This general university catalog contains information of particular interest to prospective students and to undergraduates. Students interested in graduate work should request the Graduate School Bulletin from the Dean of Graduate Studies and University Research.

The information section on pages 50-102 contains information about admission requirements, expenses, buildings and grounds, housing facilities and ROTC. Educational benefits for veterans and current Selective Service regulations may be found on page 55.

The forty-seven curriculums of the University are listed on page 127 and the Colleges, Schools, and their major courses are described in detail beginning on the following pages: Agriculture and Biological Sciences, page 128; Architecture, page 149; Education, page 154; Engineering, page 175; Forest and Recreation Resources, page 190; Industrial Management and Textile Science, page 192; Liberal Arts, page 202; Nursing, page 210; Physical and Mathematical Sciences, page 212.

The courses of the University are listed alphabetically in the Description of Courses section beginning on page 230.

For information on admissions, entrance and placement examinations, and transfer credits write the Office of Admissions and Registration. For information on family housing on the campus, write the Associate Director of Housing.

Clemson University offers equal educational opportunity to all persons without regard to race, creed, color or national origin.

This policy applies in all matters, including:

1. Admission and education of students.

2. Availability of student loans, grants, scholarships and job opportunities.

3. Employment and promotion of teaching and non-teaching personnel.

4. Student and faculty housing situated on premises owned or occupied by the University.

5. Off-campus housing not owned by the University but listed with the University for referral purposes.

6. Activities conducted on premises owned or occupied by the University.

William Henry Wiley, Ph.D. .......................Dean, College of Agriculture and Biological Sciences
Olen Branford Garrison, Ph.D., Director of Agricultural Experiment Station, Director of Research in Agriculture
Rufus Kent Guthrie, Ph.D. ..........................Director of Division of Biology
James Edwin Halpin, Ph.D. .........................Associate Director of Agricultural Experiment Station
Jess Willard Jones, Ph.D. ..........................Director of Resident Instruction and Assistant to the Dean
William Joseph Lanham, Ph.D. ....................Head, Department of Agricultural Economics and Rural Sociology
Lowery Heywood Davis, Ph.D., Head, Department of Agricultural Education†
Absalom West Snell, Ph.D., Head, Department of Agricultural Engineering‡
Ulysses Simpson Jones, Ph.D. ......................Head, Department of Agronomy and Soils
Richard Ferran Wheeler, Ph.D. ....................Head, Department of Animal Science
William Monroe Epfs, Ph.D. .......................Head, Department of Plant Pathology and Physiology
Willis Alonzo King, Ph.D. ..........................Head, Department of Dairy Science
Sidney Brooks Hays, Ph.D. ........................Head, Department of Entomology and Economic Zoology
Woodie Prentiss Williams, Ph.D. ..................Head, Department of Food Science
Taze Leonard Senn, Ph.D. ..........................Head, Department of Horticulture
Bobby Dale Barnett, Ph.D. ........................Head, Department of Poultry Science

COLLEGE OF ARCHITECTURE

Harlan Ewart McClure, M.Arch., F.A.I.A. .........Dean, College of Architecture
Robert Howard Hunter, M.F.A. .....................Head, Department of Visual Studies

* See also College of Agriculture and Biological Sciences Staff, including Public Service Activities, on page 405.
† Agricultural Education curriculum is jointly administered by the College of Agriculture and Biological Sciences and the College of Education.
‡ Agricultural Engineering curriculum is jointly administered by the College of Agriculture and Biological Sciences and the College of Engineering.
COLLEGE OF EDUCATION

HAROLD FOCHONE LANDRITH, Ed.D. .......................... Dean, College of Education
ELMER NEWTON TYNDALL, M.B.A., Colonel, United States Air Force—
   Head, Department of Aerospace Studies
LOWERY HEYWOOD DAVIS, Ph.D., Head, Department of Agricultural Education
MORRIS AUDREY KING, Ed.D. .......................... Head, Department of Elementary and Secondary Education
ALFRED FRANKLIN NEWTON, Ed.D., Head, Department of Industrial Education
GEORGE KAMEIL MAERTENS, B.S., Colonel, United States Army—
   Head, Department of Military Science
MYRTON ALFRED PACKER, Ed.D. .......................... Coordinator, Office of Educational Services
JOHN HASFORD RODGERS, Ph.D. .......................... Director, Research Coordinating Unit
ARTHUR KENNETH JENSEN, Ph.D. .......................... Director, Vocational Education Media Center

COLLEGE OF ENGINEERING

LINVIL GENE RICH, Ph.D. .......................... Dean, College of Engineering
LYLE CHESTER WILCOX, Ph.D. .......................... Associate Dean for Professional Studies
SAMPLUET HULBERT, Ph.D. .......................... Associate Dean for Engineering Research and Interdisciplinary Programs
JAMES LEON EDWARDS, M.S. .......................... Assistant to the Dean, College of Engineering
ROBERT ALLEN BANISTER, M.S. .......................... Director of Continuing Education
ABSALOM WEST SNELL, Ph.D., Head, Department of Agricultural Engineering*
GILBERT CHASE ROBINSON, B.Cer.E., Sc.D. .......................... Head, Department of Ceramic Engineering
CHARLES EDWARD LITTLEJOHN, Ph.D. .......................... Head, Department of Chemical Engineering
HERBERT WILLIAM BUSCHING, Ph.D. .......................... Head, Department of Civil Engineering
LYLE CHESTER WILCOX, Ph.D. .......................... Acting Head, Department of Electrical and Computer Engineering
ROBERT WARDLAW MOORMAN, Ph.D. .......................... Head, Department of Engineering Mechanics
EVERETT LAITALA, M.E. .......................... Head, Department of Engineering Services
JOHN F. ANDREWS, Ph.D. .......................... Head, Department of Environmental Systems Engineering
JAMES LEON EDWARDS, M.S. .......................... Acting Head, Department of Mechanical Engineering
SAMLUS HULBERT, Ph.D., Acting Head, Division of Interdisciplinary Studies

COLLEGE OF FOREST AND RECREATION RESOURCES

WILLIAM HENRY DAVIS MCGREGOR, Ph.D. .......................... Dean, College of Forest and Recreation Resources
HERBERT BRANTLEY, Ph.D. .......................... Associate Dean, College of Forest and Recreation Resources;
   Head, Department of Recreation and Park Administration
ROBERT MAX ALLEN, Ph.D. .......................... Head, Department of Forestry

COLLEGE OF INDUSTRIAL MANAGEMENT AND TEXTILE SCIENCE

WALLACE DABNEY TREVILLIAN, Ph.D. .......................... Dean, College of Industrial Management and Textile Science
THOMAS DANIEL EFLAND, M.S. .......................... Associate Dean, Director of Research
FRANCIS ALAN CLOSE, Ph.D. .......................... Head, Department of Economics
CLINTON HOWARD WHITEHURST, JR., Ph.D. .......................... Head, Department of Industrial Management

† Agricultural Education curriculum is jointly administered by the College of Agriculture and Biological Sciences and the College of Education.

Academic Administration 11

COLLEGE OF LIBERAL ARTS
Headley Morris Cox, Ph.D. .......... Dean, College of Liberal Arts
Marvin Alpheus Owings, Ph.D. ...... Head, Department of English
John Harrison Butler, Ed.D. ........ Head, Department of Music
Robert Stansbury Lambert, Ph.D. ... Head, Department of Social Sciences

SCHOOL OF NURSING
Geraldine Labecki, Ed.D. .......... Dean, School of Nursing
Leon Roswal, M.A. .................. Director, Associate Degree Program

COLLEGE OF PHYSICAL AND MATHEMATICAL SCIENCES
Clayton Verl Aucoin, Ph.D. .......... Dean, College of Physical and
Mathematical Sciences
Harold Garth Spencer, Ph.D., Head, Department of Chemistry and Geology
John Willis Kenelly, Ph.D. .......... Head, Department of Mathematics
Henry Elliott Vogel, Ph.D. .......... Head, Department of Physics

GRADUATE SCHOOL AND UNIVERSITY RESEARCH
Arnold Edward Schwartz, Ph.D. ...... Dean of Graduate Studies
and University Research
Robert Walter Henningson, Ph.D. .... Assistant Dean of University Research

DIRECTOR OF THE LIBRARY
John Wallace Gordon Gourlay, A.M.L.S. .... Director of the Library

EDUCATIONAL COUNCIL
TEACHING AND RESEARCH FACULTIES

ROBERT COOK EDWARDS
President
B.S., Clemson University; LL.D., The Citadel; LL.D., Wofford College

VICTOR HURST
Vice President for Academic Affairs and Dean of the University
Professor of Dairy Science
B.S., 1938, M.S., 1940, Rutgers University; Ph.D., University of Missouri, 1948

MAIN CAMPUS

ABERNATHY, ATWELL RAY, Associate Professor of Environmental Systems Engineering.

ACKER, KENNETH DIXON, Part-Time Visiting Lecturer in Industrial Management.
A.B., Presbyterian College, 1963; J.D., University of South Carolina, 1966.

ACORN, JOHN THOMSON, Associate Professor of Architecture.

ADAMS, HEWITT DAYNE, Assistant Professor of History.
B.S., United States Naval Academy, 1937; M.A., Claremont Graduate School, 1964.

ADAMS, MARY SMITH, Instructor in English.

ADKINS, THEODORE ROOSEVELT, Jr., Professor of Entomology and Economic Zoology.

AIEM, IRÈNE ARMANDE, Visiting Instructor in French.

ALAM, KURSHCHED, Associate Professor of Mathematics.
B.S., 1941, M.S., 1943, Patna Science College; Ph.D., University of Minnesota, 1963.

ALBERT, HAROLD EDWARD, Assistant Professor of Political Science.
B.S., Madison College, 1957; B.D., United Theological Seminary, 1960; M.A.T., Miami University (Ohio), 1960.

ALLEN, JOE FRANK, Associate Professor of Chemistry.
A.B., Berry College, 1955; M.S., University of Mississippi, 1959; Ph.D., Georgia Institute of Technology, 1963.

ALLEN, ROBERT MAX, Head of Forestry Department; Professor of Forestry.
B.S., 1947, M.S., 1951, Iowa State University; Ph.D., Duke University, 1958.

ALLEY, FORREST CHRISTOPHER, Professor of Chemical Engineering.
B.S., 1951, M.S., 1956, Auburn University; Ph.D., University of North Carolina, 1962; P.E.

ALPHIN, JOHN GILBERT, Associate Professor of Agricultural Engineering.

AMOSS, DONALD CURTIS, Assistant Professor of Electrical and Computer Engineering.

ANDERSON, GRANT WILLIAM, Associate Professor of Zoology.
B.S., D.V.M., Iowa State University, 1932; M.S., Virginia Polytechnic Institute, 1934.

ANDREWS, JOHN F., Head of Department of Environmental Systems Engineering; Professor of Environmental Systems Engineering.
B.S.C.E., 1951, M.S., 1953, University of Arkansas; Ph.D., University of California, 1964; P.E.

ARBENA, JOSEPH LUTHER, Assistant Professor of History.
A.B., George Washington University, 1981; Ph.D., University of Virginia, 1970.

ARNOLD, EDWIN FRATTE, Instructor in German.
A.B., University of South Carolina, 1958; M.A., Kent State University, 1968.
ARRINGTON, OTTIE WARD, Instructor in English.
B.A., Winthrop College, 1934; M.S., Clemson University, 1961.

ASHWORTH, RALPH PACE, Professor of Botany.
B.S., Wake Forest University, 1939; M.A., 1945, Ph.D., 1960, University of North Carolina.

AUCoin, CLAIRE RUSSELL, Assistant Professor of Mathematics.
A.B., Shorter College, 1951; M.S., Auburn University, 1954.

AUCoin, CLAYTON VERL, Dean, College of Physical and Mathematical Sciences and Professor of Mathematics.
B.A., Louisiana College, 1951; M.S., 1953, Ph.D., 1956, Auburn University; Post Doctorate, Stanford University, 1960-61.

AUSTIN, JOHN HENRY, Professor of Environmental Systems Engineering.
B.C.E., Syracuse University, 1951; S.M., Massachusetts Institute of Technology, 1953; Ph.D., University of California, 1963; P. E.

BACHOP, WILLIAM EAKL, Assistant Professor of Zoology.
A.B., Western Reserve University, 1950; M.S., 1958, Ph.D., 1963, Ohio State University; Post Doctorate, University of Washington, 1965-69.

BACon, JOHN ROGER, Assistant Professor of Chemistry.
B.S., Kansas State University, 1964; M.S., 1967, Ph.D., 1968, University of Iowa.

BALEY, ROY HORTON, JR., Assistant Professor of Chemistry.
B.S., 1948, Ph.D., 1958, University of North Carolina.

BALL, WALTER LEE, Associate Professor of Electrical and Computer Engineering.
B.E.E., 1949, M.E.E., 1955, Clemson University; P. E.

BANISTER, ROBERT ALLEN, Associate Professor, Director of Continuing Education, College of Engineering.
B.S., Clemson University, 1939; M.S., Bradley University, 1949.

BARFIELD, RAYFORD ELLIOTT, JR., Assistant Professor of English.
A.B., LaGrange College, 1961; M.A., University of Georgia, 1963; Ph.D., University of Tennessee, 1969.

BARKER, ROBERT H., Associate Professor of Textiles and Chemistry.
B.S., Clemson University, 1959; Ph.D., University of North Carolina, 1963.

BARLAGE, WILLIAM BERDELL, JR., Associate Professor of Chemical Engineering.
B.S., Lehigh University, 1954; M.Ch.E., University of Virginia, 1955; Ph.D., North Carolina State University, 1960.

BARNES, WILLIAM CARROLL, Professor of Horticulture, Truck Experiment Station.
B.S., Clemson University, 1931; Ph.D., Cornell University, 1935.

BARNETT, BOBBY DALE, Head of Poultry Science Department; Professor of Poultry Science.
B.S., 1950, M.S., 1954, University of Arkansas; Ph.D., University of Wisconsin, 1957.

BARNETT, ORTUS WEBB, Assistant Professor of Plant Pathology and Physiology.

BARNHILL, JAMES WALLACE, Assistant Professor of History.

BARON, WILLIAM, Associate Professor of Civil Engineering.
B.S.C.E., The College of the City of New York, 1960; M.S.C.E., 1963, Ph.D., 1966, Purdue University; P. E.

BARRON, RHEILDA W., Assistant Professor of Accounting.

BART, CLYDE LEWIS, Associate Professor of Agricultural Engineering.
B.S., University of Illinois, 1955; M.S., University of Wisconsin, 1961.

BARTMESS, EUGENIE VENTRE, Instructor in Mathematics.
B.S., 1945, M.S., 1949, Louisiana State University.

BARTON, ROBERT FREERS, Instructor in Speech.

BAUKNIGHT, LEHMANN M., JR., Professor of Agricultural Economics and Rural Sociology.
B.S., 1935, M.S., 1949, Clemson University.

BAULD, NELSON ROBERT, JR., Professor of Engineering Mechanics.
B.S.M.E., 1958, M.S., 1960, West Virginia University; Ph.D., University of Illinois, 1963; P. E.

* On leave.
BAXTER, ANN WEBSTER, Assistant Professor of Microbiology.

BAXTER, LUTHER WILLIS, Professor of Plant Pathology and Physiology.

BECKWITH, WILLIAM FREDERICK, Associate Professor of Chemical Engineering.

BEER, BETTINA KNUST, Instructor in History.
B.A., St. Lawrence University, 1963; M.A., Vanderbilt University, 1966.

BEER, JOACHIM RUDOLPH, Instructor in History.

BELL, MARSHALL CORNETT, Associate Professor of Mathematics.

BENSON, CUYTON ALAN, Instructor in Music and Director of Choral Activities.
B.M.E., Florida State University, 1964; M.M., University of South Florida, 1969.

BENSON, ROBERT TIDD, Assistant Professor of Vocational Education.

BEYERLEIN, ADOLPH LOUIS, Assistant Professor of Chemistry.
B.S., Fort Hays Kansas State College, 1960; Ph.D., University of Kansas, 1966.

BIERER, BERT W., Laboratory Director and Professor of Poultry Science, Livestock-Poultry Laboratory, Columbus.
V.M.D., University of Pennsylvania, 1934.

BIRKHEAD, PAUL KENNETH, Associate Professor of Geology.

BIRTMAN, KENNETH DAVID, Instructor in Sociology.

BISHOP, CARL BARNES, Associate Professor of Chemistry.
B.S., Clemson University, 1954; Ph.D., Michigan State University, 1959.

BISHOP, MURIEL BOYD, Assistant Professor of Chemistry.
B.A., Huntingdon College, 1952; M.S., Emory University, 1955; Ph.D., Michigan State University, 1961.

BLACK, JOSEPH WILLIAM, Lecturer in Medical Technology; Co-director, School of Medical Technology and Pathologist, Anderson Memorial Hospital.
B.S., University of Kentucky, 1955; M.D., Bowman Gray School of Medicine, 1959.

BLACKMON, CYRIL WELLS, Assistant Professor of Plant Pathology and Physiology, Edisto Experiment Station.
B.S., Virginia Polytechnic Institute, 1949; M.S., Trinity University, 1953; Ph.D., Texas A & M University, 1958; Post Doctorate, Yale University, 1958-59.

BLACKWELL, PAUL EUGENE, Assistant Professor of Military Science.
Captain, Infantry, United States Army; B.S., Clemson University, 1963.

BLANCHE, JERRY DON, Instructor in Speech.

BOLAND, W. ROBERT, Assistant Professor of Mathematics.
B.S., Davidson College, 1959; M.A., College of William and Mary, 1963; Ph.D., University of Colorado, 1968.

BOLEN, CLAUDE WALDRON, Professor of History.
A.B., Emory and Henry College, 1931; M.A., 1935, Ph.D., 1941, Duke University.

BOND, JOHN HOWARD, Associate Professor of Microbiology.
B.S., 1948, M.S., 1949, Louisiana State University.

BOONE, MERRITT ANDERSON, Professor of Poultry Science.
B.S., University of Nebraska, 1941; M.S., Michigan State University, 1947; Ph.D., University of Georgia, 1962.

BORGMAN, ROBERT FREDERIC, Associate Professor of Food Science; Director of Environmental Health Training Program.
D.V.M., 1947, M.S., 1949, Michigan State University; Ph.D., Kansas State University, 1959.

BOSDELL, FRANCIS ALVIN, Assistant Professor of Industrial Education.

BOSE, ANIL KUMAR, Associate Professor of Mathematics.
B.S., 1948, M.S., 1956, Calcutta University; Ph.D., University of North Carolina, 1964.

BOST, WILLIAM VICK, Instructor in English.
BOWEN, WILLIAM CLAYTON, Associate Professor of Agricultural Education. B.S., Clemson University, 1932; M.S., Colorado State University, 1940.

BOWIE, PATRICK CARLTON, Assistant Professor of Mathematics. B.S., Georgia Institute of Technology, 1963; M.A., 1965, Ph.D., 1968, Clemson University.

BOYD, VIRLYN ALEXANDER, Associate Professor of Agricultural Economics and Rural Sociology. B.S.A., Berry College, 1941; M.S.A., University of Kentucky, 1948.

BRADBURY, DOUGLAS WILSON, Alumni Professor of Machine Design. B.M.E., Clemson University, 1940; M.S.E., University of Michigan, 1959; P.E.

BRANDON, CRAIG ARNOLD, Associate Professor of Mechanical Engineering. B.S.M.E., Duke University, 1959; M.S., Stanford University, 1960; Ph.D., University of Tennessee, 1968; P.E.

BRANDT, GRAYDON WILLIAM, Associate Professor of Dairy Science. B.S., Ohio State University, 1936; M.S., University of Nebraska, 1939; Ph.D., Ohio State University, 1953.

BRANNON, CARROLL CLEVELAND, Associate Professor of Dairy Science. B.S., Clemson University, 1934.

BRANTLEY, HERBERT, Associate Dean, College of Forest and Recreation Resources; Head of Recreation and Park Administration Department; Professor of Recreation and Park Administration. A.B., 1956, M.A., 1958, Ph.D., 1966, University of North Carolina.

BRAY, RAYMOND DERWOOD, Visiting Associate Professor of City Planning. A.B., 1956, M.A., 1965, University of California.

BROADBOOKS, JOHN ALAN, Lecturer in Recreation and Park Administration. B.Arch., Rensselaer Polytechnic Institute, 1959; M.L.A., University of Georgia, 1969.

BROCK, ALTON CARR, Assistant Professor of Aerospace Studies. Major, United States Air Force; B.S., Piedmont College, 1963; M.S., Air Force Institute of Technology, 1966.

BROWN, FARRELL BLENN, Associate Professor of Chemistry. B.S., Lenoir-Rhyne College, 1957; M.S., 1960, Ph.D., 1962, University of Tennessee; Post Doctorate, Texas A & M University, 1962-63.

BROWN, JONAS WILLIAM, Associate Professor of Mathematics. B.S., North Carolina State University, 1931; M.A., Duke University, 1948.

BROWN, LAMAR HAMILTON, Associate Professor of Architecture. B.Arch., Auburn University, 1948.

BROWN, ROBERT L., Adjunct Professor of Industrial Management. A.B., Samford University, 1947; M.A., University of Alabama, 1951; Ph.D., Purdue University, 1957.

BROWN, SUSAN HENRIETTA, Assistant Professor of Industrial Management. A.B., 1947, J.D., 1950, University of Georgia.

BRULEY, DUANE FREDERICK,* Associate Professor of Chemical Engineering. B.S., University of Wisconsin, 1956; M.S., Stanford University, 1959; Ph.D., University of Tennessee, 1963; P.E.

BRUNER, MARLIN HARNER, Associate Professor of Forestry. B.S., Pennsylvania State University, 1931; M.F., Yale University, 1932.

BRYANT, HALLMAN BELL, Assistant Professor of English. B.A., Emory University, 1959; M.A., University of North Carolina, 1962; Ph.D., Vanderbilt University, 1967.

BUCKNER, SAM LEVI, Assistant Professor of Education. B.S., East Tennessee State University, 1960; M.A., Appalachian State University, 1966; Ed.D., Auburn University, 1970.

BUNGAY, HENRY ROBERT, III, Professor of Bioengineering. B.Ch.E., Cornell University, 1949; Ph.D., Syracuse University, 1954; P.E.

BURKETT, BYRON VERNER, JR., Assistant Professor of Vocational Education. B.S., 1964, M.S., 1965, Clemson University.

* On leave.
BURT, PHILIP BARNES, Associate Professor of Physics.
A.B., 1956, M.S., 1958, Ph.D., 1961, University of Tennessee.

BURNER, FRANK ALAN, Professor of Sociology.
B.A., M.A., University of Texas, 1938; Ph.D., University of North Carolina, 1958.

BUSCHING, HERBERT WILLIAM, Head of Civil Engineering Department; Associate Professor of Civil Engineering.

BUTLER, JOHN HARRISON, Head of Music Department; Associate Professor of Music; Director of Bands.

BYERLEY, NEIL E., Part-Time Visiting Lecturer in Industrial Management.
B.S.B.A., University of Tennessee, 1958.

BYRD, WILBERT PRESTON, Experiment Station Statistician; Professor of Experimental Statistics; Chairman, Experimental Statistics and Statistical Services.
B.S., 1949, M.S., 1952, North Carolina State University; Ph.D., Iowa State University, 1955.

CAFFREY, CLETUS BARNARD, Associate Professor of Psychology.

CALEY, PAUL COCHRAN, Assistant Professor of Industrial Education.

CALHOUN, RICHARD JAMES, Alumni Professor of English.

CALVEZ, DANIEL JEAN, Instructor in French.
License és Lettres, Angers University, 1965.

CAMERON, WALTER AUDRY, Assistant Professor of Vocational Education.
B.S., North Carolina State University, 1965; M.S., Virginia Polytechnic Institute, 1968; Ph.D., Ohio State University, 1969.

CAMPER, NYAL DWIGHT, Assistant Professor of Plant Pathology and Physiology.
B.S., 1962, Ph.D., 1966; North Carolina State University.

CAPEL, WILLIAM CLYDE, JR., Assistant Professor of Sociology.
A.B., Washington and Lee University, 1932; M.A., Columbia University, 1933.

CARD, EDITH BRYSON, Instructor in Music.
A.B., Furman University, 1944; M.M.E., Florida State University, 1957.

CARNER, GERALD ROY, Assistant Professor of Entomology and Economic Zoology.

CARPENTER, EARL THOMAS, Associate Professor of Agricultural Education.

CARPENTER, KENNETH EDSON, Assistant Professor of Architecture.
B.Arch., University of Oklahoma, 1962; M.Arch., University of Minnesota, 1967; A.I.A.

CARPENTER, THERLE WILDER, Lecturer in Education.

CARROLL, ADGER BOWEN, Associate Professor of Agricultural Economics and Rural Sociology.
B.S., 1958, M.S., 1961, Clemson University; Ph.D., North Carolina State University, 1966.

CARTER, CLIFTON WALKER, Assistant Professor of Engineering Graphics.
B.S., Clemson University, 1933.

CARTER, SYDNEY, Lecturer in City Planning.
B.Arch., Syracuse University, 1942; M.C.P., Harvard University, 1948; A.I.P.

CASKEY, CLAIRE OMAR, Associate Professor of English.

CASTRO, WALTER ERNEST, Associate Professor of Engineering Mechanics.
B.S., Indiana Institute of Technology, 1959; M.S., Clemson University, 1962; Ph.D., University of West Virginia, 1965; F. E.

CATHER, MELBA, Assistant Professor of Nursing, Baccalaureate Program.
B.S., Miami University, 1952; M.A., University of Washington, 1962.

CETTO, MAX LUDWIG, Visiting Professor of Architecture.
Cand. Arch., Technische Hochschule Munich, 1923; Dipl. Ing., Technische Universität Berlin, 1925.
CHAPLIN, ROBERT LEE, JR., Associate Professor of Physics.
B.S., Clemson University, 1948; M.S., 1953, Ph.D., 1962, North Carolina State University.

CHALUPA, WILLIAM VICTOR, Associate Professor of Dairy Science.
B.S., 1958, M.S., 1959, Ph.D., 1962, Rutgers University.

CHASSIE, MARYLYN BACHE, Lecturer in Nursing, Baccalaureate Program.
B.S.N., Vanderbilt University, 1966; M.S., Boston University, 1969.

CHEN, CHI-CHANG, Visiting Assistant Professor of Agronomy and Soils.
B.S., Taiwan Normal University, 1958; M.S., National Taiwan University, 1961; Ph.D., McGill University, 1967.

CHISMAN, JAMES ALLEN, Associate Professor of Operations Research.
B.S., University of Akron, 1955; M.S., 1960, Ph.D., 1963, University of Iowa; P.E.

CHOLEWINSKI, FRANK MICHAEL, Professor of Mathematics.
E.P., 1958, Vanderbilt University; Ph.D., Washington University, 1964.

CLARK, J. EDWIN, Associate Professor of Civil Engineering.
B.S.C.E., 1957, M.E., 1964, University of South Carolina; Ph.D., North Carolina State University, 1967; P.E.

CLARK, MATTHEW ATIKEN, Visiting Associate Professor of Architecture.

CLEMENT, JERRY MCNEILL, Assistant Professor of Architecture.
B.Arch, Georgia Institute of Technology, 1968; M.Arch., University of Illinois, 1969.

CLOSE, FRANCIS A., Head of Economics Department; Assistant Professor of Economics.
B.S., Florida State University, 1961; M.S., Georgia Institute of Technology, 1965; Ph.D., Florida State University, 1968.

COFFEEN, WILLIAM W., Associate Professor of Ceramic Engineering.
B.S., 1935, M.S., 1937, University of Illinois; Ph.D., Rutgers University, 1969.

COHON, DANIEL FRED, Superintendent and Professor of Plant Pathology and Physiology, Edisto Experiment Station.
B.S., University of Western Ontario, 1952; Ph.D., Rutgers University, 1965.

COKER, EDWARD CABLE, JR., Associate Professor of Mathematics.
B.S., University of South Carolina, 1928; M.A., University of North Carolina, 1930.

COLE, SPURGEON NOTHERN, Assistant Professor of Psychology.

COLLINS, THOMAS FRANK, Assistant Professor of Physics.
A.B., Mercer University, 1956; M.S., Clemson University, 1958.

COOK, BRUCE FARRELL, Assistant Professor of Music; Assistant Director of Bands.

COOL, BINGHAM MERCUR, Professor of Forestry.
B.S., Louisiana State University, 1940; M.S., Iowa State University, 1941; Ph.D., Michigan State University, 1957.

COOLEJGE, HAROLD NORMAN, JR., Alumni Professor of Architecture.

COOPER, JAMES BRONAUGH, Associate Professor of Poultry Science.
B.S., 1935, M.S., 1938, University of Kentucky.

COUCH, JAMES HOUSTON, Associate Professor of Industrial Engineering.
B.S., 1941, M.S., 1954, Clemson University.

COVER, ALAN SEYMOUR, Assistant Professor of Mathematics.

COX, EUGENE CARY, Lecturer in Medical Technology; Co-director, School of Medical Technology, Greenville General Hospital.
B.S., Furman University, 1954; M.D., Medical University of South Carolina, 1958.

COX, HEADLEY MORRIS, Dean, College of Liberal Arts; Professor of English.

COXE, EDMON F., Associate Professor of Mechanical Engineering.
B.S.M.E., University of South Carolina, 1956; M.S.M.E., Drexel University of Technology, 1959; Ph.D., University of South Carolina, 1967.

CRADDICK, GARNET ROY, Professor of Agronomy and Soils.
B.S., Virginia Polytechnic Institute, 1952; Ph.D., University of Wisconsin, 1955.

CRAIG, JAMES TELFORD, Assistant Professor of Agricultural Engineering.
B.S., Clemson University, 1951; M.S., University of Georgia, 1960.
Craig, Kirk Robins, Lecturer in Architecture.
B.S., Clemson University, 1951; B.Arch., Cornell University, 1954; M.Arch., Harvard University, 1957; A.I.A.

Crock, Lynn, Assistant Professor of Food Science.
B.S., Furman University, 1955; M.A., Johns Hopkins University, 1957; Ph.D., Emory University, 1966.

Cross, Joan Tilton, Instructor in English.

Cross, Robert Lyman, Assistant Professor of English.

Crouch, James Page, Assistant Professor of Industrial Education.

Curran, Robert Eugene, III, Assistant Professor of Agronomy and Soils.
B.S., North Carolina State University, 1949; M.S., Clemson University, 1964.

Dalton, James, Assistant Professor of Architecture.

Davenport, John Douglas, Associate Professor of Psychology.
B.S., Clemson University, 1943; M.A., Furman University, 1958; Ph.D., University of Maryland, 1967.

Davis, Cecil Cook, Professor of Industrial Management.

Davis, Lowery Heywood, Head of Agricultural Education Department; Professor of Agricultural Education.
B.S., 1948, M.S., 1952, Auburn University; Ph.D., Ohio State University, 1956.

Davis, Ruby Sellers, Assistant Professor of History.
A.B., 1946, M.A., 1947, University of Georgia.

Dean, Jordan Arthur, Associate Professor of Modern Languages.
A.B., Wofford College, 1933; M.A., Vanderbilt University, 1934.

DeHaven, Ralph Kenneth, Assistant Professor of Agricultural Economics and Rural Sociology.
B.S., Southwest Missouri State College, 1964; M.S., 1966, Ph.D., 1969, University of Missouri.

Dickey, Joseph Freeman, Associate Professor of Dairy Science.

Dillman, Buddy L., Associate Professor of Agricultural Economics and Rural Sociology.
B.S., 1959, M.S., 1961, University of Arkansas; Ph.D., North Carolina State University, 1967.

Dillon, Charles Ronald, Instructor in Botany.

Douglass, Thomas Ernest, Assistant Professor of English.

Dowler, William Minor, Plant Pathologist (USDA); Lecturer in Plant Pathology and Physiology.
B.S., 1954, M.S., 1958, University of Missouri; Ph.D., University of Illinois, 1961.

Drake, Thomas Lynn, Associate Professor of Electrical and Computer Engineering.
B.S., 1940, M.D., 1943, Tulane University.

Dreskin, Erving Arthur, Lecturer in Medical Technology; Co-director, School of Medical Technology, Greenville General Hospital.
B.S., 1910, M.D., 1943, Tulane University.

Dunkle, Bernard Edward, Associate Professor of Engineering Graphics.
B.S., United States Naval Academy, 1935; M.S., Texas A & M University, 1956.

Dunkle, Sue King, Assistant Professor of Mathematics.
B.A., University of Southwestern Louisiana, 1934; M.A., University of Texas, 1936.

Durant, John Alexander, III, Assistant Professor of Entomology and Economic Zoology, Pee Dee Experiment Station.
B.S., 1901, M.S., 1903, Clemson University; Ph.D., Auburn University, 1966.

Durham, Bill Cravely, Instructor in Spanish.

* On leave.
DUTTWEILER, D. W., Adjunct Professor of Environmental Systems Engineering.
B.S.C.E., University of Michigan, 1948; M.S., 1957, Ph.D., 1963, Johns Hopkins University.

DYER, CARL LEROY, Assistant Professor of Industrial Management.
B.S., University of Illinois, 1963; M.E.S., North Carolina State University, 1967.

DYSART, BENJAMIN CLAY, III, Associate Professor of Environmental Systems Engineering.
B.E., 1961, M.S., 1964, Vanderbilt University; Ph.D., Georgia Institute of Technology, 1968.

EDGE, BILLY L., Assistant Professor of Civil Engineering.

EDWARDS, JAMES LEON, Assistant to the Dean, College of Engineering; Acting Head, Department of Mechanical Engineering; Professor of Mechanical Engineering.
B.M.E., Clemson University, 1941; M.S., Pennsylvania State University, 1951; P.E.

EDWARDS, ROBERT LEE, Associate Professor of Animal Science.
B.S., Berea College, 1946; M.S., 1954, Ph.D., 1958, North Carolina State University.

EFLAND, THOMAS DANIEL, Associate Dean, College of Industrial Management and Textile Science, Director of Research, Professor of Textiles.
B.S., North Carolina State University, 1949; M.S., Georgia Institute of Technology, 1956.

EISIMINGER, STERLING KENWOOD, Instructor in English.

EITEL, MICHAEL J., Associate Professor of Materials and Biomedical Engineering.
B.S., University of Tennessee, 1950; Ph.D., University of Illinois, 1954.

EL-BEHERY, HASSAN, Visiting Associate Professor of Textile Science.

ELLING, RUDOLF ERNEST, Associate Professor of Civil Engineering and Engineering Mechanics.
B.S., Michigan State University, 1950; M.S., University of Illinois, 1952; Ph.D., Stanford University, 1967.

ELROD, ALVYN CREIGHTON, Associate Professor of Mechanical Engineering.
B.M.E., 1949, M.M.E., 1951, Clemson University; Ph.D., Purdue University, 1959; P.E.

ENGLAND, ROBERT, Associate Professor of Architecture.
B.A., University of Virginia, 1928; M.A., Oglethorpe University, 1934.

EPPS, WILLIAM MONROE, Head of Plant Pathology and Physiology Department; Professor of Plant Pathology and Physiology; State Plant Pathologist.
B.S., Clemson University, 1937; Ph.D., Cornell University, 1942.

ESKEW, ELIAS BENJON, Associate Professor of Agronomy and Soils.
B.S., Clemson University, 1943, M.S., Ohio State University, 1951.

ETHEREDGE, JAMES MICHAEL, Assistant Professor of Aerospace Studies.
Captain, United States Air Force; B.A., Florence State University, 1961.

FAIN, CHARLES CLIFFORD, Associate Professor of Ceramic Engineering.

FAIRBROTHER, ELWOOD LOVELL, JR., Assistant Professor of Military Science.
Major, United States Army; B.S., Norwich University, 1960.

FAIREY, JOHN EDWARD, III, Assistant Professor of Botany.
B.S., University of South Carolina, 1962; M.S., University of West Virginia, 1964.

FALK, EDWARD L., Professor of Architecture and City Planning.

FANNING, JAMES COLLIER, Associate Professor of Chemistry.
B.S., The Citadel, 1953; M.S., 1956, Ph.D., 1960, Georgia Institute of Technology; Post Doctorate, Tulane University, 1960-61.

FEAR, ARTHUR J., Associate Professor of Speech.
A.B., DePauw University, 1935; M.A., State University of Iowa, 1939; Ph.D., University of Southern California, 1966.

FELDER, HERMAN MCDONALD, JR., Associate Professor of English.
A.B., Wofford College, 1930; M.A., Vanderbilt University, 1937.

FENNELL, ROBERT EMMETT, Assistant Professor of Mathematics.
B.A., Bradley University, 1964; M.S., 1966, Ph.D., 1969, University of Iowa.
FERNÁNDEZ, ELENA GONZALES, Lecturer in Spanish.
A.B., Instituto de la Habana, 1942.

FERNÁNDEZ, GASTÓN JUAN, Assistant Professor of Spanish.
B.S., Instituto de Segunda Enseñanza de Remedios; LL.D., University of Havana, 1942; M.A., University of North Carolina, 1967.

FITCH, LEWIS T., Associate Professor of Electrical and Computer Engineering.
B.S.E.E., Duke University, 1954; M.S., North Carolina State University, 1960; Ph.D., Ohio State University, 1969.

FLATT, JAMES LEVERN, Associate Professor of Mathematics.

FORD, JOHN MARTIN, Associate Professor of Civil Engineering.
B.C.E., Clemson University, 1946; M.S., University of North Carolina, 1950; Ph.D., 1951.

FOX, RICHARD CHARLES, Professor of Entomology and Economic Zoology.

FRAKER, JOHN RICHARD, Instructor in Operations Research.
B.S., 1956, M.S., 1965, University of Tennessee.

FREEMAN, EDWIN ARMISTEAD, Assistant Professor of Music.
B.S., Clemson University, 1949; M.Mus., Louisiana State University, 1954; M.A., Columbia University, 1968.

FREEMAN, DONALD K., Jr., Lecturer in Nursing and in Psychology.

FREEMAN, PATRICIA GAIL, Instructor in Education.

FREEZE, CHESTER RICHARD, Professor of Education.

FRYE, REVIS MILLER, Assistant Professor of Recreation and Park Administration.
B.S., Western Carolina University, 1942; M.A., Columbia University, 1947.

FULMER, JOHN PATRICK, Assistant Professor of Horticulture.
B.S., 1953, M.S., 1955, Clemson University.

FULMER, LOUISE GRAY, Instructor in Mathematics.
A.B., Winthrop College, 1937.

FULTON, JOHN DAVID, Assistant Professor of Mathematics.

GAHAN, LAWRENCE WILLARD, Assistant Professor of Recreation and Park Administration.

GALLOWAY, ELIZABETH BOYCE, Instructor in Education.

GANIM, VIRGINIA LYNN, Instructor in English.

GARNER, THOMAS HAROLD, Professor of Agricultural Engineering.

GARRISON, OLEN BRANFORD, Director of Agricultural Experiment Station; Director of Research in Agriculture; Professor of Horticulture.
B.S., Clemson University, 1933; M.S., Louisiana State University, 1934; Ph.D., Cornell University, 1939.

GAUTHREAX, SIDNEY ANTHONY, JR., Assistant Professor of Zoology.

GELDARD, JOHN FRANCIS, Assistant Professor of Chemistry.

GETTYS, WILLIAM EDWARD, Associate Professor of Physics.
B.S., 1960, M.S., 1961, Clemson University; Ph.D., Ohio University, 1964.

GILCHRIST, RALPH WAYNE, Professor of Electrical and Computer Engineering.
B.S., Tri-State College, 1947; M.S., University of Michigan, 1951; Ph.D., Michigan State University, 1960; Ph.D., 1965.

GILES, JERRY WAYNE, Assistant Professor of Aerospace Studies.
Captain, United States Air Force; B.S., Troy State University, 1961; M.A.T., Middle Tennessee State University, 1970.

* On leave.
GILLILAND, BOBBY EUGENE, Associate Professor of Electrical and Computer Engineering.
B.S., Louisiana Polytechnic Institute, 1958; M.S., 1964, Ph.D., 1967, University of Arkansas; F.E.

GILREATH, JOHN ATKINS, Assistant Professor of Physics.
B.S., 1958, M.S., 1960, Clemson University.

GING, JOHN LEONARD, Associate Professor of Physics.
B.A., Alfred University, 1953; M.S., Carnegie Institute of Technology, 1955; Ph.D., University of North Carolina, 1960.

GOODBUT, ROSE A., Associate Professor of Nursing, Baccalaureate Program.
B.S., George Peabody College for Teachers, 1946; M.P.H., University of Minnesota, 1949.

GODLEY, WILLIE CECIL, Professor of Animal Science.
B.S., Clemson University, 1943; M.S., 1949, Ph.D., 1955, North Carolina State University.

GOLDEN, W. I., Associate Professor of Agricultural Economics and Rural Sociology and Principal Extension Specialist.
B.S., 1958, M.S., 1959, University of Georgia; Ph.D., Texas A & M University, 1968.

GOODIN, CURTIS PAUL, Associate Professor of Electrical and Computer Engineering.
B.S., University of Kentucky, 1948; M.S., Georgia Institute of Technology, 1957.

COREE, JAMES CLEASON, Associate Professor of Engineering Mechanics.

GOSSETT, BILLY JOE, Associate Professor of Agronomy and Soils.
B.S., University of Tennessee, 1957; M.S., 1959, Ph.D., 1962, University of Illinois.

GRABEN, HENRY WILLINGHAM, Associate Professor of Physics.
B.S., Birmingham-Southern College, 1957; M.S., 1961, Ph.D., 1962, University of Tennessee.

GRAHAM, MARGARET SCHWEITZER, Instructor in German.

GRAHAM, WILLIAM DOYCE, Jr., Assistant Professor of Agronomy and Soils.
B.S., Texas Technological College, 1962; M.S., 1965, Ph.D., 1967, Purdue University.

GRAY, FURMAN R., Associate Professor of Industrial Management.
B.A., Furman University, 1951; CPA, S. C. Board of Examiners, 1956; M.S., University of Georgia, 1967.

GRAY, GORDON WALTER, Associate Professor of Education.

GREEN, CLAUD BETHUNE, Dean of Undergraduate Studies; Professor of English.

GRIFFIN, DEWEAL NORTON, Instructor in English.

GRIFFIN, VILLARD STUART, Jr., Associate Professor of Geology.
B.A., 1959, M.S., 1961, University of Virginia; Ph.D., Michigan State University, 1965.

GRUBB, CHARLES ALAN, Assistant Professor of History.

GUM, CUBURN, Associate Professor of English.

GUNNIN, EMERY AARON, Professor of Architecture.
B.S., Clemson University, 1930; A.A.; P.E.

GUNTER, EDITH GEORGIANA, Instructor in Nursing, Associate Degree Program.
B.S.N., Duke University, 1944.

GUNTER, THOMAS H., Jr., Assistant Professor of Industrial Management.

GUTHRIE, RUFUS KENT, Director of Division of Biology; Professor of Microbiology.
B.A., University of Texas, 1948; M.A., University of Texas, 1950; Ph.D., Baylor University, 1954.

HALPIN, JAMES EDWIN, Associate Director of Agricultural Experiment Station; Professor of Plant Pathology and Physiology; Director of Belle W. Baruch Research Institute in Forestry, Wildlife, and Marine Biology at Clemson.
B.S., 1950, M.S., 1951, Ph.D., 1955, University of Wisconsin.
HALL, ELIZABETH J., Associate Professor of Nursing, Baccalaureate Program. 
B.S., Simmons College, 1934; Ed.M., Boston University, 1946.

HALL, JAMES WAYNE, Professor of Chemical Engineering. 
B.S., Texas A & M University, 1950; M.S., 1961, Ph.D., 1963, University of Texas.

HAMILTON, MAX GREENE, Associate Professor of Horticulture, Edisto 
Experiment Station. 
B.S., North Carolina State University, 1949; Ph.D., Cornell University, 1953.

HAMMOND, ALEXANDER FRANCIS, Associate Professor of Engineering Graphics. 
B.S.E.E., 1949, M.S., 1957, Clemson University.

HANLIN, DALE LEE, Assistant Professor of Animal Science. 
B.S., Kansas State University, 1951; M.S., Texas A & M University, 1954.

HANNAH, HOWARD BARRY, Assistant Professor of English. 

HARDEN, JOHN CHARLES, JR., Associate Professor of Mathematics. 
B.S., Mississippi College, 1947; M.A., University of Tennessee, 1949.

HARLE, THURMAN CRAIG, Professor of Mechanical Engineering. 
B.S.M.E., University of Tennessee, 1946; M.S.M.E., Virginia Polytechnic Institute, 1949; Ph.D., Georgia Institute of Technology, 1965.

HARE, JOHN FRANKLIN, Assistant Professor of Military Science. 
Lieutenant Colonel, Infantry, United States Army, B.S., Clemson University, 1943.

HARE, WILLIAM RAY, JR., Associate Professor of Mathematics. 
B.S., Henderson State Teachers College, 1957; M.S., 1959, Ph.D., 1961, University of Florida.

HARRIS, JACKIE RAY, Assistant Professor of Education. 
B.A., Baylor University, 1956; M.Ed., North Texas State University, 1960; Ed.D., University of Houston, 1968.

HARRISON, EUGENE, Draper Professor of Mechanical Engineering. 
B.S., 1951, M.S., 1952, Texas A & M University; Ph.D., Michigan State University, 1962.

HARSHMAN, RICHARD CALVERT, Professor of Chemical Engineering. 
B.A., Ohio Wesleyan University, 1947; M.S., 1949, Ph.D., 1951, Ohio State University.

HASELTON, GEORGE MONTGOMERY, Assistant Professor of Geology. 
B.A., Colby College, 1951; M.A., Boston University, 1957; Ph.D., Ohio State University, 1967.

HASH, JOHN ALEX, Assistant Professor of Agricultural Education. 

HATCHER, ROBERT DEAN, JR., Associate Professor of Geology. 

HAUN, JOSEPH RHODES, Associate Professor of Horticulture. 
A.B., Berea College, 1948; M.S., 1950, Ph.D., 1951, University of Maryland.

HAW, LARRY STODDARD, Instructor in Mathematics. 
B.S., University of Southwestern Louisiana, 1952; M.Ed., Louisiana State University, 1957; M.S., University of Southwestern Louisiana, 1965.

HAYMOND, ROBERT EDWARD, Associate Professor of Mathematics. 
B.S., University of South Carolina, 1954; M.S., California Institute of Technology, 1956; Ph.D., University of Oregon, 1959.

HAYS, RUTH LANIER, Assistant Professor of Zoology. 

HAYS, SIDNEY BROOKS, Head, Department of Entomology and Economic 
Zoology; Associate Professor of Entomology and Economic Zoology. 
B.S., 1953, M.S., 1958, Auburn University; Ph.D., Clemson University, 1962.

HEATON, RALPH BEACHAM, JR, Instructor in English. 
B.A., Furman University, 1964; M.A., University of Virginia, 1965.

HEBERT, ROBERT FRANCIS, Assistant Professor of Economics. 

HELGERT, HERMANN JOSEP, Assistant Professor of Electrical and Computer 
Engineering. 
B.S., University of Buffalo, 1962; M.S., 1964, Ph.D., 1966, State University of New 
York at Buffalo.

HENNINGSON, ROBERT WALTER, Professor of Dairy Science, Assistant Dean 
of University Research. 

HENNICKS, DONALD MAURICE, Associate Professor of Food Science. 
B.S., University of Missouri, 1957; M.S., Purdue University, 1961; Ph.D., University of Missouri, 1965.
HENRY, Louis Lee, Associate Professor of English.
B.S., Clemson University, 1953; M.A., 1958, Ph.D., 1965, Florida State University.

HESTER, Jarrett Charles, Associate Professor of Mechanical Engineering.

HICE, Jean Langston, Assistant Professor of Education.

HILL, James Riley, Jr., Associate Professor of Animal Science.
B.S., 1936, M.S., 1958, Clemson University; Ph.D., North Carolina State University, 1965.

HILL, Patucia Kneas, Assistant Professor of History.

HIND, Alfred Thomas, Jr., Professor of Mathematics.
A.B., 1934, M.A., 1936, Emory University; Ph.D., University of Georgia, 1952.

HIPPS, Opal Shepard, Instructor in Nursing, Baccalaureate Program.

HITE, James Cleveland, Assistant Professor of Agricultural Economics and Rural Sociology.
B.S., Clemson University, 1963; M.A., Emory University, 1964; Ph.D., Clemson University, 1966.

HOUSSON, James Harvey, Alumni Professor of Chemistry.
B.S., University of South Carolina, 1939; M.A., 1947, Ph.D., 1953, Emory University.

HOODES, Vernon Seymour, Professor of Architecture.
B.S., Harvard College, 1934; M.Arch., Harvard University, 1939.

HOLMAN, Harriet R., Associate Professor of English.
A.B., Winthrop College, 1934; A.M., University of Michigan, 1939; Ph.D., Duke University, 1948.

HOLMAN, James Richard, Assistant Professor of Experimental Statistics and Assistant Statistician, Computer Center.
B.S., Tennessee Technological University, 1965; Ph.D., Clemson University, 1968.

HOLMES, Paul Thayer, Associate Professor of Mathematics.

HOLT, Albert Hamilton, Associate Professor of English.
A.B., 1939, M.A., 1947, University of North Carolina; Ph.D., Vanderbilt University, 1938.

HOOKE, Clarence Elam, Jr., Associate Professor of Agricultural Engineering.
B.S., 1935, M.S., 1961, Ph.D., 1964, North Carolina State University; P.E.

HOOK, Norris Keenan, Jr., Assistant Professor of Military Science.
Captain, Corps of Engineers, United States Army; B.S., Wofford College, 1965.

HORTON, John Banner, Assistant Professor of Military Science.
Major, Signal Corps, United States Army; B.A., Wake Forest University, 1960.

HOWARD, Gordon Edward, Assistant Professor of Recreation and Park Administration.

HUBBARD, Hershell Ray, Assistant Professor of Aerospace Studies.
Captain, United States Air Force; B.S., University of Arizona, 1963; M.S., University of Oklahoma, 1968.

HUBBARD, Julius Clifford, Jr., Professor of Textiles.
B.S., Clemson University, 1942; M.S., Georgia Institute of Technology, 1950.

HUBBARD, John William, Associate Professor of Agricultural Economics and Rural Sociology.
B.S., Berea College, 1944; M.S., 1958, Ph.D., 1962, University of Kentucky.

HUDSON, William Garraha, Associate Professor of Mechanical Engineering.
B.M.E., 1946, M.S., 1957, Clemson University; M.S., University of Michigan, 1965; P.E.

HURY, Cecil O., Jr., Instructor in Engineering Graphics.

HUFF, Lorenz Ditman, Professor of Physics.
B.S., 1927, M.S., 1928, Oklahoma University; Ph.D., California Institute of Technology, 1931.

HUFFMAN, John William, Professor of Chemistry.
HUBERT, Samuel F., Associate Dean for Engineering Research and Interdisciplinary Programs; Associate Professor of Materials Engineering; and Acting Head, Division of Interdisciplinary Studies.

HUNTER, ROBERT HOWARD, Head, Visual Studies Department; Professor of Architecture.

IDOL, JOHN LANE, JR., Associate Professor of English.
B.S., Appalachian State University, 1958; M.A., 1961, Ph.D., 1965, University of Arkansas.

INGRAM, BYRON ROSS, Instructor in Zoology.

IRVIN, ROBERT RYLAND, JR., Assistant Professor of Military Science.
Captain, Infantry, United States Army; B.A., Clemson University, 1966.

ISRAEL, CHARLES MONT, Assistant Professor of English.

JACOBS, OTHA JOHN, Assistant Professor of Chemistry.
B.S., Southwestern at Memphis, 1962; Ph.D., University of Tennessee, 1965; Post Doctorate, Princeton University, 1966-68.

JAMESON, LAKE HUGH, Associate Professor of Engineering Graphics.
B.S., Clemson University, 1942; M.S., North Carolina State University, 1952.

JANZEN, JACOB JOHN, Professor of Dairy Science.
B.S.A., University of Manitoba, 1944; M.S., 1947, Ph.D., 1952, University of Wisconsin; Post Doctorate, University of Wisconsin, 1952-53.

JEN, JOSPEH JU-W-SHAN, Assistant Professor of Food Science.
B.S., National Taiwan University, 1960; M.S., Washington State University, 1964; Ph.D., University of California, Berkeley, 1969.

JENSEN, ARTHUR KENNETH, Director of Vocational Education Media Center; Associate Professor of Education.
B.S., 1951, M.S., 1956, Ph.D., 1961, University of Wisconsin.

JOEKL, CHARLES MURRAY, II, Instructor in History.
B.A., University of Iowa, 1968; M.A., University of Missouri, 1970.

JOHNSON, ALBERT WAYNE, Assistant Professor of Entomology and Economic Zoology, Pee Dee Station.

JOHNSON, CHARLES ROBERT, Assistant Professor of Horticulture.
B.S., Colorado State University, 1964; Ph.D., Oregon State University, 1969.

JOHNSON, JAMES KARL, JR., Associate Professor of Mechanical Engineering.
B.M.E., 1950, M.S., 1958, Clemson University; M.S., Georgia Institute of Technology, 1966; P. E.

JOHNSTON, WALTER EDWARD, Assistant Professor of Experimental Statistics.

JONES, CHAMP MCMILLIAN, Professor of Agronomy and Soils.
B.S., Clemson University, 1939; M.S., Cornell University, 1940; Ph.D., Michigan State University, 1952.

JONES, JACK EDENFIELD, Assistant Professor of Poultry Science.

JONES, JESS WILLARD, Director of Resident Instruction; Professor of Agronomy.
B.S., Clemson University, 1937; M.S., 1938, Ph.D., 1953, Cornell University.

JONES, ROBERT E., JR., Lecturer in Medical Technology; Co-Director, School of Medical Technology, and Pathologist, Anderson Memorial Hospital.
B.A., Duke University, 1956; M.D., Bowman Gray School of Medicine, 1960.

JONES, ULYSSES SIMPSON, Head of Agronomy and Soils Department; Professor of Agronomy and Soils.
B.S., Virginia Polytechnic Institute, 1939; M.S., Purdue University, 1942; Ph.D., University of Wisconsin, 1947.

* On leave.
JORDAN, WRIGHT SINQUEFIELD, Assistant Professor of Horticulture.
B.S.A., 1959, M.S., 1961, University of Georgia; Ph.D., Pennsylvania State University, 1965.

JUTRAS MICHEL WILFRID, Associate Professor of Agronomy and Soils.
B.S., University of Massachusetts, 1958; M.S., University of Connecticut, 1961; Ph.D., Iowa State University, 1964.

KAUFMANN, ANDERS J.,* Associate Professor of Architecture.
B.Arch., Cornell University, 1956; M.Arch., University of Pennsylvania, 1962; A.I.A.

KEATING, PATRICK HAASE, Assistant Professor of Military Science.
Captain, Infantry, United States Army; B.S., United States Military Academy, 1966.

KEINATH, THOMAS M., Assistant Professor of Environmental Systems Engineering.

KELLER, FREDERICK JACOB, Associate Professor of Physics.

KELLY, JAMES WELBORN, Assistant Professor of Dairy Science.
B.S., 1939, M.S., 1962, Clemson University.

KENELLY, JOHN WILLIS, Head of Mathematics Department; Professor of Mathematics.
B.S., Southeastern Louisiana College, 1957; M.S., University of Mississippi, 1957; Ph.D., University of Florida, 1961.

KERSEY, ROBERT NOEL, JR., Associate Professor of Electrical and Computer Engineering.
B.S. in E.E., Georgia Institute of Technology, 1942; M.S., Clemson University, 1959.

KILGORE, DONALD GIBSON, JR., Lecturer in Medical Technology; Co-Director, School of Medical Technology, and Pathologist, Greenville General Hospital.
M.D., Southwestern Medical College of the University of Texas, 1949.

KING, EDWIN WALLACE, Professor of Entomology and Economic Zoology.
B.S., University of Massachusetts, 1941; M.S., Virginia Polytechnic Institute, 1947; Ph.D., University of Illinois, 1951; Post Doctorate, North Carolina State University, 1967-68.

KING, MORRIS AUDREY, Head of Elementary and Secondary Education Department; Professor of Education.

