</table>
Clemson College was an act by a man, Thomas G. Clemson, when through a grant to the state of South Carolina in 1889, he made possible the formation of this institution. People have become the keys to the success of Clemson. Buildings and land alone cannot make a college... it takes the presence of people, a mixture of individuals. These individuals bring with them the success or failure of any undertaking. Through the years Clemson College has grown; it has become a strong link in the chain of state education.
Through experimental stations, research projects, exhibitions, lectures and outstanding teaching, Clemson has made its mark on society. Years will unfold and Clemson will grow, gaining in stature with expansion and with the strength of its leaders, its people. There are the buildings... Tillman Hall with its clock tower, Clemson's pinnacle, above the college guiding every eye toward the heart of the campus... a greenhouse used by the agricultural school for research... the endless expanse of concrete... new dormitories and old... the frat houses... John C. Calhoun's home.
There are thousands of acres of rich farm land, rolling hills and the new Hartwell Lake slowly reaching its high-water mark. This is Clemson without doubt, but without the people there wouldn't be a college—only a shell.
Clemson's people are individuals going to class through the wooded campus . . . walking . . . looking . . . seeing the crowds of a football game deep in death valley . . . pre-orientation "Y" camp in the Blue Ridge mountains . . . the amphi-theatre in the night filled with cheering masses of students. The Clemson man is an individual whether at a bon-fire before the Clemson-Carolina weekend . . . sitting on the loggia waiting for someone . . . or standing in the rain thinking about the next day's classes. The "rat" sits alone as he keeps the beat of the drum and upperclassmen prepare for an extended weekend. Sometimes in the night there comes the sound of fireworks echoing through the campus with the footsteps of the individual as he makes the lonely walk to the C.E. building to work on a "big bridge" problem . . . the outward quietness as he walks into "the fort", bright and gleaming in the rain and reflections—lonely on the outside—wild on the inside with people, records, structure models and "moose calls." Dance weekends, fraternity parties, late shows on
Friday, the sculptor’s studio, paintbrushes and ink . . . frivolity and creativity . . . brotherhood and solitude . . . these are Clemson and the life of its people.

A group of silhouettes, the little quad and the brothers, the stairs up to the lounge and an open hand of hearts . . . that moment away from everyone with your date . . . these too are parts of Clemson. All of Clemson’s men entered alike . . . as newcomers; they soon grasped the spirit, the brotherhood. The individual plays the college game, each in his own way. He joins the crowds at rush parties, meets the girls from Converse at a mixer, discovers the Georgia roads leading to the sorority circle of Brenau, makes the rounds of Dan’s and Capris for ‘burgers and pizza, plays bridge in the coed lounge, crowds into the canteen in the mornings for the dime cup of coffee and sits in the washerettes trying to study as his clothes dry.
Time passes and the "rat" enters politics, joins student organizations, pledges the fraternity of his choice, works on publications . . . and begins to see the inside workings of the school. There are those too, that do not take a part in extra-curricular activities but work and make outstanding academic records, or travel every weekend to the girl back home. Pepsi bottles accumulate, deadlines are met, quarters are obtained from the infirmary on drill day, quizzes are passed and failed, grades go up and go down, "dear john" letters are read over the Chicago radio stations, Marlboro tops become valuable assets, the twist and slop become favorites at parties, and the yellow shirt joins the weeians as a standard for dress.
Miami discovers what the spirit of Clemson can mean as "green dragons" hit the road for conventions; Columbia too discovers when student legislature takes the toll on class attendance. Assemblies, meetings and retreats are popular among students for a relaxed weekend away from the grind. Faces appear—some only once, but many over again—faces at the "Carolina Cup", ZTA open house in Gainesville, weddings, the Bastille on Dogwood Lane, and the physics classes. A year, four or maybe six and you are out—one way or another. The line at the drug store on the day that seniors get their rings . . . moving into the prefab . . . waiting for a pop-quiz . . . these are but a few of the remembrances—a part of Clemson life that cannot be replaced or repaired. Years will go into the past and Clemson will grow, but it will be hard to picture a college career more enjoyable than the one the Clemson man ends when Dr. Edwards hands him his sheepskin.
The beginning of the new year in September marked the end of an enjoyable summer for the Clemson Students. As they poured back on to the campus an air of mixed emotions, became prevalent. Weariness, confusion, frustration, and eagerness showed in many faces as the task of registration proceeded. The freshmen faced a new horizon, and most of them looked forward eagerly, although confused, to this new challenge.

The conversation of the first week was centered around courses, professors, and no Saturday classes. Visions of easy courses seemed to disappear as students began the task of registration. The endless lines, no vacancies, and an air of confusion all made the first day unforgettable. Dejected, confused, and frustrated, students emerged from the masses shaking their heads and marveling at the professor's uncanny ability to re-schedule classes. After the first step, lay the long hours of work broken intermittently throughout the year with dances, and other social occasions.
Instructions, Confusion, Lines . . . Registration

The field house is always packed with hurrying, confused people during registration.

Well, well, I see you have three classes scheduled for the same hour.

A weary student finally completes another day of class registration.
The Twist, seen for the first time at Clemson, quickly became the most popular dance on campus.

Rat Hop was the first big dance weekend at Clemson. An air of anxiety prevailed as students awaited the arrival of their dates for the "big weekend". The Blue Notes provided the music for the Friday night formal dance. The highlight of the dance was the crowning of Miss Dia Bettencourt of Savannah, Georgia as "Rat Queen" of 1961.

Defeat at the hands of the University of Maryland in Death Valley Saturday afternoon did not dampen the weekend activities. Music was provided that night at the informal dance by the Clovers. The dance was a fitting climax to an exciting weekend which had introduced the freshmen to social life at Clemson College.

Clovers, Blue Notes, Twisting . . . Rat Hop 1961

The Clovers' music and showmanship was enjoyed by all.

The crowded dance floor didn't seem to bother anyone; there's always room for talking and dancing.
C.D.A. staffers do the work that gives the students another fine dance.

The Phi Kapps sang with the Blue Notes; who provided the music for the Friday night dance.

The Clovers' lively music gives this couple a chance to try some new dance steps.

C.D.A. President Henry Goodwin presents a bouquet of roses and a silver cup to the Rat Queen, Miss Dia Bettencourt of Savannah, Ga.
Kappa Delta Chi won first place in fraternity competition with their presentation of "Big Bad John".

The Foreign Students Association presented a very entertaining skit, "Latin Carnival".

Delta Kappa Alpha's satire of a well-known radio program proved to be very enjoyable to the audience.

President Edwards escorts Miss Anne Sherman, Queen of Tigerama, to receive her crown.
The Clemson College Glee Club presented another of their beautiful choral performances which received a large ovation from the crowd.

No Tigerama would be complete without the varied assortments of beautiful and noisy fireworks.

Variety, Fireworks, Laughs...Tigerama Spectacular

The fifth annual Tigerama kicked off this year's fabulous Homecoming Weekend as talented Clemson men and women brought fourth humor, music, and satire before a record audience of students and visitors. Festivities were begun with a spirited pep rally and an exhibition by the Tiger Band; a wide variety of entertainment followed. Many hours of planning, practice, and hard work were required to put on such a show, but efforts were rewarded as the applause rang through Memorial Stadium.

The judges presented Kappa Delta Chi with the top award for their excellent skit, and Delta Kappa Alpha won the fraternity division. The Phi Kapps, a well-known vocal group on campus, were chosen the best musical entry. The presentation of the beauties and the crowning of Miss Tigerama, Ann Sherman, proved to be highlights of the evening.

The Phi Kapps won first place in the singing division with their show of rock and roll and Four Freshman arrangements.

Phi Kappa Delta provided many laughs with their satire of the college infirmary.
Football, Beauties, Dances...Homecoming Weekend

To start Homecoming activities rolling, the all-student production, Tigerama, on Friday night provided entertainment with music, fireworks, and a variety of skits. From 9:00 until 1:00 p.m., the Country Gentlemen and their dates rocked to the music of Hank Ballard and the Midnighters. After the dance there were fraternity parties and houseparties.

In Death Valley the Tigers rolled to a convincing 21-6 victory over the Tulane Green Wave. Highlight of the halftime activities was the crowning of Homecoming Queen, Miss Mary Ann Brunnemer of Winnsboro. Saturday night the mood music shifted as couples danced to the dreamy music of Larry Elgart and his orchestra. Homecoming was over, but the pleasant memories of a perfect weekend were to be long remembered.

Tommy Weeks and Judy DeLoach show why "twisting is here to stay" as the audience watches in amazement.
The Tiger, the Country Gentleman, and a cheerleader stand by to give moral encouragement to the Tiger Team.

The Homecoming crowd watches the mighty Tigers trounce Tulane's mighty Green Wave.

Miss Mary Ann Brunnemer, Phi Kappa Delta sweetheart, is crowned Homecoming Queen for 1961.
Larry Elgart provided the entertainment for the Friday night dance of Homecoming Weekend.

President Edwards and C.D.A. Faculty Advisor, Dr. Meenanaghan, discuss another outstanding Homecoming dance.

The soft, restful music of Larry Elgart was a welcome relief to the Homecoming crowd after Friday night's dance.

Winthrop student Mary Ann Brunnerem, Clemson's Homecoming Queen, poses with her date, John McConnell.

HOMECOMING QUEEN
Status, Nuclear Survival, History, Space Age...Lectures

Mr. Vance Packard delivered the first lecture of the series this year with the theme, "The Status Panic." This theme was based on the white-collar worker's insatiable thirst for status, and the lecture illustrated the empty satisfaction derived from achieving status.

Dr. Nicholas Nyara delivered the theme, "Shall We Survive?", in which he compared the position of the Communist Russians with that of the democratic countries, and discussed the advent of nuclear war.

During the second semester of the school year, the distinguished movie and television actor, Allen Mowbray, opened the lecture series with his subject, "Moments of Greatness." This presentation pointed up man's undying courage by citing the obstacles which man has surmounted.

Armand N. Spitz, Director of the Spitz Laboratories, brought the Clemson student body its final lecture for the year.
Eugene Ormandy, conductor of the Philadelphia Orchestra, displayed the ability which gives him the distinction of being one of the country's outstanding conductors.

Ferrante and Teichier, duet, pianists presented an outstanding performance of near musical perfection, which included songs such as "Exodus" and "The Theme from the Apartment".

Again this year the Clemson College Concert series presented to the students some of the country's outstanding performers.

The '62 series began with the perfectionists, Ferrante and Teichier. The show of these pianists, which was a display of perfection, was highlighted by their recording of "Exodus". Late in November Roger Wagner's Chorale was presented and the group showed finely discipined voices with a wide dynamic and expressive range.

In early January, the world renowned Philadelphia Symphony performed before the series audience. This group has been called one of the best of its kind in the world. Fred Waring returned this year to give another of his wonderful shows of music. Following the Pennsylvanians, the Canadian National Ballet brought a change of atmosphere to the series. This was the first time that many of the students had seen a ballet performance.

Singers, Ballet, Orchestra, Pianists . . . . Concerts
Fred Waring and his Pennsylvanians, always a favorite at Clemson, gave another of their memorable performances.

Lois Smith and Earl Kraul of the National Ballet of Canada thrilled the audience with their splendid performance.

The Roger Wagner Chorale presented an impressive show of musical perfection to the concert series audience.

The lovely Miss Salli Terri was a featured soloist when the Chorale appeared at Clemson. Miss Terri's beautiful voice held the entire audience spellbound.

Soprano soloist Salli Terri and Roger Wagner, Director of the Roger Wagner Chorale, discuss one of the new recordings of some of the works the Chorale will present here.
Couples often get together for a few hands of bridge.

Bridge, Children, Housework . . . . Married Life

Married students comprise an important segment of the Clemson student body. These students form a very integral part of life here on the campus, and their contributions are of great importance. Adequate housing for them is provided by the college in the form of prefabs and the recently built duplex apartments. The apartments, with four rooms and a bath, are very quaint and quite adequate for a small family.

Going to school and trying to support a wife and family can be rough; however, most of these couples seem to manage quite well. Many of the male students' wives work in the Clemson area while their husbands are attending school. Other wives attend classes just as do their husbands. A lot of hard work and conscientious studying is required of married students.

Being married and going to school is not all work here at Clemson, so it seems. Married couples often get together for parties and other social events. They have formed their own organization, which is called the "Married Students Association." This organization is open to all married students and attempts to promote better understanding between married students and the school. Scholarships and other financial aids are provided for married students to lessen their burdens of managing a family and attending school.
All married students look forward to the time when they can build a home of their own.

Calvin found it a lot easier to get by an opposing lineman than to get out of the kitchen with his wife, Pat, in the way.

Bobbie and Larry Myers of Ashland, Ohio, are typical of the large number of married students from other states.

Joyce and Joe Sherer, with twins, Debbie and Dee, watch television, a favorite pastime of many of the married families.

Bob and Mabel Templeton leave for a weekend trip home.
Rush Week reaches a climax when the rushees choose their fraternity.

The rushees got a chance to do a little socializing at the Saturday night parties put on by the various fraternities.

Are you sure this is Seven-Up?
Smokers, Parties, Drop-Ins, Bids...Rush Week Highlights

This year the second formal rush week was held on the Clemson campus. All seven fraternities participated in the activities which included drop-ins, smokers, and parties. The purpose of rush week is to give all students interested in joining a fraternity an opportunity to visit the various fraternities and become acquainted with their purposes, activities, and members. This year saw a large increase over last year in the number of students participating in rush activities, and is a good indication of the increasing interest in fraternities by Clemson students.

Rush week officially began on Wednesday, January 31 and continued until Monday, February 5 at which time bids were extended by fraternities. Rush week was under the direction of the Inter-Fraternity Council, which published the rush regulations plus a description of each fraternity in a handy pamphlet. Each rushee was required to register in order to be eligible to participate in rush week, and he was given a name tag to be worn while attending the various smokers. Smokers were held by each fraternity on Wednesday, Thursday, and Friday. On Saturday the rush parties were held by each fraternity with girls from surrounding schools adding color. The final smoker was held on Sunday, and quiet hours began at 5:00. Then came Monday when the bids were distributed, and the rushees made their choice.

From all indications, rush week, 1962, was a huge success for fraternities, students, and Clemson.
Clemson students eagerly awaited the arrival of their dates Friday afternoon as they anticipated an enjoyable weekend, free of work and worry. Mid-Winters was a welcomed break from the monotonous routine of classes.

Dean Hudson and his orchestra along with vocalist Nancy Paree, provided the mood music for the Friday night dance.

The joke of the weekend was provided by the Dixie Sky Divers. Preceding the concert the sky divers performed before an estimated crowd of one thousand students; they had announced all week a spectacular dive. This exhibition was to have taken place on Bowman Field where a white cross was to show the jumper where to land. Then it happened! A station wagon drove up, and a sky diver got out of the car, ran to the middle of the field carrying a ladder, and proceeded, fully dressed and equipped, to make a fabulous jump off the ladder.

After this exhibition, the amused and somewhat disappointed couples proceeded to the Field House for an informal concert presented by Bobby Hackett and his orchestra.

Bobby Hackett and his group were also present Saturday night to play their diversified repertoire of music for the dancing couples. Showmanship, technique, skill, and natural ability combined in this group to provide an entertaining evening.

When the C.D.A. dance was over, many fraternities and private parties started. Sunday marked the end of social activities and the resumption of studies.

The concert, held on Saturday afternoon, is a highlight of the Mid-Winters weekend.

Bobby Hackett's swinging trumpet was a big hit with the Saturday night dance crowd.

Drum solos are always enjoyed by the dance crowd.

Charlie Bradshaw, President of the Carolina Dance Association, visited Clemson for the Mid-Winters dance.
A member of the Pershing Rifles and his date pause for an intermission chat.

Military, Polish, Jungaleers, The Olympics...Spring Hop

The Spring Hop Weekend was favored with beautiful spring weather. The sky was blue, and the air warm, allowing the students and their dates opportunities for pleasant picnics, and attendance to the many sporting events that took place at Clemson during the weekend. The weekend began with the Military Ball and climaxed with the CDA dance Saturday night.

With uniforms pressed, brass brightly shined, and shoes polished, Clemson’s ROTC students turned out to the annual Military Ball. The music, provided by Clemson’s Jungaleers was soft and dignified and provided a different atmosphere than the music that was to come Saturday night. Honorary Cadet Colonel, Sergeant, Corporal, and Private were presented during the dance. Their ladies entered through an arch of sabres held by the Pershing Rifles. During the intermission the Pershing Rifles astonished the crowd with their demonstration of precision drilling.

The Saturday night dance provided a very different atmosphere. The fabulous “Olympics” featured rock ‘n’ roll music. Among the numbers they sang were their recordings of “Big Boy Pete,” “Western Movies,” and “Peanut Butter.” The “Olympics” were backed by the “Kinfolks”. This group presented an unique show that was highlighted by the antics of their piano player.

The R.O.T.C. staff, as well as the students, take part in the Military Ball.
The Olympics gave one of the most lively performances ever given at a Clemson dance.

A member of the band gives the audience a few laughs.

A C.D.A. member replaces one of the decorations.

Everyone crowded around to hear the Olympics sing such numbers as "Baby Hully Gully" and "Western Movies".

Dean Coakley, why do you dance in chairs?
Laughing, Singing Groups, Girls . . . Junior Follies '61

The annual Junior Follies is an event which is greatly anticipated by the entire student body. Presented in April by the Junior Class, the follies are a variety and talent show of outstanding merit which feature musical, dancing, and comedy talent from Clemson and from various colleges in South Carolina and neighboring states.

Coordinated by emcee's Jerry Kline and Mike Britt, this year's follies featured such talent as Janet McGee, Miss South Carolina, and the famous "Jesters" from U.S.C. Miss McGee presented a song and dance routine and the "Jesters" captivated the audience with their rendition of songs made famous by the Kingston Trio. Also featured were the "Phi Kapps", a local singing group which specializes in popular numbers. The humor for the show was furnished by emcee's Mike and Jerry, who kept the audience rolling in the aisles with jokes and comedy.

The show was a tremendous success and more than justified the long hours of work which went into the production.
Fun, Memories, Fellowship Gaiety, Revelry...Senior Day

Senior Day is the day when the members of the senior class take over the campus. This annual event features tests of strength, agility, and ingenuity, in addition to providing a barbecue and many parties that last into the night.

On Senior Day all routine is forgotten, and classes for seniors are suspended. The Senior Day is the grand finale to four years or more of hard work. This day is set aside once a year in honor of the graduating seniors.

Senior Day precedes graduation in importance, graduation being the final step toward personal independence. The seniors realize that this is their last social gathering as a class, but their college friendships will remain throughout the years.

A determined senior, most probably an Ag. major, demonstrates the very latest pig-handling technique.

Is this what four years of higher education does for you?

Bobby Shannon and his very able assistants show how to give a pig a hard time!

After a lot of climbing and some help from his buddies, a happy senior claims the twenty dollar bill atop the pole.
There is always plenty of time to shoot a little bull.

The fraternities on campus have quite a variety of parties; this is DKA's "Voodoo Party".

"Tulip" and a lovely from Winthrop show their twisting form.

Louis Kay uses a little eye magic as he and his date twist the night away.

"Hi, Betsy," Let's dance before Hugh gets back.
What's the trouble, Johnny, is Phil cramping your style, or just plain snaking?

Members of PDK, SAZ, CDA, and guests, danced all night to the music of the Confederates at the Homecoming party.

Parties, Combos, Twisting . . . . . Social Functions

Social functions are a very essential part of college life. Here at Clemson there are a variety of social events ranging from the big dance weekends to the mixers. Due to the emergence of fraternities on the Clemson campus the social aspect of college life here at Clemson has been constantly improving.

Students always look forward to the big dance weekends which feature big name bands and combos. Parties after the dances, houseparties, and concerts are also a big part of dance weekends. Along with the dance weekends is "Greek Week", which features a big dance for fraternity members, and numerous fraternity parties. Mixers, featuring good music and pretty girls, also contribute to the social aspect of Clemson.

A lively combo always adds life to any party.

The fraternity parties roar into high gear as the night passes on.
Music, Banquets, Yearbooks . . . Taps Jr.-Sr. Weekend '61

TAPS Junior-Senior, the final dance highlight of the year, was certainly the most fabulous dance of the season. Students made the most of this, their last chance to make a "big fling" before final exams and the end of the year.

The Friday night dance featured Jan Garber, one of the favorite names in dance bands a few years ago. The Seniors received their yearbooks on Friday, and during the Friday night intermission certain portions of the book, such as the cover, Mrs. TAPS and Miss TAPS were presented to the faculty and students.

On Saturday activities began with the annual Junior-Senior banquet held in the dining hall, and later Saturday night entertainment was well provided by Charlie Barnett’s orchestra, featuring tantalizing Jill Corey as vocalist. Spirits were high as everyone concentrated on enjoying the last dance of the year, and perhaps the last dance of some of their college careers.

C.D.A. President, Dick Harvin, presents a corsage to Jane Cullum, Miss TAPS.

Mrs. Edwards, Mother of the Year, is presented to the student body by Rusty Willimon, President of the Tiger Brotherhood.

David Rogers, editor of the 1961 TAPS, accepts a gift and congratulations for a job well done.

Jill Corey’s heart-warming style and lovely voice highlighted the Saturday night dance.
A lively tune gives everyone a chance to try a few fast steps.

These talented singers sang with Jan Garber who provided the music for the Friday night dance.

TAPS shows their appreciation to Mrs. Albert, whose help and guidance is invaluable.

Members of the administration always enjoy the opportunity of seeing TAPS before it is presented to the student body.
Two graduates take a last look at the Clemson Campus.

Carolyn and Jim Creel attain the ultimate goal of all Clemson married students.

Achievements, Diplomas, Memories . . . Graduation

At last the big moment has arrived—those coveted sheepskins. Graduation is the long awaited dream of every student who enters Clemson College. For four long years or more, the student at Clemson struggles down a long, hard road. Graduation is both an end and a beginning. This event, anticipated by many but accomplished by few, is a sign to all that the graduate is ready to meet the ever-challenging world on even terms. Behind him are the tedious morning classes, the long afternoon labs, and the weary nights of studying. Also in the past are the “good old college days” with the weekend dances, ball games, horseplay in the dormitories, and the lengthy and interesting “bull sessions”. Even more than this it is the final curtain on the panorama of events and experiences that combine to develop the mature, educated citizen.

As the graduating senior takes the short walk to and from the stage, a transition from a hard-studying student to a Clemson alumnus is experienced by him. For many of these graduates this is the open door to a bright and promising future in their chosen fields of industry, education, management, agriculture, engineering, and many other professional fields. For some the future means more years of study; for all students it is the beginning of the responsibilities, achievements, and obligations of adult life.
Many relatives gather to watch the graduation exercises at Clemson.

Dr. Edwards gives an honorary degree to one of the state's leading citizens.

It seems hard to believe, but we actually made it.

President Edwards extends his congratulations to the graduating class.
Candidates for graduation approach the long-awaited moment.

Professors discuss the many past experiences concerning the graduating class.

Robes are removed for the final time; the memories will remain forever.
Dr. Robert Cook Edwards, president of our college, graduated from Clemson College with a Bachelor of Science degree in Textile Engineering. Dr. Edwards became acting president in June, 1958, and since then has received his Honorary Doctor of Law degree from The Citadel and Wofford College.

President Edwards was very active in extra-curricular activities while at Clemson being a member of the Blue Key, National Scholarship fraternity, the Tiger Brotherhood, a Leadership fraternity, and also a member of Phi Psi, a National Honorary Textile Fraternity. At the present time, President Edwards is very active in his community; he is a member of the Order of Masons, American Legion, a State Bank and Trust Co. Director, and a member of the Methodist Church.

As acting president and now as, president, Dr. Edwards has worked with the faculty and student body to give us better educational facilities and to promote the best interest of Clemson College throughout the World. We are indeed fortunate to have such a qualified man for our president.
Clemson Board Of Trustees Helps The Administration

The nucleus of Clemson’s progress is the Clemson Board of Trustees. Working in conjunction with the president of the College, these men regulate all of the school’s executive actions, coordinate and direct financial expenditures, and ratify all important issues concerning the welfare of our school.

