THE 1950 TAPS

All right, line it up, A-Company!
Oh, how I hate to get up in the morning.

Must be nice.

At Work

Don't get the wrong idea—all work isn't in textbooks. The military takes its share of time, and "The Tiger" must come out each Thursday. There's enough for everyone, and then some.

Shine that brass!

It's a long fall.

No meatless Monday here.

Get to work, Howard.
Maggie's britches again.

Make it look hard, Kennemore.

No short circuit here.
and play

We know you're rough, boys—

What's the saying about "All work and no play?" Never mind—it doesn't apply here. Even in this hell-hole there's time and opportunity for a little horse-play.

What some people won't do—
Some people have to practice for everything.

The military can be fun.

Need some soap, too?

Once a ham, always a ham.
I gotta quiz tomorrow!

Fire in seventh barracks—getting too cold, fellows?

Must you get in bed to read a sugar report?

Another sack hound with cold-hearted old ladies.

Some of the boys eat in the "Y". Right, J. C.?

Midnight cremation of that damn chicken.
That isn't going to be done, Johnnie.

ADMINIS
RATION
Dr. Poole smiles and Peters beams as they bid beauty Barrie Bon Voyage.

Doctor Poole, Colonel Cookson, and Captain Sr watch the troops parade.

Flanked by two mikes, the President addresses the student body at assembly.

Shaking hands is another of the President's duties—this time with the faculty freshmen.

The President

Dr. Robert Franklin Poole is at the helm of this ship of learning. Patient, friendly, never too busy to give a word of encouragement, the President always has the student and the school in mind. Under his capable hands Clemson continues to advance in the field of education.
Mr. J. C. Littlejohn, business manager, has a big job in making ends meet.

Mr. G. E. Metz handles the massive job of admitting students and keeping records straight.

Mr. G. H. Hill, director of student activities, assists and handles money for student publications.

Mr. A. J. Brown, treasurer, the big-money man who handles the financial end of administration.

Mr. K. N. Vickery, assistant registrar, helps coordinate the many duties of the registrar's office.

Mr. H. H. Hill, Jr., manager of the housing project, does his best to keep a roof over our heads.

and His Administrators
Mr. Berry checks over another application blank—the beginning of a hard road for somebody.

A friendly word from Mrs. J. C. Clapp greets a student entering the Business Manager's office.

Planning three meals a day for three thousand students is no easy job. Getting it done is the responsibility of Mrs. Margaret Cotheran.

Preparing a menu that much fun? Miss Frances Mason, the dietitian's secretary, seems to be enjoying it.

It's straight now, but wait until the troops move in.

Mr. Lindsay sees that the food is ordered and cooked.

To keep the school running smoothly requires a group of efficiently coordinated individuals. The Registrar, the Treasurer, the Business Manager, all work together to form the administrative body. Without them, Clemson wouldn't be.
A never-ending row of figures is a necessary evil of administration.

Miss Elizabeth Shanklin, the "Assistant President", takes a call in the front office.

Keeping the school out of the red is the job of the Treasurer's Office.

Genius at work—Doc Milford must have an idea for a new type of pill.

Some people always pose.

Sara Gambrell is still trying to juggle those books.

This is the bulletin board that "all Cadets will be required to read."

Matriculation

It all begins with matriculation. There are endless lines, abundant confusion, too many people. To the freshman this mass of chaos represents a vision of things to come; to the upperclassman, who has suffered it before, it is merely routine. To all it is the beginning of another school year, with all its trials and tribulations.

Don't be so eager—you'll get yours eventually.
Registration

Those endless lines that are so characteristic of Clemson.

"You can still get math at 5:00 every day."

Hurry up and wait. This couldn’t be boring, could it?

Again the section you want is filled.

LaGrone signs up a few more victims.

Next in the cycle comes registration. The early ones are lucky—they can get the schedule and professors they want. Those that follow receive one disappointment after another. They may be able to sign up all their classes, if the gods so choose. The unlucky ones, though, must add, subtract, change, and substitute until their schedule looks like a D. T.’s nightmare.
Getting ready for that last assembly.

At last, the big moment has arrived—those coveted sheepskins.

Hearty congratulations from the president.

The Commencement address.

after which comes the Diploma.
"Q" boys of the Ag House pose during their initiation.

The Clemson School of Agriculture has come a long way since it was first provided for in the will of Thomas G. Clemson. Some of the biggest men in the field have received their educations at Clemson. It is no wonder that we have had such outstanding success with men like Dean H. P. Cooper, "Lord" Collins, "Big Ben" Goodale, Doctor Aull, etc., at the controls in this vast program of education.

Influence of the Clemson School of Agriculture is greatly felt by the farmers and farm specialists throughout the State of South Carolina. Bulletins, pamphlets, and other sources of information, sent out from time to time, prove of invaluable service to the rural families of the state.

Is that one that you laid, Johnny? Or has Embryology gotten beyond that stage?

Checking on the butterfat content of milk is routine in "Big Ben's" Dairy lab.

You tell 'em, Gene. What's this one got that the others haven't?

Must be pay day, from the smile on Big Ben's face and the frown on LaMaster's.

One would think that this was a Court of Law, from the judging going on. It's only an advanced Hort lab.
The School of Arts and Sciences at Clemson provides those men who participate a broad and varied program of education. Degrees may be received in Pre-Medicine, Industrial Physics, and Arts and Sciences, the latter of which includes a major and a minor in one of the following fields: Economics and Sociology, English, History and Government, Physics, and Chemistry. Specialization, if a candidate so desires, will come after graduation in this field. From here men go on to the study of Law, Medicine, Dentistry, to graduate work in their chosen fields.

Overall supervision is provided by Dean F. M. Kinard. Some of the professors who are encountered in this course of study are John Lane for English, Doctor Sheldon for Calculus, Stanley for Math, Taylor for Literature, "Foggy" Reed for Physics, Waite for Psychology, MacCauley for Economics, and many others.

A common saying at Clemson is, "All Arts and Sciences men fall out for lab horizontal or movies". It is true that these men spend few hours in labs, but the outside work from their classes, if properly attended to, can and does take just as much time as does a course in engineering or chemistry.

In this age of specialization it is all too often that the value of a more general education is lost but never is this the case in the School of Arts and Sciences.
Mr. MacIntosh instills a little culture in the form of English literature.

A Gentleman is always on his honor.

Physics is another branch of science covered by this school.

Jim Henderson speaks to John Lane’s journalism class.

Why not put some light on the subject? These Physics labs are generally pretty dark studies.

DR. F. M. KINARD
Dean

John Lane discusses job-hunting with another of his guests.
Eager chemists always have some new way to raise a stink.

Behind that tie is Prof. Williams, in that infernal rat lab.