KING, THOMAS RAY, Assistant Professor of Military Science.
Major, Infantry, United States Army; B.S., University of Wisconsin, 1960.

KING, WILLIS ALONZO, Head of Department of Dairy Science; Professor of Dairy Science.
B.S., Clemson University, 1936; M.S., 1938, Ph.D., 1940, University of Wisconsin.

KINGSLAND, GRAYDON CHAPMAN, Associate Professor of Plant Pathology and Physiology.
B.S., University of Vermont, 1952; M.S., University of New Hampshire, 1953; Ph.D., Pennsylvania State University, 1958.

KIRKLEY, FRANCIS EDWARD, Associate Professor of Agricultural Education.
B.S., Clemson University, 1929; M.S., University of Kentucky, 1951.

KIRKWOOD, CHARLES EDWARD, JR., Associate Professor of Mathematics; Analyst, Computer Center.
A.B., Lynchburg College, 1935; M.S., University of Georgia, 1937.

KIRCH, MARGUERITE ANN, Instructor in French.
A.B., St. Mary's Dominican College, 1959; M.A., Louisiana State University, 1970.

KLAWITTER, JEROME JOHN, Assistant Professor of Bioengineering.
B.S., Alfred University, 1964; M.S., 1966, Ph.D., 1970, Clemson University.

KNAPP, RONALD JAMES, Assistant Professor of Sociology.

KNOWLAND, RALPH EDWARD, Associate Professor of Architecture.
B.Arch., University of Manitoba, 1944; M.B.A., University of Western Ontario, 1966; R.A.I.C.

KOLDYKE, MARTIN R., JR., Assistant Professor of Aerospace Studies.
Major, United States Air Force; B.S., Ball State University, 1952.

* On leave.
LaBECkI, GERALDINE, Dean, School of Nursing; Director, Baccalaureate Degree Program in Nursing; Professor of Nursing.

LAFODAY, WILLIAM C., Visiting Lecturer in Industrial Management and Director for Professional Development.
B.S., Clemson University, 1951; M.A., University of Virginia, 1952.

LAFFITTE, GERMAINE MARIE, Visiting Instructor in French.

LAFLEUR, KERMIT STILLMAN, Associate Professor of Agronomy and Soils.
B.A., 1937, M.S., 1964, Colby College; Ph.D., Clemson University, 1966.

LACHONE, JOHN WALLACE, Associate Professor of Mathematics.
B.S., Clemson University, 1932; M.A., Vanderbilt University, 1934.

LAITALA, EVERETT, Head of Engineering Services Department; Professor of Industrial Engineering.
B.S.M.E., 1934, M.S., 1937, M.E., 1945, University of Minnesota; P.E.

LAMBERT, JERRY ROY, Associate Professor of Agricultural Engineering.
B.A.E., 1958, M.S.E., 1962, University of Florida; Ph.D., North Carolina State University, 1964; P.E.

LAMBERT, ROBERT STANSBURY, Head of Social Sciences Department; Professor of History.

LAMOND, DONALD ROSS, Visiting Professor of Animal Science.

LANDER, ERNEST MCPHERSON, JR., Alumni Professor of History.

LANDERS, KNOX SCHAFER, Assistant Professor of Chemistry.
B.S., 1951, M.S., 1955, University of Alabama.

LANDRITH, HAROLD FOCHONE, Dean, College of Education; Professor of Education.
B.S., Clemson University, 1948; M.A., Vanderbilt University, 1949; Ed.D., University of Houston, 1960.

LANE, CARL LEATON, Assistant Professor of Forestry.
B.S., 1952, M.S., 1961, North Carolina State University; Ph.D., Purdue University, 1968.

LANHAM, WILLIAM JOSEPH, Head of Agricultural Economics and Rural Sociology Department; Professor of Agricultural Economics and Rural Sociology.
B.S., 1943, M.S., 1959, Clemson University; Ph.D., North Carolina State University, 1963.

LAROCHE, EVANS ALLEN, Associate Professor of Textiles.
B.S., Clemson University, 1942; M.S., Georgia Institute of Technology, 1951.

LASKAR, AMULYA LAL, Associate Professor of Physics.
B.S., S. N. College, 1950; M.S., Calcutta University, 1952; Ph.D., University of Illinois, 1960.

LASKAR, RENU CHAKRAVARTI, Associate Professor of Mathematics.
B.A., Patna University, 1950; M.A., Bihar University, 1955; Ph.D., University of Illinois, 1962.

LATHROP, JAY WALLACE, Professor of Electrical and Computer Engineering.
B.S., 1948, M.S., 1949, Ph.D., 1952, Massachusetts Institute of Technology.

LATORRE, DONALD RUTLEDGE, Assistant Professor of Mathematics.

LATORRE, JUEL GILLAM, Instructor in Mathematics.

LAW, ALBERT GILES, Associate Professor of Engineering Mechanics.
B.S.C.E., University of Illinois, 1954; M.S.C.E., 1960, Ph.D., 1965, University of Wisconsin; P.E.

LAW, HERBERT LIVINGSTON, Instructor in German.

LAZAR, JAMES TARLTON, JR., Professor of Dairy Science.
B.S., Clemson University, 1943; M.S., Cornell University, 1949; Ph.D., North Carolina State University, 1955.

* On leave.
LEBOURGEOS, JOHN YOUNG, Instructor in History.
B.A., Yale University, 1960; M.A., Tulane University, 1968.

LEDEBOER, FREDERICK BERNARD, Assistant Professor of Botany.
B.S., Oregon State University, 1960; M.S., 1966, Ph.D., 1969, University of Rhode Island.

LEE, PETER, Associate Professor of Forestry.
B.Arch., University of Minnesota, 1958; M.Arch., Massachusetts Institute of Technology, 1967; A.I.A.

LEEMUS, ROGER PHILLIP, Assistant Professor of History.
A.B., Villanova University, 1959; M.A., University of Massachusetts, 1961; Ph.D., University of Wisconsin, 1970.

LEFORT, HENRY GERARD, Associate Professor of Ceramic Engineering.
B.Cer.E., Clemson University, 1952; M.S.Cr.E., 1957, Ph.D., 1960, University of Illinois.

LEHOTSKY, KOLOMAN, Professor of Forestry.
Ing., Bohemian Technical University, Prague, Czechoslovakia, 1928; Ph.D., University of Michigan, 1934.

LEMONS, JACK EUGENE, Assistant Professor of Materials Engineering.

LEWIS, ALEXANDER DODGE, Professor of Mechanical Engineering.
B.S. in M.E., University of Tennessee, 1939; M.M.E., Yale University, 1946; P.E.

LEWIS, HODGES ALVIN, Instructor in French.
B.A., University of Georgia, 1963.

LIGON, JAMES TERENCE, Associate Professor of Agricultural Engineering.
B.S., Clemson University, 1957; M.S., 1959, Ph.D., 1961, Iowa State University; P.E.

LINDSTROM, FREDERICK JOHN, Professor of Chemistry.
B.S., 1951, M.S., 1953, University of Wisconsin; Ph.D., Iowa State University, 1959.

LITTLE, KAY, Teaching Supervisor, School of Medical Technology, Anderson Memorial Hospital.
B.S., Clemson University, 1967; Medical Technology (ASCP), 1967.

LITTLEJOHN, CHARLES EDWARD, Head of Chemical Engineering Department; Professor of Chemical Engineering.
B.S., Clemson University, 1940; M.Ch.E., North Carolina State University, 1941; Ph.D., Virginia Polytechnic Institute, 1952; P.E.

LONG, JIM THOMAS, Professor of Electrical and Computer Engineering.
B.E.E., Clemson University, 1943; M.S. in E.E., 1949, Ph.D., 1964; Georgia Institute of Technology.

LONG, NEEDHAM L., Lecturer in Medical Technology; Co-Director, School of Medical Technology, and Pathologist, Anderson Memorial Hospital.
B.S., University of Alabama, 1952; M.D., Medical College of Alabama, 1956.

LOYACANO, HAROLD A., Jr., Assistant Professor of Entomology and Economic Zoology.
B.S., Tulane University, 1962; M.S., Louisiana State University, 1967; Ph.D., Auburn University, 1970.

LUDEMAN, JOHN KEITH, Assistant Professor of Mathematics.

LUKAWECZY, ANN RUSSELL, Lecturer in Nursing, Associate Degree Program.
A.B., Shorter College, 1949; B.S., Emory University, 1952; M.A., University of Chicago, 1959.

LUKAWECZY, STANLEY MICHAEL, Associate Professor of Mathematics.
B.S., Southeastern Louisiana College, 1953; M.S., 1957, Ph.D., 1961, Auburn University.

LUNDGREN, JOHN LAUREN, Head of Textile Department; Associate Professor of Textile Chemistry.
B.Ch.E., University of Minnesota, 1948; Ph.D., University of California, 1952.

LYONS, DONALD W., Associate Professor of Textile Science and Mechanical Engineering.
B.M.E., 1961, Ph.D., 1966, Georgia Institute of Technology; P.E.

LYTLE, JOHN STEVENS, Assistant Professor of Agricultural Economics and Rural Sociology.

MACAULAY, HUGH HOLLEMAN, Jr., Alumni Professor of Economics.
B.S., 1947, M.S., 1948, University of Alabama; Ph.D., Columbia University, 1957.
McCARTER, JACkSON HOWARD, Lecturer in Medical Technology; Co-director, School of Medical Technology, Greenville General Hospital.
M.D., University of Pittsburgh, 1963.

McCLAIN, EUGENE Frederick, Assistant Professor of Agronomy and Soils.
B.S., University of Idaho, 1954; M.S., University of California, 1956.

McCLARE, ALAN David, Instructor in History.

McCLURE, HARLAN Ewart, Dean, College of Architecture; Professor of Architecture.

McCOLLough, Joe LAWRENCE, Assistant Professor of Philosophy.

MCcOmmE, JAMES CALVIN, JR., Assistant Professor of Animal Science.

McCormac, Jack CLARK, Associate Professor of Civil Engineering.
B.S., The Citadel, 1948; M.S., Massachusetts Institute of Technology, 1949; P.E.

McCormac, jay ALLEN, Assistant Professor of Military Science.
Captain, Quartermaster, United States Army; B.S., Murray State College, 1964.

McGee, charles Mckay, JR., Associate Professor of English.
A.B., Furman University, 1934; A.M., Duke University, 1941.

McGregor, Rob Roy, JR., Assistant Professor of French.
B.A., Erskine College, 1952, B.D., Columbia Theological Seminary, 1957; M.A., University of South Carolina, 1965; Ph.D., University of Georgia, 1969.

McGregor, William HENRY Davis, Dean, College of Forest and Recreation Resources; Professor of Forestry.
B.S., Clemson University, 1951; B.S.F. and M.F., University of Michigan, 1953; Ph.D., Duke University, 1958.

McHugh, Carl Manning, Coordinator of Engineering Graphics; Associate Professor of Engineering Graphics.
B.S., Clemson University, 1936; P.E.

McLaughlin, John Joseph, Associate Professor of English.

MCcLEAN, EDWARD L., Assistant Professor of Agricultural Economics and Rural Sociology.
B.S., 1961, M.S., 1964, University of Wisconsin; Ph.D., Iowa State University, 1968.

MCnatt, jo Ann, Assistant Professor of French.
B.A., Furman University, 1956; M.A., Emory University, 1959.

Macy, Jacques Berr, Assistant Professor of French.

Maertens, George KAMEL, Head of Military Science Department, Professor of Military Science.
Colonel, Infantry, United States Army; B.S., United States Military Academy, 1943.

Mahaffee, Joseph Walter, Assistant Professor of Military Science.
Lieutenant Colonel, Infantry, United States Army; B.S., Clemson University, 1949; Command General Staff College, 1968.

Malphius, Lewis Daniel, Associate Professor of Agricultural Economics and Rural Sociology.
B.S., Clemson University, 1938; M.S., University of Tennessee, 1940; Ph.D., Purdue University, 1954.

Malstrom, Carl Wayne, Instructor of Electrical and Computer Engineering.
B.S., University of Tennessee at Chattanooga, 1960.

Manson, Joseph Richard, Assistant Professor of Physics.
B.S., University of Richmond, 1965; Ph.D., University of Virginia, 1969.

Manwiller, Alfred, Associate Professor of Agronomy and Soils.
B.S., 1938, M.S., 1939, Iowa State University; Ph.D., Pennsylvania State University, 1944.

Maron, Elke Maria, Instructor in French.
B.A., University of South Carolina, 1963; M.A., Tulane University, 1970.

Martin, John Allen, JR., Associate Professor of Horticulture.
B.S., Clemson University, 1936.
MARTIN, JOHN CAMPBELL, Professor of Electrical and Computer Engineering.
B.E.E., Clemson University, 1948; M.S., Massachusetts Institute of Technology, 1953; Ph.D., North Carolina State University, 1962.

MARULLO, NICASIO PHILLIP, Associate Professor of Chemistry.
B.S., Queens College, 1952; Ph.D., Polytechnic Institute of Brooklyn, 1961; Post Doctorate, California Institute of Technology, 1960-61; Senior NSF Fellow, Princeton University, 1969, University of Strasburg, 1970.

MARVIN, JOHN HENRY, JR., Associate Professor of Textiles.
B.S., Clemson University, 1941; M.S., Georgia Institute of Technology, 1960.

MATHES, ANDREW CLARK, Professor of Botany.
A.B., 1928, M.A., 1931, Ph.D., 1939, University of North Carolina.

MAURER, DONALD EDWIN, Associate Professor of Industrial Education.

MATTOX, RONALD DARIUS, Lecturer in Vocational Education.
B.S., Georgia Southern College, 1968.

MAXWELL, JAMES DONALD, Assistant Professor of Agronomy and Soils.
B.S., Mississippi State University, 1962; M.S., Cornell University, 1963; Ph.D., North Carolina State University, 1968.

MEANS, GEORGE CALVIN, JR., Professor of Architecture.
B. of Arch., Western Reserve University, 1947; M.Arch., Georgia Institute of Technology, 1955; A.I.A.

MEEKS, CHARLES DAVIDPORT, Assistant Professor of Engineering Graphics.
B.M.E., Clemson University, 1942.

MELARAGNO, MICHELLE G., Associate Professor of Architecture.
Diploma, College Nazareno, 1948; Ph.D., University of Bari, 1959.

MELSHIEVER, STEPHEN SAMUEL, Assistant Professor of Chemical Engineering.
B.S., Louisiana State University, 1965; Ph.D., Tulane University, 1969.

MEYER, STEPHEN PAUL, Assistant Professor of Military Science.
Captain, Corps of Engineers, United States Army; B.S., Drexel Institute of Technology, 1965.

MILES, JAMES FRANKLIN, Associate Professor of Agricultural Economics and Rural Sociology.
A.B., 1938, M.A., 1939, University of South Carolina; Ph.D., Cornell University, 1951.

MILLER, DONALD PIGUET, Associate Professor of Physics.
B.S., Texas A&M University, 1948; M.S., Tulane University, 1952; Ph.D., Polytechnic Institute of Brooklyn, 1962.

MILLER, MAX GARDNER, Associate Professor of Physics.
B.S., 1953, Ph.D., 1961, University of North Carolina.

MITCHELL, CHARLIE ROBERTSON, Assistant Professor of Engineering Mechanics.
B.S., Virginia Polytechnic Institute, 1956; M.S.C.E., West Virginia University, 1961; Ph.D., 1964.

MITCHELL, JACK HARRIS, JR., Professor of Food Science.
B.S., Clemson University, 1933; Ph.D., Purdue University, 1941.

MIXON, ROBERT FLOYD, Assistant Professor of Spanish.

MOONEY, FRANKLIN KEMPION, Assistant Professor of Architecture.
B.Arch., Clemson University, 1962; M.Arch., Yale University, 1963.

MOORE, RONALD RALPH, Assistant Professor of Bioengineering.
B.S., Clemson University, 1964; D.M.D., University of Kentucky, 1970.

MOORMAN, ROBERT WARDLAW, Head of Engineering Mechanics Department; Professor of Engineering Mechanics.
B.C.E., Clemson University, 1940; M.S., 1947, Ph.D., 1955, University of Iowa; Ph.D., 1956, University of Minnesota.

MORGAN, HARVEY EUGENE, JR., Associate Professor of Industrial Education.
B.S., 1951, M.S., 1956, Clemson University.

MORRIS, FRANK F., Lecturer in Architecture.
Washington and Lee University, 1916-18; A.C.C.

MOZLEY, JAMES HAMMOND III, Assistant Professor of Military Science.
Lieutenant Colonel, Infantry, United States Army; B.S., Troy State University, 1949.

MULLINS, JOSEPH CHESTER, Associate Professor of Chemical Engineering.

MUSEN, HAROLD LOUIS, Professor of Agronomy and Soils, Edisto Experiment Station.
B.S., Tennessee Polytechnic Institute, 1949; M.S., Auburn University, 1951; Ph.D., Rutgers University, 1955.
NASH, RICHARD FULLER, JR., Assistant Professor of Entomology and Economic Zoology.
B.S., 1956; M.S., 1965, Auburn University; Ph.D., Clemson University, 1968.

NEWTON, ALFRED FRANKLIN, Head of Industrial Education Department; Professor of Industrial Education.

NICHOLSON, JAMES HARVEY, Assistant Professor of Mathematics.
B.A., Southern Methodist University, 1950; M.A., University of Texas, 1957.

NOBLET, RAYMOND, Assistant Professor of Entomology and Economic Zoology.

NORDQUIST, LOWELL EUGENE, Instructor in Economics.
B.S., North Dakota State University, 1968; M.A., Western Michigan University, 1969.

NOWACK, ROBERT FRANCIS, Associate Professor of Engineering Mechanics.
B.S., Carnegie-Mellon University, 1948; M.S., University of Pittsburgh, 1952.

O’DELL, GLENN DEWITT, Assistant Professor of Dairy Science.
B.S., 1953, M.S., 1955, Clemson University; Ph.D., University of Georgia, 1970.

OGLE, WAYNE LEROY, Professor of Horticulture.
B.S., University of Tennessee, 1948; M.S., University of Delaware, 1950; Ph.D., University of Maryland, 1952.

OLSEN, NORMAN LACOUR, Jr., Associate Professor of English.

OLSON, EDWARD STURE, Associate Professor of Textile Chemistry.
B.S., 1938, M.S., 1960, Clemson University.

OWENS, RAMETH RICHARD, Assistant Professor of History.

OWENS, WALTON HARRISON, Jr., Assistant Professor of Political Science.
A.B., Emory University, 1958; M.A., 1961, Ph.D., 1967, Florida State University.

OWINGS, MARVIN ALPHIEUS, Head of English Department; Professor of English.
A.B., Wofford College, 1931; M.A., 1932, Ph.D., 1941, Vanderbilt University.

PACKER, MYRTON ALFRED, Coordinator, Office of Educational Services; Associate Professor of Education.

PAGE, NORWOOD RUFUS, Head of Agricultural Chemical Services Department; Professor of Agronomy and Soils.
B.S., Clemson University, 1939; M.S., North Carolina State University, 1941; Ph.D., University of Georgia, 1959.

PALMER, MERRILL CRAIG, Director of Computer Center; Associate Professor of Mathematics.
B.S., University of Chattanooga, 1947; M.A., Vanderbilt University, 1948.

PARK, EUGENE, Associate Professor of Mathematics.
A.B., University of Georgia, 1939; M.A., Lehigh University, 1941.

PARRADO, PEDRO FRANCISCO, Assistant Professor of Spanish.
LL.D., University of Havana, 1941; M.A., University of Miami, 1970.

PARRY, THOMAS IHERBERT, Assistant Professor of Education.

PATE, DOVE HENRY, Jr., Assistant Professor of Industrial Education.

PATTON, MICHAEL FRANKLIN, Lecturer in Medical Technology; Director of Medical Technology, Spartanburg General Hospital.
M.D., Medical University of South Carolina, 1949.

PAYNTER, MALCOLM JAMES BENJAMIN, Associate Professor of Microbiology.

PEAVLER, ROBERT NEAL, Assistant Professor of Aerospace Studies.
Captain, United States Air Force; B.B.A., Oklahoma University, 1961.

PEBLER, THOMAS CHRISTOPHER, Professor of Agronomy and Soils.
B.S., North Carolina State University, 1929; Ph.D., Cornell University, 1933.

PENNSCOTT, WILLIAM WALTER, Associate Professor of Education.

D.V.M., University of Georgia, 1966.

Saunders, Richard Leroy, Jr., Assistant Professor of History.

Savitsky, George Boris, Associate Professor of Chemistry.
B.S., Aurora University, 1947; Ph.D., University of Florida, 1959; Post Doctorate, Princeton University, 1959-61.

Savitsky, Ludmila Alexander, Lecturer in Russian.

Sawyer, Corinne Holt, Assistant Professor of English.
B.A., 1945, M.A., 1948, University of Minnesota; Ph.D., University of Birmingham, 1954.

Schonike, Roland Ernst, Associate Professor of Forestry.
B.S., 1951, M.S., 1953, Ph.D., 1962, University of Minnesota.

Schwarz, Arnold Edward, Dean of Graduate Studies and University Research; Associate Professor of Civil Engineering.

Seamon, Leon Edward, Assistant Professor of Spanish.
B.S., Georgia Institute of Technology, 1962; M.A., University of Georgia, 1964.

Sefick, Harold John, Associate Professor of Horticulture.
B.S., 1935, M.S., 1937, Rutgers University.

Sen, Taze Leonard, Head of Horticulture Department; Professor of Horticulture.
B.S., Clemson University, 1939; M.S., 1950, Ph.D., 1958, University of Maryland.

Seo, Kenzo, Associate Professor of Mathematics.
B.S., Tokyo University of Education, 1953; M.S., 1958, Ph.D., 1962, Purdue University.

Shain, William Arthur, Associate Professor of Forestry.
B.S.F., 1953, M.F., 1957, University of Georgia; Ph.D., Michigan State University, 1963.

Shannon, Russell Delbert, Associate Professor of Economics.

Sherrill, Max Douglas, Associate Professor of Physics.

Shively, Jessup MacLean, Associate Professor of Biochemistry.
B.S., 1957, M.S., 1959, Ph.D., 1962, Purdue University.

Shuler, Cyril O., Associate Professor of Industrial Management.
B.S., Clemson University, 1934; M.Litt., University of Pittsburgh, 1951; Ph.D., American University, 1966.

Simon, Frederick T., J. E. Sirrine Professor of Textile Science.
B.S., Morris Harvey College, 1955; M.S., Marshall University, 1958.

Simms, Ernest Theodore, Jr., Associate Professor of Horticulture.
B.S.A., University of Georgia, 1954; M.S.C., 1959, Ph.D., 1962, Ohio State University.

Simms, John Barber, Assistant Professor of English.

Sitterly, Wayne Robert, Superintendent and Professor of Plant Pathology and Physiology, Truck Experiment Station.
B.S., Iowa State University, 1953; M.S., 1955, Ph.D., 1957, Purdue University.

Skardon, Beverly Norton, Assistant Professor of English.
B.S., Clemson University, 1938; M.A., University of Georgia, 1964.

Skelsey, George Calvin, Jr., Associate Professor of Animal Science.

Skelton, Billy Ray, Associate Professor of Economics.
B.S., 1956, M.S., 1958, Clemson University; Ph.D., Duke University, 1964.

Skelton, Bobby Joe, Associate Professor of Horticulture.
B.S., 1957, M.S., 1960, Clemson University; Ph.D., Virginia Polytechnic Institute, 1966.
34  Teaching and Research Faculties

SKELTON, THOMAS EUGENE, Assistant Professor of Entomology and Economic Zoology.
B.S., Clemson University, 1953; M.S., 1956, Ph.D., 1969, University of Georgia.

SKOPE, MALCOLM JOHN, Professor of Physics.
B.S., Clemson University, 1956; Ph.D., University of Virginia, 1960.

SLANN, MARTIN WAYNE, Assistant Professor of Political Science.
A.B., University of Miami, 1964; M.A., University of Connecticut, 1966; Ph.D., University of Georgia, 1970.

SMITH, CHESTER ROLAND, Associate Professor of Industrial Management.
B.S., University of Alabama, 1941; M.A., 1947, Ph.D., 1950, University of Virginia.

SMITH, DONALD HUGH, Instructor in Sociology.

SNELL, ABALOM WEST, Head of Agricultural Engineering Department; Professor of Agricultural Engineering; Chairman of Directorate of the Water Resources Research Institute.
B.S., Clemson University, 1949; M.S., Iowa State University, 1952; Ph.D., North Carolina State University, 1964; P.E.

SNELSHIRE, ROBERT WILLIAM, Associate Professor of Electrical and Computer Engineering.

SNIPES, DAVID STRANGE, Assistant Professor of Geology.
B.S., Wake Forest University, 1950; Ph.D., University of North Carolina, 1965.

SODCZYK, ANDREW FLORIAN, Samuel Maner Martin Professor of Mathematics.
B.A., 1935, M.A., 1936, University of Minnesota; Ph.D., Princeton University, 1939.

SOLIS, JUAN DE LA CRUZ, Assistant Professor of Poultry Science.
B.S., New Mexico State University, 1962; M.S., University of New Hampshire, 1964; Ph.D., Auburn University, 1968.

SPENCER, HAROLD GARTH, Head of Chemistry and Geology Department; Professor of Chemistry.
B.S.E., 1952, M.S., 1958, Ph.D., 1959, University of Florida.

SPURLOCK, HOOPER CLYDE, Associate Professor of Agricultural Economics and Rural Sociology.
B.S., University of Tennessee, 1935; M.S., 1951, Ph.D., 1956, University of Florida.

STAFFORD, DONALD BENNETT, Assistant Professor of Civil Engineering.

STANLEY, EDWARD LEMUEL, Associate Professor of Mathematics.
B.S., East Tennessee State University, 1930; M.S., University of Tennessee, 1935.

STEADMAN, MARK SIDNEY, JR., Associate Professor of English.
A.B., Emory University, 1951; M.A., 1956, Ph.D., 1963, Florida State University.

STEED, JOHN HAROLD, Assistant Professor of Military Science.
Major, Field Artillery, United States Army; B.S., Clemson University, 1960.

STEINER, PINCKNEY ALSTON, Assistant Professor of Physics.
B.S., University of Georgia, 1959; Ph.D., Duke University, 1965; Post Doctorate, University of Copenhagen, 1964-66.

STEINER, WILLIAM FRANK, JR., Assistant Professor of History.

STELLING, FRANK H., Adjunct Professor of Biomedical Engineering.
B.S., Augusta College, 1934; M.D., Medical College of Georgia, 1938.

STEMBRIDGE, GEORGE EUGENE, Associate Professor of Horticulture.
B.S., Clemson University, 1958; M.S., 1959, Ph.D., 1961, University of Maryland.

STEP, JAMES MARVIN, Alumni Professor of Agricultural Economics and Rural Sociology.
A.B., Berea College, 1937; M.A., 1938, Ph.D., 1940, University of Virginia.

STEVENSON, JOHN LOVETT, Associate Professor of Recreation and Park Administration.

STILLWELL, EPHRAIM POSEY, JR., Professor of Physics.
B.S., Wake Forest University, 1956; M.S., 1958, Ph.D., 1960, University of Virginia.

STINAFF, RUSSELL DALTON, Assistant Professor of Electrical and Computer Engineering.
B.S., University of Akron, 1962; M.S., Purdue University, 1963; Ph.D., University of Illinois, 1969.
STOEWE, RUSSELL JOSEPH, Assistant Professor of Military Science.
Captain, Infantry, United States Army; B.S., University of Missouri, 1965.

STOKES, SARA T., Instructor in Nursing, Associate Degree Program.
B.S.N., Vanderbilt University, 1952; M.A., Texas Women's University, 1970.

STRADER, GLADYS ANNE, Instructor in French.

SULEIMAN, DAVID PATRICK, Assistant Professor of History.
B.A., Oglethorpe University, 1957; M.A., Appalachian State University, 1963; Ph.D., Universidad Internacional (Barcelona), 1968.

SULLIVAN, JOHN RUSSELL, Associate Professor of Mathematics.
A.B., 1939, M.A., 1949, Georgetown University.

SUMAN, REYNOLD FOY, Associate Professor of Agronomy and Soils, Edisto Experiment Station.

SWANSON, DAVID MITCHELL, Assistant Professor of Industrial Management.

THODE, FREDERICK WILBUR, Associate Professor of Horticulture.
B.S., Clemson University, 1940; M.S., Cornell University, 1951.

THOMPSON, PATRICIA, Teaching Supervisor, School of Medical Technology, Greenville General Hospital.
B.S., Furman University, 1951; Medical Technology (ASCP), 1952.

THOMPSON, REGINA, Assistant Professor of Nursing, Baccalaureate Program.
B.S., Bluefield State College, 1951; M.A., Teachers College, Columbia University, 1958.

THOMSON, DANIEL PARK, JR., Associate Professor of Textiles.

THURSTON, JAMES NORTON, Alumni Professor of Electrical and Computer Engineering.
B.E.E., Ohio State University, 1936; S.M., 1943, Sc.D., 1950, Massachusetts Institute of Technology; P.E.

TITUS, THOMAS GEORGE, Assistant Professor of Psychology.

TODD, BOYD JOSEPH, Professor of Industrial Management and Mathematics.
B.S., 1946, M.S., 1948, Clemson University; Ph.D., North Carolina State University, 1969.

TOLINS, IRWIN SOLOMON, Associate Professor of Operations Research.

TOMDES, AVERETT SNEAD, Associate Professor of Zoology.
B.S., University of Richmond, 1954; M.S., Virginia Polytechnic Institute, 1956; Ph.D., Rutgers University, 1961; Post Doctorate, University of Virginia, 1965-66.

TOOMEY, ROBERT EDWARD, Adjunct Professor of Industrial Management.
B.S., Harvard University, 1940; M.Ed., Boston University, 1941; M.S., Columbia University, 1951; LL.D., Clemson University, 1968.

TRASK, DAVID STEPHENS, Instructor in History.
B.A., University of the South, 1966; M.A., University of Nebraska, 1968.

TREVILLIAN, WALLACE DARNEY, Dean, College of Industrial Management and Textile Science; Professor of Economics.
B.S., 1940, M.A., 1947, Ph.D., 1954, University of Virginia.

TRIVELY, ILO ALLELY, Professor of Civil Engineering.
B.S. in C.E., 1928, M.S. in C.E., 1941, University of Nebraska; P.E.

TURK, DONALD EARLE, Associate Professor of Poultry Science.

TURNER, JAMES A., JR., Assistant Professor of Industrial Management.

TURNER, RAYMOND CLYDE, Assistant Professor of Physics.
B.S., Carnegie Institute of Technology, 1960; Ph.D., University of Pittsburgh, 1966.

TURNIPSEED, SAMUEL GUY, Associate Professor of Entomology and Economic Zoology, Edisto Experiment Station.
B.A., University of North Carolina, 1956; M.S., Clemson University, 1958; Ph.D., North Carolina State University, 1961.
36 Teaching and Research Faculties

TURPIN, WILLIAM BRADLEY, Assistant Professor of Psychology.

TUTTLE, JACk EDWIN, Associate Professor of History and Political Science.

TYNDALL, ELMER NEWTON, Head of Aerospace Studies Department; Professor of Aerospace Studies.

ULBRICH, CARLTON WILBUR, Assistant Professor of Physics.

ULBRICH, HOLLEY H., Part-Time Assistant Professor of Economics.

UMFLETT, CLYDE JEFFERSON, Associate Professor of Botany.

UNDERWOOD, RICHARD ALLAN, Assistant Professor of English.

USREY, MALCOLM ORTHELL, Assistant Professor of English.

VAN BLARICOM, LESTER OSCAR, Professor of Horticulture.
B.S., 1938, M.S., 1940, Ch.E., 1954, Oregon State University.

VAUGHN, EDWARD A., Assistant Professor of Textiles.

VERICH, THOMAS MICHAEL, Instructor in History.

VIGLIONE, AUGUST, Assistant Professor of History.

Vogel, Henry Elliott, Head of Physics Department, Professor of Physics.
B.S., Furman University, 1948; M.S., 1950, Ph.D., 1962, University of North Carolina.

Von Rosenberg, Joseph Leslie, Jr., Associate Professor of Chemistry.

Von Tungeln, George Robert, Associate Professor of Agricultural Economics and Rural Sociology.
B.S., 1951, M.S., 1956, Southern Illinois University.

Waite, Edwin Emerson, Jr., Associate Professor of Sociology and Psychology.
B.S., Middlebury College, 1929; M.A., Duke University, 1940.

Walker, Sarah Ann, Assistant Professor of Recreation and Park Administration.
B.S., University of Wisconsin, 1964; M.S., Indiana University, 1966.

WalleNius, KennEtt Ted, Associate Professor of Mathematics.

WaltErs, John Vernon, Professor of Textiles.
B.S., 1933, M.S., 1952, Clemson University.

Wang, Samuel, Associate Professor of Architecture.

Wannamaker, John Murray, Associate Professor of Industrial Management.
B.S., 1950, M.S., 1960, University of South Carolina; Ph.D., Louisiana State University, 1966.

Wannamaker, Patricia Walker, Assistant Professor of German.
A.B., 1950, M.A., 1958, University of South Carolina; Ph.D., Louisiana State University, 1964.

WAre, Robert Edward, Associate Professor of Zoology.
B.S., Iowa Wesleyan College, 1929.

Warner, John Robinson, Professor of Forestry.

Washburn, James Russell, Assistant Professor of Architecture.
BArch., North Carolina State University, 1957; MArch., Harvard University, 1959.

Waters, Washington Marian, Lecturer in Medical Technology; Co-director, School of Medical Technology, Greenville General Hospital.
B.S., Furman University, 1948; M.D., Medical University of South Carolina, 1952.

Watkins, Betty Palmer, Assistant Professor of Vocational Education.
B.S., Winthrop College, 1951; M.S., University of Tennessee, 1962.
WATSON, CHARLES HUGH, Associate Professor of English.

WATSON, SAMUEL McIVER, JR., Professor of Mechanical Engineering.
A.B., Elon College, 1936; B.S., 1937, M.S., 1942, North Carolina State University; P. E.

WEBB, BYRON KENNETH, Associate Professor of Agricultural Engineering.
B.S., 1955, M.S., 1962, Clemson University; Ph.D., North Carolina State University, 1966; P. E.

WEBB, LLOYD GEORGE, Associate Professor of Entomology and Economic Zoology.
B.S., University of Georgia, 1938; M.S., Auburn University, 1941; Ph.D., Ohio State University, 1949.

WELLS, JOSEPH WILLARD, Associate Professor of Architecture.
B.Arch., Cornell University, 1931; Fontainbleau School of Fine Arts, California, 1933.

WELSH, WILLIAM AUSTIN, JR., Assistant Professor of Civil Engineering.

WEST, WILLIAM ELMER, Assistant Professor of Industrial Education.
B.S., Ohio University, 1958; M.A., 1964, Ph.D., 1969, Ohio State University.

WHEELER, RICHARD FERMAN, Head of Department of Animal Science; Professor of Animal Science.
B.S., 1941, B.S., 1947, Clemson University; M.S., Mississippi State University, 1949; Ph.D., University of Illinois, 1954.

WHITE, BRUCE MORRIS, Instructor in Accounting.

WHITE, CHARLIE RAYMOND, Assistant Professor of Recreation and Park Administration.
B.S., North Carolina State University, 1966; M.S., Indiana University, 1967.

WHITE, DAVID FRANKLIN, JR., Assistant Professor of Philosophy.

WHITE, ROBERT HENRY, Assistant Director of Research Coordinating Unit and Associate Professor of Vocational Education.
B.S., 1954, M.A., 1966, New Mexico State University; Ph.D., Ohio State University, 1967.

WHITEHURST, CLINTON HOWARD, JR., Head of Industrial Management Department; Professor of Industrial Management.
B.S., 1957, M.A., 1958, Florida State University; Ph.D., University of Virginia, 1962; Post Doctorate Edinburgh University, 1970.

WHITELY, HARRIETT ELLIOTT, Instructor in Nursing, Associate Degree Program.
B.S., Queens College, 1962; M.N., Emory University, 1969.

WHITMIRE, JERRY MORRIS, Assistant Professor of Spanish.

WHITNEY, JOHN BARRY, JR., Professor of Botany.
B.S., University of Georgia, 1935; M.S., North Carolina State University, 1938; Ph.D., Ohio State University, 1941.

WHITTEN, WILLIAM CLYDE, JR., Professor of Economics.
B.S., Clemson University, 1947; M.S., Georgia Institute of Technology, 1950; Ph.D., University of Alabama, 1964.

WILCOX, LYLE CHESTER, Associate Dean for Professional Studies and Acting Head, Electrical and Computer Engineering Department; Professor of Electrical and Computer Engineering.

WILEY, WILLIAM HENRY, Dean, College of Agriculture and Biological Sciences; Professor of Poultry Science.
B.S., 1936, M.S., 1937, Ph.D., 1949, Texas A&M University.

WILLARD, WILLIAM KENNETH, Assistant Professor of Zoology.
B.S.F., 1957, M.S., 1960, University of Georgia; Ph.D., University of Tennessee, 1965.

WILLEY, EDWARD PARKER, Assistant Professor of English.
38 Teaching and Research Faculties

WILLIAMS, Woodie Prentiss, Head of Department of Food Science; Professor of Food Science.
B.S., 1953, M.S., 1957, Mississippi State University; Ph.D., Texas A&M University, 1960.

WILLIAMSON, Horace Hampton, Associate Professor of Architecture.
B.S., 1951, B.Arch., 1952, Georgia Institute of Technology; M.Arch., M.S., Rensselaer Polytechnic Institute, 1969.

WILLIS, Samuel Marsh, Dean of University Extension; Professor of Industrial Management.
B.S., Clemson University, 1950; M.S., Georgia Institute of Technology, 1955; Ph.D., University of Alabama, 1962.

WILSON, Hugh Haynes, Professor of Ceramic Engineering.
B.S., 1948, M.S., 1949, North Carolina State University; Ph.D., Ohio State University, 1954; P. E.

WILSON, Thomas Virgil, Professor of Agricultural Engineering.
B.S., Clemson University, 1942; M.S., Purdue University, 1949; P. E.

WINSTON, Edmund Walter, Instructor in Music.

WINTER, James Paul, Associate Professor of English.
A.B., Marshall University, 1930; M.A., Columbia University, 1932.

WISE, Albert Goldner, Instructor in Economics.

WITCHER, Wesley, Professor of Plant Pathology and Physiology.
B.S., 1949, M.S., 1958, Virginia Polytechnic Institute; Ph.D., North Carolina State University, 1960.

WOLF, James S., Associate Professor of Materials Engineering.

Wolla, Maurice LeRoy, Associate Professor of Electrical and Computer Engineering.
B.S., North Dakota State University, 1950; Ph.D., Michigan State University, 1966.

WOOD, Kenneth Lee, Associate Professor of Physics.
B.S., Carson-Newman College, 1932; M.S., University of Tennessee, 1934.

WOOD, William Brittingham, Jr., Instructor in English.

WOODELL, Charles Harold, Assistant Professor of English.

WOODRUFF, James Raymond, Assistant Professor of Agronomy and Soils.
B.S., 1958; M.S., 1964, North Carolina State University; Ph.D., Clemson University, 1967.

WOODS, Juanita Faye, Lecturer in Nursing, Baccalaureate Program.

WOOTEN, Thomas Ernest, Assistant Professor of Forestry.

WRAY, Charles Victor, Associate Professor of Textiles.
B.S., Clemson University, 1940; M.S., Georgia Institute of Technology, 1954.

YANDLE, Thomas Bruce, Jr., Assistant Professor of Economics.

YANG, Tai-Te, Professor of Mechanical Engineering.
B.S., Shanghai Institute of Technology, 1948; M.S., Oklahoma State University, 1957; Ph.D., Cornell University, 1961.

YOUNG, Joseph Laurie, Professor of Architecture.
B.Arch., University of Texas, 1950; M.Arch., Georgia Institute of Technology, 1955; A.I.A.

ZANT, Robert Franklin, Assistant Professor of Industrial Management.

ZEHB, Eldon Irvin, Assistant Professor of Plant Pathology and Physiology.

ZIEGLER, Joseph Anthony, Assistant Professor of Economics.
B.A., St. Mary's College, 1967.
ZIELINSKI, PAUL BERNARD, Associate Professor of Engineering Mechanics.
B.S.C.E., Marquette University, 1956; M.S., 1961, Ph.D., 1965, University of Wisconsin; P.E.

ZIN, WILLIAM TALBOTT, Associate Professor of Electrical and Computer Engineering.
B.S., United States Naval Academy, 1932; M.S. (E.E.), Drexel Institute, 1955; P.E.

ZIPIN, PAUL MARK, Assistant Professor of Economics.

CLEMSON UNIVERSITY AT GREENVILLE

DAY, FRANK LOUIS, Director; Assistant Professor of English.
B.S., Gorham State College, 1954; M.A., University of Tennessee, 1959.

DICKENS, LARRY LUTHER, Instructor in Chemistry.
B.S., David Lipscomb College, 1966.

EDWARDS, MARY LANG OLSEN, Instructor in Biology.
B.A., Agnes Scott College, 1966; M.S., Clemson University, 1969.

GOFORTH, MYRA HARRIS, Instructor in Chemistry.

GRIMES, ALBERTA TUCKER, Guidance Counselor and Instructor in Education.
B.S., Southern University, 1934; M.A., Teachers College, 1951.

IBRAHIM, IRIS BRANN, Instructor in Mathematics.
B.S., Southeastern Louisiana College, 1964; M.S., Clemson University, 1966.

JACOBS, GLENN KEITH, Instructor in Mathematics.
B.A., University of Southern Mississippi, 1964; M.S., Clemson University, 1968.

RICE, MARGARET KOONZ, Instructor in French.
A.B., Greensboro College, 1941; M.A., Columbia University, 1944.

ROMPALE, JOHN TRADDEUS, Assistant Professor of Physics.
B.S., DePaul University, 1964; Ph.D., Clemson University, 1969.

SKEETON, LYNETTE WORLEY, Instructor in History.

STRICKLER, JOHN ROBERT, Instructor in English.
A.B., Bridgewater College, 1966; M.A., Appalachian State University, 1968.

THAYER, HARSHADRAJ HARILAL, Instructor in Economics.

VAN HOY, MILTON SPANGLE, Instructor in English and French.

WATSON, KATHERINE RAMSEY, Instructor in Mathematics.
B.A., College of William and Mary, 1938; M.M., University of South Carolina, 1965.

CLEMSON UNIVERSITY AT SUMTER

ANDERSON, JACOB CLARENCE, JR., Director; Assistant Professor of Mathematics.
B.S., University of Southwestern Louisiana, 1964; M.S., Clemson University, 1965.

ADAMS, PORTER HUGUENIN, Jr., Instructor in Economics.
B.A., Clemson University, 1964; M.A., University of South Carolina, 1966.

CAMERON, JOSEPH PRICE, Assistant Professor of Mathematics.
B.S., The Citadel, 1943; M.S., University of Georgia, 1950.

CAMPBELL, JAMES ALVIN, Instructor in History.
A.B., Erskine College, 1960; M.A., University of South Carolina, 1967.

COLLINS, SAMUEL ROBERT, Assistant Professor of Chemistry.
B.S., Harding College, 1946; M.S., Louisiana State University, 1953.

CRAIG, E. LEE, Instructor in English.

DARMODY, GORDON RICHARD, Assistant Professor of Physics.
B.A., Union College, 1953; M.Ed., Sam Houston State Teachers College, 1957.

DOYLE, JOHN JOSEPH, III, Instructor in English.

HOUSER, RAYMOND DALE, Instructor in Chemistry.

ISMAN, LLOYD ELLIS, Part-Time Instructor in Sociology.
B.A., Long Island University, 1966; M.S.W., Tulane University, 1968.
EMERITUS FACULTY

ALBERT, WILLARD BENJAMIN, B.S., M.S., Ph.D., Associate Professor Emeritus of Botany and Bacteriology.

ARMSTRONG, GEORGE MILLER, B.S., M.A., Ph.D., Head Emeritus of Botany and Bacteriology Department; Professor Emeritus of Botany and Bacteriology; Plant Pathologist Emeritus.

ARNDT, CHARLES HOMER, A.B., M.S., Ph.D., Plant Pathologist Emeritus.

AULL, GEORGE HUBERT, B.S., M.S., Ph.D., Head Emeritus of Agricultural Economics and Rural Sociology Department; Professor Emeritus of Agricultural Economics and Rural Sociology; Agricultural Economist Emeritus.

BROCK, DEWEY CLIFTON, B.S., M.A., Associate Professor Emeritus of Industrial Education.

BROWN, HUGH MONROE, B.A., M.A., Ph.D., Dean Emeritus, School of Textiles.

CAMPBELL, THOMAS ALEXANDER, JR., B.S., M.E., Head Emeritus of Textile Department; Professor Emeritus of Textile Department; Professor Emeritus of Textiles.

CARTTE, EUGENE FRANKLIN, B.S., M.S., Professor Emeritus of Textiles.

CLARKE, ELWYN LORENZO, B.S. in C.E., C.E., Head Emeritus of Civil Engineering Department; Professor Emeritus of Civil Engineering.

COOPER, HERBERT PRESS, B.S., M.S., Ph.D., Dean Emeritus, School of Agriculture; Director Emeritus of South Carolina Agricultural Experiment Station; Professor Emeritus of Agronomy; Agronomist Emeritus.

EARLE, SAMUEL BRODUS, A.B., A.M., M.E., LL.D., Dean Emeritus, School of Engineering; Professor Emeritus of Mechanical Engineering; Director Emeritus, Engineering Experiment Station.

EPTING, CARL LAFAYETTE, A.B., A.M., Head Emeritus of Social Sciences Department; Professor Emeritus of History and Government.

FAHRAB, MILTON DYER, B.S., M.S., Ph.D., Dean Emeritus, School of Agriculture; Senior Scientist Emeritus in Agriculture and Biological Sciences; Professor Emeritus of Entomology and Zoology.

FOSTER, HAROLD HOMER, A.B., M.A., Ph.D., Associate Professor Emeritus of Botany and Bacteriology.

GAGE, GASTON, B.S., M.Ed., Dean Emeritus of the School of Industrial Management and Textile Science; Head Emeritus of Yarn Manufacturing Department; Professor Emeritus of Carding and Spinning.
Goodale, Ben Edmund, B.S., M.S., Head Emeritus of Dairy Science Department; Professor Emeritus of Dairy Science; Dairy Scientist Emeritus.
Green, Joseph Coleman, B.A., M.A., Ph.D., Professor Emeritus of English.
Hall, Evey Eugene, B.S., M.S., Superintendent Emeritus of Pee Dee Experiment Station.
Hodges, Baxter Howard, B.S., Assistant Professor Emeritus of Chemistry.
Hunter, Howard Louis, B.Chem., Ph.D., Dean Emeritus, College of Arts and Sciences; Professor Emeritus of Chemistry.
LaMaster, Joseph Paul, B.S., M.S., Head Emeritus of Dairy Department; Professor Emeritus of Dairying; Dairy Husbandman Emeritus.
Lindsay, Joseph, Jr., A.B., M.S., Head Emeritus of Textile Chemistry and Dyeing Department; Professor Emeritus of Textile Chemistry and Dyeing.
Lindsey, Tate Jefferson, B.A., Ph.D., Professor Emeritus of Physics.
McCutchen, Alan Johnstone, B.S., C.E., Associate Professor Emeritus of Civil Engineering.
McGary, Hugh Harris, B.F.A., M.F.A., Ph.D., Professor Emeritus of Music Education.
McKenna, Arthur Ernest, B.S., M.S., Senior Professor Emeritus of Textiles.
Marshall, John Logan, B.S., Head Emeritus of Industrial Arts Department; Professor Emeritus of Industrial Arts.
Mitchell, Jack Harris, B.S., M.S., Professor Emeritus of Chemistry.
Monroe, James Beasley, B.S., M.S., Head Emeritus of Agricultural Education Department; Professor Emeritus of Agricultural Education.
Musser, Albert Myers, B.S., Head Emeritus of Horticulture Department; Professor Emeritus of Horticulture; Horticulturist Emeritus.
Paden, William Reynolds, B.S., M.S., Ph.D., Agronomist Emeritus.
Rausch, Karl William, B.S., M.E., Professor Emeritus of Mechanical Engineering.
Reed, Albert Raymond, A.B., M.S., Associate Professor Emeritus of Physics.
Reed, Charles Albert, A.B., M.S., Ph.D., Professor Emeritus of Physics.
Rhyne, Orestes Pearl, A.B., A.M., Ph.D., Head Emeritus of Modern Language Department; Professor Emeritus of Modern Languages.
Riley, James Alvin, B.S., M.S., Superintendent Emeritus of Sandhill Experiment Station; Agronomist Emeritus of Sandhill Experiment Station.
Roderick, Donald Barclay, B.A., Chemistry Assistant Emeritus.
Rogers, William Bryan, B.S., Superintendent Emeritus of Edisto Experiment Station.
Rosenkranz, Duane Benjamin, A.B., M.A., Professor Emeritus of Botany.
Rush, John Millard, A.B., M.S., Ph.D., Professor Emeritus of Botany and Bacteriology.
Rutledge, Ray Watson, B.S., M.A., Ph.D., Professor Emeritus of Botany.
St. Hubert, Robert LaMontagne, P.A.G.F., Visiting Professor Emeritus of Architecture.
Shackelford, MacFairland, B.S., Assistant Professor Emeritus of Physics.
Sheldon, Dawson Clement, B.S., M.A., Ph.D., Head Emeritus of Mathematics Department; Professor Emeritus of Mathematics.
Simpson, Francis Marion, B.S., Visiting Professor Emeritus of Agricultural Economics.
Teaching and Research Faculties

STUART, CHARLES MORGAN, A.B., M.A., Associate Professor Emeritus of Mathematics.

STREBLING, BRUCE HODGSON, B.S., M.S., Associate Professor Emeritus of Agricultural Education.

TARRANT, WILLIAM EDWARD, Sr., B.S., M.Ed., Associate Professor Emeritus of Textiles.

WASHINGTON, WILLIAM HAROLD, B.S., M.S., Dean Emeritus, School of Education; Professor Emeritus of Vocational Education.

WHITE, THOMAS ARLINGTON, B.S., M.S., Ph.D., Professor Emeritus of Agricultural Education.

WILLIAMS, WILLIAM BRATTON, B.S., M.S., Associate Professor Emeritus of Textiles.

WILSON, MILNER BRADLEY, Jr., A.B., A.M., Associate Professor Emeritus of English.

LIBRARY STAFF

JOHN WALLACE GORDON GOURLAY, A.M.L.S. ............ Director of the Library
MYRA ANN ARMISTEAD, M.L.I. ............ Documents Librarian
MARY EMERSON BRAFF, B.L.S. .................... Cataloger
PEGGY H. COVER, M.S. .... Head, Science, Technology and Agriculture Division
LOIS JONES GOODMAN, B.S. ............ Cataloger
CARSE OREN MCDANIEL, M.S. ............ Head, Social Sciences and Humanities Division

AGNES ADGER MANSFIELD, M.L.S. ............ Assistant Reference Librarian
SUE H. MOSS, B.S. in L.S. ............ Cataloger
MARGY H. NOWACK, A.B. .................... Acquisitions Librarian
GENEVIEVE L. REIDY, M.S. ............ Reference Librarian

MARThA SIMPSON STEPHENSON, M.L. ............ Cataloger

SOPHIA E. SULLIVAN, M.S. ............ Head, Catalog Department
PRISCILLA H. SUTCLIFFE, M.S.L.S. ............ Special Collections Librarian
MARIAN HULL WITHINGTON, M.S.L.S. ............ Reference Librarian

LAWRENCE R. WOOD, M.S.L.S. ............ Serials Librarian

STANDING COMMITTEES OF THE UNIVERSITY, 1970-71

ADMISSIONS:

CURRICULUM:

ETHICS AND RELIGION:

Faculty Basic Research:

Fine Arts Series:

Graduate Council:

Honors and Awards:

Norman Olsen, Jr., Chairman, ex officio; N. R. Bauld, J. D. Davenport, J. D. Fulton, Rose A. Godbout, J. R. Harris, R. H. Hunter, J. T. Lazar, John Paul Lombardi, George Savitsky, R. D. Shannon, J. R. Warner, T. V. Wilson, A. M. Bloss, ex officio; G. E. Coakley, ex officio; Susan Delony, ex officio; K. N. Vickery, ex officio.

Honors Program Council:

Improvement of Undergraduate Teaching:

Library:

Patent:

M. A. Wilson, Chairman, ex officio; Eugene Harrison, K. R. Helton, C. E. Hood, C. M. McHugh, E. B. Rogers, M. J. Skove, T. D. Efland, ex officio; O. B. Garrison, ex officio; Stan Nicholas, ex officio; S. F. Hulbert, ex officio.

Safety and Fire Prevention Committee:

C. E. Littlejohn, Chairman; J. P. Burns, Mike Heath, K. S. Landers, A. D. Lewis, E. H. McCarter, D. P. Miller, W. A. Moore, M. K. Richardson, W. E. Berry, ex officio; J. E. Hair, ex officio; J. B. McFadden, ex officio; N. R. Page, ex officio; J. W. Weeden, ex officio.

Schedule:

Teaching and Research Faculties

Social:

Special Advisory Committee for Disposal of Poisonous Chemicals:
N. R. Page, Chairman; Henry Dupre, Henry Polk, J. J. Porter, Ralph Collins, ex officio.

Special Advisory Committee on Use of Radioactive Materials:
J. H. Austin, Chairman; W. K. Willard, R. W. Henningson, ex officio.

FACULTY SENATE
ADMINISTRATION OF BUSINESS AND FINANCIAL AFFAIRS

Melford A. Wilson, B.S. in Commerce......Vice President for Business and
Finance and Comptroller
Kenney Rixie Helton.............................Budget Director
Elmer H. McCarter, M.B.A......................Financial Analyst
Clyde E. Woodall, M.S.........................Administrative Specialist

ACCOUNTING DIVISION
Trescott Newton Hinton, B.A....................Director of Accounting
Melvin Eugene Barnette, M.S....................Supervisor of Contract Accounts
Vivian Raymond Harrell.........................Data Processing Supervisor
Ronald Timothy Herrin.........................Junior Accountant
Alden Lee McCracken, B.S......................Senior Accountant
James Thomas Roberts, B.S......................Accountant
William Allen Thompson, B.S..................Senior Accountant
Joseph Shelor Walker, B.S......................Bursar

PERSONNEL DIVISION
John B. Gentry, Ed.M...........................Director of Personnel
Ray L. Thompson, B.S............................Associate Personnel Director
Walter E. Berry, B.S.............................Safety Coordinator
William J. Stamey...............................Insurance Assistant

PHYSICAL PLANT DIVISION
Ralph Simpson Collins, B.E.E., P.E................Director of Physical Plant Division
Daniel Jerry Boyer, M. Arch., A.I.A................Superintendent of Planning
and Engineering
James Cleveland Carey, B.S......................Superintendent of Grounds
and Special Services
George Carlisle Jones, B.S. in E.E................Superintendent of Buildings
Walter Aubrey Moore, B.S. in M.E................Assistant Plant Engineer
Julian L. Murph, B.S. in C.E., P.E.—............Assistant Superintendent of Planning and Engineering
Roy Marcus Rochester, B.E.E....................Plant Engineer
James Allen Stanley, Jr., B.S. in M.E........Supervisor of Work Order Planning
Jack William Weeden.............................Chief of Security

PURCHASING DIVISION
Earl Spencer Liberty, B.A........................Director of Purchasing
Jack Norman Wilson, B.A........................Senior Accountant, Property Control

AUXILIARY ENTERPRISES
Henry Hughes Hill, Jr., B.S........................Director of Auxiliary Enterprises
William Drye Cromer................................Supervisor, Central Office Services
Charles Dimmock..................................Associate Director of Auxiliary Enterprises
Luther J. Fields, B.S............................Manager, Student Food Services
Thomas Roy Rhymes.............................Manager, Laundry
Leroy Edward Rhymes, B.S......................Manager, Auxiliary Services
Ernest Chisolm Watson, B.S.....................Associate Director of Housing

THE CLEMSON HOUSE HOTEL
Verner Eugene Cathcart........................Manager

INFORMATION
GENERAL INFORMATION

Clemson is a land-grant, state-supported university. Clemson is fully accredited by the Southern Association of Colleges and Schools. Curriculums are accredited by the American Chemical Society, Engineers' Council for Professional Development, National Architectural Accrediting Board, and Society of American Foresters.

