The Honorable Board of Trustees
Of The Clemson Agricultural College.

Gentlemen:

Just five years ago I had the honor of appearing before the Board of Trustees to read a report, a part of which was prepared by the late President Riggs, and part by myself. I was acting at that time at his request, though reluctantly, in order that he might go to France and do an important work there. I felt that he thought he should go, and that it would do the college honor to have him do so. Because of my personal friendship for him, and of my interest in the college, I consented to act for him while he was away. Those were troublous times, and the college has gone through much since then from the standpoint of the student body. I am glad to say that under the guiding hand of our late President, and due in part to the much more settled conditions generally, things are now on a much more rational plane.

Looking at Dr. Riggs' death from our human standpoint, it seems that as far as the interest of the college is concerned, a no more inopportune time could have been found for the passing of him who gave so unstintingly of his time, his energy, his intellect - in fact of himself - and who had so much to give. He has left an impress on the college which can never be obliterated. But this is no time for a eulogy, and unnecessary, as he was so greatly admired and loved by
every member of this Board. No doubt you will arrange
for a suitable memorial exercise at some future time.

The legislature also passed the Bond Issue for

**Legislation:**

Before taking up matters of legislation affecting
the college, acknowledgment should be made of the diligence
and ability shown by Mr. Barnette in the House, and by
Senators Cooper and Johnstone in the Senate, in looking
after the interests of the college. The attitude of the
General Assembly of 1924 was quite friendly, as evidenced
by the favorable acts which were passed, and by the un-
favorable ones which were killed. No doubt a better knowledge
of the work of the college derived from the visit of so many
of the legislators to the college at the invitation of Dr.
Riggs, and from the work of the Extension Division, has had
much to do with this attitude.

A complete list of the legislative appropriations
made by the last General Assembly is as follows -

<table>
<thead>
<tr>
<th>Service</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>For extension service</td>
<td>$110,862.85</td>
</tr>
<tr>
<td>For tick eradication</td>
<td>20,000.00</td>
</tr>
<tr>
<td>For livestock sanitary work</td>
<td>50,000.00</td>
</tr>
<tr>
<td>For agricultural research</td>
<td>50,000.00</td>
</tr>
<tr>
<td>For crop pest commission</td>
<td>10,000.00</td>
</tr>
<tr>
<td>For slaughter diseased livestock</td>
<td>4,000.00</td>
</tr>
<tr>
<td>For boll weevil laboratory</td>
<td>25,000.00</td>
</tr>
<tr>
<td>For collegiate maintenance</td>
<td>91,813.14</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$361,675.99</strong></td>
</tr>
</tbody>
</table>

In addition, expenditures from other sources to the
amount of $306,584.49 for public service, and $290,687.37
for collegiate work, were authorized, making a total of
$958,947.85.

With regard to our debt to the State Treasurer, the
legislature authorized and directed the State Treasurer to
cancel all loans made to Clemson College, amounting in all to $251,557.90.

The legislature also passed the Bond Issue for buildings at the state institutions. The total amount of the issue is $10,000,000, but only $8,000,000 is to go to the buildings at state institutions, the other $2,000,000 to be a loan to state high schools.

Only $2,000,000 is to be available the first year, and $1,000,000 per year thereafter for six years. The disposition of the proceeds of the bond issue, if it is approved by the voters, is left with the legislature. It seems to me that one of the greatest tasks we have before us is with the assistance of the other state institutions, through the alumni and other means, to put the needs before the voters of the state in such a way as to insure the passage of the measure. With its passage we at Clemson have an equally great obligation to compile the proper information and be prepared to present our case to the legislature in such a way as to insure our getting an equitable part of the fund.

The Fertilizer Bills:

As usual, certain bills were introduced in the legislature pertaining to fertilizer. The Heyward Bill proposed that many ingredients be prohibited as sources of ammonia. This bill was withdrawn.

Mr. Williams introduced a bill to prohibit the use of any cyanamide, wool waste products, shell meal, leather products or nitrogenous material. This bill was killed.

Mr. Williams also introduced a bill corresponding to the law in North Carolina, and this bill was passed. The bill states in effect that materials used in the manufacture and mixing of all fertilizers supplying
nitrogen or ammonia shall be divided into two classes, mineral and organic, and the percent of nitrogen or ammonia from each of these classes shall be guaranteed with certain variable allowances, - also that where there is a contract that fertilizers will be made by use of certain definite sources and amount of ammonia and potash, this must be done without substitution, subject to penalty for violation. I hope that we may have no trouble, but it is not always possible to determine the source. Authorities in North Carolina say that they have had no trouble so far, but agree that the source cannot always be determined.

The Work of Instruction:

The semester plan inaugurated last year has worked well, and I hear no complaints from either faculty or students. The general opinion seems to be that it is quite as satisfactory, as the old three-term system, if not more so. Under the new plan, we have only two semesters during the session.

The rule requiring those who are hopelessly deficient to go home at the end of the first semester has worked well. Not only has it stimulated many to do better work, but it has eliminated from the sections some who were doing no good in their classes, and who were a real menace to the progress of the others in the section.

Post-Graduate Work:

We have three men taking post-graduate work in Education. To two of these, Cadets P. H. Hobson and M. L. McHugh, will be awarded the M. S. degree in June.
Entrance Requirements:

Gradually the requirements for entrance have been raised, but always with the idea of not eliminating the boys coming from the rural districts. We had for a long time the preparatory department, but in 1913-14 the number in this department dwindled to only forty-seven. It was therefore decided to discontinue this department, especially since the school officials looked with disfavor on it, claiming that we were competing with secondary schools. Because of the preparatory department, we also lost some material who were advised to attend a college of higher standard. In 1914-15, the year following the abolition of the preparatory department, only twenty-two freshmen had completed the eleventh grade, or 7.2% of the class, - 60% had completed the tenth grade and 12% only the ninth grade.

