ADVERTISEMENTS

FROM WITHIN
The Greenhouse

The sunny greenhouse, custodian of luxuriant palms and ferns for festive occasions.
The Library

The library, concealing a staff of lovely assistants, peers from behind its leafy camouflage.
The Water Fountain

Strategically placed between the main building and the library, this multi-purpose retreat obligingly serves all comers, from students to thirsty chipmunks. Too public for summer romancing.

Reflection Pool

An unusual rear-view of the amphitheater featuring the fabled reflection pool. In the spring golden daffodils suddenly appear to encircle its cool and placid surface. Fine for “pooling” unruly persons.
Third Barracks

The third barracks basks in a flood of sunshine.
Grassy lawn doubles as playground.
TILLMAN HALL, known as the Main Building, is the center of all activities. From beginning to end we pay homage to this mecca. Behind its walls such offices as the President’s, Commandant’s and Treasurer’s are entrenched. The Chapel, located in the right wing, also functions as theater and auditorium. The basement harbors The Tiger, our weekly newspaper.
THE PRESIDENT

Composed and serene as his name would indicate, Dr. R. F. Poole, our president, stands amongst us as steadfastly as Clemson itself. For the past nine years his dextrous hand has adroitly directed Clemson in its rise to prominence. It is he who greets the incoming freshman with a welcome handshake, and who launches graduates into the world. It is he to whom students turn for action on their age-old complaints.

No one can contest his fitness for the position, for as a Clemson graduate, Dr. Poole learned the problems of the students; returning as president, his intimate acquaintance with these problems enable him to cope with them expertly.

Without infinite patience, tact, and the desire to contribute to humanity, Dr. Poole would have succumbed long ago to the burden of his post. All eyes focus upon him as he balances the delicate scales between student and administration. The responsibility of correct decision and ensuing action is his, along with any other uncertain honors that might accompany it.

Only meager acknowledgment can we offer to this individual of distinguished merit. May his gentle rule extend far beyond our transient period at Clemson.

A front shot of our “front” man; who else but jovial President Poole, the most photographed man on the campus.

Dr. D. W. Daniel, Governor Strom Thurmond, and President R. F. Poole withdraw to a secluded corner for a three sided conference. Dr. Daniel starts the ball rolling, but how long can he keep the floor?

President and Mrs. Poole in a familiar stance, shaking hands, but with the Honorary Cadet Colonel, Miss Betty Byrd of Kingstree, South Carolina. Get in that line boys!
Mr. J. C. Littlejohn, business manager, figures out ways to keep the college out of the red, or to avoid world politics, in the black.

Mr. G. E. Metz, registrar, handles our records and specifies how many extra credits we may schedule, if any. Some people do.

Mr. A. J. Brown, treasurer, has a trusted position. Keeping tab on thousands of students is a never ending task.

Mr. G. H. Hill, director of students' activities, lends a helping hand to the school publications and such in his dual rôle as assistant business manager.
Here they are, the unseen counselors of Clemson. From every school and department they are recruited for discussions which result in variations and improvements within the college. Reading left to right: K. N. Vickery, D. W. Watkins, H. L. Hunter, J. C. Littlejohn, H. P. Cooper, S. B. Earle, A. J. Brown, F. M. Kinard, W. H. Washington, R. D. Crosby, R. A. McGinty, R. F. Poole.

**MORE ADMINISTRATION “WHEELS”**

Mr. K. N. Vickery, assistant registrar, handles the IBM machine like a true business man.

Mr. H. H. Hill, Jr., manager of the housing project, figures how to cram them into the pre-fabs.

Mr. J. G. Lindsay, mess officer, studies the month’s bills closely with an eye to dollars and cents.
Miss Margaret Crowther, attractive dietitian, makes sure that we don't get iced-tea on winter days.

Maruja Crowther, pretty stenographer, buries her face in a mass of paperwork. Too busy to look up, Maru?

K. N. Vickery, assistant registrar, tries to smooth out the wrinkles in this year's registration scramble. Ray Crow watches approvingly as the time cards are distributed.

Dr. H. L. Hunter looks inquiringly at an unidentified object while Miss Virginia Shanklin watches attentively. The ears belong to Tom Milford. The occasion is the opening of the new Alpha Phi Omega room. It looks wide open, too.

TIME IN...
Miss Virginia Poole and Mr. W. D. Trevilian discuss the economic situation in the Tiger brotherhood room. Is it that funny?

Professor M. C. Bell isn’t finding his mathematics very helpful in construction work. You can’t push a wheelbarrow with logarithms.

Mr. Metz and Earl Morris put their heads together for some serious thought. What can they be up to now? See next year's Taps.

...AND TIME OUT

Lt. Colonel R. D. Crosby, Colonel W. S. Morris, and Lt. Colonel Russell Smith could be considering the military, but it seems unlikely, considering the surroundings and additional guests. Bet they don’t do all the talking at this session.
Leadership
THE SENIOR COUNCIL

No worthwhile organization or institution can exist without a certain amount of strictly enforced discipline. The Senior Council, composed of eleven members, four ex-officio by their positions as senior class officers and seven other senior class members elected by the student body as a whole, with the senior class president acting as chairman of the council, furnishes this discipline for Clemson.

First organized for the enforcement of discipline, this organization has by no means restricted itself to this sole service. The Senior Council serves as a connecting link between the student body and the administration. Many worthwhile suggestions have been offered and accepted by this two-way combination. Compliments to the Senior Council for their rôle in keeping the veteran-cadet factor running smoothly.

Fair consideration is given to all parties or situations presented to this body for judgment and it is seldom that the students, taken as a whole, disagree with the actions of the Senior Council.

Congratulations on a "job well done".

IN SEARCH
The Senior Council, composed of a variety of students, deliberates over one of its rare disciplinary cases. They strive to avoid hasty decisions which might lead to unwarranted action; consequently a large measure of their power is consumed in anticipating trouble and preventing it.

President

Rated tops among honor, leadership and service organizations is the Blue Key, a National fraternity. It is toward this reward that the hopes and ideals of many a student are directed.

Since its inception, Blue Key has rendered invaluable service to Clemson. In the coordination of campus life, the welfare of the student is a first and foremost goal. A program with the purpose of bettering relations between Clemson and its athletic rivals has been in the experimental stage for the past two years, with results in cooperation far exceeding all expectations. It is an ideal for which a solution has long been sought by current students and former members of our “Alma Mater”.

The Blue Key Directory, an annual publication containing students’ names, room numbers, home addresses, and course of study is one of the most helpful services performed by the fraternity. The Directory is not only of use throughout the school year, but it is available for years as a reference to the addresses of many friends accumulated in college.

PACE
The eternal triangle. When these three get together, something is bound to happen.

When day is done and the meeting is over, Charlie isn't hanging around.

SETTERS

All eyes are on Banks, but Prince looks downcast. A glance from left to right discloses a good cross-section of campus "wheels".
A number of welcome changes on the Clemson campus have been effected by our own Tiger Brotherhood, an organization founded in 1928 by a group of student leaders and faculty members as a service and leadership fraternity.

Its purpose is to act as a sponsor of tolerance and integrity among Clemson men. Members are gathered from all four classes: freshman, sophomore, junior, and senior, because of their outstanding qualities of character, leadership, and scholarship.

In addition to instigating a campus-wide clean-up campaign, the Brotherhood this year obtained lockers for day students and performed numerous other small services to the college.

During pledge week, entertainment is furnished by the initiates for the club members and school in the form of a parade through the mess hall and about the school attired in original costumes, but this has come to be expected of almost all organizations and everyone thoroughly enjoys himself.
This coat of cardboard mail would scarcely ward off a foe, but Dan May makes a stab at it.

This is not what the well-dressed college boy is wearing, just the new pledges in their original and unconventional costumery. It’s a gay day for all.

Would you believe that this mature-looking group once went through the ritual pictured above? Now the fun is over and the work begins.
Composed of men with the earnest desire to be of service to their fellow students, faculty, and community is the Gamma Lambda Chapter of Alpha Phi Omega, first organized at Clemson October 6, 1936.

Prerequisite to membership in this organization is former membership in the Boy Scouts of America. In addition to this, the prospective member must have shown active interest in earlier college activities and be recognized for his strength of character, integrity, and sincere longing to assume leadership. New members are selected and voted on at the beginning of each semester.

Alpha Phi Omega has many worthwhile projects to its credit since the chapter was first organized. A few of its beneficial services in the past few years are a relief program to Europe for the needy, a booklet of club information, desk blotters for all students, and many other useful services both to the campus and community. Other interesting and helpful programs are on the agenda of this organization and it is with the greatest of interest and optimism that the school looks forward to their completion.
Advanced training in the Boy Scouts no longer includes lengthy field hikes for these boys. Off with the full-field pack and on to today's problems for them. Congenial surroundings are conducive to clear thinking.

Editor Fant collaborates with Darby on some technical matters. Two "heads" are better than one.

THE SCHOOL OF ENGINEERING

No more tinkering with alarm-clocks and Model-T’s. At Clemson, rain or shine, the Engine House teems with mechanical aptitude, and these boys mean business!

Subjecting oneself to "Sterno" Fernow’s stormy course in steam has become a must among mechanical engineers, in addition to trivialties like thermodynamics and aerodynamics.

Expeditions sponsored daily by Will Clark of the Civil Engineering Department trek over the campus to survey its grounds.

After a spell in the Department of Electrical Engineering, a man can run home and repair the electric toaster and lamp plugs with impunity. S. R. Rhodes supplies the equipment to practice on.

The Chemical Engineering Department begins where chemistry leaves off. Heat flow and evaporation can be frustratingly elusive.

High in Rigg’s Hall the architecturally inclined students labor over a rendering or working-drawing. A little spice is added in the form of air-brushing by Gilmer Petroff or Art under the “Saint”.

Add them all together and its spells W-O-R-K, which is a requisite in any field.

Mr. Byars, the demon of graphic statics, gives Kelly a few pointers on forces in camelback trusses.

Critiquing the handiwork of talented seniors is a popular pastime among those on the way up.

Dean S. B. Earle does a remarkable job of keeping in touch with the vast School of Engineering.

Carmichael explains the intricacies of one of the most important phases of engineering—mechanics.

Professor Kersey demonstrating some applications to electrical apparatus. Look at the wires!
The roar of whirling machinery discloses the huge School of Textiles.
New equipment, and lots of it, keeps Clemson in the lead among textile schools, both in size and quality. With the location of many new textile corporations almost on the campus, it is but a short jump from student to employee; a convenient arrangement.

Textile chemists spend so much time in the chemistry building that they are often mistaken for chem. majors, and with good cause. The “Czar” doles out helpful hints on the chemistry of dyeing to new arrivals, and Mr. Lindsay takes it from there to add the final touches. It’s a colorful profession!

The engineering phase is a different matter. It embraces everything from kinetics and statics to heat power. “Dog” Curtiss throws students the bone in the engine house.