The forty-seven undergraduate and forty-eight graduate curriculums under the Colleges of Agriculture and Biological Sciences, Architecture, Education, Engineering, Forest and Recreation Resources, Industrial Management and Textile Science, Liberal Arts, and Physical and Mathematical Sciences, the School of Nursing, and the Graduate School form a background of training for the hundreds of occupations and professions in which Clemson graduates engage. The University is organized on a basis whereby it retains a clear entity through the interrelationships of colleges, schools, and departments providing a well-balanced fundamental and general educational program.

The enrollment of Clemson has grown from 446 students at the opening of the University in 1893 to 8,038 for the first semester, 1970-71, including 437 at the Greenville and Sumter campuses. Since the opening of the University, through the first semester 1970-71, 61,381 students have attended Clemson, and of this number, 21,506 have been awarded the bachelor's degree. During this same period, 87 associate degrees, 1,558 master's degrees, and 190 Doctor of Philosophy degrees have been awarded.

ADMINISTRATIVE ORGANIZATION

The government of the University is vested in a Board of 13 members, including 6 elected by the Legislature and 7 life and self-perpetuating members, in accord with the Clemson will. The President of the University is the chief executive and administrative officer appointed by the Board of Trustees; and under the President there are four areas of administration, each headed by a chief administrative officer responsible to the President. The organizational units under each of these officers are outlined below:

I. Vice President for Academic Affairs and Dean of the University
Administrative Organization

Dean of Undergraduate Studies
1. The University Library
2. The Summer Sessions

Dean of Graduate Studies and University Research
1. The Graduate School
2. The Computer Center
3. The Office of University Research

Dean of University Extension
1. Clemson University at Greenville
2. Clemson University at Sumter
A. College of Agriculture and Biological Sciences
B. College of Architecture
C. College of Education
D. College of Engineering
E. College of Forest and Recreation Resources
F. College of Industrial Management and Textile Science
G. College of Liberal Arts
H. School of Nursing

G. Counseling Center  
H. Athletic Department  
I. Student Health Service  
J. University Canteens  
K. University Bookstore  
L. Littlejohn Coliseum  

REQUIREMENTS FOR ADMISSION

To receive consideration for admission to Clemson, the applicant must, as a rule, present a transcript of his high school record giving evidence of graduation, and submit an official copy of his scores for the College Board tests used as an entrance examination. In reaching an admissions decision, the examination scores along with the student's academic preparation, rank in class, and the recommendation of the high school principal will be weighed carefully.

In addition, students may qualify for entrance by:

(1) Achieving satisfactory scores on the College Board examinations and presenting a South Carolina High School Certificate (awarded by certificate examination). This provision applies only to adult candidates 21 or more years of age or to those who have served at least two years of active duty in the Armed Forces.

(2) Achieving satisfactory scores on the College Board examinations and completing a minimum of 12 high school units. Students in this category must achieve above average scores on the entrance examination and have superior high school records.

(3) Achieving satisfactory scores on the College Board examinations and meeting the additional requirements for entrance with advanced standing. As minimum additional criteria, the transfer applicant must present a statement of honorable dismissal from the institution last attended, an original transcript of his record from each college or university attended, and an official statement that he is eligible to return to the institution last attended. Candidates meeting these requirements will then be considered care-
fully in the light of the quality of their previous record, and work completed in other colleges with a grade at least one letter grade higher than the lowest passing mark will be evaluated in terms of equivalent courses in the curriculum at Clemson selected by the student.

Finally, various nonintellective factors will be considered in a few cases where it is impossible to make a positive decision on the strength of aptitude and previous academic performance alone.

There is no application fee, but an admissions deposit is required following the issuance of a provisional acceptance. Instructions concerning this deposit will be included in the acceptance letter.

Application Forms. Forms to be used in applying for admission to the University may be obtained by writing the Office of Admissions and Registration, Clemson University, Clemson, S. C. 29631.

Entrance Examinations. All freshman candidates for admission—and many transfer applicants also—must complete the College Entrance Examination Board SCHOLASTIC APTITUDE TEST. Those who at accredited colleges have completed 30 or more semester hours, or its equivalent, with a “C” average or above on all work attempted are exempted from this requirement. This exception does not apply to those enrolled in technical institutes, or in non-college parallel programs at institutions offering both transfer and terminal curriculums. For August enrollment, one needs to complete the SAT no later than the preceding April.

In addition and with the exception of those transferring acceptable college credit in mathematics, candidates should take one of the College Board Achievement Tests in mathematics as placement in this subject will be determined by the score one achieves. It is suggested that students sit for the Level I examinations; however, either Level I or II is acceptable.

Applicants who will have completed two or more years of high school French, German, Russian, or Spanish and who will enroll in a curriculum which includes a modern foreign language should take the appropriate language achievement test. These candidates may qualify for advanced placement with credit in language on the basis of a satisfactory score on this test.

Students attending unaccredited private schools are strongly advised to complete three achievement tests, including English, mathematics, and one subject of their choice.

August applicants will need to complete all achievement testing no later than the preceding May. Usually it is to one’s advantage
to take the achievement tests in March of the senior year in high school.

Candidates who have completed the required tests previously may have their scores reported to Clemson by directing a request to the College Entrance Examination Board together with a fee of $2. Others may secure a BULLETIN OF INFORMATION and an application for the tests from their local high school or at one of the Board’s offices, the addresses of which are: P. O. Box 592, Princeton, New Jersey 08540, and for residents of the West, P. O. Box 1025, Berkeley, California 94701. Only those scores reported directly to the Clemson University Admissions Office from Princeton or Berkeley will be acceptable.

All candidates are reminded to forward applications for the entrance examinations as indicated in the Bulletin of Information, and not to Clemson University.

Applicants for enrollment in Architecture must also take the ARCHITECTURAL SCHOOL APTITUDE TEST which is given at most schools of architecture in November, January, and March. Applications for this test may be obtained from a school of architecture or from Educational Testing Service, Princeton, New Jersey 08540.

**Advanced Placement by Examination.** In addition to earning credit by the usual method involving classroom attendance, students may receive credit toward their degree by completing a course successfully by examination only. Freshmen interested in exempting some of the elementary courses in this manner should participate in the College Board Advanced Placement Examination program, and have the results of these tests sent to Clemson.

**Matriculation.** Upon arrival for the opening of the session, new students report to the Office of Admissions and Registration to complete enrollment. A student’s matriculation is equivalent to his pledge to conform to the rules of the institution. Any admission gained or matriculation made irregularly is subject to cancellation.

**Students from Other Countries.** A limited number of well qualified students from other countries are accepted. The application for admission must be in English on the official application form furnished by the Office of Admissions and Registration. Official transcripts of all high school and college level work which the applicant has undertaken should accompany the application. They must also complete the entrance examination requirements discussed previ-
ously, although in a few unusual cases a substitute examination is authorized.

In addition to academic and personal qualifications equivalent to those required of United States citizens, the applicant from another country is required to submit evidence of his possessing dollar resources adequate without assistance from the University for at least the first year of his course of study, including round trip travel expenses. The University is unable to grant scholarship or loan assistance to students from abroad, and there is little likelihood that any type of employment may be secured.

If accepted, students from other countries should have a minimum of $1,300 in their possession upon reporting to the University. This amount is sufficient to make the entrance payment which includes tuition, fees, and living expenses for a semester, and for books and supplies. Foreign students will also be required to purchase student accident and health insurance.

EDUCATIONAL BENEFITS FOR VETERANS AND WAR ORPHANS

The Veterans Administration provides educational assistance for veterans and children of deceased or totally disabled veterans who meet requirements of applicable laws and regulations. Any veteran or child of a deceased or totally disabled veteran should communicate with the nearest Veterans Administration office to determine whether or not he is entitled to any educational benefits.

SELECTIVE SERVICE

Registration. For the benefit of students who become 18 years of age during the school year, provision has been made for such students to register for Selective Service in the Office of Admissions and Registration on the campus. The registration is then sent through channels to the registrant's local board. Regulations provide that registration may be accomplished on the 18th birthday or within five days thereafter.

Deferment. Due to the changes occurring periodically, all registrants should keep themselves informed of current regulations governing deferments. Questions concerning student deferments may be referred to the Office of Admissions and Registration.

EXPENSES

Settlement of University Fees. The schedule of semester charges for all undergraduate students—full-time, part-time, and auditing—is shown on the pages which follow. The entire semester's expenses
are due and payable at the beginning of each semester, and no student is officially enrolled until all semester expenses have been satisfied. In special cases the University will accept at the beginning of a semester a non-interest bearing promissory note for a portion of the semester residence-hall rent and semester-plan board fee. Amounts up to $65 for room rent and $115 for board fee may be included in the note. In such cases, a note for the first semester charges will be due October 10, and a note for the second semester charges will be due March 1.

A $60 advance payment of room rent is required for a room reservation for the fall semester. This payment must be made by cash, check or money order and should be sent to the Residence Halls Manager's Office with the completed "Student Application for Room Reservation" card not later than July 1. The $60 advance payment of room rent will be deducted from the amount otherwise due for the first semester's expenses. All other transactions relating to payments should be conducted with the Accounting Division. All checks and money orders should be made payable to Clemson University. A personal check given in payment of University expenses which is returned by the bank unpaid, immediately creates an indebtedness to the University.

The University reserves the right to adjust charges to current costs.

Past Due Student Accounts. Any indebtedness to the University which becomes past due immediately jeopardizes the student's enrollment, and no such student will be permitted to graduate or register for a subsequent semester or summer school term. Further, any student who fails to pay all indebtedness to the University may not be issued an honorable discharge, transcript, or diploma.

Refund of Academic Fees for Students Enrolled for Less than a Full Semester. No adjustments in charges will be made on a semester's tuition and fees after five weeks from the date classes begin for the semester. Charges for periods of attendance of five weeks or less during a semester shall be made on the following basis:

<table>
<thead>
<tr>
<th>Period of Attendance</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two weeks or less</td>
<td>20%</td>
</tr>
<tr>
<td>More than 2 but not more than 3 weeks</td>
<td>40%</td>
</tr>
<tr>
<td>More than 3 but not more than 4 weeks</td>
<td>60%</td>
</tr>
<tr>
<td>More than 4 but not more than 5 weeks</td>
<td>80%</td>
</tr>
<tr>
<td>More than 5 weeks</td>
<td>100%</td>
</tr>
</tbody>
</table>
Special provision has been made for a student who is required to discontinue his enrollment to report for active duty in the Armed Forces of the United States. Such students shall be charged for tuition, maintenance and activity fee, and medical fee on a daily pro rata basis, holidays excepted, instead of the percentage basis stated above, provided that such discontinuance of enrollment is the result of circumstances, conditions, or actions over which the student has no control.

Refund of Dining Hall and Residence Hall Fees. Specific information relating to living-expense refunds is given in the sections on dormitories and dining hall.

Schedule of Charges. The schedule of semester charges for the 1970-71 session is as follows:

**SCHEDULE OF SEMESTER CHARGES 1970-71 SESSION**

**Resident of South Carolina** (Full-time student)

<table>
<thead>

<td>7.00</td>
<td>14.00</td>
</tr>
</tbody>
</table>

Graduate Students. For further information concerning advanced degrees see The Graduate Bulletin, which may be obtained from the Office of the Dean of Graduate Studies and University Research.

Late Registration Fee. To prevent or reduce the problems incident to late registration, registration schedules are set for specific days, and certain definite procedures are outlined. A student has not completed registration until all of the required steps are taken, the final one being the return of the properly signed Class Registration Card to the Office of Admissions and Registration. Any student who fails to register for classes on the prescribed class registration days will be charged a late registration fee of $10. This late registration fee applies to full-time and part-time students.

* By the 1971-72 academic year, it is anticipated that telephones will be installed in the rooms of Benet, Cope, Young Halls, and Section E of Johnstone Hall; this will result in an increase of $15 per semester in these rooms.
** By the 1971-72 academic year, it is anticipated that old Sections A, B, and C of Johnstone Hall will be air-conditioned resulting in a room rent increase of $15 per semester.
Late Payment Fee. Any student who registers for classes on or before a designated date each semester has three additional working days to make satisfactory settlement of all expenses without being charged a Late Payment Fee. Once begun, a Late Payment Fee of $5 per day will be charged until satisfactory settlement of all fees is made.

Definition of Residence for the Purpose of Determining Status for Enrollment in Clemson University

1. A resident student is one who was continuously domiciled in South Carolina for twelve months immediately preceding his initial enrollment in the University. The term “domiciled in South Carolina” excludes those students in the State primarily to attend the institution and whose abode in South Carolina has been established as a technical bar to the higher tuition and fee charges.

2. Attendance at an educational institution is usually interpreted as temporary residence. Accordingly, a student neither gains nor loses residence solely by such attendance. Registration for voting, the act of voting, purchase of property, payment of taxes and employment in South Carolina are not necessarily by themselves proof of residence in the State for the purpose of enrolling in the University; nor does birth in South Carolina or direct descent from South Carolina forebears necessarily prove domicile in South Carolina.

3. The residence of a married woman is that of her husband, if living together; however, a wife not living with her husband may establish separate domicile. A non-resident woman who marries a resident of South Carolina shall be accepted as a resident student at the beginning of the next semester following such marriage; and a resident woman who marries a non-resident shall keep her residence status so long as she maintains continuous enrollment in the University. A non-resident man who marries a resident woman does not thereby gain resident status.

4. The residence of a minor child (under 21 years of age) is that of the father; or of the mother if the father be not living or if the parents are separated and the child habitually resides with the mother; or, if both parents are dead, with his legally appointed guardian, or anyone else with whom he habitually resides in the absence of formal legal designation.

5. A minor may become emancipated (freed from parental domicile) through marriage, formal court action, abandonment by
parents, or positive action on his own part evidential of his alienation of parental domicile. To qualify under the latter category, a minor must have completely separated himself from the parental domicile and have proved that such separation is complete and permanent. Mere absence from the parental domicile is not proof of its complete abandonment. If an applicant can provide adequate and satisfactory proof of complete emancipation and of his having come to South Carolina with the intention of establishing domicile, he may be granted resident classification at the next enrollment occurring after the expiration of twelve months following establishment of domicile, excluding time spent as a student at the University. The burden of proof of domicile and emancipation shall be upon the applicant.

6. If it is established to the satisfaction of the University that parents have moved to South Carolina with every intention of remaining permanently and establishing themselves as citizens of the State, the dependent children of such parents may be classified as resident students at the first enrollment after the parents move into the State. If the parents of a resident student move to another state with the intention of establishing domicile there, the student shall at the first enrollment after twelve months from the date of establishment of said home by his parents be classified as a non-resident student; however, the student may continue in resident status if he reaches 21 years of age within the twelve-month period, or if he establishes evidence of emancipation.

7. A person enjoying majority privileges (over 21 years old or an emancipated minor) who has resided in South Carolina continuously for twelve months immediately preceding his initial enrollment in the University shall be classified as a resident. If, after enrollment, such person can provide adequate and satisfactory proof of his establishing domicile in South Carolina and his intention to remain permanently as a resident of the State, he may be granted resident classification at the next enrollment occurring after expiration of twelve months following establishment of domicile exclusive of time spent as a student at the University.

8. Dependents of members of the Armed Services and Federal employees stationed in South Carolina are permitted to attend the University, if accepted, by paying resident fees without regard to resident status, provided that if such military personnel or employees are ordered away from the State, their dependents may continue to have this privilege while they attend the University.
9. Children and dependents of regularly employed Clemson University personnel are permitted to attend the University, if accepted, by paying resident fees without regard to residence status, provided that if such person terminates University employment and departs the State, the child or dependent may retain this privilege so long as continuous enrollment is maintained in the University.

Any student or prospective student in doubt concerning his residence status must bear the responsibility for securing a ruling by stating his case in writing to the Dean of Admissions and Registration.

Books and Supplies. The cost of books is not included in the Schedule of Semester Charges. The cost of books and supplies at the beginning of the semester will be approximately $50, except for students enrolling in Architecture the cost will be approximately $75.

Student Depository. For the convenience of students, the University operates a depository in the Bursar's Office where money can be deposited and withdrawn as the occasion may demand. This service is purely local. Students are urged to deposit their money and not to keep it in their rooms.

Optional Expenses. It is not possible to give an estimate of a student's expenditures for such amusements as dancing, motion pictures, etc. This depends largely upon the disposition of the student. The University endeavors to reduce to a minimum the temptation to spend money needlessly, but the authorities cannot be responsible for a student's private expenditures. This must be a matter between the student and his parents.

Transcripts. Official transcripts of scholastic records are issued on request. One transcript is furnished free; additional copies are issued for $1 each. Remittances for transcripts should be made payable to Clemson University, but should accompany transcript requests and should be mailed to the Office of Admissions and Registration.

STUDENT HOUSING

The University residence halls will accommodate 5,190, two students being assigned to a room. The University also has 289 individual units for its married students. All unmarried first-year students entering the University directly from high school or preparatory school, not residing with parents, guardians or close relatives, are required to live in University-owned residence halls. All stu-
dents in their second or more years in college are eligible to live off-campus. Students who are assigned a room in University residence halls will be required to sign a Residence Hall Contract relating to terms and conditions of occupancy for the full academic year. Those students living off-campus will fill out an off-campus locator card as part of the registration process and will report all changes of address as they occur. The Residence Halls Office maintains the off-campus locator file and provides information pertaining to off-campus students.

Application for Residence Hall and Advance Payment. An application for residence hall accommodations will be forwarded to those students who are accepted by the University for the fall semester, provided they have paid the $50 admissions deposit. These applications are to be completed and returned with a $60 advance room payment to the Residence Halls Office at the earliest practicable date. After July 1, the $60 advance payment will not be accepted. Students requesting accommodations after that date must pay the full semester's rent in order to receive a room assignment.

Students who have made an advance payment and later decide not to enroll or to live in the residence hall may obtain a refund of the advance payment provided notification of intent and request for refund is received at the Residence Halls Office prior to July 1. When such notification and refund request is not received by the deadline date, no refund of advance payment will be made.

Normally, residence hall accommodations are available to those students who enter the University at the beginning of the second semester, therefore, the advance payment is not now required of students entering at that time.

Notification of Assignments. As soon as room assignments are made, students are advised of the assignment and furnished information regarding occupancy.

Assignment Changes. Students who desire to move from the assigned room may request a room change at the Residence Halls Office. However, no approval of these requests will be made until after the last day for matriculation during any semester. Fee adjustments will be made when moving to a room which rents at a rate different from that of the originally assigned room.

Opening and Closing of Residence Halls. The University residence halls officially open for undergraduate students at 8 a.m.
the day prior to matriculation date for new students and close at 8 p.m. the day scheduled for graduation exercises of the term or semester. Residence hall fees cover only the time between the day before matriculation and the scheduled date of graduation exercises or end of term when no graduation exercises are scheduled.

For official holidays which occur during the course of a semester, the University reserves the right to close certain halls and to require students remaining on the campus to move to another hall for the duration of the holiday period.

Student Responsibility for Damages. The University holds residents responsible for any damages other than normal wear that occur to their rooms and furnishings. Damages will be assessed by the University and the student will be billed for repairs or replacements. Students should note on the property certificate immediately upon occupancy any conditions reflecting prior damages which have not been corrected.

Responsibility for Student Possessions. Although every precaution is taken to maintain adequate security, the University cannot assume the responsibility for the loss of or damage to student possessions resulting from any cause.

Refund of Residence Hall Fee. Except for the stated regulations governing the $60 advance payment to reserve a room for the first semester, refunds, when authorized, will be made on a daily pro rata basis.

Reservation of Right to Change Fees and Regulations. The University reserves the right to make changes in its fees, charges, rules, and regulations.

RESIDENCE HALLS

West Campus. The University has available 3,606 spaces in eleven residence halls. Each is fully air-conditioned. Johnstone Hall, the largest of these residence halls, has rooms equipped with lavatories and individual clothes lockers. They are furnished with bunk-type beds, a study table and chairs. Rooms in Benet, Young, Cope, Geer, and Sanders Hall along with rooms in new annexes "A" and "F" of Johnstone Hall are equipped with lavatories, walk-in type closets, and are furnished with single beds, individual study desks and chairs. Also located on West Campus are Donaldson, Bowen, Wannamaker, Bradley, and Norris Halls. The residence
halls are completely carpeted and rooms are furnished with individual clothes lockers, single beds, individual study desks with reading lamp, and chairs. Some of the residence halls located on this campus are equipped with telephones. Students will receive information concerning room telephones when they receive room application forms.

**East Campus.** In this area there are 1,584 spaces available in five residence halls. Two of these, Mauldin and Barnett Halls, are modern four-story structures with 144 spaces each. The remaining three, Manning Hall, Lever Hall, and High Rise No. 3, are eleven-story structures all of which were constructed during the last four years. Each will house 432 students. All residence halls are air-conditioned and provide the most modern student accommodations. Rooms are arranged in suites of six accommodating 12 students. Each room contains two closets, two chest of drawers with wall-hung mirrors, individual reading lamps, desks and chairs. Draperies must be furnished by the occupants. Studies and laundry rooms are available on each floor. Also available in these residence halls are lounges, kitchenettes, T.V., and recreation rooms. All rooms located on East Campus are equipped with telephones.

**MARRIED STUDENT HOUSING**

Clemson provides comfortable and economical housing for its married students. There are three housing areas consisting of 139 single Prefab units, 100 East Campus apartments contained in 50 duplex buildings, and 50 Littlejohn apartments in 11 buildings.

All married student housing units have two bedrooms, living room, kitchen and bath. East Campus apartments are the newest and are equipped with stove and refrigerator. The Littlejohn apartments and Prefabs are not equipped with stoves and refrigerators.

Booklets describing these facilities are available and will be furnished upon request to the Housing Office of the University. Monthly rental fees are: Prefabs, $36; Littlejohns, $51 for interior and $54 for end units; East Campus, $69.

**STUDENT FOOD SERVICE**

The University Dining Halls provide several food service plans for the students:

(1) A 5-Day Board Plan (15 meals) Monday through Friday—holidays excluded. The fee for this plan is $440 per year and may be paid in two installments—one-half at the beginning of the first semester and the remainder at the beginning of the second semester.
(2) A 7-Day Board Plan (21 meals) Monday through Sunday—holidays excluded. The fee for this plan is $550 per year and may be paid in two installments—one-half at the beginning of the first semester and the remainder at the beginning of the second semester. Both the 5-Day and 7-Day Board Plans will begin the first day of classes and end on the day which is scheduled for graduation. (These dates are listed in the University Calendar appearing in this catalog.) Individual meals may be obtained in the student dining halls prior to the day classes begin.

(3) Students who are not on a board plan may purchase tickets for individual meals at prevailing prices. Except on special occasions, a-la-carte service will not be offered in the Student Dining Halls.

All students who enter the University for the first time from high school or preparatory school and who live in University residence halls are required to subscribe to either the 5-Day or the 7-Day Board Plan. Either the 5-Day or the 7-Day Board Plan is also recommended to upperclassmen who reside in University residence halls.

Upperclassmen and graduate students have the option at the time of their enrollment of electing either the 5-Day or the 7-Day Board Plan provided they agree to pay the board-plan fee for the period of their enrollment during the academic year.

A student having selected the 5-Day or the 7-Day Board Plan for the academic year may not withdraw as long as he remains enrolled, except in the case of marriage or circumstances which are determined by the University to be beyond his control.

**LAUNDRY—DRY CLEANING**

A plant with modern equipment is conveniently located on campus to service the laundry and dry-cleaning requirements of the student. Reasonable prices are charged for individual items on a cash-and-carry basis.

The University will not be liable for lost or damaged items unless reported within two days after the delivery date, and then for not more than the actual depreciated value of such articles as have been lost or damaged.

Coin-operated washing machines and dryers are available in the laundry building and several of the dormitories.

A commercially operated student linen-rental service is also available. Information regarding this service will be forwarded to all students who are accepted for enrollment in the University.
MEDICAL EXAMINATIONS

Completion of a medical history and physical examination record is required of all new students entering Clemson University for the first time. This examination must be completed by the student and the student's own physician or the health service of the school from which he graduates or transfers. This examination must be reported on a special form provided for this purpose by the University and mailed directly to the Director of Student Health Service. This should be received at least four weeks prior to matriculation to give time for processing; otherwise registration may be delayed. Incomplete forms will be returned.

The University requires that all new students have a current tetanus toxoid series or booster (within five years), a smallpox vaccination (within four years) and also immunization against poliomyelitis. The oral (Sabin) type vaccine is preferred. All new students are also required to have a skin test for tuberculosis within one year prior to admission. If this test is positive, a chest X-ray is also required. All positive reactors will then be required to have an annual chest X-ray. These follow-up X-rays after admission will be done at the Student Health Service.

STUDENT HEALTH SERVICE

Student Health Service: Cost per Semester $25. Payment of the Student Health Service fee is required of all students living in University residence halls and all full-time students even though they do not reside in University housing. The Student Health Service is housed in the new Redfern Health Center and is complete with outpatient department and a 34-bed hospital. The staff consists of three full-time physicians, including the director, a psychiatrist, thirteen full-time registered nurses and a full-time registered laboratory technician and a full-time registered X-ray technician. In addition, a sufficient number of nurses' aides, secretarial workers, orderlies and maids for 24-hour-a-day operations are employed. The best of modern equipment is available for student use.

The Student Health Service at Clemson University has several important functions. All of these are aimed at keeping the student in good health so that he may effectively pursue his school work. There is, of course, the basic function of medical care for the ill and injured. This is a vital part of its work. In addition to this, the Student Health Service attempts to put strong emphasis on health rather than illness. This begins with the entrance medical form. In laying out this form an attempt is made to get information.
examinations and preventive medical procedures carried out to better equip the staff in protecting the student from illness and to serve as a guide for the care of pre-existing medical problems.

As the student progresses through his academic experiences, other procedures may be required or highly recommended. These are primarily an effort to teach the individual self-responsibility for maintenance of his own health, protection of the health of those around him, and locate possible hidden diseases. The Health Service also has the position as the source of medical information as well as responsibility for indicated medical action: diagnostic, therapeutic and preventive.

The medical fee paid by each student covers the services of the University physicians, the health service staff and equipment for most illnesses and injuries occurring on or around the campus. There are certain things, however, that it does not include, such as fees for routine physical examinations for employment or transfer to another school and fees for outside physicians when called in for consultation, medical or surgical services performed away from the University or for accidents occurring off the campus. The fee also covers medication for acute illness but not for chronic illness lasting over two weeks or for pre-existing illness. Although ambulance transportation to a general hospital for serious illness or injury occurring on campus will, of course, be arranged, the expense for this service is the responsibility of the student. Transportation for less urgent ailments and routine visits can be arranged through the Health Service at the expense of the student. An emergency vehicle for local use is maintained by the Security Department.

The right of the Director of the Student Health Service, with the approval of the proper University authority, to obtain any needed extra services in behalf of any student under his care is hereby expressly reserved.

The Student Government, with full approval of the administration, offers a plan of accident and sickness insurance to full-time students. Each year, prior to the beginning of the fall semester, complete information on this insurance plan will be sent to students. This insurance is inexpensive and is designed to cover major medical expense not covered by the Health Service. It is highly recommended.
UNDERGRADUATE FINANCIAL AID

General. The Office of Student Financial Aid, operating in conjunction with the University Honors and Awards Committee, is responsible for coordinating all types of financial assistance administered by the University. Currently available financial aids consist of scholarships, student loans, grants, and part-time employment. It must be realized that any program of financial assistance can only be supplementary and that the basic financial responsibility remains that of the applicant and his parents.

Application Procedure. Beginning in January of each year all eligible students may apply to the Student Financial Aid Office for any type of financial assistance desired for the coming school year. Prompt consideration may be afforded only those applications submitted directly to that office rather than to the individual colleges, schools, and departments. All requests—except for part-time employment—must be supported by a Parents’ Confidential Statement filed directly and renewed annually with the College Scholarship Service, Box 176, Princeton, New Jersey 08540. Action on requests for aid will be based upon scholastic and activity records, eligibility to attend Clemson, and financial resources. Prospective students must have received their final acceptance for enrollment from the Admissions Office before complete action may be taken upon their requests for aid. Applicants will be notified when they are selected for specific types of assistance and should promptly indicate their acceptance. The Office of Student Financial Aid reserves the right to consider only those aid applications filed with that office, prior to cutoff date(s), and supported by requisite financial information (from College Scholarship Service). Further information and application forms may be secured by contacting the Student Financial Aid Office, Tillman Hall, Clemson University, Clemson, South Carolina 29631. Telephone 656-2285 (Area Code 803).

SCHOLARSHIPS FOR FRESHMEN

These awards will be based upon high school records, entrance examination scores, and other qualifications established by the selection committees. Completed entrance and scholarship applications, together with a transcript of high school work through the first semester of the senior year, must be submitted by February 1 in order to be considered. For purposes of scholarship application, the College Entrance Examination Board tests should be taken in time to allow our receipt of scores not later than February 1.
Marshall Williams and Grace Cornett Bell Memorial Scholarships. Income from a fund donated by Mrs. Bell and family provides one or more annual awards for students (freshmen or upperclassmen) enrolled in the College of Liberal Arts or the College of Physical and Mathematical Sciences with preference afforded those concentrating in mathematics or English curriculums. Selection is based upon academic progress, moral character, and financial need.

Albert Blanchard Carr Scholarships. Awarded each year to students exhibiting academic ability and financial need. May be renewed provided satisfactory academic progress is made by the recipient and financial need continues.

The J. H. Cochran Memorial Scholarship. An annual award of $400 provided by the South Carolina Pest Control Association for an Entomology major (undergraduate or graduate). Selection is based upon scholarship, leadership, character and interest in the field of Entomology.

The E. V. Correll Scholarship. A $500 award is made available annually by the Palmetto section of the American Association of Textile Chemists and Colorists to a student who is planning to major in the Textile Chemistry curriculum. Selection is usually limited to an entering freshman student showing need. However, it may be renewed for succeeding years if the student's academic records show satisfactory progress.

Dow Chemical Co. Scholarships. Two $500 awards are available annually to students (freshmen and upperclassmen) majoring in Chemical Engineering.

Educational Opportunity Grants. Non-reimbursable Federal grants, renewable if satisfactory academic progress is maintained, are available from the University for those entering freshmen of exceptional financial requirements. Grants must be matched by scholarships, loans, or other aid. Selection is based upon financial need and academic promise.

Edgar and Emily Hesslein Scholarships. Income from a fund donated by Neuss, Hesslein, and Company provides two $600 scholarships annually. Preference is afforded residents of Marlboro County, South Carolina. Selection is based upon scholastic excellence and financial need. Renewal subject to academic achievement.

Federal Nursing Scholarships. Federal grants, renewable if satisfactory progress is maintained, are available from the University for those entering freshmen of exceptional financial need enrolled
Information

in the baccalaureate Nursing program. Selection is based upon academic achievement and potential and financial need.

*The Ira S. Hurd Scholarship.* A $500 award is made available annually by the Palmetto section of the American Association of Textile Chemists and Colorists to a student who is planning to major in the Textile Chemistry curriculum. Selection is usually limited to an entering freshman student showing need. However, it may be renewed for succeeding years if the student's academic records show satisfactory progress.

*Sherwood E. Liles ('00) Engineering Scholarship.* Income from a fund donated by his four sons provides an annual $500 scholarship to a student in the College of Engineering. Normally renewable provided satisfactory academic progress is achieved. Selection is based upon academic ability, financial need, extracurricular activities, and South Carolina residence.

*Jonathan Logan Scholarships.* Two $2,000 awards, to be paid in equal installments during four years of satisfactory undergraduate study, are provided annually by the David Schwartz Foundation to be available to freshmen who enroll in the College of Industrial Management and Textile Science.

*William J. Neely Scholarships.* Funds donated by friends and associates of the late William J. Neely provide annual $500 scholarships for entering freshmen. May be renewed if academic achievement indicates such renewal to be appropriate.

*R. F. Poole Alumni Scholarships.* To encourage academic excellence, renewable $1,000 scholarships are awarded annually to incoming freshmen with outstanding academic potential.

*George E. and Leila Giles Singleton Scholarship.* Income from a fund donated by Mr. G. H. Singleton ('19) provides an annual $300 award to a student accepted for enrollment in an agricultural curriculum. The award is for an entering freshman and may be renewed for an additional year. Selection is based upon academic achievement, character, financial need, and South Carolina residence. Preference will be given male students.

*South Carolina Electric and Gas Company Scholarship.* A $500 scholarship is available each year to a student whose parents or guardians are customers of the South Carolina Electric and Gas Company or customers of the Department of Public Utilities of Orangeburg, Winnsboro, or McCormick. Recipient must be in upper one-third of class scholastically, have demonstrated outstanding-
ing leadership qualities, and require financial assistance. Renewal
subject to academic achievement.

South Carolina Fresh Fruit and Vegetable Association Scholarship. A $1,200 award, to be paid during four years of satisfactory undergraduate study, is available annually to a male South Carolinian who enrolls in the Horticulture (Fruit and Vegetable major) curriculum.

South Carolina Pest Control Association Scholarship. A $200 award is available annually for an Entomology major (entering freshman or upperclassman). Selection is based upon scholarship, leadership, character, and financial need.

South Carolina Poultry Improvement Association Scholarships. A $300 award is available annually to a freshman majoring in Poultry Science. An additional $300 award is available each year for a sophomore, junior, or senior.

The Steel Heddle Textile Scholarship. Two $2,800 awards, to be paid in equal installments during four years of satisfactory undergraduate study toward graduation is available annually for a freshman who enrolls in the Textile Chemistry, Textile Science, or Industrial Management curriculum.

J. P. Stevens & Co. Scholarship. A $2,000 award, to be paid in equal installments during four years of satisfactory undergraduate study, is available annually to a freshman who enrolls in a Textile curriculum.

Strom Thurmond Scholarships. Income from a fund donated by Senator Strom Thurmond provides two or more annual grants for worthy and needy entering freshmen from the State of South Carolina. Award of these grants will be in conjunction with participation in one of the established loan programs with which the University is affiliated.

Western Electric Fund Scholarships. Two awards are available annually for freshmen who enroll in Electrical, or Mechanical Engineering, and associated fields. May be renewed if satisfactory progress is made.

SCHOLARSHIPS FOR UPPERCLASSMEN

Recipients of the following awards are normally selected by the scholarship committees in early spring for the following school year. Completed applications must be submitted not later than February 1, to insure consideration. (Also note that some few freshman scholarships are equally available for upperclassmen.)
Jerry B. Addy Memorial Scholarship. Income from a fund donated by his relatives and friends provides a renewable annual award to a rising junior majoring in Mathematics, Physics, or Chemistry. Priority is given to residents of South Carolina. Selection is based upon academic proficiency and financial need.

Allied Chemical Foundation Scholarships. Two $750 awards are given annually to upperclassmen majoring in a Textile curriculum.

G. Dewey Arndt Scholarship. Income from a fund donated by FCX, Inc., and Carolinas Cotton Growers Association, Inc., provides a renewable annual award to an upperclassman in the College of Agriculture and Biological Sciences with preference given to students with an indicated interest in marketing and economics. Selection is based upon need, academic achievement, leadership, and character.

Barney Lee Bickley Memorial Scholarship. Income from a fund donated by his relatives provides an annual award for a sophomore student. Priority is given to residents of South Carolina.

Borden Agricultural Scholarship. A $750 award is available annually for the rising senior in Agriculture who has achieved the highest scholastic average on all college work preceding the senior year.

Burlington Industries Scholarship. An award, with preference to students majoring in Textiles or Industrial Management is available each year. Normally awarded to rising juniors; may be renewed if need, scholarship, and leadership continue at levels considered appropriate.

The Carolina Yarn Association Scholarship. A $500 scholarship is awarded annually to an upperclassman majoring in Textiles.

The A. B. Carter, Incorporated, Scholarship. A $500 scholarship is awarded annually to an upperclassman majoring in Textiles.

Langdon Cheves Scholarship. Income from a fund donated by his family provides an annual $400 award for a male undergraduate whose permanent place of residence is within the Southeastern United States. Selection is based upon academic progress, financial need, and participation in extracurricular activities.

Coburg Dairy Scholarship. A $1,000 award, to be paid in equal installments during the last two years of satisfactory undergraduate study, is available annually to a junior majoring in Dairy Science.
Selection is based upon scholarship, leadership, character, and financial need.

**Gilbeart H. Collings Memorial Scholarship.** An $800 award, given by the South Carolina Plant Food Educational Society and to be paid in equal installments during the last two years of satisfactory undergraduate study, is available each year for a rising junior majoring in Agronomy. Selection is based upon scholarship, leadership and character.

**Cotton Producers Association Scholarship.** A $900 award, to be paid in three equal installments during the sophomore, junior, and senior years, is available annually to a rising sophomore majoring in Agricultural Economics, Agricultural Education, Agricultural Engineering, Agronomy—Crops and Soils, Animal Science, Dairy Science, Entomology, Food Science, Horticulture (Fruit and Vegetable), or Poultry Science. Selection is based upon scholarship, leadership, character, and financial need.

**Ethyl Corporation Scholarship.** A $500 award is available annually for a student majoring in Chemical Engineering. Selection is based upon scholastic ability and financial need.

**Farm Credit Banks of Columbia Scholarships.** Two $500 awards are available for juniors or seniors enrolled in the Agricultural Economics major or minor, the Business minor in any other agricultural major, or any equivalent undergraduate program in agriculture. Renewal subject to academic achievement. Selection based upon scholarship, leadership, character, and financial need.

**Fieldcrest Scholarships.** Fieldcrest Mills makes available annual scholarships (and, if desired, summer employment) to upperclassmen enrolled in specific curriculums pertinent to employment in the textile industry. Selection is based upon academic excellence, extracurricular activities, financial need, and willingness to consider a textile career.

**W. T. Fort, Sr., Scholarship.** A $500 award is available to rising seniors in Architecture or Building Construction. Selection is based primarily upon financial need.

**Foundry Educational Foundation Scholarships.** Funds made available by grants from the Foundation provide one or more annual awards to students taking organized programs applicable to the casting of metals and foundry technology.
Ben H. Gardner Fund. Income from a fund donated to the University is awarded annually to a worthy student in the College of Engineering.

Ben and Kitty Gossett Scholarship. Income from their contribution provides one or more annual awards for Textile students whose families are employed by the textile industry in South Carolina.

J. H. Griffin Memorial Scholarship. Income from the J. H. Griffin Memorial Scholarship fund provides an annual award for a rising male senior (legal resident of South Carolina) majoring in Animal Science. Selection is based upon scholarship, leadership, character, and financial need.

Pauline Hanckel Dairy Scholarship. A $1,000 award, to be paid in equal installments during the last two years of satisfactory undergraduate study, is provided annually by the Ladies Auxiliary of the South Carolina Dairy Association to be available to a junior majoring in Dairy Science. Selection is based upon scholarship, leadership, character, and financial need.

Higgins Undergraduate Scholarships. Income from a fund donated by Mr. Higgins provides several annual awards for undergraduate students enrolled in the College of Engineering. Selection is based upon scholarship and need.

Richard O. Hull Scholarships. Two $500 awards are available annually for students majoring in Chemistry and Chemical Engineering who have achieved superior scholastic averages on all their college work. Selection is based primarily upon academic ability although financial need will also be taken into cognizance.

John D. Lane Scholarship. A $125 award is available each year for a rising junior. Selection is based upon financial need and scholastic ability with emphasis upon achievement in the field of English.

Monsanto Scholarship. A $500 award is available annually for a student majoring in Chemical Engineering.

Owens-Corning Fiberglas Scholarships. Two $500 awards (one in Ceramics) are available annually for rising juniors or seniors majoring in Engineering or Textiles. Selection is based upon academic ability, leadership qualities, and financial need.

Peace Fund Scholarship. A $500 award is available annually to a rising junior or senior. Selection is based upon journalistic ability, scholastic achievement, and evidence of good character.
Pennsylvania Glass Sand Scholarship. A tuition award is given annually to an outstanding rising senior majoring in Ceramic Engineering. Selection is based upon scholastic achievement.

Ralston Purina Scholarship. A $500 award is given annually to a rising senior enrolled in the College of Agriculture and Biological Sciences. Selection is based upon scholarship, leadership, character, extracurricular activities, sincerity of purpose in agriculture, and financial need.

Rayonier Scholarship. A $500 award is available annually for a rising senior majoring in Engineering. Selection is based upon academic standing and leadership ability.

J. C. Rich ('13) Agriculture Scholarship. Income from a fund donated by his sister provides an annual award for a deserving male undergraduate enrolled in the College of Agriculture and Biological Sciences. Preference is given to relatives.

Seydel-Wooley & Company Scholarship. A $500 scholarship is available annually for a rising sophomore, junior, or senior male student majoring in the Textile Science or Textile Chemistry curriculum. Selection is based upon scholastic ability, evidence of leadership in school activities as a potential for leadership to the Southern Textile Industry.

The J. E. Sirrine Company Scholarship. A $500 scholarship is awarded to an outstanding undergraduate student in Civil Engineering, Chemical Engineering, Electrical Engineering, or Mechanical Engineering. This award is based upon a consideration of character, scholarship, and interest in a particular professional field. Preference is given to rising sophomores. Financial need is not a specific requirement.

Sonoco Products Scholarships. Two $500 awards are available annually for deserving undergraduates majoring in Textiles.

South Carolina Dairy Association Scholarships. A $1,000 award, to be paid in equal installments during the last two years of satisfactory undergraduate study, is available annually to a junior from South Carolina majoring in Dairy Science. Selection is based upon scholarship, leadership, character, and financial need.

Charles H. Stone Scholarship. A $1,000 award is available annually to a rising sophomore. Selection is based primarily upon exceptional academic achievement plus financial need.
3-M Company Scholarships. Two $500 scholarships are awarded annually to students majoring in Engineering and one $500 scholarship is awarded annually to a student majoring in Chemical Engineering. Selection is based upon academic standing, character, and demonstrated leadership abilities.

UniRoyal Foundation Scholarships. An award, to be paid in equal installments during the last two years of satisfactory undergraduate study, is available annually for a rising junior planning a career in industry. Selection is based upon proven scholastic ability and financial need.

J. P. Williamson Memorial Grants. Income from a fund donated by his relatives and the Winn-Dixie Stores Foundation is available annually for renewable grants to academically qualified and needy upperclassmen. Grants must be matched by loans from one of the established programs with which the University is affiliated. Priority is given to residents of Anderson County.

LOAN FUNDS

General prerequisites for the following aid are enrollment, or acceptance for enrollment, as a full-time student, substantiated need, and adequate academic capability or potential to maintain at least average college-level grades. Applicants for other types of financial assistance may also be considered for loans after contacting the Financial Aid Office. Availability is dependent upon adequacy of funds at hand. Normal cutoff date for loan applications is June 1.

Georgianna Camp Foundation Fund. A fund, donated in memory of Georgianna Camp by her husband and sons, is available to assist worthy students who are seeking a college education and require assistance to supplement their individual efforts and available sources of income. (Alumni Foundation)

Clemson Architectural Foundation. Needy Architecture students in the upper years of their curriculum who show professional promise will be considered for loans from the General Fund of the Foundation.

Clemson Student Loans. A number of interested faculty and staff members, alumni, students, families, and friends have made memorial donations to assist worthy students.

Clemson University Foundation. A limited sum is available for emergency student loans. Included are donations from family and
friends made in memory of J. C. Littlejohn ('08), J. H. Woodward, Jr. ('35), and his father, Uncle Jake ('02). (Alumni Foundation)

Daniel Memorial Fund. Income from a sum donated by officers of the Daniel Corporation in memory of James Fleming Daniel and Fred Adams Daniel is loaned to deserving students.

National Defense Student Loan Program. State and Federal monies are available to provide assistance to graduate and undergraduate students. Prerequisites are verified need and the demonstrated ability or potential to maintain normal and satisfactory academic progress. Normally restricted to those students planning careers in the teaching profession.

Nursing Student Loan Program. Under the Health Manpower Act of 1968, loans may be made available for full-time study in a School of Nursing. Prerequisites are verified need and the demonstrated ability to maintain substantial academic progress at the collegiate level.

Reid-Baskin Fund. Income from a fund donated in memory of Cecil L. Reid ('02) and John Baskin will be used to aid deserving students. Preference is given Newberry and York County residents. (Alumni Foundation)

Tile Council of America Fund. The Tile Council has made a grant to be used for interest-free loans to outstanding and needy students in the lower years of the Architecture curriculum.

United Student Aid Funds Loan Program. Clemson University is one of a large number of universities participating in this national nonprofit loan program for needy and deserving students. Full-time students may borrow up to $1,500 per year. Interest is 7% simple and payment of interest and principal begin the tenth month after graduation and may be anticipated. The financial aid officer recommends the loan, after consultation with the student, and the loan is negotiated at the student's home town bank on the student's own signature. This is the designated lending agency of the State of South Carolina. Under the provisions of the Higher Education Act of 1965, and depending upon family income, the U. S. Commissioner of Education may pay the interest on eligible loans while the student is in school.
STUDENT PART-TIME EMPLOYMENT

Clemson University employs students in those positions where part-time services may be utilized to mutual employment advantage. Students in actual need of financial aid are usually given preference in filling positions, all other qualifications being equal. Part-time employment of first-year students is not encouraged as the University has found through long experience that the period of academic adjustment during the freshman year allows little time for such extracurricular activity. The Student Financial Aid Office maintains application files of students desiring part-time employment for the information of requesting academic departments and off-campus agencies and industries interested in securing such help. Applications must be filed after registration for each semester during which part-time work is desired. Clemson does not participate in the Federal College Work Study Program.

OTHER SOURCES OF FINANCIAL AID

The following types of assistance are not administered by Clemson University. Recipients will be required to furnish the supporting agencies with a schedule of payments due the Bursar if payment is desired to be made through the University. Such funds must be received by him on or before the due dates. Any other arrangements require approval of the Bursar.

Army Student Nurse Program. Students in the baccalaureate program who participate in this program during the junior and senior years have tuition paid and a monthly salary of approximately $270. Six months prior to graduation the student is promoted to second lieutenant and salary increases to approximately $475 per month. Those participating for one year must agree to serve for two years in the ANC after graduation. Those in the program for 12-24 months agree to serve three years.

National and State Agencies. Students should investigate such sources of financial aid as the following: Veterans Education, War Orphans Education, advanced ROTC programs, National Guard and Reserve training programs, National Merit Scholarships, and grants made the handicapped through the State Department of Vocational Rehabilitation.

Other Agencies. Help is often received from grants or loans through: American Institute of Architects, Beta, FFA, and 4-H Club membership; local organizations of the Daughters of the American Revolution, United Daughters of the Confederacy, Civi-
tan, Elks, Masonic, Rotary, and similar groups; James F. Byrnes Foundation, Pickett and Hatcher Educational Fund, Methodist Student Loan Foundation, Knights Templar Educational Foundation, The Agricultural Society of South Carolina, The Garden Club of South Carolina, South Carolina Agricultural Teachers Association, S. C. Nurserymen's Association, Institute of Food Technologists; and various other religious, civic, welfare, and educational agencies.

Industry and Related Foundation Support. Students are often able to finance part of their education by summer employment or by alternating semesters between the University and jobs with establishments near their homes. Some students are eligible for loans or grants which are administered by those corporate and local industries which employ their parents. The finest source of information regarding this type of support has been found to be high school counselors.

Miscellaneous. There are available a number of "deferred tuition" lending plans. Examples of these are Education Funds, Inc., Tuition Plan and College Aid Plan.

It should be realized that the University has no affiliation or contractual agreement with any of the agencies sponsoring such plans and can accept no responsibility for the outcome of any individual arrangements entered into with those agencies.

HONORS AND AWARDS

Recipients for the following awards are chosen for their special achievements by selection committees, and are announced at an annual Honors and Awards Day program in the spring or at other appropriate ceremonies during the year.

Air Force Association Award. The Air Force Association of Washington, D. C., awards this medal annually to the outstanding Aerospace Studies 400 cadet who has shown outstanding aptitude for both academic and military pursuits.

Air Force Times Award. Presented annually to one graduating cadet at each detachment who has distinguished himself in bringing constructive attention to the Air Force ROTC.

Daughters of the American Revolution Award. Presented annually to an outstanding Aerospace Studies 400 cadet.

The Alpha Rho Chi Medal. The Alpha Rho Chi fraternity annually awards a gold medal to the graduate of the professional
curriculum in Architecture who has shown the greatest leadership, service to his school, and who gives promise of professional merit.

**Alpha Tau Alpha Scholarship Medal.** An annual award is given to the senior in Agricultural Education having the highest scholastic record.

**Alpha Zeta Award.** An annual award is given to a major in the College of Agriculture and Biological Sciences having a high scholastic record and possessing qualities of character and leadership.

**Ambrosia Chocolate Award.** An engraved watch is given annually by the Ambrosia Chocolate Company to the senior having the highest grade in Fd Sc 414.

**American Agricultural Economics Association Award.** This award is presented each year by the Clemson Student Chapter of the American Agricultural Economics Association to the outstanding student in Agricultural Economics, based on academic attainment and leadership in the club and other extracurricular activities.

**American Association of Textile Chemists and Colorists Award.** An annual award is given for the best work done in Textile Chemistry and Dyeing by a member of the graduating class.

**American Association of Textile Technologists Award.** An annual award is given to the graduate having a high scholastic record and all-round qualification for success in the textile industry.

**American Association of University Women Award.** The Clemson branch awards an engraved silver bowl annually to the girl graduating with the highest cumulative grade-point ratio.

**American Chemical Society Award.** An annual award is given to the outstanding senior in Chemistry who is a member of the student affiliate chapter of the American Chemical Society.

**South Carolina Chapter, American Institute of Architects Award.** The South Carolina Chapter of the American Institute of Architects each year awards a Certificate of Merit to the outstanding fourth-year student of Architecture in the Design Option and the Structural Option.

**American Institute of Architects Medal.** The National Organization of The American Institute of Architects awards each year a silver medal and a book to the outstanding graduate in the professional curriculum in Architecture at Clemson. An award is also presented to the runner-up.
American Institute of Chemical Engineers Award. The American Institute of Chemical Engineers sponsors an annual award to the junior majoring in Chemical Engineering who has attained the highest scholastic standing through the sophomore year.

Institute of Electrical and Electronics Engineers Scholastic Award. An annual award is given for outstanding participation in the Student Branch activities of IEEE to a second-semester junior or the first-semester senior having high scholastic standing.

American Legion ROTC General Military Excellence Award. The American Legion annually awards a medal to an outstanding junior and senior Air Force ROTC cadet who has demonstrated outstanding qualities in military leadership, discipline, character and citizenship.

American Legion ROTC General Military Excellence Award. The American Legion annually awards a medal to an outstanding junior and senior Army ROTC cadet who has demonstrated outstanding qualities in military leadership, discipline, character and citizenship.

American Legion Scholastic Excellence Award. The American Legion annually awards a medal to an outstanding junior and senior Army ROTC cadet based on scholastic achievement, participation in student activities and demonstrated leadership.

American Society of Agronomy Award. The American Society of Agronomy sponsors an annual award to an outstanding senior in the Department of Agronomy and Soils.

American Society of Civil Engineers Membership Award. The South Carolina Section of the American Society of Civil Engineers sponsors an annual award to the outstanding graduating senior in Civil Engineering.

The American Society of Mechanical Engineers Award. An annual award is given to a senior in Mechanical Engineering for his outstanding service in the College of Engineering.

Society of American Military Engineers Award. The Society of American Military Engineers awards annually a gold medal with key replica to the twenty outstanding AFROTC cadet juniors and to the twenty outstanding AFROTC cadet seniors enrolled in Aerospace Studies in colleges and universities throughout the nation who are majoring in Engineering.
Society of American Military Engineers Award. The society of American Military Engineers awards annually a gold medal with key replica to the twenty outstanding Army ROTC cadet juniors and to the twenty outstanding Army ROTC cadet seniors enrolled in the Army General Military Science ROTC Units in colleges and universities throughout the nation who are majoring in Engineering.

Major Rudolf Anderson, Jr., Trophy. The trophy is presented annually to the Aerospace Studies cadet who has distinguished himself by his performance and dedication to the precepts of the AFROTC Cadet Wing at Clemson University, such actions having been acknowledged to constitute the most outstanding contribution to the promotion and enhancement of the traditions, ideals, and aspirations of the Air Force Reserve Officer’s Training Corps.

Architectural Faculty Award. The faculty of the College of Architecture has established this award for recognition of academic excellence of a first-year Pre-architecture student.

Armed Forces Communication and Electronics Association Gold Medal. The Armed Forces Communications and Electronics Association of Washington, D. C., sponsors an annual award to the outstanding senior Army ROTC cadet majoring in Electrical Engineering.

The Armed Forces Communication and Electronics Association Award. An annual award is given to the outstanding AFROTC senior majoring in mathematics, chemistry, or engineering who has demonstrated outstanding qualities of military leadership, character, and definite aptitude for military service.

South Carolina Chapter, Armed Forces Communications and Electronics Association Leadership Award. An annual award is presented to an outstanding ROTC junior majoring in Electrical Engineering. The award includes a one-year membership in the Association and a subscription to Signal magazine.

Associated Schools of Construction Award. A book is given in the name of the Associated Schools of Construction to a student in Building Construction for scholarship and for his having demonstrated promise of future achievement in his chosen field.

Association of the United States Army Award for Excellence in Military History. The Association of the United States Army annually sponsors an award to the second-year Army ROTC cadet achieving the highest average in Military History.
Honors and Awards

Association of the United States Army ROTC Award. The Association of the United States Army annually awards a medal to each of four junior ROTC cadets who are in the top 10 percent in ROTC grades and in the top 25 percent in general academic grades and who have contributed most, through leadership, to advancing the standing of the Army ROTC unit and the Military Science Department at Clemson University.

G. H. Aull Essay Award. A $25 award is given annually to the senior student presenting the best essay in the field of Agricultural Economics.

Block and Bridle Club Scholarship. A $100 award to be paid at the beginning of each regular semester is available to a junior in the Block and Bridle Club. Selection is based on scholastic ability, financial need and leadership in the club and other activities.

Chemistry Faculty Award. An annual award is given to the sophomore majoring in Chemistry who maintained the highest scholastic record in Chemistry during his first two semesters of work.

Class of 1902 Awards. The members of the Class of 1902 have deposited with the Clemson University Foundation three funds of $2,000 each, in recognition of the distinguished teaching services of three professors who were on the faculty at that time, and in memory of those of the class who have passed on. The income from these funds is to be awarded annually as follows: The Williston Wightman Klugh Award, to a worthy, earnest undergraduate student of good moral code and personality who intends to make teaching his life work; The Rudolph Edward Lee Award, to a worthy undergraduate student in Architecture, upon the recommendation of the faculty of that College after consideration of the student's grades, extracurricular activities, and those qualities that go toward making a successful professional architect; and The Samuel Maner Martin Award, to a worthy undergraduate student taking mathematics as a major subject.

Commander's Saber. Presented annually by the Professor of Military Science to the Army ROTC cadet officer considered to have contributed most to the advancement of the cadet brigade through leadership and devotion to duty.

Howard Carlisle Copeland Memorial Award. The family of Howard Carlisle Copeland, who gave his life during World War II, has set up a permanent memorial fund in his memory. Each
year the interest from the fund shall be given to the boy who has made the greatest endeavor financially to stay in college.

The H. William Close Achievement Award of the Textile Veterans Association. A medallion and a $100 U. S. Savings Bond is awarded annually to the most outstanding senior in either the Textile Chemistry or Textile curriculum in honor of Mr. H. William Close, President of Springs Mills, Incorporated.

The Marvin R. Cross Honor Award of the Textile Veterans Association. A $50 U. S. Savings Bond and a medallion is awarded annually to an outstanding senior in the Textile Department of the College of Industrial Management and Textile Science.

Danforth Fellowships. The Danforth Foundation of St. Louis awards two fellowships each year to agricultural students. One of these is given to an outstanding member of the junior class majoring in either Agricultural Economics, Agricultural Education, Animal Science, Dairy Science or Poultry Science, and provides for a 2-week summer short course with Ralston Purina Company, and a 2-week stay at the American Youth Foundation Leadership Training Camp at Shelby, Michigan. The second award provides for a 2-week stay at the Leadership Camp at Shelby, Michigan, and is awarded to an outstanding freshman in the College of Agriculture and Biological Sciences.