So you think you want to be a chemist? Well, fine, but first let us introduce you to the life and job that will be yours for the four years of undergraduate work in this interesting and revealing profession. Like all other freshmen you are introduced to "rat" chemistry in your first year. Dean Hunter will conduct the lectures and you the learning; or else. Next on the schedule is "Doc" Schirmer with the rudiments of analytical chemistry which includes both Quantitative and Qualitative analysis. Here a prospective chemistry major learns to think or right away changes his course of study. "Pete" Carodemus is the little man who explains the intricacies of carbon atoms in organic chemistry. About here you'll be having wild dreams in which you're pursued by separatory funnels, distilling flasks, etc. Still with me, bud? And now for the orgy of them all, and it's none other than Doctor Pollard. From this distinguished educator you learn the fundamentals of physical and colloidal chemistry. Here's where you'll put that calculus to use. These are merely the highlights of the poor chemistry student's life. But seriously, it's a mighty fine school of study, and the men who go through these four years are well prepared for their life's work and profession.

You never will get out of that lab that way, Rat. It's easier to fill in the lab manual before class.

The study of the elements, don't let it explode, Bud.

Don't breathe too close to that tube—you'll ruin the temperature.

The scales of justice, only there ain't no justice here. You can't even guess.

Berry's getting quite a kick out of that plaything. You'd be surprised if it exploded, wouldn't you, Harry?
The engineering school at Clemson is composed of the individual schools of civil, mechanical, and electrical engineering. All departments, as well as the school of architecture, are located in majestic Rigg's Hall, fondly labeled the "Engine House" by those intimate with the school. Dean S. B. Earle is the man who synchronizes the work of this, one of the largest schools of study at Clemson.

Fernow makes the mechanical engineering student's life a dreary lot as he pounds his thermodynamics and aerodynamics into their respective (?) minds.

"Will" Clark is forever sending his surveying parties out to prepare maps of neighboring grounds around the school. Messrs. Triverly, Ford, and Rostrum keep busy civil engineers forever on the "go."

"Dog" Curtis, Bob Moorman, and "Ed" Byers make with the mechanics as such phrases as "can't you see that force," or "That's simple, Mr. Jones," pour out of their confused classroom windows.

The disc-jockeys of tomorrow. Don't be shocked, fella, but your meter's showing.

Closer to Heaven, but nearer to hell... to paraphrase the architect's motto.

These boys insist on waiting until the last minute to start a problem, then they gripe.

Looks complicated, doesn't it?

Little wheels studying the big wheels.
Textile Chemistry
Textile Engineering
Textile Manufacturing

Could that be the distant roar of thunder? It could, but actually it’s the hum of whirring machinery which can be heard every day in the School of Textiles. All modern machinery used in the Textile industry today may be found in this school where the students study and actually learn the operations of each individual machine. Clemson is located in the heart of the Textile world and it is only a short leap from learning and study to taking over the actual operations of this ever-growing industry.

Textile manufacturing students spend practically all their time in the Textile building where they encounter such courses as designing with Williams, Spinning with Gage, and microscopy with Edwards. Textile engineers have their work divided between the engineering building and the textile school. They study statics with Byers, kinetics with Curtis, and round out their senior year with technical textile courses. Textile Chemists are often confused for straight Chemistry majors, as they wrestle with Doc Shirmer’s Analytical Chemistry and Pollard’s Physical and Colloidal Chemistry. Doc Lindsey takes them over in the senior year and endeavors to give them the final touch in perfection.

Dean Brown is the man who coordinates and administrates for this vast school. His is a full-time job and he is a man who does this job with exceptional success.

Make it stronger is his motto, as he tests the fiber strength.

The School of Vocational Education, one of the smaller schools at Clemson, educates, trains, and seasons those men who plan to follow teaching careers. It is a varied course indeed that the curriculum of this school consists. The prospective graduate takes several courses in each of the other departments. Starting off in the freshman year the requirements are almost the same as other curriculum requirements. Freshman chemistry, math, English and government are met in their respective departments. This paves the way for sophomore studies a little more advanced but in still the same series. In the third year the educational major begins to explore the avenues of his own field and this exploration finds fulfillment as he hits advanced courses in education and further development of his selected work in the last year. It is here that he journeys out to neighboring schools to indulge in practice teaching. This, with all the work done in earlier undergraduate years, gives him the required skill and understanding that he will need as he leaves college to enter his chosen profession of teaching.

Dean W. H. Washington handles the job of overall supervision in preparing these men for their all important careers.

Jud strolls out of the Ed Building after a hard session of getting educated.

Johnston tries his hand before a critical group.

Jim Hunt practices with live ammunition.

And it's Mr. Ballew to these local High School students.
It is a job to keep a full class awake for 55 minutes, but to keep them on the edge of their seats for the same amount of time is a lost art in teaching methods. We shall not bring out the professors' qualifications, but in turn, we shall recognize their sincere efforts to combat this classroom claustrophobia.

C. W. Bolen — "Uncle Remus" — "You will have the whole hour to answer these few questions."

E. E. Waite — "Psycho" — "Anyone can be a $\% \#8\% moron."

J. B. Gentry, Jr. — "Dynamo" — "Gentlemen, you've got to talk on their level."

T. A. Hendricks — "Hank Roving" — "Don't quote me—I'm not smart enough to be quoted."
What a difference

A freshman is an awfully optimistic and confident creature before he gets to school, but he changes fast during those first few weeks. And he undergoes just as big a change when he turns upperclassman. There's a big difference between taking orders and giving them. Life isn't so bad for the sophomore; there's always a rat to do the work. Juniors are just one step nearer the gold bands and key chains. And the senior has reached the ultimate. He's sitting on top of the world, enjoying his exalted position for the one brief year before he dons the cap and gown and bids his books adieu.

Class Elections

Each spring the students turn out to elect their class officers and the Senior Council. These men are nominated a few weeks before the elections and wage a vigorous campaign during the intervening period. After the elections the victors start planning for their next year's activities. These campaigns often take the form of actual political elections—power-party politics, enticing platforms, and the like. But when the smoke clears, little damage is done.
Tell them where to mark, Bob. You can't lose that way.

Wipe that smile off, Bill. This is serious business.
Although it was organized primarily for the enforcement of discipline, the Senior Council serves the school in countless other ways. Acting as the go-between in student and administrative affairs is one service, and seeking to better relations between Clemson and her athletic rivals is another.
The senior class officers together with seven members elected by the students compose the Senior Council. Disciplinary cases are brought before the group throughout the year, and fair and impartial judgment is given. Cases ruled on by the Military may be reviewed by or appealed to the Senior Council, who makes the final recommendation.

Each spring the rising seniors elect their class officers. These officers serve also as the officers of the Senior Council; the school's link between the faculty and students, and also the student disciplinary body.

These men and the members of the Senior Class now prepare to bid farewell to Clemson and their classmates. When, in the future, they look back in retrospection on these four years so near completion, this year of gold braid and key chains will be the one best remembered.

