Its A Different World

For the thousands of students who attended Clemson University during the 1992 school year, life at college proved to be a different world apart from what they were accustomed. The incoming freshmen were overwhelmed with the adventures that faced them in their first year, yet they looked at college life as the beginning of a different stage in life. As the freshmen matured, they became sophomores. The sophomores were confronted with the dilemma of figuring out exactly what they wanted to do with their lives. They realized that the decisions they were making during their sophomore year at college not only affected their present situation, but also impacted their future lives. Then there were the juniors. They were not new to the game, but...
they were forced to make decisions different than ever before. They were over the halfway point, but still looking at another year or two before they were released into the “real world.” The junior year at college was the stressful time of the college years. Most of the courses in the junior year are the so-called weeder courses that determine whether or not a student was going to make it through the next one or two years. After being confidently reassured that the student had the ability to make it, (s)he was then ready for the celebrated senior year at college. Seniors, however, did not always have it easy. The different worlds that were approaching them were moving in fast. Job recruitment, graduation and the last final exams all formed the atmosphere that surrounded a senior. Most seniors wondered if they would ever be ready
for the different world of work that was inevitably facing them.

Because each year at college was like a different world, we decided to look at Clemson University as a different world. The phases that Clemson University and the student body went through shaped the future leaders of America that graduated from Clemson.

Although most may not have taken a perspective look at their college life until it was over we focused on the different aspects that each year possessed while we were still experiencing them. As
we moved along, trying to capture the essence of the 1992 Clemson University Student Body, we hoped that you as an individual student were able to associate yourself with the views we found most appealing and of most interest.

Student Life

We all came to Clemson to experience the beauty and pride which has resided on the campus for over a hundred years. We all wanted to change ourselves and become an important part of the global community. From the fall of the Berlin Wall to the rise of Democracy in the USSR, we strove for a lasting peace. Through the different activities and functions, the students of Clemson University helped mold a new world.
The annual Welcome Back Festival was always an event to look forward to especially for the upperclassmen who had a notion as to what was going on. It was a chance to become acquainted or re-acquainted with the downtown area that many of the students came to know all too well.

The Welcome Back Festival was unparalleled to other events offered at Clemson. Nowhere else could you sample the finest in foods and services our community offered all for only a quarter or fifty cents. There was something for everyone. Food stands abounded from burger and pizza places to steak and cultural restaurants. Automobile service stations, banks and counseling centers were represented and offered various information. Also, a local radio station was on hand with music. In fact, the Welcome Back Festival may have been the ultimate student orientation.

The festival ran very smoothly. The weather was good, the food was great, and the crowd was friendly. Everything was perfect, save one. Our drink supplies were nowhere to be found. Thank goodness some volunteer stands set up by local Christian organizations and churches were able to keep everyone cool till the big boys arrived.

The Rally Cats made an appearance at the festival and performed a few of their cheering routines.

Students and Clemson locals sampled food from the various restaurants in the Clemson area.

Clemson's goodwill ambassador, The Tiger, found admirers of all sizes in the crowd.

The Rally Cats made an appearance at the festival and performed a few of their cheering routines.

Members of the band played Tiger Rag and other tunes soon to be heard on game days in the Valley.

Students and Clemson locals sampled food from the various restaurants in the Clemson area.
The annual First Friday parade coincided with a little unwanted rain; however, the spirits of the shrunken crowd were not dampened. This year Central Spirit took over sponsorship of the parade from Pi Kappa Alpha fraternity and attempted to include a wider spectrum of campus organizations.

Several revisions were made with respect to voting procedures for Miss First Friday. In the past, each candidate had a jar with her picture on it and students patronized their favorite candidate with monetary donations. Of course, the candidate with the largest collection was crowned Miss Friday and the money was given to charity. This year, students used their I.D. cards to vote for one candidate only and a fund-raising competition was held between the participating organizations.

Jennifer Peterson, sponsored by Kappa Alpha Theta was crowned Miss First Friday. Zeta Tau Alpha Sorority raised $1800 to win the fund-raising competition. All money raised will be given to the charity of the organization’s choice - a total of $4000.

Bob Kugler, Central Spirit’s Director of Special Events stated, “Central Spirit was glad to have the opportunity to sponsor the parade. Next year, we hope to attract more participation from the whole town of Clemson.” Forty-five organizations were scheduled to participate, but due to the weather only twenty-five marched. The pep rally held in the amphitheatre immediately after the parade boosted the spirits of the wet and dreary fans.

But in the Clemson spirit, a bright side was found in all the rain. The last time a large rainstorm damped the First Friday parade was in 1981. And of course any good Tiger knew the importance of this date. Like in 1981, Clemson students soon brought up the thought that the National Championship may happen again.

* Susan Hegler *
Dana Began and Bettie McLeod looked like they were having fun preparing the Alpha Delta Pi float for the parade.

The annual rally got the students into the spirit.

The 1992 Miss First Friday, Jennifer Peterson. Two loyal festivity seekers joined in the activities despite the weather.
Sheltered by an umbrella, even the little ones came out to watch the parade.

Participants waited with dismay, but patiently for the parade to begin.
WSBF was one of the several non-Greek organizations to be included in the activities.

An ambitious Tiger prepared to take flight on the Alpha Delta Pi float.

Mu Beta Psi, the Honorary Music Fraternity volunteered their services to the parade spectators.
The Tiger Flag was easy to recognize as it was flown down Highway 93.

Once again the Kudzu Kids made their way into the First Friday Parade.

Angel Flight members showed their enthusiasm as they waved to the camera.
A few members of Chi Omega took time to pose with their favorite pooch.
Every October tens of thousands flock to the big city of Clemson to pay homage to their old alma mater. Loyalty in fans is not absent and a lot of hard work went into the preparation for the big day with Virginia. Throughout Homecoming week, sixteen campus organizations could be seen clustered together tottering atop scaffolds busily constructing exhibits within the boundaries of this year’s theme, “Cowboy Clemson.” Each group spent approximately $2,000 on their display.

On Friday October 11, 40,000 fans filed into the lower deck of Death Valley to take their roles of noisy, rowdy fans in the thirty-fifth annual Tigerama. The world’s largest pep rally was sponsored by Blue Key and WSBF. The Tiger Band, cheerleading squad, Rally Cats, and Central Spirit involvement steered the pep rally into success.

Kappa Kappa Gamma won first place in the skit competition with their own rendition of *Dances with Wolves* called "Dances with Tigers." By a campus wide election, Mechel Busby was pronounced the 1991 Homecoming Queen. Needless to say, this was one shocked girl! The third runner up was Kelly Cochran, the second runner up was Paige Owen, and Angela Dawkins was named first runner up.

The float competition also had some great winners. For the moving display competition, third place went to Phi Delta Theta, second place went to Alpha Gamma Rho, and first place went to Sigma Nu. In the still display competition, honorable mention went to Lambda Chi and Performing Arts. Third place in the competition went to Pi Kappa Phi, second place went to Delta Chi, and first place went to Fellowship of Christian Athletes.

Tigerama’s grand finale was eight minutes of spectacular fireworks to a medley of Star Wars, Battlestar Galactica, Space Camp, and finishing with the ever powerful Tchaikovsky in a fashion that could only induce goosebumps.
Pi Kappa Phi's stationary display represented the Tiger rounding up the competition. Delta Chi made a spectacular presentation of the changes that have occurred to Tillman Hall over the past few decades.

Delta Delta Delta taught a valuable lesson in a humorous skit.
Saturday’s game was a little shy of expectations. After trailing behind Virginia until the fourth quarter, Nelson Welch missed three field goals before Coach Hatfield sent him in to tie the game. Instead of going for the win, Coach Hatfield was conservative and went for the tie in the chance to still win the ACC title.

Despite the rather disappointing 20-20 tie, Clemson loyalists far from being “fair weather fans”, continued to back their Tigers in a way that just cannot be surpassed.

Next year Clemson will hopefully win their Homecoming game, but the effort that the Tigers put forth really kept the spirits of the fans high and ready for more.

Sunday was quiet. People strolled around looking at the floats slowly becoming mounds of throw away history. The visitors who were left wandered around getting one last glimpse of the beautiful campus...until next year when the world’s largest pep rally will live again.

Homecoming 1991 once again proved to be an event which no one should have missed. The excitement in Clemson was electric. The only problem was all the paper that had to be cleared off Bowman Field after all that fun! But that was a little price to pay for such a rememberable event at Clemson University.

•Kristie Gantt•
Exciting fireworks served as the grand finale to Tigerama. Pershing Rifles, Company C-12, aided in the presentation of the Homecoming court.

Laura Ackerman, a graduate student in Elementary Education, worked diligently to get the float ready in time for its presentation. The Tiger and the Homecoming court waved to the fans as they passed spectators during the halftime ceremonies.
Kappa Alpha Theta showed everyone that cows don't horse around.
Preparing the floats for Homecoming proved to be fun as well as tiring for a few hard workers.

Homecoming queen, Mechel Busby, from Estill, SC majoring in Computer Engineering, smiled proudly at the crowd.

Jeremy S. Moore
Kappa Sigma's Tigerama skit showed the Crowes who the true bosses were.
The beloved Kudzu Kids displayed their talents for the Homecoming audience.

Fearless tigers held down the fort for Sigma Nu.

Sigma Chi presented its opinion of the Virginia Cavaliers with a memorable float.
John Knowles was probably best remembered as the author of *A Separate Peace*. But Mr. Knowles during his outstanding literary career had also made himself known as a critic, a speaker, and a world traveler. John Knowles came to Clemson last year to share his experiences as a writer to the students of the university.

Mr. Knowles walked onto the stage in a slow, dignified strut. His eyes peeked out from behind his glasses as he surveyed the audience in Tillman Hall. Anyone who was present couldn't help but sense the years of experience Mr. Knowles had tucked away.

John Knowles' stories came from his own personal experiences in life. As he stood on the stage at Tillman with band equipment set up for a concert behind him, Mr. Knowles began telling the audience about his life. Mr. Knowles started by telling stories about his adventures in France. It seemed like everywhere this man went something strange happened. And because of this fact, Mr. Knowles informed the students that his next novel would be about his adventures in France and other parts of Europe.

"There is a difference between writers and other artists", Mr. Knowles informed the audience. Mr. Knowles argued that writers only needed a pad of paper, a pencil, and a typewriter. He said other artists had a harder time traveling because they might need pounds of photo equipment or music equipment. Mr. Knowles thought there was nothing more enjoyable than going on a trip or to a lecture especially since he didn't have to take much with him. And Mr. Knowles was especially happy to finally be able to speak at Clemson University.

Mr. Knowles stood out as one of America's greatest novelist. He believed in the trend of America, which was literary excellence. Many people today look upon his work as a major contribution to the continuing fine tuning of the ancient art of storytelling. Many schools honored Mr. Knowles by placing his works on the required reading lists for high schools. With numerous awards for his efforts, Mr. Knowles was indeed an inspiration for the future writers at Clemson.

RECRUITING THE BEST

The Clemson tAGers were a specially selected group of students from the College of Agricultural Sciences at Clemson University. The goal of the organization was improving communication about agriculture to the public. The group of young men and women were dedicated to serving agricultural industry in South Carolina by sharing the message of modern agriculture and the College of Agricultural Science. The tAGers served the College and the state by representing agriculture at related functions and sharing the message of agriculture with various groups.

The tAGers were formed in February of 1991 with the selection of eight charter members. The group grew to 14 in the fall of 1991 with the addition of seven more members. The organization was very diverse with members from various majors, hailing from three states, and having a wide range of exposure to traditional agriculture.

The group assisted with student recruiting activities such as Phon-a-thons, mass mailings, and special recruiting events. One of the developing aspects of the group was the “tAGer's Talking” Speakers Bureau. The bureau provided messages for any organization in the state that was interested in learning more about agriculture and the College of Agricultural Sciences at Clemson.

In its first year the tAGers had a fantastic start. There was an attitude of excitement and enthusiasm that was beneficial for Clemson University and South Carolina. There was a bright future for this organization as the members “reached out and tAGed somebody's hand - for Agriculture!”

- Kirby Player -
Each tAGer candidate was questioned during an interview session.

Demonstrations were one of the tAGers tactics for teaching agriculture.

The Entomology Department recruited students during the tAGer sponsored organizations day.
Peter Burtchell came to Clemson University last year to address the environmental concerns of today's world. Peter Burtchell worked for the Cousteau Society which gave him exposure to many of the threats to the world's ecology. Mr. Burtchell was a field geologist, water rights analyst, National Park Service park ranger, and a science resource consultant.

One of the main points of the lecture was the loss of natural resources, especially water. With the increase of pollution, weather patterns were changing and water was becoming more scarce. Mr. Burtchell pointed out the Middle East as a good example of what happens when a natural resource was exploited. Mr. Burtchell explained that many of the conflicts were over water rights. Another good example of the collapse of an ecological system was Haiti. Mr. Burtchell pointed out that because of Haiti's high birth rate, resources were being stripped bare. Most of the island had been turned into a desert because of the cutting down the trees for firewood. Water was extremely depleted and had to be trucked into many towns. Mr. Burtchell went on to say that without taming the birth rate, things would get worse and civil unrest would result.

The other main point in the speech was the loss of the rain forest. Mr. Burtchell pointed out that the rain forests supply the earth with much of the weather patterns and recycling of water. The rain forests were being cleared away with the result being global unbalance and loss of habitat for many animals, insects, and plants. Mr. Burtchell explained that most of the clearing was due to the economics of the countries where the rain forests were located.

Mr. Burtchell ended his lecture by pointing out some bright spots. Brazil was beginning to stop clear cutting since it was discovered more money could be made by harvesting the fruits and nuts of the forests. Also, the Middle East countries were beginning to talk and compromise on water rights. The only place not seeing improvement was Haiti.

* Maia Lea Eppes *
* All Photos By Vern Verna
Peter Burtchell was very interested in educating everyone about what can be done to correct the environmental problems.
Clemson University had successful endeavors in many areas. One good example of this was the Agricultural Sales Center. The Agricultural Sales Center was located in Newman Hall which was the food industry building. Agricultural Sales opened for business shortly after the completion of Newman Hall in 1955 and had been going strong ever since.

Agricultural Sales offered foods from Clemson's various livestock facilities located just off campus. Items available included eggs, meats, milk, frozen yogurt, ice cream, and blue cheese. The majority of patrons were more familiar with the milkshakes and other ice cream products, but it was Clemson's blue cheese that was known literally world wide.

Blue cheese has been produced and sold by the Agricultural Sales Center since its beginning. In the earlier days, the blue cheese was aged in the Stumphouse Cavern. The blue cheese was later aged in coolers in Newman Hall. The blue cheese came in three forms: wheels, wedges, and crumbles. Every month, 300 to 350 units of each kind were sold. Distant visitors considered the blue cheese a worthy prize to take home, especially if the visitors were from another country. The Clemson blue cheese was in highest demand during Christmas.

Although Clemson's blue cheese had the most heritage of the items sold at the center, there were many other products offered. The Agricultural Center in 1992 was also under consideration for remodeling to make access better and provide more room for the different products to be sold.

- Dent Ussery -
All photos by J. Mitchell Brown
The large vats used by the Agricultural department had to be closely monitored.

Milk sales were one of the main sources of income for the Agricultural Sales Center.
Drug abuse was a major concern on college campuses across the nation. And Clemson responded by having an awareness week on campus. As part of the week's activities George Obermire, an excellent speaker on drug abuse, came and spoke to Clemson's students. Mr. Obermire spoke about the "Natural Highs" every person could have without bad side effects.

What was a "Natural High"? Mr. Obermire explained that anything that gave a person pleasure was a natural and safe high. Mr. Obermire explained that as children, people do not yet have adult conceptions of the proper way to act. Children had the ability to reach a natural high. As people grew older, adult restraints caused people to forget how to naturally relieve pressures of everyday life. Mr. Obermire during the speech wanted to point out several ways that students could gain a very valuable tool—how to relax and have fun within normal limits.

Anything that brought pleasure was a natural high. Running, skydiving, racing cars, reading a book, or sex were all natural highs which, unlike drugs, were legal and not lethal. Mr. Obermire wanted the students to understand that it was important to find an activity which would make them smile and keep them up on a steady plateau. Chemicals would not do the same. By doing this, the students could avoid falling into an emotional pitfall. Drugs were not necessary to make one feel good. Mr. Obermire proved his point.

