Honors 2; Honors 1, 3; Phi Kappa Phi 4; Phi Psi 3, 4.

NOEL CROWTHER ANDERSON  "Andy"  Abbeville, South Carolina
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN ANIMAL HUSBANDRY
Private; Corporal; Veteran; Veteran; Animal Husbandry Club 3, 4; Abbeville County Club 2, 3, 4.

RUDOLPH ANDERSON, JR.  "Rudy"  Greenville, South Carolina
CANDIDATE FOR DEGREE OF BACHELOR OF TEXTILE ENGINEERING
Private; Staff Sergeant; First Sergeant; Second Lieutenant; Honors 3; Senior Platoon 4; Tiger Platoon 3; Best-Drilled Squad 1; Executive Sergeants' Club 3; Intramural Basketball 1, 2, 3, 4; Intramural Softball 1, 2, 3, 4; Intramural Football 1, 2, 3, 4; Intramural Swimming 3; Air R.O.T.C. Summer Camp, Keesler Field, Miss.

FRED ARTHUR BAILEY  "Radar"  Charleston, South Carolina
CANDIDATE FOR DEGREE OF BACHELOR OF MECHANICAL ENGINEERING
Private; Staff Sergeant; First Lieutenant; First Lieutenant; "Slip Stick" 4; A.S.M.E. 3, 4; Senior Platoon 4; Tiger Platoon 1, 2, 3; Executive Sergeants' Club 3; Charleston County Club 1, 2; Air R.O.T.C. Summer Camp, Keesler Field, Miss.

Class of 48
JAMES NEIL BAILEY        "Spike"        Greenwood, South Carolina
PRIVATE; PRIVATE; VETERAN; VETERAN; GREENWOOD COUNTY CLUB 1, 2, 3, 4.

MARVIN C. BALDWIN, JR.   "Jack"        Orangeburg, South Carolina
CORPORAL; FIRST SERGEANT; CAPTAIN; VETERAN; HONORS 3; MU BETA PSI 3, 4; A.I.E.E. 3, 4; SIGMA PHI 4; TIGER PLATOON 2, 3; EXECUTIVE SERGEANTS' CLUB 2; JUNGALEERS 2, 3, LEADER 4; BAND 1, STUDENT DIRECTOR 2, 3.

CARROLL SMITH BARNWELL  CANDIDATE FOR DEGREE OF BACHELOR OF TEXTILE ENGINEERING
PRIVATE; PRIVATE; VETERAN; VETERAN.

PAUL HODGES BARTON      "P.H."        Travelers Rest, South Carolina
PRIVATE; PRIVATE; VETERAN; VETERAN; HONORS 3, 4; SENIOR COUNCIL; "SLIP STICK" 4; BUSINESS MANAGER 4; Y.M.C.A. COUNCIL 1, 2, CABINET 3, 4; B.S.U. COUNCIL 1, 2, 3, THIRD VICE-PRESIDENT 4.

"Bill"  
Spartanburg, South Carolina
CANDIDATE FOR DEGREE OF BACHELOR OF TEXTILE ENGINEERING
Private; Corporal; Sergeant; Veteran; Gamma Kappa Alpha 2, 3; Spartanburg County Club 4.

LOUIS PINCKNEY BATSON, JR.  
"Biggie"  
Greenville, South Carolina
CANDIDATE FOR DEGREE OF BACHELOR OF TEXTILE ENGINEERING
Private; Private; Private; Private; Honors 1, 2, 3, 4; Phi Psi, Corresponding Secretary 3, Vice-President 4; "Bobbin and Beaker", Advertising Manager 3, 4; Freshman Y.M.C.A. Council; Greenville County Club.

OLIN EDWARD BAXLEY  
"O.E."  
Kershaw, South Carolina
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN ANIMAL HUSBANDRY
Private; Private; Veteran; Veteran; Animal Husbandry Club 3, 4; Kershaw County Club.

GEORGE ALBRIGHT BEACH, JR.  
"G.A."  
Columbia, South Carolina
CANDIDATE FOR DEGREE OF BACHELOR OF MECHANICAL ENGINEERING
Private; Private; Veteran; Veteran; Honors 3; "Slip Stick" 3; A.S.M.E. 3, 4; Glee Club 1, 2, 3; Columbia-Clemson Club 1, 2, 3.

Class of '48
HOWELL FLOYD BEACH, JR. "Floyd" Walterboro, South Carolina
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN AGRONOMY
Private; Veteran; Veteran; Veteran; Agronomy Club 3, 4; Colleton-Clemson Club 3, 4.

CHESLEY CLARENCE BEAM "Coot" Lawndale, North Carolina
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN VOCATIONAL AGRICULTURAL EDUCATION
Transfer 1, 2, 3; Veteran; Honors 4; Alpha Tau Alpha 4, President 4; F.F.A. 4; Square and Compass 4;
Gamma Kappa Alpha 4.

EARLE JOINER BEDENBAUGH "Bedie" Prosperity, South Carolina
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN ANIMAL HUSBANDRY
Private; Private; Private; Private; Animal Husbandry Club 2, 3, 4; Intramural Softball 2, 3.

ROBERT HERMAN BERLY, JR. "Bob" Lexington, South Carolina
CANDIDATE FOR DEGREE OF BACHELOR OF ELECTRICAL ENGINEERING
Private; Veteran; Veteran; Veteran; "Slip Stick" 3, 4; A.I.E.E. 3, 4; Lexington-Saluda-Clemson County Club,
Treasurer 3, Vice-President 4.
EUGENE BERMAN
"Boots"
CANDIDATE FOR DEGREE OF BACHELOR OF TEXTILE ENGINEERING
Private; Veteran; Veteran; Veteran; Phi Psi 4; Hillel-Brandeis Club 1, 2, 3, 4.

JOHN OSCAR BETHEA
"John"
CANDIDATE FOR DEGREE OF BACHELOR OF AGRICULTURAL ENGINEERING
Private; Corporal; Veteran; Veteran; A.S.A.E. 3, 4.

LUTHER S. BIRD
"Luke"
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN AGRONOMY
Private; Corporal; Sergeant; Veteran; Agronomy Club 1, 2, 3, 4; Veterans Organization 4.

JACK T. BLACK
"Jack"
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN VOCATIONAL AGRICULTURAL EDUCATION
Veteran; Veteran; Veteran; Veteran; High Honors 1, 2, 3; Phi Eta Sigma 1, 2; Alpha Tau Alpha 4, Vice-President 4; F.F.A. 3, 4; Calhoun Forensic Society 3, 4; Lexington-Saluda Club 3, 4, Treasurer 3.

Class of '48
WALDO NEELY BLACKMON
"Blackie"
CANDIDATE FOR DEGREE OF BACHELOR OF MECHANICAL ENGINEERING
Rock Hill, South Carolina
Private; Corporal; Veteran; Veteran; Honors 2, 3; Mu Beta Psi 2, 3, 4; A.S.M.E. 3, 4; Concert Band 1, 2; York County Club 1, 3, President 4.

ERNEST BLAKELY, JR.
"Blake"
CANDIDATE FOR DEGREE OF BACHELOR OF TEXTILE ENGINEERING
Greenville, South Carolina
Private; Veteran; Veteran; Veteran; Veteran; High Honors 3; Honors 2, 4; Phi Psi 3, 4; Sigma Epsilon 2, 4, Secretary-Treasurer 3; Pershing Rifles 1, 2; Y.M.C.A. Council 1; Wesley Foundation 1, Anderson County Club 1, 2.

OLIN H. BLANTON
"Buck"
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN AGRONOMY
Taber City, North Carolina
Private; Private; Veteran; Veteran; Honors 2, 3, 4; Kappa Alpha Sigma 3, 4.

THEO EVERETT BOLIVER
"Teddy"
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN ARTS AND SCIENCES
Columbia, South Carolina
Private; Corporal; Veteran; Veteran; Alpha Phi Omega 2, 3, President 4; Sigma Phi 3, 4; Chi Sigma Chi 3, 4, Treasurer 3.
WARREN J. BOST
CANDIDATE FOR DEGREE OF BACHELOR OF ELECTRICAL ENGINEERING
Private; Veteran; Veteran; Veteran; Phi Eta Sigma; Tau Beta Pi 3, 4.

RICHARD HAL BOWERS "Dick"
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN HORTICULTURE
Private; Sergeant; Veteran; Veteran; Horticulture Club, Treasurer 3, Vice-President 4.

LYNCH HARRY DEAS BOYKIN
CANDIDATE FOR BACHELOR OF SCIENCE DEGREE IN HORTICULTURE
Private; Veteran; Veteran; Veteran; Horticulture Club 3, 4.

CORPS OF CADETS 286
MILITARY ORGANIZATIONS 314
MILITARY

R

ARMS...

...
The Corps of Cadets, the body military at Clemson, operates under the direction of the Commandant, Colonel Albert J. Thackston, and his staff. The actual command of the cadet corps is handled by cadet officers and non-commissioned officers under the supervision of army tactical officers.