Tommy never could fight shoes.

Junior isn't quite as satisfied as his proud poppa.

Come on, Ken. With all this college education you want to be more than a butcher.

Co-captains fight the battle of the Main Building. What's the scoop, John?

What a shame—straight coke. You can do better than that, Rod.
McLain leaves the Taps office long enough to get a little book learnin'.

Willie plays the "Donkey Serenade" as Forest leads his cohorts on a Brotherhood parade.

That last conquest musta' been something, George, but you can wipe that smile of satisfaction off now.

"Holtzy's Haven" provides for that quick game in a spare minute.

These sugar reports take up a lot of time, don't they?

Don’t give the O. D. a hard time, boys. It’s all in the line of duty.

"Head" Millsap lines his boys up for another intra-mural game.

Who turned off the hot water?

"And the first thing I knew . . . ."

Who are you mad with?
Now this thing works this way...

And furthermore, the troops aren't keeping their pockets buttoned.

Can I get these by tomorrow?

Rough course, this Horizontal Lab 401.

Then I'm here again on this page.

Informals...

You never told me you could sing opera.

Has the latest ESQUIRE come in yet?

Are you going to meet that lab this afternoon?

Uniform of the day at the Cow College.

Anderson or Greenville?
"Doc" makes another million.

What's the answer to number 3?

Where's the other bottle, Hunt? Straight coke could never do that.

Hollywood, take note.

Jameson gets the poop on that next quiz.

Love stories aren't that deep, P. R.

Rod completes another perfect dive.

Praise the Lord but damn that chicken.

Which one will I ask this time?

Not many Seniors have banking accounts.

Mess-hall bound, eh, Shuler?
Phillipstal and Shivers with a bull in the Barn . . .

while Thompson and Hall shoot it on the "Y" steps.

Dr. Lindsey explains the "J" box.

Livingston approves the '49 Taps.

Don't miss that eight o'clock class.

What a dish, Jack—What a dish!!!

Rev. Farr approaches the pulpit.

Isn't this a typical group of Seniors? They actually look studious.

A typical Howell Arthur prank.

Does that face make it go further, Holshouser?
Show your clippings, "Alley-Oop!"

A quick coke between classes.

A smile of self-satisfaction after bucking the Top Brass. Ain't hard, is it, Jim?

The heart of a yearbook . . . the darkroom.

Little Theater presents another masterpiece.

Senior . . .

Once a scout, always a scout. Is that ESQUIRE, boys?

Whitmire has always been fast!

Some people always pose . . . as you can observe in . . .

one, two, and three . . .
From where I sit, it looks like a straight-in, Wilson.

What a motley crew! Namely warhead!

Which twin has the skinners?

Thought you were a surveyor, Curtis?

Whew! How much?

Junior
Their is the responsibility of the Junior-Senior Banquet, one of the biggest jobs of any class. All too well they know the pleasures and pains of such an undertaking.

Only a few weeks from the gold and brass of seniors this class is well on the way to graduation. And it's been a hard fight.

LEADERS OF ’52

From humble freshmen to cocky sophomores these men have evolved, and now they stand on the threshold of another change. They, too, are nearing the halfway mark with no less anticipation than those who preceded them.

Take it from me, this barracks life helps form close friendships.
They've griped and they've groaned, but even the loudest of these will admit it's been an experience they will long remember. As upperclassmen they will continue to do the same things that they condemned while they were freshmen. And by doing this, they will carry on the traditions of Clemson.

What's its PH, Johnny?

But I tell you I don't wear a size 17½ collar.

Bob looks longingly at a sideshow.

Which reminds me. I've got to meet a guy in the pool hall.

Jud catches up on parallel.

Don't cry, Joe.

ARMORED CAVALRY

branches of R.O.T.C.

Clemson is classed as a Military College by the War Department. Since the war veterans have composed the majority of the students, but this year the Corps of Cadets has grown in size until they constitute better than half of the enrollment.

Through the years the Cadet Corps has maintained a position high among schools of its type over the nation. Each year the unit has won top honors in R. O. T. C. competition. Its drill platoon has won the acclaim of spectators all along the East Coast. Yearly it produces reserve officers of the U. S. Army who are ready and able to defend their country.

Col. Forrest E. Cookson heads the large and intricate military setup. In addition to his duties as P. M. S. & T., he is commandant and Dean of Men. Col. Cookson's past experience qualifies him for the job. He graduated from West Point in 1919 and saw service over the globe during the last war. He came to Clemson from New Zealand, where he served as Military Attaché for three years. Here he has won the respect and admiration of those who work with him as those under his command.
At the end of the first year of advanced MS the rising seniors pack up and head towards their respective camps. For six weeks they play soldier under actual conditions in Army and Air Force camps in various parts of the country. Each man learns the duties of his own branch and how to use the theory he has learned in class. When this period is ended, the Cadet returns to school and receives the rank of a cadet officer.
Leslie must be horizontal before he's comfortable.

Changing the guard at midnight—they look real mean, don't they?

The flyboys swap sea stories over a glass of beer—come on down to earth, boys.

Camp covers everything from carbines to howitzers. Here's an intermediate stage with the machine guns.

Is that the fire of hell in the background? The soldier doesn't seem worried about it.
from a bare sleeve...

Quote: "Never force mechanical parts of a weapon."

Quote: "Freshmen will not be required to shine upper-classmen's shoes."

Quote: "Halls will be cleared by long roll."

Quote: "No student will be subject to cruel, unjust, or embarrassing treatment by a fellow student."
Freshmen envy nothing more than the stripe and brass of the upperclassmen. As they discard their one's and prepare to don two's, they hope to add a pair of chevrons to their bare sleeves. Then they look forward to the zebra stripes.

**to a few stripes**

- The Corporal instructs his men in the fine arts!
- An N. C. O. studies the manual of good conduct.
- Just "batting the breeze" between classes.
- The "Sophs" believe in Saturday inspection—don't they, DeLoach?
- Discussing "Parade Ground Tactics", Generals?
- The brighter side of military life—barracks' bull-sessions.

Sergeants are only one step away from gold braid, buttons and diamonds. For a year the juniors keep envious eyes ahead, trying to outdo their competition. And when the great day comes, there are shouts of joy and surprise as well as sighs of disappointment.

“The Little Corporal” has grown up to be a First Sergeant.

Eager Beaver—Bucking for Colonel, maybe?

The brains for war are developed on the fields of competitive sport.

The Army’s grease monkeys get the inside scoop at the Atlanta Ordnance Depot.

Even Sergeants are human—sometimes!

"Tim" takes out time to dash out a line.

