Commencement .................................................................. June 6
PERSONNEL

OFFICERS OF ADMINISTRATION

Robert Franklin Poole, Ph.D., D.Sc., LL.D., Litt.D.
President

Andrew Joseph Brown, B.S.
Treasurer, Secretary of the Board of Trustees

James Corcoran Littlejohn, B.S., D.Eng.
Business Manager

Lee W. Milford, M.D.
Surgeon

Gustave Ernest Metz, B.S., M.A.
Registrar

Herbert Press Cooper, Ph.D.
Dean, School of Agriculture and Director,
Agricultural Experiment Station

Francis Marion Kinard, A.B., A.M., Litt.D.
Dean, School of Arts and Sciences

Howard Louis Hunter, Ph.D.
Dean, School of Chemistry

William Harold Washington, B.S., M.S.
Dean, School of Education

James Hagood Sams, Jr., Ph.D.
Dean, School of Engineering

Howard Emmitt Glenn, B.S. in C.E., C.E.
Vice-Director, Engineering Experiment Station

Hugh Monroe Brown, Ph.D.
Dean, School of Textiles

Hubert Judson Webb, Ph.D.
Dean, Graduate School

Cornelia Ayer Graham, B.S.
Librarian

Thomas Arlington White
Clemson is a land-grant college, a state institution, and one of the A. and M. colleges which emphasizes agriculture and mechanical industries. Clemson is fully accredited by the Southern Association of Colleges and Secondary Schools.

The twenty-nine curriculums under the Schools of Agriculture, Arts and Sciences, Chemistry, Education, Engineering, and Textiles form a background of training for the hundreds of occupations in which Clemson graduates engage. In addition to the training for a specific occupation, each curriculum is broadened to include fundamental training in the occupational area as well as the worthwhile values of general education. Although the College is organized on the university plan of various schools, it retains its entity through the inter-relationships of schools and departments in providing a well-balanced educational program.

It is the primary purpose of the Graduate School to provide opportunities for comprehensive training in special fields, to instruct the student in methods of independent investigation and to foster the spirit of scholarship and research. It is the intention to reduce the routine requirements to a minimum. So far as they exist they are for the purpose of furnishing the discipline and methods for independent study and investigation. Courses of study, association with older investigators and other aids and methods are for the promotion of productive scholarship.

EXPENSES

The cost to South Carolina students for board, laundry, dormitory room, all fees and tuition will amount to $752.60 for the 1953-1954 session. Students from other states pay an additional $170.00. Thus, regular South Carolina students will make payments of $188.15 per quarter for room, board, laundry, all fees and tuition. In like manner, non-resident students will make payments of $230.65 per quarter. South Carolina students not living in the dormitories will make payments of $47.20 per quarter to the college for tuition and fees.
**Graduate Fellowships.** Both Research and Teaching assistantships are available to outstanding graduate students. Students who are accepted in the Graduate School are eligible to apply for such aids. Assistantships and fellowships are normally awarded for the academic year. Where vacancies exist, however, they may be granted for other periods. The minimum stipend for these appointments is normally $975 for the academic year. Some appointments are for the calendar year and carry stipends of $1200 minimum. Half-time assistantships allow the student to carry an academic load of a maximum of 12 semester hours which is equivalent to three-fourths of the full load. Final selection for these fellowships and assistantships will be on a competitive basis and students interested in these awards should apply to the department in which they desire to study.

At the present time the following fellowships are available for students desiring to study in the field of Textile Chemistry:

- The Celanese Corporation Fellowship
- The Dow Corning Corporation Fellowship
- The Edward Orton, Jr., Fellowships are available for students desiring to study in the field of Ceramic Engineering. The South Carolina Ceramic Manufacturers have also made funds available for assistantships for students working in this field.

**EDUCATIONAL BENEFITS FOR VETERANS**

**Public Law 550.** Eligible veterans who have served in the active service in the Armed Forces for ninety days or more during the period beginning June 27, 1950, and who have been discharged or released from active service under conditions other than dishonorable, may qualify for a program of education or training under Public Law 550, "Veterans' Readjustment Assistance Act of 1952."

In general each eligible veteran shall be entitled to education or training for a period equal to one and a half times the duration of his active service in the Armed Forces during the basic service period with a maximum period of entitlement of thirty-six months.

Information and forms for the filing of applications for assistance are provided by the Veterans' Administration.
Each eligible veteran enrolled in a program of education under this act will receive an allowance for the expenses of his subsistence, tuition, fees, supplies, books and equipment. For veterans enrolled on a full-time basis, allowances will be computed at the rate of $110 per month, if the veteran has no dependent, or at $135 with one dependent, or $160 with more than one dependent.

**Public Laws 16 and 346.** For veterans qualified for benefits under Public Law 16 or 346, the Veterans' Administration pays tuition, fees and the cost of necessary books and supplies. The veteran pays his own living expenses but the subsistence checks to be received by the veteran will more than reimburse him for the cost of living in the dormitories at Clemson.

## BUILDINGS AND GROUNDS

**Buildings.** Tillman Hall houses the offices of the President, the Registrar, the Commandant, the Treasurer, the Business Manager, the Professor of Military Science and Tactics, and the Dean of the School of Arts and Sciences. This building also has over twenty classrooms. At the north end of the building is Memorial Hall, the College Auditorium, with a seating capacity of about eighteen hundred.

The Library Building, located in approximately the center of the campus, houses the Main Library, the Agricultural Reference Department, the Museum, and the Browsing Room. The Mailing Room for the Experiment Station and Extension Departments is on the basement floor.

The Library contains 134,405 bound volumes, consisting of books, periodicals and U. S. Government Publications. In addition to the bound volumes the Library contains 783,440 unbound Federal, State, Experiment Station and Extension Service publications, 6,207 unbound periodicals and 5,000 pamphlets and clippings in the vertical subject file.

The Museum is located on the balcony of the Main Reading Room. It contains many interesting items—Indian Relics, mounted birds and animals, and World War I and II relics, all of which were gifts from friends and alumni.
The Browsing Room is located in the basement of the Library Building, is beautifully and comfortably furnished, and contains many popular and attractive books, current magazines, and daily newspapers.

A Carnegie Collection of 1,265 recordings of classical and semi-classical music, books related to music, and turntables for playing records with earphones for listening are also in this room.

The Library Staff consists of nine professionally trained Librarians and several other non-professional assistants and clerical workers. A trained Librarian is always on duty to assist faculty and students.

The Library is open daily from 8 a.m. until 10 p.m., Monday through Friday, from 8 a.m. to 5:30 p.m. Saturdays, and from 2 p.m. to 10 p.m. Sundays, with the exception of holidays.

The instructional work of the institution is maintained largely in the departmental buildings. The Schools of Agriculture, Chemistry, Engineering and Textiles have individual buildings especially designed for their purposes as does the Department of Agricultural Engineering. The School of Arts and Sciences is located in the Administration Building and the Physics Building with the exception of the Social Sciences Department which is located in the Old Chemistry Building, also occupied by the School of Education. Certain laboratory work is conducted at the greenhouses, livestock farms, poultry plant, veterinary hospital and other buildings on the college farm. The Department of Military Science has offices and classrooms in the Administration and Physics Building while the Department of Air Science is located in the Textile Building.

Fort Hill, the former home of John C. Calhoun, is located on the Clemson campus. In accordance with the provisions of Mr. Clemson’s will, this residence has been made a shrine in honor of Mr. Calhoun. Several pieces of furniture and other interesting relics, formerly the property of Mr. Calhoun, are carefully preserved in this home, where they may be seen by visitors to the college.

**Grounds.** The college grounds comprise about 1,645 acres, including the campus, the farm, and the Experiment Station grounds. The two-hundred-acre campus is laid out in walks, drives and lawns, and is shaded by a beautiful grove of native forest trees.
HOUSING FACILITIES

The dormitories consist of nine large brick buildings, five of which were constructed since 1935. The dormitory rooms are equipped with single width beds and other necessary equipment. Graduate and veteran students are housed in dormitories apart from the cadet corps.

The dining hall is located in one of the dormitories and is under the supervision of an experienced staff. All students living in the dormitories eat in the dining hall.

Family Housing. The college has two hundred and forty-seven two-bedroom houses for married students. These houses are equipped with space heaters and hot water heaters. The monthly rental ranges from $16.50 to $19.00 depending upon the type of kitchen appliances used.

Information concerning housing facilities may be obtained by writing the Clemson Housing Office.

STUDENT HEALTH SERVICE

The Surgeon, who has complete charge of the hospital, is one of the regular officers of the College, and his special duty is to look after the health of the students.

At a specified time every day, students who desire may consult the Surgeon, and those who are admitted to the hospital are cared for by experienced nurses in the college hospital. In case of necessity students are allowed to consult the Surgeon at any time, or send for him in an emergency.