Textile management covers a multitude of sins, from Campbell’s costing to microscopy under Doc Heyn. Figuring inventory, budgets, and wage scales must be mastered before assuming the position of mill foreman or manager. No wonder the linenheads seldom stop for a quick flick of the whiskbroom.

Dean H. M. Brown finds keeping tabs on the huge School of Textiles a full-time job.

Byrd and Barnet do a little drawing while Carson tests it for size.

It’s a field day at the spinning machine. Everybody wants to get in the act.

It’s Jack Reid running that loom, and all by himself. It takes close attention to watch all of those threads at once.
Long Hall, where agriculture is transformed into a specialized art.
THE SCHOOL OF

AGRICULTURE

First mentioned in the will of Thomas G. Clemson, the Agricultural School has developed into one of the best in the country. Under the patient and instructive guidance of such men as "Big Ben" Goodale, "Lord" Collins, "Breezy" Breazeale, "Frog" Ware, and many others, the old time "dirt" farmer has been replaced by men of science who obtain everything the soil has to offer and still save it for their heirs and assigns forever.

Busy Ag. Engineers spend many days in the "Engine House," as well as the Agricultural Building. Doc Aull keeps his "Ag. Ec." boys "in the traces" with intricate curves and designs. The Poultry Department offers a very good course in "Chickenology" with encores from "Chicken" Morgan, and "Jib" Cooper. That little square building by the amphitheater furnishes ice cream as well as "future" dairymen to the country.

Overall supervision is furnished by Dean Cooper. His is the job to synchronize the operation of the entire school, and with the help of a earnest and well trained staff this is accomplished with remarkable efficiency.

Watch it, bud, or that specimen might jump out from under the microscope and bite you. Let's close that book, too!

Zoology lab and the study of the earthworm, the farmer's friend, take up a good afternoon, eh Theo?

Active Dean H. P. Cooper shares his time with the Agricultural Experiment Station.

Rough as courses may be, we still don't have to work evenings. It's Senior Night.

Who's telling the jokes today? It could be that Breazeale is running a fat test.
In the Physics Building minds digest ideas which result in mechanical surprises.
This is indeed the school that furnishes a well-rounded education. Here undergraduates obtain a smattering of the "worth-while" things of life. Many go on to graduate work in their individual fields.

First it's Government under "Skeeter" Webb, Freshman English under McGee, and that inevitable Stanley for "trig" or analytics. Those who get by this first barricade are in line for the "ogre" of them all in "Doc" Sheldon's calculus. Sophomore literature under "The Little Devil" and Doc Taylor carries a lot of weight where ever Clemson men gather. Trevillian gives out with facts and figures in economics, and while we're in the library let's journey up to "Influence" Waites' "three ringed circus" in psychology. Every A. and S. boy, at one time or another, schedules John Lane for an English course. Dean Kinard's "Selected Masterpieces" fills in the vacancies left by other "Lit" courses and the Physics Department with Huff, Lindsay, and "Tommie" Turner is a must for all graduates.

All in all these boys are prepared for "come what may". Be it graduate work in fields of medicine, law, or teaching, their foundation of learning is well established.

Prof. Rutledge leads a group of would-be Botanist through an anatomy study of a tomato. (The type that grows in the garden, however.)

Ma Owings leads his budding Romantist through the mysticism of Blake. Romanticism at 8:00 A. M.? Hardly!

Amicable Dean F. M. Kinard offers students more than just the technical college courses.

Like adolescence, everyone goes through physics lab. This time it's the rope and pulley experiment.

You're right, it's a frog under the scalpel. Does the formaldehyde make your eyes burn, Dukes?
The Chemistry Building incloses a wealth of scientific information.
After consulting our Baedeker, we find ourselves in the freshly painted chemistry building. That new asphalt floor does reduce the creaking, but what can be done about the ever-present odor of hydrogen-sulfide (as in rotten eggs)?

That smiling face in the first office on the right? No less than Dean H. L. Hunter, the perennial plague of the freshmen. As a rule he is bustling about the building, checking up. Directly across the hall is the habitat of Dr. Frank Schirmer, who lectures on quantum mechanics and the elements.

From the lower floor the "Little Lehrer", Mike Brownley, sends students chasing after diesel roadscrapers for gas samples to analyze. Upstairs to Doc Mitchell's Kjedahl processing of fertilizers and limestone analysis.

Dr. Pollard is the nemesis of the chem major. First physical, then colloid chemistry. (For some it's first physical, then physical again.)

No branch of chemistry can be bypassed, as all combine to give us added luxuries in this wavering world of today.

Steam distillation is often used by chemistry and pre-medical students throughout their course in organic chemistry.

George and Jo-jo trying to catch up in advanced quan. lab. Only one to a desk, boys, and don't burn that crucible.

Caught working by the forbidden "cookbook" method! That odd instrument is a separator.
The Education Building is a proving ground for future leaders and teachers.
Planning to enter the teaching profession? Well, this is just the school for you, for every graduation day, we find that old production line well represented with future high school and college professors of the nation.

The first year is spent "boning up" on such basic subjects as botany under Whitney, "Rat" chemistry with "Smiley" Brownley, and English and math, in their respective departments. The sophomore year looks like a combination engineering, pre-med, and chemistry major as "the boys" delve into such "toughies" as calculus, "qual. and quan.", and physics. It is in the junior year that the actual major is approached in such courses as education, psychology, and vocational education. These boys really get a taste of everything as "Junior" McGarity dishes out with music appreciation and M. St. Hubert explains that art appreciation until we actually like it. These senior boys have really arrived when they go out into the neighboring schools teaching and learning how to teach by actual experience.
E. J. Freeman ... "Musical Ed" ... grades by the slide-rule ... methodical to an extreme ... brilliant in his field ... exponent of gear cutting and blade angles.

B. H. Hodges ... "Bax" ... a diligent professor ... works hard trying to pound chemistry into freshmen ... jolly by nature ... easy conversationalist.

J. C. Green ... "Dude" ... willing to aid needy students any day in the week ... dapper ... partial to flashy neckties ... wears a coat winter and summer.

A. C. Menius ... "Buck" ... jokster ... talks on a high plane ... easy to get along with ... heavy smoker ... a whiz on the electron microscope ... well-versed in atomic and nuclear physics ... can juggle a mean mathematics equation.

W. E. Tarrant ... "Crowfoot" ... great psychologist ... (in textiles???) ... likes neatness in students ... hates impudence ... thinks students should be seen and not heard.
R. E. Ware . . . "Frog" . . . opinions on any subject . . . dabbles in astronomy . . . collects tropical fish and guns . . . bands birds . . . lectures on the political situation . . . gives rough quizzes.

R. L. Saint-Hubert . . . "The Saint" . . . an amiable Frenchman . . . moves the troops to greater artistic endeavor with his quaint speech and his Americanized jokes about les belles femmes.

J. P. Brewster . . . "Speedy" . . . ladies man . . . works with chalk in one hand and eraser in the other . . . efficient . . . big joker . . . goll addict . . . a word for every one.

E. L. Clarke . . . "Will" . . . most sincere . . . great story teller . . . really believes in his seniors . . . always rushing for time . . . doesn't like jokes . . . plays no favorites.

F. H. Pollard . . . "Doc" . . . bachelor . . . very intelligent . . . makes that physical chemistry "ruff" . . . believes in lots of hard work.

IN OUR MIDST
Honoraries
FIRST AND FOREMOST

First organized in 1897 at The University of Maine, Phi Kappa Phi was initiated on the Clemson campus in 1938. The men in this organization represent the scholars of the campus. The outstanding requirement for admission is to be in the upper eighth of the senior class and to have maintained a G.P.R. of 6.5 or better.

The chief goals of the chapter are the promotion of good feeling and high ideals and the stimulation of learning in competition.

Phi Kappa Phi is the greatest scholastic honor that is offered at Clemson, and a magnetic ideal for its students. Those who make Phi Kappa Phi are necessarily destined to design the world of tomorrow, but a great deal of prestige and recognition is due them for their perseverance and hard work. These are indeed the men to be observed in their future fields of endeavor.
Food comes first, even among the intelligensia, and the members of the Phi Kappa Phi are no exception. Note the happy smile on George Mandanis' face. That's one of the fabulous "Berry boys" on his left, intent upon eating.

MIXING THE MOLECULES

Maybe you’ve observed certain individuals walking around the campus with bottles of colored water around their necks. For your information they are initiates of Alpha Chi Sigma, national honorary chemical fraternity. This organization, having 53 collegiate chapters and 29 professional chapters, is one of the largest of its kind in America.

AXE strives to include those men of outstanding character and chemical ability into a fellowship in which they can exchange ideas and views on different phases of their common field of study. Many interesting programs and demonstrations are included for the benefit and education of its members. Professional members, often invited in as speakers, present varied and interesting ideas on the professional fields of chemistry.

Like other fraternities AXE is the tie that binds its brothers together. Many warm and lasting friendships are made among the members and contact is kept with former members who have graduated and gone before to join the throng of modern alchemists throughout the world.

ARTISTRY IN CONSTRUCTION

Composed of a selected group of architects at Clemson who are tops in scholarship, personality, and strength of character are the Minarets. This organization was first introduced to give promising young architects a common ground on which to exchange ideas of their profession. In addition the club sponsors educational lectures, art exhibits, and demonstrations of architectural and engineering accomplishments for the interest and education of its members.

The purpose of the Minarets is to promote the standards of the department and to bring into closer fellowship the members of the organization. Many former members, now practicing building and landscape architects, interior decorators, and contractors, are invited in to present programs of interest.

Though professional in nature the social side of fraternity life is not neglected. For the enjoyment and entertainment of the brothers, banquets, intermission parties, and supper meetings are given and are greatly enjoyed by all who attend.
MECHANICAL MINDED

Observe these men closely because they have been chosen to receive the highest honor of the engine house, Tau Beta Pi. This does not necessarily guarantee success for them, but to be pledged by Tau Beta Pi is no temporary mark of distinction and will not fade with the passing years.

A member of this organization must possess desirable traits of character as well as abilities of leadership. In addition to the above the student must be a senior in civil, mechanical, or electrical engineering and must be in the upper fourth of his class as to scholastic standing. A large quantity of native intelligence and just plain hard work are prerequisites to membership in this national honorary fraternity. It is to this goal that tired engineers look when the going gets rough and to those men that are actually pledged—the heartiest kind of congratulations.

Wherever you find a mob, it'll be a bunch of engineers, no doubt. This time it's the new pledges in a typical unposed photograph. They look right serious, and they had better be if they expect to finish this school as engineers.
SOIL SPECIALISTS

Here we find the outstanding men in the school of Agriculture at Clemson. All students in the school of Agriculture are considered for membership with those of exceptional scholarship, personality, and character accepted. Alpha Zeta, national honorary agricultural fraternity, seeks to inform and post its members with the latest in agriculture, and scientific farming has come into its own. These men, who are in on the ground floor, will undoubtedly be the leaders of their individual fields tomorrow.