Distinguished Military Student Badge. An annual award is given by the Department of the Army to those individuals, designated by the Professor of Military Science, who possess outstanding qualities of leadership, high moral character, and definite aptitude for Army service. They must have attained an academic standing in the upper half of their class and demonstrated leadership ability through their achievements while participating in recognized campus activities. Such recognition carries with it the opportunity for commissioning in the Regular Army.

Samuel B. Earle Award. An award established by Clemson Alumni in honor of Dean Samuel B. Earle, who ended 48 years of service to Clemson University in July, 1950, is given annually to an outstanding senior in the College of Engineering.

Lena Brayton Eaton—Carrie Hutchins Freeman Award. An annual award made by the Department of Music to an undergraduate of Clemson University who is the winner of a competition consisting of the performance on the piano of a composition of serious
music. The award honors two persons who contributed greatly to a deeper appreciation of music in the Clemson community and in the University where their husbands were members of the faculty.

Dr. R. C. Edwards Award. Awarded annually to the outstanding Clemson University Army ROTC cadet who attained the highest degree of proficiency during the preceding ROTC summer camp.

English Honor Key. This key is awarded annually to a student in the graduating class who has an outstanding record in English as an undergraduate at the University.

South Carolina Entomological Society Award. An annual award is given to an undergraduate student majoring in Entomology. Selection will be made on the basis of scholarship and character.

The Faculty Award of the College of Industrial Management and Textile Science. A gold medallion and a U. S. Savings Bond is awarded annually to the most outstanding graduating senior in the College.

Faculty Scholarship Award. An annual award is given to the member of the graduating class with the highest academic achievement by the academic faculty. The winner receives a certificate and a gold medal and has his name inscribed upon a plaque which is placed in the main entrance of Tillman Hall. This plaque carries the names of all previous winners of the award.

Forbes Chocolate Award. A $100 award is available annually to a sophomore majoring in Dairy Science. Selection is based upon scholarship, leadership, character, and financial need.

Forestry Junior Scholar Award. An award of $50 is presented to the junior in Forestry having the highest academic record. The award is made possible by contributions from certain wood-using industries and from the South Carolina Society of Consulting Foresters.

Gamma Sigma Delta Awards. Awarded annually to the student in the sophomore class and in the senior class majoring in Agriculture and having the highest scholastic attainment.

Ben H. Gardener Award. The income from a fund donated to the University by the father and son is given annually to some worthy and needy student in the College of Engineering.

General Dynamics Award. An annual award is given to the most outstanding sophomore student of the basic AFROTC course who is qualified and motivated for an Air Force career.
J. H. Griffin Memorial Scholarship. Income from the J. H. Griffin Memorial Scholarship Fund provides for an annual award to a rising male senior (legal resident of South Carolina) majoring in Animal Science. Selection is based upon scholarship, leadership, character, and financial need.

Industrial Management Merit Award. An award is provided by the Neely and Gibson Coal Sales Company (William J. Neely, '32, and Harry H. Gibson, '32) for an Industrial Management major who has demonstrated through outstanding academic performance and excellent personal characteristics sufficient potential to enable him to assume significant managerial responsibilities in modern industry.

Harrison Freeman Lathrop Award for Scholarship. An award in honor of Mr. Harrison Freeman Lathrop, an outstanding forester of South Carolina, provided by the South Carolina Tree Farm Committee and by Mr. Oswald Lightsey, of Hampton. The award, consisting of $100 and an engraved plaque, is given to a Forestry senior selected by the faculty of the Department of Forestry on the basis of scholarship, leadership, and personality.

Rudolph E. Lee Award. In recognition of the distinguished teaching service of Rudolph Edward Lee and in memory of those of the class who have passed on, the members of the Class of 1902 present each year the Rudolph Edward Lee Award of $100 to a worthy undergraduate student in Architecture, after consideration of his grades, extracurricular activities, and those qualities that go toward making a successful professional architect.

James Lynah Merit Awards. Income for several awards is derived from a fund established by Mr. James Lynah, in memory of distinguished professors who were teaching at Clemson when the Class of 1902 were undergraduates, as follows: The Charles Manning Furman Prize in English, The Mark Bernard Hardin Prize in Chemistry, The William Shannon Morrison Prize in History, The Charles Carter Newman Prize in Horticulture, The Walter Merritt Riggs Prize in Electrical Engineering and The Augustus G. Shanklin Prizes in ROTC, Air and Military Science and Tactics. These awards are made to students having a high scholastic rating and possessing outstanding qualities of character and leadership.

Clark Lindsay McCaslan Award. A sum of money has been deposited with the University to establish a fund in memory of Clark Lindsay McCaslan, Class of 1908, and a pioneer in Agricultural Engineering. The income from the fund shall be given annually
to the student in the Department of Agricultural Engineering who in the opinion of the faculty shall be deemed to be the most deserving.

**Colonel S. T. McDowell Award.** Awarded annually to the outstanding Army ROTC cadet senior scheduled to be commissioned in a Combat Arm of the United States Army.

**Henry T. Malone Gamma Alpha Mu Award.** Henry T. Malone, Class of 1937, will present a $50 award to the undergraduate student who writes the best feature on campus, community, or state history to appear in *The Tiger*.

**Marksmanship Awards.** Medals are annually presented to those members of the Army ROTC Rifle Team achieving highest position average scores.

**Martin Instrument Company Award.** A $50 award to the senior student majoring in one of the biological sciences who achieves the highest scholastic record.

**Dr. Ralph Mershon Memorial Award.** The Secretary of the Army will present annually a $250 prize to the outstanding Distinguished Military Graduate of a senior division Army ROTC university or college who is commissioned in the Regular Army.

**National Defense Transportation Association Award.** This award may be presented annually to an outstanding Aerospace Studies cadet majoring in Industrial Management.

**Northern Textile Association Honor Award.** A medallion is awarded annually to the graduating senior in the Textile curriculum with the highest scholastic average in the Textile curriculum.

**National Defense Transportation Association Award.** The National Defense Transportation Association will award annually the NDTA Medal to the twenty outstanding senior students enrolled in General Military Science Army ROTC units throughout the nation.

**Thomas Newcomen Award in Material History.** The Newcomen Society in North America gives an annual award for the best research paper presented in the field of Material History.

**Norris Medal.** The following is from the will of the Hon. D. K. Norris, a life trustee of Clemson, who died in 1905:

"I give $500.00 face value, Norris Cotton Mill stock . . . on condition the dividend thereon shall be applied annually to the purchase of a gold medal, to be known as the 'Norris Medal,' to be
awarded to the student of Clemson meriting the same at graduation, under such rules and conditions as may be prescribed by the said Board of Trustees, and which medal shall have engraved on it 'Honor habet onus' (Honor brings responsibility).”

The winner of the Norris Medal has his name inscribed upon a plaque which is placed in the main entrance of Tillman Hall. This plaque carries the names of all previous winners of the Norris Medal since it was first awarded in 1908.

American Ordnance Association Gold Scholarship Key. The American Ordnance Association, Washington, D. C., sponsors annually an award to the senior Army ROTC cadet with the most ability in the ordnance field to be commissioned to the Ordnance Corps.

Outstanding Cadet Non-Commissioned Officer Award. An annual award of the Department of Military Science presented to the Outstanding Army ROTC Cadet NCO based on exhibited improvement in all aspects of military performance.

Willie N. and Joe Wise Padget Scholarship. The income from a fund donated to the University by members of their family is used annually to aid a deserving student from Saluda County.

Phi Eta Sigma English Award. An annual award is given to a freshman scoring highest on a competitive examination in English.

Phi Eta Sigma Mathematics Award. An annual award is given to a freshman scoring highest on a competitive examination in mathematics.

Phi Eta Sigma Scholarship Medal. An annual award is given to the senior having the highest scholastic record.

Phi Kappa Phi Award. An annual award is given to the junior having the highest scholastic record.

Phi Psi Award. This award is made annually by the National Honor Council of the Phi Psi Textile Fraternity to an outstanding graduating senior in either the Textile Chemistry or Textile curriculum, considering scholastic record, leadership ability, and other qualities.

Physics Faculty Awards. An annual award of $50 is given to the outstanding sophomore majoring in Physics, and an annual award of $100 is given to the outstanding junior majoring in Physics.
Piedmont Engineers and Architects Award. An annual cash award to the sophomore majoring in Civil Engineering who has the highest scholastic record during his first three semesters of work.

Pomona Pipe Products Award. A cash award is made to the member of the junior class in Civil Engineering with the most outstanding academic record.

Quartermaster Association Awards. The Quartermaster Association annually awards a medal to the ten outstanding junior students and a scholastic key to the ten outstanding senior students enrolled in the Army General Military Science ROTC program in colleges and universities throughout the nation. Students must be enrolled in courses including as a major item of curriculum at least one educational area of particular interest to the Quartermaster Corps.

Reserve Officers Association Award. Awarded annually to an AFROTC sophomore, junior, and senior cadet, based on scholastic and Aerospace Studies grades, and leadership qualities.

Reserve Officers Association Medal. The South Carolina Department of the Reserve Officers Association sponsors an annual award to the outstanding Army ROTC Cadet in each of the four academic years.

The Harry Riemer Honor Award of the Textile Veterans Association. A medallion and a $25 U. S. Savings Bond is awarded to a member of the graduating class who has the potential to make an outstanding contribution to the textile industry in future years.

Scientific Products Award. A $25 award to the freshman student majoring in one of the biological sciences who achieves the highest scholastic record.

Sigma Pi Sigma Award. An annual award is given to the outstanding senior in the Physics Department.

Sigma Tau Epsilon Award. An annual award is given to the senior majoring in the College of Liberal Arts or the College of Physical and Mathematical Sciences and having the highest scholastic record.

R. W. Simpson Medal. A medal designated as the “R. W. Simpson Medal” is awarded annually to the best drilled Army ROTC cadet in each of the freshman, sophomore, or junior classes.

The Solite Award. The Southern Lightweight Aggregate Company annually makes a grant of $1,000 to the Clemson Architectural
Foundation, a portion of which is used for prizes for those fifth-year professional theses adjudged to be outstanding.

**Sons of the American Revolution Medal.** An annual award is given to a freshman AFROTC cadet who is outstanding in academic courses, Aerospace Studies, and leadership characteristics.

**The South Carolina Masonry Association Award.** The South Carolina Masonry Association annually makes a grant of $600 to the Clemson Architectural Foundation, a portion of which is used for awards in an intermediate-level architectural design problem.

**South Carolina Society of Sons of American Revolution Medal.** An annual award is given to an Army ROTC cadet who exhibits a high degree of merit with respect to leadership, soldierly bearing and excellence in theoretical courses of study.

**The Southern Brick and Tile Award.** The Southern Brick and Tile Association annually makes a grant of $100 for prizes awarded in an advanced-level architectural design problem.

**Algernon Sydney Sullivan Medallion.** A valuable and artistic memorial, established by the Southern Society of New York in honor of its first president, is awarded each year by the University to a member of the graduating class and to one other person who has some interest in, association with, or relation to the institution, official or otherwise, of a nature as to make this form of recognition appropriate. The recipients of this award shall be chosen in recognition of their influence for good, their excellence in maintaining high ideals of living, their spiritual qualities, and their generous and disinterested service to others.

**Superior Cadet Ribbon Awards.** The Department of the Army awards annually Superior Cadet Ribbons to those Army ROTC students in each academic year (class) adjudged the most outstanding in their class.

**Third Army Certificate of Meritorious Leadership Achievement.** An award is given annually by the Commanding General of Third Army to the outstanding cadet on the basis of leadership development throughout the ROTC career.

**Tau Beta Pi Scholastic Award.** An annual award is given to the sophomore in Engineering having the highest scholastic record.

**Trustees’ Medal.** The Board of Trustees has provided for a gold medal to be awarded annually to the best speaker in the student body.
Virginia Dare Award. An award of $25 is given annually by the Virginia Dare Extract Company, Incorporated, to the senior majoring in Dairy Science and having the highest grade in Dy Sc 402, Dairy Manufactures.

Wall Street Journal Student Achievement Awards. These annual awards are given to the most outstanding senior with a concentration in Agricultural Economics, College of Agriculture and Biological Sciences, and Economics, in the College of Industrial Management and Textile Science.

Harvey J. Wheeler Award. An annual award is given to the senior majoring in Economics and having the highest scholastic record.

Wyandotte Award. The Wyandotte Chemicals Corporation Trophy is awarded to the senior in Dairy Science having the highest grades in Dy Sc 409 and 410.

GUIDANCE SERVICES

Guidance has an important role at all levels of education and particularly so during times of transition and articulation. To assist students in this period of emotional and academic adjustment, an orientation and counseling program has been established.

At the beginning of his university career, each student is assigned to a faculty adviser selected from his academic school. The faculty advisers provide information on courses of study, approve class schedules, interpret academic regulations, and suggest adjustments in making satisfactory progress toward graduation.

The residence hall program is organized to cope with personal problems and questions regarding procedures and policies of college life. Residence hall counselors and supervisors are primarily concerned with maintaining an environment compatible to serious study and with the educational potential of group living.

COUNSELING SERVICES

Counseling Services are located in Tillman Hall. These services are available free of charge to all registered students and spouses of registered students. These services are oriented to early identification of and assistance with academic, vocational, personal, and psychological problems. Testing facilities of a vocational and psychological nature are available. Students are encouraged to take
advantage of the individual services of a Counseling Psychologist, a Counselor, and of the Psychometric Services.

The service is dedicated to helping students in self-understanding, self-improvement, and in the attaining of academic and vocational goals. The aims of the service are preventive rather than curative.

**PLACEMENT SERVICES**

The University is glad to assist all who ask for help in securing summer or permanent employment; it does not assure positions for those who complete any of the courses of study.

The Placement Office coordinates and plans campus interview visits requested by representatives seeking graduates for positions with business, industry, and public service. It maintains current files of reported job opportunities and of alumni who wish to learn of available openings.

A Placement Bulletin is prepared periodically for distribution on the campus and for mailing to alumni upon request. It announces scheduled campus interviews and lists specific openings which may be of interest to students and alumni.

**BUILDINGS AND GROUNDS**

Change, challenge, and continuity are embodied in the architecture and landscape of Clemson University. The campus skyline is constantly changing, reflecting the new demands of the institution as it moves into the decade of the 70's and beyond.

While the challenges of the future—solving problems like environmental pollution—are symbolized by such buildings as the impressive new $2.4-million Rhodes Engineering Research Center (dedicated primarily to environmental and biomedical research), Clemson’s long, rich tradition of education, scientific research and public service is brought to mind by historic structures like the Tillman Hall tower, focal point of the campus, whose cornerstone was laid in 1891.

The campus proper consists of 600 acres and represents an investment of approximately $70 million in academic buildings, student housing, service facilities and equipment. Basically, this is the site of Thomas Green Clemson’s plantation, willed to South Carolina in 1888 for the establishment of the University. Fort Hill, former home of both Mr. Clemson and his father-in-law, John C. Calhoun, has been preserved at the center of the campus as a national shrine.
Beyond the main campus, stretching into Oconee, Pickens, and Anderson counties, are another 24,000 acres of farm and agricultural and forestry research lands. Throughout the state are 6,800 more acres devoted to Agricultural Experiment Station research and 4-H Club activities.

The University's $60 million building program to meet projected needs of a 10,000 student body by 1975 is over 25 percent complete. More than $32 million in new construction was added to the campus during the decade of the sixties.

One of the central features of campus development, the Robert Muldrow Cooper Library, was completed in 1966. This beautiful structure houses some 430,000 volumes and is the permanent home of papers and souvenirs belonging to both the Honorable James F. Byrnes and State Senator Edgar A. Brown, as well as valuable collections of papers and letters of John C. Calhoun and other famous South Carolina statesmen.

Other new facilities completed under the current building program are three high-rise residence halls which currently hold 1,296 students, a 34-bed hospital and out-patient clinic, an east campus cafeteria, an arts and sciences classroom building and 10-story faculty office tower, and the multi-purpose J. C. Littlejohn Coliseum, which seats 10,500 people for basketball games and 12,000 for speaking engagements, concerts and other functions.

Teaching and laboratory facilities of the College of Agriculture and Biological Sciences are housed in the R. F. Poole Agricultural Center complex. Another grouping serves the College of Engineering, including Olin Hall for Ceramic Engineering and Earle Hall for Chemical Engineering. These two buildings and their excellent equipment represent gifts from the Olin Foundation totaling nearly two million dollars.

Sirrine Hall is the home of the College of Industrial Management and Textile Science, where government and industrial cotton fiber testing laboratories are located. The College of Architecture is located in the modern, well-equipped Lee Hall. Other groupings of classrooms and laboratories serve the College of Education, the College of Liberal Arts, the College of Physical and Mathematical Sciences, and the School of Nursing.

The current building program includes plans for construction of a $6 million University union and related facilities, a new building to house the recently established College of Forest and Recreation Resources, a biological sciences building, and a $2.1 million addition to the College of Architecture.
The University’s 16 residence halls for men and women accommodate nearly 5,200 students. One hundred and fifty individual units and apartments provide living accommodations for another 289 married students.

Ten of the residence halls, with 2,244 students, are fully carpeted; there are telephones in 1,405 student rooms.

The University-owned Clemson House Hotel, with its 184 rooms and apartments, together with 112 faculty and staff housing units provides excellent community hotel facilities and permanent housing.

RESERVE OFFICERS’ TRAINING CORPS (ROTC)

The Department of the Army and the Department of the Air Force both maintain ROTC units at Clemson University. The mission of the Reserve Officers’ Training Corps is to produce officers having qualities of leadership and attributes essential to their progress and continued development as commissioned officers in either the Army or the Air Force of the United States. A four-year program, consisting of the basic course for freshmen and sophomores and the advanced courses for juniors and seniors, is offered by both services.

To enroll in basic ROTC, students must be at least 14 years of age and citizens of the United States at the time of entrance. They must be of good moral character and must sign a loyalty certificate. They must not be physically disqualified to the extent that drill would further aggravate the physical defect. Air Force candidates will be administered a written Air Force Officer Qualification Test and a physical examination during their freshman or sophomore year to determine eligibility for the advanced AFROTC course, and interested Army candidates will be administered a written Army Officer Qualification Test and a physical examination during their sophomore year to determine eligibility for advanced Army ROTC.Foreign students may enroll in the ROTC program provided they sign a statement of intention to become American citizens or receive the approval of their government.

Students enrolled in the advanced course are paid $50 per month, including one summer vacation. Pay while attending summer camp is computed differently and is considerably higher. Members of the advanced course are required to attend one summer camp before commissioning.

Students who have six months or more active military service and students who have successfully completed two or more years
of ROTC training at the high school level may substitute such service and preparatory schooling for all or part of the Clemson basic ROTC course. Students in either of these categories should consult with the Head of the Military Science or Aerospace Studies Department concerning accreditation.

Students who complete the prescribed ROTC courses and receive a bachelor's degree may be awarded commissions in either Regular or Reserve components of the Army or Air Force. Students who complete the basic course may receive 4 semester credit hours of elective credit; those selected for Advanced ROTC may substitute Aerospace Studies or Military Science courses for an additional 6 semester hours' credit.

Uniforms are provided to ROTC students. The University requires a deposit of $25 from each basic student. This is refundable when the uniform is turned in, provided there is no damage to the uniform other than normal wear. Each advanced ROTC student is credited with a uniform allowance, paid by the Government to the University, which is used by the University to purchase officer-type uniforms for use during the junior and senior years. The uniform becomes the property of the student when he is commissioned.

AIR FORCE ROTC

The Air Force ROTC program provides for selected students an education vital to the career of a professional Air Force officer. Commissions in the United States Air Force are awarded to male and female students who qualify for enrollment and successfully complete the program.

The four-year program consists of the General Military Course (GMC) or basic course and the Professional Officer Course (POC). During the second year of the GMC, a cadet may apply for admission into the POC.

Cadets who enter in the POC under the four-year program attend a four-week training period at an Air Force base during one summer following either their sophomore or junior year. This provides exposure to an Air Force environment which is beneficial in preparing cadets for future management positions.

The two-year program consists of a six-week preparatory training period, at an Air Force base during the summer between the student's sophomore and junior years, and the POC. The six-week preparatory period eliminates the requirement for completion of the GMC and training at an Air Force base while enrolled in the
Information

Applicants for the two-year program must meet all eligibility requirements for POC enrollment.

To be eligible for enrollment in the POC a cadet must: (1) Make application. (2) Pass the Air Force Officer’s Qualification Test. (3) Pass the Air Force physical examination. (4) Meet citizenship, age, and loyalty requirements. (5) Possess leadership ability and good moral character. (6) Successfully complete two academic years of the GMC or have received credit for its equivalent. (7) Enlist in the Air Force Reserve (Obligated Reserve Section) AFROTC. (8) Have two academic years remaining (including graduate study) at Clemson University at the time of entrance. (9) Be enrolled as a full-time student. (10) Have attained the academic standards required by the University and the Air Force. (11) Be selected by a board of Air Force officers.

Male POC cadets who intend to become Air Force pilots participate in the Flight Instruction Program (FIP) during their senior year. They receive, at Government expense, pilot training conducted by a civilian contract flying school. Students who are not qualified or do not desire pilot training may be considered for entry into the POC as candidates for navigator training or officer duty in non-flying categories.

AFROTC students who have demonstrated outstanding leadership and academic qualities may be designated distinguished cadets at the beginning of their senior year. Clemson’s distinguished cadets are eligible to compete with distinguished cadets from other institutions for regular Air Force commissions which are awarded upon graduation from the University.

AFROTC provides scholarships to highly qualified AFROTC cadets each year. Each scholarship pays tuition, fees, and $75 per academic year for books, in addition to $50 per month to the recipient.

The Air Force offers outstanding opportunities for an AFROTC graduate to pursue studies leading to an advanced degree. The educational delay program allows an AFROTC graduate to have his call to active duty delayed until he receives his advanced degree.

The Air Force Institute of Technology (AFIT) offers graduate programs in scientific, technical, and other professional fields. These programs are conducted at the AFIT resident school, Wright Patterson AFB, Ohio, at selected civilian institutions, and through training-with-industries programs. AFROTC graduates are eligible to apply for AFIT schooling after they are called to active duty.
Air Force officers receive full pay and allowances while attending school under the AFIT program.

**ARMY ROTC**

The Army ROTC instruction stresses an academic college-level program in content, scope, and intensity. Emphasis is placed on the development of the student’s leadership, bearing, discipline, judgment and sportsmanship which will be a distinct asset in any profession that he may choose, military or civilian.

The General Military Science Program is conducted at Clemson (see Part V of this catalog for a description of courses). The program consists of a Basic Course for freshmen and sophomores and the Advanced Program for juniors and seniors. A student who has successfully completed the basic course, who meets the physical requirements, who has earned sufficient academic credits to be designated as an academic junior, and who is recommended by his instructors, may enter the Advanced Course offered during the junior and senior years. Successful completion of the Advanced Program qualifies the student for a regular or reserve commission in any of the arms or services of the United States Army.

**Scholarship Program.** Scholarships are available to selected ROTC students who are strongly motivated toward a career in the Army. Each scholarship pays for tuition, books and laboratory expenses, and, in addition, pays $50 a month for the duration of the award, except during the Advanced Course summer training camp at the end of the junior year when the pay is at the rate of $151.95 per month. Only students who participate in the four-year program are eligible. For further information concerning the scholarship program, contact the Office of the Professor of Military Science.

The requirements for formal enrollment in the Advanced ROTC Program are as follows:

**Junior Year.** Must have successfully completed all previous Military Science courses, have acquired a passing grade on a general intelligence test which is administered during the sophomore year, be physically qualified, and must have acquired the credits, a grade-point ratio of 2.0 and be designated an academic junior. The number of credits required for participation in the Advanced Course complements the academic requirements of the University and insures that the cadet receives his commission and his diploma simultaneously.
Senior Year. Must have successfully completed all previous Military Science courses and have attended summer camp, must be an academic senior, and have the cumulative grade-point ratio required for graduation.

Exceptions, where warranted, to the above general rules may be made by the Head of the Military Science Department.

During the four years of general military instruction, students will have the opportunity to indicate their preference for assignment to a particular branch. Final assignment authority remains with the Department of the Army and will be dependent upon such factors as the student's major academic course, class standing, qualities of leadership, the requirements and existing vacancies in the various branches of the Army, in addition to the student's choice.

Outstanding Army ROTC cadets who attain grades in the upper half of the class in academic subjects and the upper third in Military Science subjects during their junior year and who possess outstanding qualities of leadership, character and aptitude for military service may, with the approval of the University President, be designated as Distinguished Military Students by the Head of the Military Science Department. Those who maintain this outstanding record during their senior year may be designated Distinguished Military Graduates. A Distinguished Military Student may apply for appointment as a Second Lieutenant in the Regular Army.

Flight Training Program. An Army ROTC student in his fourth year of Military Science, or having completed his fourth year of Military Science, but not completed his academic requirements for graduation, may enroll in the Army ROTC Flight Training Program. If accepted, the student will receive 35 hours of ground school and 36½ hours of flight training at Government expense, after which the student may qualify for his FAA license and be recommended for further flight training upon entry on active duty. To be accepted in the Flight Training Program the candidate must agree that if commissioned at time of graduation, he will volunteer for Army Aviation Flight Training and assignment, and to serve on active duty as a commissioned officer for not less than three consecutive years from the date of completion of the Army Aviation Flight Training Course, in addition to meeting other physical and mental requirements.

ROTC students receiving commissions in the Regular Army or Army Reserve have the opportunity to apply for graduate school.
If accepted by the Army, applicant may be allowed to delay entry upon active duty to complete graduate study.

The student who receives his commission through Army ROTC is appointed in the Army Reserve as a Second Lieutenant and called to active duty for 2 years. Graduates of the program who enter active duty for 2 years will acquire a 6-year military obligation, only 3 of which would be in the Ready Reserve.

A recapitulation of Army service obligation is listed below:

**ROTC Requirement.** For those students who matriculate initially at Clemson after the spring semester 1970, ROTC will no longer be a requirement for graduation. In order to resolve the requirements and status of students matriculating prior to the end of the spring semester 1970, the following requirements apply:

To be eligible for graduation all male students not otherwise exempted whose initial matriculation in Clemson University was:

(1) On or before August 29, 1968, must complete four semesters of ROTC courses.
(2) After August 29, 1968, but prior to January 17, 1969, must complete three semesters of ROTC courses.
(3) After January 16, 1969, but prior to January 5, 1970, must complete two semesters of ROTC courses.
(4) After January 4, 1970, but prior to May 9, 1970, must complete one semester of an ROTC course.
(5) After May 9, 1970, ROTC courses are not a requirement for graduation.

**HISTORICAL STATEMENT**

It was the fall of the year and likely one of those blustery days as the horsedrawn carriage slowly rolled to a stop on a Pendleton road in 1886.

The driver, a tall, distinguished-looking man in his late seventies, peered from the carriage as if looking for someone he knew. Soon, another aged man approached the carriage, exchanged greetings with the first, and the two men—Thomas Green Clemson and Senator Benjamin Ryan Tillman—drove away together toward his-
Historic Fort Hill, a plantation some four miles away and the former homestead of John C. Calhoun, Clemson's late father-in-law.

Mr. Clemson had invited Senator Tillman to his home to discuss their mutual conviction that South Carolina needed a separate college devoted to industrial and scientific education. At Fort Hill, they met with Col. D. K. Norris and Col. R. W. Simpson. There the four "spent nearly the whole day in talking over the new project which Mr. Clemson had in mind and which he unfolded to us," Tillman later wrote.

Perhaps the most significant result of this conference was Mr. Clemson's decision to change a will he had made three years earlier and to execute a new will so as to serve better the great purpose which he had had in mind for many years.

Although his will of 1883 sought to provide for establishment of a scientific institution upon the Fort Hill place, Mr. Clemson later decided that his intention and purpose as stated in that will may be misunderstood.

In his new will, executed Nov. 6, 1886, Mr. Clemson wrote that he desired to make his purpose plain and to make some other changes in the disposition of his property. He clearly explained the nature and purpose of his proposed institution, the establishment of which "is now the one great desire of my life."

"It should afford thorough instruction in agriculture and the natural sciences connected therewith; it should combine, if practicable, physical and intellectual education, and should be a high seminary of learning in which the graduate of the common schools can commence, pursue and finish the course of studies terminating in thorough, theoretic and practical instruction . . . ."

The first item of the new will concerned disposition of the 814 acres of the Fort Hill place and was largely taken from the 1883 will.

The will gave to the state all that part of the Fort Hill Estate inherited by Mrs. Clemson (the former Anna Maria Calhoun who died in 1875, 13 years before her husband) from her mother and the bulk of Mr. Clemson's other real and personal property. The latter amounted to a sum, which, considering the purchasing power at the time, probably has been only a few times exceeded in a public benefaction in South Carolina.

Mr. Clemson's will also provided for a seven-member Board of Trustees that would govern and manage the new institution. Named were: Cols. Simpson and Norris, M. L. Donaldson, R. E. Bowen,
B. R. Tillman, J. E. Wannamaker, and J. E. Bradley, who with those chosen by the General Assembly, would constitute a governing board if the state accepted the bequest; but, who, in the event the state declined the bequest, would alone constitute a governing board for a private institution.

These seven trustees, along with other friends of the movement and the agricultural groups in the state, developed and organized a public opinion favorable to the plan.

In November, 1889, the South Carolina General Assembly accepted the terms of Mr. Clemson's will and following the decision of the U. S. Supreme Court to uphold the will, the State of South Carolina and the full Board of Trustees proceeded to convert the dream of Thomas G. Clemson into the reality of Clemson College.

The institution formally opened in July, 1893, with an enrollment of 446 students. The first graduating exercises were held in December, 1896, with a graduating class of 37—15 in the agricultural courses and 22 in engineering courses.

The college was also established under the Morrill Land-Grant Act passed by the National Congress in 1862. Clemson University, therefore, is a member of the national system of Land-Grant Colleges and Universities.

In 1964, in recognition of expanded offerings of the institution not only in the areas of agricultural and mechanical arts but also in the sciences and arts, the name of the institution was changed to Clemson University. This change by the legislature, effective July 1, 1964, followed a recommendation to that body by the Board of Trustees.

**LOCATION**

The University is located on the Fort Hill homestead of John C. Calhoun, in the foothills of the Blue Ridge Mountains. It has an elevation of 800 feet above sea level and commands an excellent view of the mountains to the north and west, some of which attain an altitude of over 5,000 feet.

The University is located at Clemson, S. C., on the main line of the Southern Railway, U. S. Highways numbers 76 and 123 pass through Clemson, and daily bus service at regular intervals is available.
ALUMNI RELATIONS

The office of alumni relations coordinates all functions and services of the alumni office. The director of alumni relations is secretary of the Clemson Alumni Association and the Clemson Foundation through election by the governing boards of these two organizations.

Accurate records of addresses and information concerning alumni are being compiled by this office which also publishes a magazine and newsletter for distribution to the alumni.

The purpose of the Alumni Association is to serve the University and its alumni in every possible way. The Association holds its regular annual meeting at the University each June. Active membership is made up of former Clemson students who participate in the Clemson Alumni Loyalty Fund for the purpose of providing supplementary financial aid to the educational programs of the University.

The Clemson University Foundation was founded by interested members of the Alumni Association to raise an endowment to be used for the benefit of the University, its students, faculty and alumni. Trustees of the Foundation are elected by the Association.

THE J. E. SIRRINE TEXTILE FOUNDATION

Funds in this foundation were contributed by the members of the textile industry in South Carolina and amount to about one million dollars. Income from this fund is administered by the trustees of the J. E. Sirrine Textile Foundation. They have used the income to benefit textile teaching and research at Clemson University. Under the present system it is used to (1) supplement university travel funds for faculty members, (2) sponsor the school library by paying the salary of the librarian and paying for periodicals and books, (3) provide supplement to the salaries for two major professors, (4) provide two undergraduate scholarships and four graduate fellowships annually, one of which may be held by a faculty member, (5) sponsor annual seminars for South Carolina high school counselors, (6) and support special research projects.
PART III

STUDENT LIFE

AND ACTIVITIES
PART III—Student Life and Activities

STUDENT BODY

The students of Clemson University believe that student government is necessary and beneficial and that every student should be represented in this government. All registered undergraduate and graduate students are upon payment of the Student Activities Fee members of the Student Body of Clemson University which in turn is represented by the student government.

Student government is actively sponsored and highly effective at Clemson. The three branches of government are patterned after our federal system; however, there are no political parties within the framework of this student organization. March and April are election months for student-body and class officers except for the freshman class which holds class-officer and Student Senate elections in September. Students interested in self-government are encouraged to participate in this active student organization.

STUDENT PUBLICATIONS

The Chronicle is a student variety magazine published four times a year.

The Taps is the yearbook published by the students of the University.

The Tiger is a weekly paper published by the students of the University.

THE STUDENT CENTER

The student center, located in Johnstone Hall, has a student lounge with space for reading and games and two television sets. On the third floor there are meeting rooms and the student chapel. Also in this area are the offices of student publications, such as The Tiger, student newspaper; the Taps, annual publication; and Radio Station WSBF. The visitors' lounge and the information center are on the first floor off the loggia. The bookstore, post office, and canteen are located on the levels below the loggia.

[ 104 ]
CULTURAL, MUSICAL, THEATRICAL ACTIVITIES

University Concert Series

Each year since 1940 Clemson University has sponsored a concert series. All Clemson students paying full-time student activities fees are admitted to these concerts without charge. Others, including faculty members, may purchase tickets at a moderate cost.

The Program of Concerts for 1971-72 is:

First Moog Quartet
Preservation Hall Jazz Band
Five by Six
Roger Wagner and the Westminster Chorale
National Orchestra of Belgium
“I Do, I Do!” with Jack and Sally Jenkins

Architectural Foundation Lectures and Exhibits

The College of Architecture at Clemson is able to present annually an outstanding series of lectures, which are open to all Clemson students, through financial grants from the Clemson Architectural Foundation. The Foundation also presents an annual schedule of at least 12 art exhibits in the Architectural College gallery, which is open to the public weekdays between 9 a.m. and 4:30 p.m.

University Bands

Tiger Band. The Tiger Band and Color Guard, composed of approximately 120 members, participate in football games, pep rallies, functions, and parades throughout the South. This band has appeared in major stadiums in many states, including the Gator, Orange, Sugar, and Bluebonnet Bowls and has performed on national television. The Tiger Band makes several out-of-town trips during the fall season. A smaller “pep band” from its ranks performs at all home basketball games.

Concert Band. The Clemson Concert Band is composed of the better musicians on campus. It is formed at the end of the football season, and gives concerts both on and off the campus, including a tour in the spring. This organization plays music of the great composers in addition to lighter fare.

Army and Air Force ROTC Bands. These bands participate in all major military functions, including ceremonial parades and reviews. (Admission is open to all qualified ROTC personnel.)
University Chorus. The University Chorus comprises some eighty students who perform a wide variety of choral music in concerts presented on campus and on an annual spring concert tour. An audition is required for new members, with prime consideration given to singing ability and balance of voices.

Clemson Players. This is the dramatic club of the University and is open to all students interested in dramatics. Four productions are presented annually.

UNIVERSITY UNION PROGRAMS

Many of the student social, cultural, physical, and spiritual programs on campus are sponsored by and coordinated by the offices of the University Union Director. Those student-centered activities falling under the area of Student Union programs are the University YMCA, the emerging Student Union Building, Religious Affairs, Foreign Student Affairs, and Community Services.

The University YMCA

The YMCA provides a well-balanced program of religious, social, recreational, and cultural activities for students. The YMCA is administered by an Advisory Board consisting of students, faculty and staff, and all student programs are planned and administered by a YMCA Cabinet of students. Some YMCA programs are hall forums, films, seminars, visiting speakers, dances, picnics, and other social activities. A major share of YMCA programming is devoted to activity groups such as karate classes, scuba diving, water safety classes, and other groups interested in physical and social growth.

Union Building Program

A very effective program of social, cultural, and recreational programs are in the planning stages for the emerging new University Union Building. These programs will be planned and administered by a Union Board consisting of students, faculty, and staff of the University.

Religious Affairs

Religious life on the campus is coordinated by the Union Director in cooperation with local campus ministers and clergymen. The YMCA Building provides a place for denominational groups not having a church at Clemson, as well as for many interdenominational groups. The Student Center in Johnstone Hall also contains
a Student Chapel which is available for use on a regularly scheduled basis.

Student religious organizations at Clemson offer students an opportunity to grow spiritually and socially. These organizations are:

- Baptist Student Union
- Christian Science Organization
- Church of Christ Student Organization
- Campus Crusade for Christ
- Episcopal Student Association
- Hillel-Brandeis (Jewish)
- Lutheran Student Association
- Newman Student Association (Catholic)
- The Navigators
- Wesley Foundation (Methodist)
- Westminster Fellowship (Presbyterian)

**Foreign Student Affairs**

More than 100 foreign students are enrolled at Clemson, and the University feels strongly that special emphasis should be placed on work with these students. Mr. Otis Nelson, Associate Director of the YMCA, is Director of Foreign Student Affairs and gives guidance to its program of education, social life, personal counseling, and legal affairs.

**Community Services**

Many students at Clemson are concerned not only about fellow students but also about persons in the Clemson community and surrounding area. This concern becomes involvement and action as students go out into the community to serve as volunteer coaches, tutors, friends, counselors, candy stripers, and those who serve as helpers in Day Care Centers, children's homes, and in other different ways. The purpose of the Community Services program is to coordinate these efforts and services to better serve the campus and community.

The general purpose of the overall Campus Union Program is to serve student needs and interests, and the Union will continually seek to provide these opportunities for students on the Clemson University campus.
CAMPUS LEADERSHIP AND SERVICE

Block "C" Club—The Block "C" Club includes varsity lettermen in baseball, basketball, football, track, cheerleading, swimming, and soccer.

Tiger Brotherhood—A local honorary service fraternity composed of men students from the upper three classes who have demonstrated ability, character and loyalty to Clemson University.

Circle "K" International—International Service Club for college men sponsored by Kiwanis International.

Central Dance Association—The C.D.A. staff is responsible for planning and coordinating major dance weekends at which time name entertainment is brought to the campus.

WSBF—WSBF is an educational radio station managed, maintained and operated by a student staff for the enjoyment of the Clemson student body and the surrounding academic community. The station broadcasts 24 hours a day on both open circuit FM and closed circuit AM from a modern studio in the University Student Center.

Order of Athena—A local honorary society for senior women who have maintained a high standard of scholarship, demonstrated leadership, and shown a spirit of service to the University.

Phi Sigma Omega—A local honorary society for freshman women who have maintained a high standard of scholarship.

NATIONAL HONOR SOCIETIES

Clemson University has chapters of the following members of the Association of College Honor Societies:

Delta Sigma Rho—Tau Kappa Alpha (Forensics)
Phi Eta Sigma (Scholarship—Freshman Men)
Phi Kappa Phi (Scholarship—Senior Men and Women)
Tau Beta Pi (Engineering—Men and Women)
Tau Sigma Delta (Architecture and Allied Arts—Men and Women)

Other Honor Societies:

Sigma Xi (Scientific Research—Men and Women)
Xi Sigma Pi (Forestry—Men and Women)
NATIONAL RECOGNITION SOCIETIES

The following national recognition societies have chapters established at Clemson:

- Alpha Phi Omega (Campus Service—Men)
- Alpha Zeta (Agriculture)
- Angel Flight (Air Force—Women)
- Arnold Air Society (Air Force—Men)
- Block and Bridle Club (Animal Science)
- Blue Key (Scholarship, Leadership, Service—Men)
- Gamma Sigma Sigma
- Iota Lambda Sigma (Industrial Education)
- Pershing Rifles—Company C-4 (Military)
- Pershing Rifles—4th Regimental Headquarters
- Scabbard and Blade—Company K-7 (Military)

DEPARTMENT AND PROFESSIONAL ORGANIZATIONS

- Agricultural and Biological Sciences Council
- Agronomy Club
- Alpha Tau Omega (Agricultural Education)
- American Agricultural Economics Association
- American Association of Textile Chemists and Colorists
- American Association of Textile Technology
- American Ceramic Society
- American Chemical Society
- American Dairy Science Association
- American Institute of Aeronautics and Astronautics
- American Institute of Architects
- American Institute of Chemical Engineers
- American Society of Agricultural Engineers
- American Society of Civil Engineers
- American Society of Mechanical Engineers
- American Society for Metals
- Associated General Contractors of America, Inc.
- Botany Club
- Calhoun Forensic Society
- Calhoun Literary Workshop
- Capers (Co-ed Pershing Rifles)
- Clio Society
- Counter Guerrilla Platoon
Dairy Science Club  
Delta Sigma Nu (Pre-med)  
Food Science Club  
Forestry Club  
French Club  
Gamma Alpha Mu (English)  
Graphic Arts Society  
Horticulture Club  
Institute of Electronic and Electrical Engineers  
Iota Mu Sigma (Industrial Management)  
Keramos (Ceramics)  
Light Brigade (Army—Women)  
McConnell Society (German)  
Microbiology Society  
Mu Beta Psi (Music)  
Newtonian Society (Mathematics)  
Omicron Delta Epsilon  
Outing Club  
Phi Delta Chi  
Phi Psi (Textile Arts)  
Photography Club  
Poultry Science Club  
Pre-law Society  
Pre-veterinary Club  
Recreation and Parks Administration Club  
Sigma Pi Sigma (Physics)  
Sigma Tau Epsilon (Arts and Sciences)  
Society for the Advancement of Agricultural Education  
Society for Advancement of Management  
Society for American Military Engineers  
Society of Physics Students  
Student Education Association  
Student Nurses Association  
Zoology Club  

GENERAL ORGANIZATIONS

Aero Club  
Amateur Radio Club  
Bowling Team  
Campus Crusade for Christ  
Carolina Sound Express
Dixie Skydivers Sport Parachute Club, Inc.  
Fellowship of Christian Athletes  
Fencing Club  
Fine Arts Film Club  
Four-H Club  
Gamma Beta Phi (Beta Club Members)  
Gamma Omega Phi (Political)  
The Oxfords  
Phi Sigma Omega (Freshman Women)  
Rifle Club  
Sailing Club  
Skin and Scuba Diving Club  
Sentimental Jazzmen (Music)  
Sigma Psi Nu (Swimming)  
Southern Student Organizing Committee  
Student League for Black Identity  
Students for Educational Aid  
Tae Kwon Do Club (Karate)  
University Political Caucus  
Weightlifting Club  
Young Democrats Club  
YMCA Cabinet  
Young Republicans Club

SOCIAL FRATERNITIES AND SORORITIES

In the spring and fall of 1970, the three local sororities and eleven of the local fraternities affiliated with national sororities and fraternities. The Board of Trustees, together with the President and Vice President for Student Affairs, had given formal approval to opening the Clemson campus to national fraternities and sororities in the spring of 1969.

Fraternities

Alpha Tau Omega (Delta Kappa Alpha)  
Beta Theta Pi (Sigma Kappa Epsilon)  
Chi Psi (Beta Sigma Chi)  
Gamma Rho  
Kappa Alpha (Phi Kappa Delta)  
Kappa Sigma (Kappa Sigma Nu)  
Phi Delta Theta (Delta Phi Kappa)  
Pi Kappa Alpha (Sigma Alpha Zeta)  
Sigma Alpha Epsilon (Numeral Society)
Student Life and Activities

Sigma Nu (Kappa Delta Chi)
Sigma Phi Epsilon (Alpha Gamma)
Theta Chi (Chi Lambda)

The Interfraternity Council serves as the coordinating and governing body of the social fraternities.

Sororities
Chi Omega (Sigma Beta Chi)
Delta Delta Delta (Delta Theta Chi)
Kappa Kappa Gamma (Omicron Zeta Tau)

The Panhellenic Council coordinates the activities of the social sororities.
The names of former local fraternities and sororities are in parentheses.

REGIONAL CLUBS
The regional clubs of Clemson University are composed of international clubs, out-of-state clubs and clubs representing the various counties in the state. The regional clubs are made up of students who wish to unite with other students from their own home areas. These clubs include:

International Student Association
Kappa Delta Kappa (Dillon County)
Colleton County Club
Pi Kappa Rho (Pickens County)
Union Country Club

ATHLETIC PROGRAM
The University encourages students' interests in sports through a program of intercollegiate athletics and intramural sports.

It is a member of the Atlantic Coast Conference and its athletic teams, The Tigers, regularly play teams of that conference and other colleges. Membership of the Atlantic Coast Conference includes—in addition to Clemson University—Duke University, North Carolina State University, University of Maryland, University of North Carolina, University of South Carolina, University of Virginia, and Wake Forest University.

The intercollegiate athletic program includes football, basketball, baseball, track, tennis, golf, swimming, cross-country, and soccer. Each year over 200 teams are formed in softball, football, volleyball
and basketball in the intramural program, with champions determined in each sport through a tournament.

Among the facilities for intramural and intercollegiate athletics at the University are tennis courts, baseball and track facilities, an indoor swimming pool, and a football stadium which will accommodate almost 50,000 people. The Littlejohn Coliseum, with a seating capacity of approximately 10,000 for basketball and up to 12,000 for other events, was completed in 1968. The Fike Fieldhouse is being renovated to accommodate intramural activities.

AUTOMOBILE PRIVILEGES AND PARKING REGULATIONS

All motor vehicles owned and operated on the campus by students, faculty, and staff members must be registered with the designated authorities. On registering, each student, faculty, or staff member will be offered a copy of the parking and traffic regulations and will be issued a decal which will indicate the areas in which the car may be parked.

Students are urged to familiarize themselves with all provisions of the Traffic Code contained in the Student Handbook of Clemson University.
PART IV

SCHOLASTIC REGULATIONS
Academic Standards. Proper discharge of all duties is required at Clemson University, and a student's first duty is his scholastic work. All students should be thoroughly acquainted with and cognizant of these basic requirements.

The Credit System. The semester hour is the basis of all credits. Generally, one recitation hour or 3 laboratory or shop hours a week for a semester constitute a semester hour. Thus, in Engl 101, English Composition, 3 cr. (3,0), as you will find this subject listed in the Degrees and Curriculums, the student takes 3 semester hours. When he completes this course satisfactorily, he is granted 3 semester credit hours on his record. The notation “3 cr. (3,0)” means that the course carries 3 credits, has 3 clock hours of theory or recitation per week, and no laboratory hours. Ch 101, General Chemistry, 4 cr. (3,3), carries 4 semester hours, has 3 hours of theory, and a 3-hour laboratory period.

Semester Grades. The standing of a student in his work at the end of a semester is based upon daily class work, tests or other work, and the final examinations. Faculty members may excuse from the final examinations all students having the grade of A on the work of the course prior to the final examination, but for all other students written examinations are required in all subjects at the end of each semester, except in certain laboratory or practical courses in which final examinations are not deemed necessary by the department faculty.

Scholastic reports are mailed to parents four times each year, including a preliminary statement of progress near the middle of each semester, and a final report at the end of each semester.

The Grading System. The grading system is as follows:

A—Excellent. Indicates that the student is doing work of a very high character. The highest grade given.

B—Good. Indicates work that is definitely above average, though not of the highest quality.

C—Fair. Indicates work of average or medium character.

D—Pass. Indicates work below average and unsatisfactory. The lowest passing grade.
F—Failed. Indicates that a student knows so little of the subject that it must be repeated in order that credit may be received.

I—Incomplete Work. Indicates that a relatively small part of the semester’s work remains undone. Grade I is not given a student who has made a grade F on his daily work. Students are allowed 30 days after the beginning of the next semester in which the student is enrolled to remove the incomplete grade unless (1) an extension of time is approved by the instructor concerned, or (2) within one year of residence after receiving such a grade, a student repeats the conditioned course satisfactorily at Clemson, in which case no credit hours taken shall be recorded for the grade of I. A student who elects to repeat an incomplete course is responsible for notifying the Office of Admissions and Registration of his election during the semester in which the course is taken. This regulation applies only to the first time that a course is repeated.

In order to make up incomplete work, the student must first obtain a permit card from the Office of Admissions and Registration. This card serves as the authority for the removal of the I and also as a form for reporting the final grade.

WP—Withdrew Passing. This grade indicates that the student withdrew from the course while doing satisfactory work. No credit hours taken are recorded for the grade of WP provided that the course is dropped prior to the last three weeks of classes in the semester. Only semester grades shall be given and recorded for courses dropped during the last three weeks.

WF—Withdrew Failing. Indicates that the student withdrew from the course while doing unsatisfactory work. The credit hours of a subject on which the grade of WF is received are counted as credits taken in computing the student’s grade-point ratio.

Dropping Class Work. A subject dropped after the first four weeks of class work is recorded as “Withdrew Passing” or “Withdrew Failing” depending upon the student’s grade in the course at the time the subject was dropped.

Upon the recommendation of the instructor and the dean concerned, a student’s standing will be investigated and he may be required to drop a subject because of neglect, or lack of application or preparation. No student will be dropped under this rule without approval of the President.

Removal of Failures. A student who has failed (made a grade F) in a subject cannot receive credit for that subject until it has
been satisfactorily repeated hour for hour in class, except that in the case of correlated laboratory work, the number of hours to be taken shall be determined by the instructor. Where separate grades for class and laboratory work are given, that part of the subject shall be repeated in which the failure occurs.

Rescheduling Courses Failed. A student who wishes to reschedule a course he has failed must do so within his next year of residence, or, if the course is not offered during this year of residence, he must reschedule the course the first time it is offered thereafter during his attendance at Clemson.

Rescheduling Courses Passed. A student may repeat a course he has passed with a grade lower than B provided he does so within three semesters of residence after the completion of his original enrollment in the course.

Scheduling Remedial Mathematics. Any student who has passed a course in freshman mathematics is ineligible to enroll in Remedial Mathematics.

Withdrawal from the University. A student may withdraw from the University any time before the last three weeks of classes in the semester without having grades recorded. A student enrolled the last three weeks of classes shall have final semester grades recorded.

A student withdrawing from college after preliminary reports are due must be passing a minimum of 12 semester credit hours at the time of withdrawal to qualify for re-enrollment the following semester.

After the first withdrawal from college the student is eligible to continue his enrollment the following semester, provided he meets other applicable regulations. For each succeeding withdrawal, however, the student shall be ineligible to continue his enrollment the following semester unless there are extenuating circumstances approved by the Committee on Admissions.

Grade Points. Four grade points are assigned for each credit hour on which the student receives the grade of A, 3 grade points for each credit hour of grade B, 2 grade points for each credit hour of grade C, and 1 grade point for each credit hour of grade D. No grade points are assigned for grades F, I, WP, or WF.

Grade-Point Ratio. In calculating a student's grade-point ratio, the total number of grade points accumulated by the student is divided by the total number of credit hours taken by the student at Clemson during the semester, session, or other period for which the ratio is calculated.
The grade-point ratio of students entering college for the first time will be determined as follows: Students entering during the summer sessions or fall semester will have only those courses passed for credit during the summer sessions and/or the following fall semester counted toward their grade-point ratio; students entering the spring semester will have only those courses passed for credit during the spring semester and/or the following summer sessions counted toward their grade-point ratio. This policy does not apply to transfer students.

Minimum Requirements for Continuing Enrollment. At the end of the academic year in May, all student records are inspected for quality. At that time in order to be able to continue his enrollment, a student who has taken a total of:

(a) 24 to 59 credit hours at Clemson must have a cumulative grade-point ratio of 1.30 or above.
(b) 60 to 89 credit hours at Clemson must have a cumulative grade-point ratio of 1.50 or above.
(c) 90 or more credit hours at Clemson must have a cumulative grade-point ratio of 1.70 or above.

A student completing a regular session has the privilege of continuing his enrollment through the immediately following summer session at Clemson or in Clemson parallel programs in an effort to meet the above requirements.

A student who has taken fewer than 90 credit hours at Clemson and who fails to meet the required grade-point ratio, as indicated in the table above, may apply for readmission after a minimum of one semester has elapsed. A student who has taken 90 or more credit hours and fails to meet the required grade-point ratio is permanently ineligible for readmission. Any exceptions to these minimum requirements for continuing enrollment and readmission must be approved by the Admissions Committee of the University.

Advanced Placement by Examination. In addition to earning credit by the usual method involving classroom attendance, students may receive credit toward their degree by completing a course successfully by examination only. Freshmen interested in exempting some of the elementary courses in this manner should participate in the College Board Advanced Placement Examination program, and have the results of these tests sent to Clemson.

Credit by Examination. Credit may be earned by means of a special examination without the necessity of class attendance subject to the following requirements:
(1) The applicant must present evidence which would indicate that he has received training or taken work which is approximately equivalent to that given in the course at Clemson for which an examination is requested and that an examination is warranted.

(2) The applicant must not have previously failed or audited the course at Clemson.

(3) The applicant must apply in writing for the examination and the request must be approved by the Instructor, Head of the Department in which the course is taught, Dean of the College or School in which the course is taught, and the Dean of Admissions and Registration.

(4) A grade of not less than C on the examination is necessary in order for the examinee to receive credit on the course. An examinee receiving credit under this provision receives credit for "hours taken," "hours earned," and grade points as well as the course grade.

(5) The time of the examination will be arranged by the student with the instructor concerned, but must be taken within one month after the date of final approval or it will be necessary for the student to initiate another request.

Work Taken at Another Institution. Clemson students may receive credit for work taken at another institution; however, approval of the work should be obtained by the student prior to scheduling the work. Information and forms relative to this approval may be obtained in the Office of Admissions and Registration. By obtaining advance approval the student is assured of receiving proper credit at Clemson provided he passes the work with a grade one letter grade higher than the lowest passing grade.

Classification. All new students are classified as freshmen unless they have attended another college prior to entrance. For those students who have completed college work elsewhere, classification will be based on semester hours accepted at Clemson rather than the amount of work presented.

To be classified as a sophomore, a student must have completed at least 30 semester hours.

To be classified as a junior, a student must have completed at least 60 semester hours.

To be classified as a senior, a student must have completed at least 95 semester hours.

Regular Advancement in Classification. All students are urged to meet the requirements for sophomore classification by the begin-
ning of the second year, for junior classification by the beginning of the third year, and for senior classification by the beginning of the fourth year. Failure to meet these requirements can jeopardize a student's academic standing with the University as well as jeopardize his deferment under the Selective Service even though he may be otherwise eligible for the deferment.

**Course Prerequisites.** Prerequisites for individual courses are enumerated under the course listings in the Description of Courses. In addition to these requirements, colleges, schools, and departments may also establish other standards as conditions for enrollment. In the College of Engineering a grade-point ratio of 1.80 or higher is required for registration in all Engineering courses numbered 300 or higher.

**Credit Load.** Except for an entering freshman, who is restricted to the curriculum requirements of his major course, the credit load for an undergraduate must be approved by his class adviser. The class adviser will approve a credit load deemed in the best interest of the student based on such factors as course requirements, grade-point ratio, participation in other activities, and expected date of graduation.

Since grades are an important factor in determining credit loads, the student should be guided by the following table in presenting his schedule to his class adviser for approval:

<table>
<thead>
<tr>
<th>Grade-Point Ratio (Semester or Cumulative, Whichever Is Higher)</th>
<th>Recommended Maximum Number of Semester Hours to Be Scheduled</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.00 to 0.99</td>
<td>14 to 16</td>
</tr>
<tr>
<td>1.00 to 1.99</td>
<td>16 to 18</td>
</tr>
<tr>
<td>2.00 to 2.99</td>
<td>18 to 20</td>
</tr>
<tr>
<td>3.00 to 4.00</td>
<td>20 to 22</td>
</tr>
</tbody>
</table>

When any full-time student reduces his credit load below 12 hours, but is still carrying 9 or more, he may be suspended for at least the remainder of the semester upon recommendation of the Vice President for Student Affairs and approval of the President. When a student reduces his credit load below 9 hours he shall be suspended for at least the remainder of the semester.

**Auditing Policies.** Qualified students may audit courses upon the written approval of the professor, head of the department and the dean of the college or school concerned, and registration with the Dean of Admissions and Registration. Auditors are under no obligation of regular attendance, preparation, recitation, or exami-
nation and receive no credit. Participation in classroom discussion and laboratory exercises by auditors is at the discretion of the instructor. A student who has previously audited a course is ineligible for credit by examination.

