Faculty Meeting

March 6, 1944

A dinner meeting of the faculty together with the Experiment Station and Extension Service staffs was held in the College Mess Hall at 6 P.M. with Dr. Poole, acting for the college, as host. The occasion was one of good fellowship and a very enjoyable and delightful dinner was served.

After the meal Dr. Poole talked informally about several matters of interest to those present. Among other things he pointed out that no man during this emergency had been graduated from Clemson without meeting the curriculum requirements of his prescribed course; seniors in good standing and in the armed services are eligible for their class rings; the Clemson Alumni Corporation has started a movement to obtain funds to educate the sons and daughters of Clemson men killed in the service of their country and that this fund was now well over $18,000; the new browsing room in the Library Building has recently been completed and is being well utilized.

Dr. Poole commended Professors J. D. Lane and B. E. Goodale for their services in getting out "The Tiger" during the year. This paper goes out to Clemson men in all camps and on all fronts and is eagerly awaited by these men.

As to the future, Dr. Poole stated that regardless of whether or not we have Army trainees or regular students, there would be plenty for the faculty to do and therefore there need be no concern about decrease enrollments so far as the faculty's relationship to the college is concerned.

He commended the faculty for their cooperation in shifting from their special field to another in teaching Army trainees.

Major Martin thanked Dr. Poole in behalf of the faculty for the delightful dinner and pledged the faculty's continued cooperation.

After several announcements the meeting was adjourned at 8:40 P.M.

Respectfully submitted,

James E. Ward, Jr., Secretary

**Tie for place.
ALMA MATER

Where the Blue Ridge owns its greatness
Where the Tigers play;
Here the sons of dear old Clemson
Reign supreme alway.

CHORUS

Dear Old Clemson, we will triumph,
And with all our might,
That the Tiger's roar may echo
O'er the mountain height.

We are brothers strong in manhood,
For we work and strive;
And our Alma Mater reigneth
Ever in our lives.

—A. C. CORCORAN, '19
May 9, 1944

Dr. R. F. Poole, President
Clemson College
Clemson, South Carolina

Dear Dr. Poole:

I herewith submit my annual Athletic Council report for the session 1943-44.

The Clemson College Athletic Council held its annual meeting May 19, 1943. After a full discussion by all members present, it was decided to continue athletics for the year of 1943-44 on the same scale as we did during the previous year.

The football and basketball schedules were carried out to a very satisfactory degree, considering the lack of football material, the extreme shortage in the coaching staff and the fact that colleges maintaining Navy units had a great advantage over those that only had Army units and were unable to play. In some cases this made the competition very one-sided, however, in none of its games was Clemson disgraced because of the type of games the players put up themselves.

The Athletic Council is particularly proud of their new stadium which is now completed and was used during the past season for the first time. The new press box under the direction of the Engineering Department, Dean Earle, Professors H. E. Glenn, Raymond Sweeney and G. E. Hoffman, is nearing completion and is one of the outstanding and best arranged press boxes in the United States. We are very appreciative of the press box and also grateful to our President and Engineering Department for choosing this as one of their new projects under the Federal Government.

Financial Condition: Due to the foresight of President Poole, Business Manager Littlejohn, our stadium is paid for and the receipts from the games of football played last fall and the income by the physical educational department during the past year puts our Athletic Department in good financial condition.

Continued -
Athletic Council Annual Report continued -

The Athletic Council and the Coaching Staff has expressed themselves as being in favor of carrying on this fall so far as it is possible to do so and unless some unforeseen obstacle arises which makes it impossible to play the games scheduled. We will carry on for the next season as we did in the past season of 1943. The football schedule is as follows:

- Sept. 23 - Presbyterian in Clemson
- Oct. 30 - Georgia Tech in Atlanta
- Oct. 7 - N. C. State in Charlotte
- Oct. 19 - South Carolina in Columbia
- Oct. 28 - Tennessee in Knoxville
- Nov. 4 - Wake Forest in Wake Forest
- Nov. 11 - V. M. I. in Clemson
- Nov. 18 - Tulane in New Orleans
- Nov. 24 or 25 - Georgia in Athens

Respectfully submitted,

Lee W. Milford, M.D.
Chairman of Athletic Council
Clemson College

May 11, 1944

Dr. R. F. Poole, President
Clemson Agricultural College
Clemson, South Carolina

Dear President Poole:

The Committee on Buildings and Grounds has met several times during the last fiscal year to consider matters that were referred to it. A few of the things acted upon by this committee are as follows:

Continued -
The Buildings and Grounds Committee met on June 4 and June 7, 1943. At these meetings the committee considered the erection of a cattle shed for the Animal Husbandry Department to be located on the Ravenel Property. This shed is 40 feet wide and 200 feet long. The shed has been completed. Also the committee passed a resolution recommending that the new road by the Memorial Stadium be called Williamson Road in honor of Mr. J. S. Williamson, President of the American Highway Association and Chief Highway Commissioner of the South Carolina Highway Department. Mr. Williamson is also an alumnus of Clemson College of the Class of 1916. Water Street was the name suggested for the new street connecting Williamson Road with Klugh Avenue going by the new water filtration plant.