**Tau Alpha**

**FOR FARMERS**

No reward is too great for the man who spends his life in the instruction of our country's youth. The trend in years gone by has been quite the contrary for teachers of the nation. Their compensations have been small and their work tedious and long.

The Kappa chapter of Alpha Tau Alpha, national honorary agricultural education fraternity, was organized at Clemson in 1930. The goal of the chapter is to establish brotherhood and unity between those men who show promise of becoming agricultural education leaders of tomorrow.

A top-secret initiation, that is, everyone is blindfolded but us. What they can't see won't hurt them.
TOPS IN TEXTILES

A twenty-two year record of integrity and activity marks the anniversary of the Iota Chapter of Phi Psi, Clemson's first Greek-letter fraternity.

Its varied activities provide a focal point toward which textile students may turn for recreation or information. High standards of character and scholastic achievement are desired in all members.

Today, Phi Psi is honored among the most outstanding student organizations. Alumni chapters may be found throughout the nation.

CALL IT CULTURE

With the prescribed grade point ratio in his pocket, a junior or senior majoring in Arts and Sciences is eligible for membership in the Sigma Tau Epsilon, an honorary scholastic fraternity.

Every year the Sigma Tau Epsilon undertakes a task through which it may improve the standards, such as the tutoring of undergraduates.

The School of Arts and Sciences is comparatively new to Clemson, but since its formation, the number of students turning to the liberal arts for an education has increased immensely.

Part of the fun of being a fraternity brother comes in attending parties like this. Dean Kinard and Mr. Vickery listen to the students rant in all seriousness.
The "Worms" emerge with their shuttles for a closer inspection. The "Worm" season looks good this year. Back to your looms, boys.
Professional Organizations
The student chapter of The American Institute of Electrical Engineers was organized at Clemson to give student electrical engineers the opportunity to work together, and thereby to exchange ideas on various phases of their life work. The ultimate goal of this organization is to maintain a high professional standing among its members, and to further the individual development of the engineer.

Presented in the form of programs and field trips are: the visiting of places of engineering interest, presentation of interesting papers, reports, and abstracts, and the all importance of making contacts with leading men in the field of electrical engineering.

How long is a short circuit? How high is your resistance? These boys go into technicalities a little deeper than that. You don’t see any women trying to take over this field, do you?

Wonder how Hunter’s wristwatch will run after being in contact with that electric motor? B. J. Perry looks on knowingly, too.

Contact! Frank Gillespie shafts that switchboard like a real electrician. More power to you, Frank.
First organized at Clemson in 1931, the American Society of Agricultural Engineers has been of real help to its members. The chapter invites many informative speakers and agricultural experts to guide and advise its members. In this way members are kept posted on the latest developments and events of interest in the field of Agricultural Engineering. Working together on various programs and projects, the AE student learns the value of teamwork. Scholarship and development of character and personality are prerequisites to membership.

Can't see your face, bud, but we know that you're doing a first-rate job of welding there. Something every housewife should know.

The farmer's best friend, a tractor. They come in handy on senior night, also, but on a farm they are absolutely indispensable. Ask the man who owns one.

There is no better way to make a thing stick in your mind than by seeing it done or doing it yourself. Luckily, this cotton stripper does all the hard work.
Founded in 1852, The American Society of Civil Engineers is the oldest National Engineering Society in America. The purpose of the organization is the maintenance of a high professional standing among its members, the advancement of engineering and architectural facts to its members, and the encouragement of fellowship and cooperation between its members.

Membership is limited to sophomores, juniors, and seniors majoring in Civil Engineering who possess a satisfactory grade point ratio, personality, and character.

Classrooms aren’t this crowded. It’s a “short business meeting” of the A.S.C.E. You know what that means. “We won’t go home until morning.”

With cigarettes as stimuli, John Richbourg plows on to victory. Engineering problems seldom stump a student—they say.

Once again Clemson’s campus is surveyed by the civil engineers. Thirty degrees east, and if it doesn’t come out on the head, juggle until it does.
The American Society of Mechanical Engineers was first organized at Clemson with the purpose of binding together student engineers who meet the standard requirements of scholarship, personality, and character. The members of the chapter are honored with the best speakers, demonstrations, and lectures that the field of mechanical engineering can produce.

The Clemson chapter is composed of juniors and seniors in mechanical engineering. The meetings give the member the opportunity to develop initiative and the ability to express his ideas—a necessary element in the training of every good executive.

Take this down, Billy; "Twenty-two thousand r.p.m.'s." These M.E. labs aren't like the rest. It's three hours or none.

Jackson, the carburetor mechanic, hogged his way into this picture. Sitting on your axel as usual, Bell. Is reading instruments easier than playing them?
Organized in 1935, the Kappa Alpha Sigma Chapter of the American Society of Agronomy has been of great service to its members.

Only Agronomy students with good records as to scholarship, character, and personality need apply for admittance.

The purpose of the organization is to bring about a closer union between fellow members. Successful men in the field of Agronomy are brought in as speakers to present the many sides of a many-sided profession. With "The Lord" Collings acting as sponsor, never a dull or uninteresting program need be tolerated by its members.

Rosenkrans know how to make his botany labs interesting. Bet no one cuts him. Keep your eye in that microscope, Joe.

Ray Smith isn't going to miss anything that goes on at this meeting. Don't let them put anything over on you, Ray.

There's really nothing to Soils but memorizing atomic weights. Is there anything more important, Lofton?
The Animal Husbandry Club was organized in 1932 in order that the students interested in that field might benefit together from mutual understanding and pertinent advice offered by the faculty at regular meetings. At these meetings the members are introduced to the latest innovations in this phase of agriculture.

Often new ideas are brought out which prove to be very beneficial, such as recent developments in genetics and livestock feeding. Once the science of genetics was almost unheard of, but today the farmer would be lost without it.

Future years will undoubtedly bring unheard of improvements by the very men pictured on these pages.

Handle that hog with care, boys, with meat prices what they are today. With bacon ten cents a slice, slaughtering is an art worth knowing. Advanced meats, here I come!

That Shealy, always thinking of something to eat! Save those bones for the mess hall, that's the last you'll see of the meat.

The Animal Husbandry Club looks at the situation from a new angle. The bells make a roundup easy.
Jack Clegg designs a country garden. Just a rough sketch, you know, but it will have to do. Who will pay the water bill on that plantation?

An apple a day, and you know the rest. The only real way to judge an apple is bite into it. Toss a few this way.

HORTICULTURE CLUB

Increased quality and quantity in production is the goal of the Horticulture Club. This organization came into being in order to create and further interest in horticultural subjects among students. As to membership requirements this club is not like the other professional units in that any student who is interested in joining, no matter what his course of study, he may do so. Reactivated last year under the guidance of Professor Sefick, the horticulture club is off to a fine start toward its ultimate goal.

The Clemson Dairy Club is the oldest of the professional clubs on the Clemson Campus. It was organized by Professor B. E. Goodale in September, 1922, and has since become affiliated with the National Student Branch of the American Dairy Science Association.

Twice a month members of the Dairy Club meet and are informed of the latest developments in the dairy industry by faculty members or guest speakers. Occasional socials bring the students closer together in their work and in their relation to the faculty.

Fred Cone takes time out to do a little bottle washing. The other men are still testing their milk for butter-fat content.
The year 1949 sees the peak of postwar inflation. Will prices hold up, increase, or subside? Such questions as these arise before the members of the Economics Club during their meetings and forums. Even world affairs are not overlooked by these future economists and statisticians.

Manufacturers and agriculturalists are depending more and more upon the predictions of economists as related to their respective businesses, as judicious reasoning can change our standard of living.

"Parson" Ballentine shows us the business side of his character. Economics is a good practical course for a good practical man.
The Future Farmers of America, with membership limited to those sophomores, juniors, and seniors enrolled in the school of Vocational Agricultural Education, was chartered at Clemson in 1937. It is to these men that the nation is indebted for the all-round well being of its people today. Without the full cooperation of its farmers, our country could not possibly maintain the position of leadership that it now holds. To the men that teach the farmers the better and more scientific ways of agriculture we pay tribute.

Those Future Farmers don't let any grass grow under their feet. Ride there in style with the best of them, but first a stop at the P. O.

Len Reynolds, our President, opens his notebook significantly to a blank page for the photographer's benefit. Hold it, Len!
The pre-med boys don't miss a trick. They know that an organ isn't a musical instrument. What's that you're looking at, Stukes?

Smell that formaldehyde, whew! But you have to start somewhere. All of your patients can't be pickled—or can they?

ANATOMICS

DELTA SIGMA NU

It takes a lot of ambition and intestinal fortitude to be a member of this organization, not just because of the name, but for the ideals and hard work that go into the making of a medical doctor. That degree is a mighty long way off right now, but these boys have made up their minds and are on the road toward that ultimate goal. We wish you the best of luck and hope that we will be in that hand-shaking line of felicitations when you take the oath of Hippocrates, and assume your place in the field of medicine.
PHYSICS CLUB

The Physics Club organized in 1948 and named in honor of Professor William Emera Godfrey, Professor of Physics since September, 1919, who for twenty-eight years patiently instructed in this subject so vital to the scientist.

Membership in this club affords the student an opportunity to make professional contacts and exchange ideas with other men in his field.

CHEMICAL ENGINEERS

Until last year, the Department of Chemical Engineering was closely connected with the School of Chemistry. Because of the vast increase in enrollment, and a resultant expansion in the School of Chemistry, it was deemed feasible to devote a department completely to chemical engineering.

The Clemson Society of Chemical Engineers was subsequently organized to encourage fellowship among the members and to present the practical aspects of the profession to them.

SENIOR CLASS OFFICERS

At this time we pause to bid a fond farewell to the grand old seniors of the class of '49. Theirs has been a long and rocky path but at last the great day approaches and they are ready. The size of this graduating class is unparalleled in the history of Clemson College. Some of these men started in Clemson way back in the late thirties, and others, uninterrupted by the nation’s call to arms, began only four short years ago. Veteran or cadet, farmer or engineer, we once again bid you farewell. All the luck, happiness, and success in the world to these men who have become brothers of the greatest fraternity on earth—"The Men of Clemson".

Juniors
CLASS OF 1950

We are jolly juniors indeed as we stop to realize that we are well past the half-way mark with sweet victory in sight. Many times along that narrow and stony path we feared our end was near, but now with the junior year coming to an end the situation is much brighter and the possibility of our being included in the class of 1950 is much better.

May we never forget our first Junior-Senior and those all-exciting politics of the Spring elections. The new must replace the old as is the normal course of human events and it is indeed with joyous and exciting pleasure that we step into the vacant and waiting shoes of the men who have gone before us.

OSCAR THOMPSON AND FRIEND AT A PEP-RALLY.