The strict military discipline under which all cadets are required to live exerts an influence on the lives and habits of the individuals which is of inestimable value. The soldierly qualities of cleanliness, orderliness, and punctuality are emphasized and made a part of the daily life of each cadet. It is the training of cadet life that has earned for Clemson men the title "Country Gentlemen".
"YES MA'AM—COLONEL BARTON."

HONORS TO THE COLONEL AND THE SERGEANT

NUT BOYS—FRONT AND CENTER.
ANNUAL FEATURE OF THE CORPS

Capturing the judges hearts with her personality and beauty, Miss Betty Barton, of Anderson, won for herself the title of Honorary Cadet Colonel, succeeding Miss Adelaide Best. Following the tradition of reviewing the candidates for “Sweetheart of the Corps” as they pass by in the Grand March at the Military Ball, the committee, headed by Colonel A. J. Thackston, Jr., Commandant, awarded Miss Barton the coveted three diamonds in an impressive ceremony. After getting up for breakfast to call off inspection, she was accepted by the cadets.

On Mothers’ Day Betty reigned supreme. Attired in a uniform that would have done justice to any cadet’s wildest dreams, she reviewed the corps from the hilltop on Bowman Field. Then stepping smartly between ranks, she inspected the cadets individually.

Other features of Mothers’ Day included formal guard mount, exhibition drills by the Tiger Platoon and Clemson’s Company C-4 of the Pershing Rifles, honorary drill platoon, and a special program of music in the College Chapel by the Limestone Choir.
Everything in the military life of a Clemson Cadet . . . the long hours of drill, the weekly inspections, the classes in Military Science and Tactics, the eternal clamor for "nutsiness" by the officers, the parades . . . all serve to prepare him for that test of all tests, the annual Spring Inspection.

Many look forward to it with fear and trembling, some take it as just one of those things which must be suffered, while a few regard it as the ultimate goal of all their efforts. The latter is certainly true as far as the military program is concerned, for Spring Inspection signifies the "day of reckoning" which can make or break Clemson's reputation for top quality in all things. Hence the eternal striving for that coveted "excellent" rating and the right to wear its significant blue star on the right sleeve of the cadet blouse.

As the great occasion approaches, new cans of elbow grease are broken out. The cadets polish their brass buttons, doorknobs, and anything else that will shine, scrub and wax their floors, wash down the walls, dust every inch of reachable surface, straighten their lockers and shine their shoes.

Then they drill and parade and drill some more. They get every movement down pat. The theory classes in military science hold reviews, because part of the inspection will be theory examinations for all classes. The great day comes, and no one feels that he is adequately prepared. The sophomores tell the freshmen that it's "gonna be rough"; the juniors and seniors try to hide their misgivings. But when it's all over most of the worriers admit that "it wasn't half as bad as I thought it would be".
INSPECTION AND THE COLORS

CPL. A. J. RANKS

CPL. P. R. RICE
Color Guard
"Someone to watch over me . . . " To the Regimental Staff of the Clemson Corps of Cadets is given the privilege and responsibility of passing down the administrative decrees of the Military Department and seeing that they are carried out. Fourteen men, ranging in rank from Cadet Colonel to Cadet Corporal, constitute the staff and perform a variety of duties. There are two Color Sergeants and two Color Guards who look after the flags and handle them in all ceremonies. A Mess Officer and three Mess Sergeants have charge of certain mess hall affairs. So that religion might not be neglected there is a Regimental Chaplain.

For the strictly military functions there are a regimental Sergeant Major, Supply Officer, Adjutant, Executive, and finally the top man on the totem pole, the Cadet Colonel and regimental commander. On these shoulders the greatest authority is placed, with its trust, responsibility, and chance to earn respect as a good leader.

THE BAND STRUTS ITS STUFF.
"First Battalion all present or accounted for, Sir." And indeed it is. When Lieutenant Colonel Giles Lewis spins around to deliver his short, cryptic speech, he knows he has four up-and-at-'em companies standing behind him, prepared for any emergency which might arise. In addition to Major Siokos, Battalion Executive; Captain Godwin, Battalion Adjutant; and Sergeant Banks, Sergeant Major, he has for advisors Captains Moore, Moorer, Addison, and Miller, commanding companies A, B, C, and D respectively. Many of Clemson's greatest athletes, members of "football" company, march, halt, and stand at parade rest with the first battalion.

Lieutenant Colonel A. B. Kitchen, Commanding S. B. (Second Battalion), was the channel upward all this year for Companies E, F, G, and H. He took their reports with H. R. Kennedy, Battalion Adjutant, acting as interlocutor, passed them up, passed orders down, and on the whole managed to keep his troops aware of the existing conditions and situations among the military. Major J. A. Font filled the Executive position and Master Sergeant J. S. Liles acted as Sergeant Major. All worked for the betterment of corps, battalion, and individual in seeking new methods to apply the military polish to each cadet and turn out true Clemson men.

As it stands out on Bowman Field at parade rest, the Third Battalion bids fair to become the “nutsiest” group of men in any man’s army. Under the watchful eyes of such sterling leaders as Lieutenant Colonel Vann J. Deas, Commanding Officer; Major W. M. Patrick, Executive; Captain J. G. Hickerson, Adjutant; and Master Sergeant W. C. Talbert, Sergeant Major, “the Third” surges ahead in discipline, in ability, in esprit de corps. Captains C. L. Morris, A. J. Dibble, J. R. Lay, and W. P. DesChamps, commanders of companies I, K, L, and M respectively, keep their subordinates “on the ball” by the good leader’s method, that of presenting an excellent example.

THE SENIOR PLATOON

The Senior Platoon has probably furnished more favorable publicity for Clemson than any other organization on the campus with the exception of the athletic group. To cite an example of this, the platoon was referred to as a marvel in one of the northern newspapers on their drill at the Yankee stadium during the past football season. The group could have asked for no warmer reception. This crack drill platoon has been an asset to the Clemson football games. The one compensating factor has been their sheer love for perfection in drill.

In the spring of each year, the organization selects the rising seniors who best qualify in personnel and precision. These members drill morning and evening for several weeks in the spring preparing for the Mothers’ Day parades.

Then the next fall, drill begins again and the finished products thrill thousands during the season.
THE SENIOR PLATOON STRUT THEIR STUFF IN NEW YORK.

317
"The nut boys"—this is their ultimate stronghold, the final objective of their incessant pressing, mirror-gazing, and saluting. But that isn’t all it takes. These are the ones among us who have practiced and learned leadership at first hand. They have instructed us, led us, “busted us”—all in order that we might become officers as well as gentlemen. Being tapped by Scabbard and Blade is hitting the big time in cadet military achievement.

Their's is a national honorary military fraternity, but their activities aren't limited to soldierly endeavors. They've constructed information booths and cooperated in sponsoring campus drives as well.

Under the watchful eyes of the Colonel, Brice, Joe, and Jack have done a pretty good job of leading the leaders.
PERSHING RIFLES HEADQUARTERS

Fourth Regimental Headquarters, Pershing Rifles, is one of seven in the United States, with headquarters located at The University of Nebraska. Its officers are of advanced R.O.T.C. standing, and through the headquarters here at Clemson goes all of the business transactions of the regiment.

The Fourth Regiment includes all Senior R.O.T.C. Schools in the Southeast with active units located at The University of Tennessee, University of Alabama, Louisiana State University, Virginia Polytechnic Institute, Georgia School of Technology and Clemson.
COMPANY C-4

Pershing Rifles, formed in 1892 by John J. Pershing, is a national honorary military society organized for the purpose of encouraging, preserving, and developing the highest ideals of the military profession; and to provide appropriate recognition of a high degree of military ability among the various Senior Reserve Officer Training Corps units.

Company C-4, which is the active unit on the campus, is composed of sophomore cadets who have successfully completed a competitive drill examination at the end of their freshman year. As the Pershing Riflemen become juniors in class they automatically become inactive members unless they have been qualified for the various offices within the company, such as company commander, executive officer, first sergeant, or other staff positions.
MILITARY ORGANIZATIONS

PERSHING RIFLES

A "DIAMOND IN THE ROUGH".
EXECUTIVE SERGEANTS' CLUB

The Executive Sergeants, or the "stooges" for the "wheels", are bound by the ties of one organization—the Executive Sergeants' Club. Membership in this military organization is limited to the sergeant majors and first sergeants of the regiment. All these men have similar routine duties and problems mutual to the group, such as daily reports, publishing daily orders, and announcing daily details.

These executive sergeants are tapped once in the fall and once in the spring. The highlights of the year have been the initiations and the socials held at Boscobel. In addition, meetings are held monthly for the purpose of discussing military problems in the cadet corps, or other problems of interest to the prospective reserve officer.

FIRST SOLDIERS GET THE POOP.
THE RIFLE TEAM

Bang! Bang! Bang!—No, it's not murder; it's just the rifle team practicing for a match. Headquarters for this activity is in the basement of the sixth barracks. There, prospective team members spend many hours squinting through the peepsights of their weapons, as they increase their proficiency in the art of riflery.

The rifle team was reactivated last year. Even in this period of transition, the team had several matches with North Carolina State College and the University of Georgia. In all of these matches the Clemson riflemen have exemplified the highest calibre of sportsmanship and skill.