The Surgeon cannot undertake to notify parents every time a student reports to the hospital for medicine, or for rest on account of some slight complaint. However, they may rest assured that they will be notified at once of sickness of any consequence.

The medical fee paid by each student is intended to cover all ordinary cases of sickness and their treatment. It is not intended to cover fees of doctors or specialists called into consultation, for performing operations, for special nurses, or for any medical or
surgical attentions performed away from the College; and the College does not assume any responsibility for accidents that happen away from the College. Such expenses must be borne by the parents. The right of the College Surgeon, with the approval of the President of the College, to incur in behalf of any student under his care any of these extra services is hereby expressly reserved.

ORGANIZATION AND GOVERNMENT

ADMINISTRATIVE ORGANIZATION

Board of Trustees. The government of the College is vested in a Board of thirteen members, six of whom are elected by the Legislature, and seven life and self-perpetuating under the Clemson will. The function of this Board is legislative and not executive. The Board determines the general policy of the College, makes the laws for its government, and directs the expenditure of its funds.

The President is the chief executive and administrative officer appointed by the Board of Trustees. He is the head of the College and is responsible for its satisfactory working and success.

The College is divided into schools of Agriculture, Arts and Sciences, Chemistry, Education, Engineering, and Textiles. A dean is at the head of each school and is responsible to the President for its conduct and success. The schools are comprised of departments. Each department is in charge of a professor who acts as its head. The President conducts all official business with each department through its dean.

The Graduate School. The Dean is the Administrative Officer of the Graduate School and is also Chairman of the faculty committee on graduate work. This committee determines policies and regulations involving graduate work at the college. Inquiries about admission should be addressed to The Director of Admissions, Box 72, Clemson, South Carolina. Inquiries about assistantships and facilities for advanced study and research should be addressed to the Department in which such work is to be done.

No effort has been made to set up a graduate faculty as such. Those who teach courses for which graduate credit is given are considered members of the graduate faculty although they do not function as a distinct body.
Courses and Degrees. Courses are offered leading to the degree of Master of Science, Master of Mechanical Engineering, Master of Electrical Engineering, and Master of Civil Engineering.

The College also offers the following professional engineering degrees: Civil Engineer, Electrical Engineer and Mechanical Engineer. The requirements for these degrees are: (a) a Bachelor's degree from Clemson College in one of these three branches of engineering, (b) five years of subsequent professional experience, one year of which must have been in responsible charge of engineering or engineering instruction, (c) the preparation of a thesis demonstrating distinct technical ability. These professional engineering degrees are not administered by the Graduate School. (Detailed information regarding professional degrees may be obtained from the Registrar.)

A list of major fields and courses acceptable for graduate credit is listed elsewhere in this bulletin. Certain courses of the 300 and 400 series are acceptable for graduate credit under conditions outlined under "course work required." The name and catalog number of these 300 and 400 courses are listed in this bulletin. Complete descriptions of these courses can be found in the General Catalog which may be obtained from the Registrar.

Admission. Before admittance to the Graduate School a student must have the Bachelor's degree from an institution with a scholastic rating satisfactory to the college, and must have the approval of the Head of the Department in which he plans to do his major work. For unconditional admission to the Graduate School the applicant must have an average undergraduate grade of B or better in the major field and should be in the upper half of his class. If the previous scholastic training is not considered adequate, the student may be required to make good the deficiency by doing additional supplementary work and lengthening the time required to obtain the degree.

With the approval of their Dean or Director, qualified, full time employees of the Clemson Agricultural College, may pursue graduate work for credit. Members of the faculty, experiment station
or extension service staff or other staff members having a rank
higher than Instructor or its equivalent, may not, however, be con-
sidered as candidates for advanced degrees at this Institution.

Students desiring to enroll in the Graduate School must make
application to the Director of Admissions. The application should
be accompanied by a transcript of previous college work, and by
such written recommendations as are necessary in support of the
application. Within one month after registering for graduate
credit the student must file with the Dean of the Graduate School
his Preliminary Plan of Graduate Study, G. S. Form 2. Admission
to the Graduate School does not automatically qualify a student as
a candidate for an advanced degree. A written application for the
degree must be presented to the Dean of the Graduate School at
least three months before the convocation in which the degree is
expected. This application must list the major and minor subjects
to be offered for the degree and must be accompanied by the out-
line of a proposed thesis. It must bear the signed approval of the
heads of the departments and the professors concerned.

Before a student is admitted to candidacy for an advanced de-
gree he must present evidence that he has taken the Graduate
Record Examination. This examination will be administered at
Clemson on July 10, 11 and October 15, 16 on the Institutional Test-
ing Plan. A fee of $4.00 is charged for students participating in
these tests. Application for these tests should be made at the
Graduate School Office at least three weeks prior to the date of
the examination. Students who do not take these examinations on
these dates will be expected to make their own arrangements with
the Educational Testing Service for the tests.

**Degree Requirements.** To receive the Master's degree the stu-
dent must spend the equivalent of at least one academic year in
residence at the College as a graduate student. No graduate credit
will be allowed for courses completed in less than six weeks. The
Master's degree must be obtained within a six year period.

**Course Work Required.** In addition to such supplementary or
supporting courses as may be required, the work will consist of a
minimum of 30 semester hours of which six semester hours shall
be research, on the basis of which a thesis is required. Of the re-
mainling 24 semester hours, at least 12 hours must come from the
courses numbered 500 or above. The additional credit hours (the minor or minors) are to be determined in consultation with the professors in charge of the work which is to require the major and minor interests of the student. Of the 24 course hours required, at least 12 hours must be in the major field and at least 6 hours in one minor. To receive graduate credit for a 300 or 400 series course the student must attain a grade of B or better. Graduate credit may be received for a grade of C on 500 series courses, provided, however, that the average grade for all 500 series courses must be B or better on a credit hour basis before the student can become eligible for an advanced degree.

In order to obtain graduate credit for a course numbered less than 500 the student must develop a complete program of graduate work leading to an advanced degree. This program should be approved by the Heads of the Major and Minor Departments and the Dean of the Graduate School before the student registers for such courses. Forms are provided by the Graduate School Office for filing this program.

As a rule, it is not permissible to select a minor in the same field as the major. No student shall receive both graduate and undergraduate credit for the same course.

**Maximum Credit Load.** Fifteen credit hours per semester or one credit hour per week for the Summer School is the maximum load for students who are devoting all of their time to graduate work. Persons who are employed on a full-time basis may not carry more than six semester credits per semester. The maximum graduate load for students devoting part-time to graduate study and part-time to staff duties will be determined by their terms of employment.

**Transferred Credits.** Credits obtained in a different but recognized institution, not exceeding six semester hours, may be transferred and credited to the Master's degree provided that the work was of graduate character and provided that transferred credit does not reduce the minimum residence period of one academic year. No credit toward graduate degrees may be obtained by correspondence or extension study.
**Language Requirement.** A reading knowledge of one modern language is required by some departments.

**Recommendation for Degree.** Each candidate for an advanced degree, after the completion of the required thesis, and at least two weeks before it is expected that the degree will be awarded, must pass such examination as may be required by a committee to be appointed by the Dean of the Graduate School. This committee shall ascertain the general knowledge of the candidate with particular reference to the major and minor subjects and the thesis. It will report its findings and recommendations to the Dean of the Graduate School, who in turn, will present them to the Graduate Committee for appropriate action.
DESCRIPTION OF COURSES

AGRICULTURAL CHEMISTRY

Ag Ch 421—AGRICULTURAL BIOCHEMISTRY—3 cr. (3 and 0)  Mr. Mauldin

Ag Ch 422—AGRICULTURAL BIOCHEMISTRY—3 cr. (3 and 0)  Mr. Webb

AGRICULTURAL ECONOMICS

Ag Ec 352—PUBLIC FINANCE—3 cr. (3 and 0)  Mr. Aull, Mr. Stepp

Ag Ec 357—CONSERVATION OF NATURAL RESOURCES—3 cr. (3 and 0)  Mr. Aull, Mr. Bauknight

Ag Ec 401—STATISTICS—4 cr. (3 and 3)  Mr. Todd

Ag Ec 451—ECONOMICS OF COOPERATION—3 cr. (3 and 0)  Mr. Ferrier, Mr. Todd

Ag Ec 452—AGRICULTURAL POLICY—3 cr. (3 and 0)  Mr. Aull

Ag Ec 456—PRICES—3 cr. (3 and 0)  Mr. Todd

Ag Ec 460—AGRICULTURAL FINANCE—3 cr. (3 and 0)  Mr. Ferrier, Mr. Bauknight

Ag Ec 462—APPLIED STATISTICS—3 cr. (2 and 3)  Mr. Todd

Ag Ec 501—ADVANCED FARM MANAGEMENT—3 cr. (2 and 3)  Mr. Aull

Study and appraisal of methods of assembling and analyzing information concerning the business of farming. Prerequisites: Ag Ec 302 and Ag Ec 401.