A full-time undergraduate student with approval may audit courses at no additional charge as long as the student's credit load, including the course audited, is approved by his class adviser.

A graduate student regularly enrolled for a minimum of six semester hours may with approval audit one additional course without charge.

Members of the University teaching staff and the professional staff in research and agricultural extension may with approval audit courses without charge. Other full-time University employees may audit without charge with the additional approval of the employee's immediate supervisor and the Comptroller.

Residence Requirement for Graduation. In order to qualify for an undergraduate degree, a student must spend at least the last year of residence at Clemson and complete at Clemson a minimum of 30 of the last 36 credits presented for the degree.

Honors Program. The Honors Program at Clemson University provides for the fuller development of our most able students. They meet in small classes with outstanding professors and explore the subject matter of a course in greater depth than other students are able to do. The identification and selection of Honor Students begins with their freshman year, and Honors courses are provided at all four levels of undergraduate instruction. To remain in the Honors Program a student must maintain a cumulative grade-point ratio of 3.00.

An Honors Council composed of faculty members from each College and School is responsible for planning and supervising the Honors Program. The Honors Program: A Student Handbook is available for those who are interested.

Honors and Awards Day. Each spring an Honors and Awards Day is held for students who qualify for the honor list and for special awards. A cumulative grade-point ratio of 3.00 to 3.49 is required for listing with honor, 3.50 to 3.79 for high honor, and 3.80 or above for inclusion with highest honor.

Honor Graduates. Students who graduate in the Honors Program will have this fact indicated on their diplomas. Other graduates who meet the required qualifications are designated as having grad-
uated with honor. A grade-point ratio of 3.00 to 3.49 is required for graduation with honor, 3.50 to 3.79 for high honor, and 3.80 or above for graduation with highest honor.

Examination on F Received in Last Semester. A candidate for a degree who in the semester immediately prior to graduation fails to graduate because of an F on one course taken in that semester may stand a special examination on the course provided:

(1) That the candidate can furnish evidence of having done satisfactory study for the examination.

(2) That the examination is not given until after the regular degree date.

(3) That the candidate has fulfilled, prior to the due date for candidates’ grades, all other requirements for his degree except those which can be fulfilled by passing the examination.

(4) That the candidate by removing the F by examination will finish all requirements for his degree which will be awarded on the next regular date for award of degrees.

Make-ups of I's Received in Last Semester. A candidate for a degree who in the semester immediately prior to graduation receives one or more grades of I shall have an opportunity of removing the unsatisfactory grades provided the final grades are received in the Office of Admissions and Registration by the time grades for candidates for graduation are due.

A candidate who qualifies for graduation under this regulation will be awarded his degree on the regular date for the award of degrees.

Special Graduation Requirements. A cumulative grade-point ratio of 2.00 is required for graduation. Candidates for degrees are required to apply for their diplomas within two weeks following the opening of the final semester or the opening of the summer session prior to the date the degrees are to be awarded. These applications should be filled out in the Office of Admissions and Registration on the regular blanks provided.

All work for a degree must be completed, all financial settlements made, and all government property and library books returned by 5 p.m. on the Tuesday preceding graduation.

A student in line for graduation at the end of this semester who fails to graduate because of an F on one course taken this semester may stand a special examination under certain conditions on the course after the regular degree date. A senior who qualifies for
graduation under this provision will be awarded his degree on the next regular date for the award of degrees. For further information see paragraph Examination on F Received in Last Semester.

A student in line for graduation at the end of a semester or summer term who meets all requirements for graduation except for a deficiency in his grade-point ratio resulting from a deficiency of not more than six grade points shall have the privilege of making up his deficiency by standing special reexaminations under certain conditions.

The examinations shall be taken after the regular degree date and in courses totaling not more than 6 semester credit hours which were passed during the last year of residence, and only one such examination may be taken on an individual course. When such examinations are taken under the above provision, the credit hours of the course or courses will not be counted as additional credit hours taken. Only the grade points over and above the grade points previously earned in the course may count toward raising the grade-point ratio.

A student who qualifies for graduation under this provision will be awarded his degree on the next regular date for the award of degrees.

If all work toward a degree is not completed within five years after entrance, the student may be required to take additional courses.
PART V

DEGREES AND CURRICULUMS
The degree of Bachelor of Science is awarded to those students who satisfactorily complete one of the four-year curriculums offered under the College of Agriculture and Biological Sciences, the College of Engineering, or the College of Forest and Recreation Resources. In the College of Education, the Bachelor of Science degree is awarded to those completing the requirements in Agricultural Education, Industrial Education, and Science Teaching. The Bachelor of Arts degree is granted to those completing the curriculum in Elementary Education or the Secondary Education curriculum with a teaching major in Economics, English, History, Modern Languages, Mathematics, Natural Sciences, Political Science, Psychology, or Sociology. In the College of Industrial Management and Textile Science, the Bachelor of Arts degree is awarded to those completing the curriculum in Economics; and the Bachelor of Science degree is awarded to those completing the requirements in Accounting, Administrative Management, Financial Management, Industrial Management, Textile Chemistry, or Textile Science. In the College of Liberal Arts, the Bachelor of Arts degree is awarded to those students who satisfactorily complete the curriculum with major concentrations in English, History, Modern Languages, Political Science, Psychology, or Sociology. In the School of Nursing, the Bachelor of Science degree is awarded to those students completing requirements in the four-year Nursing curriculum. In the College of Physical and Mathematical Sciences, the Bachelor of Science degree is awarded to those students completing the requirements in Chemistry, Geology, Mathematics, Medical Technology, Physics, or Pre-medicine, and the Bachelor of Arts degree is awarded to those completing the Arts and Sciences curriculum.

The College of Architecture offers a six-year professional program embracing two degrees and leading to the professional degree, Master of Architecture. After the first degree, students may opt to seek the Master of City and Regional Planning degree offered by the College. The degree of Bachelor of Arts in Pre-architecture requiring 137 credit hours is awarded at the end of four years and the first professional degree, Master of Architecture, includes 68 additional semester hours for a total of 205.
The Bachelor of Science degree in Building Construction is a four-year program requiring 141 credit hours.

ASSOCIATE DEGREE

The School of Nursing offers, in addition to the baccalaureate program in nursing, an Associate in Arts degree program in nursing. This program normally requires four semesters and one summer term, a minimum of 71 semester credit hours.

GRADUATE DEGREES

The degrees of Doctor of Philosophy, Master of Arts, Master of Science, Master of Agricultural Education, Master of Agriculture, Master of Architecture, Master of City and Regional Planning, Master of Education, Master of Engineering, Master of Forestry, and Master of Industrial Education are awarded to those students who satisfactorily complete prescribed graduate programs. Also, the Master of Business Administration degree is available through a joint program with Furman University.

For further information concerning advanced degrees see *The Graduate Bulletin*, which may be obtained from the Office of the Dean of Graduate Studies and University Research.

UNDERGRADUATE CURRICULUMS

Forty-seven undergraduate curriculums are offered under the Colleges of Agriculture and Biological Sciences, Architecture, Education, Engineering, Forest and Recreation Resources, Industrial Management and Textile Science, Liberal Arts, and Physical and Mathematical Sciences, and the School of Nursing. The curriculums under each college and school are listed below:

**College of Agriculture and Biological Sciences**
- Agricultural Economics
- Agricultural Education
- Agricultural Engineering
- Animal Industries
- Biology
- Food Science
- Plant Sciences
- Pre-veterinary

**College of Architecture**
- Building Construction
- Pre-architecture

**College of Education**
- Agricultural Education
- Early Childhood Education
- Elementary Education
- Industrial Education
- Science Teaching
- Secondary Education

In the curriculums which follow are given the official title and number of the course, the descriptive title, the number of semester hours credit, and in parentheses the number of hours per week in class and laboratory, respectively.

College of Agriculture and Biological Sciences

The undergraduate curriculums offered by this College are presented under two classifications—Agriculture and Biological Sciences.

Agriculture

Modern agriculture is the science, business, and art of producing, processing, and distributing plant and animal products, including those aspects of economics and human relations connected with these activities. Agriculture is a unique area in education because it applies the basic sciences to biological material for economic implications.

*Jointly administered by the College of Agriculture and Biological Sciences and the College of Engineering.
Today’s agriculture includes much more than farm production. About 6 million people provide supplies and services for farmers and 10 million process and distribute farm products. These two segments together with farm production, which employs 5 million workers, provide jobs somewhere in agriculture for 21 million Americans—approximately one-third of all jobs.

Thousands of agricultural graduates are needed each year in this basic industry. Our land-grant colleges and universities are now graduating considerably less than the total number needed to fill the jobs available each year—jobs important to every person, jobs with futures, jobs with challenge, jobs with personal and financial rewards.

The total program in Agriculture at this institution includes Resident Instruction, Research (Agricultural Experiment Station), and Extension (Agricultural Extension Service). Organized under Resident Instruction are curriculums in Agricultural Economics, Agricultural Education,* Agricultural Engineering,† Animal Industries (majors in Animal Science, Dairy Science, and Poultry Science), Biology (major in Entomology), Food Science, Plant Sciences (majors in Agronomy—Crops and Soils, Horticulture—Fruit and Vegetable, and Horticulture—Ornamental), and Pre-veterinary Medicine.

The curriculums in Agriculture are continuously revised to meet the changing needs of this dynamic industry. In this connection, students in many of the curriculums now have the opportunity to specialize by choosing a minor in Science, Business, Production, International Agriculture, or a Second Department.

Science Minor—This minor emphasizes the basic sciences that prepare students to contribute to the advancement of knowledge in their respective fields. It is designed for students whose anticipated work requires considerable scientific training, usually including graduate studies. Employment opportunities include research with State Agricultural Experiment Stations, the United States Department of Agriculture, and industrial and commercial organizations; and teaching in colleges of agriculture, and other educational work with Federal, State and industrial organizations.

Business Minor—This minor emphasizes principles and practices of business management as applied to businesses and industries

* Jointly administered by the College of Education and the College of Agriculture and Biological Sciences.
† Jointly administered by the College of Agriculture and Biological Sciences and the College of Engineering.
associated with agriculture. It is designed for students who plan to work with one of the many businesses and industries that provide supplies and services for the farmer, and process and distribute farm products. Employment opportunities include work related to meat and poultry processing, sales and service of farm machinery, manufacturing and sales of fertilizers and pesticides, dairy and food processing, grain and seed processing, feed manufacturing, banking and credit, insurance, farm management, land appraising, and the marketing of agricultural commodities.

*Production Minor*—This minor emphasizes the application of scientific principles to agricultural production. It is designed for students whose anticipated work requires broad general training in scientific and practical agriculture. Employment opportunities include general and specialized farming; agricultural extension services; teaching vocational agriculture; conservation of natural resources; agricultural communication; and agricultural services of the United States Department of Agriculture, State Departments of Agriculture and private enterprises.

*International Agriculture Minor*—This minor emphasizes the international aspects of agriculture and applies basic scientific principles and agricultural practices to worldwide agriculture. It is designed for students who contemplate work in international agricultural positions either in the United States or abroad. Employment opportunities include positions with the Foreign Agricultural Service of the United States Department of Agriculture, with foundations such as the Ford Foundation, with the Agency for International Development, with industries such as United Fruit Company, and with other domestic and foreign interests.

*Second Department Minor*—This minor emphasizes special training in an area of study other than the major. A *Second Department* minor may be selected either within or outside of the College of Agriculture and Biological Sciences. It is designed for students who wish additional specialized training outside their major area of study. Additional information relative to employment opportunities open to students with a minor in a *Second Department* is given elsewhere in this catalog under the various curriculum listings.

To illustrate further the types of work in which graduates engage, a few of the many occupations of agricultural graduates are listed under each curriculum.
FRESHMAN YEAR CURRICULUMS

AGRICULTURAL ECONOMICS AND RURAL SOCIOLOGY

The curriculum in Agricultural Economics places emphasis on a strong background in economic theory with applications to agricultural and agriculturally related businesses. Also included are courses in basic agricultural and biological sciences, liberal arts, and business. Students with a major in agricultural economics now have the opportunity to further specialize by selecting a minor in Science, Business, International Agriculture, or a Second Department.

Employment opportunities open to graduates with degrees in Agricultural Economics are many. They include research and teaching in institutions of higher learning; sales and promotional work for a variety of businesses; management positions in the farm loan departments of private banks or with cooperative farm credit agencies; public relations activities for various firms; market managers and directors; county agents; representatives of government agencies serving agriculture; and operators of numerous enterprises.

AGRICULTURAL EDUCATION‡

The Agricultural Education curriculum is designed for students who wish to prepare for positions in vocational agriculture, agricultural occupations and other teaching positions in the secondary schools; engage in other forms of educational work such as agricultural missionary, public relations and agricultural extension; farming, soil conservation and other governmental work; business and industry.

The curriculum provides for a broad education in general and professional education including student teaching. In addition to required courses giving a thorough background in the agricultural and biological sciences, a student may minor in Business, International Agriculture, or in a Second Department. Students in other departments may minor in Agricultural Education and be certified to teach.

‡ Jointly administered by the College of Education and the College of Agriculture and Biological Sciences.

#### AGRICULTURAL ENGINEERING*

The graduate in Agricultural Engineering, with broad training in mathematics, physics, chemistry, and the biological sciences as well as comprehensive coverage of the engineering sciences, is well equipped to apply engineering to many functions affecting the well-being of mankind. The Agricultural Engineer is sought by industry and public service organizations primarily for his ability to apply engineering know-how to agricultural production and processing, and to the conservation of land and water resources. Specific areas of interest include power and machinery, soil and water resources engineering, electric power and processing, structures and environment, and food engineering.

The undergraduate Agricultural Engineering curriculum leads to the Bachelor of Science degree. Based upon fundamental training.

---

* The Agricultural Engineering curriculum is jointly administered by the College of Agriculture and Biological Sciences and the College of Engineering.
in the basic sciences, the curriculum includes such engineering sciences as mechanics, fluids, thermodynamics, electrical theory, computing devices and systems analyses. The basic agricultural sciences of soils, plants and animals are included so as to provide a foundation for Agricultural Engineering analysis and design. Recognition is also given to the necessity for being able to synthesize information from any of the applicable subject matter areas, including studies of energy conversion, engineering analysis and the engineering properties of biological materials, and with emphasis upon economy and integrity of design. Research is included in order to introduce the student to the scientific method. Courses in the humanities are required to provide the graduate engineer with a well-rounded educational experience.

The undergraduate curriculum is designed for both the student who wishes to terminate his formal academic training at the bachelor's level, and also to provide the necessary prerequisites for those who wish to continue in graduate study. Graduate programs in Agricultural Engineering which lead to both the Master of Science and the Doctor of Philosophy degrees are offered.

Since an Agricultural Engineering graduate has a broad training in engineering, in the sciences, in humanities, and in life sciences, he has the pick of opportunities in many areas. Opportunities in Agricultural Engineering include employment with industry as design engineers, research engineers, production engineers, and in sales and service; with state and federal agencies as teachers, research engineers, and extension engineers; as field engineers with the Soil Conservation Service, Bureau of Reclamation, and similar organizations; and with agricultural enterprises as managers, contractors, equipment retailers and as consulting engineers.

The Agricultural Engineering curriculum is accredited by the Engineers' Council for Professional Development.

## ANIMAL INDUSTRIES

## ANIMAL SCIENCE

The Animal Science Department emphasizes subject matter dealing with the application of scientific principles to livestock production and processing.

Students will minor in Science, Business, Production, International Agriculture, or a Second Department.
Occupations for Animal Science graduates include livestock farming; cattle, swine and sheep breeding; extension livestock specialists; feed specialists; county agents; teaching and research in animal industry; positions with meat packing companies; feed dealers; freezer locker operators; livestock dealers; and livestock commission brokers.

§ To be selected from the following: Phil 201, Pol Sc 301, Psych 201, RS 301, Soc 201.

DAIRY SCIENCE

The major in Dairy Science is designed to provide the student with an understanding of scientific principles and the application of these principles in the scientific, technical and business phases of the dairy industry. Completion of required studies in the sciences and humanities and selected courses by the student in areas of personal interest prepares the graduate for a successful chosen profession. A career in the dairy industry is a rewarding one, not only monetarily, but in rendering a service in providing a wholesome, nutritious food for mankind.
Opportunities for dairy science graduates are many. They include the management of production and processing facilities, quality control work for processing units and production organizations, industrial promotion and public relations work in both production and processing fields, dairy and food products engineering, special services, public health service, teaching and research. Special service opportunities are available in state and national breed association work, breeding organizations, industrial supplies, production and processing equipment and supplies. Opportunities in educational activities include positions with industrial associations, state and federal services and federal programs with foreign assignments.

Students majoring in Dairy Science may choose a minor in Science, Business, Production, International Agriculture, or a Second Department.

† To be selected from the following: Pol Sc 301, Psych 201, Soc 201, Phil 201, RS 301.
‡ See class adviser for available minors and course requirements.
POULTRY SCIENCE

The Poultry Science major is expected to gain knowledge in the basic disciplines within which the poultry industry operates and specialized knowledge on the biology of the avian species. Technical poultry courses emphasize the nutrition, physiology, genetics and pathology of domesticated birds and the environmental requirements for incubation of eggs, production of meat and eggs and handling of products.

Minors in Science, Business, Production, International Agriculture, or a Second Department provide for the specialized interest of the student within the broad area encompassed by Poultry Science.

Job opportunities for Poultry Science majors who minor in Science include teaching, extension and research positions in colleges, government laboratories or in industry. This usually involves graduate work. Business minors are especially equipped to move into management positions in the small to large corporations in feed manufacturing, production, processing, and marketing of poultry products. Production minors are trained for operation of poultry farms, general farms, or as extension agents working with farmers. International Agriculture minors are expected to export the technical information and techniques so successful in the American poultry industry to a protein-short world. Many American poultry firms are operating on a worldwide basis and our own government and foreign nations are interested in assistance in transferring poultry knowledge to underdeveloped areas.

Students who hope to work in broad agricultural areas that include poultry and other agricultural segments may find a minor in a Second Department helpful. This includes such opportunities as agricultural chemicals, pharmaceuticals, biologicals, feed manufacturers, breeding organizations, marketing organizations, publishers, advertisers, and poultry farmers involved in another enterprise.

BIOLOGY (Entomology Major)
The Entomology major in the Biology curriculum is described below. See pages 145-149 for other majors in the Biology curriculum.

ENTOMOLOGY

Entomology is that branch of science that deals with the study of insects. In many ways insects are the most important group of animals that affect man. At the present time insects are costing the American public approximately four billion dollars annually. There will always be a need for qualified entomologists and the financial rewards to members of this profession are comparable to those enjoyed by most other scientists.

Depending on training, ability, and interest, entomologists find employment in such areas as the following: (1) research entomolo-
gist with several federal agencies, the state experiment stations, or private research foundations; (2) teaching entomology and/or zoology at the college or university level; (3) industrial research and the development of more efficient insecticides; (4) quarantine and regulatory work at both state and federal levels; (5) sales and management for agricultural chemical or the pest control industries; (6) the federal and state extension services; (7) many other specialized areas where a knowledge of insects is essential, such as beekeeping or disease transmission.

† Agron 202 must be included.

FOOD SCIENCE

The Food Science curriculum is designed to prepare students for the many career opportunities in technical and management areas of the food industry. The food industry, being the nation's largest industry, is becoming increasingly technical and requires large numbers of professional food scientists. World food supplies, particularly those rich in protein, are becoming increasingly critical in many parts of the globe. This situation is expected to accelerate the demand for food scientists.

Opportunities for graduates in Food Science include research positions in government organizations and state experiment stations, supervisory, administrative, research, and quality control positions in food processing industries, inspection and grading work with state and federal agencies, consulting, and teaching and extension
activities with universities and colleges. Students graduating in Food Science are well prepared to pursue postgraduate training in areas such as microbiology, biochemistry, nutrition, as well as in Food Science.

The student majoring in Food Science will select a minor in Science, Business, International Agriculture, or a Second Department which will emphasize training in an area other than Food Science and which is designed to supplement the major course of study.

**PLANT SCIENCES**

The Plant Sciences curriculum includes three majors—Agronomy—Crops and Soils, Horticulture (Fruit and Vegetable), and Horticulture (Ornamental).
Agronomy—Crops and Soils

Students relate the agronomy role to proper land use and food for a mushrooming world population. Agronomy is that branch of science dealing with the theory and practice of field crop production and land management. The word “agronomy” is from the Greek noun agros—field—and the verb nemein—to manage. Trained agronomists may choose an occupation that ranges from the applied (farming) to the abstract (basic research). Agronomists may farm or be employed by the Agricultural Extension Service, the Soil Conservation Service, the U. S. Department of Interior, the Agricultural Research Service and the Food and Drug Administration. In addition, agronomists may find employment in college, university, and high school teaching, in foreign service work, such as the Agency for International Development and in the many allied industries in agriculture.

Students majoring in Agronomy—Crops and Soils will declare a minor in Science, Business, Production, International Agriculture, or a Second Department.

Approved for all students except science minors. Science minors select 13 credits from three courses.

‡ Credit requirements depend upon minor.

Horticulture (Fruit and Vegetable)

This major provides the student with a basic education in science and the humanities, and the application of both in the scientific, technical, and business phases of the fruit and vegetable industry.

Opportunities in this field of study include vegetable and fruit farm management; inspection of fresh fruit, vegetable and other food products as well as nursery stock. There are many other opportunities as in plant breeding, agricultural extension service work, horticultural research, horticultural teaching and writing, and fruit and vegetable processing. Other occupations include sales and field work with seedsmen and nurserymen, and manufacturers of food, fertilizer, and pesticide products.

Students majoring in the fruit and vegetable phase of Horticulture may choose a minor in Science, Business, Production, International Agriculture, or a Second Department.

HORTICULTURE (Ornamental)

This major is designed to give students a scientific background and technical facilities in the field of Ornamental Horticulture. Subject matter covers plant materials culture, uses, and planning of ground spaces.

Graduates find careers in nursery work, floriculture, landscape designing, landscape contracting, turf management, and park supervision. Other occupations are as research personnel, teachers, extension workers, and as representatives of fertilizer, machinery, and chemical companies.

Students desiring to major in Ornamental Horticulture may choose a minor in Science, Business, Production, International Agriculture, or a Second Department.

PLANT SCIENCES CURRICULUM

HORTICULTURE (Ornamental) MAJOR

(See page 131 for Freshman Year)
**PRE-VETERINARY MEDICINE**

The curriculum in Pre-veterinary Medicine is designed to meet the general requirements for admission to certain schools of veterinary medicine. Since the requirements for entrance to these schools are not uniform, the student in planning his program should consider the specific requirements of the school he expects to attend. Under the Southern Regional Educational Plan, ten qualified students from South Carolina may enter the School of Veterinary Medicine at the University of Georgia each year. The courses listed below are minimum requirements for all students applying under the Regional Education Board Contract. Only the exceptional student can expect to complete the minimum requirements in four semesters. Students in the entering classes in Schools of Veterinary Medicine now average in excess of three years of Pre-veterinary training.

**DIVISION OF BIOLOGY**

The biological sciences are concerned with understanding the phenomenon of life, its origin and development, its morphology and classification, its mechanisms and regulations and its procreation and demise. Biology, without question, is relevant to the student in the 1970's, for it assists him in understanding not only himself but all forms of life that are around him.
Academic sections within the Division of Biology offer courses stressing the fundamental structure and unity of life as well as the interrelationships between all components of nature.

Thus, with the fundamentals well established, the developing biologist may choose to complete his undergraduate training in the majors of Botany, Entomology,† † Microbiology, and Zoology. The curriculum in any one of the four areas will introduce to the student the classical biology or morphology and classification as well as modern biology which seeks to understand the physiochemical bases of the phenomenon of life. Overspecialization will be avoided and instead the choice of subjects will attempt to provide the basic knowledge needed by each student in his chosen career.

Upon the completion of his undergraduate program, the student may choose to become employed in his area of interest or continue his education. If the latter is chosen he should be equipped to enter a professional school, such as a medical college, continue in a graduate biology curriculum; or a graduate program in one of the associated areas, such as bioengineering, biochemistry, biophysics, biomathematics, or one of the areas of agriculture, such as plant or animal breeding, plant pathology, entomology and plant or animal physiology.

† † See page 140 for Entomology Major.

¶ To be selected from the following: Ag Ec 202, Econ 202, Geog 301, 302, Hist 102, Hist 171, 172, 173, Phil 201, 302, Pol Sc 101, 201, 301, 302, Psych 201, Rel 301, 302, RS 301, Soc 201.
§ Students enrolled in the Entomology major must select Ent 301 and students enrolled in the Microbiology major must select Micro 305.
Botany is that portion of Biology dealing with plants, their structure, classification, growth, and development. The Botany major is designed to prepare students for employment as biologists in sales, service, or research in industry or government service. It also provides the background in the fundamental physical and biological sciences necessary for graduate study in the basic and many of the applied plant sciences. Adequate electives are provided so that a student may take additional courses in the area or areas of his special interest.

### MICROBIOLOGY

Microbiology is that discipline of biology concerned with the study of microscopic and sub-microscopic forms of life, which include the bacteria, viruses, yeasts, fungi, protozoa and unicellular algae. The microbiologist seeks to describe these minute life forms in terms of their structures, functions, and processes of reproduction, growth and death at both the cellular and molecular levels. He is also concerned with their interactions and interrelationships with both their animate and inanimate environments, and also with their economic importance to man. To accomplish these goals the microbiologist must be trained in the areas of mathematics, physics, chemistry, and biochemistry in addition to those of microbiology.
The microbiology major offers courses to cover all the areas mentioned above, so that a student graduating from this program is prepared either for entrance to graduate school in the fields of microbiology, biochemistry or bioengineering, or to pursue a career in one of the many industries or public service departments dependent upon microbiology, e.g., the fermentation and drug industries, agriculture, various food industries, medical and public health microbiology.

**ZOOLOGY**

Zoology is that aspect of biology which attempts to describe, classify and explore all facets of animal life. The examination of this life would extend from the broad view of the ecologists to the ultra-structural view of the electron microscopists. Of equal importance will be the discussion of historical concepts which have shaped the study of zoology in the past and those of recent origin which characterize modern biology.

The major in Zoology therefore will provide thorough coverage of the fundamentals of zoology, drawing when necessary on the chemical, physical and mathematical as well as philosophical disciplines. The zoology program combines laboratory as well as field exercises in the treatment of vertebrate and invertebrate animals with elective hours available for developing further specific interest areas. On the completion of this major the student should be prepared to continue in graduate studies in several zoological disci-
Biology 149

plines, enter a medical or dental college, enter the business community in sales or service or serve with a federal or state agency.

COLLEGE OF ARCHITECTURE

The Clemson University College of Architecture provides coordinated pre-professional and professional degree programs at undergraduate and graduate levels in preparation for careers in: Architecture, City and Regional Planning and Building Construction. These curriculums are not offered elsewhere in the state. The pre-professional offerings of the College also provide an excellent basis for subsequent graduate studies in Landscape Architecture, Art and Architectural History, Painting and Sculpture.

In addition to the courses and curriculums structured for the professional students of the College, cultural offerings in both lecture and studio courses are available to the general student population and required in certain other schools and colleges.

A rich annual series of exhibitions in the Rudolph Lee Gallery of the College and lectures by figures of international importance in the environmental arts and sciences are presented by the Clemson Architectural Foundation and open to the public. An unusual bond has existed between the architects of the state and region and the College since the first offering of architectural courses to a few students in 1914. The South Carolina Chapter of the American Institute of Architects in 1955 asked that a strong school be established and pledged its continuing unified support of school programs as
the prime project of the organization. Sweeping administrative and curricular changes brought a five-year curriculum and full accreditation that year. Following three years of rapid development the College was made an autonomous professional school by action of the Board of Trustees in 1958.

During the decade just ending, the College has sought to select its students with increasing care and to broaden and strengthen its offerings and its faculty. As might be expected, the curriculums and objectives are under continuing study.

To better prepare professional students a two-degree six-year program is required for those majoring in architecture beginning with the entering class of the academic year 1967-68.

The College enjoys contracts for creative research in several areas, and receives an annual support budget from the Clemson Architectural Foundation to enrich its program. It is a member of the Association of Collegiate Schools of Architecture, the Associated Schools of Construction, collaborates with the South Carolina Chapter of the American Institute of Planners, and is accredited by the National Architectural Accrediting Board.

The Architectural Foundation is a nonprofit corporation established in January 1956 under the Laws of the State of South Carolina and under the sponsorship of the South Carolina Chapter of the American Institute of Architects. It was established to facilitate the continuous improvement of architectural education and of the art and technology of building in South Carolina by providing financial and other assistance to the College of Architecture at Clemson University. By this means students in the College of Architecture at Clemson have been able to enjoy instruction, facilities, and conditions equal to those normally found at the nation's best universities.

The advantages to the student evolving from the Clemson Architectural Foundation are many. Among them are the programs of celebrated guest critics and lecturers, excellent exhibits of many types—paintings, sculpture, architecture, construction, furniture, ceramics, textiles and other allied arts and crafts—traveling expenses for student field trips and professional activities, and student loans and grants. Visual-aid facilities and gifts to the library are examples of permanent assets provided through Foundation support.

Intangible but important is the sense of unity and of high purpose resulting from the activities of the Clemson Architectural Foun-
dation which now permeates the entire architectural scene in South Carolina: the architects, their friends in the building industry and the faculty of the College.

The College of Architecture is housed in a modern building constructed for its program in 1958. Space nevertheless is limited and enrollment restricted to students with capacity and motivation. A major addition to the building is projected for early construction. At present the requisite functions are provided on two levels arranged around a central landscaped court. Design studios and the library occupy the entire second level. The first level accommodates the auditorium, classrooms, two art studios, the Exhibition Gallery, and administrative and faculty offices. A ground floor houses shops, photo laboratory, and sculpture studio, jury room and gallery preparations and storage. All areas are air-conditioned.

ENTRANCE REQUIREMENTS

In the interest of both students and the conservation of University resources and to maintain a program on the highest level, admission to the College of Architecture must necessarily be on a selective basis. Annual enrollment quotas are established consistent with space available. Selection considerations include secondary school record and performances in the College Board examination (SAT Test). A personal interview with the Dean should be arranged by the applicant as early as possible in the year before admission.

Applicants for Architecture are required to take the Architectural Aptitude Examination as administered by the Educational Testing Service of Princeton, and although these are not used as criterion for admission, the results are helpful to both the applicant and the admission committee.

Applications for the Aptitude Examination may be obtained from the Educational Testing Service, Princeton, New Jersey 20933. This test is administered at Clemson and other regional testing centers in October, January, and March.

Students wishing admission are advised to make application to the University early in the fall or winter of their senior year in high school and to make arrangements for a personal interview with the Dean of the College as soon as possible. The admissions council of the College will further interview some entering students during freshman matriculation week of each academic year.
THE PROGRAMS OF STUDY

ARCHITECTURE

The architect as a practicing professional has the creative responsibility of designing the buildings which shape our physical environment. To understand the humanistic, economic and technological nature of environmental problems, he must have a sound general education. This professional education must prepare him for a life of continuing change, in which problems to be solved will be large and small, for every sort of function, in every type of climate and for every condition of budget.

The curriculum in architecture is six years in length embracing a four-year Bachelor of Arts in Pre-architecture sequence with a balance of general education and professional study followed by two intensive years of graduate work leading to the first professional degree, Master of Architecture.

BUILDING CONSTRUCTION

The nation’s leading industry in terms of annual dollar volume is Building Construction. Building contracting is a dynamic field and although organizations vary considerably in type, size and complexity, those in leadership positions must invariably have capability (education) in management, construction science, relevant technical disciplines, and the humanities. The curriculum in Building Construction has been structured to provide young people with the unique balance of studies needed to equip them for key roles in the industry. There is a tremendous demand for graduates of the curriculum. The course is four years in length and leads to the Bachelor of Science degree in Building Construction.

CITY AND REGIONAL PLANNING

The City Planner is a member of an essential and complex profession concerned with the programming and guiding of urban and regional development. Our expanding society presents unusual opportunities for Planning graduates in private firms and on public agency staffs. When asked what made a good planner, a leading British professional replied, "A sensitive, creative leader who has lived a bit." He must be able to integrate recommendations of a wide range of specialists. The sociologist, economist, traffic engineer and ecologist, plays significant roles in urban growth and change, but the city planner and urban designer must bring the city to physical form with balance and imagination.
Students admitted as candidates for the Master of City and Regional Planning degree must have the following qualifications:

(a) Meet the admissions requirements for the University Graduate School.

(b) Have a baccalaureate degree approved by the school in such fields as: architecture, civil engineering, economics, landscape architecture, law, political science, or sociology.

Candidates entering the curriculum from a non-design discipline will be required to take a special parallel course designed for their needs, and accordingly may be excused from courses in which they have achieved proficiency.

### COLLEGE OF EDUCATION

The purpose of the College of Education is to prepare teachers, special service personnel, and school leaders; to provide professional services to education in South Carolina; and to carry out basic and applied research in education. Curriculums are organized to give students the opportunities to (1) acquire a broad general education through liberal arts and science courses; (2) develop depth of knowledge in the teaching area; (3) gain an understanding of the historical, philosophical and psychological backgrounds of American Education; and (4) acquire knowledge of and skill and experience in using effective teaching techniques.

Curriculums for those preparing to teach have been especially designed by committees from each department offering a teaching major and the College of Education. The Clemson University Teacher Education Committee, composed of representatives from the teaching-major departments and public-schools, serves in a curriculum advisory capacity to the Dean of the College of Education.

Programs leading to the Bachelor of Science degree are available in Agricultural Education, Industrial Education, and Science Teaching (Biological Science, Chemistry, Physics, or Mathematics). Students preparing to teach in these fields should register as freshmen in the appropriate curriculum in the College of Education.

Students preparing to teach Economics, English, History, Mathematics, French, German, Spanish, Natural Sciences, Political Science, Psychology, or Sociology should register in the Bachelor of Arts program in Secondary Education. Those preparing for the elementary level should register for the Bachelor of Arts program in Elementary Education or in Early Childhood Education.

Any student who has been admitted to the University and who is eligible for continuing enrollment may be admitted to the College of Education. However, admission to specific curriculums is selective and requires meeting established criteria. Students who transfer to the College of Education as upperclassmen will be required to meet all the basic requirements for admission to that Education curriculum.

Application to a specific curriculum should be made to the office of the Dean or to the department concerned during the semester preceding that in which the student wishes to obtain admission. Completion of Sc Ed Form 01 and a personal interview are required as part of the application to a specific teacher education curriculum. Sc Ed Form 02, Application for Directed Teaching, should be filed with the faculty adviser no later than May 1 preceding the school year in which student teaching is to be scheduled.

Directed Teaching is on a "block schedule." The other three classes are scheduled to meet during the first half of the semester, and Directed Teaching is scheduled for the last half.

Qualified students who complete a minimum of six semester hours in junior-senior honors courses in Education and a minimum of six semester hours of honors courses in the teaching field may graduate with Departmental Honors.

A student completing at least six semester hours in junior-senior honors courses in Education and a minimum of six semester hours of junior and senior honors courses outside the teaching area may graduate with Senior Division Honors.
# BACHELOR OF ARTS CURRICULUMS

## EARLY CHILDHOOD EDUCATION

The curriculum in Early Childhood Education leads to a Bachelor of Arts degree in Early Childhood Education. It prepares students for teaching positions in kindergarten or grades 1-3. A minimum of 132 semester hours is required for graduation.

Application to Directed Teaching (Ed 484) should be made in writing no later than May 1 prior to the school year in which student teaching is to be scheduled. A student whose cumulative grade-point ratio is lower than the requirement for graduation will not be permitted to register for this course.

**ELEMENTARY EDUCATION**

The curriculum in Elementary Education leads to a Bachelor of Arts degree in Elementary Education. It prepares students for teaching positions on the elementary level. Provisions are made for more detailed study in an instructional interest area. A minimum of 132 semester hours is required for graduation.

Application to Directed Teaching (Ed 481) should be made in writing no later than May 1 prior to the school year in which student teaching is to be scheduled. A student whose cumulative grade-point ratio is lower than the requirement for graduation will not be permitted to register for this course.

SECONDARY EDUCATION

Programs leading to a Bachelor of Arts degree in Secondary Education are available to students preparing to teach Economics, English, History, Mathematics, French, German, Spanish, Natural Sciences, Political Science, Psychology, or Sociology on the high school level. The teaching field should be selected as early as possible in order that appropriate freshman and sophomore courses may be taken.

Each curriculum requires a major concentration in the teaching field. Specific courses and sequences have been designated by teacher education committees to meet requirements for those planning to teach. Students who have elective courses in the teaching area should consult the departmental adviser prior to scheduling these courses.

The Professional Education courses should be completed in sequence prior to registering for the block schedule. Application to Directed Teaching (Ed 412) should be made in writing no later than May 1 preceding the school year in which student teaching is to be scheduled. A student whose cumulative grade-point ratio is lower than the requirement for graduation will not be permitted to register for Directed Teaching.

Education 412 is conducted on a full-day basis, “block schedule,” for one-half semester. Students taking Ed 412 will register for Ed 424, 458 and Mus 210, these three courses being taught on a five-day basis during the first half of the semester.

BACHELOR OF SCIENCE CURRICULUMS

AGRICULTURAL EDUCATION‡

The Agricultural Education curriculum is designed for students who wish to prepare for positions in vocational agriculture, agricultural occupations, and other teaching positions in the secondary schools; engage in other forms of educational work such as agricultural missionary, public relations and agricultural extension; farming, soil conservation and other governmental work; business and industry.

The curriculum provides for a broad education in general and professional education including student teaching. In addition to required courses giving a thorough background in the agricultural and biological sciences, a student may minor in business or international agriculture or in one subject-matter field. Students in other departments may minor in Agricultural Education and be certified to teach.

* At least one literature course is required.
† See class adviser for available minors and course requirements.
‡ Jointly administered by the College of Education and the College of Agriculture and Biological Sciences.
§ Horticulture (Ornamental) students take EG 101, Freehand Sketching—1 cr. (0.3), in addition to other courses in the first semester.
### INDUSTRIAL EDUCATION

The curriculum in Industrial Education is designed to prepare students for careers in the teaching of industrial subjects and in training programs in industry. To accomplish these purposes the curriculum is divided into three areas of specialization leading to the degree of Bachelor of Science in Industrial Education. At the end of his freshman year, each student will select one of three options: Industrial Arts Education, Vocational-Technical Education, or Education for Industry. Each option requires 135 semester hours of course work.

The Industrial Arts Education option is for those students who desire to teach industrial arts in the secondary schools. Industrial arts is the subject area in the public school system which attempts to provide youth with an interpretation of American industry. It is a general education subject designed to give students exploratory experience in the classroom and laboratory. Majors in this option are qualified for full certification as secondary school teachers of industrial arts.

The Vocational-Technical Education option is designed to prepare teachers of vocational and technical subjects in the Senior High Schools, Area Vocational Schools, and Technical Education Centers. All elective courses in this option will be in an area of specialization or related fields. Teachers graduating from this option will possess the skills and knowledge required to teach the occupation or family of occupation in their area of specialization.

The Education for Industry option is designed to prepare students to enter industry as training specialists. Due to the expansion of technology and industrial development, there is a rapidly increasing demand for training specialists and training directors in industry.

135 Total Semester Hours

---

* Science electives to be selected from Chemistry, Physics, Geology, Physical Science, Biology, Botany or Zoology. At least two fields must be represented, one of which must be in the biological sciences.

† Social Science electives to be selected from History, Sociology, Economics, Political Science, Religion, or Philosophy. At least two fields must be represented, with six, but not more than six hours, in one field.

‡ See class adviser for list of approved electives.
SCIENCE TEACHING

The program leading to a Bachelor of Science degree in Science Teaching is designed for students planning to teach Mathematics, Biology, Chemistry or Physics and General Science on the secondary school level.

It requires a major concentration in Mathematics, Biological Sciences, Chemistry or Physics. The required science electives are included to give some degree of competency in a field other than the major area.

A student must have a minimum of 130 semester hours of credit for graduation.

COLLEGE OF ENGINEERING

The College of Engineering offers professional curricular programs and programs in both Engineering Analysis and Technical Operations. Each of the programs offered leads to a wide range of career opportunities and serves as preparation for further study at the graduate level.

Professional Curriculums: Six four-year, professional oriented curriculums are offered by the College of Engineering, namely, Agricultural Engineering, Ceramic Engineering, Chemical Engineering, Civil Engineering, Electrical and Computer Engineering, and Mechanical Engineering. Each of these curriculums is accredited by the Engineers' Council for Professional Development, the recognized national accrediting agency for professional curriculums in engineering. The curriculum in Agricultural Engineering is jointly administered by the College of Agriculture and Biological Sciences and the College of Engineering.

Although the College of Engineering does not offer specific options or majors in each of these professional curriculums, the instruction includes many phases of each respective field. Thus, a Civil Engineering student is graduated in Civil Engineering rather than Structural Engineering, Highway Engineering, Sanitary Engineering, or other such options. However, a student who wishes to study within the areas encompassed by these options will find adequate courses within the Civil Engineering curriculum to prepare himself for work in any of these areas. In the same way the other engineering curriculums include thorough education in various phases of the field of specialization without over-emphasizing one phase to the neglect of others. The professional curriculums lead to a Bachelor of Science degree in the specific professional area.

The courses required in all professional curriculums for the freshman year are as follows:

<table>
<thead>
<tr>
<th>Freshman Year</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>First Semester</strong></td>
</tr>
<tr>
<td>Ch 101 General Chemistry</td>
</tr>
<tr>

</tr>
<tr>
<td>Math 108 Cal. of One Var.</td>
</tr>
<tr>
<td>AS or MS or Elective</td>
</tr>
</tbody>
</table>

14 or 15 18 or 17

* Agricultural Engineering students take Agric 101, Introduction to Agriculture, in addition to other courses in the first semester.
Engineering Analysis Curriculum:† This curriculum is a four-year, engineering science-oriented course of study. Its objectives are two-fold. These are (1) to prepare a student for employment in areas of engineering activity requiring a high level of analytical competency, and (2) to provide a flexible undergraduate preparation for the study of engineering at the graduate level.

The curriculum leads to the Bachelor of Science degree in Engineering Analysis. Requirements for this degree are stated in terms of subject matter area rather than in terms of specific courses. This latitude of course selection permits maximum accommodation of the individual student's interests and career objectives. Degree requirements are as follows:

<table>
<thead>
<tr>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics (including 12 credits of post-calculus mathematics)</td>
</tr>
<tr>
<td>Basic Science (including 8 credits of physics)</td>
</tr>
<tr>
<td>Engineering Science (distributed in at least six engineering science areas)</td>
</tr>
<tr>
<td>Humanistic-Social Studies</td>
</tr>
<tr>
<td>Electives</td>
</tr>
<tr>
<td>AS or MS or Elective</td>
</tr>
<tr>
<td><strong>Total</strong></td>
</tr>
</tbody>
</table>

The educational objectives of the program will be met by the selection of an area of concentration which will be chosen from several specialty areas offered within the other professional engineering curriculums. The selection of specific courses, particularly in the junior and senior years, will then depend primarily on the choice of the area of concentration.

Maximum flexibility within this program is achieved by permitting a student to defer his choice of specialization until the junior year or later. Such deferral will then allow students from junior and senior colleges not offering engineering to transfer into the program with little or no loss in academic credit.

Technical Operations Curriculum:† This curriculum is a four-year, student-interest oriented course of study designed to prepare technical graduates for such industrial functions as production supervision and management, operation and maintenance of plant environmental and energy systems, and technical sales and purchasing.

† Additional information on both the Engineering Analysis and the Technical Operations programs is available from the Office of the Dean of Engineering.
The curriculum leads to the Bachelor of Science degree in Technical Operations. Requirements for the degree are as follows:

<table>
<thead>
<tr>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics</td>
</tr>
<tr>
<td>Basic Science (including 8 credits of physics)</td>
</tr>
<tr>
<td>Humanistic-Social</td>
</tr>
<tr>
<td>Technical Operations</td>
</tr>
<tr>
<td>Electives</td>
</tr>
<tr>
<td>AS or MS or Elective</td>
</tr>
</tbody>
</table>

The technical operations courses are only offered during the junior and senior years of the program. Hence, a student from a junior college may transfer into the program at the junior level with little or no loss of academic credit.

**AGRICULTURAL ENGINEERING***

The graduate in Agricultural Engineering, with broad training in mathematics, physics, chemistry, and the biological sciences as well as comprehensive coverage of the engineering sciences, is well equipped to apply engineering to many functions affecting the well-being of mankind. The Agricultural Engineer is sought by industry and public service organizations primarily for his ability to apply engineering know-how to agricultural production and processing, and to the conservation of land and water resources. Specific areas of interest include power and machinery, soil and water resources engineering, electric power and processing, structures and environment, and food engineering.

The undergraduate Agricultural Engineering curriculum leads to the Bachelor of Science degree. Based upon fundamental training in the basic sciences, the curriculum includes such engineering sciences as mechanics, fluids, thermodynamics, electrical theory, computing devices and systems analyses. The basic agricultural sciences of soils, plants and animals are included so as to provide a foundation for Agricultural Engineering analysis and design. Recognition is also given to the necessity for being able to synthesize information from any of the applicable subject matter areas, including studies of energy conversion, engineering analysis and the engineering properties of biological materials, and with emphasis upon economy and integrity of design. Research is included in order to introduce the student to the scientific method. Courses in the

* The Agricultural Engineering curriculum is jointly administered by the College of Agriculture and Biological Sciences and the College of Engineering.
humanities are required to provide the graduate engineer with a well-rounded educational experience.

The undergraduate curriculum is designed for both the student who wishes to terminate his formal academic training at the bachelor's level, and also to provide the necessary prerequisites for those who wish to continue in graduate study. Graduate programs in Agricultural Engineering which lead to both the Master of Science and the Doctor of Philosophy degrees are offered.

Since an Agricultural Engineering graduate has a broad training in engineering, in the sciences, in humanities, and in life sciences, he has the pick of opportunities in many areas. Opportunities in Agricultural Engineering include employment with industry as design engineers, research engineers, production engineers, and in sales and service; with state and federal agencies as teachers, research engineers, an extension engineers; as field engineers with the Soil Conservation Service, Bureau of Reclamation, and similar organizations; and with agricultural enterprises as managers, contractors, equipment retailers and as consulting engineers.

The Agricultural Engineering curriculum is accredited by the Engineers’ Council for Professional Development.

178 Degrees and Curriculums
CERAMIC ENGINEERING

Ceramic Engineering offers rewarding careers for persons interested in making useful products. The ceramic products range from items important to everyday life, such as brick, cement, and glass to more exotic products, such as ceramic fuel elements for nuclear reactors, ceramic parts for electronic equipment and ceramic nose cones, ceramic heart valves, and other prosthetic parts for medical research. A variety of occupations are available to the ceramic engineering graduate thus making it possible to select a type of work that is compatible with individual preferences. Some graduates work as researchers, developing new ceramic knowledge; others are design engineers, creating new processes or new products; still others are engaged in technical sales, supervision of plant operations or in management.

South Carolina possesses a wide variety of ceramic minerals which rank with forests as the richest natural resources in the State and make it possible for South Carolina to contribute raw materials to every major classification of the ceramic industry. South Carolina has a diversified ceramic industry with plants manufacturing portland cement, glass containers, glass fibers, sewer pipes, brick, refractories, special raw materials, and electronic ceramics.

The curriculum of Ceramic Engineering leads to the degree of Bachelor of Science in Ceramic Engineering, and graduate courses are offered leading to advanced degrees. The course is based on a study of the fundamental courses in chemistry, physics, mathematics, and geology, and advanced courses are designed to apply these fundamental sciences to Ceramic Engineering. Courses in the humanities and social sciences together with courses in engineering sciences form major parts of the curriculum. A large number of elective courses permits the individual student to plan a program that is compatible with his particular interests, talents, and educational goals.

The Ceramic Engineering building and equipment are recognized as outstanding throughout the nation. These facilities were provided by a grant from the Olin Foundation.

Note: 9 credits of Planned Electives must be taken in humanistic-social science courses. 19 credits of Planned Electives should be technical courses selected with the help of class adviser.

## CHEMICAL ENGINEERING

The graduate of the science-oriented, research-minded Chemical Engineering Department is finding intellectually stimulating and financially rewarding positions in all phases of modern endeavor. The traditional chemical process industries which produce the industrial chemicals upon which our modern society is based require large numbers of chemical engineers. In addition, because of the fundamental nature of the Chemical Engineering curriculum, the graduate is avidly sought by industries in many areas of specialized technology such as nuclear power, aviation and space, fibers and textiles, pharmaceuticals, pulp and paper, computers, foods, metals, ceramics, instrumentation and automatic control, and petroleum. The chemical engineer is in the forefront of the fight against environmental pollution, and is leading the way in applying engineering technology to the solution of medical and health-related problems.

The Chemical Engineering curriculum is unique in that it is built upon a firm base in three sciences (chemistry, physics, and mathematics), hence the chemical engineer is able to apply scientific knowledge to the solution of problems involving both chemical and physical principles. In chemical engineering courses emphasis is
placed upon why things happen as they do and not how; upon enduring principles and not present or past methods. The student is taught to realize that all material things are chemical in nature; hence the chemical engineer, in the practice of his profession, may be called upon to work with anything on the face of the earth. He will be concerned with the conception, design, construction, and management of complete systems of men, processes, computers, and procedures for the most efficient production of chemicals and related products. He produced all the materials required to land men on the moon, he produced uranium to power nuclear reactors, he produced instant foods, he created the synthetic fiber industry, etc. The scope of chemical engineering is broad and the profession is interdisciplinary in nature.

In spite of the strong scientific flavor of the Chemical Engineering curriculum the faculty is constantly striving to impress upon the student that he is studying engineering and not pure science. The ultimate purpose of engineering is to serve mankind by making practical use of scientific and engineering theories and laboratory schemes, thus the engineer must always design his processes to produce products at minimum cost. The chemical engineer in industry must, in brief, be concerned that his company be profitable since it could not exist otherwise.

In industry the chemical engineer may pursue one of two parallel lines of advancement. One path leads to management, and it should be noted that the top managers of most chemical companies are technically educated men. The second and equally rewarding path is in engineering research and development. In this latter category are found the men who have developed the processes and products which shape the modern world in which we live.

The majority of chemical engineers terminate their formal education at the B.S. level, but the Chemical Engineering curriculum also provides an excellent foundation for further education at the graduate level. The most common advanced study path chosen by chemical engineering graduates is continuation in Chemical Engineering to the Master of Science or Doctor of Philosophy degree which provides the added depth of knowledge often required in engineering research and development, as well as the opportunity for specialization. Moreover, the Chemical Engineering graduate, with his excellent background in chemistry, physics, and mathematics as well as in engineering, is well prepared for graduate study in such fields as nuclear engineering, biomedical engineering, environmental engineering, and business and patent law. In addi-
tion, by choosing the proper biology courses as electives, the student can receive excellent preparation for entrance into medical or dental schools. Upon receiving their M.D. degree, individuals having chosen chemical engineering as a pre-medical course will be exceptionally well prepared to deal with present and future technological advances in medical practice as well as for work in many research areas.

The Chemical Engineering Department at Clemson is housed in Earle Hall, one of the newest and best equipped buildings for chemical engineering education in the nation. All members of the Chemical Engineering faculty have been educated at the doctoral level and the department offers work leading to the Master of Science and Doctor of Philosophy degrees as well as the Bachelor of Science degree.

Elective Policy. All electives must be chosen from a departmental elective list. A copy of this list may be obtained from the departmental secretary.
CIVIL ENGINEERING

Civil Engineering is the broadest in scope of the engineering professions, being the parent stem from which most of the other branches of engineering have developed. All branches of Civil Engineering rest on a comparatively compact body of principles, in which the students are thoroughly trained in the classroom, the drafting room, the laboratory, and the field. Particular effort is made to develop those qualities essential to success in any field of endeavor and to fit the graduate to become a useful citizen—a good business man as well as a successful engineer.

The practice of civil engineering involves the planning, design, construction, maintenance, and use of large structures and systems to control and improve the environment for modern civilization. The structures may serve many purposes, such as buildings for commerce and industry, bridges for transportation, vehicles for space exploration, or dams for the control and storage of water or for generation of power. The systems provide essential services: water supply; waste water treatment; rail, air, and water transportation; and systems of highways. Projects such as these require that the civil engineer be trained in the social and economic issues as well as in basic science, engineering science, and technology. Though he may specialize in a particular branch of civil engineering, such as structural or transportation, he will need some acquaintance with all subdivisions of civil engineering as well as of other branches of engineering.

The course in Civil Engineering at Clemson University leads to the degree of Bachelor of Science and is planned to equip the graduate with a working knowledge of the above subjects. The student receives early drill in the basic sciences of mathematics, chemistry, and physics, and is introduced gradually to the engineering sciences and the technical courses in civil engineering. By the end of the junior year the student will have had courses in structural design, construction materials, transportation engineering, and soil mechanics. These will enable him to choose technical electives in his senior year in the subdivision of his choice. The non-technical electives are sufficient in number to provide breadth in the arts and humanities, and assure that the graduate has a well-rounded education.

The civil engineering graduate is prepared to work immediately upon graduation in practically any of the areas of the profession. He may find himself in responsible charge at an early date, so every effort is made to train him at Clemson in the ethical standards
demanded by the profession. All courses are directed toward the development of initiative, self-reliance, and integrity in the student.

The department is located in Lowry Hall, a modern air-conditioned structure erected in 1958. The laboratories are well equipped, and the classrooms are light and conducive to study. The building has an internal television system and the 220-seat auditorium is one of the most attractive ones on the campus.

**ELECTRICAL AND COMPUTER ENGINEERING**

Electrical and computer engineering is the largest and most diversified of the engineering disciplines. Its technical society membership is more than double that of any other and the responsibilities of the profession range from highly analytical problem solving to detailed design of electronics, communications and computing systems. Electrical and computer engineers have traditionally occupied key positions in a wide variety of engineering programs and their educational program must be structured to allow for this diversity of career objectives. The Electrical and Computer Engineering Department allows this flexibility of course selection
in its curriculum. A liberal number of humanistic-social electives provide the graduate with the ability to address himself to both the "how" and the "why" of engineering.

The flexibility of the curriculum allows either a sampling from the many aspects of Electrical and Computer Engineering or a concentration in a specific area. The student's interests and career objectives are carefully considered by the Electrical and Computer Engineering advising staff in structuring a program of study.

Electrical and Computer Engineering can be subdivided into the rather broad areas of networks and systems analysis, communications, electronics, computer science, and power. A brief discussion of each of these follows.

Systems and electric network analysis provides the fundamental core materials in the curriculum. These 18 credits of required work constitute the fundamental studies in analysis and experimentation which receive subsequent further development in elective courses. Computer simulation, mathematical modeling, experimental design and scientific reasoning are representative of the topics covered.

Computers, both analog and digital, are studied extensively in the Electrical and Computer Engineering program. Few areas in engineering present the promise of continued growth that is offered by the computing industry. In preparing the student to meet this challenge, the department offers courses in real-time computing, computer language structures, the theory and design of digital computers, computation and simulation of physical systems, information processing and data handling. The department operates its own digital and analog computing laboratories and has remote terminal equipment to the University Computer Center.

The study of electronics continues to be one of the most active professional areas in Electrical and Computer Engineering. Changes in this field have occurred so rapidly that equipment designed five years ago is obsolete by present design criteria. The vacuum tube gave way to the transistor 16 years ago and just recently the integrated circuit has replaced the discrete solid-state device. The Electrical and Computer Engineering curriculum includes basic work in the theory of operation of solid-state devices, the design of solid-state circuits and the study of integrated circuit technology. Electronic laboratories within the department contain the most modern equipment available for the study of these devices, including special microscopic and micro-manipulation equipment needed in the study of minute integrated circuits.
The study of power systems analysis and energy conversion is carried out in a recently renovated power laboratory. This new facility contains the machinery and instrumentation necessary to explore solid-state-static motor control, dynamic speed and torque measurement techniques and power system stability.

Communication theory may be the most comprehensive field of specialization found in Electrical and Computer Engineering. It includes course work in information theory, electromagnetic theory, switching circuits and electronics. Engineers working in communication find themselves studying switching equipment in tele-communications, working on the plasma blackout problem in missile reentry, studying the design implications of complex missile detection and defense systems or they may be designing antennas and transmitting equipment for space satellites. Some will be trying to comprehend the nature of bioelectricity by studying the human brain.