There are no special requirements for membership on the rifle squad other than skill and precision in marksmanship.
SUMMER CAMP

Guard duty, hikes, Saturday morning inspections, and dry lectures were endured by those of the cadet corps who attended the R.O.T.C. summer camps.

A prerequisite that is required of every student aspiring a reserve commission in The Army of the United States . . . rising with the bugle, eating with the bugle, going to bed with the bugle . . . dry runs, general orders, "K. P.", bivouacs, equals that long-awaited commission.

Certainly an experience long to be remembered for work, play, friends, and excitement.

Pleasure...
The Central Dance Association, a student organization, is responsible for the managing of all big dances on the Clemson campus. This organization, under the leadership of Charlie Cheatham, has sponsored eight dances during this school year.

They brought in big-name bands, including Elliot Lawrence, for the big dances, and had smaller bands or the college orchestras for the smaller hops. Whether the dance was a mammoth affair or just a junior edition, the seven members of the senior C. D. A. and the fourteen members of the junior staff worked to make it a success.
THE JUNIOR C. D. A.

These men will be the senior members of the Central Dance Association next year, having served a year as apprentices learning all the tricks of the dancing trade. The decorating, ticket sales, and other details are carried out largely by the junior group.

Hail to these men who have, so obviously, made our fine dances possible.

It's Tommy Tucker Time.
GOOD MUSIC . . .
Dance weekends never fail to furnish an excuse for forgetting studies and concentrating on just having a big time.

Dates recruited from the nearby girl's colleges add a touch of color to the campus. The whole atmosphere assumes a new perspective as the couples gaily prepare for the great occasion. Your best friends, of whom you know better, suddenly turn up impeccably attired and firmly attached to one of the opposite sex.

The Tiger Ball, Military Ball, and Taps Ball are always occasions of state. Everyone summons his best girl and off they go in a swirl of chiffon contrasted by sober black-and-white.

They dance 'til midnight to the sweet strains of Billy Knuff, Elliot Lawrence, or the Jungaleers, then Cinderella vanishes into the mists until Prince Charming drops another note into the box at the P. O.

The Brigadiers, commanders of Southern music, provide the corps with moments of relaxation and relief from the weightier problems of academics.

The pulsating throb of bass and drums never fails to bring out the primitive instincts in the students. Who can resist the strains of the Basin Street Blues or Stardust? Who wants to?

The orchestra can lay claim to being strictly collegiate, as its members are selected from among the student body. Surprising talent is often unearthed and brought to life in this manner.

Frequent return engagements evidence the popularity of the Brigadiers. In order to facilitate transportation, the boys recently procured a new bus, complete with insignia. Say what you will about the orchestra, but make no disparaging remarks about Jezebel.

The Brigadiers are comparatively young, but their fame is spreading, and there is fertile ground yet to be covered by this enterprising organization.
The Jungaleers is one of Clemson's two orchestras with participation limited only to students. To every Clemson student, the Jungaleers is a group which furnishes enjoyment at the C. D. A. dances with their fine swing. The orchestra has acquired quite an enviable reputation in North and South Carolina and Georgia particularly. Another unique feature in this college orchestra is its self-sufficiency and management of its own financial status. The orchestra has its personal bus and music instruments.

Membership in the organization is based upon music achievement alone. Music on the campus has been promoted by these members since the founding several years ago. The style of the orchestra, though primarily "swing", is flexible enough to grant almost any request from the dancers and many listeners.

Familiar faces, familiar voices—these are the girls who made a hit with the men from Tigertown. On the dance floor and off, they are our favorites. The focus of attention at every dance, the target of many an admiring gaze, the subject of numerous barracks discussions—by these signs are they known. Wherever they are dancing; there, too, will be the stag line.

Clemson men are ever on the lookout for an attractive face, a shapely figure, a winning personality. On these pages you see the charming ladies who “fill the bill”. Their addresses and telephone numbers? You’ll find them listed in any number of “little black books”, but it’s no easy task to persuade the owner to part with such valuable information.

It’s every one for himself, men!
And Familiar Facts

MISS PAT CHAPMAN.
MISS ANN PORCHER ZEIGLER.
MISS DOT GALLOWAY.
MISS NINA ROGERSON.
Words and music
Under the direction of Mr. McGarity, the Glee Club has grown into one of the better college glee clubs in the south. The semi-annual concerts have been a source of enjoyment to all who have attended. Several tours have been made to other schools in the Carolinas and Georgia.

Last year the first music department was established at Clemson College with Professor McGarity as head. Since that time all musical organizations have had some guidance in their programs.

"LISTEN TO THE MOCKING BIRD."
Mu Beta Psi

Mu Beta Psi is the main body of musicians on the campus. These men are elected into this organization from the concert band, glee club, and band, primarily. Two years in one of these organizations is the prerequisite for membership.

As for its immediate purpose the fraternity seeks to further music and musical organizations on the campus.

During the past year the organization has occupied its newly renovated club room. As a service to the concert series and other musical dramatic productions, the Mu Beta Psi members have served in the official capacity of ushers.

Music at its best—The Minneapolis Symphony, with renowned conductor.

They gave us opera—Laura Castellano and Valfrido Patacchi, in Madame Butterfly.
All is not study at Clemson. The majority of students look forward with enthusiasm to such pleasant interruptions as the symphony, opera, and ballet which are liberally sprinkled throughout the school year. Each event causes a stir of excitement among the students and members of the community. Nor is attendance limited to this group: music lovers from the surrounding country throng to Clemson to take advantage of this opportunity. Every presentation is an entrancing work of art. After loosing oneself in the thrill of the stage it is difficult to return to reality.

During the past year we have been favored with Charles L. Wagner’s production of the opera “Madame Butterfly”, Edwin McArthur conducting, and Lydia Summers, contralto, appearing as Suzuki; Alicia Markova and Anton Dolin, of the ballet; Lauritz Melchior, Metropolitan Opera tenor; Patrice Munsel, coloratura soprano; and the Minneapolis Symphony Orchestra, Dimitri Mitropoulos conducting.
Another of our favorites—Lauritz Melchior.

Patrice Munsel—beauty with a voice.
Strawberry Leaf

The Delta Epsilon Alpha Chapter of The Strawberry Leaf was acquired by Clemson College in 1940 to encourage forensics and to reward outstanding forensic leaders.

The Strawberry Leaf is active in class elections and sponsors the “stump speeches” of the candidates. The chapter conducts a workshop to train students in parliamentary procedure. Instruction is given to the members of the Calhoun Forensic Society in all phases of public speaking.

As a reward for outstanding work, The Strawberry Leaf serves a useful purpose. Members of the local chapter are well received in The Grand National Strawberry Leaf Tournament.
Named in honor of John C. Calhoun in 1894, the Calhoun Forensic Society is the oldest organization on the campus. During these fifty-four years its influence in the lives of Clemson men has been profound.

Activities in the Society are many and varied. Debates are still the most popular activity. Its annual programs in the auditorium afford the opportunity for play writing, acting, and directing. The many friends of Clemson and former Society members are pleased with the radio programs presented by the Society over local stations. Other activities sponsored by C. F. S. are the United Nations Council and the presidential conventions.

Truly the Calhoun Forensic Society has earned its slogan, "The Voice of Clemson College".

Another year has passed—another leaf is turned, and the Barrymores still throw their "ham" in every direction. Watch out!

From its beginning the little theatre has had a definite place in student activity, but this year it took a step forward as it gained the recognition of the administration as a bona fide campus group. Membership is open to all, depending on ability alone; and its chief purpose is to serve as a medium for light drama, comedy, and talents which are offered no other outlet.

Masqued faces, forgotten lines, ranting directors—all form part of the kaleidoscopic jumble of memories which stick in the minds of the dramatists. The hours were long and the obstacles were many, but the players received their reward in the joy of achievement.

On the agenda for the past were the hilarious comedy "The Bishop Misbehaves", and the comedy which was made to order for Clemson—"Brother Rat". Several other plays and services were performed by the group.

TARHEELS PLAN A DANCE.
The Gamma Kappa Alpha is a social fraternity of men from North Carolina—it may be better branded the parade of "Tar Heels". The year began with the preparation for the formal Christmas Ball in Charlotte and the collection of the necessary finances.

After recuperation from final exams in February, the members were ready to finish the year in a big way. Classes were signed up; then intermission parties, socials, dance week-ends, and meetings became the pass word.

The Gamma Kappa Alpha keeps close contact with the North Carolina-Clemson Alumni Association, and endeavors to keep in touch with all North Carolina graduates. Yes, these "Tar Heels" believe in sticking together . . . a strong minority, at that.
As per usual, the members of The M.D.M. Club danced away the Christmas holidays after much argument and preparation under the faithful perseverance and guidance of "Smitty". The results were enjoyed by one and all.

As a service to the high schools of the counties, the organization sent copies of the yearbook, Taps, to these schools for prospective students to peruse.

The M.D.M. Club, composed of interested students from Marlboro, Dillon, and Marion counties, has served its purpose in bringing the students of the three counties into closer fellowship.