I went to the speech thinking it was going to be boring. I was in a bad mood and depressed. After shooting the audience with water guns, then donning a purple wig and dancing like he was having convolutions, I could not help but laugh hard. Mr. Obermire's point was that laughter was the quickest way to reach a natural high. And he was right! After leaving the speech I was feeling great and alive. Mr. Obermire new what he was talking about. This was a lecture no one should have missed.

- Maia Lea Eppes -
At the beginning of the fall semester, the Minority Council and Student Development organized a picnic for minority students. The Minority Council was founded to bring together the minority students of Clemson and to promote a better understanding among all students. The Student Development organizes events for students as well as help various campus groups. The purpose of the picnic was to introduce the new freshmen to Clemson University as well as reacquaint friends. Everyone who attended had a great time.

There was great food and music. A DJ played all the popular tunes of the year so everyone could get up and dance. People sat on the steps of Holtzendorff talking about what they did that summer and just having fun. Although a little rain caused a few to get wet, the rain couldn’t dampen the spirits of the people.

The picnic was sponsored in hopes of helping minority students adjust to the new experience of college life and to make new and lasting friendships. This was the first year for the picnic and the organizers hoped it would be just as successful next year.

• Catherine Avondale •

All Photos By Jeremy Moore
CLEMSON. That one word could have been enough to strike fear into the hearts of incoming freshmen, if it were not for Freshmen Orientation. The introduction to Clemson, which has become an annual event, was again a great success. Newly accepted freshmen came to the Clemson campus during the summer to become acquainted with the university.

One positive aspect to the Freshmen Orientation program was that it allowed new students to begin friendships before the pressures of school started. Many activities helped form friendships. One on one interaction, staying on campus, and planned activities kept the new students busy. The Clemson Ambassadors, Clemson upperclassmen that help the freshmen during the program, made sure no one left without feeling the Clemson spirit.

To show the new students Clemson spirit, the Student Government organized an activity to help the students learn about Clemson University's sponsored extracurricular activities. The students got to hear the famous Tiger Band play the Clemson fight song, the Rally Cats strut their stuff, and many student leaders tell what their organization had to offer.

During the day, the freshmen walked around on campus. They were able to locate the buildings and see some of the summertime beauty Clemson had to offer. But there was also a serious side. Many freshmen got their first taste of making a schedule and the difficulties of finding a major.

Freshmen Orientation was once again a great success. The new freshmen could look forward to coming to Clemson in the fall. Now the freshmen could settle down and soak up some of that Clemson spirit!

*Maia Lea Eppes*
This family picniced on the beautiful grounds of Clemson.

The Ambassadors liven up the crowd with skits and a pep rally.

These freshman got their first taste of cafeteria food during the orientation breaks.
The hallowed halls of Tillman have had a few facelifts over the years, but the well-preserved tower was a familiar remnant of historical Clemson.

In 1985, the single bell in the tower was replaced by 6 new bells which were gifts of the late Rembert G. "Red" Horton and his family. In 1987, forty one more bells were added to complete the 47 bell carillon. The Paccard Fonderie de Cloches (Paccard Bell Foundry) crafted the bells using a unique mold for each one. All of the bells were donated and each bears its own inscription. The largest bell (The "Big C") was bought by the Class of 1943. The bells ranged in size from 29.5 pounds to 4,396 pounds and varied in cost from $1,500 to $55,000. The whole project, including the supporting steel superstructure, cost in excess of $350,000.

Jeff McNeill, associate vice president for Development, said the bells, which constituted the biggest and best carillon in South Carolina, will last forever. He had hopes that a carillon club would be initiated and its members would play the bells on a regular basis.

Though all students had undoubtedly heard the bells chime every quarter hour and after football victories, few had the opportunity to actually see them. When passing through the door that connects the historical tower to the maze of classrooms, the dark dusty atmosphere would take you back in time. The four outward facing clocks let in light two stories below the mass of bells. The levers which controlled the bells were housed in a structure reminiscent of a piano or organ. The broom handle levers were labeled with musical notes and the music to the Alma Mater rested nearby. Once in the top of the tower, a spectacular view of the university could be seen. The breeze blew through the open arches and the bells rang out across campus. Only time would tell the future of Clemson University, and Tillman Hall would be there to witness the changes and to serve as a symbol of tradition to all who see it.

Susan Hegler

All Photos By Wally Dawson

A man reads a newspaper with Tillman Hall in the background.

Tillman Hall was completed in 1914. It was designed by architect Frank Lucien Thompson of New York and completed under the direction of John C. Logan, professor of architecture. The cornerstone was laid on February 12, 1889. Tillman was named in honor of James S. Tillman, a former president of the South Carolina Agricultural College. It is the oldest building on the campus, and it has been used for various purposes over the years.

Tillman not only houses classrooms, but also the famous carillon bells.
One of the forty-seven bells of The Tillman Hall Memorial Carillon.

The Tillman Tower kept many students on time, but few ever saw the less glamorous inside of the clock.
The Clemson Players wonderfully presented John Guare's play, *Landscape of the Body*. Under the direction of professor Mark Charney, the Clemson Players turned this heart-touching and thought-provoking drama into a delight for all those attending. The story centered around the mysterious death of Bert, a fourteen-year-old boy played by James Palmer Jr. Guare de-emphasizes the plot by arranging the play into a series of flashbacks.

The play opened with Holahan, a New York police detective, played by Thom Seymour Jr., and Betty, the mother of Bert, played by Dawn Jones. Holahan, in disguise, was making a desperate attempt to apologize for wrongly assuming that it was Betty who killed her son. The truth was not revealed until Rosalie, narrator and dead sister of Betty, played by Beth Dalton, interrupted the scene and moved the audience through the out of order plot line of the play.

The murder took place while Betty was visiting the estate of Durwood Peach, a millionaire from South Carolina, played by Robin Roberts. Durwood visited Betty in New York City after leaving, with his wife's consent, to seek out the only woman he ever loved. Betty, lured by the promise of becoming rich, agreed to visit the estate with Durwood. Betty leaves Bert at home to fend for himself, unsure of whether or not she would return. After discovering that Durwood's family had only used her to cure Durwood of a mental illness, she returned home at the same moment Bert's body was being dumped into the river.

The flashbacks revealed Bert's murderer. Donny, a friend of Bert's, played by Matthew Ferriera; Bert's death-crazed girlfriend Joanne, played by Jennifer Blodgett; and her friend Margie, played by Aretta Jenkins, all played significant roles. It was Donny who murdered Bert with two blows to the head using a monkey wrench, the same weapon the pair had used to attack and pille from homosexuals in Bert's apartment. Joanne helped Donny dump Bert's decapitated body into the river. Accidentally witnessing Donny and Joanne pushing the body in a grocery cart, Margie broke down into a hysterical screaming scene and put what she had seen out of her memory.

The flashbacks gave the answer to the murder mystery, information which neither the police nor Betty ever resolved. The scenes focused on issues such as parenthood, violence, city life, sensuality, death, youth, and love. All of the themes interacted to draw the spectator away from the plot and stimulate serious thought about life and the ordeals that the characters encountered throughout the play. Overall, it was another terrific performance by the Clemson Players.

*Tracy Corley*
Think for a second, if you wanted a job badly and in order to get it, you invited your boss along with his air-headed wife to a last-minute dinner catered by their hated ex-daughter-in-law. What would you do if you found out all of this five minutes prior to their arrival? Not only that, but that you also invited a friend of yours and her boyfriend to come to the same dinner and the caterer, that same ex-daughter-in-law, dated your friend’s boyfriend the month they had been separated. Now put those two intriguing situations over some cold avocado soup and add a brain-dead klutz to serve water at your dinner party and see what happens. It’s a guaranteed menu of comedy.

These scenes described were only a few of the major scenes from Clemson’s own Robin Robert’s play *Dilemmas With Dinner*. This play, directed by Chip Egan, was part of a celebration called the American College Theater Festival. It ran from October 29 to November 3. Some of the cast in the play seen before in various other productions, were the following: Allison Tutterow, Jan Geist and James Palmer.

This play was one that kept the people in the audience’s mind busy. The situations moved fast and furiously from one to the next. It was like watching an “I Love Lucy” rerun, and to have missed it would have been unheard of. So the next time you see posters up advertising a Clemson Players play, go and have fun!

* Alison Horton *

All photos by James Brown
Humorous, thought provoking, interesting, entertaining. "Them Next Door", directed by Thom Seymour, Jr. was a play that challenges its audience’s perceptions of cultural differences and race relations.

The one act, four scene play opened in the home of the Jackson’s, a middle-class black family that had recently moved into a predominantly white neighborhood. Booker, who was the head of the household, was portrayed by Kevin D. Gripper. Booker was a postal worker and had to work his way up the ladder through racial tension all of his life. Teneka Witherspoon performed Genny, Booker’s wife. She was a caring housewife, mother, and mediator of the family. Alvin, as portrayed by Kevin Dawkins, was their headstrong son who was a young insurance salesman.

The conflict was created by the family who the Jacksons moved next to, the Gibbs, who were a middle-class white family. Emmanuel Scordalakes performed Henry, a former insurance salesman forced into retirement because of his heart condition. Berfa, who was portrayed by Tonya Bledsoe, was Henry’s paranoid wife and was afraid to be left alone. Their daughter Grace, preformed by Krista Phillips, was married and had a family of her own but was home visiting her parents for awhile.

The plot centered around ironic misconceptions that the two families had of one another. Booker thought that Henry employed a lawn care service because he had a lot of money and was too lazy to do the work. Actually, Henry was unable to do it because of his heart. Meanwhile, Henry believed that the only reason Booker worked so hard in his yard was to show him up.

Both families also had inner conflicts with their children. At the Jackson’s, Alvin did not appreciate the way he was being treated by his white counterparts at work and wanted to quit. Booker did not agree with Alvin and felt that he should stay at the insurance agency. Meanwhile, next door at the Gibb’s, Grace told her parents that she and her husband had moved to an integrated neighborhood. Henry and Berfa were astonished at their daughter’s decision to move to this neighborhood.

This was the first performance of a new group in association with Clemson Players, the Minority Tigers of Theatre (MTT). Founded by Kelvin Thomas, a Clemson University graduate, the group grew from 5 participants to 25 participants in a year. MTT’s purpose was to promote minority interest in performing and positive racial interaction through the act of theatre. The group’s goals were equally clear: (1) attain original minority written plays for future productions, (2) promotion of theatre classes, (3) open theatre communications between all races, and (4) play productions on campus.

*James T. Brown*
Daniel Auditorium was crowded with onlookers as a mosaic of wonderful lines, beautiful music, exciting fights, and dramatic dances were displayed by the Clemson Players. From February 18 through March 1, the Clemson Players, directed by Wendy Overly, performed an outstanding rendition of Shakespeare's most famous love story, *Romeo and Juliet*.

The main actors of the play were Anne McKenzie as Juliet, Emmanuel Scordalakes as Romeo, Jan Geist as the maid, and Chris Stezin as Mercutio. The minute the players stepped onto the stage, everyone in the audience knew that an electric performance was in store.

Each minute of the play was filled with action -- both emotional and physical. The fighting scenes were especially action-packed and added an extra sense of realism to the production. These scenes were special due to the direction of a guest artist, Steven F. Anderson, who also played the part of Tybalt.

Another fascinating aspect of the play was the music. A special performance by Jennifer Goue, a Clemson student who played and sang her own song, *I'll Sing for You*, was excellent. The dancing, choreographed by Wendy Overly, was also another reason for the play's outstanding merit.

No one should have missed the play. It was truly an excellent performance by the Clemson Players.

* Alison Horton *

CHRISTA ANNETTE McCLARY of Pawleys Island, S.C., was a management major. She was a member of Delta Delta Delta, Reformed University Fellowship, Toastmasters, Clemson Water Ski Team, Clemson Water Ski Club, SAM-Society of Advancement of Management, Organizations Advisory Board, College Republicans, worked with Adopt-A-Cub tutoring program, and Campus Crusade. She believed that being Miss Clemson allowed her to represent Clemson students, faculty, and alumni. She also believed that the "Clemson Experience" was enhanced by active participation. The most important relationships in her life were her faith in the Lord and her family. She planned to work with her father after graduation.
KATHERINE R. GOFF, of Columbia, S.C., was a Senior at Clemson majoring in Management. She belonged to Delta Delta Delta and resided as the Executive Vice-President. She also belonged to Clemson Women's Council and Central Spirit. When she was nominated by her sorority to run for Miss Derby Day and accepted so that she could help benefit the less fortunate. Her favorite people in the world were her parents, Buford and Barbara Goff, because they give her never ending love and support. After graduating from Clemson, she hoped to continue her education by receiving her Masters in Business Administration and to eventually manage her father's engineering firm.

Miss Derby Days
MECHEL DELAINE BUSBY of Estill, S.C., was a computer engineering major. She was a member of Alpha Lambda Delta, the National Society of Black Engineers, Golden Key, the Institute of Electrical and Electronics Engineers, and Alpha Kappa Alpha. She accepted the nomination for Miss Homecoming to not only fulfill her dream, but also because she was proud to represent Clemson. Mechel had extreme admiration for Dr. Mae Jemison, the first black astronaut. In order to reach her goal of becoming a CEO of an established corporation, she planned to attend one of the top business schools in the nation and to acquire a Masters in Business Administration.
JENNIFER LEIGH PETERSON of Beaufort, S.C., was a political science major. As the vice-president of Zeta Tau Alpha, she was excited to have this relatively new organization be represented on campus and for it to get involved. Her favorite person is her father, Carl Peterson. After graduation, she planned to either attend law school at the University of South Carolina or attend the Clemson University graduate school and major in public administration.

Miss First Friday
The T. Ed Garrison Livestock Arena was another successful expansion and addition to Clemson University. With the gleaming red roofs and the impressive size, the arena quickly became one building no visitor wanted to miss.

The arena complex consisted of stables, a show arena, and several other buildings. Many people looked forward to its completion. The new structure gave people with interests in livestock in Clemson a contemporary place to gather for events. One of the very first shows held at the arena was the American Saddle Bred show. In the fall of 1991, the world renown Royal Lepizan Stallions came to the arena which allowed residents to see Clemson's new pride and joy.

The T. Ed Garrison Livestock Arena was another testimony to Clemson's continued desire to be a leader in the field of agriculture in the Southeast.

- Billy Armstrong -

One of the many magnificent buildings at the new facility was designed to house show animals.
After a hard performance, one of the Lepizan Stallions eagerly takes a treat.

The main complex. A fine example of beauty and function molded together.
Student teaching provides education majors with the hands-on experience that most other majors do not. Trying to keep the attention of a room full of grade-school children is one of the many tasks that student teachers must face.
Student teaching—the pinnacle of every Education major’s college career. After taking tons of education courses which instruct the students in the fine art of teaching, education majors are required to complete a semester of directed student teaching.

For many students, this experience was long awaited because it marked the near completion of their college careers. But others dread it because of the frequent observations by their professors. Student teachers are graded based on their adherence to a set of strict guidelines and their overall performance as a teacher. Typically, student teachers spend a couple of weeks just observing the classes they will be teaching and getting used to the material. The student teachers then take on the role of an actual teacher. The student teachers prepare lesson plans, grade work, and deal with all discipline problems on their own.

Christina Sulzen, a Secondary Education/English major student taught at Seneca High School. According to Christina, student teaching was not as easy as she expected. Long nights are spent grading large amounts of tests and homework, and the days seem longer after being accustomed to the typical college schedule. However, Christina claimed that she learned a lot from the experience, not only about teaching but also about relating to the students. She also learned more about the material which was taught in public schools. Christina gave much of the credit for her success to Seneca High School saying that, “it was much easier to work in such a technically advanced school and with a teacher who happens to be Teacher of the Year”.

Student teaching can be full of many rewards. Teaching high school students is a nerve-wrecking experience.
When Presidential hopeful David Duke rented the Strom Thurmond Institute on Thursday, January thirtieth, he did not anticipate that a crowd of well over one thousand people would try to pack themselves into the 200 seat auditorium.

The coming of David Duke to Clemson University attracted supporters and protesters from both the University and the surrounding community. Though most were simply hoping that they could hear the controversial presidential campaigner speak, many students and faculty members clearly stated how they felt about him speaking at Clemson University.