On August 31 Dean S. B. Earle of the Engineering School presented tentative plans for certain structure that were to be constructed by the Engineering Experiment Station. These buildings consist of a workroom ultimately to be used as a Planer Shed located near the Public office, a Press Box for the Clemson Memorial Stadium, and a group of buildings located on the old Ravenel property to be used by the Animal Husbandry Department. The committee approved the location and construction of these several structures.

The Committee had at least two meetings during the year considering a suitable location for a bus terminal to be built on the College property. This was considered very thoroughly, but in view of the fact that certain changes in roads leading by Clemson are contemplated by the Highway Department, it seemed advisable to defer action as to any specific recommendation until these changes occur.

The committee acted upon the request of the Farm Department relative to the clearing of land around one of the tenant houses used by this department of the College.

The Buildings and Grounds Committee met and reviewed the location of proposed buildings for the Service Department. After considerable thought and discussion the committee unanimously recommended the development of the present site as being the best suited place for the buildings of the Service group.
At a meeting held on March 24, the committee considered passing a resolution formerly requesting that the Clemson Arboretum be approved by the College Administration and the Board of Trustees. A resolution was passed and submitted to the President for further action.

On April 4, the committee had a very important meeting to consider the construction of another greenhouse wing to the Botany Greenhouse near the Dairy Building. At this meeting it was recommended that all of the greenhouses be concentrated in one area, preferably the Horticulture Grounds, where most of the greenhouses are now located. This seemed advisable from the standpoint of both maintenance and supervision.

On a recent visit with Mr. J. S. Williamson, Chief Highway commissioner, visited Clemson College, accompanied by Mr. McMillan, Chief Highway Engineer, and Mr. Armstrong, Divisional Engineer, and looked over the College property and Campus relative to the location of several roads. As soon as certain data is furnished them, they propose to make the location of these roads in order that they may be shown on the Campus map, which is to be made. The committee feels that this is a very important step in making plans for the future. It is absolutely necessary that a map showing all of the possible building sites and their relationship to the other buildings be made. The committee especially recommended the location of all the underground and above-ground utilities be shown on this campus map.

This report briefly summarizes the meetings held by the Buildings and Grounds Committee for the fiscal year 1943-1944.

Respectfully submitted,

David J. Watson, Chairman
Buildings and Grounds Committee

DJW/et
Faculty Meeting

May 12, 1944

The meeting was called to order at 5:05 P. M. by President Poole. The minutes of the previous meeting (held March 6, 1944) were read, corrected and approved.

Registrar Metz announced that since the number of 1944 graduates was so small, the Deans had not called their respective faculties together to approve the candidates, but at their meeting had considered the list of candidates for degrees as submitted by the Registrar and recommended that the list be approved by the faculty. The list was approved. (Copy of list attached herewith).

The Scholarship and Honors Committee announced that no Norris Medal would be awarded this year due to the small number of graduates, but that all the graduates would be considered as eligible when the medal was again given. In other words, all graduates of this class and any future classes at which the medal is not given will be considered, for purposes of awarding the medal, as members of the first graduating class at which time the medal is again given.

Reports were read from the following committees: Athletic, Buildings and Grounds, Catalog, Curricula, Deficient Students, Library, Loans, Uniform, Public Lectures, Public Occasions and Celebrations, Schedule, Scholarship and Honors, Social Functions, Student Government, Student Organizations, Student Welfare, Publications, Visitors, Ethics and Religion, Claud W. Kress Endowment Research Fund, and Food Production. (Copies of reports attached herewith) The Radio Committee was the only committee submitting no report.

After several announcements of interest, the meeting was adjourned at 6:27 P.M.

Respectfully submitted,

James E. Ward, Jr., Secretary
This report is submitted in the form of tentative plans for the organization and content of the catalog to be published this summer. The Catalog Committee proposes to follow essentially the same style of publication as that for the 1941-1942 edition with the following exceptions:

1. Since no catalog was published for the 1942-1943 session, the proposed publication will be essentially a catalog for the two sessions of 1942-1943 and 1943-1944 with the announcements for 1944-1945.

2. A general statement or preface to the edition will be included characterizing the differences between Clemson's war-time program and that of normal years, especially as these differences are reflected in this catalog.

3. There will be a special section on Clemson's contribution to the war effort including such items as the accelerated program, national defense training, army training programs, and statistics on the number of Clemson graduates and former students serving in the armed forces.

4. The program of the fiftieth anniversary of the College will be included.

5. The faculty list will be compiled as of May 1, 1944.

6. The regular curricula of the college will be followed by war-time modifications, such as the curriculum in general agriculture and the modified curriculum for electrical and mechanical engineering students.

7. For this edition only, the detailed descriptions of courses will be omitted, and this section of the catalog will be prepared in list form, giving the catalog number, descriptive title, credit hours, and prerequisites for each subject.

8. The register of students will be divided into three sections, for the three periods covered by this catalog:

   (1) The 1942-1943 Session.
   (2) The 1943 Summer Session.
   (3) The 1943-1944 Session.

Respectfully submitted,

G. E. Metz, Chairman
The Catalog Committee
Report of Curriculum Committee

The Curriculum Committee reports on these three problems:

1. The committee recommends that no substitutions for required courses be allowed unless:

a. The student has finished all freshman and sophomore work.
b. He has acquired the total number of credits and grade points required for graduation by his school.
c. He has completed at least $\frac{4}{5}$ of the required work in his major.
d. When impossible to arrange his work to fulfill condition e he may petition the Committee to be allowed to graduate with a B. S. degree without any mention of his major line of work.