This is another of our numerous county clubs with functions similar to those of the others. Included in this organization are boys from Bamberg, Orangeburg, and Calhoun Counties.

Meetings have been held at various intervals to transact business and for just plain fellowship.

In Orangeburg, dances are held during both the Yuletide season and during the Spring holidays.
The Aiken-Edgefield-Augusta Club has undergone an interesting series of additions since its founding as the Aiken-Clemson Club in 1933. In 1938, the club began to admit students from Augusta, Georgia, and in 1940 the triangle was completed with the combining of the Edgefield County students. Thus the story of the Aiken-Edgefield-Augusta Club goes.

As in all other county clubs on the campus the club’s most fundamental purpose is bringing the students of these three counties into closer union.

Beta Sigma Chi

Beta Sigma Chi, one of Clemson’s most outstanding local social fraternities, was organized on the campus in 1933. These “low-country” students are bound together not only by their brogue but also by the bonds of the county club. Members are limited to cadets and vets living within a five-mile radius of Charleston.

Every spring, the members of Beta Sigma Chi sponsor a competitive examination in the Charleston County schools and offer a partial scholarship to the most deserving and fully qualified entry.

In addition to this service, the group sponsors many social activities, including the annual Christmas Dance.

NEW MEMBERS FOR THE “GEECHIE” CLUB.

Cherokee County Club

The Cherokee County Club was organized, as is true of the other county clubs, to bring the students of Cherokee County together. Although this club is comparatively new, a large membership has been acquired. The club was formed to create a feeling of comradeship among the members and a unity of purpose in any activity.

The holiday seasons are high lighted by dances sponsored by the club. Various other social activities feature the regular school term.
Clarendon County Club

After struggling through three months of the old school grind, the members of the Clarendon-Clemson Club finally let their hair down at the "magnanimous" Christmas hop. One is likely to get the idea that county clubs exist for the sole purpose of dancing, but dancing is only one facet of the county clubs' work. This type of organization is comparable to the social fraternity in a university, bringing men of the same community together in a spirit of friendship and cooperation.

IT MUST HAVE A KEY; KIRVEN'S IN IT.

MEMBERS WHOSE PICTURES DO NOT APPEAR: E. S. Coffey, L. E. Holliday, R. S. Jackson, and L. W. James.
The Kershaw County Club is an organization whose functions are purely social. It is one of the oldest organizations of its kind on the campus.

At social events put on by the club, it aims to bring together some of the leaders of the school, thus establishing an intimate friendship among them and raising the social standard of Clemson.

In a school such as Clemson where military life is the order of the day and clannishness is prevalent, there is a definite need for organizations that are purely social in their lines of activity.

Laurens County Club

The Laurens County Club was reactivated after the war to include students from the Laurens County section. It is a social organization for those who are interested in promoting fellowship among boys from the county. The Club’s program includes regular meetings and two large “drags” each year, the Christmas Ball and the Easter Hop.

The purpose of the club is to be of service to its members. Members must qualify in both character and personality to be eligible to membership.
Another one of Harold Landrith’s organizations, the Oconee Club was organized this past year. The club had the annual Christmas dance, which was highly successful. Keys, designed by the president, were ordered later in the year.

Several open-house programs were held at the YMCA during the year. The purpose of the group’s organizing was in keeping with the purposes of the other county clubs.
Savannah County Club

The Savannah-Clemson Club is organized on a yearly basis to promote a closer feeling of fellowship among boys attending Clemson from Savannah. These Georgia "Crackers" always look in great anticipation to the social functions, dances, steak fries, and outings.

The choice of members is based upon character, personality, and ability to mix with others.

Among its purposes are the consolidation of the interests of its members, the cultivation of a spirit of unselfish fellowship, and the encouragement of interest in college activities.
The Spartanburg County Club is not purely a social organization; it also acts as a coordinating body for various service activities. The meetings of the club are devoted to the discussion of problems and items of interest to the group.

The activities of the club are not confined to the campus alone. The club acts as liaison between the Spartanburg-Clemson Alumni Association and the school itself. This is achieved through social activities in which the present students and the alumni take part.

The Senior Japs Staff...

the planners and producers of this book . . . assumed their positions of responsibility in the spring of 1947 after surviving a year of apprenticeship as Junior Staff. From then on their days and nights were spent working on their book. First of all the general planning had to be done, redone, and done again before it became satisfactory. Then the struggle to meet deadlines began. Sleepless nights, classes cut, and late reports became S. O. P. to the staff. Cries of "Redesign this page", "Where are those pictures?", "Work again this week-end", and "There's a mistake here" soon were familiar to the men working in the Seventh Barracks.

At last, however, the book is ready and now passes from the classification of their book to your book; pass judgment on it, good or bad.
The men whose labor actually produced this book are the members of the Junior Taps Staff. Evenings, weekends, and holidays were spent in fulfilling the plans made by the senior staff.

Midst a litter of layouts and write-ups, and fortified with gallons of coffee, the junior staff made the halls of the seventh barracks echo with the clatter of typewriters.

To comprehend the extent of their project, we must consider that the book was compiled with no compensation in view other than the satisfaction of having produced a yearbook worthy of Clemson.

In recognition of their efforts, we present to you the potential senior staff of the coming year.
P. S. SHEALY
Advertising Manager

WORKING ON COPY AND MONEY—BOTH ESSENTIAL.

NO RECEIPT—NO BOOK.

SUPER-SALESMAN SMITH HANDS OUT A LINE.
"The Tiger", official student newspaper of Clemson College, started its forty-first year of publication in 1948 with two claims—that it is "the South's most interesting college newspaper" and "that it has the largest circulation of any college paper in South Carolina."

Clemson offers no formal course in journalism; therefore "Tiger" men are proud that they are members of the staff of a college newspaper that has won "All-American" honors as rated by the National Scholastic Press Association in past years. Many former editors of the paper have won prominent places for themselves in the newspaper world. Among these men are Wright Bryan, editor of the "Atlanta Journal"; Harry Ashmore of the "Arkansas Gazette"; the late Ben Robertson who won fame as a journalist and war correspondent; and others too numerous to mention. Under the watchful eye of Professor John D. Lane the paper has never, suspended publication for some twenty-three years while school was in session, even during the trying "war years".

"The Tiger" is coming off the press now as an eight-page weekly. The work that goes into the making of this publication could not be properly told in a volume. Each week the same grind takes place. Copy is prepared on Monday and Tuesday nights. On Wednesday this copy is sent to the printers where it is placed in lead form on the linotype. The staff then makes these lead forms up into page forms. On Thursday morning these page forms are put on the press and the finished "Tiger" rolls off ready for distribution to the students on Thursday night.

"The Tiger" is unique among college newspapers in that it is not subject to any form of censorship by the faculty or administration. It is a paper by the students for the students.
EDITOR ED CHECKS A PROOF.
GORMAN AND ASSISTANT ADDRESS THEM . . .

Much of the work that goes into the weekly newspaper of Clemson is not done in the "Tiger" office. Pictures are made and processed in the dark room, make-up is done in Anderson, and proofs are checked. After the news is in print the papers must be sent to the readers. Here are some behind-the-scenes shots of the "Tiger" at work.

WHILE PARRISH MAKES THE PLATES.

MCNEIL AND GETTYS GET THE PICTURES READY.
THE AGRARIAN

The "Agrarian", published by students majoring in Agriculture, is the oldest departmental publication on the campus. The first issue appeared in 1938 and it now has the largest circulation of its kind at Clemson.

Each issue contains local news, features, and technical articles written by students. The magazine brings the students and the school into closer contact with agricultural experts throughout South Carolina and adjoining states.

THE BOBBIN AND BEAKER

This publication of the School of Textiles had its birth in a meeting of Clemson’s chapter of Phi Psi during the first semester of 1939-40.

The “Bobbin and Beaker” has a twofold purpose: to maintain the contact between student and graduate, and to keep its readers informed as to the latest developments of an ever-expanding industry. Experts in the field are called upon to supply the technical articles which are the life of the publication. Students correlate reading matter and personal interviews into articles which round out the magazine.

This periodical offers the textile industry a contact with the young men who will one day mold the future of the textile world.

MEMBERS WHOSE PICTURES DO NOT APPEAR: G. M. Moisson, Associate Editor; A. M. Hand, Managing Editor; B. B. Williams, Assistant Managing Editor; L. Riddle, Assistant Business Manager.
THE SLIPSTICK

The "Slipstick" is the official publication of the School of Engineering. The first issue of this magazine appeared in 1941. Because of the small number of students enrolled during the war, publication was stopped and was not resumed until 1946. Since that time the magazine has climbed back to its position among the student publications on the campus.

This publication is the work of students with a few special articles by members of the faculty and outstanding men of the engineering profession. The magazine is edited by a group of senior students, but contributions may come from members of any class who show interest in writing on topics concerning the field of engineering. The senior staff for the succeeding year is chosen by the retiring senior staff and selections are made on the basis of ability and interest.

The "Slipstick" is published four times during the course of a school year. It contains technical material and items of news and features of local interest. The work on the publication is entirely in the hands of the student staff, but an advisory board composed of faculty members is always at hand to give constructive criticism.