Last year, 1923-24, 220 new students had completed the eleventh grade, or 66 of the freshman class, this being 15% over the preceding year. We can probably count on from eighty-five to ninety percent of the freshmen next year coming from four-year high schools accredited by the State Department of Education.

Our work should be arranged for the accommodation of the majority as in 1914-15, but now it should be based on the completion of the average four-year high school.

Of the 1914-15 freshmen, only 25% were promoted to the sophomore class with clear records. Last session, when 50% of the freshmen came from accredited high schools, nearly 50% were promoted to the sophomore class with clear records. Also, many more of the better prepared students remain in college. In June 1915 we graduated 32% of the freshman class entering four years previous, and in June 1924 we are expecting to graduate 55% of the freshman class who
entered in September 1920.

If we have our freshman class composed of four-year high school graduates, or the equivalent as found by examinations, it will enable the faculty to start the new students in work of real college grade and enable Clemson to become a member of the Southern Association of Colleges and Secondary Schools. It will also entitle our graduates to the same privileges as are enjoyed by graduates from other standard institutions.

For some years we will be confronted with the problem of how best to deal with boys from communities not having accredited high schools. This is more of a problem since so many of them do not wish to take agriculture. The average boy from small rural schools is not now able to do creditable work in the freshman class, especially in the engineering course. At the end of the first semester of the current session, 30% of the freshmen furnished 60% of the grade below a pass, and this 30% represents the students from the small rural schools.

This class, if they take agriculture, can now be placed in the second year of the two-year agricultural course, and possibly take one freshman subject, requiring five years to graduate. If secondary schools continue to improve, these problems will solve themselves in the next few years.

Death of President Riggs and Prof. Sease:

The sudden death of President Riggs on the night of January 22, 1924, in Washington, D. C., is so fresh in the memory of all members of this Board, that it is unnecessary for me to give details. The Board appreciates the loss
sustained by his death, both as the head of the institution and as a personal friend to every member, as much or more than any of us who have labored with him for many years, and to such a high degree have cherished his personal friendship.

Prof. L. A. Sease died very suddenly on the night of December 12, 1923. He was apparently as well as usual up until an hour before his death, when he suffered an attack of acute indigestion. At the time of his death he was the oldest living graduate of the college, and a member of the first graduating class of Clemson. Before election to the faculty, he was for a number of years a state member of the Board of Trustees. He was elected to the faculty as head of the preparatory department. After the abolition of this department, he was given the position of Assistant Professor of English, which position he was holding at the time of his death.

Prof. Sease had been in very bad health for several years, and his death was not a great shock to the community.

In my recommendations, I shall ask that money be appropriated to erect memorial tablets both to Dr. Riggs and to Prof. Sease in the college chapel.

Education of Disabled Soldiers:

We shall soon complete our present contract for the training of disabled soldiers. President Riggs, on the day before his death, wrote the authorities in Atlanta outlining a basis for renewal, and the only basis on which he would consider a renewal of the contract. On account of the small number of sub-collegiate men taking training, the cost per man will be so increased that the Bureau is not willing to
renew the contract as outlined by Dr. Riggs, and acquiesced in by me. We would lose money on any other basis. Therefore, it is not likely that we shall have any of these trainees with us after June 30th, with the exception of the few in our regular college classes pursuing some one of the regular courses. The government will pay the regular fees for these men, and I think there will be no difficulty in having them continue that arrangement until these men complete their courses. Most of the men taking the regular courses are good students, and I hope nothing will transpire to cause them to lose the opportunity of continuing and completing their college course.

Student Life and Interests:

I am glad to note an indication of more earnestness on the part of most of the students than was in evidence during and just after the war. This is surprisingly true this year, when so many of the parents of the state are in better financial condition than during the year or more preceding.

I hope that there is a greater spirit of cooperation on the part of the students than has been evidenced in the past. I am glad to be able to report that there was not a single evidence on the first day of April to indicate that that day was different from any other. Col. Pearson and I both talked with the Senior Class, and with their cooperation, as well as with that I believe of the entire corps, we passed this day most happily for all concerned - especially for those of us who have been at Clemson for many years, and have seen the great sadness caused many homes, and the great hurt done to the college, by the probably
thoughtless acts of a few leaders in the corps of cadets.

Col. Pearson says -

"The conduct of the corps as a whole has been the best during my service here, though there have been more trials by the Discipline Committee and recommendations of the Commandant than last year."

Five cadets were required to withdraw during the first semester, and so far during the second semester, two, on account of excess of demerits.

The Health of the Corps:

We have had this year a siege of measles and mumps, beginning with the return of the students from the Christmas holidays. With not a case of measles did we have the common pneumonia which so often follows this disease. We have had a larger number of cases of mumps than usual, but none very serious. We seem to have a return of these epidemics every three or four years.

Recently we had a case of scarlet fever to develop in the barracks, - Cadet Whetstone of North, S. C. He was promptly isolated in the hospital and quarantine imposed. Since no further cases developed within a week, which is supposed to be the incubation period, the quarantine was lifted and no further cases have occurred. With the exception of these epidemics and the one case of scarlet fever, the health of the corps has been good.

Athletics:

Coach W. D. Saunders seems to have made a good impression on every one. He is quiet and gentlemanly, and judging from the results of the football season, is a first-class coach. His methods were new, but in spite of this he turned out a team which won from all state teams, and showed up well with teams on the outside. The basketball
season was not successful, but here again his tactics were new, and there was a lack of good material.