Ag Ec 503—LAND ECONOMICS—3 cr. (3 and 0)  Mr. Bauknight

A study of the characteristics of land and its utilization in relation to population and public policies. Prerequisite: Permission of instructor.

Ag Ec 505—ECONOMIC THEORY—3 cr. (3 and 0)  Mr. Stepp

A review of economic principles, a study of the use of theory in the analysis of economic problems, and an appraisal of recent developments in capitalistic economic theory. Prerequisites: Permission of instructor.

Ag Ec 507—AGRICULTURAL MARKETING PROBLEMS—3 cr. (3 and 0)  Mr. Ferrier

A study of special problems involved in research and marketing southern fruits, vegetables, livestock and livestock products. Students will undertake individual assignments in the field of their interest. Prerequisites: Ag Ec 309 or permission of instructor.
Ag Ec 512—EXPERIMENTAL DESIGNS—3 cr. (3 and 0)
An examination of the ways to plan and conduct comparative experiments so they will provide, efficiently, specific answers to scientific questions under investigation. **Prerequisite:** Ag Ec 401 or permission of instructor. Mr. Todd

Ag Ec 514—CONTEMPORARY ECONOMIC PROBLEMS—3 cr. (3 and 0)
A critical review of the nature of contemporary economic problems, the background out of which they developed, the remedies which have been applied and possible alternatives. (Special emphasis will be given to problems relating to agriculture and rural life.) **Prerequisite:** Permission of instructor. Mr. Aull

Ag Ec 591—RESEARCH—3 cr. Mr. Aull and Staff

Ag Ec 592—RESEARCH—3 cr. Mr. Aull and Staff

**AGRICULTURAL ENGINEERING**

Ag En 401—SOIL AND WATER CONSERVATION ENGINEERING—3 cr. (2 and 3) Mr. Snell

Ag En 402—DRAINAGE AND IRRIGATION—3 cr. (2 and 3) Mr. Snell

Ag En 451—FARM STRUCTURES—3 cr. (2 and 3) Mr. Richardson

Ag En 452—ADVANCED FARM STRUCTURES—3 cr. (2 and 3) Mr. Richardson

Ag En 511—DESIGN OF FARM MACHINERY—3 cr. (3 and 0)
A study of the design and selection of the mechanical units of machines will be made with emphasis on their application to the agricultural implement field. **Prerequisite:** Mech 304 and Ag En 406. Mr. Young

Ag En 512—DESIGN OF FARM MACHINERY—3 cr. (2 and 3)
Problems in agricultural implement design will be chosen to coordinate the design of functional units of farm machines with the selection of machine members. **Prerequisite:** Ag En 511. Mr. Young

Ag En 591—RESEARCH—3 cr.

Ag En 592—RESEARCH—3 cr.
AGRONOMY

Agron 301—FERTILIZERS AND MANURES—3 cr. (3 and 0) Mr. Collings

Agron 302—GENETICS—3 cr. (2 and 3) Mr. J. W. Jones

Agron 306—FORAGE CROPS AND WEEED IDENTIFICATION AND CONTROL—4 cr. (3 and 3) Mr. Shelley

Agron 451—MINERAL NUTRITION OF PLANTS—2 cr. (2 and 0) Mr. Cooper

Agron 452—SOIL CLASSIFICATION, FERTILITY, AND MANAGEMENT—2 cr. (2 and 0) Mr. Collings

Agron 455—SEMINAR—1 cr. (1 and 0) Mr. Cooper

Agron 456—SEMINAR—1 cr. (1 and 0) Mr. Collings

Agron 501—ADVANCED NUTRITION OF CROPS—3 cr. (3 and 0)
A graduate course dealing with the relationship existing between the physical and chemical properties of the various nutrient elements and their absorption and utilization by plants.

Agron 502—ADVANCED PEDOLOGY AND SOIL CLASSIFICATION—3 cr. (3 and 0)
A graduate course dealing largely with the factors of soil formation and soil classification. A thorough study is made of such factors of soil formation as parent material, topography, climate, and organisms. Particular attention is given to the classification of Southeastern soils.

Agron 503—ADVANCED CROP PRODUCTION—3 cr. (3 and 0)
A graduate course dealing with specific problems commonly encountered in the production of crops in the Southeast. Major attention is given to the problems met with the production of cotton, bright tobacco, corn and oats.

Agron 504—ADVANCED PLANT BREEDING AND GENETICS—3 cr. (3 and 0)
A graduate course designed to acquaint the student with the best methods now employed in the production and development of superior strains of plants. Visits will be made to neighboring plant breeding establishments and their methods will be observed.

Agron 591—RESEARCH—3 cr.

Agron 592—RESEARCH—3 cr.
ANIMAL HUSBANDRY

AH 310, 314—PORK PRODUCTION—3 cr. (2 and 3)  Mr. Starkey
AH 401, 403—BEEF PRODUCTION—3 cr. (2 and 3)  Mr. Starkey
AH 451—ADVANCED FEEDS—2 cr. (2 and 0)  Mr. Cook
AH 452, 454—ANIMAL BREEDING—3 cr. (2 and 3)  Mr. Danion
AH 455—FARM MEATS—2 cr. (0 and 6)  Mr. Scott
AH 456, 458—ADVANCED MEATS—2 cr. (1 and 3)  Mr. Scott

AH 501—ANIMAL HISTOLOGY—3 cr. (2 and 3)
This course is to acquaint the student with the microscopic structures of the tissues and organs of the animal body. The relation of histology to physiology and pathology is considered. Prerequisites: Zool 101 and 103.  Mr. Anderson

AH 502—TOPICAL PROBLEMS—1-3 cr. (1-3 and 0)
A critical study of Animal Husbandry Experiments and the interpretation of their results. Intended to prepare students for positions with agricultural colleges and experiment stations and the United States Department of Agriculture.  Mr. Starkey

AH 503—PATHOGENIC DISEASES OF LIVESTOCK—3 cr. (3 and 0)
A graduate course designed to acquaint the student with the cause, prevention and treatment of pathogenic diseases.  Mr. Anderson

AH 591—RESEARCH—3 cr.
AH 592—RESEARCH—3 cr.

ARCHITECTURE

Arch 301—ARCHITECTURAL DESIGN—5 cr. (0 and 15)  Mr. Gates
Arch 302—ARCHITECTURAL DESIGN—5 cr. (0 and 15)  Mr. Gates
Arch 401—ARCHITECTURAL DESIGN—6 cr. (0 and 18)  Mr. Means
Arch 402—ARCHITECTURAL DESIGN—6 cr. (0 and 18)  Mr. Means
Arch 409—ART APPRECIATION—3 cr. (3 and 0)  Mr. St. Hubert
Arch 415—BUILDING DESIGN—2 cr. (2 and 0)  Mr. Means
Arch 417—WORKING DRAWINGS—2 cr. (0 and 6)  Mr. Means
Arch 418—CONSTRUCTION—2 cr. (1 and 3)  Mr. Gunnin
BACTERIOLOGY

Bact 301, 303—GENERAL BACTERIOLOGY—4 cr. (3 and 3)  
Mr. Rush, Mr. Bond

Bact 310, 312—ADVANCED BACTERIOLOGY—4 cr. (2 and 6)  
Mr. Bond

Bact 402, 404—DAIRY BACTERIOLOGY—3 cr. (2 and 3)  
Mr. Rush

Bact 406, 408—SANITARY BACTERIOLOGY—4 cr. (3 and 3)  
Mr. Rush

Bact 410, 412—SOIL MICROBIOLOGY—3 cr. (2 and 3)  
Mr. Bond

Bact 502, 504—ADVANCED BACTERIOLOGICAL TECHNIC—4 cr.  
(2 and 6)

A course including methods of preparing special equipment for use in the bacteriological laboratory, sterilization by filtration, isolation of viruses, immunological procedures, and the experimental infection of animals. This course is designed to give students interested in research in the field of bacteriology and plant pathology experience in more advanced methods of investigation. **Prerequisites:** Bact 301, 303, Bot 401, 403.