How did a civilian sneak in this act? Sound the alarm, Boys; here comes Smitty, the terror of the Third Battalion.

the bruises, sweat, cuts

For a few hours of glory each Saturday night during the first ten or twelve weeks of the fall, the team and the bohunks practice long and hard. Freshmen learn the fundamentals, and when they become eligible for the team Coach Howard and his staff stress the finer points. After the clashing of pads has ceased and the clicking of the teletype has ended, the players look forward to the Block "C" initiation and that purple and gold sweater.

Coach McFadden watches his freshmen hopefuls learn the fundamentals of Clemson's single-wing. These are the stars of tomorrow.

Howard's specialty—a bone-crushing block. These potential lettermen learn by experience.

If that dummy were the safety man, somebody should score. It's practice that makes perfect.

The Coaches

If ever men were sculptors, these are. Theirs is the responsibility of each great Tiger team. Coach Howard once said that "if they win they're yours, and if they lose they're mine," but this year with a 50-50 average the supporters have proved that he's wrong. The students and the alumni have backed the Tiger team all the way, and it's still our team.

This is the brain trust that engineers the Tiger grid machine.

The Tigers opened the season by defeating the Blue Stockings of Presbyterian 69-7 for their fifteenth consecutive victory. Taking advantage of every break, the Howard-men scored at will. Rarin' Ray Mathews and Fred Cone led the T. D. parade, each scoring two of the ten tallies. The team displayed a surprisingly good offense, but, as was expected, was weak when the opposition had the ball. The game had only one disappointing factor—P. C. scored on the Bengals for the first time in six years.
A former Clemson mentor was the cause of the abrupt ending of the winning streak. Jess Neely’s Rice Owls outscored the Tiger-men 33-7 in Houston, Texas. The game was not as one sided as the score may indicate, however. The Howard men outran and outpassed the Texans but always lacked the scoring punch. The Tigers couldn’t tally until late in the fourth quarter after a drive that covered 64 yards. Jackie Calvert and Ray Mathews led the march, and Fred Cone carried the leather across the double stripe. When the game ended Clemson had the ball on the Owls’ one-foot stripe.

A face like that should eliminate the need for a stiff arm. Maybe that's why Jim's good for yardage.

Bouncing back into the winning column, the Tigs journeyed to Raleigh and edged out a good Wolfpack team, 7-6. The trusty toe of Tommy Chandler proved to be the margin of victory in the seesaw battle. Fred Cone scored his fourth TD of the season, and the deadly passing of Carol Cox and Jackie Calvert, teamed with two glue-fingered ends, Glenn Smith and John Poulos, warned scouting coaches of things to come. The defensive playing showed marked improvement. Gene Moore, Luke Deanhardt, and Wyndie Wyndham held the Pack to short gains.

Back in Tigertown the Bengals’ passing attack fought the running attack of Mississippi State to a 7-7 deadlock. Calvert, Cox, and Mathews tossed the pigskin all over Memorial Stadium, and found Smith, Poulos, Ruston, or Reynolds waiting to receive it. Mathews scored the lone tally on a run around end, and Tommy Chandler converted. State, having switched from the single wing to the T-formation, displayed a surprisingly strong running attack, although they lacked the scoring punch. Pete Manos, Wyndie Wyndham, “Cadillac” Hudson, and Gene Moore did a brilliant job of stopping this juggernaut.

Sophomore end Glenn Smith jumps for Calvert’s pass. Miss State jumps too.
The biggest disaster of the season struck one Thursday afternoon in Columbia, when the University of South Carolina Gamecocks overcame a two touchdown deficit to beat the favored Tigers 27-13. Jackie Calvert displayed his brilliance as a triple-threat tailback as he ran for one TD, passed to end Glenn Smith for the other, and constantly set the Birds back deep in their own territory with booming punts. Ray Mathews played his usual stellar game at wingback, while Jack Brunson, Wyndie Wyndham, and Bobbie Williams played an outstanding defensive game.

A capacity crowd filled Memorial Stadium to watch two offensive-minded teams battle in one of the most spectacular games ever played at Clemson. When the dust cleared, the Tigers had lost a thriller, 35-21. The Deacons displayed a powerful running and passing attack that, at times, looked invincible. But the Bengals, too, played spectacular football. Ray Mathews averaged 18 yards per try, and Pineapple Cone hit the Baptists' line like a freight train. Calvert passed to Smith for the first tally, Mathews hit Calvert in the end zone for the second, and ran 66 yards for the last.
Furious Freddie Cone sets up another TD with his sledge-hammer driving. That stiff arm helps too!

A host of Eagles attempt to catch elusive Ray Mathews as he races around end for 23 yards and the final tally of the game.

Clemson 27
Boston College 40

Twenty thousand frenzied fans watched Boston College down the Tigers in a thrilling Homecoming contest. The Bengals received the opening kickoff and went to the Eagle's five before the attack bogged down. Soon afterwards the visitors scored and Clemson could never overcome this deficit. Nevertheless the Tigers showed a beautiful offense with Fred Cone, Ray Mathews, and Jackie Calvert spearheading the attack. Cone scored the first TD on a line plunge from the one, after three successive drives of 26, 11, and 19 yards. Carol Cox caught Smith in the end zone for the second tally. Soon after the second half opened Calvert intercepted a pass and carried it 30 yards to pay dirt. The final six-pointer was the result of Mathews' 23 yards around end.

How did he get through here? Cone's spectacular playing netted three TD's and many first downs.

Duquesne                      20

The Country Gentlemen climbed back into the winning column by defeating the Iron Dukes of Duquesne, 33-20. Furious Fred Cone played his best game by scoring three touchdowns on plays covering 15, 30, and 47 yards. Ragin' Ray Mathews scored standing up on a run around end, and lateraled to Mike Kinney for another. Wyndie Wyndham's bone-crushing blocks cleared the field for many long runs, and Bobby Williams, Luke Deanhardt, and Jack Brunson slowed down the Dukes' offense.

Ray Mathews stole the show at Sirrine Stadium in Greenville as he passed for three TDs and ran 68 yards for the other. Furman, playing an inspired game, held the Tigers scoreless during the first two periods, and, led by the brilliant running of Ed Jasonek, almost tied the game. But there was no stopping the Tigers. Early in the third quarter Mathews passed to Jackie Calvert for the first tally, and repeated the same play, as soon as Clemson got the ball again, to chalk up number two. Glenn Smith made the third tally on the same play. Mathews faked a pass and ran 68 yards for the last.

Underdog Clemson outran and outpassed the Auburn Plainsmen, but Travis Tidwell, voted the most valuable player in the Southeastern Conference, managed to score in the final minutes to tie the game. Fred Cone's rushing netted 100 yards and six points for the most outstanding individual performance. Ray Mathews ran 20 yards, then lateraled to Bob Hudson, who went the remaining 45 yards to score. Calvert scored the last marker after a long down-field drive. The Mathews-to-Calvert passing attack was good for long gains.