JOHNNY GREETS HIS DATE AT THE MILITARY BALL.
Sophomores
All good things must come to an end, so ends a year of revelation, sophistication, and real down to earth enjoyment. For the first time you observed a meeker bunch of Freshmen than your class could ever have been and mighty juniors and seniors were reduced to the size of normal human beings. Now you know what really makes the old "alma mater" hum. Congratulations on a splendid past and best wishes for continued success in your future at Clemson. May the rest of your college days contain only enough clouds to form a beautiful sunset.

IT'S VICKERY BY A HEAD IN THE STAMPEDE FOR REGISTRATION.

NO SLEEP BUT WE'LL BE FIRST IN LINE.
GUARD DUTY TO THE CORPORAL MEANS TELEPHONE CALLS.

EVERY GOOD SOPHOMORE MUST HAVE HIS PICTURE IN TAPS.

THE THIN FRESHMAN HAS GROWN INTO A MUSCLE SOPHOMORE.

THE FIRST TASTE OF BEING AN UPPERCLASSMAN.

FRIDAY NIGHT IS ALWAYS THAT NIGHT OF LABOR.

THE PHYSICS LABS GET ALL THE SOPHOMORES TO LEARN THE FORCES OF NATURE.
Freshmen
Freshmen are easily distinguished by their closely shaven heads, awkward salutes, and mysterious faces. Tomorrow is the day they are building for . . . the day they will become upperclassmen. Where those before them have sown well, they will reap well; where they have sown poorly, the freshmen will plow and sow again. As each graduating class leaves, it dedicates the principles, institutions, and traditions to the incoming freshmen. It is during this formative period, the freshman year, that each freshman is adapted to college life in pursuit of an honorable occupation. It is here that a spirit of freedom, equality, and tolerance is created.

What A Life!

Pity the veteran. He has to turn in his own laundry.
WE WORKED...

Oh, this freshman life! Party, party, party!
Today's pain will turn into tomorrow's pleasure. Ouch!

A shiny rifle for Saturday inspection pays off.
Remove the uniform and what have you? Dirty clothes!

... AND WE HAD GOOD TIMES
"Give this man 10 demerits for dirty rifle", says the platoon leader.

Day is done and gone the sun and by golly long roll is held to keep the men briefed on the latest poop.

The corps is about to be released after a brief drill exhibition at homecoming. Now to see the Tigers beat Duquesne after trying to locate dates in the stands.
Grinning J. T. and the other platoon members anticipate their drill.

For once Bill Moore is not politicin', but is keeping the troops sharp.

...CHEERS AND GRIPES

Carrot Top keeps order at the staff table.

A typical barracks bull session.
As soon as our practical military instruction began, we began to realize the importance of the commandant and his staff. These are the men who direct and supervise the Military Science instruction and maintain discipline within the corps. Their expert guidance has enabled us to gain a lasting and effective knowledge of the subjects presented, which are essential to the pursuit of a successful military reserve commission. The transition from the wartime course to the peacetime was but another enormous task effected smoothly and efficiently by these men of the commandant’s staff.

It is only through this efficiency in the administration of the corps that leads our unit to high R. O. T. C. honors every year. For the second consecutive year Clemson has been one of the few schools in the country to be acclaimed superior by the army area inspection team.
ISTRATION AND SCHOOL

Good for Capt. Anderson . . . It's his wife. He's our army adjutant.

A sigh of relief from the platoon . . . for it's all over for them. One of Clemson's chief publicity mediums.

Learning is a stubborn process... even in Military Science. Those mountains in the background look more interesting.

Capt. Coakley exposes the frosh to the M-1. I guess it's here to stay.

The Signal class gets a little of the practical. Say it's complicated Bonnott, or is it you?

Air Force's Major Myers keeps his class abreast of the times.

War is complicated and so are these classes. Ask anyone who knows.
Our esteemed colonel shows the other engineers the score. Liles has his hands in everything. These are our potential bridge builders in the army of tomorrow.

What's wrong? Can't you hear, Hardwick? Or is it an unfamiliar buzz. Randall is chief operator in this Signal outfit.

It's not a war story, but a machine gun. Col. Watson, friend to us all, has become Clemson famous with his war stories in the infantry.

What is it? An oversized Bendix? No this again is an implement of war with its complexity.
Watch out Peebles . . . There's that sergeant. This was that scorcher in July when the QM campers were experimenting.

Ready on the right . . . remember camp. That shell can really lose its course in 200 yards.

Up at 4:15 to get out on the range . . . what fun we left behind. Water, water everywhere and not a drop to drink.

Now find your way back with a map and compass. No it was faster to follow an old beaten down trail . . . or was it?
OF HELL
MER CAMP

These were the days of Fort Benning, the rain, the mud, and the hot sun... and that's not all.

The troops getting the poop from headquarters... hoping to get some sleep before dawn.

This is all a part of summer camp. Sometimes it's hard to believe without evidence.

Lunsford looks like he's been elected best camper... or was he thinking of life in Charlotte.

Littlejohn could move over but then he'd miss the picture. It wasn't Hollywood.
Awards are given at Mother’s Day including the Outstanding Quartermaster student, rifle team medals, and best drilled cadets of the three lower classes.

MOTHER’S DAY
AND SPRING INSPECTION

As the second semester approaches each year, we become cognizant of our annual spring inspection and our Mothers’ Day festivities. Long and arduous drills and ceremonial practices become a part of the regular routine. The superlatives in individual, squad, platoon, and company are chosen for the honors to be presented at Mothers’ Day. The drum and bugle corps begins its drill at reveille. With the many superior ratings of the past, the corps never becomes cocky or over-confident with its excellence but strives ever to maintain a merit rating for the alma mater.
THE ANNUAL CLIMAX OF THE CORPS

Honorary Cadet Colonel Byrd and Colonel Cadet Lytle review the troops before a crowd of 25,000.

The superlatives take the much-deserved honors after much sweat and work.

A member of the D. A. R. presents the Norris Medal to Cadet Colonel Brice E. Lytle as the outstanding Clemson cadet.

Many salutes were given and returned at the spring inspection in the sultry sun of May.

The superlatives are reviewed by the cadet corps as they are presented with their honors backed by months of hard work. Families and friends look on in the background.

A Typical

Rise and shine! The first sergeant has to get up, too. Up and at 'em, Serg!

Light or dark, reveille must be held. Here we exchange the Orders of the Day with the Company C. O.

The worst chore of the day, shov ing. What a face!

We interrupt our tour for the pause that refreshes.

Can't get mail every day. Watch out, or you'll lose an arm.

Reporting misdemeanors to the Disciplinary Sergeant for swift justice.

Posting the Special Memorandums General Orders, and the Bust sheet of course.

Nothing like a hot shower to top off the day.

A friendly get-together, better known as bull-shoot ing. Now you tell one.
What are you waiting for? Let's eat breakfast.

Red tape and more red tape, but the Morning Report must go in on time.

M.S. class and the First Sergeant is on the receiving end for the first time.

Is that your face? Nobody else's out!

Just a few pointers to the boys before drill and then chow again. It's a hard life.

What a First Sergeant does on his afternoon off.

Everybody out for Long Roll. Rest!

Alone at last! To write a letter home. No, it's time to think of studies for a change.

Uniform for the night. Next—horizontal drill.
Military Organizations
“Fish”! That’s the name of the new initiates of the Scabbard and Blade fraternity. These men, reading from left to right, are tops in the military: D. R. Parish, D. A. Barfield, D. H. Banks, G. S. Pardue, G. W. Rauton, E. C. Thorton, and R. E. Hiller.

That’s just like Lunsford—always trying to steal the show! Wipe that smile off your face, you’re cute enough without it!
SCABBARD AND BLADE

POLISHED BRASS

Scabbard and Blade is a national honorary military fraternity recognized all over the country as "tops" in schools of military organization. It is composed of men who have proved themselves to be the best as far as the military is concerned.

Their has not been an easy life, for they, as the idols of the cadet corps, endeavored to discipline, drill, and instruct men who some day may hold positions of office in the Army of the United States. It is to these men that we look in times of emergency and it is to them that due recognition should be given in these days of peace.

SENIOR PLATOON
NATION’S BEST HALF-TIMERS

It’s a great day when the Senior Platoon departs to far away places to demonstrate some crack drilling. This year found them in many cities, including New York, Mobile, and Jacksonville. As an instrument of publicity, and who is adverse to publicity, the Platoon rivals any group on the campus. This refers to favorable publicity, of course.

No worldly gains accompany the honor of being selected to represent Clemson in this manner, only pride in their school and a love of perfection spur these men on. Each year, in the spring, rising seniors are selected for their perfection in drill. They practice for weeks during every spare hour to prepare for the fall parades. It is then that their self-discipline bears fruit.
Five minutes till half-time. Thousands are waiting. Teck put your pants on. The show must go on!

Hut, two, three, four, chin in, chest out—J. T. sets a fine example of how a "nut" boy should look.

The platoon, making their second appearance in New York since the war, are drilling here before eighty thousand fans that have assembled for the San Francisco-New York professional football game. The drill group made this trip by chartered bus.
The “Big Mommas” from each company get together for a session. Deloach, why the placid look?

GO BETWEENS

This exclusive club embraces the middle-men of the R.O.T.C. Their superiors issue the orders and they take the blame.

The executive sergeants are tapped in the fall and again in the spring. Membership is limited to the sergeant majors and first sergeants of the regiment.

Their duties include the compiling of daily reports and the announcing of the daily orders and details. Meetings are held monthly to discuss military problems and their solution.

OFFICIAL BUSINESS

If it's official, it has to go through Pershing Rifles headquarters. The staff is composed of R.O.T.C. cadets of advanced standing.

The Fourth Regimental Headquarters, Pershing Rifles, is one of the seven dispersed throughout the United States, with its headquarters stationed at the University of Nebraska.

It includes all of the Senior R.O.T.C. Schools in the Southwest. Other active units are located at the University of Tennessee, Louisiana State University, the University of Alabama, and the Georgia School of Technology.

Three members of the 4th Regimental Headquarters staff nutized up for a review of the local Pershing Rifle Company.
Pershing Rifles, formed in 1892 by John J. Pershing, is a national honorary military society organized for the purpose of encouraging, preserving, and developing the highest ideals of the military profession, and to provide appropriate recognition of a degree of military ability among the various Senior Reserve Officer Training Corps units.

In Company C-4, the active campus unit, sophomore cadets who stand out in a competitive drill get their chance to be properly noticed. The Pershing riflemen drill weekly using the old-style drill until they can perform in their sleep. When they become juniors in class they automatically become inactive members.

The "P. R.'s" display their smart military bearing and drilling ability before a Mothers' Day Crowd. The platoon, composed mainly of sophomores, makes many visitors gaze with amazement.