The first three seem generally acceptable, but on the fourth there is a difference of opinions. It may be wise to modify or eliminate this.

2. It seems probably that returning soldiers who had not finished their college education will be allowed to do so at government expense. Others will be offered vocational training. The longer the war, the more prospective soldier students. Since Clemson can take but a limited number of students, the Committee recommends that preference be given, first - to those who wish to begin or complete a four year college course, and second - to those more mature men who wish a special course in some line of work that Clemson is best fitted to offer. We feel that in both of these groups the individuals should be carefully selected on the ground of fitness to be agriculturists, chemists, or engineers. It is not fair to waste their time or ours trying to fit square pegs into round holes.

The committee is convinced that this work should be administered either by the Veterans Bureau or by the College, but definitely not by the Army. The Army has said what kind of education it wanted for its soldiers, but neither the Army nor any government agency should be allowed to select the education to best fit men for civil life.

3. About two years ago we began conferences with the high schools of the State, urging better preparation in fundamentals. The 12th grade has now been added to many high schools. In a letter to me from Dr. Crow, State High School Supervisor he says:

Continued -
"Although we now have enrolled in high school a goodly number of pupils who cannot profit from formal teaching in certain subject fields, certainly not in the advanced courses in these fields, we should not solve the problem by dodging it as we have done heretofore. If there are pupils who cannot learn algebra and geometry, and there are many such pupils, we should not, on that account, eliminate mathematics but teach as much mathematics as they can learn. For the average pupils and those above average that would mean formal courses in algebra and geometry. We have made the mistake in English in assuming that pupils have mastered all the fundamentals when they reach high school and have not continued the emphasis on reading, composition and spelling, and have erroneously assumed that the attempt to teach literature as such could be successful without a proper foundation. Even United States History was eliminated as a required subject for high school graduation; however, it was restored more than a year ago. Geography as a subject is practically unknown in high school."

This attitude is very encouraging.

More recently nation wide attention was called the unsatisfactory results of "progressive education" by various writers, including Paul Mellon and John Temple Graves. It was so generally echoed by other writers that most of our fight is being won for us. Much criticism was directed at Harvard and such colleges as allow their students a free elective system. The charge has been made that when this course is followed in grammar schools naturally selects subjects easy for him, avoids any difficult ones, reaches college without having learned how to study, and resents being expected to really work.

Recently Dr. Frederick H. Lund, of Temple University and a noted professor of psychology says this on the subject of our high rejection rate from the armed services on mental and emotional grounds:

"The child suffers from our current undisciplinary leadership. He is not prepared to meet life or to meet reality. Our present system retards emotional maturity by prolonging childish habits, or self-indulgence of following impulse, or being governed by the pleasure-pain principle to the exclusion of the reality principle. Hence we are confronted with a striking inability to assume responsibility, to do a real job, to accept life's burdens."

Respectfully submitted,

F.H.H. Calhoun, Chairman
Curricula, Courses, and Entrance Requirements Committee

FHHC/rs
Clemson, S. C.
May 2, 1944
Summary Report of The Committee on Deficient Students

The Personnel of the committee is J. C. Green, J. E. Hunter, L. V. Starkey, F. T. Tingley, J. W. LaGrone, E. L. Epting, and F. M. Kinard, Chairman.

In 1942 this committee made recommendations concerning the classification of students and more rigid requirements for eligibility of students to return to school. One result of the adoption of that recommendation was that several hundred students were forced to make up deficiencies in the summer school of that year to be eligible to return the next fall, and the next fall there were considerably fewer deficient students to interfere with regular college work. The policy resulting from the recommendations was regarded as successful.

Since the college went on an accelerated program last summer and has since continued an almost unbroken accelerated program, there has been no time available between semesters for students to make up deficiencies. Further, there has not been time between semesters for the registrar's office to classify students as to their eligibility to return. The consequence has been that the only practical policy the Registrar could follow was to warn a student in one semester that he might not be eligible to return the following semester.

One good by-product of a period that is in almost all other ways distressing is that the usual normal problem of badly deficient students has been almost eliminated. Many faculty members have observed that under pressure of imminent induction into the armed forces our regular college boys have been unsettled and have not studied as well as in normal times. Since so many of the faculty bear that witness, there must be much truth in the observation. However the fact remains that the number of students failing a large portion of their work has been negligible. Apparently those students who did not want to study and who were not doing satisfactory work have dropped out of college of their own volition to go into war work or into the armed services, thus relieving the college except in very few cases of the problem of eliminating the unfit. There has been noted a very vital interest of students in their classification, and when they could not graduate before leaving for service, they have appeared anxious to meet classification requirements for the next class so that the classification requirements apparently have been a stimulus for student work.

Continued -
Report of Committee on Deficient Students continued -

Because of the reduction of the deficient student problem and the present uncertain state of affairs the members of the committee are not disposed to offer now any recommendations for modification of rules or policies. The committee plans when this abnormal period is over to renew recommendations formulated last year and to suggest some new policies. Now that the strained teaching loads incidental to the army programs have been lightened, the committee hopes that it can resume its consideration of remedial measures. This work was rudely interrupted last year by the arrival of the first Air Force trainees. Most of the members regard it as the most pressing need in the province of the committee's work, and it will be the center of attention for our next work.