The Blue Key Directory is published annually by the Clemson Chapter of Blue Key as a service to the students, faculty, and college staff. Information in the directory includes a roster of the students, giving class, major course, college address, and home address. Faculty and administrative officials are listed, with a summary of their formal educational background. Also included is a roster of each cadet company and a list of members of all recognized clubs, fraternities, and publications.
THE Y. M. C. A. HANDBOOK

The YMCA Handbook is published annually by a student committee appointed by the "Y" Cabinet and assisted by the "Y" staff. This publication contains much valuable information concerning the activities of the college, the YMCA and its program, and the campus churches.

The handbook is distributed at the beginning of each school year and is primarily for the benefit of the freshmen in acquainting them with college life. Its contents, however, are useful to all those who are interested in Clemson.

THE "HEADS" LOOK IT OVER.
Down at the end of the Field House are two offices that house Clemson’s contact men with the outside world, the Alumni Office and the News Bureau.

Veteran of seventeen years service as alumni secretary, “Uncle Jake” Woodward is known throughout the realm of Clemson men scattered all over the country. Whenever there is an alumni meeting held anywhere within traveling distance, “Uncle Jake” is there carrying good cheer and news of the Alma Mater. The newest medium of information for the alumni, the “Clemson Alumni News”, appeared for the first time this year, under the editorship of John Califf. This magazine, published on a bi-monthly basis, has all prospects of becoming the strongest link between Clemson and her graduates.

Next door to the “Alumni News” office Ed Osborne holds forth over the Clemson News Bureau, from which all college publicity goes out to the newspapers in South Carolina and over the Southland. On this office falls the responsibility of putting the college before the eyes of the public.
Clemson's writer's fraternity, Gamma Alpha Mu, chooses its membership from men who have proved their ability as accomplished writers. Each year students who aspire to membership in this organization submit specimens of their literary work to the fraternity. These works are sent off to Octavus Roy Cohen, who selects those of special merit. After selection the new members undergo an informal initiation which terminates in a formal initiation and banquet.

In its fifteen years of activity under the supervision of Professor John D. Lane, it has become one of the major fraternities on the campus.

Y. M. C. A. ......................... 416
RELIGIOUS GROUPS ............ 424
The Y.M.C.A. Staff,

headed by P. B. Holtzendorff, Jr., supervises and directs the activities of the Clemson "Y". These activities include the student organization of Cabinet and Councils, work with the other Y.W. and Y.M.C.A.s of the state and region, and the weekly vesper programs.

Other features of the "Y" include the Saturday night dances with girls from nearby towns and colleges, free shows, deputation teams, and intramural sports. Perhaps the most notable achievement of the "Y" program is the feeling of fellowship developed among students.
Y.M.C.A. Cabinet

The Y.M.C.A. Cabinet, composed of members of the junior and senior classes, is the governing body of the Association. It acts as the coordinating link between the class councils, the employed staff, and the student body. Its function is to direct and promote Christian fellowship on the campus by integrating the activities of the "Y".

The Y.M.C.A. officers are elected by the student body, and they, in turn, choose the other members of the Cabinet. They are chosen on their ability, their character, and their interest in the Y.M.C.A. and other religious activities.
The particular concern of the members of the Junior Y.M.C.A. Council is the promotion of the spiritual and social phases of the Y.M.C.A. program on and off the campus. These Juniors have joined together in a Christian brotherhood for religious guidances and social outlets through the Y.M.C.A. programs and activities.

Many widely traveled and interesting speakers attended and spoke at the Council meetings. Some of the talks encompassed world-wide issues and gave the Junior "Y" members insight into many of the activities and living conditions in and among the peoples of foreign countries from every section of the globe.

All projects that the Junior "Y" originated or participated in have been carried out most successfully. A drive that embraced every organization on the campus was set in motion by the Junior Council to collect money for war devastated European schools. Through the effort put forth by all the members of the council the goal of five hundred dollars was more than exceeded.

The Sophomore Y.M.C.A. Council is outstanding because its aim is Christian service and spiritual fellowship. It is particularly interested in the promotion of Christian ideals and activities on the Clemson campus.

Many projects were undertaken by the council in its aim towards worthwhile services to the school. Some of the more important activities originated and carried out by the council were the erection of a permanent bulletin board, the assisting in the collection of "Y" membership contributions, the sponsoring of a beginners dancing class for the student body, and the contribution to the Junior Y.M.C.A. Council's Overseas School Relief Fund.

The programs of the council have been ably planned and directed by a capable program committee. Speakers, open houses, quiz programs, and the electing of new members all helped to make each meeting of the council an interesting one.

It is in this organization, the Freshman Y.M.C.A. Council, that the new student gets his first glance at Clemson and the "Y". For many this is the first time they have actually seen a Y.M.C.A. at work on a college campus. The freshman learns of the many advantages that lie ahead of him both in the Y.M.C.A., and through other outlets of college activities.

Each year just before the fall semester begins a retreat is held here at Clemson for those who are interested in becoming members of the freshman council. From this group that attends the retreat is picked the council for that year.

A member of the "Y" cabinet acts as sponsor and more or less directs the activities of the council for that year. Henry Pittman has done an excellent job in that capacity this year.
The "Y" has perhaps the widest variety of activities of any single organization on the campus. There are two movies which offer the students and campus folks the latest movies and many of the older more outstanding shows. Upstairs there are pool rooms, a canteen, club rooms for all types of meetings and Saturday night dances, and ping-pong tables. Downstairs there are locker rooms, a barber shop, an up-to-date cafeteria, a large private dining room, a swimming pool, and a popcorn machine. Outside there is a large sun porch for bathers.
"Y" ACTIVITIES

BATTLE ON A PING-PONG TABLE.

DOT ABBOTT AT WORK.

THE "CATS" GET HOT AT A "Y" DANCE.
The Baptist Church

Clemson College Baptist Church was organized by eight men, mostly college faculty, in Room 17, Main Building, in 1908. Monthly services were held in the college chapel until the building now used was built in 1912 with funds given by South Carolina Baptists. The second unit of the church was built in 1937, and a third unit will be built this year.

Rev. Harold Cole, the present pastor, serves the Baptist students of the campus and a resident membership of about 440 persons.

BAPTIST STUDENT UNION

The Baptist Student Union is the coordinator of all religious activities of the thirteen hundred Baptist students at Clemson. Centering its activities in the local church, the B.S.U. fosters spiritual growth, thought, and action through a program of Christianity at work. Their services include Sunday school, training union, morning watch, prayer meets, worship, and special services such as the Union Sunrise Thanksgiving, the Candlelighting at Christmas, and the Lord's Supper at Easter.

The executive committee of the B.S.U. is the Council, the leaders and directors of the units of work. James L. Spangenberg, Minister of Students, has direct responsibility for the student program. The Baptists of South Carolina and the local church finance the work. Harold Cole, Pastor of the local church, ministers to the students especially in the formal services of the church.

THE CLEMSON BAPTIST CHURCH.
Every Baptist Student is a potential member of the Clemson B.S.U. Actual membership results when the student joins the local church, the Sunday School, or the Training Union.

427
The Episcopal Church

Holy Trinity Church was organized in 1899 as a mission of St. Paul's Church, Pendleton. The church remained as a Mission station until 1901 when it was made a Mission having for the first time a local and resident Minister. The original church building was a small frame building which was used until 1929 when additions and improvements were made.

Holy Trinity Church has served the students of Clemson and the people of the community for the past 47 years. Reverend John A. Pinckney is the church’s ninth resident minister.

THE CANTERBURY CLUB

The fellowship for all Episcopal students on the Clemson campus is the Canterbury Club of the Holy Trinity Episcopal Church of which the Reverend John A. Pinckney is rector. As its purpose, the Canterbury Club furthers Christian brotherhood and offers each student a wider field in spiritual opportunities. Clemson’s Canterbury Club is a charter member of the National Association of Canterbury Clubs, and an active part is taken in all of the functions of the State Association.

This year’s club project was the adoption of an elementary school situated in the southern part of France. To provide funds for this undertaking, Christmas cards were sold by the club members—thus making the club self-supporting.

Religious and educational movies, interesting and world-traveled speakers, enlightening quiz programs, and appetizing and pleasing dinner meetings comprise a part of the club’s agenda for the year. “The Finley Forecast”, edited and staffed by club members, is the official news organ of the Canterbury Club.
Clemson Methodist Church

The Clemson Methodist Church serves the Methodist students and the Methodist of the community. This congregation was organized in 1908 and the cornerstone of the first church was laid in 1911. When the congregation outgrew this building, the present church edifice was built in 1924.

The members of the church have given themselves most unselfishly in Christian service in the college and in the community. The present pastor, the Reverend E. Wannamaker Hardin, is now in his fifth year as pastor of the church and director of the Wesley Foundation.

WESLEY FOUNDATION

The Wesley Foundation is the Methodist student organization. All Methodist students on the campus are members and are asked to join in the activities, which are under the direction of the minister and a group of student officers.

It is the Foundation's purpose to give the Methodist students an opportunity to serve others and enjoy Christian fellowship. The activities are many and varied.