It could be Captain Kidd and his pirates burying one of their fabulous treasures, but it's actually one of the Little Theater's rehearsals for "Where The Cross Is Made".

Burning of the "midnight oil" makes way for the sleepless nights and headaches that go hand in hand with deadlines and the finished product. Slipstick is one of the most prominent technical magazines in the state.

This is one of the little men without whom no publication could exist. An abundance of skill and patience are required for those who would work in the dark room.

The work is over and the 1949 staff can sit back and breathe a sigh of relief for theirs is a feeling of deep satisfaction. In these pages have gone the personalities, philosophies, and ideologies of the men who have produced a college annual. Granted that there are mistakes, but where in human nature is there no mistake?

Appointed to their respective positions on the Senior staff in the Spring of 1948, after a year’s service on the Junior staff, these men immediately began the layout and made their plans accordingly.

The entire job was done by the men on these pages. Theirs was a difficult task as they endeavored to complete the work of an undergraduate as well as produce the Taps.

It’s all over now but the shouting and we hope that you will restrain your shouting as you realize the difficulties under which this work was done. However, here it is. Needless to say we are proud of our accomplishment.
Julien checks copy while Bill Ashley slaves in the background.

"Smitty" has a suggestion but "Money Bags" Wiggins is not so sure. Result—Compromise and everybody's satisfied.

The work of the Feature Editor is done and the twenty beauties, as chosen by the student body, are sent to Cecil B. DeMille, who makes the final decision.
Another grueling feature of producing a college annual is exhibited by Peake as he makes with the graphite. "Six" Tobin and "Cotton" Bailey also seem to be pretty busy.
Ted, J. P., and Ken, three of the unsung heroes of the dark room, put the finishing touches on some of the fine work which the group has turned out this year. The work of these artists of the camera adds much to the worth of "the Book".

OUR YEARBOOK IN THE MAKING

Here is "Wee Willie", the man who decided what and whose pictures would appear in the book. See HIM if you don't like yours.

"Big Mitch" burns the "midnight oil". His are headaches for which there is no remedy other than the finished book.
"The Tiger", truly the voice of the Clemson student body, ends its forty-second year of publication. No other group of students on the campus deserves more praise than do these men. Theirs is a job that never ceases, for as soon as one edition is out, the next is being planned. Monday and Tuesday nights find the staff slavishly preparing copy. Wednesday is for the linotype, Thursday night lends itself to the actual distribution of the paper, and all the rest of the week goes into plans for the next issue.

To no form of censorship by the faculty or administration is the Tiger subjected. This has by no means detracted from the quality of the publication as it may boast of "All American" honors as rated by the National Scholastic Press Association.

STUDENTS THAT MAKE THE TIGER ROAR

Months of work are forgotten by the Tiger staff when they take time out to have their famous banquet. There’s Prof. John D. Lane, advisor, summing up past events. The Agrarian

PLOW-BOY JOURNAL

Published by students in the School of Agriculture, the "Agrarian" is recognized as the oldest technical magazines on the campus. It also has the largest circulation of all campus magazines.

The content of the "Agrarian" consists mainly of technical ideas and theories of the rapidly advancing field of agriculture. Features of local interest are also included.

All the work of publication is done by the students, and staff members are trained by the preceding staff.

Bobbin and Beaker

SPINNING A YARN

Ten years ago the Iota Chapter of the Phi Psi fraternity started something it couldn't finish, so it has been going on ever since—the "Bobbin and Beaker". The "Bobbin and Beaker" is the official journal of the Textile School. The purpose of the magazine is to integrate the textile industry, the textile school, and the textile student.

Its contributors include men of industry as well as students, with the result that its articles are both informative and up to date.

The Bobbin and Beaker, prize publication of the Textile School, in the making. Too bad there's only one typewriter with all those willing hands available.
Two hot typists, Beatty and Williams, pound out copy for the "Slipstick". Shelor inspects a former issue.

The Slipstick

DESIGN IN PROGRESS

One of the best technical magazines in the state of South Carolina is the "Slipstick", official publication of the School of Engineering at Clemson.

Edited by a group of senior students, the magazine contains technical material, and items of news and features of local interest.

The "Slipstick" is edited four times each school year and the entire publication is done by members of the student staff. An advisory board composed of faculty members is always at hand to offer helpful hints and advice.
"The Minaret Bulletin", sponsored by the Minarets fraternity, is the bimonthly publication of the Architectural Department. Its staff may include any student from that department with the exception that the editor be a member of the Minarets.

Through articles contributed by leading architects and builders, students and alumni are enlightened in the different aspects of the trade.

Published annually by the Clemson Chapter of Blue Key Directory. The directory contains a roster of the students, giving class, major course, college address, and home address. Faculty and administrative officials are also listed with information as to their positions and formal education background.

A roster of each cadet company and a list of all recognized clubs, fraternities, and publications are also included.

Oh, brother, what a spread—of Directories, that is! The nice thing about getting something into print is that you can always admire it later.

Published annually by a student committee, which is appointed by the "y" cabinet, the YMCA Handbook has proved itself to be a valuable source of information for those who would acquaint themselves with the activities of Clemson.

The handbook, distributed at the beginning of each school year is published primarily for the purpose of informing freshmen with a knowledge of campus activities, but is utilized by upperclassmen and faculty as well.

McLaurin, Foster, Sheally, Wiggins, MacGregor, and R. O. are sitting on top of the world. Their work is done and they can congratulate each other now.
Gamma Alpha Mu

1949 marks the sixteenth of Gamma Alpha Mu’s activity on the Clemson campus. Since its membership is based primarily on a man’s literary ability, you will find among its members many who are active workers on the student publications.

Any member of Gamma Alpha Mu is unquestionably a writer or poet of some merit, for one must submit a sample of his work to Octavus Roy Cohen for judgment.

It is through the efforts of Professor John D. Lane that this reward for talented writers exists.

Who knows, one of these men might someday write a best-seller?

The Tau Kappa Alpha, a national honorary leadership and forensic society, was founded in Indianapolis, Indiana, on May 18, 1908, for the purpose of inspiring interest in forensics among honor students.

It now has 105 active chapters of which the Clemson chapter is the latest.

The local charter was organized in 1948 by seven charter members. To become a member of the Tau Kappa Alpha, a student must rank in the upper thirty-five per cent of his class scholastically and have completed at least two years of college. In addition to this, the student must have for two years participated creditably in the forensic programs of the college.

Must be strong steel to hold up all those personalities. It’ll hold, though, until that “middle man” Peebles gets tired.

The highest honor bestowed upon a Thespian here at Clemson is membership in the Alpha Psi Omega, the collegiate dramatic fraternity.

As membership requirements involve a large amount of theatrical work, such as acting, directing, or producing, you may be certain that a member of the Kappa Psi cast is a thoroughly seasoned trouper.
A growing and deserving organization on the Clemson campus is the Clemson Little Theater. Membership is open to all who are sincerely interested and have the native ability for this type of activity.

The primary purpose of the Little Theater is to utilize known ability and to uncover hidden talent in the presentation of light drama and comedy for the entertainment and enjoyment of the students of Clemson and the residents of the surrounding community.

Clemson's oldest organization, The Calhoun Forensic Society, had its beginning way back in 1894. Many of our state politicians learned the rudiments of public speaking through the efforts of this organization. Debating is still the primary purpose of the society and its influence on the lives of Clemson men is profound.

Debates are conducted throughout the year and are attended by community folk as well as students, both of whom come away with the feeling of an evening well spent.

From bull sessions like this come some of the best ideas for work in forensics. It’s one of the most important phases of college life.
Musical
Distinguished Conductor Robert Shaw takes a well-deserved bow after completing an outstanding performance. His genius in coaxing the best of a chorus is evident.

Robert Shaw, the high priest of choral art, whose specialties are teaching amateurs how to sing together and achieving artistry comparable to Toscanini's.

The Robert Shaw Chorale in action, vibrating the hall with resounding harmony, the result of thoroughness and painstaking care for every detail.

Eugene Ormandy, conductor of the Philadelphia Symphony Orchestra. The Orchestra, consisting of 100 pieces, is considered one of the best in the world.
THE ARTISTS

BRILLIANT STARS AT THEIR BEST

Deep within every person, no matter what type he may profess to be, is the love of music. To give students the opportunity to enjoy music at its best, the Clemson Concert Series each year selects top-ranking artists to perform.

Among the great artists chosen to appear this year were such luminaries as Rise Stevens, glamorous opera and motion picture star; the Robert Shaw Chorale; Eugene Ormandy conducting the Philadelphia Symphony Orchestra; the First Piano Quartet; and Jascha Heifetz and his violin.

Everyone, including the college and high school students, professors and their wives, and people from the surrounding localities, flocks to the concerts. Who could resist the sight of Rise Stevens singing selections from "Carmen" or the melodious strains of the First Piano Quartet?

For the students especially, the concerts give relief from the daily grind of studying. After a few hours spent listening to music that is "out of this world", they are ready to plough back into the textbooks.

The Concert Series was perfectly arranged for last year and we expect equally fine entertainment next season.

The First Piano Quartet discuss a score of music which will be included in their program. The very best in music is procured for Clemson's concert series and they rank high on the list.

Rise Stevens, lovely opera and motion picture star, came to town and Clemson's concert attendance reached an all-time high.

Heifetz, recognized as one of the masters of the violin, performed at Clemson last Spring. His appearance was favored with enthusiasm.
Members review their gallery of stars and highlights of seasons gone by.

Organized for the purpose of furthering music and musical organizations on the campus is Mu Beta Psi. Membership is limited to men who have served for two or more years in the Glee Club, Concert Band, or Military Band.

Mu Beta Psi has been of great help to the Concert Series and other musical presentations on the campus by lending its members as ushers and for other necessary services.

Freeman demonstrates the S. O. P. of a regular Mu Beta Psi meeting while his contemporaries look on. By the way, how did El Waite get in on this? Is it possible that he's full of music, too?
Beta Psi
And the concert was enjoyed by all.

Sing, sing, sing! That’s the motto of the Glee Club, and they stick to it. If you haven’t the courage to step out on the stage and exercise your vocal chords alone, join the crowd and combine in mighty harmony.

During the school year the students look forward to the concerts presented by the Glee Club. Shortly before the Christmas holidays the Glee Club produces its annual Christmas pageant, which is enjoyed by everyone in the community.

As the years go by, the Glee Club hopes to gain in experience and technique until it can rival any Glee Club in the South.

The curtain ascends and the audience anxiously awaits an evening of musical enjoyment.

Keep going, men. Don’t forget that “practice makes perfect” or something like that.
SOUTH'S SMOOHEST

The Jungaleers

Come on, let's dance, for the Jungaleers are tuned up and ready to provide their listeners with an evening of pleasure. Just call for what you want and they give out with it. Sweet and low, hot and fast, it's all there, tailor made and ready for your listening pleasure.

Membership in The Jungaleers is based on the individual's skill as a musician alone, and auditions are frequently given throughout the school year for those who are interested.