Respectfully submitted,

F. M. Kinard, Chairman

Clemson, S. C., May 12, 1944

Dr. R. F. Poole
The President's Office
Clemson, S. C.

Dear Dr. Poole:

You will find herewith a condensed report of the work of the Library Committee for the past year:

Besides the regular operation of the Library in the service of the College, the main activities of the committee have centered on: (1) the preparation and equipment of a recreational reading room for our own ROTC students as well as for the army trainees stationed here; (2) the preparation of a separate room for fictional literature in order to provide room in the stacks for the increasing number of non-fiction books; (Incidentally, with the increase of approximately 72,000 volumes in the central library and the departmental libraries together.) (3) study of facilities of the Library Building with a view to better meeting present and future needs.

Continued -
In making plans for the recreational-reading room, the committee thought it wise to start rather unpretentiously in so far as the reading content was concerned. Under existing conditions it would be difficult to interest students and trainees in the reading matter usually to be found in the conventional "browsing room." The fiction room has been put into a proper state of readiness, and now, except for some needed shelving, would contain all our works of fiction.

Preparatory to the study for the maximum use and expansion of the Library Building, Professor Lee has drawn the floor plans of the entire building, indicating where space may be utilized for expansion and for fire-proofing the valuable State collection.

The problems which most immediately confront the committee and staff at present are the popularization of the recreational-reading room and awakening a wider interest, on the part of the students and general public, in the materials to be found in the Center of Information. Even light reading, amid the most comfortable surroundings, finds sharp rivalry in the moving pictures, week-end holidays, and the general allurement of outdoor spring weather. In spite of these diversionary forces, however, there is some evidence that the recreational-reading room is growing in popularity.

Popularization of the materials in the War Center of Information depends primarily on methods of directly contacting the public. Mere circularization will not do it except upon a rather small scale. A request has been sent in to Mr. Davis' office for some more concrete means of reaching the public with the materials offered by the Center. These materials have, over the past several months, furnished information for student and faculty papers, forums, and radio broadcasts. Their use could be greatly extended through closer contact with the general public. Not only the Center of Information, but the entire library could become a more vital College and community influence by more thorough-going utilization by all concerned.

Respectfully submitted,

Mark E. Bradley, Chairman,
The Library Committee
Report of the Committee on Public Occasions and Celebrations

While there has not been a meeting of the entire Committee on Public Occasions and Celebrations during this session, members of the Committee have worked untiringly in the interest of the Concert Series and other functions.

Members of the Committee feel that the Clemson College Concert Series has had an unusually successful year in view of the times and the difficulties encountered. The Series was operated this session at a loss in view of the reduced enrollment and a small sale of season tickets. It was financially possible to operate the Series only by using a large portion of the small amount of funds accumulated from previous years. It is sincerely hoped that it will still be possible to operate the Series for 1944-1945 although the financial problem is becoming more acute.

A year ago members of this Committee deemed it wise to recommend that a special committee be appointed by the President of the College to arrange for the Fiftieth Anniversary of Clemson. Dr. Poole appointed such a committee including some members of the Committee on Public Occasions and Celebrations along with appropriate additions. The Fiftieth Anniversary Celebration was held on December 1, 1943.

A copy of the program for Visitors' day to be held on Sunday, May 14, is attached hereto. This program has been arranged through the cooperation of members of the Committee on Public Occasions and Celebrations, members of the Visitors Committee, student leaders, and the Deans and Directors of the institution. The Visitors' Day program is a combined celebration of Visitors' Day and Honors Day, along with Commencement Exercises.

Looking to the future, attention is called to another possible celebration date which it is hoped will come after the war is over. The fiftieth regular commencement exercises will be held in 1946. This will also be fifty years after the first graduating class received their diplomas in 1896.

Respectfully submitted,

G. E. Metz, Chairman
Committee on Public Occasions and Celebrations
VISITORS’ DAY PROGRAM

Sunday, May 14, 1944

Church Services in the Various Campus Churches ... 11:30 A.M. ... 1:00 P.M.
Barracks Two and Three Open for Inspection by Visitors 2:00 P.M. ... 3:00 P.M.
Educational and Travel Reels, Y.M.C.A. 3:00 P.M. ... 4:00 P.M.
Company Calisthenics, Bowman Field 4:00 P.M. ... 4:15 P.M.
Fancy Platoon Drill, Bowman Field 4:30 P.M. ... 4:45 P.M.
Mothers’ Day Parade and Special Awards, Bowman Field 5:00 P.M. ... 5:30 P.M.

1. R. W. Simpson Medal to the best drilled cadet in the freshman, sophomore, or junior class.

2. Andrew Pickens Award by the South Carolina Daughters of the American Revolution to the Clemson cadet showing in the greatest degree qualities of leadership, military proficiency, and soldierly deportment.

3. Commandant’s Award to the leader of the best drilled platoon.

4. Military Awards to the best drilled sergeant, the best drilled corporal, and the best drilled freshman.

5. Award of the Trustee Medal to the best speaker of the Literary Societies.

Commencement Exercises, Outdoor Theatre 6:00 P.M. ... 7:00 P.M.
Baccalaureate Address, Professor E. B. Kennedy,
Erskine College, Due West, South Carolina

Educational and Travel Reels, Y.M.C.A. 7:30 P.M. ... 9:00 P.M.