The Board of Trustees consists of thirteen members—seven life members and six other members elected by the General Assembly to serve a four-year term. The seven life members are Edgar A. Brown, James F. Byrnes, Richard M. Cooper, Charles E. Daniel, James C. Self, Winchester Smith, and Robert A. Coker. Mr. Cooper is currently the president of the Board. The members of the Board elected by the General Assembly are Dr. William A. Barnette, Robert L. Stoddard, Paul Quattlebaum, A. M. Quattlebaum, W. Gordon McCabe, and L. D. Holmes, Jr.

R. M. COOPER, Chairman
Clemson College is fortunate in having an able staff of administrators to conduct the business of our institution. These staff members handle such necessary tasks as housing and development, direction of student aid and placement, and providing an efficient library. Under this group of qualified personnel come the responsibilities of providing medical aid to students, enforcing civil law and order, counseling with students, coordinating the paper work, and maintaining correspondence with alumni.

Realizing its responsibilities to the people of South Carolina, Clemson College has strived to employ qualified personnel, and under them Clemson has grown to meet the demands of the educational challenge facing our state and nation.

Alumni Association Gives Help To Clemson Students

The principle and all-inclusive project of the Alumni Association is the Clemson Alumni Loyalty Fund, a living endowment program of annual alumni giving that assures the continuity of the Alumni Program, helps insure the educational excellence of Clemson College, and helps further the education of many who would not be able to attend school if it were not for this fund.

Dedicated to the service of Clemson Alumni and Clemson College as a whole, the Alumni Association strives to maintain fellowship and to keep alive a sentiment of affection for Clemson College. The Association unites former students by a common tie, and actively promote the welfare and development of Clemson College for years to come.

The Alumni Program includes: The Alumni publications, the maintenance of Alumni records, homecoming, reunions, the Alumni Placement Service, local Club Activities, and innumerable services to the individual Alumnus. The Alumni Association as a whole is working for the betterment of Clemson College and its graduates.

The Clemson College Alumni Association is your Alumni Association. All alumni are invited to support the objectives of the Association and to avail themselves of the many and varied services it renders in behalf of the former students of Clemson.

HOWARD D. NOTTINGHAM, President-Elect

RICHARD V. MAGILL, Vice-President

GEORGE G. DURST, President
Agricultural Economics and Rural Sociology

AULL, G. H. . . . . Head of Department and Professor
BAUKNIGHT, L. M. . . . . Associate Professor
BOYD, V. A. . . . . Associate Professor
SPURLOCK, H. C. . . . . Associate Professor
STEEL, H. L. . . . . Associate Professor
STEPP, J. M. . . . . Professor
TODD, B. J. . . . . Associate Professor

Agricultural Economics and Rural Sociology was established in 1926. Graduate work at the Master's level was begun in 1945 and at the Ph.D. level in 1960.

As a teaching department, Agricultural Economics and Rural Sociology provides courses for students majoring in the department and acts as a service department for students from other departments within the School of Agriculture as well as from other schools.

The department, in addition to its teaching functions, conducts an active program of research and extension education. Another important function of the Department is that of gathering and publishing agricultural statistics.

The department has been fortunate in that it has attracted an outstanding faculty with broad interests and wide experience both in the professional and the business world. This is evidenced by the relatively large number of staff members who hold and have held positions of honor and responsibility in state, national, and even international professional organizations, and who have served in a consulting capacity to many public and private agencies.

Approximately 13 different colleges and universities are represented on the department staff. About half of the Professional staff members hold Ph.D. degrees.

Agricultural Education

DAVIS, L. H. . . . . Head of Department and Professor
BOWEN, W. C. . . . . Associate Professor
CARPENTER, E. T. . . . . Associate Professor
KIRKLEY, F. E. . . . . Associate Professor
RODGEERS, J. H. . . . . Assistant Professor

The Agricultural Education Department at Clemson College represents a cooperative educational program between the South Carolina Education Department and the College. The primary function of the Agricultural Education Department is to provide both pre-service and in-service education.

Some of the major responsibilities of this department are:
1. teaching undergraduate courses for students enrolled in both Agricultural and Secondary Education;
2. conduct research in Agricultural Education;
3. provide courses for professional improvements of teachers;
4. follow-up beginning agriculture teachers;
5. prepare and distribute teaching materials; and
6. conduct non-credit courses and workshops for in-service teachers.

Since 1918, the Agricultural Education Department has graduated 1,068 students qualified to teach vocational agriculture in South Carolina. This department has the distinction of being the first teacher training department in the country to prepare teachers to carry on an adult education program with farm people.

The Agricultural Education Department has a staff of five members who are well qualified by training and experience. Each member has had years of experience as a teacher of vocational agriculture, in supervision of student teaching, and in teacher education.
AGRICULTURAL ENGINEERING: Wilson, T. V.; Vaigneur, H. O.; Craig, J. T.; McLeod, H. E.; Rogers, J. T.

Agricultural Engineering is jointly administered by the School of Agriculture and the School of Engineering. The application of engineering sciences to the problems of agriculture is the fundamental task of this department. Graduates in this field provide engineering services in the areas of agricultural processing, farm electrification, farm structures, power and machinery, and soil and water conservation engineering. In addition to these areas, the students who complete this course are prepared to seek employment in industry as a design research, or production engineer, in government as a teacher or extension engineer, and in agricultural enterprises as managers or contractors, as well as many other directly, or indirectly related fields of agriculture.

This department has striven to develop and improve in order to be able to provide the education capable of meeting the challenge of the highly mechanized agricultural program of today. Much research and experimental work is done in this area. The methods of the years ago are not satisfactory today. These are re-evaluated, discarded, reworked, and brought up-to-date.

Mr. A. W. Snell heads the department whose responsibility it is to train students for agricultural engineering work.

Agronomy And Soils

JONES, U. S. . . . . Head of Department and Professor
BARDSLEY, C. E. . . . . Associate Professor
BYRD, W. P. . . . . Associate Professor
CRADDOCK, G. R. . . . . Associate Professor
ESKEW, E. B. . . . . Associate Professor
JONES, C. M. . . . . Professor
PAGE, N. R. . . . . Associate Professor
PEELE, T. C. . . . . Professor
WATKINS, P. W. . . . . Assistant Professor

Agronomists work with such important plants as tobacco, cotton, soybeans, corn, small grain, and forages. It is their responsibility to understand soils, to classify them, to fertilize, lime, and till them for maximum profit; to develop better crops and grow them in better ways. The roots of agronomy are in the fields of physical and biological science.

Clemson established an Agronomy Division in 1914, and so far, approximately 700 students have earned a B.S. degree in Agronomy. Over 50 of these graduates have continued to earn the M.S. degree and 28, the Ph.D. degree. As efforts are made to feed and clothe an ever-increasing population, there will be a strong demand for well-qualified agronomists.

Research in agronomy provides such end results as a new crop variety and a more productive soil. Extension agronomists, in cooperation with the county agents, plan and conduct a state-wide program aimed at providing more income and a better living for South Carolina farmers and the public in general.
Animal Husbandry

WHEELER, R. F. . . . Head of Department and Professor
EDWARDS, R. L. . . . . . . . . Assistant Professor
GODLEY, W. C. . . . . . . . . . . Professor
HANDLIN, D. L. . . . . . . . . Assistant Professor
KROPF, D. H. . . . . . . . . . . Assistant Professor
ritchie, R. R. . . . . . . . . . . Professor

The Animal Husbandry Department is responsible for teaching and research as related to beef cattle, sheep and swine. At present, both B.S. and M.S. degrees are offered. The members of the teaching staff are jointly employed by the South Carolina Experiment Station, and during the current year they have published articles in the "Journal of Animal Science."

Among the subjects taught in Animal Husbandry are nutrition, breeding, animal production and judging, meats, and feeds. Research work is carried on by the department in animal breeding, and in other fields related to Animal Husbandry. Members of the department faculty serve as advisors for the Block and Bridle Club and Alpha Zeta. A member of the department staff also coaches the Clemson College Livestock Judging Team.

Dr. R. F. Wheeler, Head of the Animal Husbandry Department, teaches the Feeds and Feeding courses and seminar. He handles student placement for the department and is presently Secretary-Treasurer of the Southern Section of the American Society of Animal Science.

Botany And Bacteriology

EPPS, W. M. . . . . . . . . . . Head of Department and Professor
ASHWORTH, R. P. . . . . . Associate Professor
BOND, J. H. . . . . . . . . . . Associate Professor
FOSTER, H. H. . . . . . . . . . Associate Professor
HALPIN, J. E. . . . . . . . . . . Associate Professor
KINGSLAND, G. C. . . . . . Assistant Professor
MATHEWS, A. C. . . . . . . . Associate Professor
RUSH, J. M. . . . . . . . . . . . Professor
RUTLEDGE, R. W. . . . . . . Professor
WHITELEY, J. B. . . . . . . . . Professor
WITCHER, W. . . . . . . . . . . . Associate Professor

The Department of Botany and Bacteriology serves Clemson College and the people of South Carolina in teaching, research, and extension. The professional staff consists of 29 men, each of whom is a specialist in one or more of the botanical sciences. Five of the 29 teach full time; nine are engaged in full-time research; six participate in both teaching and research, while two are engaged in extension activities.

Students who enroll in the courses offered in the department may receive guidance and training in the basic plant sciences at either the graduate or undergraduate levels. An undergraduate curriculum leading to the B.S. degree in Biology is administered jointly with the Department of Entomology and Zoology.

Graduate training is offered in Plant Pathology and Bacteriology; Master of Science degrees are available in these fields.
Dairy

GOODALE, B. E. . . . . Head of Department and Professor
HENNINGSON, R. W. . . . . Associate Professor
HURST, V. . . . . . . . . . Professor
JANZEN, J. J. . . . . . . Associate Professor
KING, W. A. . . . . . . . . Professor
LAZAR, J. T., JR. . . . . Associate Professor

Students majoring in dairying find a wide and varied choice of job opportunities upon graduation. In the large and ever-growing field of milk production there is a great demand for those with know how in dairy technology and production. Dairy scientists are required in educational, government and industrial laboratories. Specialists in the field of dairying are employed by the many businesses which market the milk and milk products coming from the farms and factories every day. Ice cream manufacturing, milk plant operations, dairy extension work, milk inspection and dairy organization work are available to the dairy graduate.

The three options in the Dairy Science Department—business, science and production technology are each designed to train dairy leaders of the future by stimulating productive thinking among the students and by assisting students in acquiring knowledge needed to better understand the problems of the changing work in which they will live and work.

A dairy student’s first two years are spent in the study of the basic agricultural curriculum which is required by most majors in the agricultural field. Instruction in the social sciences and humanities are part of this basic course. In his last two years of study the dairy major takes such courses as dairy technology, dairy manufacturing, animal nutrition, and animal breeding.

Entomology And Zoology

COCHRAN, J. H. . . . . Head of Department and Professor
ADKINS, T. R. . . . . . . Associate Professor
ANDERSON, G. W. . . . . Associate Professor
BUXTON, J. A. . . . . . . Assistant Professor
FOX, R. C. . . . . . . . . Assistant Professor
KING, E. W. . . . . . . . . Associate Professor
PURSER, W. H. . . . . . . Instructor
REED, J. K. . . . . . . . . Professor
TOMBES, A. S. . . . . . Assistant Professor
WARE, R. E. . . . . . . . . Associate Professor
WEBB, L. G. . . . . . . . . Associate Professor

Entomology and Zoology were in the curriculum at Clemson College in 1893. Since 1914, this department has offered a B.S. degree in entomology, but the courses in zoology were primarily service courses for five hundred or more students majoring in Agriculture, Arts and Sciences, Biological Science, Pre-Med, Pre-Vet, Education, and others. In 1951, the department began to offer graduate work, and the first M.S. degree was awarded in 1953. Since that time, twenty-five M.S. degrees in Entomology and eleven in Zoology have been awarded. The department was authorized to offer a Ph.D. program in Entomology in 1955. In 1961 a Biology curriculum was approved and the students majoring in Biology can select an option of either Botany or Zoology as a field of concentration.

More than one hundred fifty students have received the B.S. degree in Entomology from Clemson College. A high percentage of these have found employment in some phase of Entomology or related fields with the U. S. Bureau of Entomology and Plant Quarantine as researchers or inspectors. Clemson College is the only institution in South Carolina to offer a degree in Entomology.
Forestry

LEHOTSKY, K. . . Head of Department and Professor
BRUNER, M. H. . . Associate Professor and Forester
COOL, B. M. . . Associate Professor and Forester
LANE, C. L. . . Assistant Professor and Assoc. Forester
McGREGOR, W. L. . Assoc. Professor and Assoc. Forester
RANDEL, W. C. . Assoc. Professor and Assoc. Forester
SHAIN, W. A. . Assistant Professor and Assistant Forester
SHIPMAN, R. D. . Assoc. Professor and Assoc. Forester
WARNER, J. R. . Assoc. Professor and Assoc. Forester

Today the forestry major finds many and varied opportunities for employment with private concerns, state, federal, and other agencies. He may be employed as a manager or administrator or forest lands, as a technical specialist in extension, fire protection, recreation, or one of many other activities pre-supporting professional forestry knowledge. For the graduate learning an advanced degree, there are jobs in academic work and research conducted by both public and private agencies.

The curriculum consists of basic courses throughout the freshman and sophomore years with emphasis on more advanced courses in the correlated fields during the remaining junior and senior years. The advanced courses provide the student an opportunity to acquire a knowledge of forest entomology and pathology, silviculture, and wildlife during his junior year. The senior is offered courses in forest economics, products protection, regulation, valuation. The wide choice of approved electives during the last two years provides the student with an opportunity for a more diversified education.

Horticulture

SEN, T. L. . . Head of Department and Professor
FULMER, J. P. . . . . Assistant Professor
OGLE, W. L. . . Associate Professor
SEFICK, H. J. . . Associate Professor
STEMBRIDGE, G. E. . Assistant Professor
THODE, F. W. . . Associate Professor
VanBLARICOM, L. O. . . Professor

The basic aim of the Department of Horticulture is to train young men and women for the purpose of exploiting to the fullest extent the many and varying phases of horticultural enterprises. Each phase (fruits, vegetables, flowers, post-harvest handling) are very important to the economy and well-being of the state, nation, and world. Horticulture is a very young and broad science, but horticulturists are making outstanding contributions to the biological world.

As with other majors in this agricultural field, the first two years is a horticultural curriculum. The last two years, however, are devoted to specialized fields involving horticulture, such as the conditions affecting fruit, plants, and vegetable plants.

Opportunities in Horticulture include vegetable and fruit farm management, nursery management, landscape gardening, fresh fruit and vegetable and food products inspection, plant breeding, agricultural extension service, experiment station research, and food canning, freezing and dehydration. Other occupations include work with florists, seedsmen, fruit products companies, fungicide and insecticide manufacturers and dealers, and spraying and dusting equipment manufacturers and dealers. These are some of the many agencies for the horticulture graduate. Horticulture is one of the broadest of the agricultural fields. Under the leadership of Mr. T. L. Senn, head of the department and professor, Clemson continues to fill the wide field of horticulture with qualified graduates.
Architecture

Architecture is a complex field encompassing aspects ranging from the highly technical mathematics of structure to the broadest concepts of architecture as cultural expression. As students of architecture, it is necessary to comprehend and operate within the framework of all the manifold aspects. As members of the student body of a design school, it is important to see and understand architecture as a significant area of creative design, influencing and being influenced by the other areas of design. As members of the general public, it is important to realize the many ways in which architecture, as a great environmental factor, influences life from the subconscious appreciation of a visual sequence to the use of intelligent planning and arrangement of convenience to make living a more pleasant experience.

Recognizing the diversity and importance of the architecture of today, the Clemson School of Architecture broadens the backgrounds in social sciences and disciplines the architectural students to the profession. The curriculum which leads to the Bachelor of Architecture is accredited by the National Architectural Accrediting Board. The school is a member of the Association of Collegiate School of Architecture.
CHEMISTRY AND GEOLOGY

The Department of Chemistry and Geology offers professional training in chemistry at every level and also a geology concentration for students in Arts and Sciences. In addition to professional training, the department teaches the elementary and service courses required by many of the technical curricula in the college.

Basic undergraduate training in chemistry emphasizes fundamentals in the elementary courses, and provides the theoretical background for non-majors in the advanced courses. The program leading to the B.S. in Chemistry is accredited by the American Chemical Society, and graduates are certified by the society.

There is a vigorous research program underway in chemistry, and undergraduates, graduate students, and faculty engage in research activities of their choice. Research is supported by the college, by the federal government, and by industry. Geology offers supporting course work for students in ceramics, engineering, and agriculture in addition to the courses for the geology majors. The concentration in geology has attracted a number of students since its inception. In addition to routine work, the geology staff is engaged in several research projects.
Air Science

COL. C. B. THOMPSON . . . Professor of Air Science
LT. COL. J. D. COTTER . . . Executive Officer
LT. COL. J. W. FIEBIG . . . Assistant Professor
CAPT. K. D. HILL . . . . Assistant Professor
CAPT. T. H. HOWARD . . . Assistant Professor
MAJOR J. H. REED . . . . Assistant Professor
CAPT. T. M. SKILLMAN . . . Assistant Professor

The ultimate goals of the Clemson A.F.R.O.T.C. program are to give the students an introduction to air power, and to instill in them the leadership training that is essential to an Air Force Officer. The A.F.R.O.T.C. program at Clemson which implements this mission consists of the basic and advanced courses, and the advanced training consists of a select group from the basic group. Both courses are generalized in nature, are designed to give the student a broad picture of the Air Force organization and mission, and all to stimulate a growing desire on the part of the student to enter the Air Force when his college days are over. The student learns military courtesy, personal leadership, the standards of basic flight training, and the techniques of aerial warfare in all his courses.

A Summer Camp, between the cadet’s junior and senior years, gives the cadet an insight into the every day life of an officer as well as the operations of the United States Air Force. Upon graduation and the completion of the advanced course, the cadet receives his commission and is ready to join the ranks in the United States Air Force.

Industrial Management

TREVILLIAN, W. D. . . . Head of Department and Professor
DAVIS, C. C. . . . . . . . Associate Professor
EDEL, W. C. . . . . . . . Assistant Professor
LaROCHE, E. A. . . . . . . Associate Professor
SCOTT, E. B. . . . . . . . Instructor
WHITEHURST, C. H., JR. . . Assistant Professor
WILLIS, S. M. . . . . . . Associate Professor

Those students planning to follow a career in industry or business on an administrative level have witnessed the strengthening and improvement of the Industrial Management program. This curriculum constitutes a program of training that enables students to gain professional training for these management positions. With these aims in mind, the department emphasizes courses in humanics and social studies during the first two years, as well as those designed to provide the necessary foundation in mathematics for the administrator. During the final two years, the student concentrates on various basic engineering, economic, and technical courses designed to furnish a balanced curriculum for those entering the fields of business and industry. The student is acquainted with a variety of subjects which enable him to understand the operations of industry, the problems which may arise, and the feelings of the employees.

The Department of Industrial Management is under the leadership of Dr. W. D. Trevillian who earned his degree from the University of Virginia and gained his doctorate degree in 1954.
The Army R.O.T.C. Department is organized as a Senior Division with the mission of procuring and training college students so that they may qualify upon graduation as commissioned officers in the Army of the United States. In 1941 with the outbreak of World War II, Clemson furnished approximately 6,500 graduates and former cadets to participate in that conflict, one of the largest participants among colleges and universities in the United States. Of those Clemson men in uniform, 371 gave their lives. One obtained the rank of Lieutenant General, 70 Colonels, 215 Lieutenant Colonels, 575 Majors, 1,195 Captains, 1,812 Lieutenants; one rose to the rank of Rear Admiral, 12 to Commander, 34 Lieutenant Commanders, 33 Lieutenant Senior Grade, 102 Lieutenant Junior Grade, and 94 Ensigns.

Since World War II, Clemson graduates have continued to distinguish themselves in the Military Service.
Physics

HUFF, L. D. . . . . . . Head of Department and Professor
COLLINS, T. F. . . . . . . Instructor
GILREATH, J. A. . . . . . . Instructor
LINDSEY, T. J. . . . . . . Professor
MILLER, J. E. . . . . . . Professor
MILLER, M. G. . . . . . . Assistant Professor
REED, A. R. . . . . . . Associate Professor
REED, C. A. . . . . . . Professor
SHACKELFORD, M. . . . . . . Assistant Professor
SKOVE, M. J. . . . . . . Assistant Professor
STILLWELL, E. P., JR. . . . . . . Assistant Professor
VOGEL, H. E. . . . . . . Associate Professor
WOOD, K. L. . . . . . . Associate Professor

The Department of Physics, through its curriculum, endeavors to provide a thorough working knowledge of the fundamental principles of physics. By combining sound theoretical training and extensive laboratory work in the various branches of physics with considerable concentration in one related field such as that of chemistry or electrical engineering, this course prepares the student to meet the challenge of today's modern industry. In addition to taking the necessary basic foundation subjects, the student is required to take at least two advanced mathematics courses.

Other technical courses are advised, but optional. Completion of this curriculum provides the student with an adequate preparation to enter research in an industrial or government laboratory. The curriculum is a proper and sufficient background for advanced work in the field of nuclear science or for graduate work in Physics.

Poultry

BARNETT, B. D. . . . . . . Head of Department and Professor
BOONE, M. A. . . . . . . Associate Professor
COOPER, J. B. . . . . . . Associate Professor
STEVENSON, F. . . . . . . Associate Professor
TURK, D. E. . . . . . . Assistant Professor

Clemson's Poultry Department functions as an educational unit to provide well-trained graduates for service to the poultry industry directly and the many allied industries that sell products to poultry men and buy poultry products.

The departmental curricula are designed to provide training in the basic sciences within the application of scientific principles to production, processing and marketing of poultry products. In addition to its educational function, the Poultry Department conducts logical science and applied poultry science. Every professor in the Poultry Department is a 12-month employee with multiple duties in both teaching and research. This provides opportunity for the professor to become intimately familiar with poultry problems to the benefit of the students. Each professor is a research specialist in the area in which he teaches. This has obvious advantages over mere textbook acquaintance with the subject-matter presented.

The close relationship of teaching and research permits the student to acquire some knowledge and appreciation for research as the basis for the scientific advancement of the industry. The Department's graduate program requires student participation in research in a major way.

Poultry Science provides employment in varied fields related to the production and use of poultry products. Graduates enter directly related fields such as poultry farm operation, hatchery managers, sales and servicemen with feed manufacturers and poultry equipment concerns, and extension agents.

The poultry student must include those courses in his curriculum which are directly related to poultry. Such courses include egg production, marketing, and research. Through a diversified and well-balanced course of study, the poultry department continually strives to graduate students whose education enables them to go directly into their life work.

POULTRY: Boone, M. A.; Cooper, J. B.; Barnett, B. D.
A decade ago the Department of Mathematics had a staff of sixteen, only one with a doctoral degree. The minimum number of courses required for a B.S. degree with a mathematics major were offered. Today the staff consists of thirty-four members including five Ph.D.'s and eight graduate assistants. Sixteen undergraduate courses beyond the sophomore level and seventeen graduate courses are offered. A Master's and undergraduate degrees in math are currently provided, as well as a wide choice of courses for students minoring in math. Two of our three Clemson students are enrolled in one or more mathematics courses. The success of individual research efforts by staff members is reflected by professional publications in a variety of technical areas. During the past few years the department has focused particular attention on the important field of applied mathematics. Advanced desk calculating equipment has been added and a modern high-speed computer center has been developed. Clemson's undergraduate curriculum in applied mathematics is among the strongest in the nation. Approximately fifty students are now enrolled in this curriculum. The demand by industry, government, and graduate schools for students who earn this degree far exceeds the supply.

