

75-31
STATEMENT OF SENATOR STROM THURMOND FOR TELEVISION, MARCH 13, 1958.

I have introduced a bill to provide a tax credit of \$100 for a taxpayer who is a college student, or for a taxpayer who has a dependent in college.

This bill would ease the tremendous financial burden that goes with sending a son or daughter to college. It would also help our teachers in the college work they do during the summer season.

Another very important aim of this bill is to encourage our young people to seek education beyond the high school level. This is a much simpler way to promote college training than through a scheme of Federal scholarships, which would probably be costly and difficult to administer.