The Teaching Work of the College:

The teaching work of the college has been quite satisfactory. A few men were required to leave college at the end of the first semester, but on the whole the grades have been up to the average. In spite of the epidemic of measles and mumps after the Christmas holidays, the work of the first semester was good. Had it not been for the large number of I's on account of time lost, the percent of E's and S's would have been greater than for last year.

The percentage of students in the agricultural courses is 40%. There are sixty-one men in the two-year agricultural course as compared with thirty-six in last year's one-year course, which tends to show that this two-year course will be more popular than was the one-year course.

This two-year course is a dual purpose course, and enables us to continue to receive country boys not yet ready for the freshman class.

The Cadet Mess:

The price of table board has been kept at $16.00 ever since it was reduced from $17.00 a year or more ago. The price of many articles is higher than when the reduction was made. We shall, however, keep the board at the same price for the remainder of this session, although it may be necessary to go back to $17.00 next session.

Uniforms:

The new uniform coat with turn-down collar has been
quite satisfactory and very popular with the students. This style collar has been adopted by a number of the colleges. Last year the whipcord was allowed for the juniors and seniors who desired it. It seems to have been quite popular and has given good service. Col. Pearson thinks that this is one of the first years the boys have been willing to wear the uniforms when going away from the campus.

New Toilets:

The new toilets in the new addition to barracks and the north wing to Barracks No. 1 were completed for the opening of the present session, or at least so that they could be used, and have proved quite satisfactory. The toilet on the south wing of Barracks No. 1 is practically completed, and the old building will be torn down as soon as practicable. Work will be begun on the Barracks No. 2 toilets at an early date. We will then have all toilets in good condition, which will be quite a relief to us and a saving in the use of water.

Need of Additional Barracks:

The indications are that there will be ninety more students in college at the close of the session in June, 1924, than in June 1923. This means ninety less places in barracks to be filled by new students. At the beginning of this session, 947 cadets were assigned to rooms. The capacity with two to a room, is 862. Figuring on the usual basis, there should be 630 old students to return. Of the total enrollment, 1,057, there were 42 special U.S. V. B. trainees whose work will be discontined. A large number
of these did not live in barracks. If we keep our enrollment to 1,050, we would have to admit 420 new students, or a total of 198 with three in a room. We would probably have no difficulty in getting this number who are prepared to enter. It would be a pity to lose our stand as the largest college for men in South Carolina.

Fiscal Affairs:

On March 28, 1924, the fertilizer tax was $196,473.00, as compared with $154,000.00 on the same date last year, and $108,000.00 the year before. Mr. Stackhouse and I estimate that it will run to $212,000.00 which is almost exactly 25% more than the figure for last year. Yesterday, April 22nd, the receipts totalled $212,140.00.

As was the policy last year, our requested legislative appropriation of $91,813.14 was applied entirely to salaries, which will apply to the last half of this fiscal year and the first half of next fiscal year. As of last year, the budget in June should be designed so that there will be no balance on December 31, 1924.

I understand that the legislature voted to change the state fiscal year from the calendar year to the form we have used, and that used also by the federal government - namely July 1st to June 30th. This will certainly simplify matters, as the present arrangement of having two budgets, one for each year, is a very complicated affair, and probably understood by few people.

Extension Service:

I have no special report to make on the work of the
extension division. The work has gone forward about as usual.

At the November 2nd, 1923, meeting, the Board gave the President authority, upon recommendation of the Director of Extension, to increase the salary of specialists to a limit of $3,250.00, without waiting for Board action. Acting upon this permission, I have increased the salaries of the following members of the extension service, effective January 1, 1924. Mr. Long stated that he had talked the matter over fully with President Riggs, and felt sure that the late President would have permitted the increases. The increases are as follows:

R. W. Hamilton - From $2,800 to $2,700
D. D. Whitcombe - From $2,800 to $3,000
S. L. Jeffords - From $2,750 to $3,000
I. D. Lewis - From $2,250 to $2,450
W. J. Keegan - From $2,400 to $2,600
C. A. Owens - From $1,800 to $2,250
L. H. Lewis - From $2,800 to $3,000
C. C. Cushman - From $2,250 to $3,000

Agricultural Research:

The usual $50,000 was passed by the legislature for this work, and in addition $25,000, the same as last year, for boll weevil control. A preliminary report on the work of last year was gotten out and issued during January as Bulletin #31. Director Barre states that this received very favorable comments by the press and by a great many agricultural workers. Dr. N. E. Winters left our service in January. A number of men were considered for his position, but those we desired, declined. Prof. Barre finally succeeded in securing Dr. George W. Armstrong of Washington University, St. Louis, Mo. Dr. Armstrong graduated from Clemson in 1914. After graduation, he was in our employ as graduate assistant.
in our Botany Division, working on the cotton shedding project. From here he went to Auburn as Extension Pathologist. At the close of the war he went to St. Louis and received his doctor's degree at the Shaw Botanical Gardens, which is closely connected with Washington University. He has since been doing research work at the Gardens and teaching Botany at Washington University.

In this department poison work with weevils will be conducted much as it was last year.

At the Florence Station, the office building to be used in connection with the boll weevil work has been completed.

Report of the State Board of Health:

As usual the college was inspected by the State Board of Health represented by Mr. E. L. Filby, Sanitary Engineer, and Dr. A. H. Hayden, Epidemicologist. The report is so highly complimentary and so brief that I am sure the Board would be interested in hearing practically all of it. You will note that all recommendations made last year were carried out where practicable to do so.