OWENS, W. H. . . . . . . . Instructor
PEARCE, J. F. . . . . . . Assistant Professor
RAYNAL, C. E. . . . . . . Lecturer
RINGOLD, M. S. . . . . . Associate Professor
THOMPSON, E. A. . . . Assistant Professor
TUTTLE, J. E. . . . . . . Associate Professor
WAITE, E. E., JR. . . . Associate Professor
WHEELER, H. J. . . . . . Assistant Professor

Social Sciences are those courses that embody the fields of human environment and human relations. The different courses taught in the Department of Social Sciences at Clemson include history, philosophy, religion, psychology, sociology, economics, and government.

Freshman courses provide the beginning student with facts of past history and government. Sophomore delve deeper into history and government, obtaining a basic background in these fields.

A knowledge of economics is an asset to anyone entering business at any level. A one-year course in economic principles is required in many major courses at Clemson, and higher level courses are offered for those students who desire a deeper, better-developed knowledge of economics. A major in economics is offered students who wish to enter some field related to economics, or who wish it as a background for entering business.

The psychology and sociology courses give the student a better understanding of his personality, his environment, and his relationships with his fellowmen. The sociology courses include those that deal with the development of human society, its organization, and the principles upon which our society is founded.

The department serves to round out the student's education. These courses should enable the student to grow into a better citizen and make a greater contribution to society.
English And Modern Languages

The English and Modern Languages Department provides a broad basis for all of the other departments at Clemson, as well as offering a major itself. Students may choose from courses ranging from technical writing to English literature, as well as courses in public speaking, vocabulary building, and business English. Students who receive a degree in English are required to take a wide variety of these courses plus elective courses in specialized grammar and literature. They receive a very broad background in the English language and become well versed in almost all phases of English.

The Foreign Language Department offers the student a wide variety of courses in the different foreign languages. Our Foreign Language Department is rapidly expanding and more and more students are realizing the need to be familiar with foreign languages. This department plays a vital role in providing a well-rounded education for the Clemson students.
Chemical Engineering

LITTLEJOHN, C. E. Head of Department and Professor
ALLEY, F. C. Assistant Professor
BAASEL, W. D. Assistant Professor
BARLAGE, W. B., JR. Assistant Professor
HARSHMAN, R. C. Associate Professor
McCORMACK, J. T. Professor
MEENAGHAN, G. F. Associate Professor
THOMAS, R. B. Assistant Professor

Through the gift of nearly a million and a quarter dollars from the Olin Foundation, facilities for chemical engineering education and research at Clemson College are the finest in the Southeast and among the best in the country. In addition to these facilities, the chemical engineering staff has grown from two to six over the last five years. All faculty members hold doctorates in their fields and have educational backgrounds drawn from ten different colleges and universities.

In addition to a strong undergraduate program which emphasizes the fundamentals of Chemical Engineering rather than pure technology, graduate work is presently being offered leading to the Master of Science degree. Beginning in September 1962 graduate studies leading to the Doctor of Philosophy in Chemical Engineering will also be offered.

Research is presently being conducted in many areas of chemical engineering by faculty, undergraduate, and graduate students. Such a research atmosphere, coupled with a strong sense of professional pride and responsibility, also contribute to a sound, well-rounded chemical engineering education at Clemson College.
Civil Engineering

RICH, L. G. . . . Head of Department and Professor
FORD, J. M. . . . . Associate Professor
McCORMAC, J. C. . . . . Associate Professor
McCUTCHEON, A. J. . . . Associate Professor
ROSTRON, J. P. . . . Associate Professor
TRIVLEY, I. A. . . . Professor

The Civil Engineering curriculum is designed to give the student a thorough knowledge of the laws of physics, chemistry and mathematics. The great structural needs of our growing nation have given rise to an ever-increasing need for well-trained civil engineers.

Thus, here at Clemson, the Civil Engineering Department offers courses designed to give the student a knowledge of the basic engineering courses. Shop courses give the student an understanding of the fabrication methods of machine parts and the various methods of plant operations. Various courses in structure are also a very important part of the Civil Engineering curriculum. These courses give the student a broad knowledge of the various means of construction techniques, as well as the advantages and disadvantages of construction materials. These courses along with numerous others qualify a graduate in Civil Engineering in almost all fields of structure from bridges to gigantic skyscrapers.

The Civil Engineering Department is a rapidly growing department here at Clemson. New courses in sanitary engineering, hydraulics, and water resources have been initiated recently and should add greatly to the increasing need for qualified men in these fields. Thus the Civil Engineering curriculum is fulfilling a vital need of our growing economy.

Engineering Graphics

BRADBURY, D. W. . . Head of Department and Professor
BANISTER, R. A. . . . Associate Professor
BLAKENY, E. D., III . . . . Instructor
CAMBELL, R. S. . . . . Instructor
CARTER, C. W. . . . Assistant Professor
CLEMENT, W. B. . . . . Instructor
HAMILTON, A. F. . . Associate Professor
HILLEY, W. T. . . . . Instructor
JAMESON, L. H. . . . . Instructor
McHUGH, C. M. . . . . Associate Professor
MEISSNER, A. T. . . . . Instructor
WALKUP, J. B. . . . Lecturer

Almost every student at Clemson becomes at least slightly acquainted with the Department of Drawing and Design sometime during his college career. The six courses offered by the department are designed to give the student some knowledge of drafting procedure, technical sketching principles, machine drawing and the use of graphical terms. This knowledge is important to those engaged in the various forms of technical and scientific study. It gives the engineering student a general preparation for engineering design and also acquaint him with the terms and procedures needed in working out plans with the draftsman. The management student finds the knowledge gained from these courses useful in communication between the management and engineering profession. Those in the field of textiles find this department useful when new textile designs are needed. The principles and procedures acquired from these courses may also be useful to the student in work apart from his chosen profession.

Five basic courses are at present offered by the department on the freshman level. There is also offered one advanced course which applies the principles already learned to the solution of space and mathematical problems of interest to the engineer.
Electrical Engineering

THURSTON, J. N. . . . Head of Department and Professor
BALL, W. L. . . . . . . Associate Professor
BRITAIN, J. E. . . . . Assistant Professor
BROYLES, H. E. . . . . Associate Professor
CREAGER, P. S. . . . . Visiting Professor
FITCH, L. T. . . . . . . Assistant Professor
GOODIN, C. P. . . . . Associate Professor
KERSEY, R. N. . . . . Associate Professor
MARTIN, J. C. . . . . Associate Professor
POE, H. V. . . . . . . Associate Professor
ROCHESTER, W. F. . Assistant Professor
ZINK, W. T. . . . . . . Associate Professor

For many years, the Electrical Engineering Department at Clemson has been one of the largest from the standpoint of degrees granted. It offers work over a wide range of frequencies from power line values to microwaves, and ranging from submarine applications to communication elements in satellites.

This year the department has continued to work with the Southern Bell Telephone and Telegraph Company in offering a series of communications and electronics courses for engineers of this company. This Clemson school is now in its fifth year.

Plans are being made to augment the graduate offerings of the department. The number of students interested in working toward advanced degrees has been increasing rapidly, with employees from local industry among those who wish to work toward the M.S. degree.

Engineering Mechanics

MOORMAN, R. W. . . . Head of Department and Professor
CASTRO, W. E. . . . . Assistant Professor
DIRKSEN, L. K. . . . . Assistant Professor
GAMBRELL, S. C., JR. . Assistant Professor
MITCHELL, C. R. . . . . Assistant Professor
NOWACK, R. F. . . . . Associate Professor
SMITH, W. A. . . . . . . Assistant Professor
NUNER, W. B. . . . . . . Assistant Professor
WOOD, D. J. . . . . . . Assistant Professor

The primary function of the Department of Engineering Mechanics is the teaching of undergraduate courses in Engineering Mechanics, Mechanics of Materials and Fluid Mechanics. These courses are classified as basic engineering sciences and are required to varying degrees in each of the engineering curricula and in architecture.

In addition, the department offers senior electives and graduate courses in the more specialized studies of Mechanical Vibrations, Advanced Strength of Materials, Experimental Stress Analysis, Elasticity, Hydrology, and Open Channel Flow.

The staff of this department includes some of the best in the field of Engineering Mechanics. One of the department's instructors, Mr. J. Paul Ulrick, is continuing his studies for the terminal degree at the University of Florida, having been awarded a National Science Faculty Fellowship in recognition of his efforts and ability.

The department welcomes three new members to its ranks: Dr. Don J. Wood in the field of fluids, and Messrs. L. K. Dirksen and C. R. Mitchell in the area of solids. Including these additions, each member of the staff has earned at least one graduate degree; those who do not have the terminal degree are planning to continue studies in that direction.
Industrial Engineering

LAITALA, E. . . . Head of Department and Professor
BROCK, D. C. . . . . Associate Professor
BROCK, J. L. . . . . . . Professor
COUCH, J. H. . . . . . . Associate Professor
DUNKLE, B. E. . . . . Associate Professor
MEEKS, G. D. . . . . Assistant Professor
MORGAN, H. E. . . . . Assistant Professor
NEWTON, A. F. . . . Assistant Professor
REID, T. P. . . . . . . Instructor

The work of the department has centered about continuing efforts to clarify instructional goals, to improve laboratory facilities and instrumentation, and to find competent staffs for upper level course instruction. The results of some of these efforts are not always readily discernable except to those who are closely associated with them. Other efforts manifest themselves tangibly as a visit to the Industrial Engineering laboratories would reveal. Obsolete equipment is disappearing and new equipment incorporating the latest developments of engineering are making their appearance. An engineering student of a year ago will be surprised to find the old belt-driven lathes gone and that machines based on entirely different principles are replacing them. Already on the floor are electrical discharge and ultrasonic machines. Chemical-milling is a new development being experimented with by students. Another noticeable characteristic is the addition of instrumentation. This is an essential requirement for advancement and understanding of knowledge is predicated upon the ability to measure and to measure accurately.

The department is seeking additions to its staff to give instruction of the most advanced nature and to initiate research to extend understanding of old as well as new developments.

Mechanical Engineering

COOK, J. C., JR. . . . Head of Department and Professor
EDWARDS, J. L. . . . . Professor
ELROD, A. C. . . . . . . Associate Professor
ELROD, W. C. . . . . Assistant Professor
HUDSON, W. G. . . . . Associate Professor
JOHNSON, J. K., JR. . . Assistant Professor
LEWIS, A. D. . . . . . . Professor
PERRY, R. L. . . . . . . Associate Professor
RAUSCH, K. W. . . . . Professor
WATSON, S. M. . . . . Professor

The Department of Mechanical Engineering is one of the largest degree-earning departments at Clemson. Approximately one-tenth of the undergraduate students at Clemson are enrolled in Mechanical Engineering.

The curriculum in Mechanical Engineering is planned to provide a broad, fundamental background. Following their basic science and mathematics courses, students in the junior year are required to take engineering science courses in the departments of Mechanical, Electrical, Chemical, and Metallurgical Engineering and in the Department of Engineering Mechanics. The senior year is devoted to courses in design and analysis and students are allowed some latitude in taking courses in the fields of gas and steam power, air conditioning, automatic control principles, gas dynamics and heat transfer. Senior electives are available to students in the fields of advanced mathematics and physics. The entire program has a strong humanities stem.

The members of the Mechanical Engineering faculty are engaged in diversified projects which contribute to engineering knowledge.

Food Technology and Human Nutrition

MITCHELL, J. H. . . . Head of Department and Professor
BORGMAN, R. F. . . . . Associate Nutritionist
HINDMAN, M. S. . . . Assistant Nutritionist
LEASE, E. J. . . . . . . . Nutritionist
SHEWFELT, J. H. . . . Associate Professor
WHEELER, H. O. . . . Assistant Nutritionist

Clemson’s Food Technology and Human Nutrition Department has excellent facilities for teaching and research. Its active research program in the area of food science and nutrition is supported by the South Carolina Experiment Station and research grants. The Food Industries Building houses pilot plant equipment for instruction in many food processing operations. Laboratories, small animal rooms, product development, and taste panel rooms in the adjoining air-conditioned Plant and Animal Science Building are well equipped. The staff includes personnel skilled in food technology, nutrition, biochemistry, and related areas.

Clemson’s curriculum in food technology, based on recommendations of the Institute of Food Technologists, emphasizes the scientific principles involved in the technical operations of modern food industry. It also provides an excellent foundation for the student who wishes to specialize in graduate school in several areas of food science and technology. These include food and flavor chemistry, nutritional biochemistry, food engineering, and food microbiology.

To the manufacture, storage, and distribution of foods, the food technologist applies a knowledge of chemistry, microbiology, biology, engineering, and mathematics. The graduate food technologist has the opportunity of selecting a career combining his technical training with his special interests or abilities in areas as the following: research and development, manufacturing and production, technical sales, and management.

Textiles

TEXTILE CHEMISTRY

LINDSAY, J. . . . Head of Department and Professor
CHANIN, M. . . . . Professor
GOLDEMERY, M. . . . Associate Professor
ROBBINS, P. E. . . . Assistant Professor

WILLIAMS, W. B. . . . Associate Professor

YARN MANUFACTURING

GAGE, G. . . . Head of Department, Professor, and Dean
MARVIN, J. H. . . . Assistant Professor
THOMSON, D. P. . . . Associate Professor
WILSON, H. B. . . . Assistant Professor

The Clemson School of Textiles has become one of the most demanding departments at Clemson College for well-trained and qualified graduates since more textile plants are moving south. The School of Textiles offers three major courses leading to a Bachelor of Science degree to provide the interested students with a wide variety of courses to meet the demanding necessities in the field of textiles. The three curriculums are the same for the freshman year. Having completed the basic textile curriculum, the student has the three options: chemistry, management, and science, to choose from.
Clemson Graduates Continue Education Through Research

The graduate program at Clemson provides training in special fields, offers instruction in the methods of independent investigation, and fosters the spirit of research scholarship. The purpose of the Graduate School is to offer various degrees, and unify administrative procedures concerning all graduate work at Clemson. Dr. Hugh Macaulay, the dean, serves as chairman of the Graduate Council.

The opportunities available to the college graduate in the Graduate School cover a wide range of fields. Courses are offered leading to the degree of master of science in several of the fields of agriculture, engineering and zoology. The degree of Master of Education and the degree of Master of Agriculture, Plant Pathology and Entomology are three fields in which degrees of Doctor of Philosophy can be obtained. Recently, the Graduate School has added a Masters degree in physics.
Graduates must keep equipment in excellent condition in order to assure accurate results on experiments.

Controlled chemical reaction are the first step to a successful experiment.

School of AGRICULTURE Provides Training In All Modern Farming Techniques

Clemson’s School of Agriculture stands as one of the foremost in the nation, and its enrollment represents a major portion of the Clemson student body. In the broad field encompassed by this school, students must study everything from insect life to mechanical engineering to become well-prepared modern agriculturists. They are assured of the very best training in their specialized fields and the classroom theory is brought to life in the laboratories and on field trips. This application of theories enables the School of Agriculture to make notable contributions to the state and nation through current advancements in agricultural technology.

The School of Agriculture is composed of three main divisions: Resident Teaching, Research (Agricultural Experiment Station), and Extension (Agricultural Extension Service). Some of the job opportunities in each of eight areas of employment are indicated below:

- **Farming**—both general and specialized farm production;
- **Research**—research with Agricultural Experiment Stations, the United States Department of Agriculture and other agencies in the fields of farm production, processing, marketing, and agricultural engineering;
- **Education**—positions with high schools, colleges and universities, agricultural extension services, and farm organization;
- **Industry**—employment related to meat and poultry packing, farm machinery, fertilizers and lime, pesticides and herbicides, dairy processing, food and seed processing and feed management, land appraisal, marketing, storage and warehousing, business-banking, credit and private business;
- **Communication**—newspapers, publications, magazines, radio and television;
- **Agricultural Services**—public services with the USDA and state departments of agriculture, and private service.

- **AGRICULTURAL ECONOMICS**
- **AGRICULTURAL EDUCATION**
- **AGRICULTURAL ENGINEERING**
- **AGRONOMY**
- **ANIMAL HUSBANDRY**
- **DAIRY**
- **ENTOMOLOGY**
- **FORESTRY**
- **HORTICULTURE**
- **POULTRY**
- **PRE-VETERINARY**

School of ARCHITECTURE Cultivates Creative Talent And Trains In Basic Design

The architect, with the use of fundamental considerations of function, structure, design, and beauty, develops man's physical environment. He must maintain an open mind and a progressive attitude and also maintain the ability to utilize expanding improvements in the field of architecture in order to serve society in the best way possible.

The curriculum of the future architect includes a broad background in the social sciences as well as a thorough training in the various disciplines of the profession. The most important course to an architectural student is the study of design. This course engages much of the student's time and enables him to creatively apply the knowledge gained in theory. To widen the student's experience, a varied schedule of construction lectures, visiting lecturers, critics, and field trips are provided each year. The future architect studies for five years to earn the professional degree, Bachelor of Architecture, with basic options in design or structure.

ARTS & SCIENCES
Provides Broad Background
In Various Liberal Fields

The School of Arts and Sciences offers a broad, general education to students desiring preparation for intelligent citizenship and vocational efficiency. The school, acting as a service school, furnishes instruction in the social sciences, the physical sciences, and the humanities.

The first two years involve introductory work in various fields of study to provide a breadth of view and encourage the student in his own education. The last two years are devoted to distinct, selected fields of study.

- ARTS AND SCIENCES
- CHEMISTRY
- EDUCATION
- INDUSTRIAL EDUCATION
- INDUSTRIAL MANAGEMENT
- PHYSICS
- PRE-MEDICINE

   INDUSTRIAL MANAGEMENT
School of ENGINEERING
Stresses Basic Principles
Needed In Engineering Work

Clemson’s School of Engineering enrolls the largest percentage of students of any of the various schools. Realizing the need for well-educated and competent engineers to meet the demands of the highly industrialized nation in which we live, the School of Engineering has developed and progressed in order to be able to provide the earnest student with modern equipment, up-to-date methods, practical applications, and advanced theory placing emphasis on the students’ specialties.

- AGRICULTURAL ENGINEERING
- CERAMIC ENGINEERING
- CHEMICAL ENGINEERING
- CIVIL ENGINEERING
- ELECTRICAL ENGINEERING
- INDUSTRIAL ENGINEERING
- MECHANICAL ENGINEERING

Dr. Laitala shows an I.E. 401 student how to use the new ultrasonic drill.

LINVIL GENE RICH, Dean of School

These engineering students record data from a large diesel engine.
This student, majoring in Civil Engineering, gains practical experience in the use of the transit.

These Civil Engineering students compress a soil sample to determine its strength.

Earle Hall, only one of our beautiful engineering buildings, is home base for all Chemical Engineers.
ENGINEERING

- **ALLEN HERBERT R.** Conway, S.C.  
  ELECTRICAL ENGINEERING  
  Honors: 1; AIEE-IRE 3, 4; Beta Tau Sigma 2, 3, 4;  
  Treasurer 3; President 4; CCP 4; Pershing Rifles 2;  
  Freshman Platoon 1.

- **ARNETTE, CLYDE G.** Dillon, S.C.  
  MECHANICAL ENGINEERING  
  Honors: 1, 2, 3; General Electric Scholarship 4; ASME  
  3, 4; Executive Sergeant 3; Dillon County-Clemson Club  
  1, 2, 3, 4; BSU 1; Slipstick Staff 3.

- **AYERS, JOE K.** Piedmont, S.C.  
  INDUSTRIAL ENGINEERING  
  ASIE 1, 2, 3, 4.

- **BANKHEAD, JOHN M.** Silver Springs, Md.  
  ELECTRICAL ENGINEERING  
  MSA 2, 3, 4; President 4.

- **BEATTIE, MIKE R.** Charleston, S.C.  
  CIVIL ENGINEERING  
  ASCE 3, 4; Newman Club 1, 2, 3, 4.

- **BELK, JAMES F.** Columbia, S.C.  
  ELECTRICAL ENGINEERING  
  AIEE-IRE Award 3; Phi Eta Sigma 1, 2, 3, 4; Phi Kappa  
  Phi 3, 4; Tau Beta Pi 3, 4; AIEE-IRE 3, 4; Student

School of TEXTILES Provides Textile Research For Surrounding Industries

Being located in the heart of the textile manufacturing region, of which South Carolina is now the leading state, Clemson College and Clemson’s textile school are ideally situated to supply textile graduates and provide textile research for the surrounding industries. The School of Textiles is an important source in this area of the nation’s economy. The textile industry, realizing the importance of textile training, has contributed approximately one and one-half million dollars, which has enabled Clemson to have one of the top textile schools of the nation, with excellent staff, equipment, and building facilities.

In preparation for a successful career in textiles, the student spends much of his time encountering specialized courses in his chosen field in Sirrine Hall. Through approved electives in the social sciences and humanities, a well-rounded education to supplement this technical training is acquired.

- TEXTILE CHEMISTRY
- TEXTILE MANAGEMENT
- TEXTILE SCIENCE

Students check over their work in a Loom Mechanisms Lab.

Textile equipment is periodically checked to assure quality production of all textile goods.
Another Warp Beam nears completion.

In Fabric Development Lab this student determines what quality cloth is being produced.

Sirrine Hall, with its classrooms and laboratories, houses the School of Textiles.

Many things are totaled in the make-up of a Clemson man. Classes, labs, books, quizzes, and the various activities which one can associate himself with while at Clemson. The Reserve Officer Training Corps prepares students for their military future, publications initiate literary ability, musical pursuits are sated by the bands of Clemson and students who seek political experience are given a chance in the Student Government. These activities, and many more, prepare the Clemson man to face the future with an ability to compensate for human error and coordinate courses of action into an optimum goal.

As the year ends and each looks back to the work, sweat, deadlines, and problems, they see that at their elbow another is willing to fill the void left by graduation.

We at Clemson are proud and feel that no one can equal our accomplishments. Among our best assets are these activities.
Who's Who Selects Thirty-

Who's Who Among Students in American Colleges and Universities is a national honor and leadership organization for outstanding students who display exceptional character, leadership, scholarship, and service to the school. Since 1934, when Who's Who was first organized, a great number of outstanding students from all over the United States has been named to this elite organization. Recognition for these outstanding qualities has been awarded to thirty-four Clemson College students this year by their selection to Who's Who. This group selected here at Clemson includes five juniors and twenty-nine seniors with grade-point ratios ranging from 2.3 to 3.2. These Clemson students have proven themselves to be of the type whose influences of character, leadership, and scholarship have added greatly to the betterment of Clemson.
Four Outstanding Students

Selection to Who's Who is considered to be one of the most outstanding honors which a college student can receive. The students are selected from more than seven hundred and fifty colleges and universities all over the United States. Thus, the honor of being named to Who's Who becomes greater because of the limited number of students chosen. This honor is touted to be the only national recognition for students excelling in leadership, character, and scholarship on American campuses.

The campus nominating committees, composed of faculty representatives from all schools on each campus, are instructed to consider in making their selection, the student's scholarship, his participation and leadership in academic and extra-curricular activities, his citizenship and service to the school, and his promise of future usefulness.
Student Body Officers
Coordinate Committees

Clemson student government is composed of three main branches: Executive Branch, Judicial Branch, and Legislative Branch. The Executive Branch is the coordinating agency for the student body and for the judicial and legislative branches of the student government, and a medium for communication between the administration and the student body. This branch is composed of the student body officers and the four class presidents.

Before legislation is presented to the student body for approval, it is brought before the President’s Cabinet and acted upon. Chairman of the Ways and Means Committee and the Elections Committee sit in at the meetings of the executive members to offer suggestions of the findings of their committees.

This year the group sought to promote better relationships between Clemson and other schools, a second contest to select a “Miss Clemson” from Clemson co-eds, and sponsored a very successful fund-raising campaign for the Boy’s Home of America. The completion of these projects brought to a close a progressive, eventful year for the executive committee as a whole, student government, and, most important, the student body of Clemson College.
Senior Council Recommends Disciplinary Action

College students should be mature citizens, capable of making their own decisions, following the dictates of their consciences, and accepting the consequences for their decisions. As such, they are held responsible for their own actions.