BOTANY

Bot 351, 353—PLANT MORPHOLOGY—4 cr. (2 and 6)  
Mr. Rutledge

Bot 352, 354—PLANT PHYSIOLOGY—4 cr. (3 and 3)  
Mr. Whitney

Bot 355—HISTOLOGY—2 cr. (0 and 6)  
Mr. Rosenkrans

Bot 356, 358—TAXONOMY—3 cr. (1 and 6)  
Mr. Rosenkrans

Bot 401, 403—PLANT PATHOLOGY—3 cr. (2 and 3)  
Mr. Armstrong, Mr. Mathews

Bot 451, 453—MORPHOLOGY OF THE FUNGI—3 cr. (2 and 3)  
Mr. Mathews
Bot 501—METHODS OF RESEARCH IN PLANT PHYSIOLOGY—3 cr. (2 and 3)

A theoretical and practical study of methods used in investigation of physiological processes and the factors influencing those processes. Topics include sand and solution culture methods, measurement and control of soil water content, atmospheric humidity and radiant energy, and determinations of osmotic quantities, hydrogen ion concentration, and metabolic processes. **Prerequisite:** Bot 352, 354: Chem 101, 102; Phys 201, 202, 203, 204.

Bot 503—ADVANCED PLANT PATHOLOGY—4 cr. (3 and 3)

Essentially an introduction to research on plant diseases with review and recording of literature; preparation of media; isolation of single-cells of organisms in pure culture; a class study of infection and epidemiology of one fungus, one bacterial, and one virus disease; and an individual “problem” with preparation of a manuscript according to standards of a scientific journal. **Prerequisites:** Bot 401, 403.

**CERAMIC ARTS**

Cr Ar 301—POTTERY GLAZES—3 cr. (3 and 0) Mr. Rion

Cr Ar 401—ADVANCED POTTERY—3 cr. (2 and 3) Mr. Rion

**CERAMIC ENGINEERING**

Cr En 301—THE DRYING AND FIRING OF CERAMIC PRODUCTS—4 cr. (3 and 3)

Cr En 305—SILICATES—5 cr. (3 and 6)

Cr En 402—REFRACTORIES—3 cr. (3 and 0)

Cr En 403—WHITEWARES AND GLAZES—3 cr. (3 and 0)

Cr En 404—ENAMELS—3 cr. (3 and 0)

Cr En 410—GLASS—3 cr. (3 and 0)

Cr En 412—RAW MATERIAL PREPARATION—3 cr. (3 and 0)

Cr En 416—CEMENT, LIME AND PLASTER—3 cr. (3 and 0)

Cr En 418—PROCESS CONTROL—3 cr. (1 and 6)

Cr En 501—ADVANCED ANALYTICAL PROCEDURES AND EQUIPMENT—3 cr. (2 and 3)

A study of the use and application of the X-ray, spectograph, and electron microscope in ceramics. Mr. Gates

Cr En 502—SILICATE CRYSTALLOGRAPHY—3 cr. (3 and 0)

A study of the basic laws of chemical crystallography and their application to the structure of silicate minerals Mr. Gates
Cr En 503—CERAMIC PRODUCTION CONTROL—3 cr. (3 and 0)
A study of the techniques and procedures for providing the required quantity and quality of material at the required time and place in ceramic industries. Motion study, job analysis, job and wage evaluation in these industries.  
Mr. Gates

Cr En 504—CERAMIC QUALITY CONTROL—3 cr. (3 and 0)
A study of organization and procedure for quality control in ceramic industries. Practices and techniques used for systematic control of ceramic products and materials.  
Mr. Gates

Cr En 505—ADVANCED DRYING—3 cr. (2 and 3)
An advanced study of drying fundamentals, drying problems, and dryer design.  
Mr. Robinson

Cr En 506—ADVANCED FIRING—3 cr. (2 and 3)
An advanced study of fuels, combustion, heat transfer, firing problems, and firing equipment.  
Mr. Robinson

Cr En 507—SPECIALIZED CERAMICS—3 cr. (3 and 0)
An advanced study of one of the divisions of ceramics. The student may select either structural products, refractories, whitewares, abrasives, enamels, glass, elements, or raw materials processing.  
Mr. Robinson

Cr En 591—RESEARCH—3 cr.
Cr En 592—RESEARCH—3 cr.

CHEMICAL ENGINEERING

Mr. Berne-Allen

Ch En 404—CHEMICAL INDUSTRIES—3 cr. (3 and 0)  
Mr. Berne-Allen
A candidate for the Master's degree in Chemistry must demonstrate a satisfactory reading knowledge of a modern foreign language before beginning research. The modern language will be German unless some other language is recommended by the candidate’s committee.

A candidate for the Master's degree will have a general major in Chemistry and a minor in a department outside of the School of Chemistry. The courses required for a general major in Chemistry will consist of three four-hour advanced courses: one in Inorganic Chemistry, one in Organic Chemistry and one in Physical Chemistry. The required research and thesis may be taken in Inorganic, Analytical, Organic or Physical Chemistry.

A candidate must have completed the following undergraduate requirements with an overall B average before he can become a candidate for the Master's degree in Chemistry.

One year of General Chemistry
One year of Analytical Chemistry
One year of Organic Chemistry
One year of Physical Chemistry
Five semester hours of advanced work in Chemistry

Anyone not satisfying these requirements must make up the deficiency before becoming a candidate for the Master's degree. Any of these prerequisites that have to be completed at Clemson by a candidate must be removed within two calendar years and the candidate must maintain an overall B average in such work.

A candidate for the Master's degree will be required to complete satisfactorily a comprehensive written examination at least two months prior to the final oral examination, and a placement exam may be required at the time the student starts his graduate program.
Chem 332—PHYSICAL CHEMISTRY—3 cr. (3 and 0) Mr. Hobson
Chem 333—PHYSICAL CHEMISTRY LABORATORY—2 cr. (0 and 6) Mr. Hobson
Chem 334—PHYSICAL CHEMISTRY LABORATORY—2 cr. (0 and 6) Mr. Hobson
Chem 401—INORGANIC CHEMISTRY—3 cr. (3 and 0) Mr. Schirmer
Chem 402—INORGANIC CHEMISTRY—3 cr. (3 and 0) Mr. Schirmer
Chem 411—ADVANCED QUANTITATIVE ANALYSIS—3 cr. (1 and 6) Mr. Mitchell
Chem 443—RESEARCH PROBLEMS—3 cr. (0 and 9)
Chem 444—RESEARCH PROBLEMS—3 cr. (0 and 9)
Chem 454—INORGANIC SYNTHESIS—2 cr. (0 and 6) Mr. Schirmer
Chem 462—TECHNICAL ANALYSIS—3 cr. (1 and 6) Mr. Mitchell
Chem 472—ORGANIC SYNTHESIS—4 cr. (1 and 9) Mr. Carodemos
Chem 473—ORGANIC MEDICINAL COMPOUNDS—2 cr. (2 and 0) Mr. Dinwiddie
Chem 482—CHEMICAL THERMODYNAMICS—3 cr. (3 and 0) Mr. Hobson
Chem 501—ADVANCED INORGANIC CHEMISTRY—4 cr. (4 and 0)
A study of atomic, crystal and molecular structure and its relationship to Inorganic Chemistry. **Prerequisites:** Chem 401 and 402. Mr. Schirmer
Chem 520—BIOCHEMICAL ASPECTS OF ORGANIC CHEMISTRY—3 cr. (3 and 0)
Discussion of natural products, including vitamins, hormones, etc. **Prerequisites:** Chem 321 and 331. Mr. Dinwiddie
Chem 521—ADVANCED ORGANIC CHEMISTRY—4 cr. (4 and 0)
The object of this course is to give a general survey of organic chemistry with special attention on the general type of organic reactions and important processes. The lectures are supplemented by assigned problems and reports on current organic literature which are discussed during a weekly conference hour. **Prerequisite:** Chem 321. Mr. Dinwiddie
Chem 532—ADVANCED PHYSICAL CHEMISTRY—4 cr. (4 and 0)
An advanced course covering special phases of physical Chemistry such as recent advances in the theory of solutions, chemical kinetics, catalysis and phase equilibrium. **Prerequisites:** Chem 331 and 332. Mr. Hobson
Chem 591—RESEARCH—3 cr.
Chem 592—RESEARCH—3 cr.
CIVIL ENGINEERING

CE 305—ROUTE SURVEYING—3 cr. (2 and 3)  
Mr. Trively

CE 307—ROADS AND PAVEMENTS—3 cr. (2 and 3)  
Mr. Rostron

CE 309—STRESS ANALYSIS—2 cr.  
Mr. Lowry, Mr. J. D. Glenn

CE 310—ELEMENTARY DESIGN—2 cr.  
Mr. Trively, Mr. J. D. Glenn

CE 317—MATERIALS AND METHODS OF CONSTRUCTION—2 cr.  
(2 and 0)  
Mr. Lowry, Mr. J. D. Glenn

CE 401—STRUCTURAL DESIGN—3 cr. (2 and 3)  
Mr. Trively

CE 402—STRUCTURAL ANALYSIS—2 cr. (2 and 0)  
Mr. Trively, Mr. J. D. Glenn

CE 409—REINFORCED CONCRETE STRUCTURES—4 cr. (3 and 3)

CE 410—MUNICIPAL AND SANITARY ENGINEERING—4 cr. (3 and 3)  
Mr. Ford

CE 412—REINFORCED CONCRETE DESIGN—2 cr. (1 and 3)  
Mr. Trively

CE 414—SOIL MECHANICS—3 cr. (2 and 3)  
Mr. Hunter

CE 417—CITY PLANNING—2 cr. (2 and 0)  
Mr. Moss

CE 421—CONTRACTS—2 cr. (2 and 0)  
Mr. Lowry, Mr. J. D. Glenn

CE 452—ADVANCED STRUCTURAL ANALYSIS—2 cr. (2 and 0)  
Mr. Trively

CE 501—ADVANCED STRUCTURAL ENGINEERING—3 cr. (2 and 3)  
A continuation of CE 501.