General Information

Information Booth: In front of the Main Building, maintained by the Executive Sergeants’ Club.

Rest Rooms: Ladies—Main Building, Library, Y.M.C.A., Field House.
Men—Library, Y.M.C.A., Field House.

Public Telephones: Guard Room, Y.M.C.A., College Cafe, and Clemson Pharmacy.

Western Union: Main Building, northwest corner of basement.

Food: Sandwiches and cold drinks may be purchased at the canteen in the rear of Main Building, the Sandwich Shop in front of the College Cafe, and at the two Drug Stores. Meals may be purchased at the College Cafe and the Coffee Shop.
May 10, 1944

Dr. R. F. Poole, President
Clemson Agricultural College
Clemson, South Carolina

Dear Dr. Poole:

The Committee on Student Government has done little this year. We were originally directed to "Encourage and perfect student and faculty understanding, to study student organizations and counsel their leaders on ethical procedures." We were to be particularly "concerned with Senior Council, Blue Key, Scabbard and Blade, Pershing Rifles, Tiger Brotherhood, Honor Council, etc." Of these only a military "Senior Council" remains.

Company commanders were used this year as a temporary "Senior Council" to expedite disciplinary action. The committee hopes that in our post-war reorganization we can reestablish with improvements our whole elective system of forming a student governing body.

Advice was given on a number of occasions to student military leaders on methods of improving the morale and morals of the corps. As usual the problems of cheating, stealing, drinking and sex were discussed.

Assistance and advice were given concerning student elections. A great improvement was instituted when the freshman election was held using the modified Australian ballot with nominations by petitions outlining in detail the qualifications and experience of candidates.

Officers of the senior class were counselled concerning their obligations and opportunities for service to the cadet corps.

Assistance was given in supplying speakers in barracks. Subjects were suggested by the students and were always about student morals and how to improve them.

Respectfully submitted,

Committee on Student Government

B. E. Goodale, Chairman
G. M. Armstrong
J. D. Lane
J. L. Marshall
Report of Loan Committee

May 12, 1944

During the present fiscal year only two loans have been made by this committee from student loan funds in the hands of the College Treasurer. No other applications for loans were received from students.

In the fall of 1942 the Federal Security Agency, U. S. Office of Education, placed with the college $17,292.95 to be loaned to students in need of financial assistance who were taking accelerated courses in the fields of engineering. From this fund loans were made to 52 engineering students in a total amount of $11,803.51 and the remainder; $5,489.44, was returned to the government when the loan agreement with the college expired on October 1, 1943.

Respectfully submitted,

Hamilton Hill,
Assistant Business Manager

Report of Uniform Committee

May 12, 1944

At the close of the 1942-43 session it was deemed impracticable to attempt to continue the Cadet Grey uniform at Clemson. Among the reasons for this decision was the uncertainty of obtaining the high quality wool necessary in the manufacture of the garment, the greatly increased cost of the finished product and the expense to the student who might be here only a few months or a year and have no further use for uniform articles costing in the neighborhood of $125.00.

Arrangements were perfected with the Quartermaster Department of the Army whereby the student could be furnished certain articles of regulation army uniforms from the Quartermaster Department to outfit him both winter and summer by depositing with the College Treasurer the sum of $46.00. At the close of the school year, or at such time as the student leaves Clemson, he must return to the Quartermaster all uniform garments issued him. If the uniforms are in satisfactory condition (general wear and tear excepted) a refund of $26.00 is made which makes the net cost $20.00 to the student. All articles of uniform remain the property of the United States Government, and any student who loses or destroys any article of uniform must pay for same at the Quartermaster Department list price.

Continued -
The Quartermaster Department has now advised us of the recent revision of list prices; and for the session 1944-45 the student will deposit with the College Treasurer the sum of $52.00 for his uniform requirements, and upon returning the garments to the quartermaster receive a refund of $32.00.

For the 1944 Summer School session the student will require only summer garments for which he will make a deposit of $25.00. At the close of the summer session, or at such time as he may withdraw before the end of the session, he will return to the Quartermaster all articles of summer uniform issued to him and receive a refund of $18.00.

The insignias and shoulder patches now being worn by the students on sleeves and collars have not been authorized by the Uniform Committee.

For many years the W. C. Rowland Company of Philadelphia manufactured the traditional Clemson Grey Uniforms. The College's transactions with this firm were always most satisfactory. In 1943 Mr. Rowland, head of the firm, died and his business has since been discontinued. When Clemson returns to the use of the Grey Uniform this will mean negotiations and connection with another firm; and Mr. J. C. Littlejohn, Business Manager, is now in Philadelphia contacting several uniform manufacturing firms in anticipation of that time.

Respectfully submitted,

Hamilton Hill
April 22, 1944

Dr. R. F. Poole, President
Clemson College
Clemson, South Carolina

Dear Dr. Poole:

The Public Lectures Committee has concentrated its efforts this year primarily in cooperating with various groups on the campus who were interested in bringing in speakers.

Among the speakers on the campus during the past year were Rabbi Robert P. Jacobs of Asheville who was sent here by the Jewish Chautauqua Society; Louis J. Alber, a lecturer brought in by the Claud W. Kress Endowment Fund and the Anderson Rotary Club; Dr. I. J. Fisher, Authority on Japan, and Mr. Simon M. Davidian, lecturer on Soviet Russia, both of whom were brought in by the Seneca Rotary Club; Professor A. G. Holmes of the faculty, and Paul Manning, war correspondent, who was brought in by the Kress Fund.