The Judicial branch of student government rest in the hands of the students. The major constitutes of this branch is the High Court. It is composed of nine members, who are elected by the student body in the spring of each year. The Court elects its own chairman, vice-chairman, secretary, and draws up its own rules of procedure. These nine men have the job of deciding the guilt or innocence and, if guilty, of pronouncing the penalty on students who would belittle the name of Clemson.

Students brought before the High Court have the privilege of representation by one of the Court’s attorneys. All facts are presented in a closed meeting, and only the decision and sentence of the Court is announced publicly.

Student Government Committees are in effect to help the students here at Clemson to understand student government and to promote Clemson College in any possible way.

The most important of the committees is the President's Cabinet. This cabinet's primary purpose is to aid the President of the Student Body. The Cabinet is composed of the presidents of the four classes and the Vice-President, Secretary, and Treasurer of the Student Body. This committee has the power to veto any legislation passed by the Student Senate and may call meetings of the student body when it deems necessary.

Other committees of the Student Body are: Financial Review Board, Traffic Committee, Elections Board, Ways and Means Committee and rounded out with the Southern Universities Student Government Association Committee. Each committee has the responsibility of working out in detail any problems which are deemed necessary by the President and his Cabinets. Newly formed this year was the Financial Review Board, which was formed to review the financial reports of all the campus organizations. This report was then submitted to the student body.

Student Government Committees perform for the students benefit, thus forming a link between the faculty and the students.
TRAFFIC COMMITTEE: Doug Richardson, Jim Caughman, Student Representative of Student-Faculty Traffic Committee.

ELECTIONS COMMITTEE. SEATED: Pete Gray, Robert Ellis, Gray Garwood, Chairman; Bruce Tyson. STANDING: Louis Dorrity, Becky Epting, Vice-Chairman; Bill Greenman.

WAYS AND MEANS COMMITTEE. SEATED: Ken Blekney, Chairman; Jack Neely, Liaison Officer. STANDING: Russ Hebert, Attorney General.

RESIDENT COUNSELORS: A. G. Stroud and H. E. Florey.
Hall Counselors Initiate Studious Atmosphere In Halls

One of the most prominent groups on the Clemson campus is the hall counselors. These men are the “mothers” of resident students, as they seek to create an orderly and studious atmosphere in the halls and dormitories. The hall counselor must be a dependable, well-disciplined student, for his job is one of great importance.

Students desiring to be hall counselors submit their applications to the college for approval. These applications are well-screened and those students selected are of the highest caliber. His duties include inspecting rooms, keeping order, arranging for hall devotions, and generally conducting all hall activities. He may also act in the capacity of a student counselor for those students on his hall desiring his aid.

The role of the hall counselor is one of great importance on the campus. They are required to sacrifice many times in such ways as arriving early before the opening of school and staying after school has closed in June. Through their sacrifices and hard work, the “hall-mamas” help to build men of the freshmen that enter Clemson as boys.

Hugh Folk, President

Organizations Governed By Council of Club Presidents

The Council of Club Presidents is composed of all the presidents of the clubs on campus. Through the CCP, activities of all clubs on campus are coordinated to achieve the ultimate goal of every club—a better Clemson College. Each year the council provides its share of leadership in the Student Government through fourteen senators in the Student Senate. In an attempt to create the least possible conflict, the CCP establishes a schedule for all regular meetings of all organizations. When available, clubrooms are assigned to those expressing a desire.

The Council of Club Presidents also sponsors the Homecoming Display Contest.
The varied publications at Clemson College, depict the students life while at Clemson. These publications include TAPS, "The Tiger", "The Chronicle", "Bobbin and Beaker", and "Slipstick".

The literary publication, "The Chronicle" gives the student the opportunity to write and see their writings published, whether they be stories, poems, or jokes.

The technical publications give the students information of a business or mechanical nature, furnishing facts about problems which are of interest to certain students. This type of publication is exemplified by "Bobbin and Beaker" and "Slipstick".

"The Tiger" furnishes current information about college activities and problems, and express their views on controversial issues concerning the college and the student body. TAPS, as the college annual, furnishes a history of the college activities and organizations as shown in the students lives and work.

All of these publications are vital to the college for the services they render to everyone interested in Clemson College.
1962 Taps Staff Presents
History of Outstanding Year

Clemson College and the life of the student body, 1961-1962 . . . this the TAPS Staff has attempted to capture in the most lasting way, presenting it to you, the students, in one bound volume. What is Clemson? This is what we have tried to answer through our efforts in the book.

Many things had to be done to put the book out; meetings were held every Monday night; layouts had to be designed and traced; hundreds of informal photographs were required. Writing copies, pulling pictures, typing copies, and making membership lists were necessary. Then, when the deadline for the book was near, some junior staffers began dropping off, organizations cancelling, people not paying, and the deadlines not being met on time; but somehow, some way, the book finally did make the press and was published.

The staff worked hard. Many hours made us late and sleepy for the early morning classes. Often, exams and quizzes were taken without any preparation at all.

But not all was work. The numerous houseparties were relief welcomed by the senior staff, and junior staff, too. Everyone especially looks forward to the CDA and TAPS houseparty at the end of the year. This is the last time that this staff will be together as a body, so the party has as much a sentimental value as a relaxing, enjoyable time.

Now the returning staffers again begin to think of the TAPS for next year and places for improvement.

Through Hard Work Junior Staff Acquires Experience

We of the 1962 TAPS staff feel that we have presented a true picture of Clemson College as it exists in the minds and heart of all Clemson men. This 1962 TAPS is the culmination of hours on end of writing, typing, tracing, revising, copying, and proofreading.

If, 10 to 20 years from today, you can take down your 1962 TAPS and relive the experiences you have encountered this year, then the staff and the book will have accomplished their purpose. Our sleepless nights, lost study time, and deadline worries will have been worthwhile.

In addition to the work, drop-ins and houseparties have been welcome interruptions to junior and senior staffers alike. Weekends of fellowship have made our work more enjoyable and bearable.

The work has ended; the typewriters are still and silent. It is the sincere wish of the TAPS staff that you enjoy your 1962 TAPS, and that it brings you years of happiness and pleasure.
Cleanliness is next to Godliness.

The tracing table takes many hours from Tommy Page.

SEATED: Bill Davidson. STANDING: Chick Grant.
Tiger Senior Staff; Mainstay of Student Newspaper

The "Tiger", Clemson's student newspaper, has completed its fifty-fifth year of publication. The staff is open to any members of the student body who are interested in journalism and are willing to give of their time and energy each week to serve the students. Each spring the graduating senior staff elects junior staff members to fill vacancies on the senior staff.

Many hours of news gathering, writing, editorializing, checking, and proofreading precede the Friday morning delivery.

The weekly publication of the "Tiger" requires a sacrifice of time. A dedication to journalism and a desire to present campus news correctly and promptly are the only two stimulants of the senior staff.
Tiger Junior Staff Learns That Work Pays Off In End

The weekly publication of the "Tiger" is largely a result of the many hours put in by the junior staff members of the "Tiger". To be a member of the junior staff, the only requirement is to be interested in newspaper work. Each member is motivated by the possibility of becoming a senior staffer.

Some of the responsibilities of the junior staff are typing, copy, reading, cleaning the office, the nightly run to Dan's, and distribution of papers.

The junior staffers play a vital role in the work which makes a newspaper. This work will go on to insure that the "Tiger" will continue to "roar for Clemson".

Trusty pencil sharpener gets usual workout as the night wears on.

THE FEATURES STAFF: Harvey Pipor, Bob Hurley, Buddy Young, Lydia Threat, Bobby Dye, Cecil Harvey.
Revived, The Chronicle Brings Humor To Campus

Revived in 1961, "The Chronicle" has been accepted as a welcome addition to the campus. Originally established in 1897, "The Chronicle" lost interest and support during the 1930's and ceased publication. In the spring of 1961, through the efforts of an interested group of students and faculty, "The Chronicle", sporting a new format reappeared. With each new issue, the staff gains in experience, and the student body grows more enthusiastic.

"The Chronicle's" doors are open to any student who may be interested in magazine publication, be it writing, drawing or managing.

In association with the Calhoun Literary Society, "The Chronicle" encourages that literary and artistic talent which so seldom finds expression in routine classroom work.

Bill Metts, Humor Editor; and Jim Lyons, Feature Editor; search for old ideas to borrow.
George Rabasa, Circulation Manager; John Sims, Tom Kimmel, Co-Advertising Managers; and Hugh Edmonds, Business Manager; discuss new accounts.

Gerbrand Poster, seated, Jeff Groat and Edwin Shealy, standing, pose for that gentlemen's look.

Frank Griffith, Advertising Photographer; Jim Moore, Mike Wedlock and Bob Wiley, compare some stories.

The Board of Critics with Dick Magill, Chairman; Richard Twells, and Jim Lyons.

Mark Steadman, Faculty Advisor, watches proceedings from the back of the room.
Engineering Students Find Literary Outlet In Slipstick

In 1946 the students of the School of Engineering took it upon themselves to publish an informal magazine. The result was "Slipstick". The purpose of this publication is to provide the engineering student with a means of correlating his classroom theory to actual engineering practices and to introduce the reader to new advances continually being made in engineering technology.

"Slipstick" is published four times a year. In addition to these four issues, a large issue is published in connection with the annual Engineering Fair. This special issue consists of a brief resume of each engineering course at Clemson designed to acquaint visiting high school students with the School of Engineering.

The staff is composed of an editor and editorial staff, a business manager, and managerial staff, a cover designer, a photographer, and a group of responsible associates. In addition to carrying the difficult engineering curriculum, these students have assumed the responsibility of keeping his fellow students technically informed.

Lee Sims and Don Watt plan next issues advertising.

Dave Fields types copy as Charlie Wysong gives constructive criticism.
Second Semester Editor Ken Thornburg takes inventory on material.

Designer J. R. Washington puts in many hours at drawing board.

Circulation Manager Braxton Wannamaker prepares to send out the "Slipstick".

Associate members, Ray Smith, Dan White and Jim Harris, prepare next issue before deadline.

Dianne Vaughn makes work more enjoyable for Wayne Hoard and Joe Swann.
Textile Industry Speaks Through Bobbin And Beaker

The official journal of the School of Textiles is the “Bobbin and Beaker”, which is published quarterly. It was first published in November, 1939 by the Phi Psi textile fraternity, and this marks its twenty-third consecutive year of publication. Students, as well as leaders in the textiles industry, have found this magazine to contain an invaluable supply of information on such items as the development of new machinery and new methods introduced into the textile industry. Through an extensive circulation, which carries copies to most of the states and several foreign countries, “Bobbin and Beaker” has helped build prestige for the School of Textiles as well as the entire college.

At the end of each year, juniors in the textiles school are selected to become members of the junior staff. These juniors staffers work in conjunction with the senior staffers who plan, design, and edit the magazine. The senior staff is composed of students who have undergone at least one year of junior staff work. The combined efforts of these students goes to make “Bobbin and Beaker” a truly great magazine.
Blue Key Directory Staff Provides Student Roster

Each year the Blue Key publishes one of the most indispensable books on campus, the "Blue Key Directory." Contained in the directory are numerous items such as a student roster, with each student's home address, college address, box number, room number, and major course. It also contains a directory of student organizations, class officers, departmental telephone numbers, faculty and dormitory staff counselors, a college calendar, and a list of the Board of Trustees. This handy directory saves valuable time for students, faculty, and administration in regard to locating persons and places.

Freshmen Orientated To Campus By "Y" Handbook

The Y.M.C.A. "Handbook" is a guide to Clemson, edited primarily for the benefit of the new freshmen who enter Clemson. A committee from the "Y" cabinet plans and sponsors the "Handbook." It includes a list and description of the school's organizations and the entertainment provided on campus. It also offers a descriptive and informative picture of the campus and its history. Preparation for publication is begun in the spring by the staff in order to insure ample time to have the book ready for distribution in the fall.
Central Dance Association
Creates Social Activities

The dance weekends for which Clemson has become so famous are coordinated through the efficient and well-planned functions of the Central Dance Association. This organization is composed of eight senior staff members aided by sixteen willing junior staffers. Their business is entertainment.

The success of the dances is only a highlight of numerous hours of preparation which have brought big-name bands to the students of Clemson. Such celebrated groups as Hank Ballard, Jan Garber, Dean Hudson, Bobby Hackett, The Midnighters, and The Clovers provided enjoyable music through their arrangements of popular tunes. The issues of publicity, decorations, places for dates to stay, and floor arrangements must be efficiently dealt with in order to consider the occasion a success. These senior staffers bear the responsibility of making the greatest contribution to the betterment of this social life at Clemson. Possibly the biggest burden confronted by the senior staff is the selection of the eight junior staffers to succeed them. Much time and thought must go into this phase of duty in order to bring in the staffers whose ambition will be to fulfill the purpose of the Central Dance Association.

SEATED: Bow Shaw, Johnny Wien. STANDING: Charles Cuttino.

Things, as well as anxious students, start to shine as week-end nears.
Position On Senior Staff Is Incentive For Junior CDA

After the entertainment has been signed up for the weekend, the successful organization and operation of the dances depends on the junior staff of the Central Dance Association. The junior staff must work long and hard selling tickets in the dining hall and in the dormitories, painting the background decorations for the bands, maintaining orderly conduct at the dances, and greeting couples at the door.

The junior staff is chosen each spring from the group of students who show initiative by applying and attending a drop-in. The senior staff is chosen from the list of junior staffers who prove themselves capable, willing, and cooperative. There are only five dances a year that are sponsored by the C.D.A., but the junior staff is busy all the time between dances straightening out the business details and planning ahead.

In addition to the hard work and headaches there are houseparties for relaxation and escape from the technicalities of putting on a student body dance.
Clemson College Glee Club, directed by Dr. Hugh McGarity, performs throughout South Carolina and surrounding states.

Glee Club Presents Varied, Harmonious Programs

Guthier, M.                            Nicholson, C.                   Wright, L.  

The Clemson College Glee Club is an organization for those students who enjoy singing together. Having a membership of approximately forty, it is made up of male students from all four classes. To become a member a student must possess a willingness to work for the betterment of the club and give a satisfactory audition.

Performances include a Christmas program presented in conjunction with a nearby women's college and a tour of South Carolina and neighboring states each spring. As additional activities, the club has made appearances on T.V. and sings for conventions and civic organizations. The group has sung at the Southern Music Educators Convention in New Orleans and is frequently invited to participate in activities of music groups throughout the nation.

A good Glee Club is an integral part of every campus, and we at Clemson can be justly proud of ours.
DR. HUGH McGARITY, Director; RANDY MISHOE, President
The brass section poses for an informal shot.

The many hours of rehearsal pay off as the Blue Notes show their stuff at Rat Hop.

Members of the Blue Notes compose one of the most close-knit organizations on campus.
Blue Notes Performances Bring State-Wide Praise

One of the most popular college dance bands in the Southeast is the Clemson Blue Notes. Composed of talented Clemson students, the Blue Notes offer a wide variety of melodies ranging from the soft, moody music to that of a full sounding dance band. Their ability and superb showmanship have made them a much sought after group by people of all ages. The purpose of the Blue Notes, aside from providing part-time employment for talented students, is to provide the well-rounded type of music, either listening or dancing, for all people. A lot of hard work is required from the members of the band as they rehearse numbers over and over again.

This year the Blue Notes have traveled to all parts of the state and other states for engagements. They were also featured at the Clemson Freshman Dance and the Friday night dance of Rat Hop as well as at numerous other colleges and high schools in the area. These engagements have undoubtedly proven the popularity of the Blue Notes here at Clemson and throughout the Southeast.

The rhythm section features a "twisting" guitar this year.
Jungaleers And Phi Kapps Create Varied Entertainment

In order to provide a more exciting and varied style of dance music for many of the colleges in both Carolinas and Georgia, the Jungaleers have this year incorporated an unusually fine singing group, The Phi Kapps. Along with their traditionally fine performances of the great big band tunes, the Jungaleers now offer through the Phi Kapps, the popular vocal arrangements ranging in style from the Four Freshmen to the latest Rock and Roll, Rythm and Blues, and swing.

The Jungaleers and the Phi Kapps have received especially favorable and enthusiastic compliments from such events as the Columbia College Christmas Dance, The Brenau College Cotillion, the Winthrop College Junior-Senior and Clemson’s Military Ball.

With the exception of the girl vocalist, all members of the band are chosen from the Clemson student body, and selection is based on musical ability alone. Auditions are held at the beginning of each semester, and the resulting spirit of competition has helped to maintain the Jungaleers traditional high quality of musical entertainment.
Recently organized Phi Kapps add variety to Jungaleers. William Stephenson, Emerson Byrd, Speight Bird, Jakie Weichel.

A small group forms a "jam" session during weekly practice.
Clemson’s Little Theater Brings Broadway To Campus

Organized in 1935, the Clemson Little Theatre has provided the Clemson campus and the community with comedy, drama, and musicals. The membership of the theatre group is composed of Clemson students, local townspeople, and their wives. They work hard on their productions, and through this effort they have come up with topnotch productions.

The entertainment presented varies from classical plays to Broadway hits. The Little Theatre strives to foster artistic achievements in the arts and crafts of the theatre, as well as stimulating interest and creativeness in the field of drama. Major productions are produced each year in addition to other lesser activities, and each member is encouraged to participate in at least one production during the year. The plays range in variety, and during Religious Week, a play is presented with some religious significance. Other plays on the lighter side are also presented throughout the year.

The Little Theatre serves a growing need on our college campus while offering a dramatic outlet to all interested students. The public is cordially invited to attend all performances during the year.

I told you to lay off that stuff. That’s my bottle.

"See How They Run" was an action-packed comedy.
Clemson and surrounding area provide outstanding talent for Little Theatre.

Member of the cast of "GiGi" seems to be pondering next line.

The cast of "GiGi" presents a delightful comedy at Clemson Little Theatre.

Last-minute preparation starts before play time.

Make-up plays an important role in dramatics.
Clemson’s Own High Fidelity Station Presents “Sav-a-Life”

Completing the fourth year of broadcasting, the staff of WSBF, the Student Broadcasting Facilities of Clemson College, continued to strive to provide the best in listening for Clemson and the surrounding area. Since the addition of FM, which enables the station to be heard around the area for a considerable distance, WSBF has provided interesting, informative, and educational programs. The staff presents a program of music that will please a varying audience, plus the news broadcasts, panel shows, and athletic events.

Prior to the Christmas holidays, WSBF presented its annual “Sav-a-Life” Marathon. At this time the station stressed the need for careful driving during the holidays. The station also gave seat belts to lucky individuals. In the past, the station has received awards for this type show from the National Safety Council.

WSBF is currently a member of the Intercollegiate Broadcasting system and an associate member of the South Carolina Broadcasting Association. Future plans include an extension of educational programming concerning topics of both local and national interest which will broaden its program to cover an even wider range of interest.
Hector and Don work late into the night during 109 hour Marathon.

SENIOR ENGINEERS: Joe Novak, John Scherer.

SENIOR ENGINEERS: Lawton King, Robert Teague, Oscar Funderburke.
WSBF Junior Staff Performs Many Broadcasting Functions

The Junior Staff of WSBF constitutes a major part in the organization of the Radio Station. All students that join the station as new members are placed on the junior staff.

It is on the Junior Staff that students learn the basic operations of WSBF or of any radio station. The fine points of announcing, the complex operation of engineering connected with radio broadcasting, the art of procuring supplies in the business field, and the many other things which have given WSBF a quality sound of its own . . . All are learned on the Junior Staff. The Senior Staffers lend a helping hand whenever necessary so that the Junior Staffers, in the future, can continue to operate the Student Radio Station of Clemson in a professional manner.

Indeed, the Junior Staffers at WSBF play an important role in the life of the station. Without them, there would not be a "Radio Voice of Clemson College".

Junior staffers take time out to pose for a picture. Tommy Harmon, Tommy Stafford, Jim Grastie, Weldon Crenshaw, Wofford Boyd, Bo Moorefield.
"As far as I'm concerned, this place can stay dirty."

Many program sheets require constant typing by Jr. staffers.

Junior Program Staff checks week's program.

"Good night from WSBF."

Expensive equipment needs frequent checking to ensure proper operation.
The Tiger Band is well known throughout South Atlantic

Clemson College has long had the reputation of having tremendous school spirit. Probably the greatest element supporting this enthusiasm has been the Clemson College Tiger Band. Throughout this school year, and especially during football season, the Tiger Band has aided in encouraging the students to stand up for Clemson.

The band is under the direction of J. H. Butler and drum major Joe Maffett. Through the combined work of these two individuals, the programs and drill formations are planned and designed. They are the ones responsible for the success of the band.

During the football season, the band gives pre-game and halftime performances. These demonstrations of precision marching and music hold the crowd's uninterrupted attention until the last step has been taken and the last note played.

To present a program such as the ones presented by the Tiger Band, long hours of planning and practice are necessary.
Tiger Band possesses a well-formed student group with outstanding leadership.
Band Day! Three thousand high school musicians climax a thrilling performance at "Death Valley" with a salute to Alma Mater.

The traditional color of the Big Saturday game is enhanced by the Tiger Band's spectacular marching routines.

Tiger Band Color Guard, commanded by Bobby Reynolds, is a colorful part of gridiron performances.
Two Concerts Presented By Clemson's Concert Band

Another feature of the Tiger Band is the majorettes. These Clemson lassies are under the direction of Head Majorette Nancy Thornton. These girls add a touch of color, beauty, and femininity with their footwork and baton twirling.

The Clemson College Concert Band, under the direction of J. H. Butler is composed of about 35 outstanding musicians from the Clemson student body. The Concert Band is distinguished throughout the state for its fine musical performances.

The students participating in the band form a closely knit fraternity. The band members live together in a designated section of the dormitories. This policy enables them to function as the precision unit they are.

At the conclusion of the school year, the Tiger Band had a banquet at the Clemson House. This banquet fell on Junior-Senior weekend. At this banquet awards were presented to the outstanding members of the band. The highest award is that presented to the outstanding freshman. This past year the award was shared by Jerry Ray and Eddie Collins. Block letters, sweaters, and jackets are presented to those individuals who have been members for a specified number of years. This year Block "C" jackets were presented to three-year members.

A student's junior year at Clemson is one of great advancement. The Junior has become a part of the true Clemson by participating in campus activities and organizations. A Freshman's fascination and a Sophomore's self-independence have matured into a realization of what his school means to him.

By the time the third year arrives the student is well into his major courses of study and begins to dream of what he can accomplish once he has graduated. Much work is to be done if he is to achieve his goals and the Junior has enough experience to realize where work, on his part, is most urgently needed.

Professional organizations, social groups, and many other activities occupy much of the Junior's time as he grows into a better citizen. The sale of book covers, barbecued dinners before ball games, and the exciting Junior Follies are some of the projects undertaken by the Junior Class. Much time is spent working with his class and planning for his last big year at Clemson.
Keep up with your studies every day, and you can pull a 4.0—ask anybody.

Students lost no time in getting home for Christmas holidays in spite of the bad weather.

Upperclassmen have learned the value of outside reading as an aid to studies.

Another year rolls around: what in the world are they going to do with all the cars?

A breath-taking panorama of our beautiful Clemson campus.

A well-rounded curriculum is a necessity for all students nowadays. Isn't it, Bobby?

The Sophomore year at Clemson might well be called a year of wishful anticipation. As a Sophomore, the “wise fool” gains a feeling of greater importance. He looks forward to new experiences and more work. However, the Sophomore also delights in seeing the bald-headed “Rats” hopelessly lost in the maze of classrooms and buildings, for he can remember when he was once a “hapless Rat” in the same predicament. The Sophomore takes great pride in being able to tell a “Rat” all he knows about everything here at Clemson.

The Sophomore year is one of hard work and concentration. Playing, partying, and relaxing, as well as hard work and study, are all a part of the new year. The Sophomore can look to the future and sigh, or look to the past and laugh, but he stops, takes a second breath, and plunges into the new year with a little more knowledge of what lies ahead.
When the weekend finally rolls around, neither rain, sleet, nor snow hampers the Clemson Man.

Down, down, down to the lower lobby of the Chemistry Building.