"With the Health Officer of this Institution, Dr. George D. Heath, I made a thorough inspection of every department of this college, finding marked improvements in several departments, and everything on the whole in a most satisfactory condition, for which the faculty and heads of all departments should be commended as having done practically their best in every way for the health and comfort of the student body. The health of this body, which I understand to be composed within the past year of about 1,100 students, has been remarkably good, no cases of sickness having occurred within the past year, with the exception of one case of pneumonia, which occurred some months ago, and a case of typhoid fever which is at present sick in the hospital. As was noted last year, the hospital is too small and inadequate for the purposes of the college but is kept in excellent condition. I would again call attention, however, to an 'open fireplace' in the operating room, which should be at once closed as it is, for obvious reasons, a menace. It is needless as the room is steam heated. The
idea that the danger of this fire place lies in the possibility of infectious material entering the room through the chimney, and this fire place opening seems not to have been grasped except by the surgeon in charge.

Toilets: Relative to these, it is a very great satisfaction to report that the entire suggestions made by me last year to the faculty have been accepted, and there are now about completed very much enlarged toilet arrangements in the college buildings, in all of which the bathing equipments have been very much improved and the old and antiquated toilets in use for the past number of years, ('saddle and oval') have been thoroughly abandoned, and new crescent toilet seats adopted as standard for all toilets in use by the institution.

Garbage cans referred to in last year's report as standing in the open without covers have been done away with and all garbage cans are housed in concrete structures with tight fitting doors and covers absolutely fire-proof, and garbage is removed daily in covered cans to the place of final disposition.

Barracks generally were in a cleanly condition, but not very attractive so far as the hallways were concerned. My inspection was made toward the close of the day and it seems that the students persistently and insistently litter these hallways with debris, mostly paper, which gives them an unattractive appearance.

Class Rooms: It is pleasing to note that all conditions in these rooms which were desired improved have during the past year been given attention, and are now in excellent condition throughout. The class in which physics is taught was especially noticeable for immense improvements in these respects.

Y.M.C.A. Building is in excellent condition, indicating care in its keeping. This includes all departments - living rooms, bed rooms, cafeteria, etc.

Dairy Barns were in their usual excellent condition.

Milk Room and utensils very much improved and in very satisfactory condition in every way. It should be noted that the milk room has been increased in size at least 300% and milk improvements added, such as cream sterilizer, cooling tank, modern wash basins, etc. These additions and improvements are in process of accomplishment and will be completed by December 1, 1923.

Hog Barns: Everything about these barns and premises was in excellent condition.

Barber Shop in excellent condition.

Mess Hall, as usual in splendid condition of cleanliness. Everything about this Hall seems to receive the greatest care, and everything needed and desirable seem to be supplied for the comfort, convenience and health of the students.
The Kitchen, Pantry, Commissary and Laundry are all in 'spick and span' condition as reported last year, and are attractive in every way.

The Hotel is in well kept condition and clean in every respect and in all departments. Stops about the doors, in some instances, were conspicuous by their absence, and in others were not adequate for the reasons for which they were desired. It is absolutely impossible to keep the kitchen free from flies on account of cracks in the floors, which vary from 1/2" to 3/4", rendering the screening of the kitchen practically of no value.

The Veterinary Hospital is in excellent condition, the bakery and butcher shop being practically 100%.

The Creamery has had proper screenings placed and is in every respect in very excellent condition, protection against flies having been rendered as nearly perfect as possible.

Miscellaneous Items.

Board of Visitors:

I would remind the Trustees that at this meeting the Board of Visitors for 1924 must be selected. The Board meets on the first Wednesday in May, which fortunately this year is on the 7th, this giving a little time in which they can be notified. There is one member to be selected from each congressional district. For the convenience of the Trustees, I have indicated the counties in each of the districts -

1st District - Berkeley, Charleston, Clarendon, Colleton, Dorchester.

2nd District - Aiken, Allendale, Bamberg, Barnwell, Beaufort, Edgefield, Hampton, Huger, Saluda.

4th District - Greenville, Laurens, Spartanburg, Union.

5th District - Cherokee, Chester, Chesterfield, Fairfield, Kershaw, Lancaster, York.

6th District - Darlington, Dillon, Florence, Georgetown, Horry, Marion, Marlboro, Williamsburg.

7th District - Calhoun, Lee, Lexington, Orangeburg, Richland, Sumter.
Below you will find a list of the Boards of Visitors invited for the past three years. This list may be of some help to you in suggesting names of others who have not been at the college in official capacities during recent years.

1921 Board of Visitors

1st District - T. S. McMillan - Charleston
2nd District - R. B. Cunningham - Allendale
3rd District - J. B. Park - Greenwood
4th District - B. E. Geer - Greenville
5th District - John R. Hart - York
6th District - John W. McKay - Dillon
7th District - J. H. Clifton* - Sumter

* Deceased

1922 Board of Visitors

1st District - Robert Lathan* - Charleston
2nd District - C. E. Seigler - Aiken
3rd District - S. J. Derrick - Newberry
4th District - A. F. McKissick - Spartanburg
5th District - J. Lyles Glenn, Mr. Chester
6th District - J. S. Thompson - Dillon
7th District - W. W. Ball - Columbia

* Accepted but prevented from attending meeting.

1923 Board of Visitors

1st District - Robert Lathan - Charleston
2nd District - J. L. Mims - Edgefield
3rd District - Eugene S. Blease - Newberry
4th District - C. O. Hearn* - Spartanburg
5th District - William Godfrey - Cheraw
6th District - Dr. Olin Sawyer - Georgetown
7th District - Christie Benet** - Columbia

* Accepted but prevented from attending meeting.