Respectfully submitted,

James E. Ward, Chairman

Dr. R. F. Poole, President
Clemson Agricultural College
Clemson, South Carolina

Dear Dr. Poole:

I beg leave to submit herewith the report of the schedule committee for the 1943-44 college session.

The schedule committee has had only two regular meetings this year. These meetings were for the purpose of making out the examination schedule for the regular college classes.

With the inauguration of the Army teaching Program last spring it devolved upon Dean Kinard's office to prepare the class schedules for these students. As the regular student body was less than half of normal, and as a large majority of faculty members assisted with the Army Program, as well as with the regular college program, it seemed more logical to fit the college schedule of classes into the Army schedule than vice versa. All schedules with the exception of those of the Advanced Engineers have been prepared by Mr. H. M. Cox and Mr. J. W. LaGrone under Dean Kinard's direction. They are to be commended for the excellent work they have done.

The Engineering School faculty under the direction of Professor Rhodes prepared the schedules for the Advanced Engineers.

Due to the small number of college Seniors and Juniors no regular schedule was prepared for these students. Courses were organized as occasion demanded by the Schools involved.

This spring Professor S. R. Rhodes asked to be relieved of his duties on the schedule committee and President Poole appointed Professor F. T. Tingley to fill the vacancy.

Respectfully submitted,

W. B. Aull, Chairman
Schedule Committee

May 12, 1944

Report of the Committee on Scholarship and Awards.

Because of the small number of graduating seniors, it was thought advisable to discontinue the Norris Medal award for the duration. Consideration can be given to the records of the war-time graduates at the time of our first post-war commencement.

Respectfully submitted,

/s/ D. C. Sheldon
Chairman

May 12, 1944

Dr. R. F. Poole, President,
Clemson College, Clemson, S. C.

Dear Dr. Poole:

The Social Functions Committee has studied a number of problems related to College Dances during the year and made recommendations in regard to them. These mainly involved the chaperonage of the young ladies quartered in college buildings and conduct at the dances.

It has been our endeavor to help in keeping alive some of the desirable customs of the past in so far as this can be done at this time. Other reports and information have been submitted to you from time to time during the year.

Respectfully submitted,

Geo. H. Edwards, Chairman,
Social Functions Committee.
May 10, 1944

Annual Report of the Students' Organizations Committee

Early in October, 1943, this committee received its usual request for nominations of undergraduates for the publication, "Who's Who Among Colleges and Universities." After consulting with the Registrar, the committee decided not to send any names of Clemson students this year. This action was taken before the return of our Seniors in the ROTC-ASTP unit. A notice will appear in the publication to the effect that a great majority of our upperclassmen are in the armed forces.

There were no student organizations problems presented to the committee this year.

Respectfully submitted,

Robert K. Eaton, Chairman
Students Organizations Committee

Student Welfare Committee

The Student Welfare Committee met with twelve student leaders and succeeded in finding out what was on their minds. The students made many requests, which were taken to the President. The President granted their requests and boosted morale appreciably.

The Welfare Committee recommended that the students elect by democratic methods a Student Welfare Board from the four classes to meet with the faculty committee and thrash out student problems. At a student meeting which was held some days later, the thirteen 1944 graduates decided that the election of this student board should be postponed until the beginning of the next school year. They urged that the board be elected and that the Faculty Welfare Committee be called upon to supervise balloting necessary to elect the members from each of the four classes.

The Chairman of the Welfare Committee administered six national pre-medical aptitude tests during the year, two regular and four special tests, and has given students some general advice based on the results of these tests.

As individuals, other members of the committee have promoted student dances, visited students in barracks, and contributed to student welfare.

John D. Lane, Chairman
During 1944 Clemson students suspended publication of the Agrarian, which was published by students from the School of Agriculture, the Bobbin and Beaker, which was published by students from the School of Textiles, the Slip Stick, which was published by students from the School of Engineering, and Taps, which was published by a staff of juniors and seniors from the student body.

During 1944 ten issues of the Tiger have been published, totaling 50,000 copies, and mailed to members of IPTAY, a handful of subscribers, and to over 4,000 students and ex-students in uniform. Over 40,000 copies have been sent free to students and ex-students.

The tenth and final issue for this school year is an eight-page edition which also contains a senior insert of the thirteen graduates, all the companies in the Corps, some candid camera shots, and brief biographical sketches of the seniors. It also carries approximately $250.00 worth of advertising.

The printers have had their labor problems, their paper shortages, and more advertising than they could print. It has been unbelievably difficult to get out ten issues.

The Tiger, though it carries all the student news available, has become primarily an alumni paper. Student support has been satisfactory. Professor B. E. Goodale has had charge of circulation.

Respectfully,

John D. "Dane, Faculty Adviser
May 10, 1944

Dr. R. F. Poole, President
Clemson College

Dear Dr. Poole:

Report of the Visitors' Committee for the fiscal year ending May 14, 1944.

Owing to transportation facilities and conditions brought about by reason of the war, the Visitors' Committee has had less to do this year than usual. There have been fewer people and fewer groups at the college during the year.