The Honors Program in the Department of Electrical and Computer Engineering has for the past five years accounted for a large percentage of the honors students in the University. All qualified Electrical and Computer Engineering students are strongly urged to take advantage of this program since it will provide them with an opportunity to participate in some uncommonly rewarding educational experiences during their final two years of study. Honors students receive individualized professional guidance and special laboratory privileges in many of their courses. Honors students in the past have designed electronic devices, have written complex computer programs and have studied technical material which ordinarily would be reserved for students at the graduate level. Students are asked to contact their Electrical and Computer Engineering adviser for more information.

### MECHANICAL ENGINEERING

Mechanical engineers are involved in a variety of industries: aerospace, machinery, textile, chemical, automotive, appliance, and many others. Therefore, their education must be rather broad and not overly specialized. It begins with a thorough preparation in the basic sciences: mathematics, chemistry and physics. This is followed by rigorous study of the engineering sciences: electrical sciences, thermal sciences, mechanical sciences, computers, and systems engineering which is a generalized treatment of automatic control systems.

The program is designed to develop technical competence in the three broad technical areas of Thermal Science, Mechanical Design and Systems Engineering.

The thermal sciences are concerned with energy conversion and heat transfer. The chemical energy of fuels may be converted to other more useful forms to propel high-speed jet aircraft, to provide the thrust for space vehicles, or to operate refrigeration or air conditioning systems. The thermal sciences also involve fluid flow phenomena: supersonic flow, aerodynamics, and flow through turbo-machinery.

Mechanical design requires a knowledge of the strength of materials; mechanisms for converting motion; stress, strain, and deflection analyses; automatic control; lubrication theory; and other engineering sciences. It involves the application of the basic and engineering sciences to the creative design of a wide variety of new
devices and systems from prosthetic devices for the handicapped to completely automated machines for manufacturing plants.

Systems engineering is an outgrowth of automatic control theory. It involves instrumentation, and both analog and digital computers for the mathematical and experimental analyses of complex physical systems. These systems may be made up of various mechanical, electrical, and hydraulic components. It is the engineering science upon which the field of automation is based.

All of the mechanical engineering laboratories and mechanical design rooms at Clemson are modern and well equipped. A new Analog Computer Laboratory has recently been developed as well as a new Instrumentation Laboratory. All research activities in the department are housed in a new, modern, air-conditioned laboratory building.

In order that mechanical engineering students may obtain a well-rounded education, approximately one-fifth of the program is devoted to subjects in the arts and humanities. Thus, with a broad education in the basic sciences, engineering sciences, and in the humanities, mechanical engineering graduates are prepared for careers in industry, research, development, mechanical design, management or further graduate study.

The Mechanical Engineering Department offers work leading to the Master of Science and the Doctor of Philosophy degrees as well as to the Bachelor of Science degree.

**COLLEGE OF FOREST AND RECREATION RESOURCES**

The College of Forest and Recreation Resources is concerned with the management, use, and stewardship of all of our forest resources and with man's well-being through wise use of his leisure. These two general areas of study offer broad opportunities in the management of our forest and recreation resources for their maximum service to the present and future generations of man.

The College of Forest and Recreation Resources offers curriculums designed to prepare students for professional careers in the following areas.

The Forestry curriculum includes the fundamental and applied sciences needed in the management of the forest environment for its products and services. Forestry prepares graduates for employment as managers and administrators of forest lands for production of timber, water, wildlife, esthetic values, and recreational use.

The Recreation and Park Administration curriculum prepares recreation directors for counties, towns and cities, institutions, industries and youth-serving agencies. A park management emphasis may be pursued leading to a career with federal, state, county, and municipal park systems.
FORESTRY

The Forestry curriculum combines a broad education in liberal arts and the physical, mathematical, and biological sciences with the applied forestry sciences needed in the management of the forest and forest environment for their products and services. Foresters of professional standing are employed in various capacities by private concerns and by federal, state, and other public agencies. Because of the nature of their education, foresters are qualified for a broad spectrum of employment possibilities. They may be engaged as managers, administrators, or owners of forest lands or forest-based businesses; as technical specialists in the production of timber, useable water, wildlife, and esthetic values, and in the recreational use of the forest; or as professionals in other areas where the conservation of our natural resources is a matter of concern. Foresters earning advanced degrees find employment in academic work and in research conducted both by public and private agencies.

The undergraduate curriculum provides a strong program in the basic knowledge and skills required of a professional forester. The curriculum is also designed to provide the necessary prerequisites for those students that desire to continue in graduate study. The Department of Forestry offers graduate programs that lead to a Master of Science or a Master of Forestry degree.

The Forestry curriculum is accredited by the Society of American Foresters.

**SENIOR YEAR**

153 Total Semester Hours

* Students planning to eat in the University Dining Halls are advised to purchase individual meals rather than board plans during summer camp, because several days of travel away from campus can be anticipated during which students will be responsible for their own meals and lodging.

RECREATION AND PARK ADMINISTRATION

The curriculum in Recreation and Park Administration provides training for students who desire to become recreation supervisors and directors and park administrators. Graduates plan and supervise recreation programs in industry, institutions, municipalities and rural communities. The program which leads to a Bachelor of Science degree is designed to provide competencies in recreation administration, management, development, planning, and research. It requires 135 semester hours, including field training during one summer, for completion.

## COLLEGE OF INDUSTRIAL MANAGEMENT AND TEXTILE SCIENCE

The programs of the College of Industrial Management and Textile Science embrace three major areas, teaching, research, and public service. The College is responsible for six graduate programs (two in cooperation with other administrative units), seven undergraduate programs, and a “non credit” series of professional development courses for business and industry. The undergraduate curriculums are in the areas of Accounting, Administrative Management, Economics, Financial Management, Industrial Management, Textile Science, and Textile Chemistry. These curriculums are designed to prepare the students for a variety of careers, as well as to furnish an education on which to build for a lifetime. The curriculums recognize the need for an understanding of the basic principles of science and appreciation for the nature of human beings, and the comprehension of the economic, political, and social environment. Flexibility in course selection and choice of areas for emphasis is made possible by secondary concentrations and minors as indicated.

### Notes

- Two-semester sequence in Chemistry, Geology, Physics, or Physical Science.
**ACCOUNTING**

This curriculum leads to the Bachelor of Science degree in Accounting. The program of courses is designed to prepare students for professional careers in accounting and management. The major study of accounting is well supported by sequential courses in English, mathematics, management, economics, and sociology.

The graduate in Accounting is well prepared for entrance in law school, graduate school, or the practice of accountancy, either public, private, or governmental. The study of Accounting in preparation for a career in other areas of Management will provide mastery over an essential tool which reinforces experience and judgment in the decision-making process.

ADMINISTRATIVE MANAGEMENT

The Bachelor of Science degree in Administrative Management is designed for those students interested in careers as professional managers in the less technical areas of management. Such areas include marketing, personnel administration, purchasing, and public administration at the local, state and national levels. In addition, the qualified graduate of this curriculum will have a background suitable for pursuing graduate study in such areas as marketing, transportation, finance, and economics, as well as the behavioral sciences.

The programs of study included in Administrative Management curriculum is designed to provide the student with (1) an appreciation of the social, political and economic environments in which business firms must operate, (2) knowledge of the functional areas of business, their interrelationship and use of analytical methods in solving problems and (3) a facility in the use of mathematics, statistics, and the behavioral sciences in performing managerial functions.

132 Total Semester Hours

† If a student does not elect to take Basic ROTC, he may complete the 4 hours of elective credit at any time during his freshman or sophomore year.

**ECONOMICS**

The curriculum leading to the Bachelor of Arts degree in Economics is designed to combine a broad general education with a thorough understanding of economics.

The economics curriculum is administered in the College of Industrial Management and Textile Science. Although separate and distinct from the Bachelor of Arts program in the College of Liberal Arts, it shares several ingredients with that program. The two programs share an identical freshman year sequence, identical minor concentrations in most cases, and many of the same approved electives.

The degree requirements, effective for freshmen entering 1967-1968 and thereafter, are given below. The Bachelor of Arts degree in Economics requires 128 semester hours for graduation; and whenever scheduling permits, the student will be required to take the courses in the sequence given. The curriculum shown, however, can be considered adequate preparation for graduate study in economics only if it is taken with the mathematics minor.

180 Total Semester Hours

1. Courses for the Humanities requirement may not be selected from the minor field. Humanities include Art, English, Foreign Language, Music, Philosophy and Religion.

2. Where the student selects a minor which carries prerequisites, the prerequisite courses will be counted as approved electives.

3. Those seeking teacher certification will be required to complete more than 128 semester hours.

Twenty-four semester hours above the sophomore level are required including Econ 314 and Econ 407. Courses must also include 9 semester hours selected from Econ 302, 403, 404, 410, 412 and 420. The remaining hours may be selected from Econ 301, 302, 305, 306, 308, 309, 403, 404, 410, 412, 416, 420, 421, 422, 424, Ex St 462, Mgt Sci 311, IM 404, 405, 406, and Ag Ec 456. (Econ 314 should be scheduled to follow immediately after Econ 202.)

**Minor Concentration**

A major in economics must select a secondary (minor) concentration from the following:

| Accounting (to include Acct 202, 301, 302, 303, 410) | Mathematics |
| Biology                                               | Modern Languages |
| Chemistry                                             | Philosophy     |
| English                                               | Physics        |
| Geology                                               | Political Science |
| History                                               | Psychology     |
|                                                        | Sociology      |

Students who consider the Bachelor of Arts curriculum in Economics and desire to go into secondary school teaching may elect to take the degree in Education with a teaching area in Economics. The courses will be those required for teaching certificates as specified by the South Carolina Department of Education as well as those economics courses required for an Economics major.

Specific requirements for most minors may be found under the section on the College of Liberal Arts and the College of Physical and Mathematical Sciences, Bachelor of Arts curriculum. Require-
ments for a major in Education with a teaching area in Economics are shown under the College of Education.

A minor in Economics is provided for other degree programs consisting of 15 hours above the sophomore level which must include Econ 314 and 407.

**APPROVED ELECTIVES**

A list of approved electives for both degree and quality requirements may be obtained from the departmental secretary or from an adviser.

**FINANCIAL MANAGEMENT**

The curriculum for the Bachelor of Science degree in Financial Management provides the student with a course of study in preparation for a career in such areas as banking, insurance, brokerage and related activities. The student should be well prepared to serve on the financial staff of practically any business firm for the purpose of planning, providing, and controlling the capital of the firm. This curriculum should also prepare the student for service in government and agencies and programs of government. The graduate with this degree should be adequately prepared for entrance in law or graduate school.

The course work consists largely of courses in English, Mathematics, Accounting, Economics, Management, and the Social Sciences. The special interests of the individual student may be pursued through elective credit.

INDUSTRIAL MANAGEMENT

This curriculum is designed to adequately prepare students for positions of major responsibility in industry, business, government or further academic study. During the first year education in the mathematical and physical sciences is emphasized. In the second, third, and senior years the student’s work expands into the areas of industrial engineering, finance, management and the social sciences. As preparation for careers in professional management, the Industrial Management curriculum is predicated on the philosophy that the individual must manage first himself, coupling this objective with the acquisition of a general education and then acquiring a mastery of the “tools” of management.

</tbody>
</table>

**Area Concentrations**

During the junior and senior years the student is required to select courses from one of the following areas for the purpose of emphasizing a particular area of the curriculum. Area concentrations constitute 12 credits and may be extended to 18 credits with the approval of the student’s major adviser.

A. Ceramics  
B. Economics  
C. Defense Studies  
D. Health and Hospital Administration  
E. Human Resources Management  
F. Industrial Engineering  
G. Industrial Statistics  
H. Management Science  
I. Marketing Analysis  
J. Regional Science  
K. Textiles

**Textile Chemistry**

The Textile Chemistry curriculum prepares students for a wide variety of positions in the textile-fiber-polymer complex of industries that provide so much of the industrial income of the Southeast. The program gives excellent preparation for graduate study in many fields including the sciences, engineerings, management, and the interdisciplines such as textile, fiber, and polymer science. In his first two years, the student acquires the firm foundation in chemistry, physics, mathematics, and English essential to any serious study of science. In his third and fourth years, the student continues his studies of chemistry and begins to apply his knowledge in studies of polymer and fiber science, dyeing, finishing, yarn and
fabric formation, and textile structures. Supporting courses in the humanities, English, and economics are included.

A total of 132 semester hours is required for graduation; of these, 32 semester hours are electives which may include up to ten semester hours of Air Science or Military Science. At least 20 semester hours of electives will form a coherent group in an area of particular interest and need to the student in his scientific and professional development. Ordinarily these courses will be junior or senior level courses in textile science, textile chemistry, other sciences, engineering, mathematics, or management. In the second semester of his sophomore year, the student, with the advice and consent of the Head of the Textile Department or the Director of Undergraduate Textile Education, will develop a study plan and will select these elective courses so as to maximize his training and development in his chosen field of study.

Senior students are encouraged to participate in original research and seminar programs. These activities, for which academic credits are given, introduce the student to scientific research and development in the chemistry of textiles, fibers, and polymers.

The Textile Department offers the degree, Master of Science in Textile Chemistry, and, in cooperation with the Chemistry Department, the Doctor of Philosophy in Chemistry with a major in Textile Chemistry.

The Textile Science curriculum prepares students for a wide variety of positions in research and development, production, standards, and management in the textile-fiber-polymer complex of industries and in related industries. The program gives excellent preparation for graduate study in many fields. The first two years are devoted to the study of the chemistry, physics, mathematics, and English essential to the study of textile, fiber, and polymer science. In his third and fourth years, the student studies the science and technology necessary for development and production of fibers, yarns, woven, and non-woven textile structures, and synthetic polymers.

A total of 132 semester hours is required for graduation; of these, 34 semester hours are electives which may include up to ten semester hours of Air Science or Military Science. At least 20 semester hours of electives will form a coherent group in an area of particular interest and need to the student in his scientific and professional development. Ordinarily these courses will be junior or senior level courses in textile science, textile chemistry, other sciences, engineering, mathematics, or management. In the second semester of his sophomore year, the student, with the advice and consent of the Head of the Textile Department or the Director of Undergraduate Textile Education, will develop a study plan and will select these elective courses so as to maximize his training and development in his chosen field of study.

Senior students are encouraged to participate in original research and seminar programs. These activities, for which academic credits are given, introduce the student to scientific research and development in textiles, fibers, and polymers.
The Textile Department offers the degree, Master of Science in Textile Science, and, in cooperation with the Chemistry Department, the Doctor of Philosophy in Chemistry with a major in Textile Chemistry.

**COLLEGE OF LIBERAL ARTS**

The College of Liberal Arts, in addition to its six major curriculums leading to the degree of Bachelor of Arts, furnishes indispensable services to all other divisions of the University, including nearly all the instruction in the humanities and the social sciences. Major concentrations may be elected in English, History, Modern Languages, Political Science, Psychology, and Sociology; minor concentrations are offered in these disciplines and in Philosophy. In cooperation with other Colleges of the University, minor concentrations are also available in Biology, Chemistry, Economics, Fine Arts, Geology, Mathematics, and Physics. Supporting work is offered in Music and in interdisciplinary humanistic studies.
The College of Liberal Arts offers programs leading to graduate degrees in English and in History.

**BACHELOR OF ARTS CURRICULUM**

**GENERAL INFORMATION**

The curriculum leading to the degree of Bachelor of Arts is designed to meet the needs of students who desire a broad general education, with emphasis upon the humanities and the social sciences, as a preparation for intelligent citizenship, for general commercial and industrial life, for government service, and for teaching. This curriculum also provides excellent background for the study of law or journalism.

As soon as feasible in his college career, and not later than the end of his sophomore year, the student seeking the Bachelor of Arts degree will select a major and a minor field of concentration from the following areas:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

To fulfill requirements for a major concentration, a student takes 24 semester hours credit from courses above the sophomore level, including certain courses specified by the major department; the minor concentration requires 15 credits from courses above the sophomore level, including certain specified courses.

The total number of semester credits required for the degree is 128; of these, at least 12 should be earned in humanities courses numbered 300 or higher, and at least 12 in Social Sciences courses.
numbered 300 or higher. The humanities are for this purpose considered to include Art, English, Languages, Music, Philosophy, and Religion as well as courses entitled Humanities; the Social Sciences are here considered to include Economics, Geography, History, Political Science, Psychology, and Sociology.

Students in the Bachelor of Arts program who expect to teach in the public schools may elect Education courses required for teaching certificates by the South Carolina State Department of Education, such courses to be approved by their own departmental advisers.

MAJOR CURRICULUMS IN THE COLLEGE OF LIBERAL ARTS

ENGLISH

For a major concentration in English, the recommended program of study consists of the courses stipulated in the basic curriculum and 24 semester hours of English, arranged as follows:

Group I—Engl 402 or 404, 405, 422 or 423 or 424.

Group II—Nine semester credits according to one of the following plans:

(A) Engl 461; 425 or 427 or 429 or 431, or 437; 416 or 438 or 439.

(B) Engl 462; 409 or 443; 445 or 446.

(C) Engl 461, 462, and one of these courses: 409, 416, 425, 427, 429, 431, 437, 438, 439, 443, 445.

Group III—Six additional semester credits from courses numbered above 400.

Engl 304, Advanced Composition, or departmental certification of proficiency in composition is required. English majors are expected to complete Hist 361, 363, and to complete the third year of a foreign language or the second year of two foreign languages. Additional approved electives are added as needed to meet the minimum of 128 semester hours required for graduation.

HISTORY

The recommended program of study consists of the required courses in the Bachelor of Arts curriculum plus Hist 101, 102, Econ 201, Phil 201 or 312, the completion of the third year of a modern foreign language, Hist 499, and 21 additional semester credits in History, arranged as follows:

Group I—At least six credits from these courses: Hist 306, 307, 313, 314, 315, 410, 411, 412, 413.

Group II—At least six credits from these courses: Hist 361, 363, 371, 386, 473, 475, 476, 477, 479, 480, 481, 482, 483, 484.

Group III—At least six credits from these courses: Hist 331, 332, 340, 341, 342.

History majors become eligible to take Hist 499 when they have completed 96 semester hours and at least 5 courses in history at the 300-400 level (excluding Hist 301).

Additional approved electives are added as needed to meet the minimum of 128 semester hours required for graduation.

* English 332 may be included in this group by special arrangement with the Head of the Department of English.
MODERN LANGUAGES

A student may elect a major concentration in a single language or a concentration split between two languages.

I. The recommended program of study for a major in French, German, or Spanish consists of the courses stipulated in the basic Liberal Arts curriculum and 24 hours in the language arranged as follows: 303, 304, 305, and either 306, 307, or 308, plus 12 semester hours on the 400 level.

II. The recommended program for a split major in Modern Languages consists of the courses stipulated in the basic Liberal Arts curriculum, 18 semester hours in the primary language, and 12 semester hours in the secondary language, arranged as follows:

Primary Language. 303, 304, 305, and either 306, 307, or 308 plus 6 semester hours on the 400 level.

Secondary Language. 12 semester hours from courses numbered higher than 300.

Additional approved electives are added as needed to meet the minimum of 128 semester hours required for graduation.

POLITICAL SCIENCE

For a major concentration in Political Science, the recommended program of study consists of the required courses in the Bachelor of Arts curriculum; Pol Sc 201; Pol Sc 101 (formerly 202) or 301; Ex St 301; and 24 semester hours of Political Science drawn from at least four of these fields:

1. American Government—Pol Sc 302, 403, 409
2. Public Administration—Pol Sc 321
3. Constitutional Law—Pol Sc 331, 432, 433, 434
4. Political Behavior—Pol Sc 341, 442, 443
5. Political Thought—Pol Sc 351, 352
6. International Relations—Pol Sc 361, 462, 463, 464, 469, 473
7. Comparative Governments—Pol Sc 371, 372, 473

Additional approved electives are added as needed to meet the minimum of 128 semester hours required for graduation.

PSYCHOLOGY

The recommended program of study for a major concentration in Psychology consists of the required courses in the Bachelor of Arts curriculum, Psych 201 and 202, Math 203 or Ex St 301, Psych 363, and 21 additional hours of Psychology drawn from the following courses:
Major Curriculums in Liberal Arts

Additional approved electives are added as needed to meet the minimum of 128 semester hours required for graduation.

SOCIOMETRY

The recommended program of study for a major concentration in Sociology consists of the required courses in the Bachelor of Arts curriculum, Soc 201 202, Econ 201, 202, Phil 201, 302, Pol Sc 301, Ex St 301, Soc 411, 421, and 18 additional hours drawn from these courses: Pol Sc 341, RS 359, Soc 306, 311, 321, 322, 324, 331, 341, 351, 361, 371, 381, 391, 411, 421, 431, 451, 481, 499. Additional approved electives will be added to meet the minimum of 128 semester hours required for graduation.

MINOR CONCENTRATIONS

Students seeking the Bachelor of Arts degree may choose one of several minor concentrations available. The requirements for each area are detailed below.

Biology. A minor concentration in Biology requires 15 semester credits in the biological sciences numbered higher than 200.

Chemistry. A minor concentration in Chemistry requires Ch 101, 102, and 15 additional credits in chemistry, the courses to be selected in consultation with the Department of Chemistry.

English. A minor concentration in English requires 15 semester credits in English above the sophomore level, arranged as follows:

Group I—Engl 405 and either 422 or 423.

Group II—One of these courses: Engl 402, 404, 425, 427, 429, 431, 437, 443, 445, 446, 461, 462.

Group III—Six additional credits from English courses numbered higher than 400.

Engl 304, Advanced Composition, or departmental certification of proficiency in composition is required.

Fine Arts. The minor concentration in Fine Arts consists of Hum 201-202 or Arch 101-102 and 15 semester credits from the following courses, of which at least 9 must be earned in courses numbered 300 or higher, and no more than 9 in any discipline selected:
Arch 303, 315, 316, 415, 416, all 500 courses;
Engl 305, 308, 310, 311, 331, 332, 333;
Hum 203;
Mus 151, 152, 205, 206, 210, 315, 316, 362, 365, 411;
Phil 305;
Visual Studies (all courses).

History. A minor concentration in History requires Hist 101, 102, and 15 additional credits in History, including at least one course from each of these groups:
Group II—Hist 361, 363, 371, 386, 473, 475, 476, 477, 479, 480, 481, 482, 483, 484.
Group III—Hist 331, 332, 340, 341, 342.

Mathematics. A minor concentration in Mathematics requires Math 106, 108, 206, and 9 additional credits in mathematics, including at least two of these courses: Math 208, 295, 301, Comp Sc 205, 311, and any 400-level course in Mathematics or Computer Science.

Modern Languages. A minor concentration in Modern Languages requires 15 semester credits in one modern language from courses numbered higher than 300, including at least one course on the 400 level.

Philosophy. A minor concentration in Philosophy requires Phil 201, 302, and 15 semester credits from the following courses: Phil 211, 303, 304, 305, 309, 312, 318, 322, 344, 422, 425.

Physics. A minor concentration in Physics requires Phys 122 and 15 additional semester credits in Physics, including Phys 221, 222.

Political Science. A minor concentration in Political Science requires Pol Sc 101 (formerly 202) or 301; 201, and 15 additional semester credits selected from at least three of the fields of Political Science listed above under the major curriculum for Political Science.

Psychology. A minor concentration in Psychology requires Psych 201, 202, and 15 semester credits from the following courses; Psych 302, 303, 321, 331, 341, 351, 361, 363, 401, 402, 403, 422, 442, 471, 498; Ed 302 and 335 (if taken prior to fall 1968); Comp Sc 205.

The "Cluster Minor." This minor concentration is designed to allow students a somewhat wider choice of course materials than is possible with the conventional subject-matter minor. The general requirement for the "Cluster Minor" is 15 semester credits in courses numbered higher than 300 (except where noted differently), chosen according to one of the plans listed below. Courses within the student's major area may not be included in the Cluster Minor.

Group I—Social Sciences*
   Economics
   History
   Political Science
   Psychology
   Sociology

Group II—Philosophy and Religion

Group III—Administration*
   Accounting
   Economics
   Industrial Management

Group IV—Life Sciences †
   Bacteriology
   Botany
   Genetics
   Zoology

Group V—Physical Sciences †
   Chemistry
   Geology
   Physics

* At least two courses must be taken in each subject chosen.
† No course in the 100 series is acceptable toward the cluster minor and not more than two courses in the 200 series. At least two courses must be taken in each subject chosen.
Approved Electives for Students in the College of Liberal Arts

Class advisers in the College of Liberal Arts will normally approve the following courses as electives, but the Dean of Liberal Arts retains the prerogative of limiting the total number of credits that may be approved in a discipline or area:

All courses offered in the College of Liberal Arts and the College of Physical and Mathematical Sciences except: Ch 450; Engl 111; Geol 406; Phys 460; Psych 211; Math 100, 115, 116, 215, 216; All courses in Economics; All courses in Accounting; Architecture 253, 303, 304, 315, 316, 415, 416, 517-530, to a limit of 12 credits; Biol 101; Bot 102, 104, 202 (other courses by special arrangement); Comp Sc 205, 311; Education courses required for certification in South Carolina (other courses by special arrangement); Ex St 301, 462; In Ed 204, 440; IM 201, 299, 307, 312, 313, 322, 405; Mgt Sc 311, 413, 414; RPA 304; RS 301; Courses in Visual Studies to a limit of 9 credits; Zool 102, 104, 301, 302, 304, 460.

School of Nursing

The School of Nursing provides two programs designed to prepare undergraduate men and women students for a career in nursing.

The program leading to the Bachelor of Science in Nursing degree is designed to prepare nurses for the practice of professional nursing in a variety of settings—hospitals, industry, clinics, and public health agencies. The program offers the foundation for graduate study in nursing, and an unlimited opportunity for men and women for sound career development in professional nursing. The baccalaureate program is four academic years and one six-week summer term in length. The student is enrolled in liberal arts and basic science courses during the first two years. These courses are arranged sequentially in order to provide the foundation
for professional courses which are planned for the junior and senior years. In addition advanced liberal arts courses are taken during the junior and senior years. Clinical nursing experiences under the guidance of the School of Nursing faculty will take place with patients in the Greenville Hospital Systems and with local public health agencies.

The program leading to the Associate in Arts degree is designed to prepare the graduate at the technical level of nursing for direct patient-centered nursing under supervision in hospitals and other institutional health centers. The associate degree program is two academic years, including one six-week summer session. The nursing major accounts for fifty percent of the total credit hours. This technical background is balanced by courses in the biologic and social sciences and the humanities. Clinical learning experiences planned as an integral part of the program, under the guidance of the School of Nursing faculty, take place with patients in the Anderson Memorial Hospital.

Students enrolled in the School of Nursing must meet the course requirements as described for each program in order to qualify for the degree and for licensure to practice Nursing.

*Elective from the following: Humanities, Literature, Philosophy, Music.

**College of Physical and Mathematical Sciences**

The College of Physical and Mathematical Sciences, attuned to the times and its needs, offers six major curriculums leading to the degree of Bachelor of Science. These are Chemistry, Geology, Mathematics, Medical Technology, Physics, and Pre-medicine (Pre-dentistry).

In addition, a curriculum in Arts and Sciences, with a major emphasis in either Chemistry, Geology, Mathematics, or Physics can be pursued. The fulfillment of the requirements of this curriculum results in a Bachelor of Arts degree.

Not only are the departments in the College of Physical and Mathematical Sciences concerned with their own programs but they
work closely with the other academic departments in the University. This interweaving of the physical and mathematical sciences with other disciplines, such as biology, economics, engineering, management, and others, allows a student greater flexibility and responsibility in designing his own program.

**BACHELOR OF ARTS CURRICULUM**

The curriculum leading to the Bachelor of Arts degree is designed to meet the needs of those students who desire a broad general education. The first two years are spent in introductory work in various areas in order to give the student breadth of view. This type of background enables the student to take a more intelligent part in the selection of his major and minor fields of concentration. The major areas in the College of Physical and Mathematical Sciences are Chemistry, Geology, Mathematics, and Physics.

There are a great number of choices in the minor area from the different academic departments in the University. Thus, a student has a larger degree of flexibility and responsibility in designing his curriculum in the Bachelor of Arts program. The minor fields are:

<table>
<thead>
<tr>
<th>Minor Field</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biology</td>
</tr>
<tr>
<td>Chemistry</td>
</tr>
<tr>
<td>Economics</td>
</tr>
<tr>
<td>English</td>
</tr>
<tr>
<td>Fine Arts</td>
</tr>
<tr>
<td>Geology</td>
</tr>
<tr>
<td>History</td>
</tr>
<tr>
<td>Mathematics</td>
</tr>
<tr>
<td>Modern Languages</td>
</tr>
<tr>
<td>Political Science</td>
</tr>
<tr>
<td>Philosophy</td>
</tr>
<tr>
<td>Physics</td>
</tr>
<tr>
<td>Psychology</td>
</tr>
<tr>
<td>Sociology</td>
</tr>
</tbody>
</table>

Furthermore, a cluster minor may be taken. The cluster minor concentration should consist of 15 semester credits in courses numbered higher than 300 (with some exceptions). The subject area of the major should be excluded from the grouping in the minor. The groups available in the cluster minor are:

<table>
<thead>
<tr>
<th>Cluster Minor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Group I—Social Sciences</td>
</tr>
<tr>
<td>Group II—Philosophy and Religion</td>
</tr>
<tr>
<td>Group III—Fine Arts</td>
</tr>
<tr>
<td>Group IV—Administration</td>
</tr>
<tr>
<td>Group V—Life Sciences</td>
</tr>
</tbody>
</table>

The major concentration requires 24 semester hours and the minor 15 semester hours above the sophomore level unless otherwise indicated. These fit in the basic curriculum for the three upperclass years with minor variations depending on the specific major or minor selected. Consequently, a student not positive of
his major or minor field has the advantage of making his decision while in the curriculum with a minimum loss of credit.

## MAJOR FIELDS OF CONCENTRATION

### CHEMISTRY

For a major concentration a recommended program of study is shown below, with 130 semester hours required for graduation.

#### First Semester

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ch 101 General Chemistry</td>
<td>4 (3,3)</td>
</tr>
<tr>
<td>Engl 101 English Composition</td>

128 Total Semester Hours

For a major or minor concentration in Physics, Phys 221 and 222 will count.

MINOR CONCENTRATIONS

Biology. The recommended programs of study consists of 15 semester hours from the field of biological sciences in addition to Biol 101, Bot 102, 104, and Zool 102, 104.

Economics. The recommended program of study consists of Econ 201, 202 and 15 semester hours selected from the following (including 314 and 407): Econ 301, 302, 305, 306, 308, 309, 314, 403, 404, 407, 410, 412, 416, 420, 421, 422, 424, Ex St 462, IM 404, 405, 406, Ag Ec 456, Mgt Sc 311.

English. The recommended program of study includes the required courses of the Bachelor of Arts curriculum and 15 semester hours of English, arranged as follows:

Group I—Six semester credits from these courses: Engl 405 and either 422 or 423.
Group II—Three semester credits from these courses: Engl 402, 404, 425, 427, 429, 431, 437, 443, 445, 446, 461, 462.

Group III—Six additional semester credits from English courses numbered higher than 400.

Engl 304, Advanced Composition, or departmental certification of proficiency in composition is required.

Fine Arts. The minor concentration in Fine Arts consists of Hum 201-202 or Arch 101-102 and 15 semester credits from the following courses, of which at least 9 must be earned in courses numbered 300 or higher, and no more than 9 in any discipline selected:

Arch 303, 315, 316, 415, 416, all 500 courses;
Engl 305, 308, 310, 311, 331, 332, 333;
Hum 203;
Mus 151, 152, 205, 206, 210, 315, 316, 362, 365, 411;
Phil 305;
Visual Studies (all courses).

History. The recommended program of study consists of 15 semester hours with a minimum of three hours from each of the following groups:

Group II—Hist 361, 363, 371, 386, 473, 475, 476, 477, 479, 480, 481, 482, 483, 484.

Group III—Hist 331, 332, 340, 341, 342.

Modern Languages. A minor concentration in Modern Languages requires 15 semester credits in one modern language from courses numbered higher than 300, including at least one course on the 400 level.

Philosophy. The recommended program of study consists of 15 semester hours of course work beyond Phil 201, 302—drawn from Phil 211, 303, 304, 305, 309, 312, 318, 322, 344, 422, 425.

Political Science. The recommended program of study consists of 15 semester hours beyond Pol Sc 101 (or 202 or 301) and 201 in courses drawn from at least three of the following fields:

1. American Government—Pol Sc 302, 403, 409
2. Public Administration—Pol Sc 321
3. Constitutional Law—Pol Sc 331, 432, 433
4. Political Behavior—Pol Sc 341, 442, 433
5. Political Thought—Pol Sc 351, 352
6. International Relations—Pol Sc 361, 462, 463, 464, 469, 473
7. Comparative Governments—Pol Sc 371, 372, 473

Psychology. The recommended program of study consists of required courses Psych 201, 202 and 15 semester hours to be se-
selected from Psych 302, 303, 321, 331, 341, 351, 361, 363, 401, 402, 403, 422, 442, 471, 498, Comp Sc 205.

CLUSTER MINORS

Group I—Social Sciences
No fewer than two courses in each subject chosen:
- Economics
- History
- Political Science
- Psychology
- Sociology

Group II—Philosophy and Religion

Group III—Fine Arts
Of these courses, 9 semester credits must be taken in courses numbered 300 or higher:
- Architecture 303, 315, 316, 415, 416, 517-524, 529, 530;
- English 305, 308, 310, 311, 331, 332, 333;
- Music 151, 152, 205, 206, 210, 315, 316, 362, 365, 411;
- Philosophy 305;

Group IV—Administration
No fewer than two courses in each subject chosen:
- Economics
- Accounting
- Industrial Management

Group V—Life Sciences
No course in the 100 series is applicable and not more than two courses in the 200 series. No fewer than two courses in each subject chosen:
- Bacteriology
- Botany
- Genetics
- Zoology
Group VI—Physical Sciences

No course in the 100 series is applicable and not more than two courses in each subject chosen:
Chemistry
Geology
Mathematics
Physics

BACHELOR OF SCIENCE CURRICULUMS

CHEMISTRY

Chemistry, an experimental discipline based on observation guided by molecular theory, is of fundamental importance in much of modern science and technology. Its molecular concepts form the basis for ideas about complex material behavior. Due to the fundamental nature and extensive application of chemistry, an unusually large variety of challenging opportunities to contribute in the science-oriented community are open to the student whose education is built around the principles of this discipline.

The curriculum in chemistry provides, through its advanced chemistry courses and large number of elective hours, a program that may be suited to a student’s specific needs, whether he be interested in graduate work; industrial chemistry, sales or supervision; or related professional fields. [Significant features of the program are the student’s extensive participation in experimental laboratory work and his association with teachers who also pursue research activities. Because the undergraduate and graduate studies are closely connected, an undergraduate may elect to take part in a research investigation during his junior and senior years.]

### GEOLOGY

Geology is a relatively young science. The word itself is only about 200 years old. It means the science of the earth. Such a science must be involved with the physics and chemistry of materials which comprise the earth, but equally important it must consider the development of life on earth. Fundamentally, then, the chemical, physical, and biological responses to various environments on and in the earth must be thoroughly understood so that the historical development of the earth may be deduced, predictions of the future inferred, and natural resources intelligently developed.

Industry in our modern civilization is dependent on minerals and rocks. Metals have their origin in them as do our chief power sources, coal, petroleum, and radioactive minerals. The power and wealth of nations depend largely on their exploration, control and development of mineral wealth.

Geologists today are entering upon a new era. Widening horizons are indicated by employment not only in mineral producing industries but by railroads, municipalities, engineering firms, and water authorities. For this reason, it is important that the geologists’ education rest on a broad yet rigorous base.

This curriculum provides the student with the fundamentals in the geological sciences and excellent support in the other basic sciences. On successful completion of the Bachelor of Science program the student should be adequately prepared for employment or for graduate study in any field of geology.

**Summer Geology Field Camp, 1 6 semester hours**

**134 Total Semester Hours**

---

* German or French is recommended. Two years in the same language is required.
† At least 12 hours must be elected from the humanities and/or social sciences.

Clemson University does not conduct a field camp in geology, but attendance at a camp approved by the geology staff is required.

### MATHEMATICS

The mathematics curriculum is designed to give basic training to those students whose ultimate goal is the creation of mathematical concepts and methods that are of basic and general applicability to the desired subject whether it be physics, computer science, communication theory, data processing, statistics, operations research, economics, or any branch of the physical sciences in which a strong mathematical background is a prerequisite. In addition to containing basic mathematics courses which are needed to prepare the student for the present day mathematical world, the curriculum allows the student in his junior year to select one of seven optional sets of courses which will provide an introduction to an area where mathematics is applied. These options are physics,
operations research, computer science, managerial science, communications, chemistry, and statistics.

This curriculum provides an adequate background for the student who plans to pursue graduate study in mathematics and at the same time adequately prepares the student to fill many interesting positions in space research, computer development, business, or government research.

Math 452 Linear Programming 3 (3,0)
Math 473 Intro. to Nonlin. Opt. 3 (3,0)

F. PHYSICS
Phys 321 Mechanics I 3 (3,0)
Phys 322 Mechanics II 3 (3,0)
or Phys 404 Astrodynamics 3 (3,0)
or Phys 441 Elec. & Magnetism 3 (3,0)
Phys 340 Elec. & Magnetism 3 (3,0)

MEDICAL TECHNOLOGY

Medical Technologists are qualified to perform a wide variety of chemical, microscopical, and bacteriological tests to aid physicians in the detection, diagnosis, and treatment of disease. Some medical technologists are responsible to a medical doctor, generally a pathologist, while others work under the supervision of a medical scientist who specializes in a particular branch of clinical science. The largest group of medical technologists work in hospital laboratories.

In cooperation with the Anderson Memorial Hospital, the Greenville General Hospital, and Self Memorial Hospital in Greenwood, Clemson offers a four-year curriculum leading to the Bachelor of Science in Medical Technology. The student spends the first three years of this program in class work at Clemson and the fourth year at one of the participating hospitals, according to the student's choice and previous agreement with the hospital. While in residence in Anderson, Greenville, or Greenwood, the student will take specified courses under instructors on the hospital staff. During the fourth year of work, both room and board are furnished by the hospital.
Upon satisfactory completion of the prescribed courses, the student will be awarded the Bachelor of Science degree in Medical Technology.

**PHYSICS**

Physics is the fundamental science. The word physics comes from the Greek term meaning nature. Therefore, physics is a science dedicated to the study of all natural phenomena. Physics is the foundation for the other experimental sciences. The physics curriculum is designed with this point of view.

The first two years of the physics curriculum is generally the same as that for mathematics, the other physical sciences and engi-
neering. During the junior and senior years the physics student is given a strong background in the basic physics courses at an advanced level and is allowed to specialize in a variety of other fields by selecting one of eight options. The options are astrophysics, biophysics, chemical physics, computer science, electronics, geophysics, mathematical physics, and physics. After completing one of these curriculums the student is prepared for positions in industry (e.g., aircraft, electronics, petroleum, textiles, pharmaceutical) and government laboratories (e.g., space research). Those students who select the physics or mathematical physics options are well equipped for graduate study in physics.

* Russ 101, 102 may be substituted.
† A minimum of 12 hours of electives must be chosen from course offerings in the Humanities and Social Sciences.
PRE-MEDICINE AND PRE-DENTISTRY

Medicine and dentistry need individuals with a diversity of educational backgrounds and a wide variety of talents and interests. The philosophies of education, specific premedical and predental courses requirements, other qualifications for enrollment, and systems of training vary among the medical and dental schools, but all recognize the desirability of a broad education—a good foundation in the natural sciences (mathematics, chemistry, biology, and physics), highly developed communication skills, and a solid background in the social sciences and humanities. The absolute requirements for medical and dental school admission (16 credit hours in chemistry, 8 credit hours in biology, 8 credit hours in physics, 6 credit hours in English, and 6 credit hours in mathematics) are purposely limited in order to allow latitude for developing individualized undergraduate programs of study.

The student preparing for a career in medicine or dentistry can major in the behavioral or natural sciences, and many do major in one of the sciences; however, this is not necessary. The Association of American Medical Colleges and the American Association of Dental Schools recommend that the premedical and predental student should feel free to develop his major area of interest, realizing that the medical and dental school is more interested in the quality and scope of the work accomplished than in the time spent or the major field chosen. It is possible to major in a nonscience area, carrying the necessary science courses as electives; however, since so much of medicine and dentistry is derived from a scientific basis, the student who majors in a nonscientific field and elects the minimum number of required science courses must excel in them to insure the adequacy of his preparation.

A suggested curriculum in Pre-medicine and Pre-dentistry, offered here, is designed to meet the general entrance requirements of most medical and dental schools and, as well, to provide a broad education in the natural sciences, the social sciences, the humanities, and communication skills.

Those preparing for the study of medicine are advised to complete four years of undergraduate work before entering a medical school, although some medical schools will admit an exceptional student after three years of preparation. Many dental schools will accept the better student after three years of preparation.

**Pre-Pharmacy**

Pharmacy is a five-year program, the first two years of which can be taken at Clemson. The student who does pre-pharmacy here will transfer, as a rule, to the School of Pharmacy of the Medical University of South Carolina, where the final three years will be completed and by which institution the degree in Pharmacy will be awarded.

### Approved Electives for Students in the College of Physical and Mathematical Sciences

Class advisers in the College of Physical and Mathematical Sciences will normally approve the following courses as electives, but the Dean of Physical and Mathematical Sciences retains the prerogative of limiting the total number of credits that may be approved in a discipline or area:

All courses offered in the College of Liberal Arts and the College of Physical and Mathematical Sciences except Ch 450, Engl 111, 351, Geol 406, Math 102, 103, 104, 115, 116, 215, 216, Psych 211.

Certain upper level courses, not given in the College of Physical and Mathematical Sciences listed below, plus others recommended in a particular curriculum:

Acct 201, 202, 305; Ag Ec 352, 357, 456; Arch 303, 315, 316, 415, 416, 517-524, 529, 530; BioE 301 401; Biol 101; Bot 102, 104, 352, 356, 404, 451; Econ 201, 202, 301, 302, 305, 306, 308, 309, 314, 403, 404, 407, 410, 412, 416, 420, 422; Ed 301, 302, 335, 405, 406; EE 315, 320, 321, 325, 326, 330, 331, 332, 333; Ent 301, 405, 410, 455; Ex St 462; Gen 302; IM 307, 312, 313, 322, 404, 415; ME 481, 484, 486; H Adm 305; Mgt Sc 311; Micro 305, 401; Vis 203, 205, 207, 209, 211, 213, 215, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416; Zool 102, 104, 301, 302, 307, 403, 404, 405.

In exceptional cases certain other courses, but not in excess of 6 semester hours for the Bachelor of Arts program and 9 semester hours for the Bachelor of Science program, may be approved by the class adviser and the Dean of the College of Physical and Mathematical Sciences.
DESCRIPTION OF COURSES

This list of courses includes for each course the catalog number, title of course, credit in semester hours, class laboratory hours per week, and the description of the course. In general, courses numbered 100-199 are freshman courses; 200-299, sophomore courses; 300-399, junior courses; and 400-499, senior courses. Courses numbered 600 or above are graduate courses and are open only to students admitted to the Graduate School, except that seniors with exceptional records may be enrolled with special permission. Where courses are offered on a schedule, there is a designation F, S, or SS following the title of each course, indicating whether it is customarily offered in the fall, spring, or summer school.

ACCOUNTING

Professor: C. C. Davis
Associate Professors: F. R. Gray, J. M. Wannamaker
Assistant Professors: R. W. Barron, J. A. Turner
Instructor: B. M. White

AccT 201—Principles of Accounting—3 cr. (3 and 0)
Practice in handling real and nominal accounts, together with an introduction to the use of various types of books of original entry, statements of profit and loss, and balance sheets.

AccT 202—Principles of Accounting—3 cr. (3 and 0)
Continuation of AccT 201 with special attention to corporation and partnership accounting with emphasis on adjustment procedures and the analysis of financial statements. Prerequisite: AccT 201.

AccT 301—Intermediate Accounting—3 cr. (3 and 0)
A course in the theory of accountancy designed to follow introductory theory presented in the basic principles courses. Intermediate accounting seeks to broaden the student's knowledge of financial accounting theory and practice. Prerequisite: AccT 201 and 202.

AccT 302—Intermediate Accounting—3 cr. (3 and 0)
A continuation of Accounting 301 with emphasis on managerial accounting. Prerequisite: AccT 201 and 202.

AccT 303—Cost Accounting—3 cr. (3 and 0)
The application of cost analysis to manufacturing and distributing problems. Analysis of the behavior characteristics of business costs and a study of principles involved in standard cost systems. Lectures and problems. Prerequisite: AccT 201 and 202.

AccT 305—Income Taxation—3 cr. (3 and 0)
Interpretation of Federal Income Tax laws, regulations, and court decisions with practice in application of these laws to the returns of individuals, partnerships, and corporations. Prerequisite: Junior standing.
ACCT 403—ACCOUNTING RESEARCH—2 cr. (2 and 0)
A directed research course for those students interested in a career in accounting. Prerequisite: Acct 301, 302.

ACCT 405—ADVANCED FEDERAL TAXES—3 cr. (3 and 0)
Tax planning and research. Advanced phases of income taxation with emphasis on special problems applicable to corporations, partnerships, estates and trusts. Prerequisite: Acct 305.

ACCT 407—ACCOUNTING RESEARCH—1 cr. (1 and 0)
A directed research course for those students interested in a career in accounting. Prerequisite: Acct 301, 302.

ACCT 410—BUDGETING AND EXECUTIVE CONTROL—3 cr. (3 and 0)
The study and application of selected techniques used in the planning and control functions of business organizations. Prerequisite: Acct 303.

ACCT 411—ADVANCED ACCOUNTING—3 cr. (3 and 0)
A study of accounting principles and practices emphasizing parent-subsidiary accounting. Prerequisite: Acct 301, 302.

ACCT 415—AUDITING—3 cr. (3 and 0)
Professional and practical auditing theory. Review of internal controls, audit procedures, and development of audit programs for various types of businesses; consideration of auditor's professional and ethical standards. Prerequisite: Acct 301, 302.

ACCT 420—CPA REVIEW—3 cr. (3 and 0)
Intensive practice in analyzing and solving CPA level accounting problems. Prerequisite: Acct 411.

ACCT 605—ADVANCED FEDERAL TAXES—3 cr. (3 and 0)
ACCT 610—BUDGETING AND EXECUTIVE CONTROL—3 cr. (3 and 0)
ACCT 611—ADVANCED ACCOUNTING—3 cr. (3 and 0)
ACCT 615—AUDITING—3 cr. (3 and 0)

AEROSPACE STUDIES
Professor: Colonel E. N. Tyndall, Head

GENERAL MILITARY EDUCATION PROGRAM
AS 109—WORLD MILITARY SYSTEMS—1 cr. (1 and 1)
An introduction to factors of national power, principles and nature of war; legislation, organization and function of the Department of Defense; history, missions, and organization of the United States Air Force. Corps Training includes drill fundamentals, customs and courtesies of the service.

AS 110—WORLD MILITARY SYSTEMS—1 cr. (1 and 1)
Surveys the history and development of U. S. strategic offensive and defensive forces including their missions, functions and organization; conventional nuclear weaponry, civil defense, aircraft and missile defense, concepts of
present and projections of future strategic defense requirements. Corps Training includes drill and ceremonies and Air Force career opportunities.

AS 209—World Military Systems—1 cr. (1 and 1)
A continuation of the study of world military forces placing special emphasis on the General Purposes forces of the Air Force, Army and Navy and their role throughout the entire spectrum of warfare. Also included are the roles of the aerospace support forces which enable the combat forces to carry out their primary missions. Corps Training.

AS 210—World Military Systems—1 cr. (1 and 1)
A study of the trends and implications in international affairs highlighting the struggle, the search and the prospects for peace. Special emphasis is given the conflict between democracy and communism, the alliances and collective security agreements of the United States to preserve peace and some of the specific problems and solutions involved in the search for peace. Corps Training.

Professional Officer Education Program

AS 309—Growth and Development of Aerospace Power—3 cr. (3 and 1)
A comprehensive study of the development of Aerospace Power and the USAF, its doctrine, mission and organization. Course objectives are accomplished through a student-centered program with emphasis on all phases of communicative skills development. Corps Training emphasizes leadership development and Air Force career opportunities.

AS 310—Growth and Development of Aerospace Power—3 cr. (3 and 1)
A study of current and planned space programs. Reviews the characteristics of the solar system and operating principles associated with the major components of space exploration systems. As in AS 309, course objectives are accomplished through a student-centered program with emphasis on all phases of communicative skills development. Corps Training includes drill and ceremonies and the environment of the Air Force officer.

AS 409—Concepts of Air Force Leadership—3 cr. (3 and 1)

AS 410—Concepts of Air Force Management—3 cr. (3 and 1)
A continuation of the study of professionalism with the stress on management principles and functions. An introduction to systems and approaches to decision making and resource control used in the Air Force. Includes participation in problem-situation exercises. The course concludes with instruction to prepare cadets for active duty in the Air Force. Corps Training emphasizes advanced leadership functions.
AGRICULTURAL ECONOMICS

Professors: L. M. Bauknight, Jr., W. J. Lanham, Head; J. M. Stepp
Associate Professors: A. B. Carroll, B. L. Dillman, J. W. Hubbard, H. C. Spurlock, G. R. von Tuneglin
Assistant Professors: R. K. DeHaven, J. C. Hite, J. S. Lytle

AG Ec 202—AGRICULTURAL ECONOMICS—3 cr. (3 and 0) F, S
An analytical survey of the various subdivisions of agricultural economics, to include farm organization, enterprise analysis, land economics, marketing, farm prices, governmental farm policies, and the relation of agriculture to the national and international economy. Prerequisite: Econ 201.

AG Ec 302—AGRICULTURAL FIRM MANAGEMENT—3 cr. (2 and 3) F, S
Economic principles underlying the organization and operation of agricultural firms and related business enterprises. Particular emphasis is directed to management aspects of the farm as a production unit. Prerequisite: Ag Ec 202 or Econ 202.

AG Ec 305—AGRICULTURAL BUSINESS ANALYSIS—3 cr. (2 and 3) F, S
The principles of financial statement analysis applied to management of farms and other agricultural business firms. Emphasis is placed on enterprise analysis, profitability determination, and other aspects of internal financial operations. Prerequisite: Ag Ec 202 or Econ 202.

AG Ec 309—ECONOMICS OF AGRICULTURAL MARKETING—3 cr. (3 and 0) F, S
A general course in marketing agricultural commodities, with particular emphasis upon food products. Efficiency criteria, consumer behavior, market organizations and institutions, and marketing functions are analyzed. Prerequisite: Econ 201.

AG Ec 351—ADVERTISING AND MERCHANDISING—3 cr. (3 and 0) F, S
A general introduction to advertising and merchandising theories and some practice with basic techniques. A partial list of subjects covered includes: function of advertising, propriety in advertising, institutions, media, market research, consumer appeals, loss leaders, mass displays, trademarks and brands, writing copy, color, layout, agencies and integrated advertising campaigns. Prerequisite: Junior standing.

AG Ec 352—PUBLIC FINANCE—3 cr. (3 and 0) F, S, SS
Principles of financing government, sources of public revenue, objects of public expenditures, problems of fiscal administration, and the application of fiscal policies in stabilizing the national economy.

AG Ec 357—NATURAL RESOURCE ECONOMICS—3 cr. (3 and 0) F, S, SS
The principles and problems involved in the use of soil, water, forest, and mineral resources, with special emphasis on economic aspects of alternative methods of resource utilization. Prerequisite: Econ 201.

AG Ec 402—ECONOMICS OF AGRICULTURAL PRODUCTION—3 cr. (3 and 0) F
An economic analysis of agricultural production involving (a) the concept of the farm as a firm, (b) principles for decision making, (c) the quantitative nature and use of production and cost functions and their interrelations and
application of these principles to resource allocation on farms and among areas.  
**Prerequisite:** Permission of instructor.

**AG Ec 403—LAND ECONOMICS—3 cr. (3 and 0)**

A study of the characteristics of land and of the physical, legal, social and economic principles and problems relating to the control and use of land resources. **Prerequisite:** Permission of instructor.

**AG Ec 405—SEMINAR—1 cr. (1 and 0) F**

An examination of the relation of economics and sociology to specific problems. **Prerequisite:** Major in Agricultural Economics.

**AG Ec 406—SEMINAR—1 cr. (1 and 0) S**

A continuation of AG Ec 405.

**AG Ec 451—AGRICULTURAL COOPERATION—2 cr. (2 and 0) F**

The principles and practices of business organization and management governing the successful operation of cooperative business enterprises. Major emphasis is placed upon cooperative selling, processing, purchasing, and service enterprises that serve farm people. **Prerequisite:** Econ 201.

**AG Ec 452—AGRICULTURAL POLICY—3 cr. (3 and 0) F, S**

A review of public agricultural policy programs in the United States and a critical examination of current and proposed government policies and programs affecting the agricultural sector of the economy. Included are economic considerations as related to past and current farm price and income problems. **Prerequisite:** AG Ec 202 or Econ 202.

**AG Ec 456—PRICES—3 cr. (3 and 0) F, S**

A review of the basic theory of price under competitive conditions and various modifications; nature, measurement and causes of daily, seasonal and cyclical price fluctuations; geographical price relationships; nature, function and behavior of futures markets; government price programs. **Prerequisite:** AG Ec 202 or Econ 202.

**AG Ec 460—AGRICULTURAL FINANCE—2 cr. (2 and 0) F, S**

The financial needs of agriculture and of the organization, functions and interrelationships of agencies developed to meet these needs. **Prerequisite:** Econ 201.

**AG Ec 701—AGRIBUSINESS MANAGEMENT PRINCIPLES—3 cr. (3 and 0)**

**AG Ec 602—ECONOMICS OF AGRICULTURAL PRODUCTION—3 cr. (3 and 0)**

**AG Ec 603—LAND ECONOMICS—3 cr. (3 and 0)**

**AG Ec 651—AGRICULTURAL COOPERATION—2 cr. (2 and 0)**

**AG Ec 652—AGRICULTURAL POLICY—3 cr. (3 and 0)**

**AG Ec 656—PRICES—3 cr. (3 and 0)**

**AG Ec 660—AGRICULTURAL FINANCE—2 cr. (2 and 0)**

**AG Ec 802—AGRICULTURAL PRODUCTION ECONOMICS PROBLEMS—3 cr. (3 and 0)**

**AG Ec 804—WATER RESOURCE POLICIES—3 cr. (3 and 0)**

**AG Ec 806—ECONOMIC DEVELOPMENT IN AGRICULTURAL AREAS—3 cr. (3 and 0)**
AG Ec 807—Market Structure in Agricultural Industries—3 cr. (3 and 0)
AG Ec 808—Applied Quantifications in Agricultural Economics—3 cr. (3 and 0)
AG Ec 814—Contemporary Economic Problems—3 cr. (3 and 0)
AG Ec 851—Seminar in Research Methodology—1 cr. (1 and 0)
AG Ec 891—Thesis Research—Credit to be arranged.
AG Ec 904—Seminar in Resource Economics—3 cr. (3 and 0)
AG Ec 906—Seminar in Area Economic Development—3 cr. (3 and 0)
AG Ec 907—Agricultural Marketing Problems—3 cr. (3 and 0)
AG Ec 991—Doctoral Research—Credit to be arranged.

AGRICULTURAL EDUCATION*

Professor: L. H. Davis, Head
Associate Professors: W. C. Bowen, E. T. Carpenter, F. E. Kirkley
Assistant Professor: J. A. Hash

AG Ed 201—Introduction to Agricultural Education—3 cr. (2 and 2)
Principles of education, development of agricultural education, and an introduction to the formulation of instructional programs for the teaching of farm people.

AG Ed 401—Methods in Agricultural Education—3 cr. (2 and 2)
Appropriate methods of teaching vocational agriculture in high schools. The course includes procedures for organizing teaching programs, teaching high school students, and directing F. F. A. activities.

AG Ed 406—Directed Teaching—6 cr. (0 and 18)
Guided participation in the professional responsibilities of a teacher of vocational agriculture including an intensive study of the problems encountered and the competencies developed. A half semester of directed teaching in selected schools is required. Prerequisite: Ag Ed 401 and Ag Ed 422.