Those who were in opposition to Duke’s visit felt that his implicit messages should not have been allowed to be voiced on campus without questioning from the student body. Students, professors, and organizations, such as the Pro-Choice Action League, all carried signs reminding onlookers of Duke’s past association with the Ku Klux Klan and Neo-Nazism.

Those who were in favor of Duke, as well as some who were not, felt that some of these actions were unfair. Many felt that Duke should not be persecuted for his past. Others felt that those who were in strong opposition to his visit to Clemson were denying him the right to speak and defend himself.

“People are more concerned with what happened in [his] background than [with his views],” said Ben Harrison, a freshman architecture major. “Sometimes the media overemphasizes areas.... It is good, though, to know a little about his background, but sometimes the media overdoes it.”

Some people thought that Duke had many good points. But a majority felt that there was no chance of him winning the position as President. Community member Johnny Hayes said that Duke “brings out good issues that a lot of Americans want to hear about.... The thing that scares me is who he would appoint to positions like Chief-of-Staff or Secretary of State.... Duke is a very intelligent man, but because of the people that he [associates] with, I will have to support Bush.”

The main dissension which rambled through the minds of the crowd was not about his controversial history, but more about the fact that Duke had not rented out a larger place. Most of those who were there did not know Duke’s policies and wanted to hear his message for themselves. Computer engineering Ph.D. student Keith Wickman just wanted to hear “what he had to say instead of having it interpreted by the media.” Most students at Clemson University never received that chance to know the David Duke that the media had not jeered.

In spite of Duke’s claim that his past views were no longer true, tensions between protesters and supporters broke into verbal fighting after Duke’s departure. The question of whether or not they would hear Duke’s message was lost in racial slurs and cries of hate. No longer was the fight about David Duke; the protests soon turned to politics and bigotry.

*Tracy Corley*

All photos by J. Mitchell Brown
People started lining up for the Duke campaign speech three hours before the doors opened.

David Duke, like a true politician, waved at the crowd as anti-Duke slogans were being yelled.

In the heated atmosphere, some humor could still be seen outside Strom Thurmond Institute. David Duke explained his ideas on trade, welfare, and defended his tainted past.
Buddy Guy came to Tillman Auditorium to dazzle all those who went to the concert to hear his legendary blues guitar. Buddy Guy was a powerful musician with years of great performances.

Buddy Guy began his career in the early 1960's. Throughout the 1960's and 1970's, Buddy Guy played backup for many important musicians such as Eric Clapton, Rolling Stones, and Muddy Waters. During these years, Buddy Guy also recorded his unique sound.

After twenty one years, Buddy Guy released a new album in August 1991 which met with rave reviews. Buddy Guy was the winner of three 1990 W.C. Handy Awards.

Buddy Guy filled Tillman Auditorium with an unequaled electricity as he ran up and down the stage, singing and playing his guitar with amazing intensity.

The members of DRIVIN•N•CRYIN joked with one another as they prepared for yet another photo session. Kevin Kinney, the lead singer and guitarist, was reluctant to let his face show and responded humorously to the comments made about his unruly hair. Bassist Tim Nielsen sympathetically shared his hat with Kevin as percussionist Jeff Sullivan removed his sunglasses for the second half of the shoot. Guitarist Buren Fowler, like Jeff and Tim, let Kevin do all the talking. Talking was something that Kevin Kinney did well. Kevin, DRIVIN•N•CRYIN's lyricist as well as front man, showed that his love for words was not wasted. The sarcasm that he used in the studio was much different from the seriousness of the lyrics that DRIVIN•N•CRYIN used on stage during their concerts.

The strong messages Kevin Kinney had written into DRIVIN•N•CRYIN's songs kept the crowd emotionally pumped and on its feet through the entire show. The band filed onto stage after Holly Faith, a fellow Atlanta band which also roused the crowd with an emotion-packed performance. DRIVIN•N•CRYIN introduced most songs and even made a couple of dedications. Kevin's brief narrative about a modern American Indian boy and his father and other such stories emphasized the messages in the songs. One dedication went to Louisiana politician David Duke, relating current issues to the lyrics of the songs. The band's support for Amnesty International, a group supporting individual rights, further showed DRIVIN•N•CRYIN's interest in current world and national topics of importance.

DRIVIN•N•CRYIN stormed into Clemson, leaving the packed auditorium with not only an onstage performance that complemented their performance in the recording studio, but with serious messages that the majority of the crowd captured. For those who understood the objective of DRIVIN•N•CRYIN's music, Kevin Kinney's shut eyes and the energy generated throughout the performance did nothing more than reinforce the seriousness behind the sarcasm. To those who bought tickets to see the band that sang "Fly Me Courageous" and "Build a Fire," their eyes were opened to the meaning of the messages.

On January 13, 1992, Edgar's began opening daily, Monday through Saturday at 4:00 p.m., providing a safe and convenient place for the entire University population to relax and socialize. Edgar's served beer, wine, wine coolers, soft drinks, free popcorn, and occasional appetizers, which could all be paid for with the Tiger Stripe card. The Edgar's management advocated the responsible consumption of alcoholic beverages for customers over 21 at the on campus night club, thereby reducing the need for people to drive to an off campus location.

To make Edgar's more comfortable, booths were added to allow small groups to easily carry on conversations. There was a big screen television and another television in the bar area to allow customers to watch their favorite sporting events. Pool tables, video games, and pinball games, were also added. Edgar's customers could take beverages purchased in the bar into the Games Area next door and enjoy the drinks while using the ten AMF bowling lanes, twelve regulation pool tables, two foosball tables, or any of the twenty-five video and pinball games.

Plans for improvements to make Edgar’s Nightclub more pleasing and appealing were ongoing. Edgar’s had live entertainment every week, usually on Thursday or Friday. Sometimes there was a small cover charge, but often events were free.

- George Smith

All photos by J. Mitchell Brown
Bartenders filled pitchers of beer that many students paid for with their Tiger Stripe cards. Special events such as a visit from Miller's Cold Patrol kept Edgar's busy.

Pool was just one of the many games available to help unwinding students pass the time. People packed Edgar's after class to relax and mingle with their friends.
Holy Hill. That was the affectionate name given to the area of downtown Clemson where many local churches were located. The clustering of the churches afforded for students easy access to a church of their choice. Students made up a very important part in the church community.

A minority of the churches had been standing on Holy Hill for many years. The beautiful architecture and stained glass was testimony for the long history of the churches. The students found that these beautiful structures not only served for worship, but a place to form friendships and relieve the stresses of college life. Many churches kept their chapel areas open for students to have a place to meditate or concentrate on important matters.

Many denominations were represented including Baptist, Methodist, Presbyterian, Catholic, Lutheran, and Episcopalian. Along with the traditional aspects of the churches, many churches had started student centers. These centers were a place for students to relax, have meetings, and have a quite place to study.

The churches in Clemson played an important part in the lives of many students. With the history, architecture, and many programs for students, the churches of Clemson made adjusting to college life away from home a little more bearable.

- Maia Lea Eppes -
A church silhouetted against stained glass on a Sunday Morning.

A typical 11:00 AM Sunday service at First Baptist.
Last year Clemson students and faculty traveled around the world on campus during International Week. This gave Clemson's inhabitants a chance to experience foreign foods and cultures, and allowed the international students to teach Clemson about their countries.

April 1-7 was Clemson's International Week. The dining halls were decorated with flags from Asian, European, African, and American countries. The food service, ARA, served cuisine from the Middle East, Mexico, the Caribbean, the Orient, and Europe. Students had a variety of dishes to sample.

Sunday, April 7, was the International Festival. Clemson's international students set up tables in the Union Plaza outside Johnstone with food samples from their countries. A 50-cent ticket bought a taste of foreign cuisine. Many tables also displayed cultural crafts and artwork. The countries represented included Malaysia, Turkey, Indonesia, Brazil, India, China, Taiwan, the USSR, Italy, and the Philippines.

Several activities happened in the Union Plaza during the afternoon. Women from Taiwan and Korea performed dances in native costumes. A group of children from Central's Providence Christian Academy sang international songs, and many students took part in a parade of fashions to display the costumes of their cultures. Students were able to get an idea about arts in other countries from the Mexican and Oriental music performances and martial arts performances from China and Korea.

Many of the international students themselves enjoyed wandering from table to table "visiting other countries" as much as the American students. When Macherla Vasant Mayur Mehta was asked if he liked the event he stated, "Oh, yes. The students all seemed excited about being able to share their countries with other students and with faculty at Clemson."
The student handbook stated that there shall be no pets, with the exception of fish. Consequently, there were no pets on campus—other than fish. Sure, and nobody broke the visitation rule either.

Generally, cats and dogs were the customary pets. Ask the normal person and he or she would have said, "Sure I have one." But at college (aside from the fact that most pets weren't "normal") cats and dogs were: A) a little too noisy to hide from the R.V. enthusiasts and B) too much trouble to handle in such spacious living quarters. However, there were living creatures that could be quiet (just how loud was your rabbit?) and that required little work (how about that newt?) but could still manage to give us some of the affection and a chance to nurture a creature we left behind at home.

Fish were okay... even allowed within the mandates of the student handbook. But really, a fish could only offer so much affection. Never the less, fish were where it all began.

Fish liked water. They could swim. So could turtles. Turtles were quiet. Turtles were reptiles. So were snakes and iguanas and lizards and, like the Energizer commercial says, and so on, and so on and so on.

The pets found in students possession? Salamanders, newts, lizards, snakes of many kinds, iguanas, hermit crabs, guinea pigs, turtles, rabbits and eel and even a scorpion (although it died, it probably wasn't affectionate enough anyway).

But of course next year, housing will disallow fish. But it is fundamental to bear in mind that naturally, these friendly species were all found at off-campus locations.

(Top) Scott Bridges, a Mechanical Engineering major from Taylors, flirted with his Boa Constrictor Daphne.

A pen was a necessity for Sid, an aggressive 9 foot Burmese Python owned by Marc Taylor, a senior from Denver, North Carolina.
Eddie the dog watched in awe as Chris Bernat, a sophomore majoring in History, taunted Mort and Ed Manigault, a junior from Ohio cradled Sid.

Elwood the Iguana flaunted his stuff for the camera.
Pizza, Pizza, Pizza, it was the main source of energy for college students. And why not, it's quick, reasonably priced with weekly coupons, and it can be delivered. The city of Clemson had approximately six restaurants that mainly served pizza, and more were in the planning. The competition among the pizza dealers was intense. Most of them had weekly coupons that were enticements for the students to eat pizza. If one restaurant did not have the deal you wanted, you simply looked through the coupons of the other places until you found a pizza in your price range.

Why did Clemson have so many pizza places? It's simple, economics! With the campus consisting of about 16,000 hungry students, there were enough appetites to keep all of the restaurants in business.

Most of the pizza parlors were locally owned. Chanelo's, Columbo's and Par Cheezie's were not national chains; yet, they kept in competition with the larger chains such as Pizza Hut and Domino's because they were price cutters. And let's not forget the Itza Pizza operated by the ARA services, they quickly jumped on the bandwagon of home delivery with their pizzas made in the Canteen in Johnstone. Before Pizza Hut started delivery, they were taking a beating from those who did, but last year they were in direct competition with them.

Some people were amazed at the amount of pizza places in the small town of Clemson. One visiting parent commented "It's no wonder my son always calls home for money, he can have pizza delivered at all hours of the night by so many pizza places!"

What did these places do during the summer when the student population was significantly less than in the fall and spring? How did they survive? Well, I guess they were able to get more permanent citizens and the summer school students to buy their pizzas by giving out more coupons. It was the trend, if you had a coupon, you were in business.

So like the old saying goes, "Is this for take out or delivery?"

• Susan Clark •
Making pizza was an artform for some, a chore for others.

Delivery is a must for pizza restaurants around campus.

Wally Dawson

Mmm, mmm... good, pizza straight from the oven.

Even at night Chanelo's close proximity to campus made it ideal for walking to the all you can eat dinner.

James T. Brown
Several opportunities were available at Clemson University to participate in exciting sports or to try something new. The Outdoor Recreation Committee organized activities such as horseback riding, hang gliding, and white water rafting. Clemson also had clubs where students could experience a variety of sports such as scuba diving, rock climbing, hiking, and sky diving.

The average non-skydiver usually could not understand the motivation which caused others to jump out of airplanes. Skydiving could have been dangerous, but for thousands of people across the world, its reward far out weighed its price. Jumpers lived on the edge, and when they did, they experienced life to its fullest.

Skydiving was not unlike other sports, such as rock climbing, that challenged man and pushed him to his limits. Perhaps it was man's quest for freedom that created these urges to challenge and defy the laws of nature. The limitations for the earth bound did not exist in free fall. In free fall, the only things that mattered were the jumper and the sky. Deadlines, bills, urgent matters-little annoyances that crept into everyday life-did not exist in the sky.

Nothing, in all realms of experience, could match the excitement, anticipation, and sheer exaltation of skydiving. For a short time the jumper knew what it really was to fly.

- Paige Howard -
Making decisions was an aspect of college life no student could avoid. And because of these decisions, many campus concerns became an important aspect shaping the lives of all students at Clemson. From the infamous parking problem to the growing awareness of moral issues, the campus was no longer protected from the outside world and the many changes people in all countries were facing.
The smoking of cigarettes inside campus buildings was prohibited, so smokers were often seen lighting up outside.

Relaxing with a cigarette. The times between classes and during lunch breaks were often when most smokers lit up.
There was always a party to be found at Clemson. It may have been Tuesday night in mid-February with a light drizzle, but people would gather. When they gathered, they drank and when they drank they smoked. If so many students smoked at parties and bars, why then did they not stroll around campus sporting a pack of Marlboro Lights and a halo of smoke? Of course some did, but it was not prevalent.

It seemed that for most college students smoking was simply a social act, not a health threatening habit. Though it was not studied, it was apparent that the percentage of habitual smokers on our campus was less than that of the United States' general population.

Was this surprising? After all, were college students not the most intelligent, health conscious beings in the galaxy? Considering that a main diet of pizza and beer was not uncommon...

Maybe something that seemed cool in high school was suddenly viewed as an unattractive money pit. Perhaps tough classes and heartless professors had greatly reduced the amount of free time needed to indulge in such an activity.

Chris Coker, a Senior in Ceramic Engineering said he did not smoke at all because he knew the health related dangers. Nelson Law was a Junior majoring in Civil Engineering. He smoked only socially and believed that tobacco was much worse for you than alcohol. "You're going to die of something," he said, "so why not enjoy life?"

Everyone had at least one bad habit. It was good to know, however, that most college students had one of procrastinating and not of smoking.

Photos by Craig V. Hughes
The Wizard could do more than add and subtract. It contained a disk to store notes, an appointment book, games, and many other computer type programs.

The Hewlett Packard, recommended for engineering students, drew graphs and solved statistical problems.

The different types of calculators needed on campus ranged from simple four function to microcomputer-like calculators.
Standards within the colleges at Clemson have been changing over the years. It used to be that if you could afford it, you could buy the top of the line calculator and have an advantage over those who could not afford them. Eventually, as all things did, that changed.

The College of Engineering recommended that each of the entering freshmen purchase a Hewlett Packard 48SX at an approximate cost of $280 each. Because the College felt that those who had the calculators had an advantage over those who did not, they thought this would even out the curve. This created problems for those who did not know how to use the calculators. It then became recommended that the students take a class on how to use the calculators. There were calculus classes that were calculator enhanced that based the curriculum on learning how to use the calculators.

On the other end of the spectrum, the School of Accountancy no longer permitted the use of any calculator that was not a four function calculator. No programmable calculators were allowed and some professors did not even allow those that performed present value or future value functions. Since most of the upperclassmen already had to purchase a financial or business calculator and a scientific calculator, telling them that they had to purchase yet another one was frustrating.

Calculators had posed a problem for the professors for years. The Hewlett Packard 48SX had a disk drive that enabled them to program entire chapters from the books into them. Too often, the little beeps of calculators were heard when the students were accessing the notes for the test that they were supposed to memorize.

It all came down to the question of whether or not everyone should be at the same disadvantage or advantage. It did not seem fair, however, for only a few to be at an advantage. In the “real world” most of the students would not have to do the calculations by hand, but calculators did not just calculate numbers, they were microcomputers that stored text and various other data.

