It is surprising how little knowledge many Americans have of their own history. A recent survey of 700 colleges and universities, including 600,000 students, showed that 28 per cent did not require American history courses. Of the 700 schools, 72

We must return to the inspiring, untold and untaught story of our

American ideals and the ample growing into our textbooks. There has been far too much

use of the "dumbing down" technique, by which American heroes are

mutilated, and American ideals are explained away by false theories.

In recent years, too many schools, foreign ideas have been creeping into our textbooks. This will require

accurate, factual textbooks telling the simple, glorious story of

American Liberty. One of the best methods by which we may educate our

own people in the fundamentals of democracy is to offer good

courses. On the opposite, they will bear study. Americans have been

not only the outside world, but our own children, may see them and

know them.

On the surface, these statements may appear to be

too prone to forget the ideals which have made their freedom possible.

The other is to demonstrate, beyond the possibility

of communism, the advantages offered by the democratic way, as

of democracy.

is a very simple one: They believe that the individual exists to serve the State. We believe that the State exists to serve the individual. It is as simple as that, and yet it represents the difference between human slavery and human freedom.

Of all the people who ever lived, only about 3 per cent have known real freedom. Americans are free because we have developed a philosophy of respect for the individual, under a government that functions by and with that individual's consent. It is a creed of individual enterprise. Some call it capitalism; some private enterprise. Whatever you call it, our system is one which permits the maximum development of creative energy in the man.

As such, it is in direct opposition to Communism, under which the State is the supreme master over the lives of its citizens.

Under pure Communism:

The government has absolute power over all the people, and over all means for producing wealth.

No one can own any property.

No one can choose his own work, or strike against his boss.

Everyone is forced to save--but for the State, not for his family.

There are no churches, and a belief in God is forbidden.

There is no freedom of speech, freedom of the press, or freedom of assembly, and trial by jury is abolished.

to nearly \( 2,000,000 \) a year in the U. S. The soviet people before
conditions of slavery under which the Soviet worker exists:

"A Russian belongs to his job. He and his family usually sleep in an apartment which his factory owns. He probably eats in his factory dining room, food raised on his factory's farm. His children attend a day nursery which it maintains. They play games and go to the movies in its culture palace, and they go on vacations, when it can spare them, on trains which it designates, to resorts and workers' rest homes which it controls."

And just let that poor worker step out of line, and he is shipped off to the forced labor camps, perhaps to die quickly of exposure or starvation. Estimates vary as to how many Russians are now enslaved, but W. L. White estimates that there are 14,000,000.

By contrast with the slave-like condition of the working man in Russia, the American people, with less population than many other countries, have created more wealth and distributed it more evenly than any nation at any time.

We have more and better churches, schools, libraries, hospitals, and recreational facilities than any other people. We have done more than any other people to eliminate child labor practices, and to eliminate back-breaking drudgery. We have gone further in spreading literacy, enlightenment on
health, and general well-being than any others.

The American college graduate going out into the world today to make his own way will enjoy more benefits than a citizen of any other country on earth. For the American people, with only 7 per cent of the world's population, own 85% of the world's automobiles, 60% of the world's life insurance, 54% of the world's telephones, 48% of the world's radio sets, 46% of the world's electric power capacity, 35% of the world's railway mileage, 30% of the world's improved highways, and 92% of the world's modern bathtubs.

These figures are enough to convince any college-trained American that opportunities are greater under our system of free enterprise than under any other way of life the world offers.

Unfortunately, however, very few Americans have taken the trouble to learn the facts about the Communist system as compared with the American system. Many Americans have listened eagerly to the lies that the Communists are spreading. We do not know how many Americans have been won over. A few of the facts are known. A recent survey made of one large company's employees showed that 24% of them
believed the industry would be better off under government
ownership, and that 9% of the employees thought it would fare
just as well under government ownership.

American Communists are now openly defying our
government. You have read the statement of the Negro singer,
Paul Robeson, in which he said that American Negroes would
not fight Russia. Some other Communists have been equally
frank.

It must be taken for granted that the majority
of those who fall for the siren appeals of the Communists, do
so for one of two reasons: Either because of ignorance, or
because they hope to become one of the few bosses who will
rule America if the Reds should take over.

One of the latter type is William Z. Foster,
head of the conspiracy known as the "Communist Party of the
United States." Here is what Foster predicts for America:

"Under the dictatorship, all the capitalistic parties—
Republican, Democratic, Progressive, Socialist, etc.—will be
liquidated, the Communist party functioning alone as the party
of the toiling masses. Likewise will be dissolved all the
other organizations that are political props of the bourgeois
rule, including chambers of commerce, employers' associations,
Rotary clubs, American Legion, Y.M.C.A., and such fraternal
orders as the Masons, Odd Fellows, Elks, Knights of Columbus, etc." That is what Communist Foster thinks he can do to America.

This is just so much silly talk; but I am convinced that Americans should be on guard against those forces which seek to undermine our form of government and our way of life. We must educate our young people in the ideals of Americanism and demonstrate to them the superior advantages offered by democratic governments, and above all, inculcate into them a deeper appreciation of what it means to be free.

We are a sovereign people under God; we must so conduct ourselves. As one old-time Speaker of the House of Representatives said:

"If the people are indeed to be sovereigns, they must exercise their sovereignty over themselves.... imposing upon themselves....the discipline of virtue, in place of the discipline of slavery."

A grave responsibility for leadership and preserving the sovereignty of our people and destroying any threat of communism rests upon the shoulders of our trained men and women. They, more than anyone else, should bear the leadership against the spreading threat of communism in the world today.
As an educated person, today's college graduate has greater opportunities in America than any man ever had before in history. But along with those opportunities goes the challenge of a great obligation—a duty to oppose the spread of totalitarian philosophy, and human slavery, whether it is found beyond our borders or within our own country.

America's future, to a large extent, rests with her college men and women. They constitute our most fortunate class in American society. They cannot, they must not, they will not, let America down.
