Bees & Beekeeping Display

September 2016

Bees & Beekeeping Display

**Photograph taken by Micki Reid,
Cooper Library Public Information Coordinator**

September is National Honey Month

“Clemson’s new beekeeper, Jennifer Tsuruda, is part of a worldwide effort to identify honeybee behavior and genes that appear to make some bees better groomers than others. The good groomers are better at ridding their bodies and hives of *Varroa* mites, which can wipe out the honeybee colonies that help put food on our tables.

‘Pollinators are involved in producing one third of the food we eat,’ Tsuruda says. ‘Bee research is a matter of food security—national security.’”

- Kent, Peter. “Tidy Bees are Healthy Bees.” *Glimpse*, Fall 2014, pp. 7.

Display Description

September is National Honey Month and Dr. Jennifer Tsuruda, Clemson University's Extension apiculture specialist, is the Libraries' Researcher of the Month. With this in mind, we have curated a display centered on bees and beekeeping.

Titles have been pulled from our main collection, juvenile collection, and DVD collection and include works such as [*Bees in America: How the Honey Bee Shaped a Nation*](#), [*Honey Bees*](#), [*Letters from the Hive*](#), and [*More than Honey*](#).

The display is located on the top of the New Books Shelving on the 4th floor of Cooper Library.