- Susan Clark -
Photos by Monica Kirkland
Clemson's Housing Department tried something new—a co-ed residence hall. The incoming freshman cancellation rate was lower than in past years and the normal amount of students that decided not to stay on campus decreased tremendously. As a result, the seventh and ninth floors on the "Old A" side of Johnstone were used to house male occupants.

The male students had to start out with three in a room. Trish Wilson, the Resident Director stated that, "I am very proud of them for the way they adjusted. In fact, several of the triples were offered other on campus housing and they didn't want to move. The situation brought about less conflict than we imagined."

Since Johnstone was now a co-ed resident hall, hallway doors were installed to separate the Annex side from the "Old" side. The residents living on the top three floors had to carry two keys: one for the hallway door and one for the room door. Everyone was required to show their student ID with the proper identifying sticker found on the back. Therefore, all visitors, both
male and female, had to be escorted into the residence halls.

The only real problem was that the males' tolerance level for noise was much higher than that of the females' tolerance level, so conflicts tended to rise. But overall, everyone was excited to see Clemson grow and try new things. Co-ed housing was something new found on campus, but the students hoped that it was here to stay.

• Monica Dacus •

Freshman Michael Antonalli found that co-ed life could be fun.

Locked doors were installed on each hall to ensure security.
Long waits for shuttles were often caused by busses following each other too closely.

Not everyone found the white busses with the Clemson orange stripes a useful means of transportation.
Imagine this - you've had a full day of class including chemistry lab and three meetings. You take your car off campus to do laundry and now you're walking up from the pit and are extremely low on oxygen. As the sweat rolls down the back of your neck, a majestic shuttle bus stops at your side and opens the door. You're saved! Hey - it could happen!

Mary Chandler, who started her shuttle bus route in February 1991, said she saw no problems with the system. She said not all students treated the drivers with respect, especially after lunch break when some students had been waiting for thirty minutes for a shuttlebus.

From a student’s point of view, the system was not perfect. Cindy Stamm, a senior in management says, “I think we need a better backup shuttle system, so when the drivers have to depend on shuttlebusses will be on time to class. As a student in the new “off campus” on campus Lightsey Bridge Apartments, I appreciated the service provided by the University.”

The commuters, on the other hand, were not as happy about the operations of the shuttle busses. For the first three weeks of school the schedules of the busses were changed almost daily, as to the routes and pick-up times. There were several times when commuters using the shuttle busses had to wait so long that they were late for classes. The shuttles were usually found in a pack, as many as four busses would drive one right after the other. However, the busses did provide a means for getting to and from the pit behind the stadium, when a student had time to wait.

The shuttle busses were there to benefit all students and as with all growing enterprises, the system still had a few bugs to work out.

• Susan Hegler •
Photos by Craig V. Hughes

These commuters enjoyed the comfortable ride from the stadium to other spots around campus.
Much to the students’ dismay, another increase was levied against Clemson tuition last year. Clemson suffered a drastic cut in state funding last year. State appropriations were reduced at least $7.1 million in education and general funds. A reduction of $2 million in public service activity funds was also enacted. This $10.3 million reduction absorbed increases in fringe benefits and salaries.

According to Max Lennon, "Clemson’s philosophy is to protect teaching and research programs as much as possible." Cuts were imposed mainly on administration, equipment, maintenance, travel, and vacant positions.

The tuition and fees increased 6.5%. Despite the reduction in state funding, other sources of funding remained constant. Private giving reached $21.8 million. Donations equaled $16.1 million for academic programs. IPTAY contributions totaled $5.7 million for the athletic scholarship organization. The campaign for Clemson Loyalty Fund for academic programs, facilities, and endowments reached $62 million.

Nevertheless, Clemson still operated nearly $30 million in the red. President Lennon said, "We are operating $26.4 percent below our average; although, we are on par with the average of all universities."

Lennon thought Clemson was "not out of the woods yet". Unless something gave, such as state taxes increasing or Clemson cutting out programs, the students could anticipate more crowded classrooms and less class choices.
Due to the lack of funds in some departments, many students had to purchase syllabi and class notes from copy shops.

Large classes, such as the Marketing 301 class, were often the results of the budget cuts that plagued the campus.
Narrow walkways made Clemson feel even more "cramped". Where students once played basketball, bulldozers began ripping up the concrete.

Piles of dirt accumulated around Johnstone causing people to find new ways around campus.

The one way road near Brackett cut the campus in half making driving around Clemson hectic. Narrow walkways made Clemson feel even more "cramped".
Billows of concrete dust filtered through the air around west campus. Slowly, familiar buildings such as Johnstone turned into rubble while Brackett received a needed face-lift. As rubble piled up behind the chain linked fences around Johnstone and Brackett, another phenomenon was coinciding with the demolition.

When the plans for the demolition of Johnstone and the renovation of Brackett were explained to the Clemson University community, everyone was lead to believe that any inconveniences would be minimal. As time went on, it became evident that the construction was down played by the administration. First was the inconvenience to commuters and other students who drove on campus.

The construction lead to the removal of many timed parking spaces around Johnstone and employee spaces around Brackett. Due to the loss of these spaces, many commuters found it hard to find a close place to park when they needed to run errands on campus or go to the library. Residents also found the removal of these spaces to be inconvenient. Moving in and out of the dorm rooms became more complicated. Also, the one way streets made travel from one side of campus to the other even slower.

Another inconvenience was to the students both in and out of class. Because of the fences, students had to take longer paths to Fike and the outlying buildings. And for the students who lived in the Annex, a trip to the laundry became an ever changing adventure. Students also had to take classes inside of Brackett—not the best place to learn.

Even though the construction on west campus caused many inconveniences, people agreed it was time that Clemson got a new look.

All photos by James T. Brown
As this little girl’s shirt points out, the abortion issue affects the future of everyone.

Dr. Clifton Flynn voices his opinion as Dr. Joy Angela looks on.
A spirited two-hour debate on the issue of abortion was held in Tillman Auditorium. The debate, moderated by Dr. David Woodard, professor of Political Science at Clemson, featured presentations by Dr. Joy Angela and Dr. Clifton Flynn. Angela was a practicing family physician in Greenville and was spokesperson for South Carolina Citizens for Life. Flynn was a professor of Sociology at USC-Spartanburg and was a spokesperson for South Carolina Coalition for Choice.

Angela was given the opportunity at the podium first and opened her presentation with the question "Is the fetus a human life?" She went on to ask, "if the fetus is a human life, why is the child protected outside the womb but not inside it?" She advocated the belief that a fetus is a living person who should be afforded human civil rights.

It was then Flynn's turn to speak. He stated that the abortion issue was not about morality, "it's about government power, about who makes decisions, individual rights and personal privacy."

As the debate continued, the two principle speakers were then questioned by a six member panel. The issues involved were those of exceptions to the rule, women's rights to their own bodies and 3rd trimester abortions.

Abortion was a topic that concerned the students of Clemson. It is us as well as our children that will have to live with the decisions that legislature makes about our lives.

* Cameron Boland

All photos by Craig V. Hughes

While some were fighting for their rights, others were fighting for the right of the unborn child.
A new direction was taken in learning at Clemson. Teachers and students began to see the need for improved education in order to keep up with the new global competition. Students began to see the need to increase their knowledge of the world so they could compete in an increasingly open market system. Professors and teachers began to see the need to help students gain required skills for a bright future.
Dr. Richardson was an assistant professor in the Department of Dairy Science in the College of Agriculture. The courses that she taught included: Introduction to Animal Industries, Mammalian Reproduction and Physiology of Lactation. Dr. Richardson was also a member of a team that taught a graduate course Technics in Electronmicroscopy of Biological Specimens. She most recently was involved in embryo culture and embryo recovery research.

Dr. Richardson graduated from Belton High School in Belton, S.C. She received a B.S. in biology from Memphis State and had planned to attend optometry school. However plans changed when she moved to Seneca and got a research position at Clemson in 1972. While working for the university, she completed a M.S. and Ph.D. in Dairy Science.

On campus Dr. Richardson was an advisor for the Dairy Science Club and was a faculty advisor for the University Union. In the past she has been the advisor for Ag Council. She stated that one of the best things to happen to her during her career at Clemson was being nominated by Ag Council for the Honor Roll of Professors.

Off campus, Dr. Richardson enjoyed a game of golf, fishing, pleasure reading, walking or jogging to relax after a long day. Most of all Dr. Richardson said she enjoyed spending time with her students.

• Kathryn Ashe •
All Photos By J. Mitchell Brown

Helping students was the first priority on Dr. Richardson's mind.

In the dairy industry, computers became an important tool in proper management.
Dr. Rice reinforced the fundamentals to this architecture student.
Matthew Rice, who taught for a year in Italy in the College of Architecture's Genoa program, was a professor in the fifth year of design. He was educated at Clemson at both the undergraduate and graduate levels. After completing his undergraduate studies, he took off to bicycle around Europe alone to see some things. Upon returning, he moved to Baltimore to work in a real city for a change. During this time, he married and had a child. He then decided to return to Clemson for his master's degree and was offered a teaching position which he swore was only for a year. As he says, "I always feel I'm working one year at a time. Always like I am right now – about ready to go out the door."

How successful do you think you are as a teacher and are you giving something that you did not get in school? "That's one thing that keeps me in teaching. It's like every father wants to give to his children the things he never had – be it understandings or physical things."

He laughingly stated that he was his own worst critic which is part of being an architect – this thing of perfection and high achievements. Always pushing for excellence, he tried to develop students on a very broad level.

When asked what kinds of things he did to encourage outside of just studio experience, he answered, "Recently, I'm trying to mature the student's views of who they are and why they're here. If all we do is make fanatical architects out of them we've done one thing well. But in a way that sets up the kind of student who would find it very difficult to deal with architecture as it is out there. The school's first responsibility is to help the student realize who he or she is and come to grips with that."

"The types of people who go into architecture are idealistic or romantic, maybe even FOOLS. They always feel this certain sense of morals. Like you can make the world a better place if you're an Architect."

When asked why students remember him, he answered, "I know I frustrate them. After a little while they realize I do it out of care and not just trying to screw their head up. I try to frustrate an accepted understanding so they will ask questions. Most students realize I really do care and can respect them and still push them like crazy. The only way I can go into a class is full speed ahead."

"Ultimately, teachers have to train students not for what architecture is now but must give them a good sense of self and the broad themes about architecture. To meet changes in the profession, one must be able to move to allied fields."

As a former student of Professor Rice, I found most of what he said to actually appear in his teaching style. He cared that the students grasped some basic principles about architecture and life as well as discovering some part of one's self. Yes, he did frustrate us, but if one is not frustrated he is not trying hard enough. If the student is not questioning his every move and striving to improve himself and his design then he is not learning.

Of all of the teachers I had ever met, there was no one quite like Jean B. Price. She was an Assistant Professor of Accounting from Louisville, Kentucky. Although she did not think anyone should write a story about her, some of her students would tell you that her style deserved to be merited.

Ms. Price's main goal was to help her students in and out of the classroom. In fact, she said that it was only by accident that she started teaching, but it was the idea that she wanted to make a difference in her students lives that kept her teaching. She often told her students that they could come talk to her about anything regardless of whether it had to do with school or not. Her greatest moments in teaching were when she realized that her students had learned something for the first time; when students did well on tests; and when they talked to her about personal and career choices.

I asked Ms. Price what type of advice she had given a student about school and a career. She replied that she told them to get a degree of some kind regardless of whether they knew what they wanted to do or not, because once you quit it is hard to come back to school. She also told them to close their eyes and think about what they would really like to do, what kind of clothes they would like to wear to work, and what kind of environment they wanted to work in. After they had decided the answer to those questions they should look for a job with those qualifications. Her philosophy was that everyone has a place in this world and they have to find that place for themselves.

How did a professor with all of these qualities end up at Clemson? Well, Ms. Price said that after working on her doctoral degree at Indiana University, she was ready to move to the south where it was warmer. Clemson fit the bill, it was in the south, near the lake and mountains, and it had that small town charm that is great for raising a family. She also added that it was the friendliness of the staff at Clemson and the fact that it was not a "cut-throat" organization that helped her make her decision.

One last thing that separates Ms. Price from the other professors I know is her love for the outdoors. As most of her students would tell you, her main hobby was raising pygmy goats. She spent most of her spare time with her animals and of course going fishing.

Having been one of Ms. Price's students, I could tell you that she was truly different from the rest of the professors that I had ever had. She cared more about the students than just teaching a class and getting it over with. She was one of the only professors in my college career that seemed to want to make a difference and make a difference she did!

Ms. Price took time from her pygmy goat farm to reflect on some of her classroom experiences.

Raising pygmy goats was one of Ms. Price's favorite hobbies away from school.
Ms. Price's unique teaching style, which taught students about life inside and outside the classroom, made her one of the popular accounting teachers.
Kaminski was always available to give help to all of her students.
Mrs. Rebecca Kaminski was a part of education for sixteen years. From teaching public education for twelve years to teaching future teachers for four years, Mrs. Kaminski had always been very dedicated to education. Although education as a whole was important to Mrs. Kaminski, she only taught language arts and reading for the College of Education.

Mrs. Kaminski was not only concerned with the education of children, but also with the education of future teachers. Mrs. Kaminski wanted to make sure her students were able to teach effectively. A unique aspect of Mrs. Kaminski was that she stayed involved with the elementary classroom. Volunteering in Greenville County during the week to read to students and talk about what they had read, Mrs. Kaminski was able to see if what she was teaching to future teachers was helpful and practical to the elementary classroom. She wanted to stay involved in the elementary classroom to relate theories to practice.

Even though Mrs. Kaminski was a busy lady, she was always willing to help students whenever they needed help. Whether it be a student presently enrolled in one of her classes or a student from previous years, her door was always open. If you were sitting in her office, the phone may have rung three times, or two people may have walked in searching for help, but she did not forget that you were there. People always had good things to say about Mrs. Kaminski, and one thing that was often heard was that “she is the best professor I’ve ever had!”

If you had a chance to meet Mrs. Kaminski, you would have seen beams of love for education. Being highly respected among her colleagues and students, Mrs. Kaminski was an incredible lady. Everyone could have learned a lesson or two from her on loyalty, dedication, caring, and making a difference. She touched the lives of young and old, either from being active in the elementary schools or being a professor at Clemson. Mrs. Kaminski was a great asset to her students and to the College of Education.

*All photos by Mandi Burdette*
What was the one thing that always made a class better than all the rest? The teacher, what else? But just what made that one teacher so special? The teacher loved to teach. That was exactly why so many students enjoyed their engineering courses taught by Dr. James L. Josey. Dr. Josey enjoyed teaching students even more than the students loved taking Dr. Josey's classes.

Dr. Josey did not always teach. He spent ten years working as a consultant with a private firm in Jackson, Mississippi after receiving his Master's degree from Louisiana State University. In 1971, with his third child due in less than two months, Dr. Josey decided to go back to school to get his doctorate in Civil Engineering from Mississippi State. Dr. Josey taught night school at Mississippi State University while working and he knew he would be much happier teaching. Dr. Josey also said that, “I have never had a class where I did not feel that someone in it had the potential to be smarter than I was, but I also expect them to realize that I have been around a lot longer and there is still a lot I can teach them.”

Teachers could not stand just going to school anymore than anyone else, though. That was why Dr. Josey took time out every so often to go to home football and basketball games, especially basketball. He also enjoyed doing auto repairs and refinishing furniture during his spare time. His favorite activity had to be reading books with a historical twist with his new wife, He and the new Mrs. Josey were married last year.

When asked what the best thing a student could do to help themselves, Dr. Josey quickly replied, “If you only study, then you are not ready for the outside world. You must have some outside interests to learn how the real world works.” Dr. Josey claimed to have learned things the hard way. Coming from a high school graduating class of only 21 members and having no exposure to trigonometry or physics in high school, Dr. Josey spent all his time studying so that he could graduate in the average four years. This seemed to be paying off until he found that he would not be in Who's Who Among American College Students because he did not have any extracurricular activities. That was why he encouraged students to get involved in all they could while not compromising their grades.

Meanwhile, students could always look forward to a class that they would never leave without feeling that they had just been treated to an experience the students would not soon forget. Whether Dr. Josey was giving a lecture on how to go about choosing a specific field of engineering to pursue, or the best way to get the job that everyone wants, or even if Dr. Josey was just having a guest lecturer from a private industry speak, he never let a student leave a class without taking some part of his enjoyment with them.