On October 30, 1943, the college celebrated its annual Home Coming day with a football game with Wake Forest College. A goodly number of the old grads were back and were served lunch in the Field House.

During the week of March 26, we had a convention of food processors. They were here for two or three days and were taken care of by the college.

April 10-11, the Waterworks Convention was held here.

April 13-14, we had a group of Textile men here. These men were shown every courtesy possible as guests of the college.

May 3, 4, 5, we had our annual Board of Visitors. There were eleven men present in this group. They spent three very busy days at the college and their report is on file in the president's office.

In addition to these groups, some individuals have been welcomed and shown over the college.

Respectfully submitted,

J. H. Woodward, Chairman
Board of Visitors

JHW:h
May 12, 1944

Dr. R. F. Poole, President
Clemson College
Clemson, S. C.

Dear Dr. Poole:

The Committee on Ethics and Religion submits the following report:

During the college year 1943-44, the work of this Committee has been directed to two groups, viz., college students or R.O.T.C. unit and trainees of the U. S. armed forces, which includes aircrew trainees, basic and advanced engineer-trainees, and for a short period, men in the Star unit.

First, we would like to express our genuine appreciation for the wholehearted cooperation of the college administration and the military authorities in the activities promoted by this Committee. This cordial relation between the administration and the campus ministers in the interest of Clemson students is traditional. But we dare to say that no institution of higher learning cooperating with the U. S. government in its training program for men in the armed forces, has shown more considered interest in the religious program offered by any group of ministers located nearby or connected with that institution, as compared with Clemson College. This harmonious relation is reflected in the many and varied activities carried on.

This Committee acted as a steering committee for the second Memorial Service, honoring the noble dead of Clemson College, held December 7, 1943. This service was held in the College Field House and was attended by Clemson students, parents of the deceased men, all trainees stationed at Clemson and the people of the campus community. It is our hope that this Memorial Service will be held each year on the above date. Program attached.

The annual Religious Emphasis week services were held as usual. Dr. G. H. Aull was committee chairman and the Rev. Louis C. Melcher, rector of Trinity Episcopal Church, Columbia, S. C., was the principal speaker on this occasion. Program attached.

Early last fall "Long Roll" was extended from 8 to 8:30 on Wednesday evenings by the Commandant, enabling students to attend the student meetings, held in each of the campus churches, and not be rushed in so doing.

Continued -
Report on Committee on Ethics and Religion continued -

Members of this Committee have conducted Evening Watch Meetings in Barracks, held each week, under the leadership of the Y.M.C.A.

Under individual members of this Committee students have been helped in developing leadership in statewide denominational conferences. Clemson College stands to the fore in religious activities projected by the colleges of the state.

Soon after aircrew and army trainees came to Clemson, church directors were placed in barracks rooms. These directories gave the location of the several campus churches, the hours of services and the names of the resident ministers.

As the different army units arrived at Clemson, the ministers were afforded a place on the program when the orientation lecture was given. In this way all trainees were welcomed to the campus churches. Special early Sunday morning worship services were conducted for trainees while they were in quarantine. There being no synagogue on the campus, or nearer than Greenville, S. C., the High Holy New Year and the Day of Atonement services were held in one of the Protestant churches by the Jewish students and trainees stationed at Clemson.

At the outset of the army college training program, the resident ministers were asked by the military authorities to serve as chaplains. As such they have been privileged to render many and varied services to our "visiting" trainees. Parents of these men, coming from every state in the Union, have visited and have been welcomed into our campus churches. The ministers have served these parents in securing accommodations before they arrived on the campus, and in showing them round the college during their stay.

The activities of this Committee, this year, have been different from former years in as much as they have been so varied. We trust that we have served the reasonable degree of efficiency.

Respectfully submitted,

Sydney J. L. Crouch, Chairman
To date eleven (11) Kress Projects have been approved. Two of these were set up in order to pay the fees of several special lecturers who were brought here and one of them has been closed. Another project involving the editing and preparation of Dr. W. H. Mills' "History of Agriculture in South Carolina," approved last July, is practically complete. This project was carried out under the supervision of Dr. G. H. Aull. A third project which also may be regarded as closed as far as the Kress Committee is concerned is the "Investigation of the Use of Bamboo for Reinforcing Concrete" carried on by Professor Glenn. As a result of the work done in connection with this project, the government is now erecting a number of structures here at Clemson in which bamboo-reinforced concrete is being used and in connection with which some research is being done. The experiments made under the Kress Project by Professor Glenn were published in one of the engineering journals and was, we understand, translated into Chinese so that the information might be used in China where steel for reinforcing is scarce but where bamboo is plentiful.

Because of heavy teaching loads not much progress has been possible during the year on some of the projects. However, a considerable amount of work has been done by Professor Newman on the "Survey and Classification of Trees and Shrubs on the Clemson College Property." A great many of the trees have been labeled, the time of leaf fall in the autumn, leaf and flower development in the spring, and various other characteristics have been recorded. It is hoped that this study will aid in the ultimate recognition of the campus and adjacent areas as a permanent arboretum.