** Declined - no one appointed to his place on Board.

Editorial From Columbia State:

I quote below from an editorial appearing in the Columbia State during the fall of 1923, thinking this may be of interest to those who may not have noticed it.
"Questions & Answers:

Many and various are the questions put to Clemson College by farmers, home gardeners, cattlemen, poultrymen and pet stock breeders of South Carolina. These questions are assigned to specialists and are always answered promptly, practically and with full knowledge and consideration of South Carolina conditions.

Advice given in response to these applications is periodically sorted over for The State and set out in articles compiled for the farm page, which is a Tuesday fixture of the newspaper. No reading matter published on the useful page is more compact of helpfulness and The State recommends to its readers that these occasional articles be given more than casual scrutiny.

Clemson, by the way, might be much more extensively utilized in this way than it is. Its great accumulation of tested and readily accessible information is at the service of its public, and the large staff of experts at its command is held instantly responsive to any special need. If any farmer anywhere in South Carolina has a problem, Clemson's counsel is his at the price of a postage stamp."

Textile Committee:

Last fall Dr. Riggs had a conference with a committee of the Cotton Manufacturers' Association of South Carolina, Mr. J. D. Hammett, Chairman, in regard to the future development of our Textile Department. The result of the conference was that the Committee should appear before the Board at its March meeting, with such plans and suggestions as it might care to lay before you for consideration. Upon assuming the Acting Presidency, I wrote to Mr. Hammett regarding this matter. He replied in effect that after Dr. Riggs' death, his committee conferred with Mr. B. E. Geer, and decided to defer appearing before the Trustees until the college's affairs were placed on a settled and permanent basis. He stated that the committee had decided to postpone their recommendations after Dr. Riggs' death until a permanent president were elected, feeling that you should not be worried with new matters during this period of a temporary president. He stated that at the meeting of the Cotton Manufacturer's Association in April, they would likely
discuss the matter further, and take it up at a later date with the Clemson Trustees. I was greatly shocked and distressed to hear the news of Mr. Hammett’s sudden death just a few days ago, following immediately on the adjournment of the Cotton Manufacturer’s Association meeting. We have as yet heard nothing from the association as to its plans and suggestions, and presume they will take these up at a later date, as outlined by Mr. Hammett in his letter to me.

Deaths of Dr. Redfern, Prof. Shields, Mrs. S. M. Bradley and Mrs. D. H. Sloan:

During this college session, Clemson has been saddened many times by death, not only in our own number, but by the passing of those who have been members of our official family in the past, or closely associated with us.

It is with deep regret that I call attention of the Board to the death of Dr. A. M. Redfern in Charlotte, N. C. on December 5, 1925. Dr. Redfern was with the college as Surgeon from its opening until September 1, 1920, when he retired to private life in Charlotte. Probably no man has ever been at Clemson who is as well known to so many students as was Dr. Redfern. He was not only very successful as a physician, but was an all-round fine man, and showed great tact in getting along with the students. I am sure the Board would like to pass some resolutions, and possibly place a memorial tablet in his memory in the college chapel.

Just about a month ago we received news of the death of Prof. R. L. Shields in Salem, Virginia, after an illness extending over a period of many months. Prof. Shields was for several years Professor of Animal Husbandry in our Agricultural Department.
On November 26, 1923, Mrs. S. M. Bradley, the aged mother of one of your number, Mr. W. W. Bradley, and of one of our best beloved professors, Mr. M. E. Bradley, died after several weeks' illness. Her husband had been for a number of years a life trustee of Clemson, as is also Mr. W. W. Bradley.

On December 3, 1923, Mrs. D. E. Sloan died very suddenly at her home just on the outskirts of the campus. Although having no official connection with the college, Mrs. Sloan and her family have lived at Clemson since the founding of the college. Mr. Sloan died a good many years ago, and since then Mrs. Sloan has lived in her old home with her two daughters, Miss Jean Sloan and Mrs. J. T. Foy. Miss Sloan is one of the assistants in the Registrar's office, and Mr. Foy a chemist in the fertilizer inspection work. I report Mrs. Sloan's passing to you, knowing that all of the older trustees especially are interested in any change at the college.

Expiration of Col. Pearson's Detail in June:

Col. Madison Pearson's detail as Commandant of Cadets and Professor of Military Science and Tactics expires with the close of the present session in June. In his reports to you for the last year or two, Dr. Riggs has given his opinion of Col. Pearson, and I agree heartily with this. I believe I have never seen a more loyal officer in any capacity. His motives are always good, and under his administration of discipline, we have gone along very smoothly. Col. Pearson is very popular in the community, and we regret very much that he has to leave. Col. Pearson is our second Catholic Commandant, and I am sure that the Board will be interested in the following testimonial which I have received from the four Protestant ministers and the Y.M.C.A.
Secretary regarding his cooperation in religious matters. I might mention that Col. Cummins, also a Catholic, had the same high compliment paid him by the local ministers when he left Clemson three years ago.

This testimonial regarding Col. Pearson was sent to me to be forwarded to the War Department, and is as follows -

"TO THE UNITED STATES WAR DEPARTMENT:

Whereas, Major Madison Pearson, the present Commandant of Clemson Agricultural College completes his period of appointment June, this year:

We, the ministers of the churches at said college, wish to express to him and to the War Department our commendation of him as an officer and as a gentleman. Major Pearson has cooperated with us gracefully in the work which it was our duty and privilege to perform for the students, faculty and officers of the college. We have appreciated and enjoyed his friendship. It is a pleasure for us to express to Major Pearson our good wishes for the future."