Possessing its own instruments and transportation, the orchestra accepts many invitations and offers to perform throughout the South where they are well known and recognized for their musical ability.

Here's why sixth barracks occupants can't sleep their afternoon "labs" away. They produce any type of music you want—sweet, hot, or lowdown.
Since its organization in 1941, the Brigadiers, one of two dance bands at Clemson, has made quite a name for itself. Playing for off-campus activities, this orchestra has come to be known as one of the best and smoothest college bands in the South.

Musical talent and ability are prerequisites for entrance; those students possessing both, by proof of audition, are invited to join.

Self-sufficiency has been established and the orchestra now owns all of its own instruments, as well as its own touring bus, "Jezebel," against which no words of violence may be uttered.

Mighty fine dance, and all that glorious music came from none other than our own Brigadiers. This is where they come into their own.
Diversities
Clemson's local flyboys pose for a publicity shot. It's rumored they spend more time in the air than in the classroom.

These men not only fly and service their planes; they also build them. Mighty fine organization for interested parties.

Wherever men congregate, some are bound to be interested in aviation. Such is the case at Clemson. Last year the Aero Club was organized for the purpose of providing students flying time at a price within their reach. At present the club has twenty members. New members don't even have to be able to fly—that's another purpose of the club. They'll learn!

Meetings are held every two weeks in a room at the airport. The boys buy a share in a plane together. Cross-country runs and short hops are made during good flying weather. Each man is allowed approximately one hour on scheduled days. During the summer another group of men band together and rent a plane for a few days at the time. The club observes its own safety regulations.

ON THE AIR

Radio Club

Where there's an aerial there's a "ham". Clemson's Radio Club was in operation before the war, but was temporarily disbanded along with many other activities. In 1946, J. C. Martin, of the Electrical Engineering Department, again formed the club; and it's membership has grown from ten to thirty.

The only requirement to membership is an interest in amateur radio work with an objective of acquiring an amateur license. The club boasts of five licensed members. The "hams" have their own radio room in the sixth barracks which they have recently overhauled. The radio room harbors the Clemson College radio station, licensed as W 4 ETP.

Every other Monday evening the members meet in the code room to practice taking code. As soon as arrangements can be made, the club plans to join the South Carolina Emergency network.

"You can cut off, Frank, the mike's dead." One of the newer campus organizations, the Clemson College Student Forum of the Air, has as its purpose broadcasting news and views of the schools, the departments, the extension service, and the experiment station.

The forum was born early in the first semester of the year in the mind of Frank "Skipper" Seddon. It has a hard-working membership which is limited to fifteen-odd for efficiency purposes, and which is composed of administrative officials, program directors, script writers, and narrators.

Turn the radio on, get that station, quick! It's the radio forum; they're on the air, bringing you the voice of Clemson. If you haven't heard the latest you'll hear it now. They specialize in anything from peanuts to pink elephants.

Square and Compass

Clemson has many societies and organizations on her campus, but one of the type of the Square and Compass is always welcome. The Square and Compass has been unofficially active for about a year and one-half. It became affiliated with the college officially in September, 1948.

The object of the organization is to promote better understanding among the Clemson students who are Master Masons. The degree of Master Mason is the requirement to membership.

During the past two years the organization has sponsored Christmas gifts for the children at the Shriners' hospital in Greenville, S. C.

Clemson has the reputation for producing the best college dances in the South and these are the men responsible. Seven members of the Senior staff and fourteen members of the Junior staff get together and another dance weekend is marked down as a success. The senior members choose the orchestras, take complete charge of the decorations, publicity, and other executive details.

A non-profit organization, the C. D. A., works solely to promote the social activities of the students.

Bands engaged in the past are Elliot Lawrence, Sam Donahue, Jimmy Lunceford, and many other top-name favorites.
"Stud" Klettner, Ray Davenport, and "The All American Boy" Zeigler make plans for mid-winters. A difficult task it is that the C. D. A. is confronted with, for just one mistake in the choosing of bands and the whole student body will be on their necks.

What's wrong with this picture? Nobody's dancing! It's that band that plays the sweetest music this side of Greenville, Elliot Lawrence. Just listen!

You can't crash the gate with such sterling characters as McLeod and McLaurin for ticket men. Hand over that ticket, Mac!
People are funny! See? Another wild dance weekend, and with no holds barred, it seems. In that crowd you could dance half the night with the wrong girl and never know it.

IT ONLY HAPPENS WHEN I DANCE WITH YOU

Stop the music! Al Robinson has a lady on the platform. Those two kids below must be judging beauties again. Anywhere you find a blonde, they pop up, too.

GOOD DANCES . . .

Sam Donahue and the "gang" put on a little exhibition of musical splendor before an overwhelmed audience at Homecoming.

Dukes and his "lemme" strike a pretty pose for the cameraman while "Bull" Cagle looks on.

It's 1948 Homecoming with the music being furnished by Sam Donahue and his orchestra. Some choose to dance while others try to make a nickel on the sidelines. Mighty fine music and a tremendous time was had by all. Do you see your "old lady"? Look, again, he's right out in the middle, and say, is that your date he's dancing with?
A group of weary dancers taking a few minutes of much-needed relaxation while they become better acquainted with their dates.

Some of the biggest name bands in the business are engaged for Clemson dances. This time it's Sam Donahue and his orchestra.

The "Colonel" is just overflowing with contentment, and who wouldn't with that good looking gal he's dancing with?

CLEMSON FOOTBALL HONOR MEN

Every undefeated football team has a large array of individual stars. The 1948 Tigers were not exceptions.

Heading the list was Robert Gage who was chosen on the INS All American and All South teams. Gage was also chosen as the most valuable player in the south and the most outstanding player in the Gator Bowl. Frank Gillespie along with Gage was named to the All Southern team. Ray Mathews brought further laurels to Clemson by winning the Southern Conference scoring crown. The honors were completed with Bob Martin winning the Jacobs trophy as the best blocker in the state.

Gage, Gillespie, Cone, Moore, Mathews, Prince and Salisbury also were named to the All State team.

Calvert finds a wide open hole and goes over tackle to set up a touch-down for the Tigers.

Fred Cone stopped for a three-yard gain as he hits the center of the line, but just a few plays later Carol Cox receives a lateral from "Pineapple" and races forty yards for a tally.

The Tigers got off to a good start by crushing a game P. C. eleven. The Howardmen were completely in control throughout the game as the Blue Hose were never able to penetrate beyond the Clemson twenty-five yard line. Fred Cone led the Bengal scoring parade with two touch-downs. Other six-pointers were added by Mathews, Windham, Williams, Rushton, and Carol Cox. The game served as experience for the reserves as Coach Howard cleared the entire bench.

Brodie braces to stop a "blue hoseman" for no gain. A fumble a few plays later gave Clemson the ball and another touchdown march began.
The Tigers and the Wolf Pack put on one of the most thrilling spectacles ever witnessed at Tigertown. The feature of the game was a ninety-yard punt return by Bobby Gage. Gage received the punt on the Clemson ten-yard line, faked to Cone, picked up a host of blockers and literally outran the State Secondary. The Tiger defense refused to bulge throughout the game. In the waning minutes of the game Clemson took the ball on downs on the six-inch line.

Hudson takes a pass from Gage that is good for ten yards and a first down.

The Wolf Pack overtakes a Tiger back who otherwise would have been in the clear for a Clemson touchdown. A few plays later State kicked and Gage ran a sensational 90 yards for the game's only score.

Thompson sets up a State man as Gillespie closes in to make the tackle. Hudson stands by to lend a hand.
Mississippi is again held for no gain as Phil Prince latches on to the famed "Shorty" McWilliams. The Tiger backfield stands ready for action.

Clemson's mighty defense goes into action and favored Mississippi once again bites the dust.

An underdog Clemson team that was supposed to lose by two touchdowns stopped the famed Shorty McWilliams cold and downed a favored State eleven. Tom Salisbury scored the first Bengal touchdown by blocking a McWilliams's punt. The other scores came on passes from Gage to Poulos and Mathews, the latter covering sixty yards. Jack Miller added the three extra points. State's only score came by virtue of a recovered fumble and a pass.

It's Bobby Williams around end and it looks like he's in the clear and he is for a beautiful run of thirty yards. Clemson had a bag of tricks that day and turned them all loose on the formidable State.
SUCCESSFUL BIG THURSDAY

SOUTH CAROLINA ........................................... 7 0 0 0—7
CLEMSON .................................................. 0 0 0 13—13

The Tigers had to come from behind to defeat the Gamecocks in the annual State Fair game. Carolina jumped to an early lead when Hagan passed to Wilson for a tally. Carol Cox scored first for the Tigers on a lateral from Cone. However, the payoff came with only four minutes left to play. Phil Prince blocked a Gamecock punt and Oscar Thompson ran it over for a touchdown. The Miller combination added the extra point and that was the ball game.

Another reverse and Mathews sweeps end for thirty-five yards. The Gamecocks just couldn’t tell who had the ball as Clemson’s deceptive single wing once again came through.

“Schoolboy” Gage’s stretch for yardage might be termed a flying Tiger in action. Good for a first down and mighty Clemson moves on.

Ragin’ Ray shoves off with the whole Carolina team in tow. “Big Thursday” definitely a day for Mathews.
The "Fiend" Thompson pulls Gage's pass right out of the air and races for a touchdown. Luke Deanhardt supplies the blocking.

Where you goin', fellow? This is just another example of the impregnancy of Clemson's forward wall. Here the Eagles were forced to take to the air.

Bobby Gage led the Bengals to a thrilling win over the Eagles at Boston. Gage passed for three touchdowns and set up another with a brilliant interception. The most spectacular play of the night was a fifty yard pass from Gage to Mathews. Boston College fought back in the last quarter as Songhin passed for two touchdowns. The Tiger line play was the best of the season as the Eagle ground attack failed to click.

Gage takes a reverse to Mathews and streaks around end for one of the longest gains of the night. Next play: pass, touchdown.

A game Purple Hurricane went down before the powerful Clemson onslaught in Memorial stadium. The game was featured by long runs and hard blocking and tackling. The Furman eleven was unable to penetrate the strong Tiger defense on the ground or through the air. Clemson rolled up 448 yards rushing as the rumors of a bowl bid filled the air. Mathews was the leading scorer with three touchdowns. Cone, Poulos and Cox added the other six-pointers.

The stage was set for the most exciting game in the Southern Conference when the Tigers met the Deacons in Winston-Salem. The Tigers scored first on a long pass from Gage to Mathews. Clemson celebrated homecoming by blasting a hapless Dequesne eleven. The feature of the game was a eighty-yard punt return by Ray Mathews. Mathews also passed to Thompson in a play that covered seventy yards. The victory almost assured the Tigers of a bowl bid. The other touchdowns were added by Clanton, Calvert, Hendley, and Mathews. In a ceremony after the game Coach Howard was presented a new car by Clemson followers.