Finally the rival teams entered, and the co-captains met in midfield to decide who would get the first chance at the ball. Carolina won the toss...
blisters, bruises and baskets

At mid-season the Tiger cage team is still fighting for an invitation to the Southern Conference Tournament. The group has played a hard season, and an inexperienced team has made the trail pretty rough. As the Taps goes to press the McFaddenmen are still hoping and playing hard for this big bid.

The Tigers boast several outstanding players. John Snee leads the scoring parade with an average of 12.7 points per game, followed by Jim Reynolds and Doug Hough, both close behind. The team as a whole at mid-season leads its opposition 838 points to 785.

With most of the last year's team returning, the Tigers could expect a better than average season. For the first six games they seemed invincible, but then the tide turned. Up until the end of the season the diamondmen played nip-and-tuck with the conference leaders. Then a couple of reversals at the end of the road lost the conference championship, but the team still had a record which they couldn't complain about.

The second undefeated team of the year won its victory on the cinders. The Tiger speedsters won from Presbyterian, Wofford, Carolina, and Davidson in successive meets and ran away with the state track tournament at Clinton, compiling a total of 58½ points for the victory. Coach Norman chose not to enter the team in the Southern Conference meet.

Prelude—or the calm before the swing. After this a long drive toward the cup.

Drives such as this helped put the Tiger link team high in the state ranks.

The 1949 link team dropped only two meets during the regular season, but two of the teams that had fallen before the victorious Tigers came back in the state tournament at Spartanburg to defeat the Clemson team and give them a third place in the contest. Carolina and Wake Forest out-putted the Bengals for their only defeats before the Spartanburg battle. Many of this year's team will be back next year to mold a top flight link team.

Undefeated this far this year in shoulder-to-shoulder matches, the sharpshooters have also won better than half of their telegraphic meets. A great many of last year's members compose the present team, and the same coaches, Captain P. M. Anderson and Sergeant E. L. Cox, direct the firing.

Three of the sharpshooters in action. How did Gunby or Allen ever make the team?

Pete shows the boys the standings. You're at ease, West.
Swimming

Coach Carl McHugh's tankmen have dropped two of their first three meets, but the future looks bright, nevertheless. At the beginning of the season the team had only three of last year's regulars on its roll, but as the season grows older the new members gain that necessary experience. Now a well-balanced team, two deeps in almost every position, faces its opposition with confidence.

Even a fish couldn't outdo this Tiger. He cut the water clean as a whistle.

This should break something—if only the water.

A fast start always helps and these three seem to have that jump down pat.
With the addition of six new courts, four clay ones to be used solely by the varsity, the tennis team is expected to show great improvement this year. The Taps goes to press too early for a seasonal review, but at this time the team is shaping up under the experienced hand of Coach Hoke Sloan, who has guided the netmen since 1926. Clair Draper heads the ladder, followed by Harold Littlejohn, Joe Black and Ben McLeod. In the doubles, Draper and Littlejohn are in the lead, with Black and Jack Neel a close second.

The ball sails across the net after a hard return by Smith.

Draper gives a fast serve as the tennis team gets into shape before the season opens.

The students in general get a crack at sports through the Y.M.C.A.-sponsored intramural program. Under the direction of Mr. Roy Cooper, teams from the barracks and pre-labs are formed to compete in touch football, basketball, tennis, volleyball, and softball. At the end of each season the winners are selected and presented keys.

Each fall every Cadet company and vet barracks turns out for volleyball. This sport draws many enthusiastic supporters.

Leadership
BLUE KEY

ROBERT F. RAYLE
President

For leadership and service, Blue Key, national honorary leadership fraternity, is the top of the ladder at Clemson. It is toward this goal that many a man’s efforts are directed in his years at college.

Among the fraternity’s achievements on the Clemson campus are the publication of the Blue Key Directory, which contains all students’ names, addresses, and courses of study, the inception of a club president’s council which helps consolidate all student activities, better relations between Clemson and her athletic rivals, and many others.

The general welfare of the students is the foremost goal of the fraternity. With this in mind and also with the further development of our alma mater, Blue Key continues to operate.

Tiger Brotherhood is an organization composed of members who possess outstanding abilities of leadership, service, and interest in Clemson. Among their many projects is the bettering of relations between the faculty and the student body. Tiger Brotherhood was first formed on the Clemson campus in 1928 by Professor John Marshall. Any student who shows interest in leadership and service is eligible for membership in the organization.

Alpha Phi Omega is composed of one-time Boy Scouts who show promise of attaining the positions of leadership on the campus.

Many worthwhile projects and activities are sponsored by the club each year. Some of these include the publication of a booklet of club information, the preparation and distribution of a desk blotter to all students, and a large part in a relief program for Europe.

New members are selected at the beginning of each semester. They are selected for their abilities of leadership, personality, and scholarship.

The club was first organized on the Clemson campus in 1936 and has since attained a position of respect and admiration in the eyes of Clemson men.

Phi Kappa Phi

For those men who have maintained a grade point ratio of 6.5 or better for the first three years of their college careers there is due recognition. This recognition is given them in the form of membership in Phi Kappa Phi, national honorary scholastic fraternity.

Phi Kappa Phi, the greatest scholastic honor offered at Clemson, was organized at The University of Maine in 1897. Stimulation of learning in competition is the chief goal of the fraternity.

The "Q" Boys come in handy by helping out those of us who wear dunce caps.

The brains of the Freshman Class are united in the Phi Eta Sigma, honorary fraternity for freshmen with a grade point ratio of 7.5. Other than introducing the potential geniuses to each other, the fraternity sponsors classes for other members of the class who are having a more difficult time in their studies.
For the comparatively new school of Arts and Sciences at Clemson there is an honorary scholastic organization. This organization is Sigma Tau Epsilon and is open to juniors and seniors who have the required grade point ratio.

Tutoring of undergraduates in the various departments is a task which the fraternity has undertaken for itself. They have been highly successful in this venture.

As in other scholastic fraternities, fellowship and competition in learning are twin purposes of the organization.

Truly the cream of the Engine House are the men of Tau Beta Pi. These men have reached the high standards for which the fraternity is noted. Prerequisites for membership—a set grade point ratio and high moral character and integrity. Seemingly endless lab reports, highly technical texts, sleepless nights, and good hard work make for success in the fields of engineering.

The goals of the fraternity are competitive learning and attainment, and, for those who succeed, a common ground on which to exchange ideas and theories in the fields of engineering.

George shows us how we, too, can make grade points simply ... dig, dig, dig!
Phi Psi

Evidently B. K. is sweating out the "Crows" doby loom fixing. We don't envy him.

Phi Psi, national honorary textile fraternity, ends its 23rd year of service and activity on the Clemson campus. Those men majoring in Textile Chemistry, Textile Engineering, and Textile Manufacturing are possible candidates for membership. As in other honorary fraternities, scholarship is the first consideration, but this is closely paralleled by the individual's personal character and integrity.