The midnight oil burns later and later as exams come closer and closer.

The "Barracks Barber Shop" becomes the most frequented place on campus as another drill day approaches.

SOPHOMORES

For the last time... get those ledges clean.

Tigerama was crazy...
Confusion, bewilderment, uncertainty, adjustment, and adaptation are descriptive of the Freshman year at Clemson. With the loss of his hair, and the traditional wearing of the orange “RAT” caps, the Freshman begins his quest toward recognition, fulfillment, and achievement.

The development of the “Clemson Man” comes through the standing cheers in the dining hall, the weekly pep rallies and the races to the greased flag pole for a scratch of paint, participation in the Homecoming and “Solid Saturday” activities, and Rat Hop, as well as, the formulation of self-discipline and rigorous study habits and the establishment of life’s direction and goal.

The Freshman makes acquaintances with students who will be future business associates and life-long friends. College is designed, in part, to round and mature the student’s personality. The Clemson freshmen have the opportunity to take advantage of it. Arrival is achieved only by dedication and application of one’s self.
"Why, oh why, didn’t I wear my rat hat?"

The constant frustration of registration is illustrated as these RATS stand in line to register for classes.

Look at their faces . . . they love to wait in line!

Classes continue, but students couldn’t care less as they frolic in the snow.

FRESHMEN
The Clemson-Furman game was of secondary importance this Saturday afternoon, as "other activities" held the spotlight.
A student's life is made up of many things at Clemson, but the part that is most dear to him is that which he shares with others in the friendships evolved and the organizations with which he has affiliated. From religious to regional, social to service, leadership to honorary—the organizations are here for him to choose.

A student can find others who think the same way, and do the same things or, he can find his opposites in thought and action. Regardless of the organizations a student joins, he will find his knowledge and understanding of his fellow man enlarging and his philosophy of life strengthened.

The organizations of Clemson offer training for the student that can not be achieved through class-room contacts. They are the foundation for future civic responsibilities in our communities, and, in this section, we present to you a summary of their activities.
Alpha Zeta Honors Students Excelling in Agriculture

Alpha Zeta, a national fraternity with a chapter on the Clemson campus, is the highest honorary fraternity for agricultural students. Members are selected from agricultural students who have attained a high level of scholarship and upon the basis of character, leadership, and personality. A specified grade-point ratio must be maintained. The objectives of Alpha Zeta are to promote scholarship, leadership, and character while rendering a service to the School of Agriculture, and to strive for breadth of vision and accomplishment of ideals.

The national fraternity has set up a scholarship program from which Alpha Zeta members can receive financial aid for graduate school. The Clemson chapter sponsors an annual award to a sophomore in agriculture who has the highest scholastic average in his class. This award is presented at Honors and Awards Day and is the highest scholastic award awarded in the School of Agriculture.
Blue Key Honorary Promotes Service To Clemson College

The Blue Key National Honor Fraternity is recognized as the top honorary and leadership organization on the Clemson campus. Election to membership in the Blue Key is a sign of acknowledgement for scholastic achievement and participation in extracurricular activities. Members are selected from the junior and senior classes. The qualifications for membership exemplify the fraternity’s purpose which is the ambition for intellectual achievement and a desire to serve Clemson and fellow students.

The organization edits and publishes “The Blue Key Directory,” sponsors drop-ins and a Blue Key banquet, and plans, coordinates, and directs Tigerama. The annual football game with the University of South Carolina provides Blue Key with the opportunity to co-sponsor a dance with the University’s Blue Key chapter that weekend. In addition to its other activities, the Blue Key sponsored a seminar in conjunction with the administration.

C. C. HAGOOG, President

Speight, Norman, and Charlie put the finishing touches on Blue Key directed “Tigerama.”
Musically Minded Students Organize Into Mu Beta Psi

The Delta chapter of Mu Beta Psi was organized on the Clemson campus for the purpose of furthering interest in music. Membership in this honorary fraternity is limited to students who have participated in one of the musical organizations on campus for at least two years. It also serves to further interest among non-musical students. Musical groups on campus include the Glee Club, Concert Band, Tiger Marching Band, A.F.R.O.T.C. Band, A.R.O.T.C. Band, Blue Notes, and Jungaleers.

At semi-monthly meetings, members plan and discuss ideas for projects and social events related to the musical field. These plans include sponsoring such concerts as the annual "Spring Sounds," ushering at concerts, and keeping alumni informed of activities.

Initiates must stand and play such selections as "Tiger Rag," "America," and "Dixie" while members paddle their "bottoms" in the Clemson tradition.

Phi Eta Sigma Recognizes High Student Scholarship

Phi Eta Sigma Honor Fraternity serves to recognize outstanding scholastic achievement by freshmen at Clemson College who have attained a grade-point ratio of 3.5 or above at the conclusion of his first or second semester of his freshman year at Clemson. He then may remain an active member for the remainder of his college life and an inactive member for the remainder of his life.

The Clemson College chapter of Phi Eta Sigma was founded in 1940. Although the primary purpose of Phi Eta Sigma is to encourage high scholastic achievement by freshmen, the organization has performed many services to Clemson since its founding. Each year the organization presents the Freshman Mathematics Award on the basis of a competitive examination and the Phi Eta Sigma Award to the scholastically outstanding graduating senior. A tutoring service for a nearby boy's home has been operated successfully for the past two years.

Phi Kappa Phi Encourages Student Scholarship

First and foremost, Phi Kappa Phi is an organization devoted to the emphasis of excellence in scholarship and character. The organization was founded in 1897 by action of a committee composed of the presidents of the University of Maine, the University of Tennessee, and the Pennsylvania State College (now Pennsylvania State University). Its members are dedicated to the objective of holding fast to the original purpose for which institutions of learning were founded, and its standards as an honorary society are exceeded by no other. While it also serves laudable purpose in seeking to bind more closely the alumni to their alma mater and in furnishing another tie of college friendship, the recognition that comes with election to membership is deemed a worthy prize in itself.

Election is, of course, restricted to those whose scholastic achievement is considered to meet an especially high standard of excellence. Among undergraduates, only seniors and second semester juniors are eligible for consideration, and election is limited to no more than five per cent of the junior class and ten per cent of the senior class. It is rare, however, that even as many as half of this number are elected, and none whose cumulative grade-point ratio is below 3.5 as a junior or 3.2 as a senior are considered. In addition, graduate students maintaining an "A" average during a year of residence, and members of the faculty who have made a distinct contribution to the furtherance of scholarship are eligible for membership.

The Clemson chapter was established in 1938, and all who have been elected are dedicated to the philosophy of the society as stated in its motto, Philosophia Kratesi Photon—"The love of learning rules the world".
Phi Psi Upholds Standards Among Clemson Textile Men

Phi Psi is a professional honorary fraternity for those juniors and seniors who are enrolled in the School of Textiles or who have chosen 24 hours of textile study as electives. The two sophomores with the highest grade-point ratios in their class are also tapped for membership each year. All members are selected on the basis of character and outstanding scholastic achievement.

In 1903 the national chapter of Phi Psi was formed by students at the Philadelphia Textile Institute. There are now nine student and thirteen alumni chapters with a total membership of about three thousand. Among Clemson’s many honor fraternities today, Phi Psi is outstanding in activity, in fellowship, and in well-exhibited interest in the school.

The purpose of the lota chapter is to bind members of the student and professional worlds together in a mutual professional interest and to attain higher standards in the textile world. The lota chapter of Phi Psi, which has the honor of being the first Greek letter fraternity on the Clemson campus, was organized in 1927. Since this date lota chapter has followed closely the high principles of Phi Psi. Phi Psi was organized with the objective of advancing the social welfare of, and promoting friendly feeling among members who are students of textile schools in an effort to achieve a common goal of success in the field of textiles. The lota chapter has kept the high standards of the textile industry and has promoted professional interest among the students.
Sigma Tau Epsilon Sponsors Short Story Contest

The top juniors and seniors majoring in Arts and Sciences compose the local honorary fraternity, Sigma Tau Epsilon. A student must have obtained a grade-point ratio of 2.7 or better in order to be eligible for membership in this organization.

Its initial purpose is twofold and rests in honoring a high degree of scholarship and the promotion of fellowship among those who have achieved it. The sophomore who has accumulated the highest grade-point ratio is presented a certificate of free membership into this organization on Honors and Awards Day in the spring.

Membership is the highest honor within the School of Arts and Sciences; the distinction that comes with it is an honor that will be cherished by members for years to come.

The fraternity sponsors several campus-wide events each year which add to its prestige. The Spring Lecture Series and the short story contest are several projects that are undertaken by this fraternity each year. These students have done much for the betterment of the School of Arts and Sciences as well as Clemson College, and their aim is to continue this objective in the future.
Tau Beta Pi Taps Students Holding Superior Records

Tau Beta Pi, a national honorary society for junior and senior students in agricultural, ceramic, chemical, civil, electrical, industrial, and mechanical engineering, was founded at Lehigh University in 1885. For admission into this fraternity a senior must have a grade-point ratio of 3.0 or above; a second semester junior must have a 3.4. Distinguished scholastic ability is not the sole requirement for membership, but also desirable traits of character as well as leadership ability are prerequisites for admission.

In addition to sponsoring two banquets during the year and monitoring the study rooms in the Civil Engineering Building, the Clemson chapter honors those students who honor their alma mater by distinguished scholarship.

DeMolay Club Authorized
As Campus Service Society

The Clemson DeMolay Club received its Letter of Authorization from DeMolay headquarters in 1960. To be a member of the Clemson DeMolay, one need only be a member in good standing of any DeMolay. Sponsored by the Masonic Order, DeMolay is a fraternity of young men between the ages of 14 and 21. Being a service fraternity, its purposes are to be of service to the college, to continue a fraternal spirit among members, and to build character in its members. The organization undertook several projects last year and sponsored a few social events.

The Clemson DeMolay Club is organized and functions like the home chapters from which the members come. Being one of the newest service clubs on campus, DeMolay has striven to establish its place on the Clemson campus in the eyes of the students and the administration.
Alpha Phi Omega is a national service fraternity dedicated to the principles of leadership, friendship, and service.

Since 1925 Alpha Phi Omega has grown so that now there are more than 300 chapters on campuses all over the United States, more than any other men's fraternity in the nation.

Membership in Alpha Phi Omega is open to any male regularly enrolled at Clemson. To be selected the prospective brother must: show an earnest desire to render service to others; be, or have been affiliated with any phase of Scouting; and maintain a satisfactory scholastic average.

The service of Alpha Phi Omega has four phases: service to the student body and the faculty; service to youth and the community; service to the nation as citizens; and service to the fraternity.

Among the many projects carried out by the Gamma Lambda Chapter this year were: giving haircuts to freshmen, furnishing runners to the Bursars Office during matriculation, maintaining a free phone on the loggia, presenting a skit in Tigerama, playing intramural sports, holding intermission parties during dances, distributing Career Books to seniors, and beautifying the campus.

The brothers of Alpha Phi Omega believe that by combining service with fellowship, a cheerful spirit and lasting ties of brotherhood will be developed.
Alpha Phi Omega officers are as follows: Smoke, J. A.; Beale, T. M.; Walters, J. K.; Giebner, G. H.; Burbage, H. D.; Taylor, R. W.
E. P. WILLIMON, President

Tiger Brotherhood Selects Clemson's "Mother of Year"

The purposes of Tiger Brotherhood are: to bring together groups of Clemson men, students and faculty, of outstanding ability and loyalty to the institution; to foster within the bonds of brotherhood those qualities and traits characteristic of the best type of Clemson men; to cultivate the virtues of earnestness and integrity, tolerance and forbearance; and to utilize full influence of the membership in the interest of sober counsel.

Founded in 1928, Tiger Brotherhood strives to build a greater Clemson and better Clemson men, through better faculty-student relationships.

Members are chosen from those students displaying outstanding leadership and interest in and service to school and student. These "Cubs" go through the most colorful initiation on campus.

The projects for the Brotherhood include the annual Student-Faculty Supper, selection of Clemson's "Mother of the Year", and a Christmas toy drive for underprivileged children.

Outstanding students gather during their informal Tiger Brotherhood initiation.

Delta Phi Kappa was organized in the early spring of 1960 by students desiring to serve Clemson through a service organization.

The purpose of the fraternity is to provide services to the Clemson College student body and the Clemson Faculty. One of the initial projects of Delta Phi Kappa was the printing and distributing of the 1960 baseball schedule. Other projects of the fraternity have included the promotion of the election of student body and class officers. A particular effort was made to inform the married and off-campus students of the dates, candidates, and other pertinent facts concerning the elections. The members of the Delta Phi Kappa are always striving to serve Clemson in any way possible. Their services add greatly to the college life here at Clemson, and through Delta Phi Kappa, Clemson is served to great extents.

The services of Delta Phi Kappa are not stable, but they are enacted upon the suggestion of the Dean of Students. Once a year, students who desire to become members of the fraternity are voted upon by the existing membership. All new members are required to have a 1.8 grade-point ratio before they can become active members of Delta Phi Kappa.
Clemson Circle K International Completes First Year Service

Circle K Clubs are college-level men's service organizations performing the same functions on the college campus as do their sponsors, Kiwanis Clubs, in the adult community. These clubs are sponsored and guided by Kiwanis Clubs, with the full approval and support of college authorities.

Circle K Clubs are not social fraternities. They are, in every sense of the word, service organizations, character building groups whose members are bound together voluntarily to render service to campus and community. Their motto, like the motto of Kiwanis, is "We Build".

Circle K Clubs perform campus service activities considered desirable by school authorities. Clubs also engage in local money raising activities, proceeds from which go into campus service funds. Because members are held together by interest in service and by fellowship, the clubs also hold social events of various types during the school year, some for Circle K members, and others for the entire student body.

B. D. SMITH, President
The professional organizations seek to encourage interest in their various fields of study here at Clemson. These organizations are composed of students whose particular interests are in the direction of one of the professional fields. Each school at Clemson usually sponsors a professional organization dedicated to the informing of its members for the betterment of the industry or occupation. These organizations also seek to aid students by informing them of job opportunities available to them after graduation. The programs of the professional organizations are designed in accordance with the purposes of the clubs. They include speakers, field trips, and discussions, all of which serve to inform and aid members.

The professional organizations at Clemson are very numerous. They are a very important part of Clemson College as they serve a vital role in producing well-qualified graduates in the various professional fields.
ADSA Sponsored Activities Include Achievement Awards

The American Dairy Science Association was organized in 1922 by Professor B. E. Goodale. Membership in the organization is based on interest, attendance, and participation in programs.

One of the club's many activities consists of building a display for Homecoming Weekend. The club sponsors the dairy cattle judging team and the dairy products judging team both by personal participation and by assisting team members financially. An annual supper and an annual achievement banquet, held in conjunction with the dairy staff, highlight the social activities of the club and aid in promoting student-faculty relations. The club climaxes its year's activities by presenting a club achievement award to the member showing the most improvement during his stay at Clemson.
Mr. J. V. Baptist addresses AIEE-IRE on hydro-electric power development.
AIEE-IRE Pushes Objectives Through Periodicals, Trips

The American Institute of Electrical Engineering and Institute of Radio Engineers, open to sophomores, juniors, and seniors, is a professional organization of all electrical engineers regardless of their field of specialization. The Clemson chapter was organized in 1912 and is one of 191 similar branches in colleges in the United States, Canada and Mexico. The aims of the AIEE-IRE are the advancement of electrical engineering and the allied arts and sciences, the maintenance of a high professional standing among its members, the advancement of the theory and practice of radio and electronics, and their application to human needs.

The objectives are accomplished with the aid of publications, which help to keep the student informed of new developments in the electrical engineering field. Field trips, lectures, and demonstrations also help the students to appreciate the practical applications of theories involved in their chosen career.
Ag Econ Majors Undertake Various Campus Activities

The student section of the American Farm Economics Association was organized May 25, 1955, for the primary purpose of creating and promoting fellowship among Agricultural Economics majors.

Other purposes of the club are to study current agricultural and economic problems, to obtain an understanding of the services that agricultural economists can render, to provide opportunities for better acquaintances among members and professional workers in the agricultural social sciences, and to convey to them as much information as possible on job opportunities for the Agricultural Economics student. The club sponsors programs featuring speakers from various fields such as agricultural publications, agricultural extension, and agricultural insurance. The club also conducts programs to interest students in the field of agriculture, and it distributes vocational guidance material to interested students. Field trips are also a part of the club’s activities.

The club sponsors a fall picnic, a Christmas party, and a spring banquet attended by members of the club, faculty, and Agricultural Economics Research Department. It also promotes scholarship by providing a plaque on which is recorded each year the name of the most outstanding senior majoring in the department. The club also encourages members to write articles for the “Agrarian”, the paper for the School of Agriculture. The building of a display for Homecoming is one of the club’s numerous activities, also.

The club welcomes anyone interested in any phase of Agricultural Economics to join or attend meetings.
American Chemical Society Instills Basic Knowledge

The American Chemical Society's manifest purposes are to afford its members an opportunity to become acquainted with one another, to secure the intellectual stimulation that arises from professional association, and to secure experience in preparing and presenting technical material before audiences for chemical enthusiasts.

The activities of this professional organization afford the members an insight to the problems they will face upon entering the business world. These activities consist of field trips, speakers from the chemical industries, and participation in the Science Fair which helps to inform members of the latest developments in industrial techniques. Through these activities its members have gained useful knowledge that will aid them in their future fields of business. These experiences aid in fostering a professional spirit among its members and instilling a professional pride in chemistry.
Let's see what's on the late show tonight!

American Ceramic Society Provides Scholarship Fund

The American Ceramic Society is composed of students who are majoring in Ceramic Engineering. Since the time of its founding, the society has proven to be one of the fastest growing active organizations on the Clemson College campus. The society provides for its membership an atmosphere which is conducive to better relations among the students of Clemson who are majoring in Ceramic Engineering. It is hoped that through its activities the society may help in every way possible the advancement of the Ceramic Engineering Department at Clemson.

During the year the American Ceramic Society has participated in the various sectional conventions held throughout the nation, and has sponsored a student speaking contest, various social events, and several field trips. At the conclusion of each year a banquet is held where a scholarship is awarded to the outstanding student majoring in Ceramic Engineering in each class.

E. F. CROEN, President
Phil Owens takes First Prize at Clemson's Little International Contest.

Block And Bridal Gives Annual Livestock Show

The Block and Bridle Club was organized locally as the Animal Husbandry Club in 1932 and received its present name in 1948 when it was admitted into the National Block and Bridle Club. The primary aim of the club is to further the social, cultural, and scholastic activities of students, as well as to encourage and promote an interest in livestock breeding, feeding, and management among the members considering a career in the field of animal husbandry. The club works closely with the animal husbandry faculty as well as breeders, feeders, and managers in the profession.

Among the various activities of the club is the sponsoring of two barbecues, one at a football game and the other at the annual spring intrasquad game. The Block and Bridle Club also finances a meats and livestock judging team which is sent to various intercollegiate contests, and takes great interest in "Clemestra." The Clemson Little International is an annual livestock show sponsored by the club. The climax of the year is the annual banquet at which awards are given to the winners of the Clemson Little International and to the outstanding members who have strived to promote and improve the club.

B. B. TRIPP, President
Clemson And Georgia ASAE Coordinate Annual Banquet

The South Carolina Student Branch of The American Society of Agricultural Engineers seeks to promote student interest relating to professional development and to the parent society. The student branch was formed at Clemson in 1932 by a small group of interested students of the Agricultural Engineering Department. It encourages work and fellowship between the members and faculty.

All students majoring in Agricultural Engineering, with the exception of first semester freshmen, are eligible to become members of the student branch of ASAE. Interested students of other curriculums may affiliate themselves with the organization. Promoting interests related to professional engineering is accomplished by various activities. Bi-monthly meetings are held at which programs of professional or general interest are presented. Student participation is also encouraged in programs. Field trips are taken to observe new developments in Agricultural Engineering. One of the highlights of the year is the annual banquet held jointly with the University of Georgia Student Branch.

ASAE members get ready to go into the field for practical experience.
AIChE Affords Members Intellectual Stimulation

The American Chemical Society's manifest purposes are to afford its members an opportunity to become acquainted with one another, to secure the intellectual stimulation that arises from professional association, and to secure experience in preparing and presenting technical material before audiences for chemical enthusiasts.

The membership of the American Chemical Society is composed of student affiliates of American Chemical Society and members, Junior Grade, of the American Chemical Society. Only those majoring in Chemistry, Chemical Engineering, and Textile Chemistry are eligible for membership.

The activities of this organization afford the members an insight to the problems they will face upon entering the business world. These activities consist of field trips, speakers from the chemical industries, and participation in the Science Fair which helps to inform members of the latest developments in industrial techniques. Through these activities its members have gained useful knowledge that will aid them in their future fields of business. These experiences aid in fostering a professional spirit among its members and instilling a professional pride in chemistry.
If our formula for the mash was right, we ought to be getting 198 proof.
Society Of Civil Engineers Promotes Higher Standards

The American Society of Civil Engineers is the oldest national engineering society in America today. It was organized to promote higher professional standards, and to advance new developments in the field of Civil Engineering.

The society offers its members many advantages and opportunities which would be impossible in a classroom situation. Guest speakers, many of whom are eminent in the field of civil engineering, keep the members well informed of the practical side of civil engineering. These speakers also serve as possible contacts in the professional field for graduating seniors. All publications by the professional society are made available to the student chapter and serve to keep the students informed on new developments in the professional field.

Membership in the ASCE is limited to men in the upper three classes majoring in Civil Engineering who meet the character and academic requirements set up by the society.
ASME Lecturer’s Speaches Include Industrial Design

The American Society of Mechanical Engineers is open to all students enrolled in the Mechanical Engineering Department.

The purpose of the organization is the advancement and continuation of knowledge of the theory and practice of mechanical engineering, and the personal opportunity to become acquainted with the activities of the society, as well as to promote a professional awareness and fellowship. Any student in good standing who is enrolled in an approved engineering curriculum at a school having a student section of ASME is eligible for student membership. The Clemson student section's activities include field trips to interesting industrial plants in this area, and participation in the ASME Technical Paper contest, and the ASME design contest.
Delta Sigma Nu Sponsors Annual Charleston Trip

The Delta Sigma Nu is an honorary local fraternity founded in 1946 for the purpose of uniting students majoring in either dentistry or pre-medicine at Clemson and who attained a cumulative grade point of at least a 2.0. This organization includes members of the sophomore, junior, and senior classes. The club strives to promote fellowship among the students and to aid them by providing helpful advice and discussions in regard to their future entrance into the fields of either medicine or dentistry. It also promotes further study and education preparatory to the continued study of medicine, helps to familiarize students with medical subjects, and aids prospective medical and dental students in selecting subjects in keeping with pre-medical or pre-dental training.

Delta Sigma Nu presents monthly programs toward maintaining the pre-medical and pre-dental student’s interests and insights into the fields of medicine and dentistry. In the spring of each year trips are taken to various medical and dental schools and hospitals which increase the student’s personal insight into the profession he plans to enter.
Forestry Club Attends Southern Forestry Meeting

In September 1957, the Forestry Club was organized on the Clemson campus. Since that time the club has become one of the most active organizations on campus. The aim of the club is to give its members a more realistic and broader outlook on the profession of Forestry. Membership in the Forestry Club is open to all students majoring in Forestry along with faculty members, extension foresters, and research foresters. The members of the club are active in its work.

The club seeks to carry out its aims by having various professional foresters and other men connected with this profession address the club at meetings. These speakers present valuable information to the members and advise them on job opportunities open to them after graduation. A better understanding of the forestry profession is gained, as well as an understanding of the world these members will face in their future.

The Forestry Club also participates in the conclave of the Southern Forestry School, held in the spring of each year. This is a field day featuring competition in log-burling, ax chopping, and cross-cut sawing among the students.
FFA Encourages Competent Leadership In Agriculture

The Future Farmers of America Collegiate Chapter was chartered at Clemson in 1937, and its purpose is threefold: to train prospective teachers of agriculture, to develop competent agricultural leadership among college students, and to provide active members who wish to continue their FFA affiliation.