The Foundation meets regularly in a Mid-Week Retreat program in which students, faculty members, and visiting speakers participate.
THEY MUST HAVE SERVED REFRESHMENTS.
The Presbyterian Church

The Fort Hill Presbyterian Church was organized in 1895. The first services were held in a partially completed college building and later in Doyle’s Hall in Calhoun. The first church building was built in 1896 with additions and enlargements in 1931. Even though the church was partially destroyed by fire in 1932, the basic plan of the church has remained the same.

At this time, Dr. S. J. L. Crouch is pastor of the church which serves the Presbyterian students on the campus and the Presbyterians of the community.

THE PRESBYTERIAN STUDENT ASSOCIATION

The clarion call for all Presbyterian boys is the announcement “P.S.A. will meet tonight”; for P.S.A., in its elongated form, means the Presbyterian Student’s Association. P.S.A. is the student group for all Clemsonians of the Presbyterian denomination.

Two of the primary purposes of this organization of Presbyterian students are spiritual growth and social development. Weekly programs are held every Wednesday night, church suppers are planned, and visits are made to and from nearby girl’s colleges—with these many activities, the student’s social and spiritual needs are adequately filled.

THE FORT HILL PRESBYTERIAN CHURCH
The Lutheran Church

Even though there is no Lutheran Church on the campus, the Lutheran students and community folk do not have to leave the campus to attend religious services of their denomination. Services conducted by Reverend Ben Clark of Walhalla are held each Sunday morning in one of the Y.M.C.A. club rooms. The mid-week meeting of the students is held each Wednesday night in the barracks chapel.

Plans are being drawn up for the construction of a Lutheran Church building on the campus in the near future.

THE LUTHERAN STUDENTS ASSOCIATION

The primary motive of the Lutheran Students Association is to strengthen and sustain Christian students in their faith through use of the Bible, through prayer, and through regular church attendance. On Wednesday evenings, all Lutheran students on the campus meet in the Barracks Chapel for well-rounded religious programs that promote their Christian ideals.

This has been one of the most active years for the L.S.A. members since this student association had its formation on the Clemson campus. All the members have strived to help in the promotion of the new church that is to be built on the campus.

MR. CLARK AND HIS BOYS MEET IN THE BARRACKS CHAPEL.
Hillel-Brandeis

The Hillel-Brandeis Club is the religious organization of the Jewish students of Clemson. The Clemson chapter evolved in 1946 from a previous group which existed before the war as the Brandeis Club.

The Hillel foundation has chapters throughout the country located on the campuses of the leading colleges and universities.

The Football Coaches, more aptly described as the board of strategy of Clemson’s gridiron, are responsible for the Tiger teams which battle foes down in the stadium and away from home. Year after year these men take raw material as it pours in from high schools and turn out teams which merit the honor of being called Tiger teams through the spirit which they show on the field. To paraphrase a remark of Head Coach Howard’s—"If the team wins it’s everyone’s, if it loses it belongs to us coaches".

Open With "Blue Hose"

PRESBYTERIAN ...... 0 0 0 0—0
CLEMSON .......... 7 14 14 7—42

Clemson's untested Tigers opened their football season with Presbyterian's Blue Hose in a game always played at Clemson. Coach Frank Howard used his entire team in this game as the Tigers smothered the Hose 42-0.

Bobby Gage of Anderson proved to be the big factor in the Tigers' win as he flashed to three touchdowns and picked up 282 yards running and passing.

The game was just two plays old when Gage took the ball from center and sped 63 yards with "nary a hand" being laid on him. That was the scoring in the first quarter, but Jim Reynolds, Ray Mathews and June Pruitt added other scores in the afternoon while P. C. appeared helpless before the Tiger line. Gage turned the trick again late in the game with an 80-yard run. Cagle accounted for all six conversions.

MOORER CARRIES ONE.

GAGE FINDS A HOLE BIG ENOUGH FOR A TRUCK.
The Tigers’ next game of the year carried them all the way to Boston, and to make sure that his Tigers would have a good trip, Coach Frank Howard arranged to have the team fly to the “Bean Town” outpost.

A heavier B. C. line found its advantage in the second half of the ball game after Clemson had built up a 22-13 advantage before halftime rolled around.

Jim Reynolds started the Tigers scoring by smashing over from inside the five-yard stripe, but B. C. roared back to go ahead 13-6. Reynolds and Williams each pulled in a touchdown pass from Gage to put the Tigers in front 22-13 as the half ended.

A rejuvenated Boston eleven came rolling back in the second canto to smother the Tiger hopes of making it three games out of four over their Yankee foes. Previously, the Clemson team had beaten Boston twice in three games.
Buried by the Deacons

WAKE FOREST .......... 0 2 7 7—16
CLEMSON ............... 0 0 14 0—14

For the second straight week Clemson's line went against a line that outweighed them some 20 pounds to the man, and this proved to be of value to the Wake Forest Deacons as they scored the winning touchdown midway in the fourth period to down Clemson, 16-14.

The first half of the game saw a battle of two lines with Clemson holding its own against the Deacon bruisers. Late in the second period, Red O'Quinn broke through to block a Gage punt, and gave the visiting Deacons a 2-0 advantage at intermission.

Clemson came back in the second half to go ahead on a 33-yard pass from Bobby Gage to John Poulos. Tom Fetzer and Nick Ognovich collaborated to put the Deacons ahead 9-7 on a perfectly executed pass play. Clemson regained the lead as Gage carried the ball to the one and Jack Miller drove over the double stripes. Tony Di Toma replaced Pryor in the Deacon fullback slot, and led the Foresters on a long drive which culminated in the winning score on a plunge from the one-yard line.
Clemson suffered its third straight defeat of the season at the hands of the N. C. State Wolfpack in a game played in Raleigh. Little Charlie Richkus and "Footsie" Palmer led the way as they scored State's three touchdowns.

The Pack drew first blood with only 30 seconds remaining in the first half, as Richkus hit George Bloomquist with a perfect pitch and the big end went over for the tally.

Six minutes remained in the third period when Palmer intercepted a Gage pass and razzle-dazzled 67 yards for a score. Richkus again displayed his running ability in the fourth canto by racing around his own right end for 17 yards and the final State score. All tries for extra points were missed.

The Clemson backfield was weakened early in the game as Bobby Gage sprained his finger, and proved to be of little value to the team afterward.
Big Thursday Disaster

CAROLINA .......... 7  7  0  7—21
CLEMSON .......... 6  6  0  7—19

"Big Thursday" rolled around again late in October, and both teams were keyed for the renewal of this traditional classic. Some 25,000 fans packed the stadium in Columbia under threatening skies to see the Gamecocks crow and the Tigers roar. By the time the smoke had cleared away, and fans were filing out of the arena, Carolina had copped a 21-19 win from the "Country Gentlemen".

Strickland, of Carolina, scored on a 38-yard touchdown jaunt to draw first blood, but Mathews retaliated on a 66-yard reverse that was good for six points. Carolina led 7-6. Atwell plunged over from the one in the second quarter, a Cox to Thompson aerial clicked for a Clemson tally and Carolina led 14-12 at halftime.

A pass interception by Giles bagged a third TD for the Birds late in the fourth quarter. Clemson came roaring back down the field and Reynolds drove over tackle for the final score. However, the damage was done and the Birds had won the State Fair game.

Cox plays rabbit.

Strickland heads for pay dirt.

It didn't stay this friendly and peaceful.

"Catch him, Gage."

Thompson gets ready to snag one.
Clemson realized its third victory of the year in an initial encounter with Duquesne. A small crowd braved the cold weather at Forbes Field to see the South Carolinians cop a 34-13 victory.

Early in the first quarter, Tutsie set sail in high gear for a 69-yard run before Miller hauled him down, and three plays later Duquesne's Gottliev plowed over from the three. Gage then returned the next kickoff 89 yards and "Bull" Cagle's extra point set the Tigers out front. Deanhardt blocked a Duke punt, and Reynolds went over from the three to give the "Country Gentlemen" a one TD lead.

Reynolds and Miller alternated at the fullback slot in the second canto to lead to two quick touchdowns to give the Tigers a 27-7 lead at halftime. The third period was scoreless, and Gage scored Clemson's final tally early in the fourth stanza by dashing down the sidelines 74 yards. Cagle again converted. The Dukes last points of the night came some few minutes later on a pass play that netted 69 yards.
The Tigers Roared

FURMAN ........................ 7 0 0 0—7
CLEMSON ......................... 14 7 7 7—35

Clemson paid a visit to the Purple Hurricane in Greenville for their seventh game of the season. A total of 18,000 fans piled into Sirrine Stadium to see the contest.

The Tigers entered the game a 13-point favorite, and, before the half was over, they proved that they were superior in all departments by taking a 21-7 lead.

Reynolds plunged over from the five-yard line early in the first period to strike first paydirt. A few plays later Gage snagged a pass from Cox and moved over the goal on a play that covered 32 yards. Stombaugh intercepted one of Cox’s passes and dashed 37 yards for Furman’s only score. Before the half ended Clemson jumped the lead to 21-7 as “Hootchie” Morgan scored on a reverse.