The fraternity seeks to bind its members by a common bond of brotherhood and fellowship with which they may gain their common goal of success in the different fields of Textiles.
Those men in the school of architecture who possess required scholarship records as well as outstanding traits of character and personality are invited to become members of the Minarets. This organization was first begun to give the architectural undergraduates a common ground on which to exchange ideas of their profession. Each year the club sponsors educational lectures, art exhibits, and other programs of architectural achievement.

Interesting social activities in the form of intermission parties, banquets, etc., help make for a well-rounded organization.
Minarets' new initiates praise Allah in front of the Engine House. What . . . do you boys do something besides sleep in the daylight hours?
Too little attention and recognition are given to the teachers and educators of this country. Their work is long and hard, and in too many cases the only reward is one's knowledge of self accomplishment. Realizing that these men have taken it upon themselves to carry on this great work, Alpha Tau Alpha, national honorary agricultural education fraternity, seeks to recognize those men of outstanding ability in this field. The establishment of brotherhood and fraternal fellowship among agricultural leaders of the future is the goal of this organization.
Bound together by a common bond of fraternal fellowship are those chemistry majors who possess outstanding personal qualities in the field of chemistry. This organization is Alpha Chi Sigma, national honorary chemical fraternity containing 53 collegiate branches and 22 professional chapters. Many interesting programs and demonstrations are presented throughout the year for the entertainment and education of its members.

Warm and lasting friendships are formed by the members as they work and play together in their various projects and activities.
The national agricultural fraternity, Alpha Zeta, is open to all men majoring in one of the fields of Agriculture. Those men with exceptional scholastic records, high moral character, and outstanding personality are accepted for membership.

The fraternity seeks to keep its members posted with the latest in the fields of Agriculture. With the fraternity as a common ground on which to work, the members are able to exchange ideas and useful bits of information and knowledge which will be of invaluable service to them in days and years to come.
Professional
The Ag Engineers look over a glorified tractor—know what it is, sharecroppers?

S. P. Young
President

In 1931 Clemson's chapter of the American Society of Agricultural Engineers was first organized by the Agriculture Department. Since its initiation the society has been influential in bringing the students and faculty of Agricultural Engineering into a closer relationship.

The A. S. A. E. has as its goal the ideal of promoting a scientific approach to problems found on the farm. It gives its members the opportunity to stimulate problems found under actual conditions. This broadens the outlook of the students, affording them well-rounded ground work.
A. S. M. E.

Juniors and seniors whose major is Mechanical Engineering and who meet the standard requirements of scholarship, personality, and character are eligible for membership in the American Society of Mechanical Engineers. The society offers its members the opportunity to develop initiative and the ability to express their ideas, qualities essential to the graduate engineer.

The best speakers, demonstrations, and lectures that the field of mechanical engineering can produce, aid in fulfilling the purpose of the society, which affords to its members the first opportunity to become formally affiliated with the profession.
The American Institute of Electrical Engineers is the student branch of a national organization whose object is to further the advancement of the theory and practice of electrical engineering and allied sciences, and to develop and maintain a high professional standing in the individual engineer.

The local branch offers to the E.E. students the opportunity to increase knowledge of his chosen profession outside the classroom. By presenting a logical viewpoint to actual problems, the A.I.E.E. prepares its members for practical work in the professional field.
In 1852, The American Society of Civil Engineers was formed for the purpose of maintaining a high professional standing among its members, advancing engineering and architectural knowledge and practice, and encouraging fellowship between its members.

The oldest national engineering society in America, A. S. C. E. offers its members opportunity seldom found in the classroom. A practical approach to theory through application, blended with the advice and experiences of guest speakers further the development of the civil engineering student. Membership is limited to those members of the upper three classes who have a satisfactory grade point ratio, personality, and character.
You can even spot the Colonel's boys in a C. E. lab. Next time you guys needn't wear your monkey suits!
A. H. Club

In 1932 the Animal Husbandry Club was formed so that students interested in that field might benefit from mutual understanding and pertinent advice offered by the faculty at regular meetings. The club strives to stimulate interest in latest agricultural developments and methods. Often new ideas are brought out which prove to be very beneficial, such as the recent advancements in genetics and livestock feeding.
Williamson and Gage look piously on as a fellow pledge makes his offers to the gods.

The American Society of Textile Engineers is a recently formed group of students of the textile school who are majoring in textile engineering. One of the purposes of the club is to help the student with his problems concerning work in the textile field, and to establish fellowship among the students.
Kappa Alpha Sigma

Wipe that smile off your face Cohen. This is no laughing matter.

The American Society of Agronomy's chapter on the campus, Kappa Alpha Sigma, was organized in 1935 to bring about a closer union between fellow members.

Membership in this society is limited to the agronomy students who show promise of becoming outstanding in their chosen field. Scholarship, character, and personality are taken into consideration in the selection of members.
The American Society of Chemical Engineers is a recently organized club. Originally the chemical engineers were classified as chemistry students, but the engineering field of chemistry is rapidly growing, and the society has taken a more important position among the professional organizations on the campus.

Peters and Mitchell attend labs when it doesn't interfere with drill.
The Iota Lambda Sigma fraternity is a national industrial education fraternity.

The purpose of this fraternity is to promote the causes of industrial education in three ways: the recognition of professional training, the recognition of high scholarship, and the creation and maintaining of a closer fraternal bond between actual and prospective teachers in this special field.

Membership is limited to juniors and seniors who have completed a portion of their major work with a grade of "B" or better.

Cadet Captain W. B. Turner can't get out of a uniform long enough to go to a lab. Are you in command here, too?
Potential dentists and surgeons compose the ranks of Delta Sigma Nu, the Pre-Med Fraternity. Its purposes are many—to promote fellowship among the members of the Pre-Medical school, to familiarize its members with medical subjects, and to aid the prospective medical student in selecting subjects in keeping with medical training.

Prior to the war the club was known as the Pre-Med Club, but after a period of inactivity it was renamed upon reorganization.
Dairy Club

The Clemson Dairy Club was first organized in September of 1922 by Prof. B. E. Goodale. It was the first departmental club on the campus and is affiliated with the National Student Branch of the American Dairy Science Association.

The club endeavors to stimulate interest in subjects pertaining to the wide and varied field of the ever-expanding dairy industry.

Meetings are held twice a month, with programs presented by students, a guest speaker, or a faculty member.
Horticulture Club

Horticulture, as with other phases of agriculture, is undergoing vast changes in this period of agricultural transition. Increased quality and quantity in production is the goal of the club, and by use of the most modern equipment and chemicals the club members learn how to achieve the club's objective.

Any Clemson student interested in the field of horticulture is eligible for membership. The club's semi-monthly meetings feature discussions of topics relevant to the field.