This organization has done much to bring the agriculture students of Clemson closer together, and it provides means for them to keep informed about the day-to-day advancements and achievements made in the field of agriculture.

Former FFA members constitute the majority of the truly successful farmers of today.

Acquaintances made through the FFA can provide countless valuable contacts for the graduate in the field of agriculture.

4-H Club Promotes Better Rural-Urban Cooperation

In May of 1952 those students of Clemson who had previously been in 4-H and advancement, felt the need to establish an organization which would emphasize the agricultural program. For this reason the 4-H Club was organized at Clemson. Through the club, students endeavor to become more useful citizens by placing understanding of the Agricultural Extension Service, and its possibilities. The activities of the club include monthly programs of general interest to college students. The programs consist of discussions and talks on subjects concerning modern agriculture and its application. Coordinating, the recreation during Farm and Home Week, cooperating with the Agricultural Council in its projects, and taking an active part in campus activities have made the 4-H Club an integral part of Clemson College.
Clemson Horticulture Club
Holds Yearly Jam Session

Horticulture, as with other phases of agriculture, is undergoing vast changes in a period of agricultural transition. Increased quality and quantity in production is the goal of the club, and by use of the most modern equipment and chemicals, the club members learn how to achieve the club's objectives.

Any student who is enrolled in the School of Agriculture is eligible to become a member of the Horticulture Club. Staff members of the Horticulture Department are associate members; honorary members are elected by the club.

The Clemson Horticulture Club publishes an annual newsletter which transmits local news and views throughout the nation. Various fund raising programs such as its yearly Jam Session and the manufacture of preserves and jellies are conducted by the Horticulture Club.

The Clemson Horticulture Club is a charter member of the Collegiate Branch, American Society for Horticulture Science, Southern Region. The movement to establish a Collegiate Branch originated at Clemson in 1947. Most of the agriculture colleges of the Southern Region now have local chapters; the several clubs meet annually in conjunction with the Southern Agriculture Worker's Convention, to discuss new theories and developments. Delegates from each chapter present papers in competition for the J. B. Edward Award.
Industrial Education Men Comprise Iota Lambda Sigma

Iota Lambda Sigma is one of the first fraternities to honor those students of a particular major. The Gamma chapter was organized at Clemson in May of 1930 by a group of Clemson men majoring in Industrial Education. Membership is limited to those juniors and seniors in Industrial Education maintaining a "B" average in their scholastic endeavors.

The purpose of this fraternity is to promote the causes of Industrial Education in three ways: the recognition of professional training, the recognition of high scholarship, and the creation and maintaining of a closer fraternal bond between actual and prospective teachers in this special field. Outside speakers and education acquaint the student with the problems that they can expect in these respective fields. Banquets and drop-ins bind closely the fraternal ties among the members. Techniques learned in the classroom and laboratories are compared, and each member benefits not only from what he has personally encountered, but from the experiences of others as well.
Clemson Agronomy Society Stresses Soil Management

Any undergraduate student interested in Agronomy and closely related lines may become a member of the Clemson Agronomy Club, Kappa Alpha Sigma. Throughout the year, the club strives to help in various school activities such as sets and properties for Tigerama. This year the senior members of the organization were given the privilege of attending the National Convention in St. Louis.

The Kappa Alpha Sigma was founded in 1937 and is recognized as an official member of the student section of the American Society of Agronomy. The purposes are to foster a spirit of cooperation and mutual helpfulness among the Agronomy Club members and the members of the staff of the Agronomy Department and to stimulate interest in Agronomy with those in closely related fields.
IMS Provides Informative Seminars For Its Members

The Industrial Management Society is composed of sophomores, juniors, and seniors enrolled in the Industrial Management curriculum. Prospective members must meet special grade-point ratio and credit requirements to be eligible for membership.

The purpose of the organization is to promote fellowship among the members of this professional society, to promote better relations between students and faculty members, and to promote further study and education preparatory to entering the field of Industrial Management.

Throughout the school year the Industrial Management Society strives to fulfill its purposes by having socials, plant tours, and guest speakers. These activities, along with the regular meetings, illustrate the objectives of this organization.
Mr. Guy B. Arthur of Arthur Associates addresses the Industrial Management students.
NTMS Provides Intimate Textile Relationships

Since its organization in 1951, the NTMS has grown through the years and has become one of the prominent professional organizations on campus. The NTMS is composed of a group of textile students whose objectives are to bring about a more intimate relationship between the textile industry and the undergraduates of the School of Textiles at Clemson. The club is designed to acquaint the textile student with the problems of industry and to prepare him to meet them. Another immediate objective is to develop a fraternal spirit among the textile students. It is hoped that the spirit received by the members of the organization through their activities will create enthusiasm. Members are obtained from the ranks of students enrolled in textile science, textile management, and textile chemistry.

The members of the organization become acquainted with the problems and solutions of the textile industry through field trips, movies, and guest speakers. Each year the increasing number of field trips gives the members a chance to see all phases of the industry. This year the club sponsored a drop-in for old graduates of the School of Textiles. The drop-in was co-sponsored by the Phi Psi fraternity. Another of the yearly projects is the guiding of groups of high school students through Sirrine Hall during the high school visitation day.

M. L. CREACH, President

We've got to stop this thing from warping the yarn.
Keramos Honor Fraternity Improves Ceramics Library

Keramos is an honorary fraternity for students that was established nationally to provide a professional fraternity open to outstanding students in the schools, departments, and divisions of ceramics and ceramic engineering in universities and colleges of the United States. To be eligible for membership, a student must have been registered in the Department of Ceramic Engineering graduates giving information on juniors having a grade-point ratio of 2.6 or above and seniors with a grade-point ratio of 2.3 or above qualify for membership. New members must be elected into Keramos by the present members.

Each year Keramos sends a newsletter to former Ceramic Engineering graduates giving information on what is presently being done in the department. This newsletter presents the former graduates with an opportunity to keep abreast of new developments in the Clemson ceramic engineering department. Other activities include projects directed toward improving facilities in Olin Hall such as the purchase of books for the ceramics library, conducting tours through Olin Hall, and sponsoring various industrial speakers of Ceramic Engineering majors.

SIE Increases Insight To Industrial Problems

The Society of Industrial Engineers, open to all students who are enrolled in Industrial Engineering and related curricula, has made vital steps in providing professional stimulation for students in this field. This organization has also promoted a greater understanding as to the exact realm of study and activity which Industrial Engineering encompasses.

The Society of Industrial Engineers is one of the newest professional organizations on the Clemson campus. Many programs have been presented by outside business men and by faculty members. The organization has striven to present an accurate picture of the problems to be expected by the people entering this phase of industry. Discussions and evaluations of industrial problems prove to be a valuable insight into the world of industry.

Encouraging the participation of practicing Industrial Engineers in the surrounding industries through circulars and the distribution of information pertaining to the activities of the local chapter have been main objectives of the Society of Industrial Engineers.
SAM Functions As Exchange Of Management Information

All students of economics, business administration, and engineering, plus any other student with a sincere interest in the management phase of business for their careers, are invited into the membership of the Clemson chapter of the Society for Advancement of Management. The purpose of this professional organization as stated in the constitution is "to develop human resources and provide business with a better product to train, mold, and refine to meet its needs successfully for better qualified personnel."

The activities of the Society for Advancement of Management are designed to bring business executives closer to the students preparing to enter the business field and to serve as an effective medium for the exchange of information on the problems, policies, and methods of industry and management. This policy gives the student an insight to the means by which business operates and, also, to the careers that they might expect to follow.

Plant tours are another of the advantageous activities of this professional organization. Throughout the year, the members visit various industrial firms. Through these visits they get a chance to see how these firms are managed.

The Society for Advancement of Management provides students with an opportunity to participate in the organization dedicated to the promotion and advancement of the art and science of management.
SAM members take time off from their meeting for informal conversation.

Records and dues ... problems every club has to face.
Social coordination is achieved through the social organizations here on the Clemson campus. These organizations seek to develop social poise in students which is so necessary in college life. The social organizations include the various fraternities and sororities at Clemson. These organizations, being newly formed, have already contributed greatly to Clemson and its students. Social functions, service projects, and others are among the activities of social organizations. Each organization has a purpose, and, through individual as well as group coordination, these purposes are carried out. Scholarship and leadership are emphasized, as well as social poise. Parties on dance weekends, houseparties, mixers, and banquets all go to increase the social aspects of college life here at Clemson.

The social organizations are very important to Clemson and its students. They offer bonds of brotherhood and friendship, and give Clemson the needed social atmosphere so vital in college life.
IFC Promotes Social Fraternities' Activities

The Inter-Fraternity Council was formed soon after the coming of social fraternities to the Clemson campus in 1959. Since then the council has grown to become the co-ordinator of all activities concerning fraternities as a whole. The IFC is composed of two representatives from each fraternity who meet together once a week.

The IFC performs many important functions. It serves as the main contact between the fraternities and the administration in addition to providing a medium through which important issues involving the fraternity program may be brought to the attention of those concerned. The IFC also serves to promote fraternities on campus and is instrumental in furthering the program of fraternity growth.

The duties of the council also include serving as co-ordinator for Rush and Greek Weeks, as well as all inter-fraternity competition, such as sporting events and the annual Inter-Fraternity Singing Contest. A member of the IFC is appointed to map out rush rules and to be in charge of publicizing Rush Week to the student body. The program for Greek Week, the annual fraternity week on campus, is planned by the council. The highlight of Greek Week is the IFC dance which is open only to fraternity members. The IFC sports program which includes football, basketball, volleyball, and softball, is planned in conjunction with the intramural program.
Delta Kappa Alpha, one of the first social fraternities on the campus, was organized in 1959 by fifteen students who realized the need for social fellowship as an important part of campus life. These students drew up a constitution with the help of their advisor, Mr. C. C. Fain.

In addition to a well-rounded schedule of social functions, Delta Kappa Alpha also participates in many intramural and inter-fraternity activities, and many activities dealing with school spirit such as Tigerama and Homecoming.

To become a pledge, a student must receive the unanimous approval of the brothers in the fraternity. After going through an established pledge period, and if the pledge’s grades are high enough, he must receive a second unanimous approval of the brothers before he can become an active member of the fraternity.

The purpose of Delta Kappa Alpha is to increase social poise, and to establish better ideals of college life, cooperative living, and personal development. It desires to develop greater school spirit and an everlasting love for Clemson College, and to establish lasting foundations of fellowship, friendship, and a sense of responsibility.
Rushees find time for relaxation at DKA's second annual Voodoo party.

DKA pledges, Woody and Claude, put in an unscheduled appearance at Winthrop's Junior Follies.

"I would have never pledged if I had known this!"
Kappa Delta Chi, officially recognized on February 24, 1960 has since been a leader in all phases of campus life. It has led the way in service functions such as the adoption of the boys at the Boys of America Home. Kappa Delta Chi participated in such other activities as Tigerama, Homecoming display, intramurals, and various social functions. All the activities of the fraternity help the brothers to enjoy a better social life and develop better school spirit, fellowship and friendship.

Each brother of Kappa Delta Chi has a strong desire for a close and lasting fellowship with all his brothers. Their closeness is demonstrated by the whole-hearted participation of the brothers in each project undertaken. The fraternity places a strong emphasis upon the individual working toward high moral standards and intellectual attainment.

H. H. RENTZ, President

MYRNA SHEFTALL, KDX Sweetheart
But, Duke, you’re supposed to be rushing the fraternity!

Hugh takes time out to relax during a Rush Week drop-in.

Ken and David play “Do you know?” at rush smoker.
KSN Encourages Leadership, Scholarship, Social Poise

Kappa Sigma Nu, organized on February 22, 1960, has been successful in fulfilling its purposes: to increase social and cultural poise, and to better ideas of college life, cooperative living, and personal development through contacts in a social fraternity.

Kappa Sigma Nu takes pride in rendering service when and where needed. A Christmas party for underprivileged children was held to exemplify this. First runner-up in the Tigerama talent and honorable mention for Homecoming displays are among the honors that have come to the brothers this year. Proof that Kappa Sigma Nu is striving to achieve its social purposes is evident in the frequency of the parties that this fraternity has.

The seal of Kappa Sigma Nu is a white gold, and onyx shield bearing a silver fleur de lis, symbolic of the founding brothers, and the inscription “Unitas Semper” or “Always Faithful”. English professor Mark S. Steadman, graduate of Emory University, has been influential in guiding Kappa Sigma Nu to its present rank of importance on the campus and in the lives of its thirty-five active brothers.
A smoke break during a smoker.

D. K. COX, President

Kappa Sigma Nu pledge shows new dance at Rush Week party.
NS Constructs Float Yearly For Clemson’s Homecoming

The Numeral Society was founded in 1956 as a service fraternity. Since that time it has undergone a transition from the small service fraternity to a large, active brotherhood, assuming a prominent place among Clemson’s social fraternities.

The Numeral Society is dedicated to perpetuating school spirit to make Clemson grow; to upholding, developing, and strengthening the character of its members, promoting brotherhood among its members, and providing for their social development.

Maintaining the spirit of serving Clemson, the Numeral Society annually constructs the Homecoming float and distributes slogan cards for football games.

A number of social events dot the Numeral Society calendar. Many drop-ins, parties, and dances are enjoyed each year.

The doors of the Numeral Society are open to any male student who joins as a pledge and successively completes the requirements for active membership.
 Aren't fraternities wonderful?

Bill tries to pledge a rush girl.

Nu Sigs kick it out in their clubroom.
PKD Builds Stronger Social Life For Clemson Students

During the first semester of the 1959-60 school year, Phi Kappa Delta was formally recognized as a social fraternity on the Clemson campus.

The purpose of Phi Kappa Delta is to promote brotherhood, friendship, and scholarship among its members and students here at Clemson. The brothers, brought together by a common bond of interests and ideals, seek to attain this purpose by constant working, playing, and living together, while always working to improve Clemson through a social organization.

Phi Kappa Delta is active in all phases of school life at Clemson. The fraternity sponsors a variety of social events ranging from houseparties to drop-ins. The highlight of the social year for Phi Kappa Delta is its annual beach houseparty. This provides an outlet for the tension built up during the spring semester to be released.

The Phi Kappa Delta also enters their Sweetheart in the Homecoming Contest each fall. Miss Mary Ann Brunnermer, a Winthrop College student, was the sweetheart of PKD this year and was selected as Clemson's 1961-62 Homecoming Queen.

Projects for service and fund raising are also part of Phi Kappa Delta's activities. The fraternity is also an eager participant in all intramural and interfraternity sports which create a spirit of friendly competition among the fraternities.

It is the desire of Phi Kappa Delta to aid in building a stronger and better Clemson through a social organization.
The parties over: Tommy, Willy, and their wives bid the troops good-night.

MARY ANN BRUNEMER, PKD Sweetheart

PKD rushee "twists it off" at party.
SAZ Recognized As Initial Clemson Social Fraternity

The history of social fraternities at Clemson began with Sigma Alpha Zeta. On September 27, 1959, seven Clemson men, recognizing the need and advantage of a close and continuous association based upon a common goal and mutual respect, formed this fraternity. The fraternity’s ideals and purposes were set forth in the constitution, and its objectives were formed similar to those of national fraternities. To identify this fraternity these men chose the name Sigma Alpha Zeta.

The brothers are dedicated to the building of brotherhood in the fraternity. Scholarship, leadership, and brotherhood are emphasized, in addition to social aspects.

The “Zetas” are active participants in many phases of college life here at Clemson.

Bob places pledge pin on brother Lloyd.

Marty comes to the SAZ dorm to accept a bid.
SKE Acknowledges Studies As Part Of Social Courses

Sigma Kappa Epsilon was organized on March 31, 1960, and since then has functioned as a social fraternity to provide social activities and sincere friendship among its members, as well as the student body of Clemson College.

During the past two years, Sigma Kappa Epsilon has strived to provide social activities and friendship for its members that are necessary for a well-rounded college student. Acknowledging that studies are necessary for a successful college student, one also realizes the need for the leisure and relaxation of social activities. SKE's have been in the form of drop-ins, dances, and houseparties. This past year SKE participated in Tigerama presenting a skit depicting the Clemson Homecoming game with Tulane.

Through its program of hard work and enjoyable activities, Sigma Kappa Epsilon has been able to serve one another and the students of Clemson College to the fullest extent.
While you practice I'll watch.

The SKE's pause long enough to pose at open rush.

Come on in and join the party.

The Saturday night party at the Squires Club highlighted Rush.

SKE brothers and rushees socialize at Open Rush.
Omicron, one of the first sororities on the Clemson campus, was formed in November of 1959 by several women students who saw the need of an organization which would bring the coeds of Clemson closer together for the benefit of all. Omicron has as its purpose to foster the best spiritual and social environment for women at Clemson College. Any coed at Clemson who possesses the scholastic and character requirements is eligible for election into the sorority.

Each year Omicron participates in a number of fund raising and service projects, and various social functions. Several mixers and cake sales are sponsored by the sorority to finance their activities for the year. Omicron participates in the annual sorority rush and Tigerama, in addition to Christmas caroling and an annual spring banquet. During the year the sorority holds several drop-ins and parties. The highlight of the year's social activities is the annual houseparty held the first week in June.
Tri-Chi Provides Various Campus-Wide Social Events

The purpose of Chi Chi Chi is to bring the women students of Clemson College into an association so that they may participate more actively and effectively in student affairs, to bring the women students closer together through social functions and service to our college, and to improve social life on campus.

Members of Chi Chi Chi are chosen from Clemson coeds who meet the following requirements: high morals, pleasing personality, outstanding character, and conduct becoming a lady at all times.

Chi Chi Chi has taken part in many activities on campus since its organization in November, 1959. Among these activities are mixers, drop-ins for pledges, selling flowers for home games, and several service projects. Chi Chi Chi seeks to serve Clemson by bringing the coeds closer together through a social sorority.
A large part of the students at Clemson are members of military organizations. These organizations are made up of students enrolled in either the Army ROTC or Air Force ROTC programs. They range from honorary organizations, which honor those military students for excellence in leadership and character, to the various drill teams that display polish and superbness in drill maneuvers. Many of the military organizations are affiliated with national organizations, and their activities are closely coordinated by the national organization. Programs, drill meets, parades, and the Military Ball are just a few of the activities undertaken by these military organizations. The members of these organizations work closely with the military departments here at Clemson, and always seek to improve the military program on the campus. The military organizations can take pride in their outstanding service to Clemson College.
Arnold Air Society Trains Leading AFROTC Cadets

Arnold Air Society is a national organization formed in memory of General “Hap” Arnold. It is composed of four types of memberships: active, alumni, associate, and honorary. The society has a formal affiliation with the Air Force Association. Its mission is to advance air and space age citizenship, to support airpower in its national security, to further the purpose, tradition, and concept of the United States Air Force, to create a closer and more efficient relationship with AFROTC, and to aid in the development of Air Force officers. It is composed of outstanding second semester freshmen, sophomores, juniors, and seniors in AFROTC. Pledges are selected on the basis of personal merit, have a cumulative GPR of 2.0, and have an air science average of B. The major club activities include visitation of air bases in the eastern part of the United States, and social activities such as the banquet for the graduating senior officers at the close of the year.
PR Excursions Include New Orleans' Mardi Gras

The Pership Rifles is a national honorary military society organized for the purpose of encouraging, developing, and promoting the highest ideals of the military professions, leadership, honor, and brotherhood. Individual Pershing Rifle companies all over the nation have distinguished themselves as precision drill units of the highest degree.

The Pershing Rifles is a purely voluntary organization. To become a member of the Pershing Rifles, a person must be a rising sophomore, actively enrolled in ROTC, and selected in competitive drill in the spring of his Freshman year. The officers are selected from the members of the previous year's unit. Their only reward for their extra efforts and sacrifice is only the prestige involved in belonging to a precision unit.

Company C-4, Clemson College Pershing Rifles, is noted for its close order drill which has brought fame and glory to our campus. Throughout the year the PRs appear at various football games, parades, and competitive drills. The National Drill Competition, held during the Cherry Blossom Festival in Washington, D. C., is the highlight of the year.

Clemson's PR's go through their final practice before leaving for the Mardi Gras.
The PR Pledge Platoon was created this year to replace the Freshman Army and Air Force Drill Platoons, and is composed of freshman ROTC students, both Air Force and Army, who have a desire to become members of the active Pershing Rifles. The pledge platoon was formed with the purpose of training freshman cadets in the basic principles of precision drill in order to prepare them to take their places as members of the PRs. Throughout the year the PR pledges present a number of drill exhibitions both on and off the campus. The practice of "drilling under pressure" provides valuable experience for the members of the drill team.

The effort of each individual working as a team is an important factor in the success of the platoon. During the year they work hard at mastering the basic drill maneuvers and increasing their precision. Already the PR Pledge Platoon is proving to be a valuable asset to the Clemson military program.
PR Pledges train in hopes that they may someday become PRs.
4th Regimental Operations Directed By Clemson PR's

This headquarters is composed of Pershing Riflemen who are serving on the regimental staff.

The purpose of the organization is to develop the highest ideals of the military profession and to promote American citizenship.

The Regiment participates annually in two important events. The first of these is the meeting of the Regimental Assembly which is composed of the regimental commander and his staff along with the commander of each company. The second is the regimental drill meet where trophies are awarded to each event winner.

The commander and staff members make annual inspection trips to each of the companies. The results of these inspections determine the winner of the George A. Douglas Best Company award.

Scabbard and Blade Fosters Highest Military Standards

The Scabbard and Blade is the campus organization consisting of the top cadets on the campus enrolled in either Army or Air Force ROTC. Members are selected from cadets who have proven themselves outstanding in their military and scholastic standings.

The purpose of the club is to promote a closer relationship between the cadets and both military departments, and to encourage and foster the essential qualities of efficient officers.

It is a very great honor for a cadet to become a member of this organization, for it shows that he has displayed superior ability and leadership in the military field.

Among the activities of the Scabbard and Blade are the annual Military Ball and Military Banquet.
Semper Fi Society Unites Veterans, Campus Marines

The purpose of Semper Fidelis Society is to promote appreciation and understanding of U.S. Marine Corps Officer Training Program, to provide good fellowship among students interested in the Marine Corps, and to perform service functions to Clemson College as an organization of the school.

The Semper Fidelis Society is a national organization through which Clemson students display interest in the United State Marine Corps. Active membership is extended to those students who are currently enrolled in one of the Marine Corps Officer Training Programs. Students not enrolled, but interested in joining one of these programs are eligible for associate membership. Chapters of the Semper Fidelis Society are located in colleges and universities throughout the nation, each chapter being designated by a Greek letter. The Clemson College chapter is known as the Kappa Chapter. Among the activities of the Kappa Chapter are work with the Boy Scouts of the Clemson area and the showing of Marine Corps combat films to the student body, along with other service and leadership activities.
The regional organizations here at Clemson are composed of various county, regional, and international clubs. These regional clubs are made up of students desiring to unite with fellow students from their own home areas. Various county and international clubs have thus been organized for the purpose of coming together to serve Clemson as well as each other through their combined efforts. These organizations sponsor various activities throughout the year such as dances, drop-ins, and service projects. They are also participants in the intramural sports program which offers a spirit of competition combined with sportsmanship.

Members of the regional organizations benefit from their various clubs. They gain added friendship through service and socializing. The foreign students, through their association, become better acquainted with the American students and their ways of life.

Regional clubs are a very important part of Clemson, and through their services, Clemson is greatly benefited.
Barnwell County Students Serve Through Tau Beta Rho

First chartered in 1957, the Clemson Barnwell County Club seeks to bring Barnwell County students together to better serve Clemson. In 1959 the name was officially changed to Tau Beta Rho which stands for "The Barnwell Regional". There were ten members at the time of chartering, and today that number has increased greatly.

In order to become a member, a student must receive an affirmative vote from the majority of the membership. The members are pledged to endeavor at all times to improve Clemson in any way possible.