CE 503—MODEL ANALYSIS—3 cr. (2 and 3)

Methods of determining moments and stresses from a study of models:  
principles of similitude; use of the Beggs deformator.  
Prerequisites: Graduate standing and approval of instructor.

CE 510—HIGHWAY SAFETY AND TRAFFIC CONTROL—3 cr. or 2 cr.  
(3 and 0) or (2 and 0)

Study of highway safety principles affecting the design of city streets  
and rural highways, devices for controlling highway traffic and related  
subjects, and design of traffic signal systems.  
Prerequisite: CE 307.
CE 511—HIGHWAY DESIGN—3 cr. (2 and 3)
Studies of economics of highway grades, location, alignment with road surfaces, and factors that control highway planning. **Prerequisite:** CE 307.

CE 519—HIGHWAY RESEARCH—2 to 4 cr.
Independent investigation of some problems in highway engineering.

CE 520—CONCRETE MIXES AND MATERIALS—3 cr. (2 and 3)
Properties and factors controlling properties of concrete: investigation and selection of materials; mixes and design of mixes; inspection, field laboratory facilities and reports; concrete manufacture; handling, placing and curing; special types; sonic method of testing. **Prerequisite:** CE 409.

CE 531—SOIL ENGINEERING—3 cr. (2 and 3)
Shearing resistance consolidation, settlement, displacement and compaction, pile supporting strength, application of principles to earthwork, foundations and highway problems. **Prerequisite:** CE 414.

CE 591—RESEARCH—3 cr.

CE 592—RESEARCH—3 cr.

**DAIRY**

Dairy 306—MARKET MILK—3 cr. (3 and 0)  
Mr. Goodale

Dairy 309—ANIMAL NUTRITION—3 cr. (3 and 0)  
Mr. King

Dairy 352—ADVERTISING AND MARKETING—3 cr. (3 and 0)  
Mr. Goodale

Dairy 354—ENDOCRINOLOGY—3 cr. (3 and 0)  
Mr. Hurst

Dairy 401—DAIRY MANUFACTURES—3 cr. (2 and 3)  
Mr. Goodale

Dairy 402—DAIRY MANUFACTURES—4 cr. (2 and 6)  
Mr. Goodale

Dairy 405—DAIRY CATTLE BREEDING—3 cr. (2 and 3)  
Mr. LaMaster

Dairy 452—DAIRY CATTLE FEEDING AND MANAGEMENT—3 cr. (2 and 3)  
Mr. LaMaster
Dairy 501—TOPICAL PROBLEMS—1 to 3 cr.
Topics of interest to the graduate students. The course is designed to
give experience with problems in dairying not covered by thesis research.
Credit varies with the problem selected.

Dairy 502—GENETICS OF DAIRY CATTLE IMPROVEMENTS—3 cr.
(3 and 0)
A study of the inheritance in dairy cattle, with emphasis on milk and
butterfat production, methods used in proving sires and dams and in analyzing herds as aids to selection.

Dairy 503—PHYSIOLOGY OF REPRODUCTION AND MILK SECRETION
—3 cr. (3 and 0)
A study of the influence of the endocrine glands on reproduction and
on milk secretion.

Dairy 505—NEWER KNOWLEDGE OF ANIMAL NUTRITION—3 cr.
(3 and 0)
The application of the latest information on digestion, metabolism, and
the nutritional requirements of animals.

Dairy 591—RESEARCH—3 cr.
Dairy 592—RESEARCH—3 cr.

DRAWING AND DESIGNING

DD 460—MECHANICAL VIBRATIONS—3 cr. (3 and 0) Mr. Shigley
DD 461—PHOTOELASTICITY—2 cr. (1 and 3) Mr. Shigley

ECONOMICS AND SOCIOLOGY

To be eligible to obtain graduate credit for one or more courses in
Economics or Sociology the student must have earned at least twelve
semester hours credit for undergraduate work in this field. The student
will schedule courses in this field along with undergraduate students but
will be expected to complete such additional assignments as the instructor
may require.

Econ 412—INTERNATIONAL TRADE—3 cr. (3 and 0) Mr. Trevillian
Soc 405—INDUSTRIAL SOCIOLOGY—3 cr. (3 and 0) Mr. Burtner
Soc 406—REGIONAL SOCIOLOGY—3 cr. (3 and 0) Mr. Burtner
Students desiring to pursue graduate work with a major in the field of Education are expected to have as prerequisite enough work in this field to qualify them for a Class III teachers certificate under the rules of the State Board of Education. Students desiring to minor in this field or to elect one or more courses for graduate credit must have the approval of the Head of the Department in which the work is offered and the Dean of the Graduate School. Students electing courses numbered less than 500 will schedule their work along with undergraduate students but will be expected to complete such additional assignments as the instructors may require.

Candidates for the Master's degree in the School of Education will select a major in Education, Industrial Education or Vocational Agricultural Education. Educ 591 is required for all candidates whose majors are to be in this school. In addition to this course each candidate will be expected to complete one additional course in research. A minor must be completed in some field outside of the School of Education.

Educ 401—METHODS IN AGRICULTURAL EDUCATION—3 cr. (3 and 0)  
Mr. Monroe

Educ 421—COORDINATION METHODS IN VOCATIONAL EDUCATION—2 cr. (2 and 0)  
Mr. Booker

Educ 422—PROBLEMS IN ADULT EDUCATION—3 cr. (3 and 0)  
Mr. Bowen, Mr. Kirkley

Educ 424—TECHNIQUE OF TEACHING—3 cr. (3 and 0)  
Mr. Brock

Educ 432—JOB ANALYSIS AND COURSE CONSTRUCTION—3 cr.  
Mr. Booker

Educ 458—HEALTH EDUCATION—3 cr. (3 and 0)  
Mr. Gentry

Educ 496—PUBLIC AND INDUSTRIAL RELATIONS FOR VOCATIONAL TEACHERS AND SUPERVISORS—3 cr. (3 and 0)

Educ 497—AUDIO-VISUAL AIDS IN EDUCATION—3 cr. (3 and 0)  
Mr. Brock

Educ 501—RECENT DEVELOPMENTS IN THE TECHNOLOGY OF AGRICULTURE—3 cr. (3 and 0)

This course will include a thorough analysis and appraisal of the experimental findings and successful farming practices developed during World War II and in the post war period in the various fields of agriculture. It is designed to bring agricultural workers “up-to-date” in their knowledge and thinking in agricultural technology to the end that they may render more efficient service to rural people. Emphasis in this course will be on crops and mechanization.  
Mr. Monroe
Educ 502—RECENT DEVELOPMENTS IN THE TECHNOLOGY OF AGRICULTURE—3 cr. (3 and 0)
A continuation of Educ 501 with emphasis in developments in animal sciences and agricultural economics. Mr. Monroe

Educ 503—ADVANCED METHODS IN TEACHING—3 cr. (2 and 3)
The principles and practices involved in promoting effective learning will be developed in this course which is planned primarily for assisting experienced teachers who wish to improve their teaching procedures. Creating interest, inducing desired learning activities, causing intelligent use of what is learned, and measuring and evaluating results of teaching will be emphasized. Mr. Stribling

Educ 504—SPECIAL PROBLEMS IN TEACHING VOCATIONAL AGRICULTURE—3 cr. (2 and 3)
This course will be devoted to the analysis, exploration and development of plans for the solution of some of the current problems being encountered by teachers of Vocational Agriculture. Planning adequate programs of work, planning needed buildings, and equipment, securing and training assistant and/or special teachers, promoting cooperative efforts and similar problems will be chosen or assigned for individual and group effort. Mr. Monroe

Educ 505—OCCUPATIONAL GUIDANCE AND PLACEMENT—3 cr. (3 and 0)
The organization and administration of a guidance program for schools of all sizes. A careful analysis is made of methods of interviewing students and counseling techniques involved in guidance. Data are collected on placement and follow-up work. A careful study is made of the needs for guidance in communities near the college. Mr. Monroe

Educ 506—HISTORY AND PHILOSOPHY OF EDUCATION—3 cr. (3 and 0)
This course attempts to study the development of education over the different periods of civilization beginning with Athenian education and tracing the educational movements through the different periods of history with emphasis being placed upon the development of education in the United States. With each period studied attention is first directed to the central features of the social order, the dominant ideology, to the social structure, the classes of economic interest, and to the sources of political power and the formation of political institutions and social arrangements. Educational policies and practices and newer philosophy of American education are given detailed attention. Mr. Booker

Educ 508—EDUCATIONAL TESTS AND MEASUREMENTS—3 cr. (3 and 0)
A study of improved methods and techniques which may be used in the measurement of intelligence, specific aptitudes, and achievement. A survey is made of standardized tests, the sources from which they may be
secured and the purposes which they may serve in classification and/or instruction of students. Emphasis is given to the construction of informal tests of achievement, and to the administration and interpretation of standardized group tests. Practice is provided in the use of standardized group tests. The relationship of time and motion studies to industrial operations is considered.