Poultry Club

Organized to promote interest and further practical study among Poultry Science majors, this club keeps its members in time with changing times in the poultry industry.

The club presents at its regular meetings programs of interest by outstanding men in the field. Membership is open to any student majoring in Poultry Science.
The William E. Godfrey Physics Club was first formed in 1948 and named for the professor who for twenty-eight years taught the subject most dear to his heart. The club was formed to encourage friendship and the practical aspect of their profession.

Inflation or deflation? Rags or riches? These are typical questions that arise before the Economics Club during their meetings and forums. Arts and Science Economics majors are included in the organization, which attempts to relate classroom theory to actual professional problems through forums, discussions, and guest speakers.

Economics Club
The Future Farmers of America was chartered at Clemson in 1937, and its membership is limited to men from the three upper classes who are enrolled in Vocational Agricultural Education.

At its monthly meetings members are taught to organize, prepare and conduct interesting programs. The student gets a few outside hints from the education department who present interesting problems which confront teachers in this line of work.

Arnold Society of Air Cadets

Men in the Air R. O. T. C. are organized into the Arnold Society of Air Cadets, named for the general who dedicated his life to the building of the Air Force. This society keeps track of the latest developments in Air Science, and discuss the aspects of the Air Force that are of mutual interest to the whole group. The only requirement for membership is that the student be enrolled in the Air R. O. T. C.

The supreme goal, the highest achievement of all the brass-shining, mirror-gazing, "nut boys" of the cadet corps is the Scabbard and Blade. It is composed of men who have proven to be the best, as far as the military is concerned.

Theirs is a national honorary military society for cadets enrolled in advanced R. O. T. C. The principle aim of the organization is to promote a feeling of unity among the cadet military leaders and to maintain a high standard in the military activities of the corps.
The best-known organization on the campus is the Senior Platoon. They drill at several home football games, on Mothers’ Day, and make numerous trips throughout the East, and the praise of their accomplishments reach the campus long before they return. Thus they are a powerful instrument of publicity for the school and the envy of similar groups in rival schools.

Each Spring the organization selects the rising seniors who best qualify in personnel and precision. These members drill morning and evening in preparation for Mothers’ Day, and in the fall follow the same plan for the fall schedule.
In 1892 John J. Pershing, then a Lieutenant on the commandant’s staff at the University of Nebraska, formed the original company of Pershing Rifles. Since that time it has grown to a national organization made up of companies in 29 colleges and universities with senior R. O. T. C. units.

Company C-4, the active campus unit, is composed of sophomore cadets who are outstanding in competitive drill. The Pershing Rifle-men drill weekly until they can perform with the precision of machines. When they become Juniors they automatically become inactive members of the company.

Headquarters, Fourth Regiment, Pershing Rifles, located at Clemson, is one of seven dispersed throughout the United States with Headquarters located at the University of Nebraska.

The area covered by the Fourth Regiment includes all Senior R. O. T. C. schools in the Southeast. Other active units are located at the University of Tennessee, Louisiana, State University, the University of Alabama, and the Georgia School of Technology.

The staff is composed of the Pershing Rifles members of advanced standing.

The Society of American Military Engineers organized comparatively recently for the purpose of uniting those men who have a common interest in the Military. All of the members are in the Corps of Engineers Branch of the R. O. T. C. unit, and at their meetings subjects pertaining to the advances made in Military Engineering.

In this time when interest in all forms of military science reaches a new high, this organization assumes an importance that heretofore no such unit has known. Through this its members make better reserve officers.

Music-Forensic
Mu Beta Psi

Those men who have served two or more years in the Glee Club, Concert Band or Military Band are eligible for membership in Mu Beta Psi. The purpose of this organization is the furthering of music and music clubs on the campus.

Its members are a credit to the concert series and other musical functions on the campus by serving as ushers and in many other capacities.
David seems to interest everybody but Pat. There must be something exciting in the audience.

Band boys can never get their minds off business. Monkey business, that is.

Mu Beta Psi is supposed to usher. The school pays plenty for top-notch entertainment. She is interesting though.
The Glee Club, under the direction of Professor Hugh H. McGarity, is one of the South's better college men's choral groups. Their semi-annual concerts have more than justified the popularity this group has enjoyed since its reorganization in 1947.

The club is striving to become the best in the South and is rapidly approaching that goal.
The oldest organization on the campus is The Calhoun Forensic Society, formed in 1894. Each semester students who are interested in forensics are tapped into the Society, and after an informal initiation the pledges begin to learn the rudiments of debating and parliamentary procedure.

Debating, the primary purpose of the group, is practiced throughout the year, and each spring the entire society engages in a discussion of a topic of national interest.
This year the two old bands, the Brigadiers and the Jungaleers, combined into one under the name of the Jungaleers. This band, with its sweet and low or fast and hot as you like it, is maintaining the reputation of Clemson's musicians throughout the south.

Ability and musical talent are prerequisites for membership. The orchestra is self-sufficient, owning its own instruments and transportation. The Jungaleers receive requests to perform over various parts of the south, where their ability is acclaimed by all listeners.

Currie catches up on a little "Browsing 309".

"Parson" and "Doc" descend the stairs to the cafeteria for a straight one—without cream.

It's "Stan Kenton" at the Steinway for a Sunday afternoon jam session.
Church
The largest church organization on the campus, B. S. U. offers numerous and varied programs to the fourteen hundred Baptist students under the direction of J. L. Span-ngenberg, minister to the students. The union fosters spiritual growth, thought, and action through a program of Christianity at work, centered in the services of the church.
Episcopal students at Clemson are united in the Canterbury Club of Holy Trinity Episcopal Church, of which the Reverend Emmett Gribben is rector. Clemson’s Canterbury Club was the first chapter of the National Association of Canterbury Clubs in the Country. It offers all members an active part in functions of the State Association.

By virtue of the sale of Christmas Cards, designed and sold by members, the club is self-supporting. Religious and educational movies, informative speakers, supper meetings, and informal dances all find places on the busy program schedule.

Jewish students on the campus are organized into the Hillel-Brandeis Club, which evolved from the Brandeis Club that existed before the war. Formed to promote spiritual advancement, social achievement, and all-round fellowship, the Hillel Foundation has chapters throughout the country, located on the campuses of leading colleges and universities.

Current events are discussed at meetings held weekly in the "Y" and many other items of interest are presented to the students.
Lutheran Students Association

Reverend Ben Clarke and the Lutheran students on the campus have at last seen an ideal materialize. A program of Lutheran Students Association for many years, a chapel on the campus for Lutheran students was completed this year.

The primary motive of the L. S. A. is the development of fellowship among students. This fellowship is furthered by programs presented in the form of interesting speakers, informal discussions of current topics, and social functions of various types.