The club was organized in order to bring Clemson Barnwell County students together in a social atmosphere. It also promotes good will, fellowship, and cooperation among its members as well as encouraging high school students from Barnwell County to enter Clemson. To augment its objectives, the club is active in programs here on the Clemson campus, as well as those off the campus. It participated in the various intramural sports, sponsors a Christmas and an Easter Dance, and sponsors several projects during the year. Its meetings are held bi-monthly.
Charleston County Students Sponsor Scholarship Dance

Beta Sigma Chi, the Charleston County Clemson Club, organized in 1933, is composed of Clemson students who live within a fifty-mile radius of Charleston. Since its organization, the Charleston County Clemson Club has strived to bring the men of the Charleston Area into closer contact through social, service, and fraternal gatherings and has tried to improve the college and the community by working together on social and service projects.

The club offers a scholarship to an entering freshman from Charleston County. The one hundred dollars for this scholarship comes from proceeds from the annual Christmas dance and from the contributions of the members. Beta Sigma Chi desires to show in this way its interest for the furtherance of the education of fellow Charlestonians. The clubs also sponsor social gatherings during other holidays.
Beta Tau Sigma Strives To Increase Friendships

The Horry County Club was organized on the Clemson campus in the early 1930's. It has, since then, thrived through brotherhood and service and become well-known for its activities and never-ending participation in affairs here on the Clemson campus and elsewhere. The purpose of the Horry County Club, which is now formally called Beta Tau Sigma, is the living together, playing together, and serving together on the Clemson campus of all sons of the Independent Republic of Horry County. Beta Tau Sigma also strives to promote a better spirit of participation and service among its brothers and the student body at large. During the school year, Beta Tau Sigma sponsors numerous events including drop-ins after home football games, mixers for Clemson students on dull weekends, a Christmas dance for club members and their dates, and various other parties open to all Clemson students at various times during the year. The members also have had beach parties during Easter and the summer months. These excursions have proved to be very popular among the members and add greatly to increasing the bond of friendship. Last year the club's sponsor for the Homecoming festivities was lovely Miss Diane Taft.
Chester County Club Forms Alumni Coordinating Link

The Chester County Clemson Club was formed in November, 1959, with the purpose of bringing the students from Chester County together socially and to serve as a co-ordinating link between Clemson Alumni, prospective Clemson students, and Clemson College.

The club consist solely of students from Chester County and these members must be students in good standing with the college.

The intramural program is actively supported by this club as it enters teams in football, basketball, and softball competition. The club was runner-up for the softball last year and a contender in the other activities.

A Christmas dance has become an annual project of the club and coupled with other dances and parties held throughout the year, serves the purpose of bringing all college students, both members of the club and non-members, in the Chester area together.

CSRA Members Participate In Various Social Affairs

The CSRA was organized in 1953 with ten members. Now the organization has increased its membership to thirty.

The purpose of the Central Savannah River Area Clemson Culb is to bring the CSRA students into an association so that they may participate more actively and effectively in student affairs. This is accomplished by promoting social affairs, which include a Christmas dance for alumni and members, an Easter dance, and a summer dance. During dance weekends, the organization sponsors numerous drop-ins to promote fellowship and cooperation among its members.
ISA Creates Enthusiasm For International Friendship

The International Students Association, formerly called the Foreign Students Association, was founded on the Clemson campus in May, 1957, with the purpose of providing a bond of friendship among the youths of America and abroad. The association came into being as a result of the effort and enthusiasm of a group of foreign students then attending Clemson College. These students realized the need of promoting better understanding between foreign students and American students, as well as helping the foreign students with their problems while at Clemson.

In the present membership there are members from Europe, Asia, Africa, Latin America, as well as from the U. S. The only prerequisite for joining is that the student must have a genuine and sincere interest in peoples and cultures that share the world with him.

The association sponsors, among other things, foreign meals which are usually a product of the members' culinary talent. The results are always surprisingly good.

Movies depicting life abroad are presented by the association from time to time, in an effort to make the member's respective countries as well known to American students as possible.

In three words the goals of the International Student Association could be summarized as friendship, tolerance, and understanding.
Kappa Delta Kappa Presents
Dance During The Summer

The Clemson Dillon County Club, Kappa Delta Kappa, was chartered in the fall of 1958 as a service and social organization, and its recognized purposes are to further relations between Dillon County residents and Clemson College, and to bring together socially the present and prospective Clemson students from Dillon County.

To be eligible for membership, a person need only be a resident of Dillon County, but he must receive the vote of seventy-five percent of the existing club members to be accepted as a member.

Club meetings are held twice each month for interaction among the members, and it is the desire of the Kappa Delta Kappa that the friendship and welcome extended by the club will help its members feel that they "belong" at Clemson.

In the four years of its existence, the Clemson Dillon County Club's activities have included a schedule of dances and parties, both in Clemson and in Dillon County. Thanksgiving and Christmas dances, and numerous beach parties are some of the highlights of the club's social activities.

Kappa Delta Kappa has also participated in several charity programs in Dillon County.
Nu Epsilon Provides Needed Club For Northern Students

Nu Epsilon was organized in 1948 to serve as a service and social organization for northern students at Clemson. The purpose of this organization is to further the social and cultural lives of both northern and southern residents. Upon arriving at Clemson, northerners are far from home. Although they are made to feel at home by the southern students, there is a need for contacts from home. The Nu Epsilon provides this contact.

Requirements for membership are that the student be residents of a state north of the Mason-Dixon Line and in good standing with the college administration.

Activities of Nu Epsilon include such various services as donating magazines to the student Health Center. On dance weekends it sponsors parties.

The Nu Epsilon initiates its new members during the fall semester. The initiation consists of the initiates wearing blue cans with NE painted on it around their neck. They also carry blue paddles.

A. S. GREENBERG, President

Yankees try to whip the South as Nu Epsilon participates in intramural volleyball.
Clemson’s Newest Regional Bamberg County Club Forms

The Bamberg County Club was formed on September 20, 1961, by the students of that county. The club is one of several regional organizations on the campus which was formed with the object of bringing the students of a particular section together for the mutual benefit of all. To be a member a boy must be from Bamberg County, attend Clemson, and be voted into the club by the existing members. Through association in the club, the members come together to plan worthy projects and activities, in addition to enjoyable social functions given during the year. Also, through working and playing together, lasting friendships are formed and strengthened among members of the group.

The club performs a valuable service to the college by encouraging outstanding students to attend Clemson. Many outstanding students, high school seniors from the Bamberg area, are invited to visit Clemson for a weekend to become better acquainted with the various aspects of college life at Clemson. These prospective students are also invited to attend the club’s social functions.

The Bamberg County Club affords its members with fellowship and social perspective which is a vital part of college life.

RELIGIOUS
The stimulation and development of spiritual growth is the purpose of the religious organizations on the Clemson campus. These organizations seek to provide the college student with the inspirational, spiritual growth so very necessary while he is away from home. The religious organizations include student fellowship sponsored by each church in Clemson and the various organizations of the YMCA. Weekly worship services featuring inspirational and educational speakers are a part of the activities of these organizations. Discussions are also a very important part of these groups since they give students a chance to have their questions answered. Students receive a warm association with others through these groups as they unite in "holy" fellowship. Membership is open to all students who seriously desire to unite in a fellowship with other students and with God. These religious organizations give Clemson students the religious stimulation so vital to their lives and their world.
Baptist Students Underwrite Varied Functions

The Baptist Student Union offers numerous and varied activities which provides the Baptist students with a close association with the church during their college days. The programs provide beneficial religious subjects plus deputations with other Baptist Student Union groups.

Radio parties, the South Carolina Baptist Student Union Convention, the Christmas caroling party, the annual banquets, the spring retreat, and Christian fellowship are all a part of the Baptist Student Union's program. Each Baptist student is a member of the Baptist Student Union whether he is active or inactive in his membership.

This group brings together the Baptist students at Clemson and fosters in them spiritual thought, growth; and action through efforts to install living Christianity. Active participation in all the college religious activities is also a part of the Baptist Student Union's functions. Under the capable leadership of Rev. Charles Webster and Miss Geneva Metzger, this church group, which is one of the largest on campus, enjoys a year full of both religious and social benefits centered in and around the church.

Canterbury Club Meetings Provide Religious Stimulus

The Canterbury Association is an Episcopal student organization with the purpose of bringing Clemson Episcopal students together in a bond of Christian fellowship. Under the direction of the Episcopal chaplain, the Right Rev. Milton Crum, the group works in close coordination with the local parish to promote religious interest through a wide field of activities.

The total program consists of worship, fellowship, service, study, and social activities in the religious field. These combined activities provide a chance for spiritual and inspirational growth for the members of the group. In addition to local activities, the Canterbury Association sends delegates to the state meetings in the spring and fall and also to the provincial meeting, held once a year. The group meets every Wednesday night in the Canterbury room of the new student building.

A student vestry which is elected each year, works with the student chaplain to coordinate the group's activities. The Canterbury Association is a completely representative group, and guests are always welcome at the meetings.
Hillel Brandeis Coordinates Jewish Campus Activities

The Jewish students on the Clemson campus organized the Hillel-Brandeis Club which evolved from the Brandeis Club that existed prior to World War II. The club was formed to coordinate the social, cultural, and religious activities of the Jewish students at Clemson throughout the academic year. The Hillel Foundation has chapters located on campuses of leading colleges and universities throughout the country. It seeks to give the student member a better understanding of his religion through studies of the Jewish life.

Since there is no resident Rabbi at Clemson, the students of the Jewish faith must seek outside help for spiritual guidance. It is for this reason that they take advantage of the opportunity to worship in the synagogues of Greenville and Anderson.

Although the number of Jewish students on Clemson's campus is relatively small, the group is actively engaged in many activities. Some of these are discussion groups and forums, guest speakers, and meetings with other religious denominations from Clemson and surrounding colleges.

R. F. BERGER, President

LSA Stimulates Christian Fellowship Among Students

The Lutheran Student Association, affiliated with the Lutheran Student Association of America and assisted by the Division of College and University work of the National Lutheran Council, offers to the Lutheran students on campus the opportunity to deepen and express their Christian faith and to witness the Gospel as confessed by the Lutheran Church. The program is sponsored by the Division of Student Service of the South Carolina Synod. With this purpose in mind, speakers from the college faculty and outstanding laymen appear at the weekly Wednesday night meetings. Also, visiting Lutheran ministers help to stimulate and enlighten the members through talks and informed discussion. The Lutheran Student Association provides Christian fellowship for its members. The yearly exchange of deputations with other LSA organizations and the Lutheran Student Assemblies, which the Clemson group attends, gives the membership welcome social opportunities.

Christian fellowship and the promotion of ideals and principles of Christianity are the major purposes of the Lutheran Student Association.
Catholic Students Enjoy Newman Club Benefits

The first Newman Club in the United States was established at the University of Pennsylvania in 1893. The Newman Club on the Clemson campus was organized in 1940 under the direction of Father T. F. Teirney. Today it is a member of the six-hundred chapter National Newman Club Federation. The purpose of the club is to foster the spiritual life of the students, their religious instruction, and their social life in this order of importance. All Catholic students are invited to join the club.

Since the time of its founding, the Newman Club has helped to join the Catholic students of Clemson in closer ties of friendship through spiritual, intellectual, and social activities. Each Wednesday night Catholic students meet at the Catholic Church.

The programs given on these nights are planned at the beginning of the year and are carried out through the year with numerous courses conducted by outstanding Catholic leaders of the area. Through these programs the good of the Newman Club, which is to deepen the spiritual lives and enrich the temporal lives of the group, is reached. Other functions include Communion breakfasts, forums, parties, dances, and dramatics.
PSA Gives Clemson Students Mature Christian Guidance

The Presbyterian Student Association is the original name for the Westminster Fellowship, an organization of the Presbyterian Church.

The PSA, organized in the Fort Hill Presbyterian Church in the early 1930’s, is a part of Presbyterian Campus Christian Life. Campus Christian Life is an integral part of the total ministry of the Presbyterian Church. Its task is to proclaim the Gospel of Christ in the academic community. The Presbyterian Student Association welcomes any student who is willing to become involved in a Christian group which is dedicated to the discipline of being the church. This ideal comes to life through worship, Bible study, reading and study groups, prayer groups, Church School, evening meetings, personal counseling, fellowship, conferences and retreats, summer service opportunities and work camps, and in service to the local Churches, community, and the world.

The programs are planned by and for the students with a goal of spiritual growth and mature interest in the church. These programs consist of guest speakers, guidance, films, group decision, and deputations from other colleges in South Carolina.
Wesley Foundation Members
Take Part In Group Forums

The Wesley Foundation, which was initially formed here at Clemson in 1938, is one of many similar organizations set up by the Methodist Church for students in state-supported schools and colleges throughout the nation.

The purpose of the Wesley Foundation is to promote an integral relationship between the Methodist student and his church, and to furnish an ample, well-rounded Christian life for students of the school. The three functions of the organization are to cultivate the spiritual lives of a student, to offer opportunities for taking part in group programs, and to provide a deeper concept of the Christian duties. By participating in these activities and taking part in group forums the student becomes more mature in his outlook on life. Along with the opportunity to serve others, the students, by working together in fellowship, develop for themselves ideals and personality traits that are valuable aids in later life, both spiritually and socially.

The activities of the Foundation include an annual banquet, deputations to and from other schools, picnics, and a weekly Sunday night meeting.
YMCA Offers Student Body Many Excellent Activities

The Clemson YMCA is one of the best known organizations on campus. Every student comes in contact with one or more of the many services it undertakes. The "Y" provides pool tables, ping-pong tables, a swimming pool, a gymnasium, movies, papers and magazines, a weight-lifting room, club room, and meeting rooms. Rooms are kept available by the "Y" for church groups. The YMCA also sponsors a concert series featuring local artists.

General Secretary Roy Cooper heads the YMCA staff and is responsible for many of the activities on campus. He is assisted by the Associate Secretaries Nash Gray, who is in charge of the movie program and Buford Trent who heads up the Tri-Hi-Y program and is in charge of the physical facilities of the YMCA along with Mr. Gray. Miss Bobbie Palmer is the office secretary. Together these four form the backbone of the student YMCA and the YMCA of the community. A great responsibility rests on them since Clemson’s YMCA is known all over the South for its facilities and the variety and excellence of its programs.
Y Cabinet Sponsors Various Christ-Centered Programs

The YMCA Cabinet is composed of students who have shown a sincere interest in the YMCA program and the religious life of the campus. Members of the Sophomore, Junior, and Senior Councils form the Cabinet along with one representative from the Freshman Council and the staff.

The Cabinet serves as the planning and coordinating body for the student activities of the YMCA. Its members are assigned various and specific committees to serve as chairmen of and to insure efficient and effective work. These committees utilize council members in an effort to interest the students and strengthen the ties of fellowship and cooperation.

Officers of the Cabinet are elected by the student members of the YMCA. It is their duty and responsibility to channel the efforts of the Cabinet toward fulfilling the objectives of the YMCA.

Some of the Cabinet's activities are sponsoring a recreational program for the councils, providing refreshments during dance intermissions, supplying Christ-centered programs for the councils, and directing the vespers programs on Sunday evenings.

H. E. LITTLEJOHN, J. ROY COOPER, Advisor; W. H. MARTIN.

The type of men who belong to the Senior YMCA Council are those who desire, by exchange of ideas and fellowship, to strengthen the spiritual lives of themselves and others. The members of the Senior "Y" Council, through these objectives, seek to serve the members of their class and the members of other classes and to develop finer students at Clemson.

The Senior "Y" Council, organized in 1954, participates in such activities as the sending and receiving of deputations, the sponsoring of drop-ins during campus-wide dance weekends, and ushering at the convocations during Religious Emphasis Week.

Membership in this organization is based on invitation and election by members of the Council. Guidance and leadership for the Cabinet, the governing body of the student YMCA, are mainly provided by the members of the Senior "Y" Council.

The Senior "Y" Council is indirectly responsible for the development and progress of each of the other councils. Throughout their four years in the "Y", they have shared the burdens of and offered aid to the other councils.

Senior Y Council Sponsors Campus-Wide Projects
The Junior YMCA Council is composed of those students in the junior class who wish to stimulate the spiritual lives of themselves and others and to aid the members of the various classes in cultivating better men at Clemson College. Membership in the organization is established on the expressed desire to become a member and election by the other members.

The resolution of the council is to join the members of the junior class in Christian friendship. Through the interchange of opinions, they are able to comprehend and appreciate their companions, and to be useful to the college and the community.

Some of the activities participated in by the council are cutting the hair of entering freshmen in the fall, offering leadership in the pre-school YMCA retreat, helping with the children's Christmas party, serving at drop-ins during dance intermissions on dance weekends, and ushering at the convocations during Religious Emphasis Week. Programs are designed around increasing the students' knowledge and understanding of the Christian faith.

Junior Y Stimulates Members' Spiritual Lives
Men who are interested in the YMCA, have the qualities of leadership, have a sincere desire to help their fellow students, and are members of the sophomore class compose the membership of the sophomore "Y" Council. Members are selected by invitation and election by the council on the basis of the above qualifications. The Sophomore "Y" Council sponsors several projects throughout the year and holds drop-ins during college-wide dance weekends. These projects include teams in the YMCA recreational program, coaching the grammar school athletic teams, and providing leadership in the Tri-Hi-Y movement sponsored by the YMCA. The council offers its services as ushers during the Religious Emphasis Week throughout the year.

These men, in addition to strengthening their own spiritual lives, learn to understand and appreciate their fellow companions. Each week the council meets in the YMCA building. These meetings offer members opportunities to join in discussions, to listen to talks given by faculty members or men of the community, and to join in fellowship.

Future YMCA Leaders Form Sophomore Council
The bewildering and complex adjustment to a new kind of life is just beginning when freshmen are given an opportunity to join the Freshman "Y" Council. Membership in this organization makes the adjustment much easier by giving the new student a place in his first extra-curricular activity. He feels that he is serving his chosen school as he enters into the activities of the group. Under the leadership of two "Y" Cabinet members, Andy Dowling and Pete Miley, the group enjoyed informative talks and discussion groups. The Freshman "Y" Council participated in the Christian fellowship provided by the student YMCA through such projects as a deputational program, an opportunity to serve orphans and underprivileged children, and an opportunity to coach the young athletes of the Clemson area.

The council is an active group of young men who came together in a spirit of fellowship to strengthen their lives, exchange Christian ideas, and increase their spiritual benevolence. The members strive to create a spirit of stewardship in themselves and their fellow students.

Freshman Y Council Helps Make Rat Life Bearable
YMCA Sponsors Fencing For Championship Matches

The Clemson Fencing Club, organized in 1961 and supported by the YMCA, is a competitive athletic organization new to the Clemson campus. The club provides organized and controlled athletic training for students in an atmosphere of sportsmanship.

The Fencing Club emphasizes fencing as a sport which requires competitive spirit, skill, timing, and mental and physical agility, rather than unusual physical size. The club is active in three weapons in use today: the foil, where an attempt is made to touch the opponent on the torso; the saber, where cutting with the blade is also attempted; and the épée, the French dueling sword, where the object is to hit the opponent first anywhere. Fencing has often been called "physical chess" and the club has been surprisingly successful in their first year of competition.

Requirements for admission to the Fencing Club are two legs, at least one arm, and a willingness to learn and work. Newcomers are thoroughly grounded in fundamentals before going into advanced work and competition.

Practice is usually held for an hour and a half three days a week, and the home and away meets are held on the weekends. At midseason, the Clemson Fencing Club held a five won and one loss record.
The Clemson College Athletic Association presents its students with the highest calibre of sporting entertainment. As the opponents from the various institutions have met with Clemson teams, we have continued to improve in each aspect of athletic competition.

With the academic requirements for admission increasing every year, a student must excel scholastically as well as athletically in order to continue his participation in athletics. These annual improvements make Clemson the choice of the top-flight individuals who seek an education in the every meaning of the word. The modern day athletic events call for a strong mind as well as a strong body to carry out the prescribed task. The coaches know that an optimum blending of these two attributes promote better participation, sportsmanship, and an all around superior contest.
Clemson Boast Top Coaches

The success of a Clemson athletic team is appropriately credited to an excellent coaching staff, directed by Head Football Coach and Athletic Director Frank Howard.

A graduate of the University of Alabama in 1931, he came directly to Clemson and began a football crusade as he gradually advanced to become among the greats in his profession. His 22-year records ranks in the top ten among the active coaches in the country. His record stands at 119-75-10.

The hard-working staff of assistant coaches includes Major General Bob Jones, end coach. Coach Jones has been at Clemson longer than any other coach. He graduated from Clemson in 1930 and has never left except for temporary service in the army. Backfield coach Charlie Waller came to Clemson as a successful high school coach, followed by several years at Auburn and the University of Texas. Coach Waller has completed his fifth year at Clemson. The interior line is coached by Bob Smith, a graduate of Furman and a veteran of 27 years of coaching. He came to Clemson in 1953 as a "T" formation defensive specialist. He is assisted by Don Wade. Banks McFadden, football Hall-of-Famer, handles the defensive backfield coaching duties. Covington McMillan recruits and handles the freshman squad, and he is assisted by 1958 Clemson graduate, Whitey Jordan.

Block C Honors Lettermen

The Block "C" Club is sponsored by the Clemson Athletic Association and composed of lettermen from every sport in the Athletic Department. The only requirement to become a member in this organization is to letter in a sport. An initiate is not allowed to wear his block letter on campus until he has completed his initiation.

The club sponsors many worthwhile projects which encourage student interest. The members sell programs and seats at football games, and sponsor the intra-squad game which climaxes spring football practice. An annual Christmas party for the crippled children of the Shriners Hospital in Greenville is another very worthwhile project.

The Block "C" Club also initiates honorary members into the organization who have served Clemson athletics faithfully and led to the progress and advancement of the Clemson Athletic Program. Many of these people have served the club in many respects and the Block "C" Club is indeed privileged by their honorary membership.
1961 Season Proves Unusual

This year's Tiger team, which posted an acceptable 5-5 record, was made up of approximately 75 outstanding athletes from all sections of the country. Many of these men were sophomores and juniors who will be returning next year with increased experience. Much credit must be given to these fine players when one considers the long hours of grueling practice that it takes to get a team ready for each game. It may easily be said that playing football at Clemson is a big and demanding job.

Many of these fine athletes excelled in academic and extra-curricular activities, as well as on the gridiron. Pictured on these pages are nine outstanding seniors whose performances throughout the season merit special consideration. It is difficult, however, to choose only nine men from such a group of fine players. This year, as in all years, the Clemson eleven operated as a team with everyone contributing their share to each ball game.

The fine performances of the nine players, as well as their outstanding leadership potential, is worthy of special recognition. These men, and the entire team, are truly an asset to the honored and respected name of Clemson College.

Gators Make Use Of Tigs’ Mistakes In 21-17 Loss

The number three proved to be unlucky for the Clemson Tigers as they took on the highly touted Florida Gators in the season’s opener in Gainesville. Three fumbles by the Tigers and three completed passes by the Gators put the damper on what may have otherwise been a Tiger victory. The extremely warm Florida weather was quite different from what the Tigers are used to playing in.

Clemson moved into the scoring column in the first quarter on a 31-yard field goal by the talented toe of Lon Armstrong. The Gators took the kickoff and quickly moved for a touchdown on the brilliant passing of quarterback Larry Libertore. Late in the second period, the Gators recovered a Clemson fumble on the Tigers’ 35-yard line and marched to their second score.

The Tigers took the second-half kickoff and marched 73 yards to narrow the Gators’ lead to 14-10. Quarterback Joe Anderson directed the drive with fullback Ron Scrudato hitting the end zone on a nine-yard run. Libertore continued in fine form as he connected with halfback Bob Hoover on a 43-yard heave to put Florida ahead 21-10. In the final minutes of the game, the Tigers unleashed a 60-yard scoring drive, with halfback Wendell Black crashing over from the 3-yard line. Armstrong booted the PAT and the final score, 21-17 was posted.
Terps Take Thriller, 24-21

History repeated itself when the Terrapins of Maryland and Frank Howard's Tigers met in Death Valley. For the third straight year the Terps defeated the Tigers by less than four points; this time a couple of fumbles and a field goal spelled the difference.