Signed:

John D. Holler......Methodist Church
Geo. C. Gibson......Baptist Church
John McSween.......Presbyterian Church
P.B.Holtzendorff,Jr.Gen. Sec. Y.M.C.A.
Geo. E. Zachary.....Episcopal Church

Lieutenant-Colonel O. R. Cole will be detailed as the Commandant for next year. He comes highly recommended by the War Department, and also by Col. Cummins, who was our Commandant for six years. He is forty-seven years of age, a Protestant, member of the Methodist Church, is married and has two children.

Col. Cole has had twenty-six years experience in the army service in all grades from private to colonel; is a graduate of the Line Class of the General Service Schools, and expects to graduate from the Command and General Staff School at Leavenworth in June. Under the present law he is available for four years detached service. He is available for our service after June 20th, but we have asked
the Commanding General of the Fourth Corps Area to allow him to attend Camp McClellan this summer. We feel that he will gain much valuable information by being in touch with our students in camp before accepting the detail. He will likely report to duty here about the middle of August, which will give ample time for him to become acquainted with our detail. Col. Pearson kindly offered to return for a week in September to assist him with certain routine work, and we have requested the Adjutant General of the Army to permit this.

Clemson Meeting of the Agricultural Commission of American Bankers Association:

On March 20th we had at the college a meeting of the Agricultural Commission of the American Bankers Association. The national officers present were Mr. D. H. Otis, Director of the Agricultural Committee of the Association, and Mr. J. Elwood Cox of High Point, N. C., a member of the same commission. There were also present about a dozen prominent bankers of the state association. We had a very interesting meeting, and I trust an instructive one to all concerned.

The purpose of this meeting was to discuss agricultural affairs, and to prepare an agricultural program for the state for 1924. During the morning of March 20th, our delegates and visitors inspected the agricultural department, the experiment station office, and the extension division. In these departments the teaching equipment was inspected, demonstrations in boll weevil investigation and soil fertility investigations were given, and demonstrations in diversification of crops and marketing.

At the afternoon session, both Mr. Otis and Mr. Cox made short addresses regarding the nature and purpose of the conference. Mr. H. R. Johnson, Chairman of the
Agricultural Commission of the South Carolina State Bankers' Association, responded in behalf of the state association. Short talks were made by Dr. F. H. H. Calhoun on "Need of Agricultural Leadership," by Prof. Barre on "State Program of Agricultural Research," and Dr. Long on "Discussion of State Agricultural Program, and how Bankers can Assist in Putting it Over."

The following program was adopted for the State of South Carolina for 1924 - this program to be submitted to the State Bankers' Association at its meeting in April -

"Pushing of the Purnell Bill to Passage."
"Support of State Program of the County Agents."
"Adoption of Extension Program for Diversified Agriculture."
"Adoption of Program for Boys and Girls Club Work."

Despite the bad weather, about fifteen bankers, including the national officers, came to the conference. All seemed very much pleased with the meeting. Had it been possible, an inspection tour of the farm and college grounds would have been made at the adjournment of the meeting, but this was impossible on account of the heavy rains.

Salaries:

It is my understanding that at the November meeting of the Board, Dr. Riggs was requested to prepare certain figures regarding salaries at other colleges throughout the country, and especially in the southern States. Not having been present at the discussion of this question, I have not been sure as to the information desired. However, I have on the blackboards a statement of comparative salaries at this and other colleges throughout the sixty-four similar colleges in the United States, and special reference to the southern colleges of like grade. I invite your attention to this, and shall be glad for a full
discussion. Dr. Riggs went so fully into the question of salaries at previous meetings of the Board, that you are familiar with his opinions and plans along this line. I imagine, however, that few changes will be made now, but that these will be reserved for the June meeting.

Organisation of an Engineering Experiment Station:

Only recently was I aware of the fact that Dr. Riggs had expected to present definite plans to the Board at this meeting for the organisation of an Engineering Experiment Station at Clemson. I knew of his deep interest in this organisation and his desire that Clemson should have an engineering experiment station as soon as practicable. I have written to various colleges for information, but have not been able to get this information into definite shape to present at this meeting. I trust that you will allow me to wait until the next meeting of the Board, when I shall have been able to compile these facts obtained in definite form. It is very important, I think, that Clemson be the college in the state to have this station, and at the June meeting we expect to have something definite to suggest.

Telephone System:

I am glad to report that the Southern Bell Telephone Company completed the installation of their system and put this in operation on December 28, 1923. This is a great convenience, and a relief to the people over the state. In addition to the phones in the various officers, there is located in the guard-room a regular phone, and also a pay station. A number of the faculty and citizens of the community have phones in their residences, as have also the
local stores. The service is also extended to the railway station at Calhoun. There has been practically no time that we have not been able to get local or long distance service.

The New Chapel:

It was President Riggs' idea to begin the new chapel and have it completed by Commencement. He had requested Prof. Lee to prepare plans and present to him, but unfortunately Prof. Lee was not able to complete these before Dr. Riggs' death.

In order to reduce the cost of the building, it was suggested that the addition be only 45 feet wide, as compared with 60 feet, the present width of the chapel.

However, I felt that this would be unwise, and after consultation with Prof. Lee decided to make the width 69 feet. The chapel when enlarged will accommodate about two hundred additional people, and will present a much more attractive appearance both on the inside and on the outside.

Had it been only 45 feet wide, there would have been no way of enlarging it in the future.

At present we shall have no gallery at the north end of the auditorium, but I have requested Prof. Lee to design this so that one can be built at some future time if desired.