Gage passed to Thompson for a third quarter score, and the same combination clicked again only 15 seconds before the final whistle pegged the score at 35-7.
In the homecoming game, the Auburn Plainsmen paid a visit to Tigertown. The day was dark and dreary, but the 15,000 fans were rewarded by a 34-13 Tiger victory.

The first Tiger tally came in the initial period as Gage passed to Ray Mathews for a score. Later in the same period, the same Mr. Gage dashed off 60 yards for the second Clemson score. Ball of Auburn returned the next kickoff 90 yards to put the visitors back in the ball game, making the score 13-6.

Travelin' Travis Tidwell came into the game and quickly passed to Ball for a TD, but Gage retaliated by slinging an aerial to Moorer good for a fourth Tiger tally. A blocked punt converted a score for Auburn, but Clemson's passing attack was still clicking as Gage passed to Reynolds for the final touchdown.
Coach Frank Howard figured that his Tigers were in for their fifth straight defeat when they traveled to Athens. The next question was just how high the score would be. After festivities were over, however, the head mentor expressed joy over the good game that his team had played.

Reid, Georgia fullback, flashed across for the first Bulldog score in the first period, and Johnny Rauch, the Georgia general, passed to Walston 50 yards for another score. Before halftime, Nestorak had plunged over from the 4-yard marker for the final Bulldog score to put Georgia ahead 21-0.

The Tigers began to roll after the halftime pep talk, and with the passing of Cox and the punting of Gage, inched closer to the Georgia goal and kept the Bulldogs away from their back door. In the third canto, Cox passed to Thompson, who made a circus catch of the aerial and scored from 22 yards out.

The quick kicking of Bobby Gage was a feature of the night game. His surprise booting constantly kept Wally Butt's boys in the shadow of their own goal.

GAGE PICKS UP YARDS FOR HIS NATIONAL RECORD.
Hardly wood
OH! OH! HE DROPPED THE BALL.

RIDDLE PLAYS TAG WITH A TERRIER.

HAL JORDON, FORWARD.
ON THE HARDWOOD

Nineteen forty-eight found the Tiger courtmen still lacking in experience, but filled with spirit and a will to win.

After several practice games, the Tiger faced a tough Davidson team. They lost by a 60-43 score. The following night our boys extended a strong Georgia to the limit, only to lose in the last five minutes 61-52. The Tigermen appeared well on the road to victory by leading a strong Washington and Lee team for three quarters. However, the Generals roared back in the final quarter to win 65-58.

The Tigers couldn’t seem to find the range and dropped four more in succession, Wofford 52-46; George Washington, twice, 60-35 and 79-67; and Maryland 49-42.

Finally, the team found the victory trail by journeying to Spartanburg and defeating a favored Wofford five 59 to 44.

However, the Tigers were no match for a strong Duke team and came out on the short end of a 80-47 score after playing on even terms throughout the first half. Wake Forest gave the Tigers a repeat performance the following night with a 68-48 setback.
South Carolina was a next opponent as we went down 73-54. Riddle led the parade with nineteen points. Still striving for victory, the Tigers lost a thriller to The Citadel as the winning goal was scored in the last thirty seconds. The final score read 52-50.

Our boys finally began to click and trounced P. C. 82-40 in a rough and tumble affair. We played our best game the following night as we rolled over Furman 77-52. Pruitt racked up twenty-one points and Frank Gillespie turned in a brilliant performance from his guard spot. Carolina gave us a heart-breaking defeat the next game in a hotly disputed contest. The next night we led The Citadel through the game only to fall behind in the last few minutes and finally lost 47-43.

In a repeat performance we again went down to the North Carolinians 85-52. The next meeting with P. C. was a dull affair and we walked off with a 64-43 victory.
BASKETBALL

FRANK GILLESPIE.

A TISKE, A TASKET—WHERE'S THE BASKET?

POUNDING THE BOARDS.
2 TO 1 IT'S CLEMSON.

DO IT LIKE THIS.

CAN I GO IN, COACH?

FRANK GILLESPIE, GUARD.
The next game with Duke proved to be the game of the year. Although thirty-point underdogs, the Tigers took an early lead and never relinquished it. Pruitt paved the way with nineteen points and Gillespie turned in brilliant floor work.

We couldn’t repeat the next night and fell down before Wake Forest 66-59 in the last few minutes. The Tigers came from behind in the waning minutes to hand Furman a 63-61 shellacking in our last state game. Holshouser led the way with twenty points, but freshman Julius Townsend saved the day with seven points in the last five minutes of the game. Maryland reversed the scene the following night and defeated the Tigers 63-61 on a last-minute field goal. The final game of the season was our worst and we went down before a powerful Georgia team 81-35.

Although the season was relatively dismal, there was one bright spot. Leonard Riddle was placed on the all-state first team.
Jap. dancers
The bouncing of a punching bag and rhythmic step of many feet can mean only one thing—the Tiger is ready for the ring. Our 1948 Tiger team was well grounded with experience and would have proved themselves had not injuries so hampered them.

The Tigers started training early and worked long and hard for the opening encounter with the University of Georgia. The highly praised Bulldogs came to Tigertown full of spirit and left on the short end of a 7 to 1 score. HOWEVER, the victory proved costly, as Jerry Orr suffered a broken hand that forced his retirement for the season.

Coach Jones' boys journeyed to Athens the next week for a return engagement with the Bulldogs. The underdog Georgians pulled the upset of the season by battling our high-flying pugilists on even terms all the way and finally a close decision in the heavyweight class to win 4\( \frac{1}{2} \) to 3\( \frac{1}{2} \).
THEY MUST HAVE SEEN THE BALLET.
CHUMMY, AREN'T THEY?

PATTY-CAKE, PATTY-CAKE ...
SALISBURY WEIGHS IN.

CHAPPIE TAPES THEM UP.

VICTIM'S-EYE VIEW.
The enraged Tigers were primed and ready the following weekend and rolled over The Citadel 4½ to 3½. The injuries began to mount as Ariel Warrick was forced to remain out of action.

Our boys journeyed to Maryland the next week and ran into a very powerful University of Maryland team. The Clemson boxers' hard punches failed them as they went down 5½ to 2½.

Although held to a 4-4 tie the Tigermen clinched the mythical state title against Carolina in the final match of the season.

Although Clemson was rated one of the pretourney favorites at the start of the season, we weren't in the running at the end. The Southern Conference Tournament found Lindsay and Salisbury out with cut eyes and Maney and Bunger benched by doctor's orders. The Tigers tried desperately but had to settle with fourth place as The Citadel, South Carolina, and Maryland finished ahead of us.
Tigers Pound

Nineteen Hundred and Forty-Seven found the Clemson cindermen with a good hold over of lettermen; in fact the Tigers were regarded as a power in the state. They proved their merit as they swept to victory in every meet but one, only to be nosed out by Carolina in the annual State Meet at Clinton.

Coach "Rock" Norman’s boys got the season off to a good start by journeying to Clinton and clawing the Presbyterian Blue Hose 98 to 32.

The team took to the road again the next week, and our boys displayed a well-balanced squad as the Furman Hurricane fell 84 1/2 to 45 1/2.

In the next encounter we met an opponent before the home crowd for the first time during the season. The high-flying Tigers gained revenge for a last year’s defeat by trouncing the favored Davidson Wildcats 76 1/2 to 54 1/2.

The following week found the Bengal Cats primed and keyed as a powerful Carolina team fell in a nip and tuck battle 69 to 62.
The Cinder Path . . .

North Carolina State provided the final opposition of the season at Clemson. With several stars hampered by pulled muscles, the Tigers took an early lead only to fall back at the finish by a 47 2/3 to 83 1/3 score.

Our boys worked hard for the annual state classic at Clinton. The crown belonged to the Tigers as it was won by them the last time the meet was held, which was before the war. The meet, the first after the war, was expected to be all Clemson and Carolina, and it ran true to expectations. Clemson took an early lead and held it until the last two events. The Birds were never too far behind and took the last two events to nose out the boys from Tigertown 63 1/2 to 56 2/10. Furman took third place with 24 2/10 points.

Coach "Rock" Norman brought the trackmen a long way this season, and with the bulk of the lettermen returning next season, Clemson should have a team comparable with those of pre-war years.

THE TIGER ON THE DIAMOND

While most of the students are content to sit around and keep out of the cool brisk weather the Tiger is on the diamond. Riggs field hums continuously with the crack of bats and the thud of baseballs. Baseball season is here.

The 1947 Tiger team was filled with talent and power afield and at the plate. On top of that we had a star-studded pitching staff that was the pride of the Southern Conference. The nucleus of the team was formed from the returning members of the 1946 state champions and was bolstered by former returning players and other fine new men.

The Hinsonmen lived up to all expectations as they blasted all opponents to walk off with the state championship and the Southern Conference crown, winding up the season with an enviable record of 21 wins against only three losses. Because of such a fine display of power, Clemson was said to have the finest baseball team that the South had produced in 30 years. Thus Clemson, with one of the best collegiate records known, was a unanimous choice for the first N. C. A. A. Intercollegiate World's Series.
The season opened with a 10 to 9 victory over N. C. State in a game that was played in weather too cold even for football practice. With identical weather the next day the Tigers defeated Duke 10 to 9. However, in a return engagement Duke handed Clemson a 19 to 11 setback.