Another touchdown for the Tigers. Jackie Calvert is carrying the mail this time.

With beautiful interference, Dick Hendley plunges over for a Tiger score.

Get him, Tom! A Duke tries to get away but is just before being pounced on by Gene Moore, Tom Salisbury, and Dick Hendley. A brilliant homecoming for the many fans of "Tigertown".
Hendley plunges through for a first down. Clemson just couldn’t get going that day and Auburn was looking for an upset.

“Rompin’ Robert” Gage throws a strangle-hold on an Auburn back. As you can see by the Duke’s white (?) jersey, this was bad weather for football.

An inspired Auburn team that was a three touchdown underdog completely dominated the game for three and one-half quarters. The Howardmen came to life in the last quarter as Mathews sparked a drive. A Mathews to Thompson pass set up the touchdown and Mathews scored a few plays later. Jack Miller kicked the extra point that spelled the difference. The game was played in a sea of mud that slowed down both teams’ attack.

Another fumble, but Clemson recovers. This was the game that nearly cost the “Howardmen” the Southern Conference title.
Ray Mathews led the Tigers to the Southern Conference championship by scoring three touchdowns against a stubborn Citadel eleven. Mathews clinched individual conference scoring honors with a brilliant sixty-yard scoring jaunt. Jack Miller kicked his twenty-eighth extra point out of thirty-five attempts. The Tigers already selected to play against Missouri in the Gator Bowl used only power plays as numerous scouts were on hand.

Cone hits the center of The Citadel line for four yards. Missouri spotters in the stands kept Clemson's plays limited to line bucks and straight passes.

The Miller boys do it again. Without them Clemson's football history would not be complete.

A bowl bid makes any team’s season complete, win or lose. It was only fitting that the undefeated Tigers received a bid to play The University of Missouri in the Gator Bowl at Jacksonville, Florida.

The Tiger superiority began to show in the first period when Cone smashed over for the initial score of the game. Late in the same period Clemson marched 61 yards for another score. Again it was Cone powering his way over for the touchdown. Missouri came roaring back in the second period to score two touchdowns and tie the game up again.

The Tigers added another tally in the third period on a beautiful pass from Gage to Poulos. The Miller com-

Bowl combination added their third extra point of the day. Missouri scored a safety late in the third quarter when Gage's pass was grounded in the end zone. Jack Miller added the final Bengal score with a beautiful 22-yard field goal from a difficult angle. Missouri fought back with another tally, but Clemson still led 24-23 and the game ended a few plays later. Thus the Tigers ended a successful season as one of the two undefeated untied powers in the nation.

As a fitting tribute to his outstanding performance and expert signal calling, Bobby Gage was awarded the Burkhalter Memorial trophy as the most outstanding player of the game.

SOME SIDE LIGHTS OF FOOTBALL

Half-time festivities of the Gator Bowl. The festivities were featured by the arrival of the Queen and her court on a float. Seventeen bands paraded during the half and the Tiger platoon also gave a sterling performance.
The 1949 Tiger courtmen lacked the reserves that would have won many of the games that were lost by narrow margins. Fate dealt the Bengals another blow when Captain June Pruitt was injured early in the season and forced him to miss six games.

Clemson dropped the first three games before finding the victory trail against Wofford 49-44. The Tigers won only two games out of the next five, defeating The Citadel 65-39 and Wofford 61-59 in a thriller. Bolstered by several members of the football team the Bengals dropped a close game to Furman and the following week defeated a favored Wake Forest five 59-57. The McFaddenmen next dropped a pair to Carolina and a single contest to Davidson.

The Tigers bounced back into the win column with a 63-44 victory over The Citadel.

As this book goes to press the Tigers have seven games remaining on the schedule.

The Tigers started the 1948 season handicapped by the loss of many key players from the 1947 Southern Championship team. Despite lack of experience the Bengals enjoyed a better than average season.

After dropping six games out of the first eight, Clemson bounced back in the win column and wound up with twelve wins against ten losses and one tie. The brightest part of the season was the annual series with Carolina during which the Tigers won three out of four.

Captain Frank Gillespie was chosen as one of the eighteen most valuable players in the Southern Conference. Gillespie along with the bulk of the team will return next season.

OVER THE TIGER TRACK

With a large squad returning the Tigers appeared to be as strong as any team in the Southern Conference. The Bengals lived up to pre-season expectations by winning all of the dual meets but one.

Clemson opened the season by rolling over P. C. Highlighting the victory was the impressive time of 2:3.7 turned in by Pulkinen in the 880-yard dash. The Tigers followed up with wins over Furman and Wofford. The Tigers could not stop Carolina's Rucks as he set two track marks in leading the Gamecocks to victory. The following week the Tigers downed a stubborn team from Davidson. The annual State Meet was almost identical with that of last year as Carolina nosed out Clemson 60 7/24 to 53 3/8.

The team did not participate in the Southern Conference tournament as a unit. Jerry Brown won the conference title in the pole vault.

Coach McFadden gives a few pointers to Townsend and Thompson before practice.

Southern Conference champion Jerry Brown sets his sights for twelve feet and makes it.

Oh, my aching back. It's a hard uphill grind but Boyd has the lead as three Furman runners try to catch up.

The Tigers seem to have the situation well in hand with four men out in front. The finish line is a long way from here.
Here are the real athletes of Clemson. These men are the active participants of at least one of the major sports. Included in this roster of major sports are football, baseball, track, and basketball. Proud indeed are the men who wear the orange "C" for they have earned this right.

Not only have they proved superiority on the individual fields of athletics but they have undergone an initiation that is unparalleled in "all out roughness" at Clemson.

Many interesting and moneypaying projects have been conducted by the Block "C" at Clemson, which include movies of games, intramural boxing bouts, etc.

The credit goes to the Clemson spirit and the excellent coaching staff now located on the campus. Superior athletic accomplishments are the best way of advertising a college's name and this past year's "Gator Bowl" champions have indeed done their part in spreading the name of Clemson throughout the nation.
someone's going to get his hat knocked over the fence, and it's liable to still be under it.

Big bull session in the barracks. Enough of this chit-chat on nuclear physics, men.

We don't want any today! It's an old Clemson custom. Mathews and Martin repay a social call on the Westmorelands. Coming or going, it makes a good shot just the same.
Minor Sports
The 1948 Tiger links team enjoyed another successful season under the capable guidance of Coach Bob Jones. The only two defeats of the season were inflicted by South Carolina and The Citadel. This stopped a brilliant winning streak of thirty-seven consecutive matches. The Tigers quickly resumed winning and later avenged these defeats. The Bengals closed the season with a 14 to 4 win over South Carolina after having defeated The Citadel 13½ to 5½. Clemson thus wound up a brilliant season with a record of seventeen wins against only two losses.

The prospects for next year are bright as the majority of this year's team will return.

All you have to do is keep your eye on the ball, swing, and follow through. Stan Halliday demonstrates.

Selfridge lines up the ball as Halliday and Delk stand by. Practice makes perfect.

A long putt heads for the cup as the caddy holds the pin. The ball just stopped short.

Bell, Koophman, Selfridge, Delk, Chapman, Halliday, and Connell practice the fundamentals under the supervision of Coach Jones.
TENNIS TEAM

The 1948 tennis team had a record of nine wins against seven defeats. Paced by several veteran players from last year's squad the Tigers won the first five starts before dropping a 4-3 match to the College of Charleston. After dropping two close matches the Bengals bounced back to defeat a favored Wake Forest team 8 to 1.

The Tigers held other victories over Erskine, Furman, Wofford, The Citadel, and Newberry. Defeats were dealt the Bengals by Emory, South Carolina, Rollins, Stetson, and The University of Florida.

The prospects for next season have been lowered by the loss of several key players. However, with the addition of several new men Coach Hoke Sloan should field a good squad.

Coach Hoke Sloan and the team just before the big match with Furman, Walker, McLeod, Coach Sloan, Merritt, Hand, Littlejohn.

"Babe" Murray gets ready to return a hot one during a practice match. Hampered by the inadequate court space the Tigers were often forced to shorten practice sessions.
RIFLE TEAM

Commence firing! These words signify that a shoulder to shoulder rifle match is about to begin. The Tiger marksmen have won two out of the three matches that have been fired. The team is composed of many of last year's members and is coached by Captains P. M. Anderson and G. E. Coakley assisted by Sergeant E. L. Cox. With this fine array of coaches and experience the Tigers should win the majority of the remaining matches.

Practice makes perfect. Here the team gets in a practice session before the match with Georgia.

SWIMMING TEAM

The 1949 Tiger tankmen face a tough schedule with a team that is handicapped by inexperience. With the majority of last year's team lost by graduation the Tigers fell before a strong Georgia team in the opening meet of the season. An experienced Emory team handed the Bengals another setback the following week.

Meets are scheduled with teams from the state later on and with the experience gained the Tigers will be strong favorites to take the state title.

Shadwell takes a dip as the Tiger swimmers prep for the meet with the Gamecocks.
THE MINOR “C” CLUB

The minor "C" club consist of men who have made letters in one or more of the minor sports. Included in this category are golf, tennis, swimming, cheerleading and the rifle team. The minor "C" club was first organized to help further the interest in the minor sports at Clemson. Since then it has grown into a major organization with some of Clemson's greatest athletes having passed through its roster.

Pledges assume the position while Chuck Chalker directs movements with his little finger. Note the dark glasses. Can't hit a man wearing glasses.

"Aw, go paddle your canoe!" During the pledging season scenes like this are fairly common. No offering to the gods is sufficient to prevent several good licks.

"A Clemson man needs no introduction," especially when he's wearing a "C" on his sweater, and try to catch a fellow who owns one not wearing it, as you can plainly see. Chalker's different.
Two points. Intramural basketball hits its peak with the annual tournament. The winners get keys.

Everybody ready. There's nothing like a good game of volleyball for recreation.

Ready hip, one two. Riggs field hums with activity as the various teams get ready for action; here the boys get ready for a pass play.

What goes up must come down. Then comes the scramble as the boys fight for the ball.
SPORTS

IT'S ANYBODY'S GAME

Under the sponsorship of the Y. M. C. A. the students of Clemson are allowed to compete in athletics under the intramural program. Teams are formed from the pre-fabs and the various barracks to compete in touch football, basketball, tennis, volleyball and softball.

The championships of each sport are decided at the end of each season when the playoffs are staged. Keys are awarded to the members of each winning team.

Intramural sports provide an opportunity for the students to engage in physical activity outside the classrooms. The program is under the constant supervision of Mr. Roy Cooper of the "Y" who has donated his time and effort toward its advancement.

Throw that ball. A man breaks into the clear on a pass play. The play was good for twenty yards. Here the rules are tougher as the play is dead when the man with the ball is touched.