BILL MATHIAS
President

In 1938, the Wesley Foundation was formed to provide a more thorough church program for Methodist students. This program is offered at the weekly meetings through guest speakers, group forums, quiz programs, and other varied activities. Through these, the chief purposes of the Foundation, to furnish the student an opportunity to serve others and to work together in fellowship are realized.
Newman Club

In 1940, Father T. F. Tierney organized the Newman Club on the Clemson campus as the religious organization for Catholic students. All Catholic students are invited to join and a large number are active members and take part in the many functions of this group. Members also participate in the work of the choir and the athletic teams sponsored by the club.

P. S. A. is more than three initials to the Presbyterians on the campus. The Presbyterian Student Association offers its members a variety of religious and social programs which help fulfill the two primary purposes of the organization, spiritual growth and social development. The Association forms a link between the students which is invaluable in later life.

Now its all over. The book is out, and the Senior staff has retired. All the long hours, hard work, frayed tempers, quick decisions, and the few brief moments of pleasure that blend into the publication of a yearbook have resulted in this production. It took one year. Now the book belongs to the students.

Much of the credit for this book belongs to the Junior staff. The old axiom says that a good editor shouldn't have to work. Since work must be done, the brunt of it falls on the members of the staff who will compose the Senior staff next year.

We hope that you are satisfied with this, our work. If you realize the difficulty in editing a yearbook, you will tolerate our mistakes. It is not necessary to proclaim our pride in this accomplishment.
Slave labor—the Junior Staff, under the whip of senior member McLain, do some brain work as well as common toil.

Our deepest thanks to “Uncle John”, our faculty advisor, who laid out the book in addition to furnishing us with invaluable advice.

An industrious crew, this Taps staff. The “Mother” seems to be working hard for a change, while the others try to devise some sort of a system for production.
Junior Staff

Help in the time of need—these two proved invaluable to the Taps. "Head" did the cover, Vernon the division pages.

Common labor is necessary to any work. The Junior staff puts out the book under the supervision (?) of the Colonel.

Sack Time
The commander and his troops. General Headquarters is in a state of confusion when the Colonel briefs his men on "Operations Taps", but a lot of hot air causes only a little inspiration.

The "Colonel" reviews the situation and prepares to attack. More work coming up for the Junior Staff.

That look on your map wouldn't indicate that the cash box is short, would it, "Mother"?

**Sacrificers**
One of the hardest working groups on the campus is the "Tiger" Staff. On Monday and Tuesday nights the editors and reporters burn the midnight oil preparing the copy for the printer. Wednesday is spent on make-up and proofreading. And Thursday the students spend a few minutes reading the results of a week's work.

The "Tiger" Staff changes in mid-semester, so two complete staffs get credit for this year's publication. The paper is subjected to no censorship. Through their own ability the staff won The Wilton Hall Award for the best college newspaper in South Carolina, and All-American honors awarded by the National Scholastic Press Association.
Jacques is supposed to be Sports Editor of this outfit, but tonight he is typing out French notes!

Howard (Mr. and Mrs.) seem to be enjoying one of Bill's risque jokes during intermission.

"Cos" and his ace newshound "Handsome Harry" Dukes filter the news from the gossip.
The Junior Staff

"Handsome Harry" and Bill wade through the abundance of copy that goes with each week's "Tiger".

Art gives Howell a cup of that anti-sleep potion. Without coffee, copy would never reach the press.

Bill goes primitive at "The Tiger" intermission party. Ted finds it all very funny.

Jacques and Dick attempt to solve a typical publication's problem—identification of a picture for a cut line.
Why is it that photographers always tell their subjects not to pose. They should practice what they preach.

An inspired editor delivers stimulated speech. The adoring doll is completely in the spirit of things.

at Work and Play

Wipe it clean, boys. The new Tiger office undergoes a little renovation before the staff moves in.

The cynic spits forth with his words of wisdom—comments and observations on campus activities.

Ain't it grand? Bob and his sponsor enjoy the brief intermission.
The latest developments in the fields of Agriculture are included in "The Agrarian", published by students in the school of Agriculture. This magazine not only was the first technical publication on the campus but it also has the largest circulation of publications of this type at Clemson.

The senior staff is assisted by the junior staff from which the senior staff for the following year will be chosen.
The Slipstick

Edited four times each year by students in the School of Engineering is "The Slipstick", official publication of the School of Engineering at Clemson. Containing articles of professional and local information, the magazine has gained a reputation of high repute throughout the state. The magazine is edited by a senior staff which is assisted by its junior staff, of which the following year's leaders are elected.

"The Bobbin and Beaker", official journal of the School of Textiles, was organized at Clemson in 1939 by the Phi Psi fraternity, national honorary textile fraternity. New ideas and developments in the vast fields of textiles form the main source of information in this magazine. Published by the students in this school, "The Bobbin and Beaker" has proved itself many times and has a definite future at Clemson.

The official Linthouse publication undergoes some midnight alterations before going to press.

Instructor Sutton informs a member of his staff on the following subject—typewriter doffing.
The Minaret Bulletin

Buzz and company look over layout for next edition. Do you boys work all night on this, too?

Published and sponsored by the Minarets, honorary architectural fraternity, is "The Minaret Bulletin". The magazine is circulated twice each semester and contains articles of professional interest, local and alumni news and happenings.

Like other professional magazines on the campus, the entire job is done by the students, who spend sleepless nights on its preparation and layouts.

The Y. M. C. A. Handbook

Bill Gaillard and the staff work on the Handbook for the photographer six months after the book was published.

The Y. M. C. A. Handbook is planned and sponsored by a committee from the "Y" Cabinet. The Handbook, distributed at the beginning of each school year, was originally intended for the guidance of new freshmen, but has since been adopted by the entire student body, who find it extremely useful.

The Handbook gives a complete outline of the activities of Clemson and her students.
Blue Key Directory

One of the chief projects undertaken by Blue Key is the annual publication of the Blue Key Handbook. The booklet lists each student, giving his home address, major course, class, barracks room number, P. O. box, and the rolls of various student and college organizations.

Gamma Alpha Mu

It is an ambition of every literary man on the campus to become a member of Gamma Alpha Mu, honorary writers' fraternity. The prospective member must prove his ability by submitting samples of his writings, which are judged by author and literary critic Octivus Roy Cohen. The acceptance of a man's work by this writer is the only requirement for membership.

Professor John Lane, club advisor, handles all material submitted, and brother, it better be good.

UNCHARTED SEAS OF COLOR

Much of the dyestuffs research conducted in the Du Pont Laboratories is toward definite goals: improvements in established products, better methods of application, etc.

But certain groups of scientific adventurers spend their time sailing uncharted seas of color, their trained eyes searching the chemical horizon for undiscovered scientific facts relating to dyestuffs.

Many of these facts never develop beyond scientific curiosities. Others result in new and better dyes; new and better use methods. E. I. du Pont de Nemours & Co. (Inc.), Dyestuffs Div., Wilmington, Delaware.