The red hot Tigers then began a winning streak that saw Presbyterian fall 8 to 2, Wofford clawed 4 to 3, and Davidson edged 2 to 1. Clemson continued by trouncing Carolina 4 to 1 and 17 to 8, and then turned Georgia strategy into a nightmare as Joe Landrum belted a line drive into deep center to score two men after they were purposely walked. McMakin followed later with a three-run homer to sew up the ball game 7 to 2.

The diamond men made it nine straight by defeating The Citadel 14 to 4. In a return engagement with Georgia the Tigers blew a good lead as the Athens nine scored 2 runs in the eighth to make it the second loss of the season for our boys. The score was 8 to 7.
First Row: GILLESPIE, STROUD, McMakin, SHERARD, HAZEL, CASTLES. Second Row: FISHER, HAZEL, MARTIN, QUINN, COKER, MOORE. Third Row: HINSON, LANDRUM, JOYE, CLEVELAND, MOORE, GRIFFETH, SIMPSON.

LUTHER RENTZ, PITCHER.

TOM CLEVELAND, CATCHER.

"NIG" GRIFFITH, PITCHER.
Winning ways were immediately resumed as the Clemson nine defeated Newberry 10 to 5 and 9 to 4, The Citadel 8 to 5, Erskine 5 to 4, Wofford 11 to 6, and Furman 19 to 7. Joe Hazel pitched brilliant no-hit ball for five innings against Furman in a return game, only to give up six runs in the sixth inning as we lost our first state game in twelve starts, by the score of 7 to 4. This was the third and last loss of the regular season as the Tigers swept away the opposition in the remaining games.

In other return games the Hinsonmen defeated Erskine 3 to 2, Davidson 15 to 1, and Furman 9 to 6 and 13 to 3. The baseballers then drew the curtain on a most successful schedule by wrapping up the Southern Conference championship with a pair of sweet victories over Carolina, 17 to 3 and 10 to 8.

The Tigers dominated the All State team with Joe Hazel, Joe Landrum, Hal Sherard, Lyn McMakin, and Dewey Quinn being selected on the first team, and Frank Gillespie and Homer Coker on the second team. Landrum and Quinn were also named to the Southern Regional N.C.A.A. All-Star team.
PRACTICE MAKES PERFECT!!

IT'S "GONNA" BE CLOSE . . . .

The Champs...
N.C.A.A. TOURNAMENT

Clemson, with its season record of twenty-one wins against only three losses, was a natural favorite in the N.C.A.A. tournament.

In the first round Clemson was matched against Auburn, and Alabama against Virginia. By dint of superb ball pitching by Joe Landrum and Joe Hazel, along with effective backing by Coker and Frank Gillespie, Clemson defeated Auburn eight to three.

In the meantime, Alabama polished off Virginia to oppose the Tigers. The loser would play the winner of the Auburn-Virginia game. Virginia was subsequently defeated by Alabama, four to one. The stage was set for the battle between the Tigers and 'Bama.

Even against Alabama’s ace hurler, Theyer Billis, the Tigers rolled on to gain the championship of the South and a trip to the Eastern N.C.A.A. tournament.

The three major teams of the East were represented in the Eastern N.C.A.A. tournament. Those in competition were the University of Illinois—the Big Nine champion, N.Y.U.—the Metropolitan Titlist and Big Three winner, and Clemson—champion of the South. Great deeds were expected of Clemson because of its record to that time.

The Tigers fought bravely, but in vain, against Yale University. Yale went on to defeat Harvard one to nothing and claim the title.
These are the Clemson athletes of the grid, diamond, and track. Active participation in a major sport is essential for membership, but still more action is seen the week of informal initiation.

Behind the invitation to membership are months of grind, dust, and intelligent workout. Touchdowns, baskets, homeroons, ring decisions, and cinder victories are the aims of the club.

During the past year the organization has staged the intramural boxing bouts which drew a crowd of over twelve thousand.

TENNIS TEAM

Under the capable guidance of Coach Hoke Sloan the Tiger tennis team swept to 15 victories against eight setbacks. Hampered by inexperience, the Tigers gained momentum as the season progressed. We were eliminated by a strong P. C. team in the annual state meet.

Prospects are bright for next season as most of the boys will return. The valuable experience gained last year should enable Coach Sloan to field a winning team next year.

T. E. THORNHILL
Captain

"SERVE"
TYPICAL DAY ON THE COURTS.
The 1947 Tiger Tankmen, faced one of the toughest schedules ever faced by a Clemson team. Hampered by lack of experience the Tigers dropped two meets to Georgia and one to Emory before smashing a determined Carolina tank team. The Tigers were no match for normal competition like Miami, Florida and the Pensacola Naval Air Station and thus fell before their seasoned veterans.

However, our defeats were forgotten as we splashed to the state title by defeating Carolina and Furman. Walker and Parker led the point markers.

The tough schedule enabled the Tigers to gain valuable experience and with the majority of the team returning next year we should be able to avenge most of our defeats.
GOLF

The 1947 Tiger Links Team was one of the best in the history of Clemson. With most of the members of the undefeated 1946 team returning we had no trouble completing another undefeated season. We won the state title handily by defeating every team we met. This included The Citadel, Wofford, South Carolina, Presbyterian College, Furman, and Davidson.

We gained wide recognition by trouncing a strong L.S.U. squad in a dual match. This was the first defeat for the Louisianans in several years.

Most of the boys graduate this year, therefore we can not predict the prospects for next season.
MINOR "C" CLUB

The Minor "C" Club is composed of men who have won varsity letters in one or more of the minor sports, which are golf, tennis, swimming, cheerleading, and the rifle team.

Under the leadership of Mr. Hoke Sloan, the tennis coach, this organization seeks to further good sportsmanship and fellowship and to encourage participation in sports on the campus.

Intramural tournaments are held each year for nearly every sport under the sponsorship of the Y.M.C.A. The intramural sports program covers touch football, softball, basketball, volleyball, and boxing.

Teams are formed from R.O.T.C. companies, veteran groups, church organizations, and any other group that may wish to participate. These teams have a schedule which they follow, and at the end of the season an elimination is held, after which the winning team is awarded keys.

Mr. Roy Cooper of the "Y" is responsible for its remarkable success this past year. To him we pay tribute for his unfailing service.

We Salute
CLEMSON COLLEGE
CORPS OF CADETS

Since 1824, more U. S. Officers around the entire world have worn Reed Uniforms than any other kind, because they have found Reed's tailoring, fit and long-wearing qualities to be the best! We are proud to be the "Official Uniformers of the Clemson College Corps of Cadets."

Jacob Reed's Sons
1424 CHESTNUT ST., PHILA. 2

America's OLDEST and FOREMOST Makers of U. S. Officers' Uniforms of Fine Quality.

"The House of Quality"
With the words on this last page we conclude the '48 Taps and mark the end of college days at Clemson for the Class of 1948. As we turn this book over to you, we recall many incidents that have taken place during its production—the birth of the book at our first staff meeting last spring . . . the days of summer vacation spent in planning . . . the constant thoughts of deadlines . . . the many nights we saw the sun set and rise while we worked . . . the many obstacles we had to overcome . . . the lowered grade-point ratios of the staff . . . and finally, the distribution of the book and the feeling of a job successfully completed. It has been fun and we have had quite an experience in producing the book. Nevertheless, we are glad to turn over to the rising senior staff the responsibility of putting the "49" annual out.

This book could not have been produced by the staff alone. The guidance and suggestions of our advisors, John Lane and John Califf, the business advice of Hamilton Hill, the assistance of Ed Osborne, the efforts of Walt Dargan at Photo Process in Atlanta and the energy and interest of Bob Davis in getting the book off the presses of The R. L. Bryan Company have all been necessary for the production of this book and have eased the burden on the staff.

You now have the '48 Taps to pass judgment on. We hope it meets with your approval, but, in any event, we have completed our work and the product is yours.

Now we turn our keys to the Taps office over to the 1949 staff and let deadlines and Taps space collections become memories as we again devote our full time toward earning our diplomas.
The Editor
and the Staff
Best wishes always.

A. B. Johnson Jr.
Good luck, Buzz! May you have a happy life and many years of joy and contentment.

William "Buzz" Langner

The best of wishes and good luck.

The Best of Wishes to a swell fellow!

Carroll H. Schmer

Well Jack ("Old Rascal")

Your little "rat" is in the verge of becoming a big one, and he sure is happy. I'm sure he will always be a swell and I want to wish you the best of luck always.

"Rat" Bubber

May all your troubles be "little ones!"

J. C. Hoffman

May you always "pass" in the future!

B. C. Kircher

The best of wishes and good luck.

William "Buzz" Langner
"Ole lady Jack,"
I've sure enjoyed roaming with you and working with you. I hear marching for you to have all the success in the world - you rightly deserve it. Any way I hope you get to own the biggest textile mill in the world - then I'll be proud to say I once roamed with you. You're a swell fellow, Jack -

"Benny"