Dr. Josey spent time in his office grading quizzes, a necessary tool in education. Not all of the professors drove ten year old Buicks. Dr. Josey cruised around Clemson in his new Z.
Cell Wall Components
Dr. Wooten was one of those few professors who came to Clemson with the intention of concentrating on teaching, not research. Because of his dedication to teaching, Dr. Wooten received a teaching award from Gamma Sigma Delta, an honorary organization in agriculture. Homecoming was one of Dr. Wooten's favorite times on the campus because it allowed him to see his former students and find out what they were doing after graduation.

Dr. Wooten was an Alumni Professor of Forestry. Clemson University had been his home for 23 years. Dr. Wooten arrived at Clemson after a very impressive early career. He did not go directly into college after high school. The military was his first stopping point. After leaving the military, Dr. Wooten decided to major in forestry. Before coming to Clemson University, Dr. Wooten found a research position. Part of the job required that Dr. Wooten teach a class. To his amazement, Dr. Wooten enjoyed this aspect of his job. After 23 years at Clemson, Dr. Wooten was very happy and had no desire to enter into administration in the College of Forestry. Dr. Wooten preferred to have a piece of chalk in one hand and a class roll in the other.

Dr. Wooten was very eager to change the image of forestry. He believed many people had a doomsday opinion of forestry. "Forestry is more than just cutting down trees. It is also management of land, developing new products, protection of water, and recreation." Dr. Wooten explained that there was a big difference between stripping the land and clear cutting forest. When done properly, controlled forestry lead to a better habitat for wildlife. Clear cutting, as defined by United States foresters, was the process of removing old trees and replacing them with new trees. The process lead to a new undergrowth. Dr. Wooten said that the stripping of rain forest was not clear cutting but raping the land. He hoped to show, through his teaching, the very positive aspects to forestry.

Away from the daily grind of work, Dr. Wooten spent his days building a barn for a recreation area for his family. Dr. Wooten married when he was 39 and had three children. His children kept him busy at home.

Dr. Wooten was a professor who strongly believed in his position at Clemson University. By working with the students, Dr. Wooten found a way to help future foresters excel and reach their full potential.

Dr. William Maker grabbed his cup of coffee as he sat. He questioned me, amazed that someone wanted to interview him. It was not surprising that he was chosen to be the subject for the College of Liberal Arts feature; the ease with which he spoke and his love for challenges made him an enthralling person as well as a good teacher. Dr. Maker received his B.A. in philosophy from the University of Massachusetts at Amherst and his masters and doctorate degrees in philosophy from the New School for Social Research in New York. He decided to study philosophy because it was not only fun and enjoyable but difficult as well. The only thing more difficult than philosophy, he said, was playing the bagpipes. He had been playing with the Piedmont Highlander Pipe Band for eight years.

Dr. Maker was also a biker. When asked what it meant to be a biker, he humorously replied, "Sex, drugs, and rock and roll!" Seriously, being the member of a biking organization enabled him to meet people with similar interests and to talk. His organization not only met once a month to ride and talk; it was also a political organization targeting civil and personal rights which involved itself in many charities. He and other bikers have made bike runs, with the aid of the Greenville Women's Shelter, collecting items to help abused and homeless children.

As a teacher, his biggest difficulty was getting his students to understand philosophy. Dr. Maker's objective was not to stress one particular philosophy, but to teach his students the art of understanding philosophical arguments. He also taught his students how to question doctrines to establish their own beliefs and thought processes. "A part of education is to learn to think," he said. Because no absolute truths were given and his students were asked to think on their own, teaching philosophy became very difficult. He had always tried to dissuade the intimidation that studying philosophy brought to his students.

When asked why he decided to teach college, Dr. Maker replied that he enjoyed college. "Why leave it after four years if you can do it for the rest of your life?" he replied. The only drawback, he felt, was grading papers. Though challenging as grading papers and philosophy itself may have been, Dr. William Maker had always known that it is great to be doing something that you like to do. Difficult or not, philosophy had been a part of his life and he had done a terrific job of making it a part of the lives of the students he taught.

Although most teachers's offices were dull and drab, Dr. Maker's office was full of life and character.
Once and a while a person came around that seemed to find the best out of life no matter where he or she may be. And in the College of Nursing one such person brought life into every class she taught. Dr. Longcrier was a lady with a million ways of spelling ‘life’.

One of the most fascinating aspects of Dr. Longcrier’s life was her backpacking adventure across the world in 1978. Dr. Longcrier went through Europe, Africa and Australia just to name a few of the places she visited. Dr. Longcrier and her group made it across the world by working for food when needed. Two very exciting events happened to Dr. Longcrier when she was in Israel and then in Africa. While in Israel, her group camped on one of the beaches. A group of soldiers with automatic weapons approached them. Luckily, the soldiers were just looking for people illegally coming up onto the beach. In Africa, Dr. Longcrier and her group got caught in a fire accidentally set by their guide. Out of nowhere local villagers came and beat out the fire then quickly retreated back into the shadows.

And when a student stepped into Dr. Longcrier’s classroom, the adventure continued. Dr. Longcrier’s first love was teaching. She loved to see when her knowledge helped “turn the light on” in a student. Dr. Longcrier specialized in computer applications as they related to the health profession. Helping students become comfortable with computers was of upmost importance to Dr. Longcrier in her teaching. And at the same time, she tries not to be threatening.

In Dr. Longcrier’s free time, two passions take up her time. One of these passions was her dog, Brutus, and the other was helping out with women’s athletics. Brutus was a massive Rottweiler which was given to her as a present. When she went home, Brutus was the first one to greet her and demand attention. Athletics came next. Earlier in her life, Dr. Longcrier was a runner and basketball player. At Clemson, Dr. Longcrier helped the women’s basketball team.

Dr. Longcrier believed she would stay at Clemson for some time to come. Although Dr. Longcrier had moved from occupation to occupation because her interest would broaden, she believed computer applications was her thing.

Dr. Longcrier was a fascinating woman. Not only did she believe that students should grab every opportunity available, Dr. Longcrier also believed one should not limit their career choices. Dr. Longcrier was definitely a professor who brought excellence to Clemson University’s undergraduate program and the Clemson community.
Very few people knew what they wanted to do in life, and even fewer knew at an early age. But Dr. Montanucci knew that he wanted to study reptiles by high school.

Dr. Montanucci was probably best known for his wide assortment of lizards which he kept in his office. Row after row of aquariums, with lights illuminating the microenvironments, sat on every available space of countertop. Little creatures could be seen scampering around in their protected homes. Dr. Montanucci took pride in the fact that he had the only colony of a species of horned lizard in the nation. But Dr. Montanucci did not always study these misunderstood animals.

Dr. Montanucci received a B.S. degree in Entomology from the University of California at Davis. He then went on and received a M.S. degree in Zoology from the University of Kansas and also a Ph.D. in Biology from the same school. Dr. Montanucci believed that entomology helped him to understand the habitats that the lizards originally came from which also helped him become very successful at raising reptiles.

At home, Dr. Montanucci had a wife and two children. Dr. Montanucci believed that today's children watched too much television and therefore were losing the ability to have large vocabularies and to think intelligently. Dr. Montanucci's family therefore did not watch much television but instead found reading books and other activities a much more pleasurable way to spend a lazy afternoon or a quiet night at home.

So Dr. Montanucci played with reptiles all day. This was not totally true. Dr. Montanucci's other hobby was raising different types of cacti. With a little greenhouse set up behind his house, Dr. Montanucci carefully tended to the plants. He proved to be a very diverse man.

Dr. Montanucci was one of those professors that always had something interesting lurking in the shadows of his office. His knowledge of the material in the classroom helped the students understand and trust what he was presenting in each lecture.

There were few teachers at Clemson that made the students absolutely fascinated about a subject. Dr. Montanucci was one of those few.
Dr. Montanucci showed concern for all his students when it came to their academics at Clemson.
The automobile world had their gas mileage revolutionized by two members of the Clemson family. Dr. Alvon C. Elrod and Michael T. Nelson had received a patent on an electronic camshaft that improved gas mileage on a vehicle by 20 percent. The “big three” automakers as well as the Japanese were looking at the invention to incorporate in their cars. Dr. Elrod, who retired in 1988, believed that it would be in production for the 1995 models.

The invention changed the valve timing in the car by the use of a variable camshaft which is manipulated by the use of a controller. Normally in a car there is an overlap in the opening of the intake valve (where the gas goes in the combustion chamber) and the exhaust valve. The variable camshaft leaves the valve open longer to give a bigger overlap. The theory behind this is that in the car of today the valve timing (how long the valves are open) is set to an average position so the engine runs well at both high speed and at low speed. The variable camshaft is able to vary the valve timing so their is a longer opening in the valve at low speed idle and a shorter valve opening at high idle. This improves the engine’s efficiency at both high and low speeds and gives the better gas mileage. An added side benefit to the camshaft is lower exhaust emissions because their is less gas used but also it is believed that the exhaust that will still be emitted will be less harmful to the atmosphere.

The biggest benefits of this invention could come to the students of Clemson though. The patent to the invention is owned by the University. It is believed that it could bring in a million dollars a year to the university when it goes into production which in the days of budget cutbacks could help the University.

* Vern Verna *

All Photos By Vern Verna
After each engine test, the camshaft was examined for wear and tear.

The newly designed camshaft will increase a car’s gas mileage by a projected 20%.

Dr. Elrod and Mr. Nelson tested the gas mileage for an engine.
Summer School

Summer school—small classes, sunbathing, and GREAT parking! These were just a few reasons why Clemson University students decided to stay the summer. Why go home when Lake Hartwell was just a hop-skip away?

But summer school for many students was a lot more than just a good time. Graduating earlier was one reason students decided to stay on the campus. Another was for the more personal attention received in class that was not possible during fall and spring semesters, especially in required courses.

Since tuition for summer school increased last year, many students may have found it harder and harder to stay at Clemson. But the benefits often outweigh many problems.

One inconvenience that many students encountered on the campus last summer was the construction. With Johnstone cloaked in a plastic shield, and sinks littering the ground like porcelain statues, many students found they could no longer take short cuts through the campus. But it was interesting to watch the workers shuffle around in their gear, ripping away at a Clemson landmark.

For many students looking for a great time and a way to get rid of hard subjects for an easier time in the fall, or those who just wanted to get ahead, Clemson University in the summer proved to be a roaring good time!

But summer school only lasted for a short time. The days began to get shorter again, and Mead notebook ads started littering the television screen. It was time to pack up the books, and have that last party before the long lines of registration and frustration crowded the halls.

Looking Towards The Future

Many seniors found themselves looking into the future wondering what they would do after they received their degrees from Clemson University. For some, graduate school was in their future, but for others, the hunt for a job began.

Clemson University Placement Center was the first step that many students took. By registering with the center, the future graduate could begin the job hunt while still in school.

Going through the recruitment process added more stress to the already stressful life of a senior. The Placement Center had introduction sessions that were required for anyone planning to interview through the center. After registering with the center, the future graduates had to check the boards at the Placement Center frequently to find out which companies were coming to campus and when resumes were needed. The senior then hoped the company selected them to interview. If chosen, the student had to arrange a time to be interviewed.

The tension that plagued the interviewees waiting to be interviewed was noticeable when you walked down the hallways of the Student Union. Usually dressed in the traditional "IBM blue" suits, the future graduate had to rehearse planned answers to the common questions asked by interviewers. Your greatest assets? Geographic locations preferred? Your group project work? Even though the answers were rehearsed to sound perfect, the words that came out of the interviewee's mouth were usually anything but perfect. The wait for the letter that a second interview would be needed was sometimes worse than the initial interview.

Job recruitment was a large part of many of the seniors' lives. Where would they end up? Would they find a job? Although there were many pressures involved, relief could be found in the simple words, "We want to hire you!"

* Susan Clark *

Photos by Monica L. Kirkland
The Career Center at Clemson was the starting point for people eager to find a job. Posters helped advertise this service of Clemson University.

Waiting for your turn to be interviewed was a very stressful event for many.

By studying about companies before an interview, seniors improved their chance of getting a second interview.
Moonlighting Teachers

At five-thirty each morning, Professor Deborah Payne fed fourteen horses, four dogs, six cats, and a brown thrasher. At seven o’clock, she was in her Clemson University office, preparing notes for her eight o’clock economics class. When not teaching, she was either working towards getting her Ph.D. in applied economics, teaching Sunday school, giving horseback riding lessons, feeding and caring for animals, or keeping the books for her and her husband’s horse farm located twenty minutes from the university.

Don Collins, professor of architectural studies, was a full time fire fighter. When Dr. Collins was not teaching, designing, or helping to develop Clemson’s landscape architecture department, he was working at the Clemson University Fire Department. With a small walkie-talkie attached to his belt, Dr. Collins was always prepared to answer any important calls.

Both Dr. Payne and Dr. Collins were totally dedicated to teaching in spite of the long hours. Professor Payne’s passion for teaching had her always helping students. In the classroom and in the horse ring, Dr. Payne taught each student with enthusiasm. Though satisfied with teaching, Professor Collins thought many times throughout undergraduate school about dropping out of school to become a full time fire fighter. With a master’s degree in landscape architecture from Harvard University, Dr. Collins taught students to use what they had learned in order to design and teach themselves.

Motivation was no problem for the professors. Professor Payne had her husband to keep her motivated. Professor Collins love for helping others kept him happily busy. Both Dr. Payne and Dr. Collins enjoyed seeing their students excel in academics. Professor Payne and Professor Collins proved that no job was too big for one person to handle and that Clemson teachers do have a life outside the classroom.

• Tracy Corley •
Grooming and proper application of tack are an essential part of horse care.

Dr. Collins demonstrated how he prepares to go out for an emergency call.

Being a bartender allowed Dr. Ken Reives-Wagner to know some of his students a little better.

Demonstrating riding techniques was one of the aspects of the jobs Professor Payne held.

Dr. Collins was on call twenty-four hours for the Clemson fire department.
He's tough, opinionated, and a "snappy" dresser say his students. They also say he's a master teacher.

J. David Woodard, an associate professor of political science, is 1991's recipient of the Alumni Master Teacher award.

A Master Teacher is selected each year by the Student Alumni Council from nominations submitted by students at large. The honor includes a $1,500 award made possible by gifts to the general Clemson Loyalty Fund.

Boyd Summers '91 of Columbia describes Woodard as "a motivator and an excellent lecturer, whose classes you just don't want to miss." Those classes include public administration, political philosophy, American politics and the mass media.

Woodard began his teaching career in Texas public schools before becoming a professor at Auburn University and eventually Clemson. He gained practical experience in the workings of government as Comptroller of the Treasury of Tennessee and as City Manager of Brentwood, Tenn. "Real-world experience," Woodard calls those days. "I came back with the resolution that teaching was my calling. And if I were going to teach, I would always be prepared for my students - and for myself."

Mike Simmons '86 calls Woodard "the most influential college teacher I had" influence that reached beyond the classroom all the way into a Florence clothing store. Simmons, then a junior, was sitting out a semester to work while deciding if he really wanted to finish college.

"I got a letter from Dr. Woodard, whom I'd then had for one class," Simmons recalls. "In that letter he said I was gaining 'real-world' experience, which was important, but that I needed to finish my academic education. Because of his concern, along with my parents, I was back at Clemson the next semester."

"And," Simmons adds, "I signed up for as many of his classes as I could."

Wide World of Sports

Sports

With the introduction of the World League and Clemson playing football in Japan, sports that were "American" now entered a new age of global sports. Clemson's sports program continued to grow in size and strength. With the addition of Vickery Hall, the Academic Learning Center, sports became a well rounded and vital element in Clemson's quest to lead universities into the next century.
The outlook was promising but cautious at the beginning of the season. A young pitching staff was questioned on how they would perform. The defense for the most part was returning. But without the move of senior Jimmy Crowley from third base to second base and the addition of new third baseman sophomore Jeff Miller, the infield may not have been solid enough in the early going for the young pitchers. Just when people thought it would be a rebuilding year due to graduation and the draft, Coach Wilhelm guided the Tigers to another successful season ending in a College World Series appearance and final ranking of number four in the nation.