Mr. Gentry

Educ 509—ANALYSIS OF THE INDIVIDUAL—3 cr. (3 and 0)

Emphasis is placed on the study and use of techniques of discovering the characteristics of individuals. Training experiences are provided in securing, recording, and interpreting significant data as they relate to counseling. **Prerequisites:** Eighteen semester credits in undergraduate and/or graduate professional education, or two years of experience in teaching.

Mr. Gentry

Educ 511—PUBLIC SCHOOL ADMINISTRATION (Finance)—3 cr. (3 and 0)

Sound principles and suitable procedures relating to school administration and finance especially for the size school districts represented by the membership of the class.

Educ 516—HISTORY AND PHILOSOPHY OF VOCATIONAL EDUCATION—3 cr. (3 and 0)

A comprehensive course including the development of vocational education to present time. The influence of European vocational programs on the United States, the Federal Vocational Acts policies. Current problems and trends will be discussed.

Prerequisite: Graduate standing, with teaching experience or at least three courses in Education, instructor's approval.

Mr. Brock

Educ 517—AUDIO-VISUAL AIDS IN TEACHING—3 cr. (2 and 3)

This course will consider the use of audio and visual aids in a school program. Such phases as costs, securing and evaluating of machines, instruments, supplies, films, charts, maps, globes, will be considered. Sound recording, classroom intercom and radio units, and television will be studied and evaluated for educational purposes. **Prerequisite:** Graduate standing, with teaching experience or at least three courses in Education, instructor's approval.

Educ 518—ORGANIZATION AND ADMINISTRATION OF ELEMENTARY SCHOOL—3 cr. (3 and 0)

This course is an approach to the organization of the elementary school in terms of improved situations for administrators, teachers, and students. It deals with the problems of "curriculum design and how that design may be put into practice" in terms of relating needs to those of modern society and the resultant implication for curriculum development. The course will contain a comprehensive discussion of the scope of the elementary principalship and the duties and responsibilities of the principal in improving education.

Educ 520—TEACHING YOUNG FARMERS—3 cr. (3 and 0)

The purpose of this course is to provide training for young farmers establishing themselves in the business of farming. Emphasis will be placed
upon organization, cooperation and private enterprise. Buying and selling on various types of markets will be covered. The uses of governmental facilities for handling goods, credit, communications, and power will be studied. Conservation as a community and individual enterprise will be discussed. Limited number of field trips will be considered. How young farmers may cooperate with younger F.F.A., 4-H Club, and older farmers will be stressed.

Mr. Monroe

Educ 521—ADULT EDUCATION DEVELOPMENT AND ADMINISTRATION—3 cr. (3 and 0)

A critical analysis of the adult education movement and its influence on trade and industrial workers; the applicability of educational practices to industrial training problems; major fields of training in industry; evaluation of unions participation in education programs; psychological approaches to problems in worker-management relations.

Mr. Booker

Educ 525—SUPERVISION OF STUDENT TEACHING—3 cr. (3 and 0)

In this course major emphasis is placed upon the following: (1) developing a point of view or philosophy of teacher education; (2) analyzing the present teacher training program in South Carolina, to discover problem situations that may be used as a basis for teacher education programs; (3) determining the relative emphasis for each teacher to place upon the solution of the problems in the teacher-education program; (4) projecting plans for an apprentice training program, and (5) supervising apprentice training in the state.

Educ 530—TECHNIQUES OF SUPERVISION—THE PUBLIC SCHOOLS—3 cr. (3 and 0)

This course is designed for teachers, principals, and superintendents who are interested in improving, coordinating, and evaluating problems. Trends will be studied.

Educ 561—ADMINISTRATION AND SUPERVISION OF VOCATIONAL EDUCATION—3 cr. (3 and 0)

The expanding program of vocational education under the George-Barden Act and problems on national, state and local levels will be discussed. Major specific problems in unit trade programs, out-of-school youth, selection and training of teachers, veteran training and others will be covered.

Mr. Booker

ECE 436 – RADIATION AND WAVE PROPAGATION – 3 cr. (3 and 0) Mr. Long

ECE 501 – ADVANCED ELECTRIC TRANSIENTS – 3 cr. (2 and 3)
A study of linear electrical systems using Laplace transformation to
determine transient as well as steady state responses. Emphasis will be
placed on operational calculus to solve integral-differential equations of
the system.

ECE 511 – ELECTRIC POWER STATIONS – 3 cr. (3 and 0)
A comprehensive study of station lay-out, generating equipment, ex-
citers, transformers, meters, switching and protective devices. Economical
arrangement and operation are emphasized.

ECE 513 – POWER SYSTEM STABILITY – 3 cr. (3 and 0)
A course designed to provide the student with the basic theory of both
steady state stability and transient stability and their applications to sys-
tem and apparatus design.

Mr. Tingley
EE 514—POWER SYSTEM STABILITY—3 cr. (3 and 0)
A continuation of EE 513. Mr. Tingley

EE 520—ULTRA-HIGH FREQUENCY TECHNIQUES—4 cr. (3 and 3)
Applications of conventional tubes at high frequencies, characteristics of the magnetron and velocity modulated tubes. Cathode ray tubes and circuits, applications of transmission lines, wave guides and cavity resonators. Prerequisite: EE 432 or the equivalent. Mr. Long

EE 521—RADIATION AND WAVE PROPAGATION—3 cr. (3 and 0)
An advanced study of electric fields, vector analysis, Maxwell's equations and their use in the study of wave guides, radiation and wave propagation. Mr. Long

EE 591—RESEARCH—3 cr.
EE 592—RESEARCH—3 cr.

ENGLISH

To be eligible to receive graduate credit for courses in English the student should have at least six semester hours undergraduate credit in English literature above the sophomore level. Graduate students will schedule courses with undergraduate students but will be expected to complete such additional assignments as the instructor may require.

Hort 301—PRINCIPLES OF VEGETABLE PRODUCTION—3 cr. (2 and 3) Mr. Garrison
Hort 306, 308—ELEMENTARY LANDSCAPE DESIGN—3 cr. (2 and 3) Mr. Thode
Hort 401, 403—LANDSCAPE DESIGN—3 cr. (2 and 3) Mr. Thode
Hort 402, 404—GARDEN DESIGN—3 cr. (2 and 3) Mr. Thode
Hort 405—NUT CULTURE AND SPRAYS—3 cr. (2 and 3) Mr. Sefick
To be taught in 1953-1954 session.
Hort 415—FLORICULTURE—3 cr. (2 and 3) Mr. Thode
Hort 451—SYSTEMATIC POMOLOGY AND SMALL FRUIT CULTURE—3 cr. (2 and 3) Mr. Musser
Hort 452—COMMERCIAL POMOLOGY—3 cr. (2 and 3) Mr. Musser
Hort 455—BREEDING HORTICULTURAL CROPS—3 cr. (2 and 3) Mr. Garrison
To be taught in 1954-1955 session.
Hort 456—TRUCK CROPS—3 cr. (2 and 3) Mr. Garrison
Hort 460—ADVANCED LANDSCAPE DESIGN—3 cr. (2 and 3) Mr. Thode
Hort 464—FOOD PRESERVATION—3 cr. (2 and 3) Mr. Van Blaricom
Hort 466—RESEARCH METHODS—3 cr. (2 and 3) Mr. Senn
Hort 501—PROBLEMS IN SMALL FRUIT PRODUCTION—3 cr. (2 and 3) Mr. Sefick
This course involves a study of selected problems encountered in the production of blueberries, strawberries, brambles and grapes. **Prerequisite:** Hort 451.