Clemson set up the Terps' first score with a fumble on the first scrimmage play of the game. After two unsuccessful drives into Maryland territory, the Tigers took the ball and headed for paydirt. Maryland immediately retaliated with a scoring drive led by the fine pass receiving of Gary Collins. In the final minutes of the first half, Clemson scored again on a pass from Jim Parker to end Tommy King, tying the contest at 14-14.

Midway in the third quarter, Maryland moved into the lead again with a touchdown, coming this time from a 46-yard pass play. The Tigers roared back early in the fourth quarter to score on an 11-yard jaunt by fullback Bill McGuirt. Lon Armstrong kicked the extra point to deadlock the score at 21-21.

It began to look as if the game would end in a tie, but the Terps had other ideas and, after moving to the Tiger 23-yard line, Maryland attempted and completed a field goal with eight seconds left in the game to win 24-21.
Guts means glory for Scrudato.

Tigers Surprise Tars 27-0

The Clemson football machine moved into high gear and steamrolled U.N.C. 27-0 before a crowd of 26,000 at Chapel Hill. It was the first victory of the year for Coach Howard's hungry Tigers. The Tigers scored twice in the first half, once on a 23-yard Parker to King pass and again on a 35-yard pass from Anderson to halfback Gary Barnes. So completely did Clemson dominate the game, that the Tar Heels did not violate Tiger territory until late in the third quarter. After moving to the Tiger 24-yard line, the U.N.C. offense was halted, and Clemson proceeded to dominate the remainder of the game. The Tigers made it 21-0 at the beginning of the third quarter with fullback Scrudato carrying over from the three. Clemson put the final touch to a fine afternoon's performance when third-team quarterback Tommy Black scored on a four-yard jaunt.

All right, Wendell, you're by two of them—only nine to go.

'Bama Barnes goes high, catches the ball, and strolls into the end zone for the TD.

Lam finds an opening for a long gainer.
Wake Forest Upsets Tigers

The unpredictable Tigers bucked all the odds again as they dropped a very close game to Wake Forest 17-13. The crowd at Death Valley saw the Clemson Tiger eleven make a valiant comeback after trailing most of the second half, only to have the clock run out with victory in sight. With the memory of having to pull last year's game out of the fire in the last few seconds, Clemson had hoped for a solid victory and an opportunity to advance in the ACC standings.

Clemson scored first in the second quarter on a 14-yard pass from sophomore quarterback Jim Parker to end Tommy King. Wake Forest took the kickoff and moved 59 yards to the Clemson six. Being stalled there by Clemson's forward wall, the Deacon's Walker booted a 17-yard field goal and the first half ended with a 7-3 score in favor of the Tigers.

The Deacons took the second-half kickoff and quickly moved 54 yards for their second score and moved ahead of the Tigers. Midway in the last quarter, the Deacons scored again, this time on a 60-yard jaunt by halfback Alan White.

The passing of quarterback Joe Anderson moved Clemson into position for their final score, which came on a 2-yard plunge by Scrudato late in the fourth quarter. The Tigers got the ball again and moved to the Deacon's 42 before the final whistle ended their chances to pull the game out of the fire.
Bengals Best Blue Devils

Clemson threw the ACC title race into confusion when they trounced the Blue Devils of Duke 17-7. The 30,000 fans on hand at Durham saw the Duke eleven fall prey to the sparkling Tiger offense. Parker's passing and running were nothing short of sensational as he led the Tigers on both of their touchdown drives.

Early in the second quarter, Clemson moved to a 7-0 lead when Bill McGuirt bulled over from the one-yard line and Lon Armstrong booted his 24th straight PAT.

The Blue Devils scored their only touchdown in the third quarter on a beautiful pass play that covered 60 yards. Clemson was not to be stopped, however, and Parker crossed the Blue Devils' goal line from one yard out to climax a 46-yard drive. Late in the fourth quarter, Coleman Glaze recovered a loose pigskin at the Duke four-yard line. The Devils' line held firm, and on fourth down, Lon Armstrong neatly booted a 15-yard field goal to nail the lid on the Duke coffin.
Okay, War Eagle, So you've got me; now what're you gonna do with me?

Plainsmen Beat Tigs 24-14

Franklin Field in Auburn, Alabama, was the scene of the battle of the Tigers. Auburn had lost their first game in 10 years just two weeks previous to Clemson's invasion and were determined to turn the tide.

The Palmetto Bengals were first to strike, however, as they took the opening kick-off and marched 81 yards for the score. This drive featured the power running of halfback Wendell Black and fullback Ron Scrudato behind the blocking of Dave Hynes. The Auburn Cats capitalized on a series of mistakes made by Clemson and the home team, featuring the passing of quarterback Bobby Hunt to All-Southeastern Conference end Dave Edwards, built up a 24-7 lead. Clemson's Wendell Black brought the Tigers to life temporarily with a 47-yard punt return to the seven-yard line. Ron Scrudato bulled over minutes later, and Armstrong automatically converted to round out the scoring at 24-14.

The visitors from South Carolina were handicapped greatly when sophomore sensation Jim Parker injured his thumb shortly before the half and was forced to stay out the remainder of the game. The Tigers from Clemson were first and last to draw blood, but were unable to withstand the powerful surges of the Alabama Tigers. They game ended with a score of 24-14.
A Homecoming crowd of 25,000 was on hand at Death Valley to see the Tigers take on the Green Wave of Tulane University. The Tigers provided a touch of sensationalism for the partisan crowd as they sailed over the Green Wave 21-6 for their third win of the season. Fans saw one of the best kicking exhibitions presented in Death Valley in many years as Tiger punting ace Eddie Werntz booted over 50 yards six times, with one kick sailing 61 yards. Clemson's point after touchdown specialist, Lon Armstrong, came through with three more perfect kicks to run his record to 30 straight.

In the first half, fullback Ron Scrudato put the Tigers out in front with a furious 18-yard run through the middle of the Greenie line. The half ended with the Tigers holding a 7-0 advantage.

Three plays after the beginning of the second half, Tulane halfback Tommy Emerson scampered 67 yards for the Green Wave's only score of the afternoon. Not to be outdone in distance, Clemson's Elmo Lam snagged a Tulane punt on his own 32-yard line and raced 68 yards for the Tiger's second score.

Clemson's final score came after the Tigers had marched 40 yards in 10 plays with a typical Tiger power-drive series. Quarterback Joe Anderson "long-legged" the last nine yards on an option play around his own left end to climax the drive and end the scoring for the afternoon.
Tigers Final Threat Fails

Carolina’s hopes were riding on halfback Billy Gambrell as they moved 42 yards for their first score early in the second quarter. Clemson took the return kickoff and moved 60 yards in nine plays to score, and the half ended 7-7.

Clemson took the second-half kickoff and marched 73 yards for their second score. The Gamecocks came right back, however, and moved for their second score in the fourth quarter. The PAT attempt was blocked by guard Calvin West and the Tigers held a slim lead of 14-13. A few minutes later, Carolina fullback Dick Day fumbled at the 36. His teammate, Jim Costan, scooped up the ball and raced to paydirt. The try for two was good, and the Gamecocks took a 21-14 lead.

With 2:35 remaining, the Tigers moved 75 yards, within one foot of the goal line, to have the final whistle blow and crush their hopes of victory.
Cocky Paladins Fall 35-6

The largest crowd in the history of the Clemson-Furman competition was on hand at Death Valley to watch Frank Howard's Tigers take on the Purple Paladins of Bob King. The spectators were treated to quite a show as the Tigers thoroughly embarrassed Furman, 35-6.

Halfback Gary Barnes, playing his last season for the Tigers, turned in a sterling performance as he scored two touchdowns, set up another on a 72-yard punt return, and raced 51 yards with an intercepted pass.

Clemson's first touchdown came on a 56-yard power drive mid-way in the first quarter. Junior quarterback Joe Anderson skipped 15 yards for the score. Early in the second quarter, the Tigers scored again, this time on a 7-yard run by fullback Ron Scrudato. The first half ended 14-0 in favor of the Clemson Tigers.

The Tigers scored three times in the second half, all on pass plays. Anderson hit Barnes once and sophomore Jim Parker connected with Harry Pavilack for the third score. The Paladins' only touchdown came on a 3-yard run by quarterback Billy Canty, with 6:30 left in the game. Furman hit paydirt twice more during the final period on plays of 71 and 90 yards, only to have them called back by penalties.
Tigers Silence Gabriel’s Horn

A bruising Clemson forward wall kept All-American quarterback Roman Gabriel well in check and paved the way for a brilliant 20-0 victory over the N. C. State Wolfpack in the final game of the season for both teams.

The Tigers scored their first touchdown of the afternoon with four minutes left in the first half when fullback Bill McGuirt drove over from two yards out. Armstrong’s attempt for the point after touchdown was blocked, thus ending a perfect string of 35 placements for the Clemson senior.

Early in the third quarter, Parker’s Ramblers took to the road again and moved 65 yards for Clemson’s second score. Two long passes from Parker to halfback Elmo Lam resulted in the touchdown which put the Tigers ahead 13-0.

Starting late in the third quarter and continuing halfway through the fourth, the Tigers unleashed one of their long power drives which carried 80 yards and resulted in the Tigers’ final score of the afternoon.

Senior fullback Ron Scrudato, the leading scorer in the ACC, carried the ball 12 times for 42 yards and hammered the ball into the end zone from four yards out.

Tigers Play Well At Home

The 1961-62 Clemson Basketball squad had an on-again, off-again season in this year's campaign. The sophomore-studded group has to be admired for their gallant effort during the year. The Tigers performed exceptionally well on their home floor for the home crowd.

Time after time the Bengals had five sophomores on the starting line-up, and their teamwork creates nothing but good thoughts for Coach Press Maravich in the next two years. Sophomores Jim Brennan and Nick Milasnovich produced the one-two punch for the entire season. Brennan averaged 16.3 points per game, followed by Milasnovich's 15.3 point average. Senior Captain Tom Mahaffey and his brother, sophomore Donnie Mahaffey, tied for rebounding honors, both with a 6.4 rebounding average. Other sophomores who figured in this year's success were Manning Privette, Woody Morgan, Mike Bohonak, and Gary Burnisky. Senior guard Bob Benson played consistently well all year and closed out his career in an honorable fashion.

The Tigs reached their peak at the ACC tourney where they had surprise wins over State and Duke only to lose to Wake Forest in the finals.

Nick drives by two Seminoles.

The cheers of Clemson supporters ring long and loud at all athletic events, and it is the responsibility of the cheerleaders to organize and coordinate all the cheers. Spirit and the ability to keep that spirit, win or lose, are two important constituents that help to make winning teams. Because of a job well done by the cheerleaders, the Tiger supporters possess an incomparable spirit. Sunshine, rain, or cold, Tiger Cheerleaders are always present, and capable of fulfilling their duties.

Okay, Rats!!! Give me a "C"!

"Miss Tigerama" expresses her delight after a Tiger TD.
The managers, doing their job well, play an important part in the story of the team's success here at Clemson. These men spend much of their time before, during, and after practice in keeping things running smoothly. Every day during practice, the coaches and players have cause to call on one or all of the managers to prepare and condition equipment and players. They forfeit many hours of leisure time to keep the team in readiness for the next encounter.

These managers and trainers have played a vital role in the advancement of the Clemson athletic program and they certainly deserve more credit than they receive.

Managers And Trainers Are Vital To Tiger Effort
Tigers Place Fourth In ACC

The Tiger hardball nine was much the picture of the season before by compiling an almost identical record. In 1960, the Tigs' record was 11-10. In 1961, they had a record of 12-11.

Elmo Lam, outstanding sophomore shortstop, and Pete Ayoub, versatile sophomore second baseman, gave Clemson coach Bill Wilhelm something to look forward to in the future. Lam hit .319, scored 27 runs, and picked up 9 extra base hits. Ayoub hit for an average of .349 to lead all regular players in this department. He also got 29 hits, as did Lam, to lead the Tigers in this department, too.

Damon Vincent, sophomore pitcher, was the workhorse of the mound squad, working 61 1/3 innings. His record was 5-3. Gene Harbeson led the club in ERA with 3.31.

With the loss of only four seniors, Coach Wilhelm will have available many returnees. Nicky Lomax, Joey Taylor, Dave Ellisor and Jack Veronee will see considerable action next year.

The 1961 track season proved to be a period of strong competition among the schools of the ACC. Many conference teams showed a great improvement over the previous season. The Tiger cindermen, despite the loss of several outstanding seniors from the 1960 squad, managed to finish the season with a 2-3 conference record and a 2-4 overall record. In addition to the regular season competition, Clemson took fourth place in the state track meet and tied for fourth place with U.S.C. in the ACC championship event.

Sophomore dashman Wes King lead the season's scoring with 82 3/4 points. Rodney James, Clemson's sparkplug in the field events, was second with 58 1/3 points, and Captain Jim Moorehead was third with 44 1/2.

The Tigers competed well in all their meets.
Captain Jimmy Moorhead stares grimly down the track with only 3 laps to go.

Linton rolls over the high jump bar.

Smilin' Jack displays his hurdling form.

Dick Dobbs exhibits grace needed to throw discus.

Donnie Gilbert loosens up for an important meet.
Jimmy Moorhead kicks in final stretch.

Just like the good ole days back in Laurens!

P. W. Greenfield, Track and Cross Country Coach

FRESHMAN SQUAD. FRONT ROW, LEFT TO RIGHT: Nestos, P.; Towns, R.; Drown, E.; Heiskell, A. BACK ROW: Evans, B.; Turner, H.; Ackerman, W.; Evans, J.
Distant Runners . . . Ready!

The 1961 Cross-Country team proved to be unsuccessful in its attempt to get into the winning column. Coach Pee Wee Greenfield, Clemson's first full-time track coach, had many inexperienced runners on his squad.

Jimmy Moorehead again proved to be the mainstay on the squad which came close to winning time after time, but failed in each attempt. Dave Moorehead and Ray Dunkleburg also were among top contenders for top honors. They were supported by Jerry Calloway, Dave Farbox, and Jack Kelly.

Coach Greenfield received much interest from this year's freshman squad and likewise looks for better things in the near future. The freshman squad featured twins Bill and John Evans in each contest. Their performance accounts for Coach Greenfield's optimism.
Tankman sharpens diving skill during practice session.

Coach Carl McHugh and his swimming team met an unsuccessful season during the 1961-62 campaign. Clemson's lack of facilities and general interest poses the biggest problem for Coach McHugh.

Despite the winless record, several of the Tiger swimmers were consistent in their performances and frequently came out with personal victories. Co-captains Harry Forehand and Billy Bagwell were among the top swimmers on the team. Charles Witozik has developed into possibly one of the finest swimmers in the history of Tiger Tankmen. A multitude of sophomores gained some experience during the current year and this leads Coach McHugh to better thoughts in the near future.

Swimmers Lack Facilities To Compete Within ACC

The Clemson golf team’s 4-4-1 record must be considered a fair showing in a conference where competition is so especially sharp. Most of the matches won were played on the home course, but the Tiger linksmen played well in all their matches.

Captain Bob Moser played in the number one position. Bill Townsend, the number three man, had the distinction of being presented with the ACC Senior Merit Award.

Clemson finished second in the State Championship Matches and eighth in the ACC. Most of the members of this year’s squad, along with several outstanding freshmen, will be returning next season.

Coach Leslie Longshore is probably the most optimistic coach in the country after losing fourteen matches during the 1961 tennis season. His decision to "bohunk" number one man, Bob Burns, forced him to turn all his optimism toward the 1962 campaign.

An outstanding freshman team, composed of Mallory Evans, Doug Stewart, Freddie Craft, and Dick Pregnal is no doubt the major reason Coach Longshore counts on the Tigers to be the most improved team in the nation. Stalwarts such as George Christopher and Roy Strickland also figure high in the plans for the coming season. Last year Strickland and Bill Cooper won their opening matches of the ACC tournament before being eliminated by the third and fourth seeded men in the tournament.

The 1961 team consists of Strickland and Christopher, who were backed up by Bill Cooper, Bill Moore, Bow Shaw, Bobby Doyon, and Bibba James. While this group failed to win a match they represented Clemson in a gallant fashion and they all look to the 1962 campaign for a very potential season.
Practice Means Perfection

One of the fastest growing organizations on campus is the Clemson Rifle Club. Records of the past by Clemson teams have been good, but the members of this year’s group are much improved as evidenced by its high aggregates. This is the second year of formal recognition by the administration which has voiced its approval and aided in the modernization of the firing range.

The team has been molded into a proficient and disciplined group by able leaders in this field of sports. Membership is open to all interested students, and those joining participate in matches all over the state. This group of industrious Clemson students is bringing distinction to Clemson College in the field of marksmanship.
By golly! They didn't tackle this hard in high school.

Only the ball and ten yards separate this "Rat" from Glory.

A Cub tackler moves in on a Baby Jacket back.
Each year the Clemson College Athletic Department recruits many athletes fresh from their various high schools. Since these boys are not eligible to participate in varsity competition, they are organized into various freshmen teams. This first year serves to familiarize them with the type of competition they will later face as they take their places among the varsity squads. All frosh teams held regular practice sessions, and they play a regular schedule in competition with surrounding freshman teams. A lot of hard work is required in conditioning these freshman athletes into top performers.

In the past the freshman teams have proven to be of a very high quality, and this year was no exception. The Cub footballers, coached by "Goat" McMillan, rounded out their season with a commendable 3-2 record, posting wins over Georgia Tech, Duke, and North Carolina. Their only losses came at the hands of Wake Forest and South Carolina. The frosh roundballers also came through in fine fashion, with some very high scoring games, and a big win over the Piedmont Rangers. This year's freshman track team looked very strong as did the tennis team.

Look, Ma! NO hands!

Rudy hits two of his 51 points.

Holmes drives for Cub basket.
Larry Timms shows his stuff for SKE.

Good wholesome fun and activity.

I surely didn't think that I had dribbled past the goal.

Frat Competition Is Tough

The program of IFC sports was organized with the purpose of increasing competition between fraternities—competition which promotes good will and a sense of sportsmanship. The program also helps to bring the members of each fraternity closer together by playing together as a team. In addition to this, IFC sports help to promote fraternities on the campus.

There are, at present, four IFC sports—football, basketball, softball and volleyball. Trophies are awarded by the IFC to the winning team in each sport. Sigma Alpha Zeta came out on top in the Basketball competition in 1961. The softball and volleyball trophies went to Delta Kappa Alpha.

Most of the IFC games are held in conjunction with the intramural program, with the exception of football. This fall in the football playoffs, Kappa Delta Chi and Sigma Alpha Zeta were matched against each other in the championship game. The Zeta's won and captured the football trophy for the year.

Wait a minute, it's my time to get a rebound.
Sigma Alpha Zeta–I.F.C. Football Champions.

But I thought I put those two points down here.

This is what made me a high school hero.
I wish those bad 'ole boys would let me play.

Intramurals Offer Participation In Many Sports

A highly popular part of the extra-curricular activities at Clemson is the intramural sports program sponsored by the Athletic Department, and under the direction of Bill Wilhelm. Students have shown a great deal of interest in intramurals, and each year the number of participants increases. The program offers a wide range of sports and gives the non-varsity athlete a chance to participate in organized sports activities. Team sports such as touch football, softball, basketball, and volleyball are offered, as well as, individual sports ranging from table tennis to track. The competition is fast and furious, but a spirit of true competition is always maintained. A crowd of spectators can always be found at these games, as the participants display their various skills.

The intramural program is designed to include almost all sports of which there is some interest here at Clemson, and it affords all students the chance to participate in at least one activity. The teams are always well organized and many hold practice sessions as they seek to gain the champion slot. Each year brings a new champion in each sport. The program is growing every year and fulfilling a vital part of a college education.
Another two points for the home team.

Intramural play features fast action.

I think I can, I think I can, I did!

Student hits foul shot under pressure.
Divers Increase Membership

The Clemson College Skindiving Club is one of Clemson’s most well-organized clubs. It has not been organized very long, but it is efficient.

The requirements for membership are: to pass a diving physical, to show an adaptability to water, and to meet specified club requirements. No experience with equipment is necessary due to the excellent training program.

Many services are offered to the members by the Skin Divers Club. An air supply, maintained by two compressors, has been established for members’ use.

According to the constitution, the purposes of this organization are as follows: “to provide Clemson College students with an organized skin diving activity; to train interested students in proper and safe skin diving practices; to promote water safety at Clemson College and to act as a rescue and recovery group for Clemson College at such times as deemed appropriate by the officers of this organization and the Dean of Student Affairs.”
A Flying Deacon strains to block Brennan's lay up.

Old Book Sale
Advertising’s primary purpose is to make the availability of goods and services known to the public. TAPS is a once-a-year publication and it is hoped that these annual advertisements will be helpful and profitable to those business concerns included. Clemson students come from a wide section of the country with our advertising support following in their footsteps. Eating establishments, clothing stores, drug companies, travel agencies, service stations, hotels, and jewelers have expressed an interest in the student body of Clemson through advertisements. Industries, realizing the quality and ability of Clemson graduates, have chosen to duplicate this procedure. Many companies have registered complimentary advertisements.

We, the TAPS staff, wish to thank these firms and recommend that this section serve as a guide to patronage for the entire student body.

Electricity is the Biggest Bargain in your Family Budget

Cost of RESIDENTIAL ELECTRIC SERVICE

The cost of most items you use today has more than doubled since 1940. But the cost per kilowatt hour of electricity has decreased 38% in 20 years, while your residential usage has increased five times, indicating a higher standard of living.

The electric way, best today—tomorrow, the only way!

DUKE POWER COMPANY
INVESTING IN THE FUTURE OF OUR STATE

You will see signs of growth all over the 23-county area served by the South Carolina Electric and Gas Company. You will see new power lines going up, natural gas pipelines being put into the ground and generating stations being constructed.

When you see these things, you can rest assured that SCEGCO is constantly building to provide better service for its customers now and in the future.

You can be sure, too, that the millions of dollars being invested in our fine state to provide for the present and future needs of SCEGCO's customers is not coming from the coffers of the government. It is being provided by this investor-owned company, itself. This is private enterprise at work.

INVESTMENT IN FACILITIES

As of December 31, 1961, SCEGCO's over-all investment in plants and other facilities amounted to more than $290.5 million.

INVESTMENT PER EMPLOYEE

The investment for each employee on payroll as of December 31, 1961, amounted to $158,000. Although not quite comparable, the last figure available (1957) shows that the average investment for production workers in other industries was approximately $15,866.

PROVISION FOR TAXES

The provisions for all taxes charged to operations during the 12 months ended December 31, 1961, amounted to $13,905,568. This amount was distributed, $8,216,463 to the Federal Government, $3,213,024 to the State Government, $2,476,061 to Local Governments.

The necessity for adequate taxes for the proper operation of Government is readily recognized, but the present method of taxation, whereby government power systems operate virtually tax-free is grossly unfair to the customers of investor-owned companies, such as SCEGCO.

NOTHING SO DURABLE AS DURAWELD

STEHEDCO Duraweld Harness Frames are Premium Grade and guarantee longer life. Each Duraweld frame stick is a lamination of strips of carefully selected, high quality wood permanently bonded together for greater strength and stability. This assures less distortion, warping, and splintering, with greater holding power for hardware, and elimination of weak spots.

SOUTHERN Duraweld Shuttles are made of finest quality tempered dogwood end blocks, for greater resiliency and tip retention, permanently bonded by an exclusive Southern method to long wearing wall sections of laminated wood or plastic. They assure at least 100% longer life expectancy with only a very moderate weight increase.

STEHEDCO Duraweld Picker Sticks provide the unexcelled combination of greater strength and whip, plus resistance to warping. They are made of multiple laminated veneers of high grade hickory reinforced with veneers of vulcanized fiber, permanently bonded with phenolic adhesive into a uniform panel.

Duraweld Harness Frames, Shuttles and Picker Sticks are manufactured with great care under rigid Quality Control methods, and will pay for themselves over and over again with superior performance and longer life. Ask one of our qualified Sales Engineers to show how YOU can start counting your savings when you invest in DURAWELD.