AG Ed 422—Introduction to Adult Education—3 cr. (2 and 2)
History and nature of adult education in the United States, with emphasis on adult education for rural people.

AG Ed 431—Methods in Conservation Education—3 cr. (3 and 0)
A study of various techniques appropriate to teaching conservation. Instruction is applicable to both elementary and high school teachers. (Offered in Summer School only.)

AG Ed 463—Advanced Conservation Education—3 cr. (3 and 0)
The broader aspects of conservation education. The course includes historical, geographical, and national conservation problems. (Offered in Summer School only.)

*Jointly administered by the College of Education and the College of Agriculture and Biological Sciences.
AG Ed 465—Program Development in Agricultural Education—3 cr. (3 and 0)
Each student will determine needs and resources in a specific community and plan a program to meet these needs.

AG Ed 467—Adult Education in Agriculture—3 cr. (2 and 3)
Principles and practices appropriate to the solution of problems encountered in instructional programs for adult farmers.

AG Ed 601—Methods in Agricultural Education—3 cr. (2 and 3)

AG Ed 663—Advanced Conservation Education—3 cr. (3 and 0)

AG Ed 665—Program Development in Agricultural Education—3 cr. (3 and 0)

AG Ed 667—Adult Education in Agriculture—3 cr. (2 and 3)

AG Ed 803—Evaluation in Agricultural Education—3 cr. (2 and 3)

AG Ed 804—Special Problems—3 cr. (2 and 3)

AG Ed 805—Administration and Supervision in Agricultural Education—3 cr. (3 and 0)

AG Ed 815—Advanced Methods of Teaching Farm Mechanics—3 cr. (2 and 3)

AG Ed 820—Teaching Young Farmers—3 cr. (3 and 0)

AG Ed 825—Supervision of Student Teaching—3 cr. (3 and 0)

AG Ed 869—Seminar—1-3 cr. (1-3 and 0)

AG Ed 891—Introduction to Research in Education—3 cr.

AGRICULTURAL ENGINEERING*

Professors: T. H. Garner,† A. W. Snell, Head; T. V. Wilson
Associate Professors: C. L. Barth, C. E. Hood, Jr., J. R. Lambert, J. T. Ligcon, E. B. Rogers, Jr., B. K. Webb
Assistant Professor: J. T. Craig

AGE 205—Farm Shop—3 cr. (2 and 3) S
Correct methods and underlying reasons in proper use and maintenance of hand and power tools are emphasized. Principal topics include: carpentry, painting and finishing, soldering and sheet metal work, farm concrete, pipe fitting and plumbing, and farm and home water supply systems.

AGE 206—Agricultural Mechanization—3 cr. (2 and 3) F, S
The agricultural student is taught to apply physical principles and sound reasoning to the mechanization of modern agricultural production and processing enterprises. Planning efficient operational systems and wise selection of equipment, based on function and economic suitability, are stressed. Prerequisite: Math 103, 104, Phys 207.

* Jointly administered by the College of Agriculture and Biological Sciences and the College of Engineering.
† On leave.
Agricultural Engineering 237

**AeE 212—Fundamentals of Mechanization—3 cr. (2 and 3) S**
Functional analysis of selected agricultural equipment and the economic performance of machine systems; also, the utility and principles of applied technology and processes essential to providing a background for engineering design, research and development. **Prerequisite:** EG 109.

**AeE 221—Soil and Water Resources Engineering I—3 cr. (2 and 3) F**
Physical relationships of factors governing rainfall disposition are used as bases for defining the hydrology of agricultural watersheds. The surveying necessary for design and application of resource management measures and structures is taught. **Prerequisite:** Math 106.

**AeE 301—Soil and Water Conservation—3 cr. (2 and 3) F**
Engineering and agronomic principles are applied to water management in agriculture. Elementary surveying, mathematics, crops and soil fundamentals are embodied into principles and practices of erosion control, drainage, water conservation and irrigation. **Prerequisite:** Math 103, 104.

**AeE 352—Farm Power—3 cr. (2 and 3) F and SS, '73 and alternate years.**
Farm tractors and stationary power units. Principles of operation, preventive maintenance, adjustment and general repair are emphasized. **Prerequisite:** AeE 206.

**AeE 353—Computational Systems—2 cr. (0 and 6) F**
The fundamentals of computational systems including symbolic logic will be followed by methods and techniques of programming digital and analog computers to give solutions to agricultural engineering problems. **Prerequisite:** Math 208.

**AeE 355—Engineering Analysis and Creativity—2 cr. (1 and 3) F**
The creative and analytical portions of the engineering design process are developed in a problem approach. Application of physical and mathematical principles, analytical and experimental modeling and intelligent assumption making are stressed. Students are also introduced to the techniques of systems analysis. **Prerequisite:** Math 208 and Phys 221.

**AeE 360—Farm and Home Utilities—3 cr. (2 and 3) S and SS, '72 and alternate years.**
A course for seniors and graduate students in agriculture curriculums, involving a study of electric and other utilities on the farm and in the home. Selection installation and maintenance of wiring systems, motors and controls, home water systems and sewage disposal systems are emphasized. **Prerequisite:** Junior standing.

**AeE 362—Energy Conversion in Agricultural Systems—3 cr. (2 and 3) S, '73 and alternate years.**
The energy requirements of agricultural systems with emphasis upon energy conversion methods. Characteristics of various sources of energy will be considered including economic aspects. The present energy conversion mechanisms used in agriculture will be studied and their limitations considered. **Prerequisite:** ME 311.

**AeE 416—Agricultural Machinery Design—3 cr. (2 and 3) S**
Engineering analysis of machines and basic agricultural operations and systems requiring machine functions. Fundamentals of machine design with
applications to agricultural machinery. Velocity and acceleration, analyses, dimension determination, power transmission, and vibrations in machinery are studied. Prerequisite: EM 304.

AGE 422—SOIL AND WATER RESOURCES ENGINEERING II—3 cr. (2 and 3) S
Basic soil-water-plant relationships are used to establish criteria for the analysis and design of facilities and structures for conservation, water control, drainage and irrigation. Engineering relationships involved in the design of such facilities are emphasized. Prerequisite: Math 208 and EM 320.

AGE 431—AGRICULTURAL STRUCTURES DESIGN—3 cr. (2 and 3) F, '71 and alternate years.
Analytic and synthetic design of building components, including fastening devices, as determined by both live and dead loads with emphasis on statically determinant members and their positions and utilization in frames and trusses. Major materials considered are wood, steel and concrete. Corequisite: EM 304.

AGE 442—AGRICULTURAL PROCESS ENGINEERING—3 cr. (2 and 3) S, 72 and alternate years.
Design of unit operations components used in agricultural processing. Engineering principles and instrumentation as applied to control systems, heat transfer, materials handling, storage and related subjects are emphasized. Prerequisite: ME 311 and EE 308.

AGE 465—ENGINEERING PROPERTIES OF BIOLOGICAL MATERIALS—3 cr. (2 and 3) S, '73 and alternate years.
The thermal, electrical, mechanical, and chemical characteristics of biological materials, organisms, and metabolic processes are studied in relationship to engineering analysis and synthesis. The effects of environmental factors imposed by engineering processes are evaluated. Prerequisite: Math 208, EM 304, Biol 101.

AGE 471—UNDERGRADUATE RESEARCH—1 cr. (0 and 3) F
A course to acquaint senior students in Agricultural Engineering with the scientific method. Literature investigations, planning and executing of an experiment are integral parts of the course. Prerequisite: Senior standing in Agricultural Engineering.

AGE 473—SPECIAL TOPICS IN AGRICULTURAL ENGINEERING—3 cr. (3 and 0)
A comprehensive study of special topics in the field of agricultural engineering not covered in other courses. Special emphasis will be placed on independent pursuit of detailed investigations.

AGE H473—SPECIAL TOPICS IN AGRICULTURAL ENGINEERING—3 cr. (3 and 0) Honors section of AGE 473; admission by invitation.

AGE 616—AGRICULTURAL MACHINERY DESIGN—3 cr. (2 and 3)
AGE 622—SOIL AND WATER RESOURCES ENGINEERING II—3 cr. (2 and 3)
AGE 631—AGRICULTURAL STRUCTURAL DESIGN—3 cr. (2 and 3)
AGE 642—AGRICULTURAL PROCESS ENGINEERING—3 cr. (2 and 3)
AGE 652—FARM POWER—3 cr. (2 and 3)
AGE 660—FARM AND HOME UTILITIES—3 cr. (2 and 3)
AGRICULTURE

Associate Professors: J. B. Cooper, M. W. Jutras, G. R. von Tungeln

Assistant Professors: R. K. DeHaven, B. J. Skelton

AGRIC 101—INTRODUCTION TO AGRICULTURE—3 cr. (1 and 3) F, S

Guides to effectively study; agricultural sciences; scope of the agricultural industry; agriculture of South Carolina and the United States; organization and function of the land-grant institution and other agencies serving agriculture; career opportunities.

AGRIC 201—INTRODUCTION TO ANIMAL INDUSTRIES—3 cr. (2 and 3) F, S

Fundamental and descriptive aspects of the animal industries as applied biology and major segments of food production and distribution systems. The subject matter will be presented by Animal Science, Dairy Science and Poultry Science Departments.

AGRIC 202—INTRODUCTION TO PLANT SCIENCES—3 cr. (2 and 3) F, S

A fundamental course in plant sciences, including Agronomic and Horticultural crops of the major agricultural areas of the world, and emphasizing the crops of South Carolina. Included in the laboratory exercises are applications of the basic biological concepts of morphology, heredity, physiology and ecology to the production of food, fiber and ornamentals for an expanding population. The laboratory exercises are mostly self-tutorial; the students take the labs on their own, anytime during the semester at their own discretion.

AGRIC 301—INTERNATIONAL AGRICULTURE—3 cr. (3 and 0) F

This course is designed to acquaint the student with current international agriculture. Topics covered include: international agricultural production and
consumption patterns, stage of agricultural and industrial development in various countries of the world, current and projected future production-consumption-population balance, world trade patterns in agricultural products, world agricultural marketing problems (including tariffs, balance of trade, import quotas, and common markets). Also included are allied subjects such as population trends and agricultural mechanization.

**Agric 401—International Agriculture Seminar—1 cr. (1 and 0) S**

This seminar will be directed toward current topics in international agriculture. Seminar speakers will include invited guests from such agencies as the Foreign Agricultural Service, the Food and Agriculture Organization, The Ford Foundation, the Rockefeller Foundation, and the Agency for International Development. Other speakers will include staff members in the College of Agriculture and Biological Sciences that have had foreign assignments in their professional fields. Some sessions will be devoted specifically to employment opportunities in international agriculture.

**AGRONOMY—CROPS AND SOILS**

*Professors: G. R. Craddock, C. M. Jones, U. S. Jones, Head; T. C. Peele*

*Associate Professors: E. B. Eskew, M. W. Jutras, K. S. LaFleur, B. J. Gossett*

*Assistant Professors: W. D. Graham, J. D. Maxwell, C. E. Rieck, J. R. Woodruff*

**Agron 202—Soils—3 cr. (2 and 2) F, S**

A basic foundation in soil science is presented with emphasis on the chemical and physical properties of soil, the activities of the living soil organisms, and the origin and classification of soils. **Prerequisite:** Ch 101 and 102 or a geology sequence including Geol 201 or permission of the instructor.

**Agron 301—Fertilizers—3 cr. (3 and 0) F**

Mining, manufacture, and properties of minerals and chemicals that are sources of elements essential for plant growth. How these elements are taken by roots from the soil and converted to plants for food, fiber, shelter, and ornamentals.

**Agron 308—Soil and Plant Analysis—3 cr. (1 and 6) S**

A laboratory study of the physical and chemical properties of soils and methods of their determination. The relation of these properties to the potential fertility and management of soils is emphasized. Methods of plant analysis and the use of plant analysis data as a diagnostic tool in plant nutrition is also studied. **Prerequisite:** Agron 202.

**Agron 320—Forage and Pasture Crops—3 cr. (3 and 0) S**

The characteristics, establishment, utilization and maintenance of crops for hay, silage, and pasture. Crops valuable in South Carolina are emphasized. **Prerequisite:** Agric 202, Agron 202 or consent of instructor.

**Agron 322—Forage Crops Laboratory—1 cr. (0 and 2) S**

Identification, rating, and management of the important forage and pasture species of the Southeast. Research methodology is emphasized and a research problem required. **Prerequisite:** Agric 202.
Agronomy 241

Agron 403—Soil Genesis and Classification—2 cr. (1 and 3) F
Theoretical and practical phases of soil survey, formation and classification in relation to land usage and plant adaptability. Prerequisite: Agron 202 or consent of instructor.

Agron 405—Plant Breeding—3 cr. (2 and 2) S
The application of genetic principles to the development of improved crop plants. Principal topics include the genetic and cytogenetic basis of plant breeding, mode of reproduction, techniques in selfing and crossing, methods of breeding, inheritance in the major crops, and biometrical methods. Prerequisite: Gen 302.

Agron 407—Principles of Weed Control—3 cr. (2 and 2) F
Weeds, their introduction, ecology, methods of reproduction, dissemination, and control; chemistry and mode of action of herbicides, equipment and techniques of application; a characterization of the common weeds of the Southeast. Prerequisite: Agron 202, Agron 202 or consent of instructor.

Agron 410—Cotton and Other Fiber Crops—2 cr. (2 and 0) F, '71 and alternate years.
History, morphology, physiology, and fundamental principles and practices of production, harvesting, marketing, processing, and utilization of cotton and certain other fiber crops. Emphasis will be placed on the effect of environmental and production factors as they affect fiber quality and subsequent utilization. Prerequisite: Agron 202, Agron 202 or consent of instructor.

Agron 411—Grain Crops—2 cr. (2 and 0) F, '72 and alternate years.
A fundamental study involving principles of production, harvesting, processing, marketing, and utilization of soybeans, corn, sorghum, and the small grains. Emphasis will be placed on factors affecting grain quality as related to utilization of grain. Prerequisite: Agron 202, Agron 202 or consent of instructor.

Agron 412—Tobacco and Special Use Crops—2 cr. (2 and 0) S, '72 and alternate years.
Principles involved in the production, harvesting, curing, grading and marketing of high quality flue-cured tobacco. Brief coverage of special use crops, such as peanuts, sugar cane, etc. Prerequisite: Agron 202, Agron 202 or consent of instructor.

Agron 452—Soil Fertility and Management—2 cr. (2 and 0) S
Principles of crop rotations, soil fertility, soil management, and other factors necessary for the practical utilization of soils. Prerequisite: Agron 202 or consent of instructor.

Agron 455—Seminar—1 cr. (1 and 0) F
Student presentation of current agronomic topics of special interest in crop production appearing in recent scientific journals and other publications.

Agron 456—Seminar—1 cr. (1 and 0) S
Student presentation of current topics of special interest in the field of soil science appearing in recent scientific journals and other publications.

Agron 601—Fertilizers—3 cr. (3 and 0)
Agron 603—Soil Genesis and Classification—2 cr. (1 and 3)
Agron 608—Soil and Plant Analysis—3 cr. (1 and 6)
Agron 605—Plant Breeding—3 cr. (2 and 2)
Agron 607—Principles of Weed Control—3 cr. (2 and 2)
Agron 610—Cotton and Other Fiber Crops—2 cr. (2 and 0)
Agron 611—Grain Crops—2 cr. (2 and 0)
Agron 612—Tobacco and Special Use Crops—2 cr. (2 and 0)
Agron 620—Forage and Pasture Crops—3 cr. (3 and 0)
Agron 622—Forage Crops Laboratory—1 cr. (0 and 2)
Agron 652—Soil Fertility and Management—2 cr. (2 and 0)
Agron 655—Seminar—1 cr. (1 and 0)
Agron 656—Seminar—1 cr. (1 and 0)
Agron 801—Crop Physiology and Nutrition—3 cr. (3 and 0)
Agron 802—Pedology and Soil Classification—3 cr. (2 and 3)
Agron 804—Theory and Methods of Plant Breeding—3 cr. (3 and 0)
Agron 805—Soil Fertility—3 cr. (3 and 0)
Agron 806—Special Problems—Credit to be arranged—1-3 cr.
Agron 807—Soil Physics—3 cr. (2 and 3)
Agron 808—Soil Chemistry—3 cr. (2 and 3)
Agron 812—Crop Ecology and Land Use—3 cr. (3 and 0)
Agron 820—Pesticide Residues in the Environment—3 cr. (3 and 0)
Agron 825—Seminar—1 cr. (1 and 0)
Agron 891—Research—Credit to be arranged.
Agron 991—Doctoral Research and Thesis—Credit to be arranged.

Animal Physiology

Assistant Professors: Ruth L. Hays, J. E. Jones, J. C. McConnell, Jr.
Visiting Professor: D. R. Lamond

(See courses listed under Animal Science, Dairy Science, Entomology, Poultry Science, and Zoology)

An Ph 801—Electron Microscopy of Animal and Plant Tissues—3 cr. (1 and 6)
An Ph 802—Vertebrate Physiology—3 cr. (2 and 3)
An Ph 803—Animal Physiology—4 cr. (3 and 3)
An Ph 804—Animal Physiology—4 cr. (3 and 3)
An Ph 805—Pharmacology—3 cr. (2 and 3)
An Ph 806—Experimental Animal Physiology—3 cr. (1 and 6)
AN Ph 807—Special Problems in Animal Physiology—1-3 cr.
AN Ph 808—Mammalian and Avian Endocrinology—3 cr. (3 and 0)
AN Ph 851—Animal Physiology Seminar I—1 cr. (1 and 0)
AN Ph 852—Animal Physiology Seminar II—1 cr. (1 and 0)
AN Ph 991—Doctoral Research—Credit to be arranged.

ANIMAL SCIENCE

Professors: W. C. Godley, R. R. Ritchie, R. F. Wheeler, Head
Associate Professors: R. L. Edwards, J. R. Hill, Jr., G. C. Skelley
Assistant Professors: D. L. Handlin, J. C. McConnell, Jr.

AN Sc 201—Introduction to Animal Science—2 cr. (2 and 0)
This course deals with basic principles concerning the breeding, feeding, management and marketing of beef cattle, swine, sheep and horses.

AN Sc 203—Introduction to Animal Science Laboratory—1 cr. (0 and 3)
A course designed to demonstrate the basic elements of livestock breeding, feeding and management. Beef cattle, swine, sheep and horses will be used. Evaluation of slaughter animals and carcasses is included.

AN Sc 301—Feeds and Feeding—3 cr. (3 and 0) F, S
Feed nutrients, digestion, metabolism of feed stuffs, nutritive ratios, feeding standards, and the balancing of rations. Prerequisite: An Sc 201, 203 or equivalent and Ch 220 or consent of instructor.

AN Sc 303—Feeds and Feeding Laboratory—1 cr. (0 and 3) S
Practical work in mixing and balancing rations and identifying feed stuffs. Prerequisite: An Sc 201, 203 or equivalent and Ch 220 or consent of instructor.

AN Sc 305—Meat Grading and Selection—2 cr. (1 and 3)
F, ’72 and alternate years.
Classification, grading and selection of beef, lamb and pork carcasses and wholesale cuts. Factors influencing quality and value. Students enrolled in this course are eligible to compete in Intercollegiate Meat Judging Contests. Prerequisite: An Sc 201, 203.

AN Sc 306—Livestock Selection and Evaluation—2 cr. (1 and 3) S
Selection, breed characteristics and grading of beef cattle, sheep and swine. Students enrolled in this course are eligible to compete in the Southeastern Intercollegiate Livestock Judging Contest. Prerequisite: An Sc 201, 203.

AN Sc 353—Meats—2 cr. (2 and 0) F
The chemical and physical composition of meat, meat hygiene; nutritive value; curing; freezing; and meat by-products. Prerequisite: An Sc 201, 203.

AN Sc 355—Meats Laboratory—1 cr. (0 and 3) F
The selection and grading of meat animals and carcasses. Practical work in slaughtering of animals and in the cutting, curing and freezing of meats. Emphasis is placed on the identification of wholesale and retail cuts. Prerequisite: An Sc 201, 203.
AN SC 401—BEef PRODUCTION—3 cr. (3 and 0) F
Breeding, feeding, management and grading of beef cattle. Emphasis is placed on year-round grazing. Prerequisite: An SC 301 or consent of instructor.

AN SC 403—BEef PRODUCTION LABORATORY—1 cr. (0 and 3) F
Practical application of beef production practices. Prerequisite: An SC 301 or consent of instructor.

AN SC 405—ADVANCED LIVestock SELECTIon AND EVALUAtIon—1 cr. (0 and 3) F, '71 and alternate years.
A continuation of An SC 306 for students who are interested in participating in judging contests or in receiving special training in the selection of breeding cattle, sheep and swine. Judging and grading of market classes are considered. Prerequisite: An SC 306.

AN SC 406—SEmInAR—2 cr. (2 and 0) S
Special problems in animal production. Each student is given a subject on which he makes weekly reports before a seminar group. Prerequisite: An SC 301 or consent of instructor.

AN SC 407—HORse AND SHEEP PRODUCTION—2 cr. (2 and 0) F, '72 and alternate years.
The breeding, feeding and care of horses and sheep; the shearing and marketing of sheep and wool; the adaptability of breeds; and parasite and disease control. Prerequisite: An SC 301 or consent of instructor.

AN SC 408—PORk PRODUCTION—3 cr. (3 and 0) S
Feeding, breeding, management, and marketing of hogs. Emphasis is placed on winter and summer forages, protein supplements, mineral mixtures, and sanitation practices. In laboratory grading, selection, feeding, management and care of swine is given attention. Prerequisite: An SC 301 or consent of instructor.

AN SC 409—HORse AND SHEEP PRODUCTION LABORATORY—1 cr. (0 and 3) F, '72 and alternate years.
Horse and sheep production practices. Prerequisite: An SC 301 or consent of instructor.

AN SC 410—PORk PRODUCTION LABORATORY—1 cr. (0 and 3) S
Practical application of swine production practices. Prerequisite: An SC 301 or consent of instructor.

AN SC 452—AniMAl BREeding—3 cr. (3 and 0) S
The fundamental principles relating to the breeding and improvement of livestock including variation, heredity, selection, linebreeding, inbreeding, crossbreeding and other related subjects. Prerequisite: Gen 302.

AN SC 601—BEef PRODUCTION—3 cr. (3 and 0)
AN SC 603—BEef PRODUCTION LABORATORY—1 cr. (0 and 3)
AN SC 605—PORk PRODUCTION—3 cr. (3 and 0)
AN SC 610—PORk PRODUCTION LABORATORY—1 cr. (0 and 3)
AN SC 652—AniMAl BREeding—3 cr. (3 and 0)
AN SC 802—TOpical PROBLEMS—1-3 cr. (1-3 and 0)
AN SC 803—MEat TECHNOLOGY—3 cr. (3 and 0)
AN SC 804—METHODS IN ANIMAL BREEDING—3 cr. (3 and 0)
AN SC 805—NUTRITION OF MEAT ANIMALS—3 cr. (3 and 0)
AN SC 891—Research—Credit to be arranged.

ARCHITECTURE

Assistant Professors: K. E. Carpenter, J. McN. Clement, J. Dalton, F. K. Mooney, J. R. Washburn

Lecturers: S. Carter, K. R. Craig, F. P. Morris
Visiting Professors: M. L. Cetto, M. A. Clark

Visiting Associate Professor: B. D. Bray

ARCH 101—An Introduction to Art and Architecture—3 cr. (0 and 9)
Studies of architecture and the visual arts with adjunct studio exercises.

ARCH 102—An Introduction to Art and Architecture—3 cr. (0 and 9)
Studies of architecture and the visual arts with adjunct studio exercises.

Prerequisite: Arch 101.

ARCH Const 141—Elements of Building I—4 cr. (2 and 6)
An introduction to the principles of building construction. Exercises in graphics, slide rule, print reading and interpretation. Lectures in building materials, building codes, safety, and basic construction methods.

ARCH Const 142—Elements of Building II—4 cr. (2 and 6)
A continuation of Arch Const 141. Prerequisite: Arch Const 141.

ARCH Const 143—Elements of Building I—2 cr. (2 and 0)
An introduction to the principles of building construction; lectures in building materials, building codes, safety, and basic construction methods.

ARCH Const 144—Elements of Building II—2 cr. (2 and 0)
A continuation of Arch Const 143. Prerequisite: Arch Const 143.

ARCH Const 241—Elements of Building III—4 cr. (2 and 6)
Interpretation and analysis of working drawings and specifications of selected building projects. Principles of estimating procedures with emphasis on quantity surveys and construction organization and planning. Prerequisite: Arch Const 142.

ARCH Const 242—Elements of Building IV—4 cr. (2 and 6)
Continuation of Arch Const 241. Prerequisite: Arch Const 241.

ARCH 253—Basic Design I—4 cr. (0 and 12)
Studio problems in visual fundamentals, including graphic representations and adjunct lectures in visual theory. Prerequisite: Arch 102; corequisite: Math 206.

* On leave.
ARCH 254—ARCHITECTURAL DESIGN II—4 cr. (0 and 12)
Studio problems in the elements of architecture, basic site development, and three-dimensional representation. Prerequisite: Arch 253; corequisite: EM 201.

ARCH 302—ART AND ARCHITECTURE TOUR—3 cr. (3 and 0)
A tour of selected cities, either foreign or American, will be organized periodically primarily in a Summer Session. The purpose of the tour is to provide students with firsthand experience with the dynamic qualities of original works of painting and sculpture and especially the spatial qualities of architecture and the relationships of great works of architecture to their environment. The tour will be accompanied by lectures and will require examinations and/or reports.

ARCH 303—THE EVOLUTION OF THE VISUAL ARTS—3 cr. (3 and 0)
A consideration of man’s necessity for and development of the Visual Arts with particular attention to the environmental factors in society which demand Art as a medium of communication. Illustrated lectures and collateral reading. Not open, except by special permission, to students in the College of Architecture. Preference to students in Education. Prerequisite: Sophomore standing.

ARCH 304—THE EVOLUTION OF THE ENVIRONMENTAL ARTS—3 cr. (3 and 0)
A consideration of man’s necessity for and development of the Environmental Arts (Architecture, Landscape Architecture, City and Regional Planning) with particular attention to the Total Environment of Man and its demands and restrictions upon the architect and planner. Illustrated lectures and collateral reading. Not open, except by special permission, to students in the College of Architecture. Preference to students in Education. Prerequisite: Arch 303 or special permission of instructor.

ARCH 315—ARCHITECTURAL HISTORY I—3 cr. (3 and 0)
The architectural history of Western man from 1500 B.C. to A.D. 323, with particular attention to Egypt, Greece, Mesopotamia, and Rome.

ARCH 316—ARCHITECTURAL HISTORY II—3 cr. (3 and 0)
The architectural history of Europe and the Near East from A.D. 323 to 1453, with particular attention to the Byzantine, pre-Romanesque, Romanesque, and Gothic schools of Western Europe. Prerequisite: Arch 315.

ARCH 331—ARCHITECTURAL APPLICATIONS OF COMPUTER SCIENCE—2 cr. (2 and 0)
A two-semester course sequence, including computer theory and programming. Architectural applications of the computer as a resource will be studied; including use in problem solving in functional relationships of space, materials performance specifications, structural design and graphic usage.

ARCH 332—ARCHITECTURAL APPLICATIONS OF COMPUTER SCIENCE—2 cr. (2 and 0)
A continuation of Arch 331. Prerequisite: Arch 331.

ARCH Const 341—BUILDING CONSTRUCTION I—4 cr. (2 and 6)
A study of building construction projects with emphasis on labor relations and jurisdiction, job planning, scheduling, and project control. Prerequisite: Arch Const 242.
ARCH Const 342—Building Construction II—4 cr. (2 and 6)
A continuation of Arch Const 341. Prerequisite: Arch Const 341.

ARCH 353—Architectural Design III—5 cr. (0 and 15)
Intermediate architectural design problems involving programming and considerations of function, structure and aesthetics. Prerequisite: Arch 254; corequisite: EM 304.

ARCH 354—Architectural Design IV—5 cr. (0 and 15)
Continuation of Arch 353. Prerequisite: Arch 353; corequisite: CE 301.

ARCH 415—Architectural History III—3 cr. (3 and 0)
The architectural history of Western Europe and the Americas from 1453 to 1775, with particular attention to the Renaissance, Baroque, and Revivalist schools. Prerequisite: Arch 316.

ARCH 416—Architectural History IV—3 cr. (3 and 0)
The architectural history of Western Europe and the Americas from 1775 to 1915 with particular attention to the architecture of the Industrial Revolution and the development of the academies. Prerequisite: Arch 415.

ARCH Const 432—Concrete Formwork—2 cr. (2 and 0)
The study of materials, methods, design and estimating of formwork for concrete structures. Prerequisite: CE 301.

ARCH Const 441—Building Construction III—4 cr. (2 and 6)
A study of contractor organization and administration including contracts, insurance, bonds, financing, equipment, office procedures, and records. Prerequisite: Arch Const 342.

ARCH Const 442—Building Construction IV—4 cr. (2 and 6)
A continuation of Arch Const 441. Prerequisite: Arch Const 441.

ARCH 453—Architectural Design V—5 cr. (0 and 15)
Consideration of design problems involving programming of urban structures with adjunct lectures in design principles, construction and theory. Prerequisite: Arch 354; corequisite: CE 302.

ARCH 454—Architectural Design VI—5 cr. (0 and 15)
Continuation of Arch 453. Prerequisite: Arch 453; corequisite: CE 402.

ARCH 490—Directed Studies—1 to 5 cr.
Comprehensive studies and research of special topics not covered in other courses. Emphasis will be placed on field studies, research activities, and current developments in architecture.

ARCH 503—Seminar in the Analysis and Criticism of Architectural and Town Building Works—3 cr. (3 and 0)
A seminar in the analysis and criticism of architectural and town building works. The course sequence will include historic and contemporary examples, literary searches, field trips, essays and oral reports. Fourth-year-design standing or permission of instructor.
ARCH 517—STUDIES IN THE ART AND ARCHITECTURE OF THE ANCIENT WORLD I—3 cr. (3 and 0) F

A consideration of the visual arts and architectural monuments of the Ancient World (Egypt, the Near East, Greece and Rome), with a study in depth of selected examples from the period. Prerequisite: Arch 315, 316, 415, 416, or Arch 303, 304 and Hist 171, 172, 173, all with a grade of “B” or better.

ARCH 518—STUDIES IN THE ART AND ARCHITECTURE OF THE ANCIENT WORLD II—3 cr. (3 and 0) S

A consideration of the visual arts and architectural monuments of the Ancient World (Egypt, the Near East, Greece and Rome), with a study in depth of selected examples from the period. Prerequisite: Arch 517, or with the permission of the instructor and the prerequisites for Arch 517.

ARCH 519—STUDIES IN THE ART AND ARCHITECTURE OF THE EARLY MIDDLE AGES I—3 cr. (3 and 0) F

A consideration of the visual arts and architectural monuments of the Early Middle Ages (Byzantium and Western Europe from the 4th through 12th Centuries), with a study in depth of selected examples from the period. Prerequisite: Arch 315, 316, 415, 416, or Arch 303, 304 and Hist 171, 172, 173, all with a grade of “B” or better.

ARCH 520—STUDIES IN THE ART AND ARCHITECTURE OF THE EARLY MIDDLE AGES II—3 cr. (3 and 0) S

A consideration of the visual arts and architectural monuments of the Early Middle Ages (Byzantium and Western Europe from the 4th through 12th Centuries), with a study in depth of selected examples from the period. Prerequisite: Arch 519, or with the permission of the instructor and the prerequisites for Arch 519.

ARCH 521—STUDIES IN THE ART AND ARCHITECTURE OF THE LATE MIDDLE AGES I—3 cr. (3 and 0) F

A consideration of the visual arts and architectural monuments of the Late Middle Ages (Western Europe from the 12th to the 15th Centuries), with a study in depth of selected examples from the period. Prerequisite: Arch 315, 316, 415, 416, or Arch 303, 304 and Hist 171, 172, 173, all with a grade of “B” or better.

ARCH 522—STUDIES IN THE ART AND ARCHITECTURE OF THE LATE MIDDLE AGES II—3 cr. (3 and 0) S

A consideration of the visual arts and architectural monuments of the Late Middle Ages (Western Europe from the 12th to the 15th Centuries), with a study in depth of selected examples from the period. Prerequisite: Arch 521, or with the permission of the instructor and the prerequisites for Arch 521.

ARCH 523—STUDIES IN THE ART AND ARCHITECTURE OF THE RENAISSANCE I—3 cr. (3 and 0) F

A consideration of the visual arts and architectural monuments of the Renaissance (Western Europe from the 15th through the 18th Centuries), with a study in depth of selected examples from the period. Prerequisite: Arch 315, 316, 415, 416, or Arch 303, 304 and Hist 171, 172, 173, all with a grade of “B” or better.
ARCH 524—STUDIES IN THE ART AND ARCHITECTURE OF THE RENAISSANCE II—3 cr. (3 and 0) S
A consideration of the visual arts and architectural monuments of the Renaissance (Western Europe from the 15th through the 18th Centuries), with a study in depth of selected examples from the period. Prerequisite: Arch 523, or with the permission of the instructor and the prerequisites for Arch 523.

ARCH 525—STUDIES IN THE ART AND ARCHITECTURE OF THE TECHNOLOGICAL REVOLUTION I—3 cr. (3 and 0) F
A consideration of the visual arts and architectural monuments of the Technological Revolution (Western Europe and America from 1685 to 1935), with a study in depth of selected examples from the period. Prerequisite: Arch 315, 316, 415, 416, or Arch 303, 304 and Hist 171, 172, 173, all with a grade of "B" or better.

ARCH 526—STUDIES IN THE ART AND ARCHITECTURE OF THE TECHNOLOGICAL REVOLUTION II—3 cr. (3 and 0) S
A consideration of the visual arts and architectural monuments of the Technological Revolution (Western Europe and America from 1685 to 1935), with a study in depth of selected examples from the period. Prerequisite: Arch 525, or with the permission of the instructor and the prerequisites for Arch 525.

ARCH 527—STUDIES IN THE DEVELOPMENT OF ARCHITECTURAL TECHNOLOGY I—3 cr. (3 and 0) F
A consideration of the development of architectural technology from ancient through contemporary times with a study in depth of selected examples from each period. Prerequisite: Open to students who have completed Architectural History I-IV and to other students with senior standing and permission of the instructor.

ARCH 528—STUDIES IN THE DEVELOPMENT OF ARCHITECTURAL TECHNOLOGY II—3 cr. (3 and 0) S
A consideration of the development of architectural technology from ancient through contemporary times with a study in depth of selected examples from each period. Prerequisite: Open to students who have completed Architectural History I-IV and to other students with senior standing and permission of the instructor.

ARCH 529—STUDIES IN THE ART AND ARCHITECTURE OF INDIA AND THE FAR EAST I—3 cr. (3 and 0) F
A consideration of the visual arts and architectural monuments of India and the Far East, with a study in depth of selected examples from the period. Prerequisite: Arch 315, 316, 415, 416, or Arch 303, 304 and Hist 171, 172, 173, all with a grade of "B" or better.

ARCH 530—STUDIES IN THE ART AND ARCHITECTURE OF INDIA AND THE FAR EAST II—3 cr. (3 and 0) S
A consideration of the visual arts and architectural monuments of India and the Far East, with a study in depth of selected examples from the period. Prerequisite: Arch 529, or with the permission of the instructor and the prerequisites for Arch 529.

ARCH 533—ADVANCED ARCHITECTURAL STRUCTURES—4 cr. (1 and 9)
A course in the synthesis of advanced architectural construction and structural analysis. Prerequisite: Arch 515 and CE 302.
**Description of Courses**

**Arch 575—Mechanical Plant**—2 cr. (2 and 0)

The water supply, plumbing, heating and ventilating systems of present-day buildings.

**Arch 576—Mechanical Plant**—2 cr. (2 and 0)

Air-conditioning, electrical systems, lighting, mechanical transportation and acoustics as applied to contemporary buildings. **Prerequisite:** Arch 575.

**Arch 581—Architectural Office Practice**—2 cr. (2 and 0)

General consideration of architectural office procedure. Study of the professional relationship of the architect to client and contractor, including problems of ethics, law, and business.

**Arch 582—Architectural Office Practice**—2 cr. (2 and 0)

A continuation of Arch 581. **Prerequisite:** Arch 581.

**Arch 591—Architectural and Town Planning Design**—11 cr. (5 and 18)

Lectures and studio problems in advanced architectural design and Town Planning. Course content will include pre-thesis studies. **Prerequisite:** Arch 452 with C standing.

**Arch 592—Architectural Thesis**—11 cr. (5 and 18)

The student working individually will carefully program an environmental problems of appropriate scope, and conduct his own comprehensive research. He will make a complete oral, written and visual presentation of his solution. **Prerequisite:** Arch 591.

**Arch 593—Structural Thesis Research**—5 cr. (0 and 15)

Studio and laboratory research studies preliminary to undertaking a thesis in Architectural Structures. **Prerequisite:** Arch 553.

**Arch 594—Thesis in Architectural Structures**—11 cr. (5 and 18)

The student working individually with laboratory and lecture support will prepare and present a structural thesis of appropriate scope and complexity. **Prerequisite:** Arch 593.

**Arch 611—Directed Research in Art History**—3 cr. (3 and 0)

**Arch 612—Directed Research in Art History**—3 cr. (3 and 0)

**Arch 615—Construction Methods**—2 cr. (2 and 0)

**Arch 853—Graduate Architectural Design**—8 cr. (3 and 15)

**Arch 854—Graduate Architectural Design**—8 cr. (3 and 15)

**Arch 855—Thesis Research**—2 cr. (0 and 6)

**Arch 857—Graduate Architectural Design**—10 cr. (4 and 18)

**Arch 858—Architectural Thesis**—17 cr. (5 and 36)

**Arch 861—Economic Seminars**—3 cr. (3 and 0)

**Arch 875—Mechanical Plant**—2 cr. (2 and 0)

**Arch 876—Mechanical Plant**—2 cr. (2 and 0)

**Arch 881—Architectural Office Practice**—2 cr. (2 and 0)

**Arch 882—Architectural Office Practice**—2 cr. (2 and 0)

**Arch 890—Directed Studies**—1-5 cr.
BIOCHEMISTRY

(See also Biology)

Professors: J. H. Mitchell, Jr., W. P. Williams, Jr.

Assistant Professors: L. Crook, J. J. Jen

(See biochemistry courses listed under Chemistry)

Bioch 301—Molecular Biology—3 cr. (3 and 0) F
An introduction to the nature, production, and replication of biological structure at the molecular level, and its relation to function. Prerequisite: Organic chemistry.

Bioch 406—Physiological Chemistry—4 cr. (3 and 3) S
Chemistry of the physiological processes of respiration, digestion, membrane transport, blood and tissue homeostasis, and kidney function is studied. Current literature on these processes is studied and interpretations discussed. Prerequisite: Ch 310 or Bioch 423.

Bioch 423—Principles of Biochemistry—3 cr. (3 and 0)
The study of the organic chemistry of amino acids, monosaccharides, fatty acids, purines, pyrimidines and associated compounds leads to a fuller understanding of the chemical properties of proteins, carbohydrates, lipids, and nucleic acids that made them so important in biological processes. Relationships between the structure and function of these molecules and the modern techniques used to establish them are stressed. Prerequisite: Ch 224 or equivalent.

Bioch 424—Principles of Biochemistry—3 cr. (3 and 0)
A continuation of Bioch 423.

Bioch 425—General Biochemistry Laboratory—1 cr. (0 and 3)
Experiments selected to illustrate current methods used in biochemical research.

Bioch 426—General Biochemistry Laboratory—1 cr. (0 and 3)
A continuation of Bioch 425.

Bioch 491—Special Problems in Biochemistry—1-3 cr. (0 and 3-9) SS
Orientation, i.e., experimental planning, execution, and reporting in biochemical research. Prerequisite: Senior standing and permission of chairman.

Bioch 606—Physiological Chemistry—4 cr. (3 and 3)
Bioch 623—Principles of Biochemistry—3 cr. (3 and 0)
Bioch 624—Principles of Biochemistry—3 cr. (3 and 0)
Bioch 625—General Biochemistry Laboratory—1 cr. (0 and 3)
Bioch 626—General Biochemistry Laboratory—1 cr. (0 and 3)
Bioch 810—Advanced Biochemical Techniques—3 cr. (1 and 6)
Bioch 815—Lipids—2 cr. (2 and 0)
Bioch 817—Chemistry and Metabolism of Hormones—2 cr. (2 and 0)
Bioch 819—Intermediary Metabolism—3 cr. (3 and 0)
Bioch 820—Nucleic Acids—2 cr. (2 and 0)
Bioch 821—Proteins—2 cr. (2 and 0)
Bioch 822—Enzymes—3 cr. (3 and 0)
Bioch 823—Carbohydrates—2 cr. (2 and 0)
Bioch 851—Biochemistry Seminar—1 cr. (1 and 0)
Bioch 852—Biochemistry Seminar—1 cr. (1 and 0)
Bioch 891—Research—Credit to be arranged.

Bioengineering

Professors: D. W. Bradbury, H. R. Bungay III, R. C. Harshman, L. C. Wilcox, T. T. Yang
Associate Professors: W. B. Barlage, D. F. Bruley, M. J. Eitel, B. E. Gilliland, S. F. Hulbert, Program Coordinator; J. S. Wolf, M. L. Wolla
Assistant Professors: D. C. Amoss, J. J. Klawitter, J. E. Lemons, R. R. Moore, B. W. Sauer
Adjunct Professors: J. R. Pruitt, F. H. Stelling

BioE 301—Engineering Aspects of Biology and Medicine—2 cr. (2 and 0)
The relationships of various branches of engineering to biology and medicine. Structural engineering fluid flow, and mass transfer in living systems. Artificial organs, biomaterials, implants, instrumentation, microbial systems, and other engineering challenges are discussed.

BioE 401—Computers for Bioscientists—1 cr. (1 and 0)
Analog and digital simulation of biochemical and biological processes. Systems approaches, dynamic analysis, interactions between laboratory research and computer models. Prerequisite: One semester of calculus or permission of instructor.

BioE 601—Computers for Bioscientists—1 cr. (1 and 0)
BioE 800—Seminar in Bioengineering—1 cr. (1 and 0)
BioE 801—Biomaterials—3 cr. (3 and 0)
BioE 810—Biochemical Engineering—3 cr. (3 and 0)
BioE 812—Bioelectrochemistry—3 cr. (3 and 0)
BioE 846—Elements of Bioengineering I—3 cr. (3 and 0)
BioE 847—Elements of Bioengineering II—3 cr. (3 and 0)
BioE 850—Special Topics in Biomedical Engineering—3 cr. (3 and 0)
BioE 860—Ecological Models—3 cr. (2 and 3)
BioE 870—Bioinstrumentation—3 cr. (2 and 2)
BioE 891—Research—Credit to be arranged.
Biology 253

BIOE 980—Internship—1-5 cr. (5-0 and 0-40)
BIOE 991—Doctoral Research—Credit to be arranged.

BIOLOGY

(For curriculums and offerings of sections of the Division of Biology see also Biochemistry, Botany, Microbiology, and Zoology)

Professor: R. K. Guthrie, Director

Biol 101—Principles of Biology—3 cr. (3 and 0) F, S, SS
The chemical, structural, and functional principles of living cells. Consideration of the chemical and physical composition of protoplasm as related to the function of this living material in basic biological processes. The principles of genetics, ecology, and evolution.

Biol 450—Biology for High School Teachers—3 cr. (3 and 0) SS
The fundamental principles of biological processes are reviewed and expanded. Demonstrations, preparations, illustrations, and experiments suitable for use in high school teaching are emphasized. Expressly designed for biology teachers in the secondary schools.

Biol 491—Special Problems in Biology—2 cr. (0 and 6) F, S, SS
Research problems in selected biological disciplines to provide initiation to research planning and techniques for biological science majors. Prerequisite: Senior standing and permission of the appropriate section chairman.

Biol 650—Biology for High School Teachers—3 cr. (3 and 0)
Biol 800—Principles of Biology—3 cr. (2 and 3)
Biol 801—Electron Microscopy of Biological Material—3 cr. (3 and 0)

BOTANY

(See also Biology)

Assistant Professors: N. D. Camper, J. E. Fairey III, C. J. Umphlett,
Chairman

Instructor: C. R. Dillon

Bot 102—Principles of Botany—2 cr. (2 and 0) F, S, SS
The application of biological principles to plants as exemplified by the structures and functions of vascular plants. Followed by a survey of the plant kingdom. Prerequisite: Biol 101.

Bot 104—Laboratory Exercises in Botany—1 cr. (0 and 2) F, S, SS
Demonstrations and experiments to illustrate the structures and functions of plants considered in Bot 102.

Bot 145—Environmental Dynamics—2 cr. (2 and 0) F
A non-technical, non-laboratory course designed to instill a sense of appreciation for the finiteness of our planet and the extent to which it may be exploited. Introduction will be made to basic concepts underlying population growth characteristics, genetic adaptations, energy relationships between producers and consumers, the description of pollutants and their causes and effects. A survey will be made of the various types of environments.
Bot 202—Survey of the Plant Kingdom—4 cr. (3 and 3) S
A survey of the major groups of plants, their structure, development, and reproduction. Evolutionary relationships as exemplified by comparisons of body organization and life cycles will be emphasized. Prerequisite: Bot 102.

Bot 352—Plant Physiology—4 cr. (3 and 3) F, S
The relations and processes which have to do with the maintenance, growth and reproduction of plants, including absorption of matter and energy, water relations of the plant, utilization of reserve products and liberation of energy. Prerequisite: Bot 102; Ch 101 and 102; Phys 207 or Phys 211 and 213.

Bot H352—Plant Physiology—4 cr. (3 and 3) F, S
Honors option for Bot 352, admission by special arrangement.

Bot 355—Histology—2 cr. (0 and 6)
The principles of fixing, cutting and staining plant tissues and the various other processes of micro-technique and their application to specific forms of plants with emphasis on the flora of South Carolina. Prerequisite: Bot 102.

Bot 356—Taxonomy of Vascular Plants—3 cr. (1 and 6) S
The identification, classification, distribution and interrelationship of vascular plants with emphasis on the flora of South Carolina. Prerequisite: Bot 101.

Bot H356—Taxonomy of Vascular Plants—3 cr. (1 and 6) S
Honors option for Bot 356, admission by special arrangement.

Bot 404—Cytology—3 cr. (3 and 0) F, '71 and alternate years.
A detailed consideration of the morphology and ultrastructures of cells. Prerequisite: Bot 352; Zool 102, 104, or permission of instructor.

Bot H404—Cytology—3 cr. (3 and 3) F, '71 and alternate years.

Bot 406—Plant Anatomy—3 cr. (2 and 3) F, '70 and alternate years.
The origin and development of the organs and tissue systems of vascular plants and a comparative study of the structure of roots, stems, leaves, flowers, and fruits. Prerequisite: Bot 102.

Bot H406—Plant Anatomy—3 cr. (2 and 3) F, '70 and alternate years.
Honors option for Bot 406, admission by special arrangement.

Bot 451—Morphology of the Fungi—3 cr. (2 and 3) F, '70 and alternate years.
The morphology and taxonomy of the fungi, with special emphasis on species of economic importance. Prerequisite: Bot 102.

Bot 455—Vascular Plant Morphology—3 cr. (2 and 3) S
Consideration of the structure, reproduction, and phylogenetic relationships of representative vascular plants. Prerequisite: Bot 102 and 202.

Bot 457—Phycology—3 cr. (2 and 3) S, '71 and alternate years.
The taxonomy, morphology, and ecology of freshwater algae with emphasis on the local flora. Prerequisite: Bot 102 or permission of instructor.

Bot H457—Phycology—3 cr. (2 and 3) S, '71 and alternate years.
Honors option for Bot 457, admission by special arrangement.

Bot 459—Plant Ecology—3 cr. (2 and 3) S
The fundamental principles of the relations between plants and their environment. Although autecology is discussed, the basic emphasis throughout the course is synecology. Prerequisite: Bot 102.
Bot H459—Plant Ecology—3 cr. (2 and 3) S
The honors option of Bot 459. Admission by special arrangement.
Bot 604—Cytology—3 cr. (3 and 0)
Bot 606—Plant Anatomy—3 cr. (2 and 3)
Bot 651—Morphology of the Fungi—3 cr. (2 and 3)
Bot 652—Plant Physiology—4 cr. (3 and 3)
Bot 656—Taxonomy of Vascular Plants—3 cr. (1 and 6)
BFT 657—Phycology—3 cr. (2 and 3)
Bot 659—Plant Ecology—3 cr. (2 and 3)
Bot 802—Mycology—4 cr. (3 and 3)
Bot 805—Special Problems in Botany—Credit to be arranged.
Bot 807—Seminar—1 cr. (1 and 0)
Bot 811—Inorganic Plant Metabolism—4 cr. (3 and 3)
Bot 812—Organic Plant Metabolism—3 cr. (3 and 0)
Bot 813—Plant Growth and Development—3 cr. (3 and 0)
Bot 821—Plant Taxonomy I—4 cr. (2 and 6)
Bot 822—Plant Taxonomy II—4 cr. (2 and 6)
Bot 891—Research—Credit to be arranged.
Bot 991—Doctoral Research—Credit to be arranged.

CERAMIC ARTS

Professor: G. C. Robinson

Cr Ar 101—Pottery Materials—3 cr. (2 and 3)
The occurrence and properties of pottery raw materials. Attention is devoted to the occurrence of natural pottery materials in South Carolina, and the methods and equipment used in preparing these materials.

Cr Ar 102—Pottery Drying and Firing—3 cr. (3 and 0)
The drying and firing processes used in pottery making. A discussion is included on the design and construction of simple pottery kilns and the student is required to build and operate a small outdoor kiln. The laboratory work demonstrates the drying and firing behavior of pottery.

Cr Ar 301—Pottery Glazes—3 cr. (3 and 0)
The materials and methods used in preparing glazes and a study of the methods used in decorating pottery products. Prerequisite: Cr Ar 101 and 102.

Cr Ar 401—Advanced Pottery—3 cr. (2 and 3)
The student is given advanced training in pottery techniques and pottery equipment. Prerequisite: Cr Ar 101 and 102.
CERAMIC ENGINEERING

Professors: G. C. Robinson, Head; H. H. Wilson
Associate Professors: W. W. Coffeen, C. C. Fain, H. G. Lefort

CrE 201—Introduction to Ceramic Engineering—2 cr. (2 and 0)
An introduction to ceramic engineering together with a study of ceramic forming operation. Exercises are provided in the analysis of processing problems, the evaluation of background information and the creation of new solutions to processing problems.

CrE 202—Ceramic Materials—3 cr. (3 and 0)
The properties and uses of commonly used ceramic materials. Equilibrium diagrams are used to gain an understanding of the effect of heat on the materials.

CrE 204—Laboratory Procedures—1 cr. (0 and 3)
An introduction to ceramic laboratory procedures. Primary consideration will be given to the evaluation of sources of error and significance of measurement in the major ceramic test procedures.

CrE 299—Digital Computation—1 cr. (0 and 3)
An introduction to digital computer programming for students majoring in Ceramic Engineering. Emphasis is placed on the computer languages in use at Clemson University, and their application to the solution of simple problems in ceramic engineering. Prerequisite: Sophomore standing.

CrE 302—Thermo-Chemical Ceramics—3 cr. (3 and 0)
High-temperature equilibrium using the laws of physical chemistry as applied to ceramic systems in both solid and liquid states. An introduction to the crystal chemistry of ceramic raw materials, and the effect of crystalline form on their high-temperature behavior.

CrE 303—Ceramic Products—2 cr. (2 and 0)
The application of ceramic products to a variety of use environments. Refractories, structural ceramics, coated metals and corrosion resistant products are included. The course is for both engineering and non-engineering majors.

CrE 304—Experiment Design—1 cr. (0 and 3)
An exercise in the planning and organization of experiments in the ceramic field.

CrE 306—Fuels Combustion and Heat Transfer—1 cr. (0 and 3)
Combustion devices, the calculation of combustion problems and heat transfer.

CrE 307—Thermal Processing of Ceramics—3 cr. (3 and 0)
The accomplishment of changes in structure and composition through the application of thermal energy. The course includes a study of simultaneous transfer of heat and mass, fluid flow, determinants of rates in a variety of reactions and calculations of the energy requirements to accomplish change in structure or composition.

CrE 309—Research Methods—2 cr. (0 and 6)
The planning and solution of selected research problems.
CrE 310—Introduction to Material Science—3 cr. (3 and 0)
A beginning course in material science designed primarily for engineering students. The course is a study of the relation between the electrical, mechanical and thermal properties of products and the structure and composition of these products. All levels of structure are considered from gross structures easily visible to the eye through electronic structure of atoms.

CrE 320—Experiments in Material Science for Teachers—3 cr. (2 and 3)
Many of the topics in the earth science, physical science, physics and chemistry courses of grammar school and high school have interesting application in research and production of ceramics, metals and polymers. A series of experiments have been developed which support specific topics in grammar and high school science courses. These experiments have been designed to be suitable for use in schools and with equipment usually present in school laboratories. The laboratory part of this course is devoted to providing the students with experience and background in these experiments while the lecture topics include consideration of the thermal, electrical, chemical properties of materials as determined by their composition and structure. This course has been prepared especially for elementary and high school teachers of science.

CrE 402—Solid State Ceramics—3 cr. (3 and 0)
The effects of the composition, form, and shape of ceramic raw materials on the manufacturing processes and final properties of ceramic products. Included are fundamental studies of such phenomena as deflocculation, plasticity, sintering and the behavior of ceramic products in electrical circuits. Prerequisite: Junior standing.

CrE 403—Glasses—3 cr. (3 and 0)
Glass structure and composition and their relation to the properties of glasses. Consideration is given to the processing variables which control the properties of glasses including glass products, enamels, glazes and vitreous bonds.

CrE 404—Ceramic Coatings—3 cr. (3 and 0)
The raw materials, methods of manufacture, and properties of ceramic coatings. Prerequisite: CrE 302.

CrE 406—Ceramic Project—2 cr. (0 and 6)
The completion of an original research into a ceramic problem. Prerequisite: CrE 302.

CrE 407—Plant Design—3 cr. (1 and 6)
The application of the fundamentals of ceramic engineering to problems in plant design. Prerequisite: Senior standing in Ceramic Engineering.

CrE 410—Analytical Processes—3 cr. (2 and 3)
An introductory course on the theory and use of X-ray diffraction and spectroscopic methods. Prerequisite: Junior standing.

CrE 412—Raw Material Preparation—3 cr. (3 and 0)
The equipment and processes used in the crushing and grinding of raw materials, the separation and classification of particle sizes, and the separation and purification of minerals by mineral dressing methods.
CrE 416—Electronic Ceramics—3 cr. (3 and 0)
The theory and measurement of the electronic properties of ceramic products.

CrE 418—Process Control—3 cr. (3 and 0)
Process control techniques and apparatus with particular emphasis on temperature measurement and control systems. The application of laboratory techniques to the control of product quality and process efficiency is included. **Prerequisite:** Junior standing.

CrE 419—Science of Engineering Materials—3 cr. (3 and 0)
This course is planned to acquaint engineers with the thermal, electrical, and chemical characteristics of engineering materials. It emphasizes fundamental consideration of the structure of matter in the solid and glassy states, solid state reactions, and the influence of particle and aggregate structure to speed of reaction and product properties. The reasons for the properties of materials at elevated temperatures and room temperatures are related to these fundamentals.

CrE H419—Science of Engineering Materials—3 cr. (3 and 0)
Same as CrE 419 except that this honors section is open to students only by invitation.

CrE 420—Science of Engineering Materials—3 cr. (3 and 0)
A continuation of CrE 419 with emphasis on applications of fundamentals in nuclear reactors and nuclear power plants. Consideration is given to the development of ceramics for fuel elements, moderator materials, control rods, shielding and in radioactive waste disposal.