Last fall a project was approved for Dr. Bernhardt to study the use of Sodium Chlorite as a volumetric oxidizing agent. Sodium Chlorite has been on the market in sufficient quantities to allow for research work for only about 4 years. Since nearly all other oxygen acids of chlorine are good oxidizing agents, it was felt that it would be worthwhile to study the possible use of this chemical for this purpose. Dr. Bernhardt found that it would quantitatively oxidize iodine ion to free iodine, sulfite to sulfate, thiosulfate to tetrathionate, and nitrite to nitrate. With a little further research he thinks that sodium chlorite should take its place along with potassium permanganate, potassium dichromate, and ceric sulfate as a common quantitative oxidizing reagent. This project is also considered closed. Progress is being made on other projects but no definite results are reported at this time.

Continued -
Report of Kress Committee continued -

Re Recently the Committee approved what seems to be a quite worthwhile project entitled, "Analyses of the Surface Water of South Carolina," submitted by Drs. Calhoun and Webb. Considerable work along this line was done several years ago under an old W. P. A. project here at Clemson and the records of that work are available. Under the Kress project additional analyses and other data will be obtained so as to provide a clear picture of the surface water situation. This information will be published for the benefit of industries, agencies, and individuals who may need it.

We have spent only a relatively small sum on the various projects during the year and at present have several thousand dollars which might be used for new projects. In addition $8,000 of Kress Income has been invested in War Bonds. We again call the attention of the faculty to the fact that the Committee will be receptive to applications for grants for some good projects.

Respectfully submitted,

The Kress Committee

Faculty Meeting
September 25, 1944

The meeting was called to order at 5:07 P.M. by President Poole. The minutes of the previous meeting (held May 12, 1944) were read and approved.

Dr. Poole welcomed the faculty and expressed the administration's appreciation for the efforts expended in the past two years by the several members of the faculty working with the different Army trainees. Dean Kinard, Coordinator of the several Army programs, and Assistant Business Manager Hill were signaled out for special commendation for their work in this regard.

He expressed the belief that our enrollment would steadily increase from now on and that immediately after demobilization we would likely be flooded with students. Clemson must be ready to take care of greater numbers than ever before. The Administration is planning for additional physical plant, but probably the greatest problem will be a shortage of teaching personnel.

The heads of the several departments of the College were asked to take more responsibility and become more active than has been true in the past. The cooperation of the entire faculty was asked in improving scholarship, developing school spirit and conserving heat and electricity whenever possible.

The Religion and Ethics Committee with the aid of additional persons has been charged with the responsibility for a "V-E" Day. Such a program can be meaningful and also allow the cadets to let off "Steam" in an orderly manner.

Lt. M. J. Griffin, in the absence of Colonel Cunningham, introduced Capt. T. W. Terwilliger, Lt. R. T. Thomas and Lt. J. D. Harney who will serve as members of the Military Staff.

Several announcements of interest were made, after which the meeting was adjourned at 5:48 P.M.

Respectfully submitted,

PRELUDE

ADORATION AND THE THANKSGIVING ....... W. J. L. - "Come, Ye Thankful People, Come"

HYN - "Come, Ye Thankful People, Come"

Come, ye thankful people, come,
Rejoice the song of Harvest Home,
All is safely gathered in,
Ere the winter storms begin.
God, our Maker, doth provide
For our wants to be supplied;
Over to God's own temple, come,
Raise the song of Harvest Home.

PRAYER ------------------------------- R. V. John Kennedy

DOUBLE CHORUS - "Teilhandle"
Violin obbligato by Professor J. S. Pruden

ADDRESS - "The Grateful Heart" ... Rev. F. Schuyler Vreeland

HYN - "O Thou, My Light, My Life, My Joy"

1. O Thou, my light, my life, my joy,
My glory and my all;
Unseen by Thee, no good can come,
Nor evil can befall.

2. Such are Thy schemes of providence
And methods of Thy grace,
That I may safely trust in Thee,
Through all the wilderness.

THE BLESSING

POSTLUDE
Valley of the Shadow

God, I am traveling out to death's sea,
I, who exulted in sunshine and laughter,
Thought not of dying—death is such waste of me!
Grant me one prayer: Doom not the hereafter
Of mankind to war, as though I had died not—
I, who in battle, my comrade's arm linking
Shouted and sang—life in my pulses hot,
Throbbing and dancing! Let not my sinking
In dark be for naught, my death a vain thing!
God, let me know it the end of man's fever!
Make my last breath a bugle call, carrying
Peace o'er the valleys and cold hills forever.

—John Galsworthy

*MEN MISSING IN ACTION PRIOR TO DECEMBER 7TH, 1943
FAITH OF OUR FATHERS

Faith of our fathers! living still
In spite of dungeon, fire and sword:
O how our hearts beat high with joy,
When'er we hear that glorious word:
Faith of our fathers! Holy faith!
We will be true to Thee 'till death.

Our fathers, chained in prisons dark,
Were still in heart and conscience free:
How sweet would be their children's fate
If they, like them, could die for Thee!
Faith of our fathers! Holy faith!
We will be true to thee 'till death.

* * *

ONWARD CHRISTIAN SOLDIERS

Onward, Christian soldiers,
Marching as to war,
With the Cross of Jesus
Going on before!
Christ, the royal Master,
Leads against the foe;
Forward into battle,
See, his banners go.
Onward, Christian soldiers,
Marching as to war,
With the Cross of Jesus
Going on before!

Onward, then, ye people!
Join our happy throng!
Blend with ours your voices
In the triumph song!
Glory, laud, and honor,
Unto Christ the King;
This through countless ages
Men and angels sing.
Onward, etc.