Into every successful team goes planning and goals and the Clemson baseball team was no different. During the fall, Coach Wilhelm took senior Jimmy Crowley aside and told him what he would like the team and him to accomplish the same thing as last year. Jimmy was having a good year at third base. What Coach Wilhelm wanted for Jimmy's senior season was for Jimmy to be a team leader and he wanted him to move to the new position of second base to give the team a solid nucleus up the middle. Jimmy agreed and went out and hit .383 for the season which included 17 homers and knocking in 77 runs. Jimmy was the catalyst for the season and was first team All American.

A successful team is made up of talented players and Crowley was not the only star on the team. Joining him on what became known as Clemson's Murderer's Row were Eric Macrina (.335 BA, 24 HR, 84 RBI) and Joe DeBerry.
Macrina and DeBerry alternated at first base and designated hitter in what followers thought was Coach Wilhelm's brilliant alternating plan. Wilhelm's plan was that DeBerry played one position one day and Macrina played the same position at the next game. Senior Todd Stefan was returning at short stop which made an excellent double play combination with Crowley. Rounding out the infield was sophomore Jeff Miller who was the only new starter in the infield. He played excellently and was named to the NCAA Northeast Regional All-Tournament team.

The outfield had two returning veterans in Kevin Northrup and Michael Spiers. Northrup was a .350 hitter who played and hit consistently all year. He made only one error all year in centerfield and was named to the All-ACC team and the All-Northeast Regional team. Michael Spiers was the man in the clutch in the ACC Tournament. He took home the awards for Tournament MVP, Tournament Batting Award and All-ACC. Michael's most dramatic moment of the year was in game three of the ACC tournament. The team was down 5-2 during play with Georgia Tech. With two men on, two outs, and two strikes, Michael ripped into a pitch and sent it down the left field line. From the instant the ball hit the bat, everyone knew it was out of the park. The only question was if it was foul or fair. With Spiers standing at the plate wishing it fair, the umpire called it fair and the stadium erupted into pandemonium as the game was tied 5-5. The Tigers soon went on to win the game.

The team ended the season with a 60-10, the best percentage in baseball, and won the regular ACC season title. The Tigers went on to the ACC tournament and ended with a perfect record in the tournament. After being seeded as the number one seed in the Northeast regional, the baseball team won four straight games to advance to the College World Series. The Tigers were eliminated in the World Series but still finished with a number four ranking in the nation.

60-10 OVERALL RECORD FOR 1991
To the "Ordinary Average Guy" (oops, I mean person), tennis is either a pleasant afternoon's excursion and opportunity to plummet your opponents ego into the ground or a far-away sport played by frankensteinesque stoics interrupted only by the antics of a dirty-bearded, rad, rebel juvenile or a humorously obnoxious person who never grew-up. Tennis was also something else. It was a varsity sport at Clemson that was just as nationally respected and drama-filled as it's overpow­ering brother who resides in Death Valley.

The Lady Tigers started the season by winning on January 18, beating UNC-Charlotte 9-0. But that was going to be all as the Lady Tigers went on the road and lost five straight. But then the Lady Tigers came home to thrash Georgia Tech 8-1. By ACC tournament time, the Lady Tigers had a 13-10 record (6-1 ACC), and 2nd seed in the ACC tourney. The Clemson ladies pounded NC State 7-0 in the first round, escaped UNC 5-4 in the second to face #7 Duke in the finals. Duke won — the game and the tournament. By the end, the Lady Tigers had stroked their way to a 15-11 record (6-1 ACC), a #22 national ranking, and a 2nd place ACC finish.

The men's team seemed to have the ACC wrapped up. In the pre-season, the men's team was ranked 16th in the nation and had an impressive roster, returning two seniors and junior Greg Seilkop, a 1990 All-ACC. Early losses to #9 Arizona State, #12 Miami, and #14 Kentucky hurt the Tigers as they compiled a 3-4 record going into ACC play. But they bounced back and defeated Wake Forest and NC State for a 2-0 ACC start and a #24 national ranking. Although the games that followed seemed like a roller coaster with loses and wins, the men's team still boasted a 47-game home ACC winning streak (stretching back to 1978) to put on the line against UNC 3 days later. The Tar Heels broke it in a tight contest and dropped the Tigers to 3-1 in the ACC. Clemson bounced back, and served up an impressive ACC winning streak to finish 6-1 in conference play and 2nd seed in the ACC tourney.

Tennis was an individual sport like wrestling, swimming, and track. The drama was acted out between the individual players, with the number of matches won adding to the teams total. Clemson had talent; Mimi Burgos was ranked #37 and Mindy Weiner #58 in the national singles poll. Mimi Burgos and Diana Van Gulick finished with a #32 national doubles ranking. For the men, Greg Seilkop finished with a #73 national singles ranking. Clemson had depth; George Lampert, Chris Munnerlyn, and Greg Seilkop were named All-ACC, while Mimi Burgos, Amy Young, and Mindy Weiner received the same honors for the ladies. The team was young this year, and learned from their challenges. A Top 25 national ranking and 2nd place conference finish represent a successful year for the Tigers.

5th in ACC and 13th in nation
Golf has been growing in popularity for many years. New golf courses pop up across the nation as Americans find out about the pleasures of golfing. More people attend the PGA tours. All these factors have led to more people watching Clemson golf very closely. And the Clemson golfers haven’t been blind to this trend. In fact, the Clemson golfers gave another outstanding performance last year.

After losing two of best golfers in University history to graduation (Chris Patton and Oswald Drawdy), many people thought that last year would have been a rebuilding year. Once again though, the Tiger Golfers played their way into their tenth straight NCAA tournament, an accomplishment that only four other universities can boast about. Nationally, the Tiger golf team finished thirteenth.

The team was led by third-team All-American Nicky Goetze and first-team All-ACC Bo Beard. Goetze’s year was highlighted by his seven-under par 209 at the Golfweek Preview earning him a first place individual title. Nicky also helped lead his team to a first place in the tourney that featured competition from twelve top-20 teams. Sophomore Bobby Doolittle won his first tournament at the Iron Duke Classic and was the hottest golfer on the team entering the ACC Tournament. On the final day of the NCAA Tourney, freshman Mark Swygert shot a one-under par to lead the team to their number 13 ranking.

Two tournament championships were a few of the highlights of a season in which the team finished in the top four or better in eight out of eleven events. The Tigers faithfully continued their tradition of excellence. For the fifth straight year they finished in the top 20 in the nation.

Clemson can only wait to see what lies in the future for the Clemson golf team. Clemson golf may become the next great sensation in the Southeast. In fact, students may one day know the difference between a Birdie and an Eagle as well as the difference between a touchdown and field goal.

Vern Verna
All Photos By Vern Verna
1991. Next year it'll be "Great to Hate Florida State" on the way to even more ACC championships, but for now we have the conference all to ourselves. There was pre-season hype galore as the Tigers returned quarterback DeChane Cameron, All-ACC tailback Ronald Williams and... The Nation's Number 1 Defense!! The only problem was that 1990's offensive hero, Chris Gardocki, decided to go pro a year early. No problem, because...

The Tigers always open the season by stomping a team that can not possibly compete with them. This year it was Appalachian State and Temple. In their first two games the Tiger's racked up phenomenal offensive statistics that didn't really mean anything on Sep. 28 against Georgia Tech — 1990's ACC champion and co-national champion. On their first drive, the Yellowjackets riddled the Tiger's "Iron Wall of Defense" to take a 7-0 lead. Death Valley then moaned as the offense went 3-downs and punt. Then (to no one's surprise), the Tiger-D woke up and stuffed, shredded, annihilated, obliterated, and decimated Georgia Tech and Heisman hopeful quarterback Shawn Jones. The Tiger-O did just that, zero. Death Valley roared for the defense and moaned for the offense — truly believing that our only hope for salvation was a defensive touchdown until... Nelson Welch (living in the shadow of Chris Gardocki) nailed a 46-yard field goal in the last play of the half to narrow Georgia Tech's lead to 7-3. The second half was much the same, until the waning minutes of the fourth quarter when Clemson was still down 7-3 and hopes were fading, until... Ronald Williams became the stuff that legends are made of and single-handedly drove the Tigers down for the go-ahead score. After the Tigers failed on a 2-point
conversion the score read Clemson -9 Georgia Tech -7; Tech had time to pass-pass-pass, and Hatfield put in the prevent defense. Then, as if all of Death Valley did not know it was coming, Shawn Jones calmly picked apart Clemson's prevent-zone defense, only to call a time-out while positioned within the Jacket's field goal range. The kicking units lined up... the ball was snapped... the turf leaped up and grabbed Scott Scisson's toe.... THEY MISSED!!! CLEMSON WINS!!! THE FANS STORM THE FIELD!!!... then wandered around in awe as the Tigers triumph in the most exciting game since Florida State in 1989 and "that damn puntrooski". 
After that "game for the ages", it was business as usual. The next week the Tigers traveled to Athens to play the hated Bulldogs for the last time in a long while — but let the Bulldogs win as the offense could not figure out how NOT to fumble or NOT throw an interception. Returning home to face Virginia for revenge and homecoming, the Tigers once more forgot how to hold on to the ball... however, they and Death Valley somehow found a way as the Tigers came back from a 10-point deficit with 6 minutes left in the fourth quarter to tie the ball game. But, in a repeat of Georgia Tech, the Cavaliers drove the ball down to field goal range in the waning seconds of the game... the kicking units lined up... the ball was snapped... BLOCKED!!! The Tigers stay alive in the ACC title hunt with a tie game.

Oct. 26... unbeaten NC State visits Death Valley... a game that will ultimately decide the ACC title... the fans want to see orange... the busses pull around the stadium.... the players line up to touch the rock... **PURPLE JERSEYS!!!**

For the first time in years, the Tigers return to purple and stormed down the hill onto the field. Then, they proceeded to put a royal stomping on the Wolfpack.
FOOTBALL

sending NC State whimpering back to its little cave, and all but wrapping up the ACC Championship.

They followed that tail-kicking with victories over Wake Forest and North Carolina. Then on Nov. 16 — decked out in all orange — the Tigers proceed to annihilate Maryland while cries of "ACC-ACC-ACC" rang in their ears. It did not matter what would happen against Duke (to be played in the Coca-Cola Bowl in Tokyo), nor that they would go on to stomp South Carolina in Columbia. The Tigers were returning to the Citrus Bowl and once more were lords of the ACC.

CITRUS BOWL
For the past five years, Clemson won every bowl game that came their way. But last year Clemson was forced back into the reality that they too could lose a game as easily as anyone else. When the Clemson Tigers entered the Citrus Bowl against the California Golden Bears, the roar of the Golden Bears muffled the squeaks of the Clemson Tigers.

As the Clemson fans sat in the stadium on a less than perfect day, everyone soon woke up when California began putting scores on the board. The first few points did not seem to matter. The Tigers would soon get their chance. But to the amazement of the crowd, California sneaked in a 17-0 lead.

But suddenly, the Tiger fans had a glimpse of hope. DeChane Cameron was able to break through the California defense to run 62 yards which ended in Clemson picking up 6 points. This run was also the longest run for a quarterback from scrimmage in thirteen years at Clemson University.

At halftime, California lead Clemson an astonishing 27-10. But the prelude to this was the ejection of Brentson Buckner at the start of the game. The actions of the Clemson players could not be overlooked as the reason for Clemson’s problems on the field that day. The California quarterback, Mike Pawlawski, threw for a 230 yard day. The Clemson defense could not stop the California attack.

But the glory was short lived as California continued to pound Clemson's offense and defense. DeChane Cameron was unable to make another impressive play that day. California went on to win the Citrus Bowl 37-17. Mike Pawlawski earned the game's MVP award for his great performance on the field that day. DeChane Cameron also earned Clemson offensive MVP honors for his wonderful 62 yard run against California.

Many fans wondered after the game if Clemson went in with bad Karma. Or was it the purple jerseys? Or was it their seemingly cocky attitude many witnessed in press releases and personal interviews? Whatever the reason, the Clemson fans should remember that the Clemson Tigers were mortal and could not win every game. Hopefully, Clemson learned from this experience. National Championship status happened ten years ago. Clemson needed to wake up and see that the past does not insure a future.

The Clemson Tigers went to Orlando to win. They came back a little more mature and experienced in the hills and valleys that make up life.

* Maia Lea Eppes *
SOCCER
Following 1990's regular-season ACC championship, Coach Ibrahim had to be happy about his 1991 Tiger soccer team. In his 25th year as coach of the Tigers, Dr. Ibrahim has guided his teams to an impressive 332 wins (6th all time winningest in history) and an 85-45-10 mark against league competition, making him the winningest coach in the ACC and 1990's ACC Coach of the Year (the 4th time he has earned this honor).

The Tigers looked pretty hot coming into the 1991 season; 1990 ACC Rookie of the Year Jimmy Glenn had led the league in scoring last year and goalkeeper Jaro Zawislak had broken a 21-year old single season record with 143 saves and made second team All-ACC along with Thomas Najjar. Put it all together and the Tigers are impressive enough to earn a #5 ranking in the ISAA preseason poll.

The year started out in interesting fashion, a 0-0 tie with UNC-Charlotte (a surprisingly good team that did make it to the NCAA tournament) followed by tough road losses to #10 UNC and #18 Wake Forest. But then the Tigers came alive winning their next 5 home games, suffering only a tie to #8 NC State on the road. By the time the Santa Clara tournament rolled around the Tigers were ranked #13 and had compiled a 5-2-2 record (1-2-1 ACC). In the tournament, held on Santa Clara's campus in California, the Tigers won in the first round, only to fall to #1 Santa Clara. Returning home, Clemson won 5 straight (including victories over Maryland and #17 William & Mary) and had climbed to an 11-3-2 record. But the #18 Tigers had to face #1 Virginia — on the road. Cinderella they were not to be, as the Tigers suffered a 2-1 loss in a game that gave Coach Ibrahim a heart attack — he had to be hospitalized before halftime.

The Tigers finished out the regular season with a win over Erskine, and a 6-0 drubbing of #10 South Carolina, yielding a 13-4-2 record (2-3-1 ACC) and a #15 national ranking. Destiny was not to be as the Tigers had to play #13 UNC in the first round of the ACC tournament — at UNC. Well, they did not beat UNC — but they did make it into the NCAA tournament (for the 16th time in their history) and had Andy Pujaits named 1st-team All-ACC while David McGuire, Jimmy Glenn, Jon Payne, and Jaro Zawislak made second team honors. The Tigers did not win a national championship this year. What they did do, was rack up yet another impressive year and overcome their relative youth, as well as the adversity imposed on them by Ibrahim's late-season heart attack. They will be back... much to the chagrin of their ACC foes.

#### 16th Appearance at ACC Tournament

Wally Dawson
Otis Thorpe slammed two in a very physical encounter with Brad Daugherty and Craig Ehlo.
CLEVELAND CAVALIERS MET THE HOUSTON ROCKETS IN CLEMSON'S LITTLEJOHN COLISEUM ON OCTOBER 25, 1991. Yes, that is right. The NBA came to Clemson. Despite a low turn out, the Rockets and the Cavaliers put on a show that was all but spectacular. The game was the first played on Littlejohn's new court, finished just a week prior to the big event. The game was also a homecoming for two ex-Clemson greats, Larry Nance of the Cleveland Cavaliers and Tree Rollins of the Houston Rockets.

Larry Nance, born in Anderson, SC, graduated from Clemson in 1981 and was immediately selected in the first round of the NBA draft by the Phoenix Suns. While majoring in Industrial Education, Larry also excelled in the ACC. In his 80-81 season he was seventh in scoring, fourth in field goal percentage and fifth in rebounding in the ACC. Larry led Clemson in rebounding his final three seasons and was the second all time highest rebounder with 784, losing only to Tree Rollins with 1311. He also led Clemson in scoring, blocked shots, dunks and field goal percentage his senior year. He had his college career highest scoring game of 34 points in his final game at Clemson.

Tree Rollins, also a Clemson graduate, played here in 1977 and then went to the NBA. Although both of these players were exciting to see, that night the basketball game would prove to be a thriller until the final seconds. With the Rockets and the Cavs tied at 102 with 43 seconds left, Vernon Maxwell of Houston shot the ball but Craig Ehlo's goal tending made it 102-104 Houston. In the final seconds Nance fouled Bullard and the game was finished with a score of 102-106 Houston making the pre-season record between the two 1-1.

Cross Country came into its own since Coach Wayne Coffman came to Clemson University. After a very successful 1990-1991 season, the Tigers last year hoped to repeat their success in the 1991-1992 season. And the Tigers did indeed have a very good season last year.