Slide brother, slide. The runner just beats the ball to the plate. Softball is one of the favorite intramural sports at Clemson, and many fine teams are entered from the various barracks.
ON THE SPIRITUAL SIDE . .

Here the members of the Canterbury Club enjoy one of their many socials. First comes an appetizing speaker, followed by a bull session and refreshments.

The Rev. E. Wannamaker Hardin greets his younger members after a Sunday morning sermon.

Bob Wiggins, "Root" Rayle, and L. B. Smith enjoy a bull session during a "Y" banquet.

Everyone, Freshmen and Ladies, seem to be enjoying themselves regardless of the bald heads at the Baptist freshmen reception.
A typical Sunday morning scene. Students pause to wait for traffic as they make their way from the Methodist Church, which is in the background, to the Post Office to check the mail. Then it's on to the mess hall for chow.

There is no trouble in telling the altos from the sopranos in this fine group of music makers, the Presbyterian Church Choir.

It seems that the lady on the right is a bit camera shy; however, Father Donelson takes it calmly as he talks to some of his parishioners after Mass.

.. WITH CHRISTIAN BROTHERHOOD
Here they are! The real wheels of the "Y" . . . the givers of show passes and sound advice. This group hears more student troubles than "Mr. Anthony" for it is under the able guidance of these, that the "Y" moves on to a greater position in the every day life of the Clemson students.
STUDENT "Y" LEADERS

Education is not all that is offered at Clemson, for it is in groups such as the "Y" Cabinet that students learn to live in harmony with their fellowman. The "Y" Cabinet is the student governing body of the many activities of the Y. M. C. A. and with the help of "Holtzy", "Coop" and others, a broad program reaching from deputation trips to vespers is sponsored by the group.

Churches
The Baptist Student Union coordinates the numerous activities of the
largest church organization at Clemson. The number of Baptist students at
the present time now numbers somewhere around thirteen hundred men. To
"keep tab" on so many students must certainly be difficult, but the Rev. A.
Harold Cole, minister, with the assistance of J. L. Spangenberg, minister to
students and chairman of student programs, somehow manage to do a
wonderful job in this department.

The services of the Baptist Church, which includes Sunday school, training
union, morning watch, prayer meets, worship, and special services such as the
Union Sunrise Thanksgiving, the Candelighting at Christmas, and The Lord's
Supper at Easter, produce the desired effect in the spiritual growth of students.
At the same time many interesting and informative programs are presented
at Wednesday night meetings of the B. S. U., which develop the personalities
and social sides of the student.
Representing the Episcopal students at Clemson is the Canterbury Club of the Holy Trinity Episcopal Church. Under the inspiring guidance of the Rev. Emmett Gribbin, who is winding up his first year at Clemson, the club has made much progress in its two-fold purpose of advancing fellowship and spiritual feeling and learning to its members. A member of the club takes an active part in the functions of the State Association. Plans are being made to stage the '49 statewide Canterbury Convention here at Clemson at the time of this writing.

A self-supporting organization, by virtue of the sale of Christmas cards which are designed, printed, and sold by members, is the Canterbury Club of Clemson.

Religion, educational, and entertaining movies are shown at various meetings of the club. Interesting and informative speakers are invited in to present programs of interest and enjoyment. Supper meetings and informal dances also find their places on the agenda of the club.
The Hillel-Brandeis Club owes its existence to a group which was active before the war called the Brandeis Club. This organization is composed of those Jewish students who would gather to further spiritual advancement, social achievement, and all-round fellowship of the club as a whole. Like so many of Clemson's clubs and fraternities, Hillel-Brandeis was inactive during the war, but in 1946 was reorganized and was soon operating at full steam.

Having chapters throughout the country, the Hillel foundation is located on and recognized by the leading campuses of the nation.

Many interesting programs are presented throughout the year in which interesting speakers are invited, current events are discussed and debated upon, quiz programs of various types are given, and many other programs of student interest are presented.

Like all other religious clubs Hillel-Brandeis meets on each Wednesday night. Lacking a chapel the meetings are conducted in the "Y" clubroom.
The Lutheran Students Association deserves a great deal of credit for its active participation as a member of the church groups here at Clemson. Lacking a chapel, these men meet in the Barracks' Chapel on each Wednesday night and The Rev. B. M. Clark from Walhalla, advisor of the club, holds regular services on each second and fourth Sundays at 9:00 a.m. in club room number one of the Y. M. C. A.

The primary motive of the L. S. A. is the development of fellowship among students. This fellowship is furthered by the interesting and informative programs presented in the form of interesting speakers, informal discussions of current topics of interest and their relation to religion and everyday life, and social functions of various types.

One of the foremost aims of the club is the construction of a chapel here on the Clemson campus.

NEWMAN CLUB

Meeting each night in the number one clubroom of the Y. M. C. A. we find the Newman Club. The Newman Club is the religious organization of the Catholic students on the Clemson campus. The club was first organized at Clemson in 1940 by Father T. F. Tierney. All Catholic students are invited to join and a large percentage are active members and take part in the activities of the Newman Club. Members also participate in the work of the choir and the athletic teams sponsored by the club.

The primary goals of the Newman Club are to promote the spiritual life of the student, to develop fellowship among members, and to aid in the social development of each individual student. Under the direction of Rev. John M. Donelon much has been achieved in following the ideals of these important goals.

Many interesting programs are presented throughout the year to further interest and attendance for the regular meetings of the Newman Club.
PRESBYTERIAN STUDENTS ASSOCIATION

One of the more active church organizations on the campus is the P. S. A. To those who have trouble with abbreviations, P. S. A. stands for the Presbyterian Student Association. Here, under the guidance of The Rev. S. J. L. Crouch, a link is formed between the students and the church which is invaluable in later life.

The primary purpose of this organization are spiritual growth and social development. The church, religious programs, and the spiritual atmosphere furnish the spiritual growth desired. Friendly fellowship, social functions, including girls from nearby schools and all-round "bull sessions", help build personalities, for which Clemson men have always been noted.

Many interesting programs in the form of world-traveled speakers, forums, round table discussions, and supper meetings, help to increase membership and attendance. The informal air of the club produces an opportunity for members to form life-long attachments and friendships which may contribute to the enrichment of their entire lives.

FLOYD F. GRIFFIN
President
The Wesley Foundation furnishes an opportunity for Methodist students to work together in Christian fellowship. All Methodist students on the campus are members and are urged to attend meetings and social functions of the organization. All activities are under the direction of the minister, the Rev. E. W. Hardin.

One of the largest church groups on the campus, The Wesley Foundation continually has a large turnout of students and local members of the Methodist faith.

The chief purposes of the Wesley Foundation are to furnish the students an opportunity to serve others and to work together in fellowship and friendship.

Many interesting programs are presented throughout the year. As in the other church groups, speakers are invited in, group forums are conducted, quiz programs are presented, and many other types of programs are offered for the general information and entertainment of the members.

Officers: R. F. WIGGINS, President; F. L. LANCASTER, Vice-President; W. T. ASHLEY, Vice-President; L. A. CARSON, Vice-President; E. H. PITTMAN, Secretary; A. J. BANKS, Treasurer; J. G. LESLEY, Social Chairman; P. C. DAVIS, Editor of "Retreat Bugle"; H. N. BLACK, Publicity Chairman; J. A. NEVES, Chairman of World Service; T. L. MONROE, Deputation Chairman.
Dave Coakley can add another Sunday to his church attendance. It could be Giles Lewis bringing up the rear. Don't shove, Taylor, there'll be room for you, too!

Oh, these proud fathers! They never miss a chance to show off their progeny. Well, you can't blame them.

A FEW OF THE REGULAR ATTENDERS

Mr. and Mrs. Jim Hunter, of Clemson's young set, pause for a moment on their way home from church. Run along now.

Eat, drink, and be merry! Only a rat would have time to squander so blissfully on his social obligations. Love that hair!

In Dyestuffs
monotony becomes a virtue

In the manufacture of a Du Pont dye, repetition, even to the point of monotony, becomes a virtue. For Du Pont chemists insist that each lot be like its predecessor.

This involves constant analysis of ingredients, rigid control of manufacturing processes and testing of the finished product each time that dye is produced.

The resulting high standard of uniformity justifies the extra effort. Dyers know they can depend on Du Pont Ayes to give dependable performance at all times. E. I. du Pont de Nemours & Co. (Inc.), Dyestuffs Division, Wilmington 98, Delaware.

We believe in Schoolin' and Clemson!

At SONOCO many people are still going to school because it is our policy to try to keep training our men and women for more advancement.

Each week many of our people attend courses in Foremanship, in Mechanical Design, and in other subjects that help them up the ladder of success.

We believe in education because the more knowledge you acquire the better equipped you are to face the future, and we are interested in your school because we have many Clemson graduates working with us.

We should like to offer you our sincerest congratulations on your graduation, and wish you happiness and success in your chosen field.

We old “Forty-niners” just prospected around until we hit on a '49 Taps. That’s easily said, but it’s not quite the whole story. Instead of pick-axes and shovels, we worked with typewriters and drawing instruments. In the end it entailed just as much effort, but the worst is over and we are happy to present the '49 Taps. Hope you like it.

In conclusion, the staff of Taps wishes to acknowledge the contributions of several persons through whose efforts this book profited considerably. They are the men behind the scenes who, although their hands may not be apparent, offered of their advice and skill freely.

The staff wishes to extend its appreciation to John Califf, who generously surrendered his time whenever called upon for assistance; Hamilton Hill, to whom we are indebted for business advice; Bob Davis of The R. L. Bryan Company, for his hearty cooperation in the printing of the book; Walt Dargan, of the Photo Process Company, for the excellent photo-processing and engraving which distinguishes Taps; and Marion Ware of Gaspar-Ware Studios, whose patience and skill are responsible for the quality of the individual class portraits.

We sincerely hope that our combined efforts have produced a Taps which will prove a steady source of pleasure to you throughout the years to come.

Well, we’ll be hitting the trail, so take over, staff of ’50, and the best of luck to you!

The Forty-Nine Staff
Jack,

It really has been sweet knowing you for the past three years. I know that one the I had rather run around with than you. No kidding buddy it has been fine.

'Now when you go down to Columbus this summer to work don't forget that our friendship don't end just because you are out of school. I think we could still think of some way to make some easy money.

'Peek I know everything with you and that little girl in Atlanta will turn out O.K."

Well, buddy when you get to be a big wheel with your name on that letter head don't forget me.

Jack

"Alf Lady",

I sure have enjoyed rooming with you this year. As I recall, we have had many "full" sessions and much fun. I hope you have all the luck in the world at Columbus in your new work and for "goodness sake" don't forget all about me. I hope you have had as much fun this year in our room as I have and maybe I can get another to buy some of those towels. Incidentially, watch your step son, you're marrying age now. See you in the future,

Larry
Jack

Thanks for everything these last 4 semesters. I'm very fortunate in having a friend like you. Best of luck to you.