Hort 503—ADVANCED VEGETABLE CROPS—3 cr. (3 and 0)
This course involves a systematic study of sources of information and practices with emphasis on the application and handling of vegetable crops. **Prerequisite:** Hort 456.
Mr. Garrison
Hort 505—FOOD TECHNOLOGY—3 cr. (1 and 6)
The course includes quality control methods and equipment such as special titrations, taste panels, refractometers, succulometers, tenderometers, and colorimeters; the role of sugars, salts, acids, and chemical preservatives in foods; quality grade standards, and special problems. **Prerequisites:** Bact 301, 303, Hort 464. 
Mr. Van Blaricom

Hort 507—ADVANCED POMOLOGY—3 cr. (2 and 3)
A study of the growth and development of deciduous fruits with most emphasis on the peach and apple. **Prerequisite:** Hort 452. Mr. Musser

Hort 591—RESEARCH—3 cr.
Hort 592—RESEARCH—3 cr.

**INDUSTRIAL ENGINEERING**

In En 402—METALLURGY—3 cr. (2 and 3) Mr. Freeman

**MATHEMATICS**

Math 302—THEORY OF EQUATIONS—3 cr. (3 and 0) Mr. Armstrong
Math 303—STATISTICS—3 cr. (3 and 0) Mr. Sullivan
Math 304—STATISTICS—3 cr. (3 and 0) Mr. Sullivan
Math 305—INTERMEDIATE CALCULUS—3 cr. (3 and 0) Mr. Brewster
Math 306—ORDINARY DIFFERENTIAL EQUATIONS—3 cr. (3 and 0) Mr. Miller, Mr. Brewster
Math 307—ELEMENTARY PARTIAL DIFFERENTIAL EQUATIONS—3 cr. (3 and 0) Mr. Kelly
Math 451—VECTOR ANALYSIS—3 cr. (3 and 0) Mr. Miller
Math 453—ADVANCED CALCULUS—3 cr. (3 and 0) Mr. Coker
Math 454—ADVANCED CALCULUS—3 cr. (3 and 0) Mr. Coker
Math 501—PARTIAL DIFFERENTIAL EQUATIONS—3 cr. (3 and 0)
This course contains analysis theory which has wide application in applied mathematics and the allied fields of physics, engineering, and chemistry. The topics include orthogonal functions, Fourier, series, Bessel functions, Legendre polynomials, Strum-Liouville systems, etc.
Math 502—DETERMINANTS AND MATRICES—3 cr. (3 and 0)
This course should be of benefit to students who plan to do further graduate work in mathematics, engineering or physics. Some of the topics included in the course are determinants, polynomials and forms, transformations, system of linear equations.
Math 503—THEORY OF FUNCTIONS OF COMPLEX VARIABLES—3 cr. (3 and 0)

This is a basic course in analysis which has wide application in applied mathematics and allied fields. This course should be of interest primarily to mathematics and physics majors and possibly to engineering majors if they plan further study. The topics in the course include differentiation and integration of analytic functions, power series, residues, contour integration, analytic continuation, and conformal mapping.

Math 504—THEORY OF FUNCTIONS OF COMPLEX VARIABLES—3 cr. (3 and 0)

A continuation of Math 503.

Math 591—RESEARCH—3 cr.

Math 592—RESEARCH—3 cr.

ME 501—ADVANCED AIR CONDITIONING—3 cr. (3 and 0)
An analysis of the principles of air conditioning. The following topics are among those covered; enthalphy of air-vapor mixtures; adiabatic mixtures of air with water, steam or ice; fogged air; adiabatic saturation; air in contact with water; fundamental simultaneous and fundamental successive conditioning processes; humid air below 32 degrees F.; geometry of the psychrometric chart. A critical analysis of current literature on special topics. **Prerequisites:** ME 429, 430, 431, and 432. Mr. Watson

ME 510—ADVANCED THERMODYNAMICS—3 cr. (3 and 0)
This course supplements and extends the material covered in elementary thermodynamics. Special topics relative to advanced problems in engineering are pursued. **Prerequisites:** ME 311, 312, 411, 412, and registration in Math 306. Mr. Watson

ME 521—INTERNAL COMBUSTION ENGINE—3 cr. (3 and 0)
Internal combustion process analysis, deviation from the ideal processes, detonation, and knock testing, carburetion and fuel injection, combustion chamber and cylinder head design, engine cooling, mechanics of principle moving parts, engine vibration and balance and engine design. Mr. Lewis

ME 522—INTERNAL COMBUSTION ENGINE—3 cr. (3 and 0)
A continuation of ME 521. Mr. Lewis

ME 523—INTERNAL COMBUSTION ENGINE LABORATORY—1 cr. (0 and 3)
Analysis of engine instrumentation, air-fuel ratio tests, detonation limited power test, injection and analysis with test apparatus, fuels testing and general test codes. Mr. Lewis

ME 524—GAS TURBINES—3 cr. (3 and 0)
Gas turbine process analysis, deviation from the ideal process, fuels stratification, efficiencies, pressure ratio, including the development of charts for cycle analysis. Mr. Lewis

ME 532—APPLIED HEAT TRANSFER—3 cr. (3 and 0)
The application of heat transfer to several engineering problems pertaining to the design of heat transfer equipment such as boilers, condensers, evaporators, and air preheaters. **Prerequisites:** ME 312, 411, 412 and registration in Math 306. Mr. Watson

ME 591—RESEARCH—3 cr.

ME 592—RESEARCH—3 cr.
MECHANICS AND HYDRAULICS

Mech 401—FLUID MECHANICS—3 cr. (3 and 0)

Mech 403—FLUID MECHANICS LABORATORY—1 cr. (0 and 3)

Mech 460—HYDROLOGY—2 or 3 cr. (2 or 3 and 0)

Mech 462—WATER POWER ENGINEERING—2 or 3 cr. (2 or 3 and 0)

Mech 464—FLOW IN OPEN CHANNELS—2 or 3 cr. (2 or 3 and 0)

Mech 502—SPECIAL TOPICS IN MECHANICS OF MATERIALS—3 cr. (3 and 0)

A study of the general state of stress, strain-energy methods, theories of failure, indeterminate problems in bending, curved bars, dynamic stresses, plates and problems of elastic stability. Prerequisites: Mech 304 and graduate standing.

Mech 504—DYNAMICS—3 cr. (3 and 0)

A development of more advanced methods of analysis of problems in dynamics with emphasis on practical solutions. Topics are systems with variable mass and variable forces, shaking forces, balancing, vibration, gyroscopes and models. Prerequisites: Mech 303 and graduate standing.

Mech 506—FLUID MECHANICS II—3 cr. (3 and 0)

A comprehensive study of the principles of fluid flow and the application of the principles to practical engineering problems. Among the topics considered are fluid velocity and acceleration, significance of the flow net, pressure distributions, viscosity, surface tension, compressibility, boundary layer and circulation and magnus effect. Prerequisites: Mech 401 and graduate standing.

Mech 508—FLOOD CONTROL—3 cr. (3 and 0)

A study of the hydrology of floods and the engineering considerations relating to their control. Topics considered in the scope of control measures are economic justification, types of control structures, and survey of flood control measures on major streams in the U. S. Prerequisites: Mech 460 and graduate standing.
Mech 512—HYDRAULIC PROJECTS—3 cr. (3 and 0)

This course is devoted to the detailed investigation of engineering problems in hydraulics and related fields. Application of theoretical principles developed in previous courses is emphasized. Subjects include: Spillway and stilling basin; reservoirs; inserted siphons. Prerequisites: Mech 460, 464; must be accompanied or preceded by Mech 506.

Mech 591—RESEARCH—3 cr.

Mech 592—RESEARCH—3 cr.

PHYSICS

Graduate students majoring in Physics are normally expected to take at least two of the following three courses as a part of their graduate program; Physics 521, 541 and 542. Students majoring in this field are required to demonstrate a reading knowledge of one modern foreign language. It is suggested that these students select a minor in Mathematics, Chemistry or one of the branches of Engineering.