While many people probably looked at Cross Country as an insignificant sport at Clemson, nothing could have been further from the truth. After all was said and done, and after months of training, the Clemson Cross Country teams again proved that talent abounded in their ranks.

The Men's Cross Country team finished fourth at the ACC Championships. The team was also the champion at the South Carolina Collegiate Invitational. Dov Kremer, former Tiger Harrier, received the ACC’s Jim Weaver Award as the league’s top student athlete. Overall, the men’s Cross Country team continued to grow in strength, making a path to an even better and brighter season next year.

The Women’s Cross Country team also had a very good year. The team finished with a ranking of third in the nation. The women’s team finished third at the NCAA meet, which marked the highest finish ever for any type of women’s sport at Clemson University. The list of accomplishments went on and on and included a finish of second at the conference championship. All-American honors went to teammates Anne Evans and Mareike Ressing. Ann Evans was also the ACC individual champion. Mareike Ressing and Kris Salt earned all-conference honors as well.

Overall, the Clemson Cross Country program was another strong link in Clemson sports. The men's and women’s cross country team continued to strengthen Clemson's name in the sports world.

BASKETBALL
For a second year in a row, the Clemson women's basketball team proved men were not the only ones capable of producing an exciting basketball season. Under the guidance of head coach Jim Davis, the Lady Tigers prospered once again last year.

During the season, the Lady Tigers found themselves ranked in the Top Twenty. With a 19-8 overall record, the women's basketball team seemed bound for another bid to the NCAA tournament. And there was plenty of talent to make that goal come true.

The women's team had several outstanding team leaders last season. Cheron Wells lead the Lady Tigers in scoring (19 ppg.) and assists (108). Shandy Bryan lead the Tigers in rebounds (7.9 rpg.). and Courtney Johnson lead the Lady Tigers in steals (55). These talented women helped the Clemson team achieve a very modest ranking of eighteenth in the March 2 Associated Press poll.

The Lady Tigers had a 2-4 record against teams that were ranked in the top twenty-five college teams. Of those two victories, one came against Maryland which was ranked number one at that time. But the Lady Tigers did have some heartbreakers. The women's basketball team lost to ACC opponents NC State, Maryland, Virginia, and Georgia Tech all by less than four points.

The Lady Tigers did a fantastic job last season. Through their hard efforts and at times flawless playing, the Lady Tigers added to the excitement of Clemson basketball along with the men's basketball team.

Last season, the men's team was busy rebuilding their basketball program. With only a few returning lettermen, Cliff Ellis was faced with the challenge of recruiting players that were capable of adjusting quickly and could handle the intense competition of the ACC. Coach Ellis brought in three junior college transfers and four freshmen in hopes that a winning season could be salvaged from what looked to be a potential massacre at the hands of the other ACC colleges.

One of the three transfers, Chris Whitney, had the highest points per game average (12 points). He was also second highest in free throw percentage. Unfortunately, a very talented Tiger basketball player, Wayne Buckingham, was unable to play last season. Sharone Wright, a freshman, showed promise in Buckingham's absence and helped fill the hole he left. But such outstanding players were not enough to stop the crushing blows dealt to the Tigers by their merciless ACC opponents.

The men finished with an overall record of 14-13 and a 4-12 record in the ACC. Surprisingly, two of the ACC wins came against nationally ranked teams Georgia Tech and Florida State. Clemson had several five point losses this season which showed that they were developing prowess as a team. Clemson had the chance to beat number one ranked Duke at the end of the season. At one point in the second half, the Clemson team led by nineteen points. But the Clemson Tigers lost the lead and fell to Duke 98-97.

Cliff Ellis hoped through continued practice and the continued drive to put Clemson on top, the basketball team next year would be one to watch.

The greatest highlights of Coach Ellis' career was his ACC Championship trophy and ring, the firsts of many to come.
Cliff Ellis: The Ultimate First

A man looking for a challenge was what inspired Cliff Ellis to come to Clemson in 1984. Being the coach and also the athletic director at University of South Alabama, he had led them to a consistent top 20 finishes. At first when approached to come to Clemson, he said no. After thinking about it for a while, he called Clemson back and said he wanted to come visit. Upon arriving for his visit, he said it was "mind-boggling". The challenge was something he could not resist: the ACC, the bigger audience, and the impact nationally. When Ellis arrived, Clemson's power was in football and basketball had rarely been competitive in the ACC. From the start it was a big turnaround for the basketball program. He became the FIRST Clemson coach to win his first ACC game. Then he became the FIRST Clemson coach to beat a ranked opponent the first time he played a ranked team. He became the FIRST Clemson coach to have a 25 win season, FIRST Clemson coach to win 10 ACC games in a season, and the FIRST Clemson coach to be named ACC Coach-of-the-Year.

The academic standings have also risen during his tenure. Every senior off of the 90-91 team has graduated. He not only has proved that he can have success on the court but he has success with the athletes in the classroom too. Consistency in the top 20 and the top of the league are the goals he has strived for. With a good core of student fans (one of his highlights was taking pizza and cokes to a group of fans camped out in subfreezing temperatures waiting for tickets to a game) he wants to have a program that the students want to come to. The 89-90 season was his greatest thrill and it was the fans that helped get the ACC Championship trophy to Clemson for the FIRST time ever.

Cliff Ellis wants basketball to be as traditional as football at Clemson. Already with the 86-87 and 89-90 season, he has proved Clemson can win and win against anyone. Coach Ellis has set a lot of FIRSTs at Clemson, but not nearly enough for himself. He still wants the Ultimate FIRST, the NCAA Championship.

- Vern Verna -

Cliff always taught his players even during the game. Cliff's intensity on the sidelines was always visible to the fans.
Volleyball grew from a little known sport at Clemson University to a sport many people watched closely. Volleyball was more than just a summer sport on the beach, but a highly competitive sport demanding the best out of every player. Clemson's volleyball team continued to grow and reach their goal of becoming a team to reckon with during the playing season.

The volleyball program at Clemson University, lead by Coach Linda White, continued to reach their goals of an overall strong competitor last year. The effort was lead by teammates Robin Kibben and Annie Castro. Robin Kibben ended the season with 292 kills, 63 service aces, and 148 total blocks. All of Robin's efforts were team highs. Ann Marie Wessel, a very talented senior, ended her career at Clemson with 1493 set assists which earned her the third place on the school's career list.

The Clemson Volleyball team ended the season with a 22-12 record overall. The team's ACC record for the year was 2-5. Clemson lost to Duke in the first round of the ACC tournament.

The history of Clemson Volleyball stood as a proud reminder of the excellence of Clemson sports. Over the years, Clemson Volleyball had five straight 20 match win seasons, 116 wins in five years, and Coach Linda White has coached at least one all conference player every year in her career of five years at Clemson. And the teams strength continued to grow every year under Coach White.

The volleyball team continued to strive to better their playing record in the ACC. With many new talented players, the Clemson team looked forward to the future preparing for next year's volleyball season.

22-12 RECORD OVERALL
The wrestling players really support the fine work Coach Griffin has done at Clemson. Since Coach Griffin has been at Clemson, the university has enjoyed a much improved wrestling program.
Eddie Griffin:
Balance on the Mat

When asked why he decided to coach, wrestling coach Eddie Griffin replied that he was too dumb to do anything else. This reply was discovered to be far from the truth after talking to him. Griffin was a well-educated family man who enjoyed what he did. After graduating from Oklahoma State University and receiving his master's degree and coaching degree at Central State University of Oklahoma, Coach Griffin readily accepted the offer to coach at Clemson University. His respect for the athletic department at Clemson, as well as for the people, kept him at Clemson University since 1984.

Although he always wanted to coach, Griffin did not devote all his time to athletics, stressing the importance of a well-balanced life to his athletes. He proved to be an outstanding teacher as well as coach by developing his athletes into well-rounded individuals. His objective as a teacher was to not only create exceptional wrestlers, but also encourage his athletes to be good students and citizens. He was always eager to help his athletes educationally, academically, and socially.

Coach Eddie Griffin's contribution to the Clemson wrestling program really paid off. Ever since Griffin first joined the Clemson faculty in 1984, the Clemson wrestling team produced fifteen NCAA participants, two All American award winners, and one ACC wrestler of the year. And for the first time in Clemson's history, Coach Griffin managed to capture the ACC Championship title. Griffin herself received Co-coach of the Year award in 1991.

Coach Eddie Griffin's belief in a good blend for student athletes proved effective in making his wrestlers good athletes, students, and individuals. Though Griffin pushed his students to get what needs to be accomplished done, he also emphasized that there was more to life than wrestling. Eddie Griffin's hard work made both the Clemson University wrestling team and its athletes into a well-recognized organization.

*Tracy Corley*

With these guys playing for Clemson, there's no way we can lose!

Coach Eddie Griffin talks to one of his players about critical moves the player must remember before a match.

*EDDIE GRIFFIN ● 179*
The Clemson swim teams have been known for their strong college careers in and out of the water. And last season the tradition, with some difficulty, continued forward at Clemson.

One big change last season was the introduction of a new head coach. Jim Sheridan came to Clemson in March to take over the helm. Jim Sheridan had been head assistant coach and recruiting coordinator at Auburn University before coming to Clemson. He had also worked at the University of Iowa and several high schools. But do not think Coach Sheridan was a new face at Clemson. From August 1984 to December 1986, he was a graduate assistant coach at Clemson University. During last season's meets, Coach Sheridan proved that he could help rebuild the Clemson men's and women's swimming teams.

The women's swim team last year was the youngest in the Atlantic Coast Conference, but the team did not let this get in its way. Each member of the women's swimming team proved that she had potential and talent.

During the meet at Virginia Tech, freshman Julie Borleske was the meet champion in the 200 Butterfly and the 200 Freestyle. Another freshman, Lara Yaroszewski, had a strong beginning to her Clemson career. Lara placed first in the 200 Free and the 200 Individual Medley in the dual meet against North Carolina and Maryland. Liz Dolan, a senior, swam for her final time at Clemson last season. Dolan ended her career at Clemson ranked fourth on the Clemson all-time top five list in the 50 Free, and in the 100 Free Liz ranked in the top three on the all-time top five list.

The Clemson women's team finished the season with a 3-5 overall and a 0-4 ACC. It was not a good year on the record books, but it was a very strong basis for next year's women's swim team.

The men's swim team did not fair as well last season. But there were some bright spots. Jason Nettles was second all-time in the 100 Back competition. He also had some impressive finishes last season. Jason placed second in the 200 Medley Relay, 400 Free Relay, and 200 Back. Another strong competitor was Henry Faris. During the match against Georgia, Henry placed first in the 200 IM, and second in the 200 Fly. Andrew Saulnier placed first in the 500 Free and second in the 1000 Free at Chapel Hill.

The Clemson men's team had plenty of room to grow. With half of the twenty-four members being new to the team, next season should prove exciting as these young men gain experience in collegiate competition.

UNC INVITATIONAL WAS NOT SCORED
SWIMMING
The 1991-1992 season was satisfying for the wrestling team. The Tigers opened the season by ranking 3rd of 9 in the Navy Classic on November 16. The wrestling team members lost their first ACC match, but they did not let that disappoint them as they finished 10-6 overall and 2-3 in the ACC.

The individual performances were outstanding. Sophomore Jim Carazola (142) finished the regular season ranked 7th in his weight class by the Amateur Wrestling News/Coaches Poll. Freshman Troy Bouzakis (126) not only finished the regular season ranked 8th in his weight class, but the string of consecutive wins at the beginning of Troy's Clemson wrestling career made its mark on Clemson wrestling history.

Among the Tigers' top senior wrestlers were Scott Williams (HWt) and Marcus Pollack (134). Other top wrestlers were Keith Turner (177) and John Gardner (167). Even though these wrestlers ranked in the top six on the wrestling team, all the team members contributed to filling in the holes left by last year's graduates. Coach Eddie Griffin chose wisely when he recruited the new team members. The Tigers did well last season although there were only three seniors.

The wrestling team did just as well last season in the classroom. Kurt Rosenberg (190) and Scott Williams (190) earned a 4.0 grade point average in the fall semester. As a team, the Tigers posted a 2.84 cumulative GPA, the highest among the athletic teams.

The wrestling team ended the year with the ACC tournament and the NCAA Championships. With a young team being lead into the next season by Coach Griffin, the outlook for the Clemson wrestling team was bright.

Clemson University Men’s and Women’s Track Team raced a remarkable season. The Women’s team captured their first ACC Title while the Men’s team clutched its third straight ACC victory. Both the Women’s and Men’s Team Coaches, Wayne Coffman and Bob Pollock, respectively were recipients of the NCAA District 111 Coach of the Year. It was the speed on the track and the power in the field that joined forces to form one of the best overall team performances that Clemson had ever witnessed. Leading the way for the Men’s Team was the 4 x 100 Relay consisting of Doug Thomas, Charlie James, Michael Green, and James Trapp. The 4 x 100 team blitzed to an astonishing first in the Nation for the second year in a row with a time 39.14. Larry Ryans provisionally qualified for National’s in the 110 high hurdle and was the “fifth-man” on Clemson’s 4 x 100 Relay. Ryans helped Clemson’s Men’s Track team take several first place finishes after Charlie James suffered a hamstring injury and was unable to participate in National Competition. In the field, Scott Erbach qualified for nationals in the shot put event.

The Women’s Track team accumulated similar victories. Kim Graham automatically qualified for Nationals in the 200 meter posting a time 23.28. Clemson’s Women’s 4 x 100 team made up of Lisa Dillard, Tara Henderson, Angel Fleetwood and Kim Graham put their feet into the “turbo” mode and skidded into a National qualifying position with a time of 44.80. Marcia Fletcher jumped into the action to capture her spot on the National Team in the long jump. In all, eight members of the Men’s squad and seven members from the Women’s team competed for the National titles.

It took a team effort for these individuals to qualify for such a high caliber competition such as Nationals. Each one had to struggle through the physical and mental trials that college competition ingrains in an athlete. Through it all, enduring became bearable when there was someone there to share in the sweat, pain, loss and gain.

• Sue Aughey •
All Photos By Vern Verna
College athletes carried the image of just being students who sat in class, who could barely read, and whose career goals were to play in the majors. Clemson was trying to break the stereotype. The Athletic Department, with the financial support of IPTAY provided a learning center devoted to the enhancement and maintenance of athletic academics. Vickery Hall was designed to create a learning environment to help develop interpersonal, social, and survival skills for the student athletes.

According to Bill D'Andrea, Student-Athlete Enrichment Services Director, Vickery Hall had three purposes. These included academic support, personal growth and development, and student career assistance for the athletes. The learning center was equipped with tutors, two computer rooms various models exposed students to different systems, study halls, and advisors to provide academic support to the athletes. The staff scheduled seminars and programs on diet, study skills, drugs, and other timely subjects thereby enhancing personal growth. Through career assistance, student athletes found summer jobs which got them excited about learning in the classroom and about a future career. The programs were designed to create a well-rounded and competitive graduate.

Student athletes took pride in having a facility to meet their needs. The programs were structured around the athletes' time frames and created a positive learning environment. For convenience, Vickery Hall was open from 7 a.m. until 11 p.m. for the athletes.

Although study hall was mandatory for all freshmen athletes and upperclassmen with a 2.0 or less grade point average, other athletes used the facility to maintain their academic record.

Student athletes such as football player Bruce Branton, a graduate student in Industrial Engineering, and Women's Basketball player Courtney Johnson, an Industrial Management major, made the Honor Roll in the spring of 1991. They might not have needed the tutoring, but the quiet study rooms, computers, and encouragement helped them and other student athletes excel in the classroom and on the playing field.

The Athletic Department made a commitment above and beyond any other school in regards to athletes, and IPTAY backed up their words with Vickery Hall. The one of a kind program gave student athletes the motivation, direction, and encouragement they sought. The center emphasized the first reason the athletes were at Clemson University—Academics.

*Jacqueline Eaddy*

*All Photos By James T. Brown*
When asked if student athletes have a hard time managing time, Billy McMillon, a sophomore holding a 2.89 in economics said, "you simply have to learn to get your priorities in order."

Vickery Hall, one of the latest additions to Clemson, catered to the academic needs of student athletes.
The World According to Greeks

Greeks

The Greek system at Clemson continued to prove the importance of Greeks to Clemson's community. The fraternities and sororities helped to change the trend of American poverty and child care by hosting several fundraisers for organizations such as Meals on Wheels and the Starlight Foundation. The Greeks proved that fun can also go towards helping those who can't help themselves.