The present arrangement will seat about 1,800 people. I felt that it should accommodate more than 1,500 people, which is the size of the student body we are preparing for at the present time. The difference in size will accommodate the people in the community at Lyceum entertainments, visitors at Commencement, etc.
My recommendations and suggestions will follow as a part of this report.

Under authority of the by-laws, the following actions have been taken, and your approval of the same is asked.

Respectfully submitted,

1. **RESIGNATIONS**:

I have accepted

S. B. Earle, Acting President.

2. **APPOINTMENTS**:

The following appointments for one year or less have been made:

**Agricultural Department**:

C. O. Zeddy, "associate Professor Entomology and Associate Entomologist." (New position); Salary $2,400; Effective December 1, 1933 to June 30, 1934.

B. A. Russell, "Agricultural Farm Economics." (Dating Mr. Jensen's leave of absence); Salary $1,500 per month; Effective March 1 to September 1, 1934. (To be paid from Jensen's salary).

**Academic Department**:

John W. Coker, "Instructor in English." (Taking some of Prof. Scaife's work); Salary $1,800 per term; Effective January 1 to June 30, 1934.

**Extension Division**:

D. H. Hall, Jr., "Poultry Husbandry." (Successor R. R. Smith, resigned); Salary $2,150; Effective January 1 to June 30, 1934.

**Military Department**:

Fred Spencer, "Level Loader." (Successor L. S. McCall); Salary $400 per month; Effective January 1 to June 30, 1934.

B. F. Dixon, "Campus Marshall." (Successor R. Miller); Salary $1,000; Effective February 1 to June 30, 1934.
RECOMMENDATIONS.

PERSONNEL:

Under authority of the By-laws, the following actions have been taken, and your approval of the same is asked:

1. RESIGNATIONS:

- I have accepted the following resignation:
  - Extension Division:
    - F. L. Harkey, "Chief, Division of Markets," Salary $3,000; Effective June 30, 1924.

2. APPOINTMENTS:

- The following appointments for one year or less have been made:
  - Agricultural Department:
    - C. O. Eddy, "Associate Professor Entomology and Associate Entomologist," (New position); Salary $2,400; Effective December 1, 1923 to June 30, 1924.
    - B. A. Russell, "Assistant in Farm Economics," (During Mr. Jensen's leave of absence); Salary $125.00 per month; Effective March 1 to September 1, 1924. (To be paid from Jensen's salary.)
  - Academic Department:
    - John W. Coker, "Instructor in English," (taking some of Prof. Sease's work); Salary $1,800 per annum; Effective January 3rd to June 3rd, 1924.
  - Extension Division:
    - D. H. Hall, Jr., "Poultry Husbandman," (Succeeds N. R. Mehrhof, resigned.) Salary $2,750; Effective January 1 to June 30, 1924.
  - Military Department:
    - Fred Spencer, "Band Leader," (Succeeds L. P. McCall); Salary $450p600; Effective January 7 to June 30, 1924.
    - E. F. Dixon, "Campus Marshall," (Succeeds L. Miller); Salary $1,000; Effective February 1 to June 30, 1924.
3. SECOND PROBATIONARY YEAR:

The following officers having satisfactorily completed approximately one year of service, I recommend that they be elected to their second probationary period -

<table>

MISCELLANEOUS:

6. I recommend the following -

(a) That the salary increase of Mr. E. E. Hall from $2,750 to $3,000 made at the last meeting of the Board to become effective May 1st, 1924, be made effective January 1st, 1924.

(b) That the title of Item 21, Sec. a of the budget for 1924, "Toilet and Sewage Disposal, $1,000," be changed to read "Electric Line to Station and Small Changes in Office Building, $1,000."

(c) That the action of President Riggs in granting leave of absence to Mr. W. C. Jensen, Assistant in Farm Economics, from February 23rd to June 7th, without pay, in order that he may complete his course for his doctor’s degree at the University of Wisconsin, be approved.

(d) That approval be given my action in permitting the Chemistry Department to employ a temporary assistant for three months to enable them to keep up with the fertilizer work.

(e) That approval be given the action of President Riggs in granting Mr. J. H. McHugh, Engineer at the Power Station, leave with pay from February 1st to February 25th, on account of sickness.

(f) That Prof. G. P. Hoffman, Associate Professor of Horticulture, be given a leave of absence from September 1, 1924 to September 1, 1925, without pay, in order that he may take graduate work at Cornell University.

(g) That a resolution be passed by the Board authorizing the expenditure, at the discretion of the Director and the President, of any unexpended balance in the Federal and State Budgets.
(h) That Prof. J. M. Johnson, Associate Professor of Forge and Foundry, be granted a year's leave of absence, dating from September 1, 1924 to September 1, 1925, in order to do work along the same line he is teaching at Clemson.

(i) That at Dr. W. K. Lewis's request, certain changes be authorized in the rules and regulations for the control and eradication of contagious and infectious diseases of animals within the state of South Carolina. These requests of Dr. Lewis are designated as Exhibits A, B and C respectively, and are attached to and made a part of this report. (In Exhibits A and B, Dr. Lewis has requested the signature of each member of the Board, if approved, as he thinks he may need this in the prosecution of violations of the quarantine.) (See exhibits attached; also "Laws and Revised Rules and Regulations").

(j) That Section 100 of the By-laws, page 43, be amended by striking out the words - "and be its executive officer."

7. At Dr. Long's request, I recommend -

(a) That he be allowed to expend from the Extension Interest Fund $1,000 for a handbook for the Extension Service.