Phys 301—INTRODUCTION TO MODERN PHYSICS—3 cr. (3 and 0) Mr. Miller

Phys 312—HEAT AND KINETIC THEORY—4 cr. (4 and 0) Mr. Lindsey

Phys 314—EXPERIMENTAL HEAT—1 cr. (0 and 3) Mr. Lindsey

Phys 321—MECHANICS AND PROPERTIES OF MATTER—4 cr. (4 and 0) Mr. Huff

Phys 323—EXPERIMENTAL MECHANICS—1 cr. (0 and 3) Mr. C. A. Reed

Phys 432—LIGHT—4 cr. (4 and 0) Mr. Crawford

Phys 434—EXPERIMENTAL LIGHT—1 cr. (0 and 3) Mr. Crawford

Phys 441—MAGNETISM AND ELECTRICITY—4 cr. (4 and 0) Mr. C. A. Reed

Phys 443—EXPERIMENTAL ELECTRICITY—1 cr. (0 and 3) Mr. C. A. Reed

Phys 452—ATOMIC AND NUCLEAR PHYSICS—3 cr. (3 and 0) Mr. Lindsey

Phys 471—ELECTRON MICROSCOPY—3 cr. (2 and 3) Mr. Crawford

Phys 511—THERMODYNAMICS—3 cr. (3 and 0)

A study of the laws of the thermodynamics entropy and properties of pure substance, engine cycles, the applications of thermodynamics to various systems and applications to chemical systems. Mr. Miller
Phys 512—KINETIC THEORY AND STATISTICAL MECHANICS—3 cr. (3 and 0)
A development of the kinetic theory of gases including derivations of relationships between molecular diameters, distribution of velocities, mean free paths, viscosity, thermal conductivity, specific heat, entropy, probability and reaction kinetics. The basic concepts of statistical mechanics for classical and quantum systems will be developed. Mr. Lindsey

Phys 521—DYNAMICS—3 cr. (3 and 0)
A study of the more advanced phase of dynamics including the equations of Lagrange and Hamilton, generalized coordinates, oscillatory and cyclic motion and Newtonian potential theory. Mr. Crawford

Phys 541—ELECTRODYNAMICS—3 cr. (3 and 0)
This course starts with Maxwell’s equations for electric and magnetic fields and includes consideration of production and propagation of electromagnetic waves, wave optics and theories of interference and diffraction. Mr. C. A. Reed

Phys 542—RADIATION THEORY—3 cr. (3 and 0)
The production and propagation of electromagnetic waves are studied using Maxwell’s equations as a starting point. Discussion of wave guides, diffraction phenomenon, and boundary effects are included. An introduction to the theory of electrons and microscopic phenomenon will be given. Mr. Crawford

Phys 551—INTRODUCTION TO QUANTUM MECHANICS—3 cr. (3 and 0)
An introductory course formulating the mathematical physical ideas associated with wave mechanics. Solution of simple physical systems including the hydrogen atom are discussed. Prerequisites: Phys 301 and Math 306. Mr. Huff

Phys 552—THEORY OF ATOMIC SPECTRA—3 cr. (3 and 0)
A study of the excitation of spectra, computation of wave lengths from spectral photographs, the computation of energy levels and the correlation with theories of atomic structure. Mr. Huff

Phys 553—NUCLEONICS—3 cr. (3 and 0)
This course is designed to give the basic properties of and the experimental methods employed in the study of particles associated with the nucleus. A survey is made of the theories so far advanced for the interaction of these particles and the theories pertaining to the structure of simple nuclei. Mr. Huff
Phys 566—RELATIVITY—3 cr. (3 and 0)
This course is intended to give a survey of the special and general theory of relativity including tensor calculus, the Lorentz transformation and the three experimental tests of the general theory: (1) planetary motion and the advance of the perihelion of Mercury (2) the bending of light rays in gravitational field and (3) the gravitational shift of spectral lines.

Phys 591—RESEARCH—3 cr.

Phys 592—RESEARCH—3 cr.

POULTRY

PH 451—POULTRY BREEDING—3 cr. (2 and 3) Mr. Morgan

PH 452—POULTRY FEEDING AND FLOCK MANAGEMENT—3 cr.
(2 and 3) Mr. Morgan

PH 455—POULTRY GRADING AND PROCESSING—3 cr. (2 and 3) Mr. Cooper

PH 456—INCUBATION AND BROODING—3 cr. (2 and 3) Mr. Cooper

PH 459—POULTRY DISEASES AND PARASITES—3 cr. (2 and 3) Mr. Cooper

PH 460—SEMINAR—2 cr. (2 and 0) Mr. Morgan, Mr. Cooper

RURAL SOCIOLOGY

RS 454—FARMERS' MOVEMENTS—3 cr. (3 and 0)

RS 459—THE RURAL COMMUNITY—3 cr. (3 and 0)

RS 461—RURAL LEADERSHIP—3 cr. (3 and 0)

RS 501—RURAL SOCIAL SYSTEMS—3 cr. (3 and 0)
A course designed to provide the advanced student with a brief review of the basic working concepts of rural sociology and a knowledge of the basic institutions of rural life and to acquaint the student with the techniques used in applying scientific methods and theory toward understanding the social structure of rural life. Prerequisite: Permission of the instructor and 12 hours of social studies, at least three hours of which must be in the field of sociology.

Mr. Boyd
TC 410—COLOR MATCHING AND TESTING—1 cr. (0 and 3)
Mr. Lindsay, Mr. Langston

TC 447—THE CHEMICAL PROCESSING OF TEXTILE MATERIALS—
3 cr. (3 and 0)
Mr. Lindsay

TC 449—TEXTILE CHEMISTRY LABORATORY—1 cr. (0 and 3)
Mr. Lindsay

TC 452—THE CHEMICAL PROCESSING OF TEXTILE MATERIALS—
4 cr. (4 and 0)
Mr. Lindsay

TC 454—TEXTILE CHEMISTRY LABORATORY—1 cr. ((0 and 3)
Mr. Lindsay

TC 455—CELLULOSE CHEMISTRY—3 cr. (3 and 0)
Mr. Langston

TC 456—CHEMISTRY OF SYNTHETIC FIBERS AND FINISHES—3 cr.
(3 and 0)
Mr. Langston

TC 511—THE THEORY AND APPLICATION OF SYNTHETIC RESINOUS MATERIALS—3 cr. (2 and 3)
The aim of the course is to give the student a comprehensive survey of the history, present utility, and probable future expansion of synthetic resins. Prerequisite: TC 306 or Chem 222.

TC 512—THE THEORY AND APPLICATION OF SYNTHETIC RESINOUS MATERIALS—3 cr. (2 and 3)
A continuation of TC 511.

TC 521—ADVANCED CELLULOSE CHEMISTRY—3 cr. (3 and 0)
The purpose of the course is to present the chemistry of cellulose and closely related polysaccharides, through a systematic study of the extensive volume of research which has been completed on these substances. Prerequisite: TC 306 or Chem 222.

TC 531—CHEMISTRY OF COLORING MATTERS—3 cr. (2 and 3)
The work of this course consists of an advanced study of coloring bodies in their major forms, as dyes, pigments and lakes. Their structure and formulation for use is covered in detail with the chief emphasis being placed on the more complex forms, such as the vat colors and insoluble azo compounds. Prerequisite: TC 452.

TC 591—RESEARCH—3 cr.

TC 592—RESEARCH—3 cr.
TEXTILE MANAGEMENT

TM 403—TEXTILE MANAGEMENT—3 cr. (3 and 0)  Mr. Richardson

TM 460—NATURAL FIBERS—3 cr. (3 and 0)  Mr. Heyn

TM 462—TEXTILE MICROSCOPY—2 cr. (1 and 3)  Mr. Loveless

TM 464—PHYSICAL TEXTILE TESTING—2 cr. (1 and 3)  Mr. Brown, Mr. Wray

ZOOLOGY

Zool 301—ADVANCED ZOOLOGY—3 cr. (2 and 3)  Mr. Ware

Zool 302—VERTEBRATE EMBRYOLOGY—3 cr. (2 and 3)  Mr. Ware

Zool 402—ANIMAL PHYSIOLOGY—3 cr. (2 and 3)  Mr. Farrar

Zool 403—PROTOZOOLOGY—3 cr. (2 and 3)  Mr. Boykin

Zool 502—HISTOLOGICAL TECHNIQUES—3 cr. (1 and 6)
   The fixing, staining, sectioning, and identification of all tissues, glands, and organs of animals. Prerequisites: Zool 101, 103.  Mr. Ware

Zool 503—ANIMAL ECOLOGY—4 cr. (2 and 6)
   A comprehensive study of animals in relation to their natural environment. Typical animal habitats are visited to study the animal life and the ocean, shore, lakes, streams, swamps, cultivated fields, woodlands and mountains.  Mr. Wamhoff

Zool 504—ORNITHOLOGY—3 cr. (2 and 3)
   The identification, life history and ecology of birds. Field trips, work with bird specimens and correlated reading will give the student a working knowledge of at least 100 species of the common birds.  Mr. Wade, Mr. Ware

Zool 556—ECONOMIC ZOOLOGY—3 cr. (2 and 3)
   A study of all phylla (exclusive of class insecta) to include those animals either beneficial or destructive to man. Prerequisites: Zool 101, 103.

Zool 591—RESEARCH—3 cr.

Zool 592—RESEARCH—3 cr.