There were many ways that Clemson students could discover new activities or continue to pursue their favorite hobbies. There were many different outlets for students to voice their opinions or just relieve stress from a hard week of work. Many organizations on the campus catered to the students' desire for a thrilling adventure or a continuation of their academic goals.

People

Clemson attracted people from across the nation and the world. Clemson had a diverse student body which added to Clemson's goal of becoming a truly functional university. From India to England, from Clemson to California, the students at Clemson brought in new ideas and traditions which helped strengthen an already strong institution. As the 21st Century approached, the people of Clemson became more diverse.

Heading off into the World

Seniors

After graduation, Clemson graduates went off into the work force or back into graduate schools. Whatever course the students chose, every person once again faced a new and changing world. The friendships made, the heartaches withstood, and the many parking tickets paid, were now all memories. New memories were soon being made, and new friendships and even marriages were being formed.

If...

the idea of being part of a winning team of highly-trained professionals appeals to you, read on.

CAPSUGEL, located in Greenwood, S.C., is the world's largest producer of empty hard-gelatin capsules. We're a division of Warner-Lambert, a worldwide producer of quality health care and consumer products.

We're always interested in bright, enthusiastic graduates with degrees ranging from Engineering, Chemistry, and Microbiology, to Accounting, Human Resources, Marketing, and Sales. If you think you might be interested in us, describe your interests and abilities in a brief letter and send it to:

Human Resources
Capsugel/Warner-Lambert
535 N. Emerald Road
Greenwood, S.C. 29646

CAPSUGEL

BECHTEL SAVANNAH RIVER, INC.

The Savannah River Site (SRS), a premier nuclear/chemical facility produces radioactive isotopes for national defense, industry, medicine and America's Space Program. Bechtel provides process, facilities, and engineering and construction services for SRS.

Nuclear / Chemical / Civil/Structural / Metallurgical / Materials / Electrical / Mechanical / Instrumentation and Controls / Environmental / Computer Science / Construction Management

Engineering, Construction and Project Controls assignments involve one or more of the following specialties:

• Nuclear Reactor Operations
• Chemical Process Engineering
• Instrumentation and Control Engineering
• Electrical Control Schematics
• Calculations for Electrical Power Distribution Systems

Hoechst Celanese

A WORLD OF OPPORTUNITY

Hoechst Celanese truly is unique—an organization with a newness that opens up exciting opportunities to build for the future and a century-old history that provides a solid environment in which to achieve personal and career growth.

Hoechst Celanese Corporation is the largest and the fastest growing segment of the Hoechst Group of 250 companies in 120 countries.

Hoechst Celanese seeks individuals who can conceptualize and solve problems and are willing to take risks and relate well with colleagues on all levels.

The Hoechst Celanese (pronounced "Herk-st Sel-a-nes") Corporation is a science-based, market-driven, international company dedicated to producing and marketing chemicals, manufactured fibers for textile and industrial uses, engineering plastics and other high-performance advanced materials, polyester, film, printing plates, dyes and pigments, pharmaceuticals, and animal-health and crop-protection products.

These groups invite inquiries about full-time and summer internship positions from BS/MD/PhD candidates in chemical, mechanical and electrical engineering and chemistry.

For information, see your college placement officer or send resume to:

CAREER GUIDE

Something...so enriching...

...careers at Richland offer so much more!

How far you go as a professional depends a lot on where you start. As a GN beginning your career at Richland, you'll find yourself developing the exceptional level of skills that will enable you to go anywhere.

But, we're confident you'll want to stay at Richland. Because with innovative career paths in a broad array of specialties, including the Heart Center, Med Surg, Children's Hospital, and the Center for Cancer Treatment and Research, our progressive, 611-bed regional and teaching community hospital really offers so much more.

There are many excellent reasons to consider joining the staff of Richland. In addition to highly individualized preceptored orientation, we provide a progressive Career Ladder, Shared Governance, and Child Day Care. The Richland Plan — developed specifically for nurses whose lifestyles are affected by rotating shifts and weekend responsibilities — supplements regular vacation time with a 5-day, paid week off every four months.

To learn more, contact Nurse Recruitment located at 1885 Harden Street Extension. (803) 768-6870.

The best way to save the hidden costs of expanding your computer system.

Expanding your computer system doesn’t just mean buying a new computer. It can also mean buying new software. Retraining staff. And rewriting old software.

These hidden costs typically represent over 50% of data processing expenditures. Not so with Digital. We keep costs down by offering the broadest range of compatible systems available. From our small-scale MicroVAX® computers to our high-performance VAX® computers.

And because our entire range of VAX systems runs the same software, you only buy or develop software applications once. Which cuts down software costs. And hours of software development. For applications as diverse as factory automation, office automation, engineering design, and scientific research.

What’s more, our architecture and networking standards will never become obsolete. Programs for our first VAX computer still run unchanged on our latest VAX 8000 series. And with our Ethernet networks, and commitment to industry standards, your previous computer investments remain secure each time you upgrade or expand.

Let us show you Digital’s system in action at a company near you. Or at one of our Applications Centers for Technology. Simply call your local Digital sales office. And we’ll show you how to save the hidden costs of your next system expansion.
You'll contribute to future generations

When you choose a career in the Soil Conservation Service.

The mission of the SCS is to protect our soil and water resources for present and future generations. The SCS has exciting job opportunities in a variety of career fields.

- agronomy
- wildlife biology
- agricultural & animal science
- civil engineering
- forestry
- agricultural education
- soil science
- agricultural economics
- and others

To find out more about careers in the SCS, call (803) 253-3920 or write US Soil Conservation Service, 1835 Assembly St., Room 950, Columbia, S.C. 29201.

Hats Off To New Graduates!

Standard Trap:

The day you start your new job could be the day you lose control of your career.

When you get out of school with your brand new degree in Computer Science or Electrical Engineering (or with your hard-won MBA), you think you know just where your career is headed. You feel in control for a change.

Then a couple of years go by, and you find out that somebody's been stringing you along - right from the beginning.

It happens all the time. Because whenever people join companies whose needs and goals are different than their own, they give up some control over their careers. Sometimes a lot more than they realize.

Data General has needs and goals that we think will complement yours.

We have a lot to accomplish in a short amount of time. We want your contribution on a small team doing indispensable work. Right now, we're developing high performance UNIX™ workstations and servers with multiple processors, high-availability features and outstanding graphics and networking capability -- all based on the industry's leading RISC architecture.

We'll give you a chance to do real, important work. To put your name on it, and take the credit. To double the value of your professional assets in one year - if you've got the stuff to do it.

Find out more about how you can pull your own strings at Data General. Send your resume to College Relations, Data General Corporation, 62 T.W. Alexander Drive, Research Triangle Park, North Carolina 27709.

An Equal Opportunity Employer.

A Tradition of Nutrition...

"The strongest and sweetest songs yet remain to be sung."

Walt Whitman

IT'S IN "THE BAG"

For well over a half-century people in these parts have recognized the F-R-M feed bag as a symbol of quality, service and satisfaction.

Remember, F-R-M has developed a wide variety of livestock, poultry and specialty feeds to meet the needs of profitable operations.

Most likely, it's the care that has gone into — and the maximum benefit that comes out of — each bag of F-R-M that has given us a tradition of nutrition.

Find out for yourself. Ask your F-R-M dealer and he will tell you... "IT'S IN THE BAG."

See your F-R-M dealer today.

For 100 years, Amoco and Clemson University have challenged the future. We look to you to continue the tradition.
LEADERSHIP. EARNED ONE JOB AT A TIME.

At Fluor Daniel, we're proud to be a world leader in engineering, construction and maintenance services. Yet we never forget how we got here. One job at a time.

Our mission is to give our clients a competitive advantage in their individual marketplaces. We do this by being uncommonly responsive to their specific needs.

We combine global capability with local delivery. That means whatever the scope or unique demands of your project, you'll receive the benefits of our worldwide resources, technology and experience. Plus our commitment to making your job priority one.

That's why we provide more services to more industries in more places than anyone else. And why over 75% of our clients are companies we've previously served.

We'd like the opportunity to work for your company too. One job at a time.
The fact that Duke Power has won dozens of awards for its environmental efforts doesn't impress Mother Nature. The reason behind the awards is what counts in the forests, lakes, mountains, and rivers of the Carolinas.

We're proud that the National Wildlife Federation honored us with their Conservation Achievement Award — the first ever given to a corporation or an electric utility for its overall environmental program. But, we're more proud of why we won that award.

Plaques and public recognition are flattering, but it is our corporate conscience to which we ultimately answer. And, the only way to keep that clear is to thoughtfully care for all the lands and creatures that couldn't care less.

DUKE POWER
Smart People With Energy
Outside our Orlando resort await the sunsplashed attractions of Florida. But inside, our atmosphere is an attraction in itself, with private balconies overlooking our stunning atrium—the world's largest resort Atrium Lobby.

It's all here in the heart of it all at Stouffer Orlando Resort. We're located directly across from Sea World, just seven minutes from Orlando International Airport.

Upon arrival, have a complimentary glass of champagne at check-in, then check out your luxurious accommodations. Our guest rooms are Central Florida's largest, all featuring double or king-sized beds. And in the morning, enjoy complimentary coffee and newspaper with your wake-up call.

So even though Orlando's most popular attractions are right outside our door, we're proving once again that when it comes to relationships, it's what's inside that counts. In Orlando, you can depend on our good name.

Call your travel agent or 1•800•HOTELS•1.
As yet another year at Clemson University approached an end, we found ourselves wondering where did all of the time go. The experiences that are lived throughout a college career are impossible to recreate and even harder to re-capture in future years. We believe that as a continuing student, as the various worlds we notice, we hope that you during these years more than they ever had before.

As we have stated so many times before throughout this book, college presents a different world for the students to face with each passing year if not every passing day. By trying to capture a look at
or a graduate of Clemson will see that we all as Clemson students went through many of the same conflicts, triumphs and failures that make up college life. Some of these experiences could have been the abortion issue, parking tickets, winning football games and basketball games, getting an A on that test or getting an F. What ever your particular experiences were, chances were someone else experienced them too.

For those who succeeded and managed to graduate from Clemson, they have an accomplishment that will stay with them forever. For those who were continuing in their education, each year that they completed was an accomplishment. One of our accomplishments, that is the 1992 TAPS staff,
was that we, though few in numbers, put out another yearbook for the students, faculty, staff and alumni of Clemson University to be proud of and enjoy. Clemson University was an institution built on tradition, and we felt that TAPS is a tradition worth continuing.

• The 1992 TAPS Staff •
The 1992 TAPS, Volume 82, was printed by Jostens/Hunter Publishing Co., Winston-Salem, North Carolina with Claude A. Saleeby as company representative. The press run was 4,700, with a trim line of nine by twelve inches. It was Smyth sewn by a company representative. The 16-page signatures were Cannes 80 pound Enami, Dull Finish, White #1. There are twelve multiples of four color and twenty multiples of spot color.

Computers: The 1992 TAPS was produced on two Macintosh IIs, a Macintosh CX, and a Macintosh SE, using the Jostens Yeartech System. The software used included Aldus PageMaker, Adobe Illustrator 88, and Aldus Freehand. An Apple Scanner was used to digitize some of the art used. A Varityper VT600W Tabloid-size laser printer was used for actual size proofing of pages before typesetting. A MassMicro DataCart Duet was used for removable mass storage. Pages were submitted to Jostens on 44 megabyte SyQuest removable Disk Cartridges.

Type: The body copy is 10 point Bookman. Captions were set in 8 point Bookman. The photo credits were set in 7 point Bookman Italic. Headline typefaces included various Macintosh fonts.

Cover and Endsheets: The cover concept was originated by Susan Clark and Jacqueline Eaddy. The endsheets were designed by Mary Romano. This book has a cord grain cover with a color of Basin Blue. The metalwork was drawn by Jostens. The endsheets are Sundance Felt 65 pound Snow White #280. A 10% PMS 474 Beige background screen, PMS 165 Orange. PMS 273 Purple, and black inks were applied to the endsheets.

Studio Photographs: The portraits and organization photographs were taken by Yearbook Associates, P.O. Box 91, Millers Fall, Massachusetts. Photographs were taken by staff photographers, with exceptions noted.

Black and white photographs were shot on 135mm and 120mm Ilford Pan F, FP-4, HP-5, and Kodak T-Max 400. Color photographs were shot on both 135mm and 120mm Kodak Ektachrome and Fuji-Fujichrome slide films. All black and white and color film was processed by the staff using Ilford and Kodak chemicals. Black and white negatives were printed on graded Ilfsoep paper using Ilford chemicals.

The editorial content of this book does not necessarily reflect the views of Clemson University. Further specifications can be obtained by writing to:

TAPS, P.O. Box 2216, University Station, Clemson, South Carolina, 29632. Our phone number is (803)656-2379.

Correction: Due to an oversight during the production of the 1990 TAPS, we featured the 1990-91 Miss Clemson by mistake. Audra Y. Wallace, Miss Clemson 1990, should have been featured. We regret the error. We also would like to congratulate Miss Wallace as 2nd runner-up in the Miss USA Pageant.

Copyright 1992 by the Clemson University Office of Student Development.

No portion of this book may be reproduced, published in any form or used in a promotion without the expressed written permission of the Editor-in-Chief and the Office of Student Development.

When I told people that I was a Co-Editor of TAPS, they were amazed and wondered how much work and time was involved. My answer was usually short and sweet, "a lot." But now, I will not tell of the hard work, because someone who has never worked on staff could not comprehend it, but only about the benefits I received. I have been a member of the TAPS staff for four years and I am proud of my accomplishments therein. Yes, I was there during the 1989 and 1990 books, and I am not going to make any excuses because they have all been made, but I will say that I worked just as hard on those books as I did on this one. When I decided to continue my career with TAPS, despite its bad reputation, I did so because I felt that if I did not, no one else would. TAPS has been a large part of my life for four years and I am sad that I have to leave it all behind me. However, I look forward to taking the knowledge and experience I gained while working on TAPS and applying it to a so-called "real job."

TAPS does not just involve the publication of a book, it also has many great benefits that only a staff member can receive. We learned about computers, leadership abilities, communication abilities and how to build good co-worker relationships, among other things. I believe that for too long we as the TAPS staff have not looked at the whole picture. The picture involved more than deadlines, and page production, it involved forming relationships, having fun, getting support and also working. Sure there was actual work involved, but we also had fun times. In other words, you get out of TAPS what you give to it.

I was proud to tell people I was a TAPS member. TAPS made me feel like I made a difference when I attended Clemson University, and I did. Good luck to those who will continue the tradition next year, and I hope there will be more of you. I know you can all do it and do it well. God Bless!

* Susan Clark *

I will not dwell on the problems of a small staff, the Doubting Thomas Syndrome ("Are the books going to be on time?") or the laziness of so many students. As a matter of fact, not everything associated with this past year's book has disheartened me. I have matured professionally, eaten many free meals, and made many dear friends.

The thing that gives me the pride about working on TAPS is the fact that it is a part of Clemson. The Clemson spirit was almost inbred in me. I am a third generation Clemson graduate (my grandfather Class of 1929 and my father Class of 1963) and grew up learning the I-formation and hating USC. My father often said that I could go anywhere that I wanted to learn, but I wanted to eat and wear clothes, I would go to Clemson. I figured I should get used to orange clothes and Cow jokes, being a third generation Agriculture major. I even cried the first time that I heard the National Anthem at a football game. But, most of all, I have become an alumna of Clemson University.

Trips to Denver and New York were one of the boosts of the job. Trips to collegiate media conferences held across the country gave me the chance to fly, the chance to change time zones, the chance to leave Dixie all of which I enjoyed—even my first taxi ride which was in New York City of course. Thanks to those who joined me on those trips because you all made them so much fun.

I enjoyed most of my work on TAPS. I would like to think that the long hours brought our small group closer together. I have heard all about Susan's wedding, Monica's train hobby, and Jenny and Vern "loudly discuss" everything. Before TAPS, I did not know "Star Trek" existed or that people stayed up past midnight.

For those left behind to carry the torch next year and those in Student Development left to answer our calls, good luck and get those bathrooms on the 9th floor fixed.