(b) That $300.00 from the Interest Fund be added to Item 3 of Interest Fund Budget to cover emergency expenditures that cannot be paid from regular Smith-Lever Funds.

(c) That Dr. Long be allowed to expend $175.00 from the Interest Fund for certain song books for club boys.

8. At Dr. Long's request, I recommend that a new position in the Extension Division be created effective January 1, 1924 to
June 30, 1924, known as "Credit Union and Mutual Fire Insurance," and that Dr. W. H. Mills, who has been filling the same position in government work, be transferred to this position.

9. At Dr. Long's request, I recommend that the position of Prof. J. L. Carbery, Extension Agronomist, which was to have been discontinued after January 1st, 1924, be continued through June 30, 1924.

10. I recommend that permission be given to change the broadcasting station from Class C to Class B, and that the Extension Division be allowed to expend $500.00 for making the necessary change.

11. I recommend that the title of Item 23, "Radio Operator," (part salary) be changed to "Salary Operator and Operating Expenses, $500.00."

12. I recommend (a) That the report of the State Board of Public Welfare making recommendations in cases of cadets who have applied for free tuition, be adopted. (This matter was not brought up at the Board meeting in November.)

(b) That the ruling of the State Board of Public Welfare in the case of Cadet S. E. Harmon, recommending free tuition, be adopted.

(c) That the action of the State Board of Education in sustaining appeals and granting free tuition to the following who were marked "Pay by State Board of Public Welfare," be adopted.

<td>$600.00</td>
</tr>
<tr>
<td>(m) Band instruments</td>
<td>$107.95</td>
</tr>
</tbody>
</table>

Total: $10,130.93
SUGGESTIONS.

I bring to the attention of the Board, without recommendation, the following matters -

1. The selection of the Board of Visitors, (one from each Congressional District.)

2. Development of the faculty cemetery, and rules governing its use.

3. A suitable memorial to Dr. Riggs.

4. Gallery at north end of the chapel extension.

5. Seating of the chapel.

6. Location of our next barracks.

7. Salaries.

8. Memorial to Dr. A. M. Redfern.

9. Housing of the faculty - additional houses or apartments.
EXHIBIT A.

EFFECTIVE ON AND AFTER

Under the authority conferred upon the Board of Trustees of Clemson Agricultural College by the provisions of the Acts of the General Assembly of the State of South Carolina, it is ordered, that the Laws and Revised Rules and Regulations for the Control and Eradication of Contagious and Infectious Diseases of Animals within the State of South Carolina promulgated, adopted and effective on and after May 1, 1914, and as amended March 1, 1916, be, and the same are hereby revised in the following particulars:

By repeating Rule 4, adopted May 1, 1914, as amended March 1, 1916; and Rules 5 and 6, adopted May 1, 1914.

By modifying Rule 7, by striking out the words "Rule 4, Paragraph 1, and Rule 5, Paragraph 1," in lines 2 and 3, Paragraph 1, and the words "4 and 5" in line 2, Paragraph 2, so that the said Rule so modified shall read as follows:

RULE 7.

Paragraph 1. Cattle moving under the provisions of Rule 2, Paragraph 1; Rule 3, Paragraphs 1 and 2, when inspection, disinfection and certification are required under the supervision of a duly authorized cattle inspector, if the shipment is made by rail or boat, the original written permit shall be attached to the waybill and accompany the shipment to destination, and the duplicate forwarded to the Inspector in Charge. The cattle shall move within twelve hours after the final disinfection, and if shipped, shall be loaded through cleaned and disinfected pens and chutes into cleaned and disinfected cars or boats, that have been cleaned and disinfected by the shipper or transportation company, under the supervision of a duly authorized cattle inspector.

Paragraph 2. Notice of a desire to move cattle under the provisions of Rules 2 and 3 shall be given a sufficient time in advance to the Inspector in Charge, or duly authorized cattle inspector, to direct, inspect, disinfect and permit the movement.

Done under our hands and seals this ___ day of ______, A.D., 1924.

(Signatures of Trustees)
EXHIBIT C.

REGULATION GOVERNING THE IMPORTATION OF CATTLE AND SWINE, FOR BREEDING PURPOSES, INTO THE STATE OF SOUTH CAROLINA.

Paragraph 1. All cattle and swine, six months of age and over, before entering the State of South Carolina, if for purposes other than immediate slaughter, same shall pass a negative blood test for infectious abortion, (agglutination or complement fixation), made by a Federal, State or commercial laboratory. Tests will not be accepted if made on female cattle or swine in less than 15 days following abortion or normal parturition, or more than three weeks prior to movement in to the State of South Carolina.

Paragraph 2. Each animal shall be ear tagged, or otherwise permanently marked for identification, and the health certificate must show the date of the test and name of laboratory making same. If test is made by a commercial laboratory, the original report must be approved by the proper livestock sanitary official of the State of origin and attached to the copy of the health certificate sent to the State Veterinarian of South Carolina by the Veterinarian who issues the health certificate. Health certificates must be issued in duplicate, the original to be forwarded to State Veterinarian, Columbia, South Carolina, and the duplicate attached to the transportation company's waybill and accompany the shipment to destination.

Paragraph 3. No person, firm, corporation, or transportation company shall move or transport, in any manner, cattle or swine into the State of South Carolina except in accordance with the requirements contained in paragraphs 1 and 2.

Paragraph 4. Cattle moving in violation of requirements contained in paragraphs 1 and 2 will be quarantined and tested at the owner's expense, and any reactors found will be tagged or branded for identification and quarantined upon the owner's premises.

Paragraph 5. Violations of this Regulation will be prosecuted for a misdemeanor.

Effective on and after June 1, 1924.
