STATEMENT BY SENATOR STROM THURMOND (D-SC) WITH REFERENCE TO THE ANNOUNCEMENT OF THE PENDING LOCATION OF FIBERGLASS PLANT IN AIKEN, SOUTH CAROLINA.

The selection of South Carolina for the location of another Fiberglass plant is of great significance in the State's continued industrial development.

The Fiberglass Company is no stranger to South Carolina, having operated a plant in Anderson for a number of years. Already, they are acquainted with the cooperative attitude and friendly feelings of the people of our State. The splendid service rendered by the workers of South Carolina at their Anderson plant has undoubtedly been instrumental in their decision to locate an additional plant here.

Mr. Boeschenstein, the president of the Fiberglass Corporation, located the Anderson plant in our State while I was Governor. He is an able and outstanding industrialist and a fine person. We are indeed fortunate to obtain another of the type of plants operated by his company. We welcome this new plant to South Carolina and wish for it the greatest success.