CrE 602—Solid State Ceramics—3 cr. (3 and 0)
CrE 603—Glasses—3 cr. (3 and 0)
CrE 604—Ceramic Coatings—3 cr. (3 and 0)
CrE 610—Analytical Processes—3 cr. (2 and 3)
CrE 612—Raw Material Preparation—3 cr. (3 and 0)
CrE 616—Electronic Ceramics—3 cr. (3 and 0)
CrE 618—Process Control—3 cr. (3 and 0)
CrE 619—Science of Engineering Materials—3 cr. (3 and 0)
CrE 620—Science of Engineering Materials—3 cr. (3 and 0)
CrE 807—Specialized Ceramics—3 cr. (3 and 0)
CrE 809—High-Temperature Materials—3 cr. (3 and 0)
CrE 810—Ceramic Engineering Thermodynamics—3 cr. (3 and 0)
CrE 811—Ceramic Engineering Kinetics—3 cr. (3 and 0)
CrE 812—Current Topics in Ceramic Engineering—1 cr. (1 and 0)
CrE 813—Nuclear Ceramics—3 cr. (3 and 0)
CrE 814—Ceramic Physical Processing—3 cr. (3 and 0)
CrE 815—Colloidal and Surface Science—3 cr. (3 and 0)
CrE 816—Constitution and Structure of Glasses—3 cr. (3 and 0)
CrE 821—Analytical Procedures and Equipment I—3 cr. (2 and 3)
CrE 822—ANALYTICAL PROCEDURES AND EQUIPMENT II—3 cr. (2 and 3)
CrE 823—THERMAL PROPERTIES OF CERAMIC MATERIALS—3 cr. (3 and 0)
CrE 824—MECHANICAL PROPERTIES OF CERAMIC MATERIALS—3 cr. (3 and 0)
CrE 825—MAGNETIC AND ELECTRICAL CERAMIC MATERIAL—3 cr. 3 and 0)
CrE 826—CERAMIC COATINGS—3 cr. (3 and 0)
CrE 828—SOLID STATE CERAMIC SCIENCE—3 cr. (3 and 0)
CrE 891—RESEARCH—Credit to be arranged.

CHEMICAL ENGINEERING

Professors: C. E. Littlejohn, Head; F. C. Alley, J. W. Hall, R. C. Harshman

Associate Professors: W. B. Barlage, W. F. Beckwith, D. F. Bruley, J. C. Mullins

Assistant Professor: S. S. Melsheimer

Che 204—INTRODUCTION TO CHEMICAL ENGINEERING I—2 cr. (1 and 3)
Designed to acquaint students with the profession of Chemical Engineering and to introduce them to certain basic concepts and methods used by the chemical engineer. Topics include the chemical engineering literature, graphical methods of presenting data, graphical solutions to problems, fundamental units and dimensions, process variables, stoichiometry, and PVT relations for gases. Prerequisite: Ch 102 and Math 108.

Che 205—INTRODUCTION TO CHEMICAL ENGINEERING II—3 cr. (2 and 3)
A continuation of Ch 204. Topics include properties of mixtures of gases and vapors, material and energy balances, equilibria in chemical systems, dimensional analysis, economic considerations, and an introduction to stagewise calculations involving solvent extraction. Prerequisite: ChE 204.

Che 210—DIGITAL COMPUTATION AND NUMERICAL METHODS—3 cr. (3 and 0)
An introduction to digital computational techniques using a specific procedure oriented language and the use of numerical methods for the solution of chemical engineering problems. The course will introduce students to computational methods to be used in subsequent chemical engineering courses. Prerequisite: ChE 204 and Math 108.

Che 301—UNIT OPERATIONS THEORY I—3 cr. (3 and 0)
The general principles of Chemical Engineering and a study of the following unit operations: Fluid Flow, Fluid Transportation, Heat Transmission and Evaporation. Special emphasis is placed on theory and its practical application to design. Prerequisite: ChE 205, and Junior standing.

Che 302—UNIT OPERATIONS THEORY II—3 cr. (3 and 0)
A study of selected unit operations based on diffusion. Both stagewise and differential contacts are studied for gas absorption, distillation, and gas-liquid contact operations. Prerequisite: ChE 301 and Junior standing.
CHE 306—Unit Operations Laboratory I—1 cr. (0 and 3)
Laboratory work in the unit operations of fluid flow, heat transfer, and evaporation. Stress is laid on the relation between theory and experimental results and on report writing. Prerequisite: CHE 301 and Junior standing.

CHE 307—Analog Computation—1 cr. (0 and 3)
An introduction to the theory and application of electronic analog computers. Prerequisite: Math 208.

CHE 331—Chemical Engineering Thermodynamics I—3 cr. (3 and 0)
A first basic course in static equilibria. Topics include the First and Second Law of Thermodynamics, real and ideal gases, thermodynamic properties of fluids, phase changes, and heats of reaction. Prerequisite: CHE 331, Math 208, and Junior standing; or permission of the Department Head.

CHE H331—Chemical Engineering Thermodynamics—3 cr. (3 and 0)
Honors section of CHE 301; admission by invitation.

CHE 401—Transport Phenomena—3 cr. (3 and 0)
Heat, mass, and momentum transport with emphasis being laid on how the three processes are related. A firmer theoretical foundation is laid for the previous work in unit operations. Prerequisite: CHE 302 and Senior standing.

CHE H401—Transport Phenomena—3 cr. (3 and 0)
Honors section of CHE 401; admission by invitation.

CHE 407—Unit Operations Laboratory II—2 cr. (0 and 6)
Laboratory work for the diffusional unit operations. Competent technical reports are required. Prerequisite: Enrollment in CHE 401 and Senior standing.

CHE 410—Unit Operations Theory III—3 cr. (3 and 0)
A study of simultaneous heat and mass transfer, filtration, crystallization, size reduction, and other less common unit operations.

CHE 415—Introduction to Nuclear Engineering—3 cr. (3 and 0)
Designed to acquaint the non-nuclear engineer with some of the engineering aspects of nuclear science. Topics include a brief survey of particle physics; nuclear reactions; energy transformations; nuclear reactors, their design, construction and use; radiation damage to materials of construction; and special problems in nuclear engineering peculiar to the basic engineering disciplines. Prerequisite: Junior or Senior standing in Engineering, Chemistry or Physics.

CHE 416—Introduction to Nuclear Engineering—3 cr. (3 and 0)
A continuation of CHE 415; topics to include reactor principles, plutonium production, reactor types, materials of reactor construction, control instruments, and waste disposal. Prerequisite: CHE 415.

CHE 421—Process Development, Design, and Optimization of Chemical Engineering Systems I—3 cr. (2 and 3)
A study of the steps in creating a chemical process design from the original concept to successful completion and operation of the plant. Topics include engineering economics, systems analysis, simulation, optimization, process equipment sizing and selection, and the application of analog and digital computers. Prerequisite: Completion of all required 200- and 300-level courses in chemistry, chemical engineering, and mathematics.
CHE 422—Process Development, Design, and Optimization of Chemical Engineering Systems II—3 cr. (0 and 9)
A continuation of CHE 421. The principles of process development, design, and optimization are applied in a comprehensive problem carried from a general statement of the problem to detailed design and economic evaluations. **Prerequisite:** CHE 401, 421, 430, and 450.

CHE 424—Introduction to Industrial Pollution—2 cr. (2 and 0)
An introduction to air and water pollution problems associated with chemical processing transportation, and power generation. Basic processes and mechanisms utilized in the control of liquid and gaseous wastes are discussed from a standpoint of equipment design and economics. Present and future trends in pollution legislation are reviewed. **Prerequisite:** Senior standing in chemical engineering, or permission of instructor.

CHE 425—Chemical Process Engineering—3 cr. (3 and 0)
An advanced treatment of chemical engineering unit operations and unit processes. The course is designed to give the undergraduate more depth in these areas. **Prerequisite:** Permission of the instructor.

CHE 430—Chemical Engineering Thermodynamics II—3 cr. (3 and 0)
A continuation of CHE 331. Subjects include heat engines, compressors, refrigeration, phase equilibria and chemical reaction equilibria. **Prerequisite:** CHE 331 and Senior standing.

CHE 440—Senior Inspection Trip—0 cr.
A three- or four-day trip is made to visit selected chemical plants. Using lectures by plant personnel supplemented by conducted tours of chemical plant installations, the student is introduced to current industrial practice. **Prerequisite:** Senior standing in Chemical Engineering.

CHE 450—Chemical Engineering Kinetics—3 cr. (3 and 0)
A continuation of the kinetics of chemical reactions. Topics include homogeneous and heterogeneous reactions, batch and flow reaction systems, catalysis, and design of industrial reactors. **Prerequisite:** CHE 430 or permission of the Department Head.

CHE 452—Molecular and Turbulent Transport—3 cr. (3 and 0)
A theoretical treatment of the fundamental mechanisms of molecular and turbulent heat, mass, and momentum transport with the major emphasis given to the interrelation of all three mechanisms. Evaluation and correlation of transport properties and both steady state and unsteady state processes are considered. An elective course for non-chemical engineering students. **Prerequisite:** Senior standing in Chemistry, Engineering, or Physics, and Math 208.

CHE 453—Process Dynamics—3 cr. (3 and 0)
Basic process control and the effect of feedback in various systems. The mathematical analysis of the dynamic response of process systems to step and sinusoidal changes. Determination of the optimum settings for various combinations of proportional, reset and derivative control. **Prerequisite:** Junior or Senior standing in Engineering, Physics, or Chemistry, and Math 309 or permission of department head.
ChE 491—Special Projects in Chemical Engineering—1-3 cr. (1-3 and 0)
As a need arises, special topics requested by students or offered by the faculty will be taught. Review of current research in an area, technological advances and national engineering goals are possible topic areas.
ChE H491—Special Projects in Chemical Engineering—1-3 cr. (1-3 and 0)
Honors Section of ChE 491; admission by invitation.
ChE 601—Transport Phenomena—3 cr. (3 and 0)
ChE 607—Unit Operations Laboratory II—2 cr. (0 and 6)
ChE 610—Unit Operations Theory III—3 cr. (3 and 0)
ChE 615—Introduction to Nuclear Engineering I—3 cr. (3 and 0)
ChE 616—Introduction to Nuclear Engineering II—3 cr. (3 and 0)
ChE 621—Process Development, Design, and Optimization of Chemical Engineering Systems—3 cr. (2 and 3)
ChE 622—Process Development, Design, and Optimization of Chemical Engineering Systems II—3 cr. (0 and 9)
ChE 625—Chemical Process Engineering—3 cr. (3 and 0)
ChE 630—Chemical Engineering Thermodynamics II—3 cr. (3 and 0)
ChE 650—Chemical Engineering Kinetics—3 cr. (3 and 0)
ChE 652—Molecular and Turbulent Transport—3 cr. (3 and 0)
ChE 653—Process Dynamics—3 cr. (3 and 0)
ChE 802—Process Dynamics and Control—3 cr. (3 and 0)
ChE 803—Heat, Mass, and Momentum Transfer—3 cr. (3 and 0)
ChE 804—Chemical Engineering Thermodynamics—3 cr. (3 and 0)
ChE 805—Chemical Engineering Kinetics—3 cr. (3 and 0)
ChE 806—Chemical Engineering Calculations I—3 cr. (3 and 0)
ChE 807—Chemical Engineering Calculations II—3 cr. (3 and 0)
ChE 808—Chemical Engineering Design and Analysis—3 cr. (1 and 6)
ChE 809—Waste Treatment—3 cr. (3 and 0)
ChE 810—Biochemical Engineering—3 cr. (3 and 0)
ChE 820—Fluid Mechanics—3 cr. (3 and 0)
ChE 821—Heat Transport—3 cr. (3 and 0)
ChE 822—Mass Transfer and Differential Contact Operations—3 cr. (3 and 0)
ChE 823—Mass Transfer and Stagewise Contact Operations—3 cr. (3 and 0)
CHEMISTRY

Assistant Professors: J. R. Bacon, R. H. Bailey, Jr., A. L. Beyerlein, Muriel B. Bishop, J. F. Geldard, O. J. Jacobus, K. S. Landers, G. L. Powell

Ch 101—General Chemistry—4 cr. (3 and 3)

Gives the student a general knowledge of the fundamentals of the science of chemistry through lectures, lecture experiments, and laboratory exercises. Consideration is given to the common substances.

Ch 102—General Chemistry—4 cr. (3 and 3)

A continuation of Ch 101.

Ch H102—General Chemistry—4 cr. (3 and 3)

Same as Ch 102 except that this honors section is open to students by invitation only.
CH 220—Elementary Organic Chemistry—4 cr. (3 and 3)
A one semester course in organic chemistry. Typical classes of organic compounds, both aliphatic and aromatic, are studied. Prerequisite: Ch 101 and 102.

CH 223—Organic Chemistry—3 cr. (3 and 0)
An introductory course covering the principles of organic chemistry and the derivation of these principles from a study of the properties, preparations, and interrelationships of the important classes of organic compounds. Prerequisite: Ch 101 and 102.

CH 224—Organic Chemistry—3 cr. (3 and 0)
A continuation of Ch 223.

CH 225—Organic Chemistry Laboratory—2 cr. (0 and 6)
The laboratory techniques involved in the synthesis, separation and purification, and characterization of typical examples of the classes of organic compounds. Prerequisite: Registration in Ch 223.

CH 226—Organic Chemistry Laboratory—2 cr. (0 and 6)
A continuation of Ch 225. Prerequisite: Registration in Ch 224.

CH 227—Organic Chemistry Laboratory—1 cr. (0 and 3)
The synthesis and properties of typical examples of the classes of organic compounds. Prerequisite: Registration in Ch 223.

CH 228—Organic Chemistry Laboratory—1 cr. (0 and 3)
A continuation of Ch 227. Prerequisite: Registration in Ch 224.

CH 310—Elementary Biochemistry—4 cr. (3 and 3)
An introductory course consisting of a review of equilibrium reactions; a study of the chemistry of carbohydrates, proteins, and lipids, and their role in cell metabolism. The laboratory work parallels classroom study. Prerequisite: Organic Chemistry.

CH 313—Quantitative Analysis—3 cr. (3 and 0)
The fundamental principles of volumetric, gravimetric and certain elementary instrumental chemical analyses. Prerequisite: Organic Chemistry.

CH 315—Quantitative Analysis Laboratory—2 cr. (0 and 6)
The laboratory techniques of volumetric, gravimetric, and elementary instrumental analysis.

CH 317—Quantitative Analysis Laboratory—1 cr. (0 and 3)
The standard techniques of analytical chemistry—gravimetric, volumetric, and instrumental.

CH 331—Physical Chemistry—3 cr. (3 and 0)
Includes the gaseous state, thermodynamics, chemical equilibria, and atomic and molecular structure, from both experimental and theoretical points of view. Prerequisite: Math 206 and Physics.

CH 332—Physical Chemistry—3 cr. (3 and 0)
Continuation of Ch 331 including chemical kinetics, liquid and solid state, phase equilibria, solutions, electrochemistry and surfaces.
CH 339—Physical Chemistry Laboratory—1 cr. (0 and 3)
Experiments are selected to be of maximum value to Chemistry and Chemical Engineering majors. Prerequisite: Registration in CH 331.

CH 340—Physical Chemistry Laboratory—1 cr. (0 and 3)
A continuation of CH 339. Prerequisite: Registration in CH 332.

CH 402—Inorganic Chemistry—3 cr. (3 and 0)
A comprehensive survey of the field of inorganic chemistry through lectures and lecture experiments. Development of modern theories of atomic structure and valence, and a detailed study of the elements and their compounds, based on the periodic system and including both well-known and rarer elements. Prerequisite: CH 331 and 332.

CH 403—Inorganic Chemistry—3 cr. (3 and 0)
A continuation of CH 402 with emphasis on the synthesis and properties of inorganic compounds. Prerequisite: CH 402.

CH 411—Instrumental Analysis—4 cr. (2 and 6)
Demonstration and operation of modern optical and electronic precision measuring devices as they apply to the processes and analytical, physical and organic chemistry. Prerequisite: Physical Chemistry.

CH 421—Advanced Organic Chemistry—3 cr. (3 and 0)
A survey of modern methods of organic synthesis, with an emphasis on the principles involved. Application of spectroscopy in organic chemistry. Prerequisite: CH 224 and 332 or equivalent.

CH 422—Advanced Organic Chemistry Laboratory—2 cr. (0 and 6)
Modern laboratory techniques are used in the synthesis and identification of organic compounds. Prerequisite: Registration in CH 421.

CH 428—Organic Spectroscopy—3 cr. (2 and 2)
A survey of modern spectroscopic techniques used in the determination of molecular structure. Emphasis is on interpretation of spectra: nuclear magnetic resonance, ultraviolet, infrared and mass spectroscopy, optical rotatory dispersion and circular dichroism. Two hours theory and two hours practical problem solving per week. Prerequisite: Organic and Physical Chemistry.

CH 435—Atomic and Molecular Structure—3 cr. (3 and 0)
An introductory study of the principles of wave mechanics, hydrogen atom structure, approximate methods, molecular orbital and valence bond treatments of bonding, hybridization, ligand-field theory, and relationships of structure to physical and chemical properties.

CH 436—Physical Chemistry Laboratory—1 cr. (0 and 3)
To be taken in conjunction with CH 435. Laboratory work in spectroscopy and other related areas of atomic and molecular structure will acquaint the student with some of the instruments currently used in the elucidation of structure.

CH 441—Glass Manipulation—2 cr. (0 and 6)
A course designed to teach the fundamentals of glass manipulation and its application to the construction and repair of simple laboratory apparatus. Prerequisite: Senior standing.
CH 442—Chemical Literature—1 cr. (1 and 0)
This course is designed to give the student practice in the use of chemical literature, the writing of technical reports and the presentation of same before the faculty of the Department of Chemistry. Prerequisite: Junior standing in Chemistry.

CH 443—Research Problems—3 cr. (0 and 9)
Original investigation of an assigned problem in a fundamental branch of Chemistry. This work must be carried out under the supervision of a member of the staff. Prerequisite: Senior standing in Chemistry.

CH 444—Research Problems—3 cr. (0 and 9)
A continuation of Ch 443.

CH 450—Review of General Chemistry I—3 cr. (3 and 0)
A lecture course designed to deal with the basic principles generally presented in a general chemistry course. Emphasis will be placed upon the explanation of observed facts in terms of modern atomic and molecular structure. Enrollment limited to secondary school teachers.

CH 454—Inorganic Synthesis—2 cr. (0 and 6)
A laboratory course designed to acquaint the student with various methods and techniques employed in the preparation and handling of inorganic compounds.

CH 472—Organic Synthesis—4 cr. (2 and 6)
A course designed to teach the student techniques and principles as applied in a research laboratory. Both macro and semi-macro methods are used in the preparation of several organic compounds. Prerequisite: Organic Chemistry.

CH 491—Introduction to Radiochemistry—3 cr. (2 and 3)
The natural and synthetic radioisotopes, including the consideration of atomic and nuclear structure, properties of radiation and tracer techniques and their application. The laboratory is concerned with the methods of detection and measurement of the various types of radiation and the various applications of tracer techniques. Prerequisite: Senior or Graduate standing and permission of instructor.

CH 602—Inorganic Chemistry—3 cr. (3 and 0)

CH 603—Inorganic Chemistry—3 cr. (3 and 0)

CH 611—Instrumental Analysis—4 cr. (2 and 6)

CH 613—Quantitative Analysis—3 cr. (3 and 0)

CH 615—Quantitative Analysis Laboratory—2 cr. (0 and 6)

CH 617—Quantitative Analysis Laboratory—1 cr. (0 and 3)

CH 621—Advanced Organic Chemistry—3 cr. (3 and 0)

CH 622—Advanced Organic Chemistry Laboratory—2 cr. (0 and 6)

CH 628—Organic Spectroscopy—3 cr. (2 and 2)

CH 631—Physical Chemistry—3 cr. (3 and 0)

CH 632—Physical Chemistry—3 cr. (3 and 0)

CH 635—Atomic and Molecular Structure—3 cr. (3 and 0)
Ch 636—Physical Chemistry Laboratory—1 cr. (0 and 3)
Ch 639—Physical Chemistry Laboratory—1 cr. (0 and 3)
Ch 640—Physical Chemistry Laboratory—1 cr. (0 and 3)
Ch 650—Review of General Chemistry I—3 cr. (3 and 0)
Ch 654—Inorganic Synthesis—2 cr. (0 and 6)
Ch 672—Organic Synthesis—4 cr. (2 and 6)
Ch 691—Introduction to Radiochemistry—3 cr. (2 and 3)
Ch 800T—Physical Science for the High School Teachers—3 cr. (3 and 0)
Ch 805—Theoretical Inorganic Chemistry—3 cr. (3 and 0)
Ch 806—Special Topics in Inorganic Chemistry—1 to 4 cr.
Ch 807—Chemistry of the Transition Elements—3 cr. (3 and 0)
Ch 808—Chemistry of the Non-Metallic Elements—3 cr. (3 and 0)
Ch 811—Analytical Chemistry—3 cr. (3 and 0)
Ch 812—Chemical Spectroscopic Methods—3 cr. (2 and 3)
Ch 814—Electroanalytical Chemistry—3 cr. (2 and 3)
Ch 821—Organic Chemistry I—3 cr. (3 and 0)
Ch 822—Organic Chemistry II—3 cr. (3 and 0)
Ch 823—Organic Reaction Mechanisms—3 cr. (3 and 0)
Ch 824—Fundamental Principles of Polymer Chemistry—3 cr. (3 and 0)
Ch 825—Current Topics in Organic Chemistry—1 cr. (1 and 0)
Ch 831—Chemical Thermodynamics—3 cr. (3 and 0)
Ch 834—Statistical Thermodynamics—3 cr. (3 and 0)
Ch 835—Chemical Kinetics—3 cr. (3 and 0)
Ch 837—Quantum Chemistry—3 cr. (3 and 0)
Ch 850—A Review of General Chemistry II—3 cr. (2 and 3)
Ch 851—Seminar—0, 1, or 2 cr.
Ch 861—Principles of Biochemistry—3 cr. (3 and 0)
Ch 891—Research—Credit to be arranged.
Ch 920—Advanced Topics in Organic Chemistry—1-4 cr. (1-4 and 0)
Ch 930—Advanced Topics in Physical Chemistry—1-4 cr. (1-4 and 0)
Ch 950—Microanalytical Techniques—3 cr. (1 and 6)
Ch 991—Doctoral Research—Credit to be arranged.
CITY AND REGIONAL PLANNING

Professors: E. L. Falk, V. S. Hodges
Associate Professor: E. Pinckney
Assistant Professor: K. E. Carpenter
Lecturer: S. Carter
Visiting Associate Professor: R. D. Bray

CRP 411—INTRODUCTION TO CITY AND REGIONAL PLANNING—3 cr. (3 and 0)
Overview of urban land-use planning. Analysis of current work in each significant phase of planning. Discussion of goal formulation, foundation studies, land-use planning methods and considerations, and continuing evaluation and modification of an urban-planning process.

CRP 412—CITY AND REGIONAL PLANNING THEORY—3 cr. (3 and 0)
The philosophical, methodological, and ethical aspects of planning will be explored through selected readings, student reports, lectures and discussion. A critical examination of current planning theories.

CRP 421—URBAN SOCIAL STRUCTURE—3 cr. (3 and 0)
The social, economic, and political aspects of communities of varying sizes and types. Elements will include housing, education, recreation, social services, governmental structure, and related community institutions.

CRP 441—HISTORY OF PLANNING—3 cr. (3 and 0)
The development of the urban plan from ancient to modern times.

CRP 453—INTRODUCTION TO PLANNING STUDIO—5 cr. (4 and 12)
New town site selection, preparation of goals and objectives, foundation studies and forecasts, and development of generalized land use and transportation plan. Students will gain experience in project coordination and interdepartmental and governmental agency cooperation.

CRP 454—PLANNING STUDIO II—5 cr. (4 and 12)
Studies involving small or medium-sized cities. These will include evaluation of community goals and objectives, appropriate foundation surveys and projections, and development of generalized land-use alternatives. Work with available land-use data, professionals involved in the planning function, and development of a generalized land-use plan, reflective and responsive to community and official needs.

CRP 472—PLANNING ADMINISTRATION AND PRACTICE—3 cr. (3 and 0)
The organization and administration of types of planning agencies and their relationship to other governmental and private organizations.

CRP 473—GOVERNMENT AND PLANNING LAW—3 cr. (3 and 0)
A complete coverage of the laws and ordinances relating to redevelopment, subdivision control, zoning, official mapping, and other topics including interpretation, philosophy, enabling legislation, and model ordinances. The legal basis of current and long-range planning policy will be discussed. Prerequisite: CRP 472 (Planning Administration and Practice).

CRP 483—SEMINAR ON PLANNING COMMUNICATION—3 cr. (3 and 0)
Informal means open for plan implementation. The organization of effective public information and education programs, use of citizens' advisory com-
mittees, and application of other implementation techniques. Lectures, student reports, selected readings, and visiting speakers.

CRP 611—INTRODUCTION TO CITY AND REGIONAL PLANNING—3 cr. (3 and 0)
CRP 612—CITY AND REGIONAL PLANNING THEORY—3 cr. (3 and 0)
CRP 621—URBAN SOCIAL STRUCTURE—3 cr. (3 and 0)
CRP 641—HISTORY OF PLANNING—3 cr. (3 and 0)
CRP 653—INTRODUCTION TO PLANNING STUDIO—5 cr. (4 and 12)
CRP 654—PLANNING STUDIO II—5 cr. (4 and 12)
CRP 672—PLANNING ADMINISTRATION AND PRACTICE—3 cr. (3 and 0)
CRP 673—GOVERNMENT AND PLANNING LAW—3 cr. (3 and 0)
CRP 683—SEMINAR ON PLANNING COMMUNICATION—3 cr. (3 and 0)
CRP 822—URBAN SYSTEMS—3 cr. (3 and 0)
CRP 831—ECONOMICS OF LAND USE PLANNING—3 cr. (3 and 0)
CRP 863—PLANNING STUDIO III—5 cr. (2 and 9)
CRP 864—PLANNING THESIS—9 cr. (0 and 27)
CRP 881—SEMINAR IN QUANTITATIVE METHODS I—3 cr. (3 and 0)
CRP 882—SEMINAR IN QUANTITATIVE METHODS II—3 cr. (3 and 0)
CRP 884—PUBLIC FACILITY PLANNING—3 cr. (3 and 0)
CRP 893—CITY AND REGIONAL PLANNING INTERNSHIP—3 cr. (0 and 0)
CRP 894—CITY AND REGIONAL PLANNING INTERNSHIP—3 cr. (0 and 0)

CIVIL ENGINEERING

Professor: I. A. Trively
Associate Professors: W. Baron, H. W. Busching, Head; J. E. Clark, R. E. Elling, J. M. Ford, J. C. McCormac, J. P. Rostron, A. E. Schwartz
Assistant Professors: B. L. Edge, F. L. Roberts, D. B. Stafford, W. A. Welsh, Jr.

CE 201—SURVEYING—3 cr. (2 and 3)
Elementary plane surveying for other than Civil Engineering students. Coverage includes measurement of distance, leveling, horizontal and vertical angles, stadia and topography, area and volume calculations, construction surveying. Field exercises provide practice in the use of surveying instruments. Prerequisite: Math 106.

CE 205—CIVIL ENGINEERING METHODOLOGY—2 cr. (1 and 3)
Concepts of civil engineering analysis and design, case histories and project studies, introduction to theory and practice of plane surveying, measurements and errors, differential leveling, and topographic mapping. Laboratory includes typical design and construction problems. Prerequisite: Math 106.

CE 206—GEOMETRICS—2 cr. (1 and 3)
Application of geometrics to civil engineering problems, computations and triangulation, coordinate systems, electronic methods of measuring distances,
photogrammetry, introduction to digital computation and elementary programming. Prerequisite: CE 205.

CE 301—Introduction to Structural Science—3 cr. (2 and 2)
Analysis of statically determinate and indeterminate structural elements and systems. Influence lines for beams and trusses, calculation of rotations and deflections by integration, moment area, conjugate beam and unit load methods. Indeterminate analysis by force and displacement methods and moment distribution. Prerequisite: EM 304, CE 206.

CE 302—Structural Design I—3 cr. (2 and 2)
Design and detail of components and connections for timber and metal structures. Prerequisite: CE 301.

CE 310—Transportation Engineering—4 cr. (3 and 2)
Planning, location, design, operation, and administration of highways, railroads, airports and other transportation facilities, including economic considerations, pavement design, and digital computer applications to geometric and earthwork computation. Prerequisite: CE 206; corequisite: CE 331.

CE 320—Concrete and Bituminous Materials—2 cr. (1 and 3)
Investigation and selection of aggregates for portland cement concrete and asphaltic concrete; latest methods of design of portland cement mixes and asphaltic concrete mixes; field control and adjustments; field trips to nearby construction jobs. Prerequisite: EM 304 and Junior standing.

CE 330—Soil Mechanics—3 cr. (2 and 2)
Mechanical and physical properties of soils and their relation to soil action in problems of engineering, such as classification, permeability, shearing strength, consolidation, stress distribution and bearing capacity of soils. Prerequisite: EM 304 and Junior standing.

CE 341—Environmental Engineering—3 cr. (3 and 0)
An evaluation of the effects of the environment on man with special consideration given to air and water contacts. The analysis and review of engineering systems used in environmental control. Prerequisite or Concurrent: EM 320, EM 322.

CE 399—Simulation Techniques—1 cr. (0 and 3)
Modeling of civil engineering problems with the electronic analog computer, with conductive sheet methods and by digest analog simulation. The emphasis is in use rather than the theory of the methods. Prerequisite: Math 208.

CE 402—Structural Design II—3 cr. (2 and 2)
Design and detail of reinforced concrete members using elastic and ultimate strength theories, introduction to prestressed concrete. Prerequisite: CE 301, CE 320.

CE 410—Traffic Engineering: Operations—3 cr. (3 and 0)
Basic characteristics of motor-vehicle traffic; techniques for making traffic engineering investigations; design and application of traffic control devices; traffic design of parking facilities; traffic laws and ordinances; public relations. Prerequisite: CE 310.
CE 412—Urban Transportation Planning—3 cr. (3 and 0) F
Urban travel characteristics; characteristics of transportation systems; transportation and land-use studies; trip distribution and trip assignment models; city patterns and subdivision layout. Prerequisite: CE 311.

CE 415—Seminar in Traffic Engineering—1 cr. (0 and 2)
Discussion, readings, and practical applications of the operational methods of traffic engineering and consideration of the problems confronting the city, county, and state traffic engineer.

CE 417—Airphoto Interpretation I—3 cr. (2 and 3)
A brief review of the basic geometry of aerial photographs, characteristics of geologic and topographic features identifiable from aerial photographs, and site characteristics related to soil profile. Laboratory work includes soil mapping, selection of construction sites, and location of soil deposits for engineering purposes. Prerequisite: Junior standing and/or permission of instructor.

CE 419—General Photogrammetry—3 cr. (2 and 3) S
Fundamentals of mapping by the use of aerial photographs; characteristics, production and use of aerial photographs; study of the operation of popular photogrammetric instruments including aerial cameras, stereoscopic viewing and plotting equipment; practice in the use of stereocomparator and multiplex plotting instruments; scale, tilt, and coordinate calculations; construction of photomosaics. Prerequisite: Math 108 and Junior standing.

CE 420—Mechanical Properties of Materials—3 cr. (3 and 0)
The course provides a comprehensive introduction to the analysis of mechanical response of materials. Emphasis is placed on the behavior of solid materials that are used in civil engineering structures but are not considered in depth in other undergraduate courses. Plastics, fibers, and composite materials are studied. Students are assisted in investigating a realistic problem in materials technology. Prerequisite: Permission of instructor.

CE 424—Construction Methods—2 cr. (2 and 0)
A survey of the principal method and equipment used in the construction industry. Prerequisite: Senior standing.

CE 425—Engineering Relations—3 cr. (3 and 0)
Business, legal, and ethical relations in engineering practice. Prerequisite: Senior standing.

CE 431—Applied Soil Mechanics—3 cr. (2 and 2)
Relationship of local geology to soil formations, ground water, planning of site investigation, sampling procedures, laboratory determination of design parameter, foundation design and settlement analysis. Prerequisite: CE 331.

CE 434—Construction Costs and Estimates—3 cr. (2 and 2)
Interpretation of specifications and plan reading necessary for the proper estimation of quantities of materials and costs of engineering structures. The course is presented from both the designer’s and the constructor’s viewpoint in order to fit the young engineer with the essential details an inspector or a construction engineer should have at his command. Prerequisite: Senior standing.
CE 435—ENGINEERING PROJECT ANALYSIS—3 cr. (2 and 2)
Advanced analysis of engineering projects. Theory of economic, financial and intangible analysis of large-scale construction projects. Practical exercises in cost-benefit studies and construction decisions. Prerequisite: Permission of instructor.

CE 441—WATER RESOURCES ENGINEERING—3 cr. (2 and 3)
The hydrologic and economic considerations involved in the control and utilization of water; analysis and design of water and waste water collection systems and water distribution systems. Prerequisite: CE 341, EM 320, and EM 322.

CE 453—ADVANCED STRUCTURAL ANALYSIS—3 cr. (3 and 0)
Slopes and deflections of beams and trusses by energy methods. Analysis of statically indeterminate structures and construction of influence lines by virtual-work method. Application of moment distribution and slope deflection methods. Prerequisite: CE 301.

CE 462—PORT AND HARBOR ENGINEERING—3 cr. (3 and 0)
A unified treatment of the basic principles used in the design, construction, and operation of ports and harbors. Emphasis is placed on the philosophy behind port layout and the optimal site and size selections, as well as optimal port operations. The basic principles and economic factors in small craft harbor design are studied. The requirements for harbor maintenance and the design of harbor protection structures are presented. This integrated treatment covers in varying degrees the application of soil, structure, and fluid mechanics as well as some economic optimizing criteria.

CE 490—SPECIAL PROJECTS—1-3 cr. (1-3 and 0-0)
Studies or laboratory investigations on special topics in the Civil Engineering field which are of interest to individual students and staff members. Arranged on a project basis with a maximum of individual student effort and a minimum of staff guidance. Prerequisite: Senior standing.

CE H490—SPECIAL PROJECTS—1-3 cr. (1-3 and 0)
Honors section of CE 490; admission by invitation. (Non-Civil Engineering students only.)

CE 610—TRAFFIC ENGINEERING: OPERATIONS—3 cr. (3 and 0)
CE 612—URBAN TRANSPORTATION PLANNING—3 cr. (3 and 0)
CE 615—SEMINAR IN TRAFFIC ENGINEERING—1 cr. (0 and 2)
CE 617—AIRPHOTO INTERPRETATION I—3 cr. (2 and 3)
CE 619—GENERAL PHOTOGRAMMETRY—3 cr. (2 and 3)
CE 620—MECHANICAL PROPERTIES OF MATERIALS—3 cr. (3 and 0)
CE 630—SOIL MECHANICS—3 cr. (2 and 2)
CE 631—APPLIED SOIL MECHANICS—3 cr. (2 and 2)
CE 634—CONSTRUCTION COSTS AND ESTIMATES—3 cr. (2 and 3)
CE 635—ENGINEERING PROJECT ANALYSIS—3 cr. (2 and 2)
CE 653—ADVANCED STRUCTURAL ANALYSIS—3 cr. (3 and 0)
CE 662—PORT AND HARBOR ENGINEERING—3 cr. (3 and 0)

COMPUTING SCIENCE

(Administered by the Department of Mathematics)

Professors: A. T. Hind, Jr., J. W. Kenelly
Associate Professors: R. E. Haymond, C. E. Kirkwood, Jr., M. C. Palmer
Assistant Professors: W. R. Boland, P. C. Bowie
Instructor: Eugenie V. Bartmess

Comp Sc 205—Elementary Computer Programming—3 cr. (3 and 0)
A detailed study of an algebraic computer programming language and its use in solving problems. The language will be selected as appropriate to the computer presently available.

Comp Sc 206—Advanced Programming in Fortran—3 cr. (3 and 0)
A continuing study of computer programming with the Fortran language. Emphasis on subroutine computation with application to problems in science and engineering. Prerequisite: Comp Sc 205.

Comp Sc 207—Advanced Programming in PL/1—3 cr. (3 and 0)
A programming course utilizing the advanced features of the PL/1 language. Topics include dynamic storage allocation, string manipulation, compile-time facilities, error handling, and list processing. Prerequisite: Comp Sc 205.

Comp Sc 210—Algorithmic Processes for Engineers—3 cr. (3 and 0)
Concept and properties of an algorithm, language and notations for describing algorithms, analysis of computational problems, development of algorithms, and applications to include polynomial interpolation, zeros of equations, systems of equations, matrix manipulations, and solution of differential equations.

Comp Sc 308—Data Processing for Business Applications—3 cr. (3 and 0)
An introduction to the Cobol language with application to business data processing. Emphasis is placed on the organization and processing of data files. Prerequisite: Comp Sc 205.

Comp Sc 311—Computer Organization and Programming—3 cr. (3 and 0)
Logical basis of computer structure, machine representation of numbers and characters, flow of control, instruction codes, arithmetic and logical operations, indexing, input-output, subroutines, linkages, macros, interpretive and assembly systems, storage organization. Prerequisite: Comp Sc 205.

Comp Sc 313—Introduction to Systems Programming—3 cr. (3 and 0)
Advanced assembler language techniques, macros, job control language, linkage of assembler language routines with higher level languages, debugging techniques, utilities. Programs are written by the student to make use of the above topics. Prerequisite: Comp Sc 311.

Comp Sc 409—Introduction to Numerical Analysis I—3 cr. (3 and 0)
An introduction to the problems of classical numerical analysis emphasizing computational procedures and application. Topics include: polynomial interpolation, matrix methods, systems of linear equations, nonlinear equations, numerical solution of ordinary differential equations. Prerequisite: Comp Sc 205 or EE 299 and Math 208.

Comp Sc 410—Introduction to Numerical Analysis II—3 cr. (3 and 0)
Comp Sc 428—Algorithmic Languages and Compilers—3 cr. (3 and 0)
Formed description of algorithmic languages and the techniques used in their compilation, study of syntax, semantics, procedures, replication, iteration, and recursion in these languages, including comparisons of commonly used languages. Prerequisite: Comp Sc 205, Math 295 or equivalent.

Comp Sc 609—Introduction to Numerical Analysis I—3 cr. (3 and 0)
Comp Sc 610—Introduction to Numerical Analysis II—3 cr. (3 and 0)
Comp Sc 611—Computer Organization and Programming—3 cr.
(3 and 0)
Comp Sc 628—Algorithmic Languages and Compilers—3 cr. (3 and 0)
Comp Sc 863—Digital Models I—3 cr. (3 and 0)
Comp Sc 864—Digital Models II—3 cr. (3 and 0)

DAIRY SCIENCE

Professors: R. W. Henningson, V. Hurst, J. J. Janzen, W. A. King, Head;
J. T. Lazar, Jr.
Associate Professors: C. C. Brannon, W. V. Chalupa, J. F. Dickey
Assistant Professor: G. D. O'Dell

Dy Sc 201—Introduction to Dairy Science—3 cr. (2 and 3) F, S
A fundamental course designed to give the student a working knowledge of Dairy Science. Studies include history of dairying, dairy breeds and cattle evaluation, nutrition, physiology, housing, quality milk production, quality control and the evaluation of milk and its products, the manufacture of milk products and their value in the human food supply.

Dy Sc 306—The Chemical and Physical Nature of Milk—3 cr.
(2 and 3) S
The nature and properties of the major and minor constituents of milk, the effect of chemical and physical treatment on milk constituents, and analytical methods necessary to determine the composition and properties of milk and its constituents. The philosophy and development of quality control.

Dy Sc 307—Market Milk—3 cr. (2 and 3) F, '72 and alternate years.
Composition, procurement, processing, distribution, quality control, public health aspects, basic chemistry and bacteriology of industrial milk supplies and cultured products.

Dy Sc 310—Dairy Cattle Selection—1 cr. (0 and 3)
F, '72 and alternate years.
Emphasis is placed upon the selection of dairy cattle for profitable herd operations. Evaluations of herd classifications, fitting, showing, and true type are made.

Dy Sc 402—Dairy Manufactures—4 cr. (3 and 3)
S, '72 and alternate years.
The principles and practice of the manufacture of ice cream and related dairy products, the principles of the manufacturer of condensed and evaporated milks and milk powders, and the physical, chemical and biological factors involved.
Dy Sc 404—Plant Management—3 cr. (2 and 3)
S, '73 and alternate years.
The organization and operation of dairy and food plants and the coordination of all functions into an orderly business enterprise. Emphasis will be given to management's responsibility concerning the procurement, processing, quality control and distribution of food products. Business and industrial techniques are used to develop maximum efficiencies.

Dy Sc 409—Dairy Science Seminar—2 cr. (2 and 0)
F, '71 and alternate years.
Special research problems in production and manufactures are studied. Individual topics not fully covered in class work are assigned for special report before class and members of Dairy Science Staff.

Dy Sc 410—Dairy Science Seminar—2 cr. (2 and 0)
S, '72 and alternate years.
A continuation of Dy Sc 409 with emphasis on current research literature and research methods.

Dy Sc 452—Dairy Cattle Feeding and Management—3 cr. (2 and 3)
S, '73 and alternate years.
Fundamental principles in the care, feeding, and management of dairy cattle of all ages. Topics include general consideration in selecting a breed and the individual cow, calf raising, growth and development of dairy heifers, care and management of the milking herd and feeding for milk production.

Dy Sc 453—Animal Reproduction—3 cr. (3 and 0) F
Reproductive physiology and endocrinology of mammals with emphasis on farm animals and frequent reference to reproduction in laboratory animals and humans.

Dy Sc 455—Animal Reproduction Laboratory—1 cr. (0 and 3) F
This course will supplement Dy Sc 453. Practical work will include comparative anatomy and histology of the male and female reproductive organs; semen collection, evaluation and processing; techniques of artificial insemination, sexual behavior and the principles of pregnancy tests for humans. Prerequisite: To be taken concurrently or to follow Dy Sc 453.

Dy Sc 602—Dairy Manufactures—4 cr. (3 and 3)
Dy Sc 604—Plant Management—3 cr. (2 and 3)
Dy Sc 606—Chemical and Physical Nature of Milk—3 cr. (2 and 3)
Dy Sc 607—Market Milk—3 cr. (2 and 3)
Dy Sc 652—Dairy Cattle Feeding and Management—3 cr. (2 and 3)
Dy Sc 653—Animal Reproduction—3 cr. (3 and 0)
Dy Sc 655—Animal Reproduction Laboratory—1 cr. (0 and 3)
Dy Sc 801—Topical Problems—1 to 3 cr.
Dy Sc 802—Genetics of Dairy Cattle Improvement—3 cr. (3 and 0)
Dy Sc 803—Physiology of Reproduction and Milk Secretion—3 cr. (3 and 0)
Dy Sc 804—Endocrinology—3 cr. (3 and 0)
Dy Sc 805—Newer Knowledge of Dairy Nutrition—3 cr. (3 and 0)
Dy Sc 807—Fermented Dairy Products—3 cr. (2 and 3)
Dy Sc 808—Industrial Dairy Science—3 cr. (3 and 0)
Dy Sc 891—Research—Credit to be arranged.

ECONOMICS

Professors: H. H. Macaulay, Jr., W. C. Whitten, Jr.
Associate Professor: B. R. Skelton
Assistant Professors: F. A. Close, Head; R. F. Hebert, R. D. Shannon, H. H. Ulbrich,* T. B. Yandle, Jr., J. A. Ziegler, P. M. Zipin

Econ 201—Principles of Economics—3 cr. (3 and 0)
The fundamental principles of pricing, stabilization and growth in a modern economy. Topics include supply and demand, employment theory and fiscal policy, the banking system and monetary policy, and the economics of growth.

Econ H201—Principles of Economics—3 cr. (3 and 0)
An enrichment of the subject matter of Econ 201 through assigned readings and individualized instruction; admission by invitation.

Econ 202—Principles of Economics—3 cr. (3 and 0)
Continuation of Econ 201 with an intensive study of the economics of the firm, the pricing of resources, and international economic relations. The theory is given relevance through the analysis of current economic problems. Prerequisite: Econ 201.

Econ H202—Principles of Economics—3 cr. (3 and 0)
An enrichment of the subject matter of Econ 202 through assigned readings and individualized instruction; admission by invitation. Prerequisite: Econ 201 or Econ H201.

Econ 301—Economics of Labor—3 cr. (3 and 0)
The economics of the labor market, the problems of the industrial worker, and the methods of adjusting labor-management disputes. Prerequisite: Econ 201.

Econ 302—Money and Banking—3 cr. (3 and 0)
Considers the function of money and banking in both the product and financial markets. Special emphasis is placed on monetary theory and current problems of monetary policy. Prerequisite: Econ 201 and 202.

Econ 305—Investment Analysis—3 cr. (3 and 0)
A study of techniques useful in analyzing alternative investment opportunities, with emphasis on corporate securities. Investment planning and portfolio management are considered. Prerequisite: Econ 201.

Econ 306—Risk and Insurance—3 cr. (3 and 0)
Studies the nature of risk and the role of insurance in risk management from individual and business viewpoints by considering insurance carriers, contracts, underwriting and regulation. Prerequisite: Econ 201.

* Part-time.
Econ 308—Collective Bargaining—3 cr. (3 and 0)
The practices, procedures, legal foundations, and legal structure associated with collective bargaining. The form and content of the labor contract, the grievance machinery, and the mediation and arbitration institutions will also be studied. Prerequisite: Econ 201.

Econ 309—Government and Business—3 cr. (3 and 0)
The relationships between government and business, including among other topics, governmental efforts to enforce competition, to regulate public utilities, and to protect the special interests of laborers, farmers, and consumers. Prerequisite: Econ 201.

Econ 314—Intermediate Economic Theory—3 cr. (3 and 0)
An analytical study of the basic concepts of value and distribution under alternative market conditions. Prerequisite: Econ 201 and 202.

Econ 350T—Economics of the Consumer and the Firm in a Market System—3 cr. (3 and 0)
Scarce resources impose the necessity of choice on society; the rationale of the market system in the allocation of these scarce resources, basic market theory and its application to contemporary economic problems in American society; the solutions of a non-market system will be contrasted. Open only to public school teachers of social studies.

Econ 351T—Economics of Employment, the Price Level, and Growth—3 cr. (3 and 0)
National income accounting concepts will be studied; also money and banking, monetary policy, fiscal policy, and an analysis of their relationship to national income, employment, the price level, and economic growth. Open only to public school teachers of social studies.

Econ 403—Development of Economic Thought—3 cr. (3 and 0)
A study of the origin and evolution of ideas with some emphasis on the historical context, the problems which inspired these ideas, and the nature of the solutions which they provided: from ancient days to the present. Prerequisite: Econ 201 and 202.

Econ 404—Comparative Economic Systems—3 cr. (3 and 0)
A comparative analytical and historical study of the principal economic systems which have been important in the modern world including among others, capitalism and socialism. Prerequisite: Econ 201 and 202.

Econ 407—National Income and Employment Analysis—3 cr. (3 and 0)
An intensive study of selected economic theories with special emphasis on income and employment. Part of the course is devoted to the analysis of national income accounts and income. Prerequisite: Econ 201 and 202.

Econ 410—Economic Development—3 cr. (3 and 0)
Consideration and analysis of economic and related problems of the underdeveloped countries. Attention will be given to national and international programs designed to accelerate solution of these problems. Prerequisite: Econ 201 and 202.

Econ 412—International Trade—3 cr. (3 and 0)
A study of economic principles particularly applicable to trade between nations. Topics covered include the balance of payments, determination of
foreign exchange rates, price and income effects on the composition and level of trade, and commercial policy. Prerequisite: Econ 314.

ECON 413—INTERNATIONAL FINANCE—3 cr. (3 and 0)
With primary emphasis upon international monetary relations, the course surveys history and theory. Topics covered include exchange-rate determination, exchange-stability conditions, the purchasing-power-parity doctrine, the effects of devaluation and exchanging speculation. (Not open to students who have taken Econ 412.) Prerequisite: Econ 302.

ECON 416—DEVELOPMENT OF THE MODERN ECONOMY—3 cr. (3 and 0)
An analysis of the historical forces and influences which have contributed to the emergence and development of the modern economy. Prerequisite: Econ 201 and 202.

ECON 419—ECONOMICS OF DEFENSE—3 cr. (3 and 0)
Examines the American defense establishment in terms of resources utilized, the alternative uses of these resources and the contribution to the national economy and scientific progress that is generated by these resources in a defense use. Particular attention is given to economic problems inherent in shifting resources from non-defense to defense uses and vice versa as well as among alternative defense uses. Prerequisite: Acct 201 and Econ 201.

ECON 420—ECONOMICS OF TAXATION—3 cr. (3 and 0)
An intensive study of a limited number of problems in taxation with particular emphasis on the economic effects that cause and result from certain taxes. Topics include averaging, incentives to work, incidence, concepts of equity, excess burden, definitions of income, depletion, and capital gains. Prerequisite: Econ 314.

ECON 421—URBAN ECONOMICS—3 cr. (3 and 0)
Economic problems associated with the concentration of population in central places are examined. The historical development of cities and the associated economic implications for individuals, firms, and society are studied. Legislation of economic importance to urban living is analyzed. Prerequisite: Econ 201 and 202.

ECON 422—MONETARY THEORY AND POLICY—3 cr. (3 and 0)
An intensive study of the role of monetary factors in economic change. Modern monetary theories and their empirical relevance for policy are developed against a background of monetary history and institutions. Prerequisite: Econ 302 or permission of the instructor.

ECON 424—THE ORGANIZATION OF INDUSTRIES—3 cr. (3 and 0)
Empirical, historical, and theoretical analyses of market structure and concentration in American industry: the effects of oligopoly, monopoly, and cartelization upon price, output and other policies of the firm; antitrust and other public policies and problems will be studied. Prerequisite: Econ 314.

ECON 603—DEVELOPMENT OF ECONOMIC THOUGHT—3 cr. (3 and 0)
ECON 604—COMPARATIVE ECONOMIC SYSTEMS—3 cr. (3 and 0)
ECON 607—NATIONAL INCOME AND EMPLOYMENT ANALYSIS—3 cr. (3 and 0)
ECON 610—ECONOMIC DEVELOPMENT—3 cr. (3 and 0)
ECON 612—INTERNATIONAL TRADE—3 cr. (3 and 0)
Econ 613—International Finance—3 cr. (3 and 0)
Econ 616—Development of the Modern Economy—3 cr. (3 and 0)
Econ 619—Economics of Defense—3 cr. (3 and 0)
Econ 620—Economics of Taxation—3 cr. (3 and 0)
Econ 621—Urban Economics—3 cr. (3 and 0)
Econ 622—Monetary Theory and Policy—3 cr. (3 and 0)
Econ 624—The Organization of Industries—3 cr. (3 and 0)
Econ 650T—Economics of the Consumer and the Firm in a Market System—3 cr. (3 and 0)
Econ 651T—Economics of Employment, the Price Level, and Growth—3 cr. (3 and 0)
Econ 800—Advanced Economic Analysis—3 cr. (3 and 0)
Econ 802—Advanced Economic Concepts and Applications I—3 cr. (3 and 0)
Econ 803—Advanced Economic Concepts and Applications II—3 cr. (3 and 0)
Econ 810—Seminar in Economic Methodology—3 cr. (3 and 0)
Econ 811—Seminar in Labor Economics—3 cr. (3 and 0)
Econ 812—Seminar in the Development of Economic Thought—3 cr. (3 and 0)
Econ 813—Seminar in Community Goods and Environmental Quality—3 cr. (3 and 0)
Econ 820—Seminar in the Economics of Taxation—3 cr. (3 and 0)
Econ 821—Economic Theory I—3 cr. (3 and 0)
Econ 822—Economic Theory II—3 cr. (3 and 0)
Econ 891—Research—Credit to be arranged.
Econ 900—Seminar in Advanced Economic Theory—3 cr. (3 and 0)

EDUCATION

Professors: L. H. Davis, C. R. Freeze, M. A. King, Head; H. F. Landrith
Associate Professors: G. W. Gray, M. A. Packer, W. W. Pennscott, R. E. Ware
Assistant Professors: S. L. Buckner, J. R. Harris, J. A. Hash, Jean L. Hice, T. H. Parry
Instructor: Elizabeth B. Galloway
Lecturer: Teryle W. Carpenter

Ed 011—Basic Reading—5 cr. (5 and 0)
Designed for students who have not acquired adequate reading skills as demonstrated by scores on entrance examinations or diagnostic tests. Study skills, vocabulary, content reading and diagnosis of students' problems, including counseling for vocational and academic potential. Course meets five hours per week.
**Ed 013—Basic Reading—5 cr. (5 and 0)**
A continuation of Ed 011. Designed for students who have not acquired adequate reading skills as demonstrated by scores on entrance examinations or diagnostic tests. Study habits, vocabulary, content reading and diagnosis of students' problems including counseling for vocational and academic potential. Course meets five hours per week.

**Ed 100—Orientation—1 cr. (1 and 0)**
Lectures and discussions on teaching in addition to serving as teacher aides. Required of all students in Early Childhood Education, Elementary Education, Secondary Education, and Science Teaching.

**Ed 101—Reading Improvement—1 cr. (0 and 2)**
Developmental reading for University students who desire to improve reading skills; open to any University student, but priority given to referrals.

**Ed 301—History of American Education—3 cr. (3 and 0)**
Development of educational systems, theories and practices against a background of American social and intellectual history. **Prerequisite:** Junior standing or permission of the instructor.

**Ed H301—History of American Education—3 cr. (3 and 0)**
Honors section of Ed 301; admission by invitation.

**Ed 302—Educational Psychology—3 cr. (3 and 0)**
The nature, capacities, equipment, growth and development of the learner.

**Ed H302—Educational Psychology—3 cr. (3 and 0)**
Honors section of Ed 302; admission by invitation.

**Ed 334—Child Growth and Development—3 cr. (3 and 0)**
A study of the physical and emotional growth and development of the child. **Prerequisite:** Ed 302 or Psych 201.

**Ed 335—Adolescent Growth and Development—3 cr. (3 and 0)**
The physical and emotional growth and development of the adolescent. **Prerequisite:** Ed 302 or Psych 201.

**Ed H335—Adolescent Growth and Development—3 cr. (3 and 0)**
Honors section of Ed 335; admission by invitation.

**Ed 336—Behavior of the Preschool Child—3 cr. (2 and 2)**
A study of behavior of the preschool child, including observation and participation.

**Ed 401—The Community College—3 cr. (3 and 0)**
History and philosophy of the junior college, its functions, organization and administration.

**Ed 405—Principles of Guidance—3 cr. (3 and 0)**
Principles, procedures, and policies of the guidance services. For all personnel workers. **Prerequisite:** 6 semester hours in Education or Psychology.

**Ed 406—History and Philosophy of Education—3 cr. (3 and 0)**
An analysis of the development of modern education practices and philosophies with emphasis upon the historical and philosophical development in the United States.
Ed 412—Directed Teaching in Secondary School Subjects—6 cr. (1 and 15)

A program of supervised observation and teaching in cooperation with selected public schools in which opportunities are provided for prospective teachers to obtain experiences in the subject area. Students to be sectioned according to teaching fields: English, History and Social Sciences, Mathematics, Modern Languages, Science. (Enrollment is subject to individual approval of instructor in charge and is limited to seniors or graduates who have completed prerequisite courses and who have the accumulated grade-point ratio necessary for graduation.)

Ed 424—Methods and Materials in Secondary School Instruction—
3 cr. (3 and 0)

Development of instructional practices and materials appropriate for the secondary school; familiarization with curriculum materials. Students to be sectioned according to teaching area: English, History and Social Science, Mathematics, Modern Languages, Science.

Ed 431—Special Institute Course: Early Childhood Education—3 cr. (3 and 0)

Subject areas organized according to Institute needs.

Ed 432—Special Institute Course: Elementary School—3 cr. (3 and 0)

Subject areas organized according to Institute needs.

Ed 433—Special Institute Course: Secondary School—3 cr. (3 and 0)

Subject areas organized according to Institute needs.

Ed 434—Special Institute Course: Current Problems in Education—
3 cr. (3 and 0)

Subject areas organized according to Institute needs.

Ed 435—Special Institute Course: Curriculum—3 cr. (3 and 0)

Subject areas organized according to Institute needs.

Ed 436—Special Institute Course: Supervision and Administration—
3 cr. (3 and 0)

Subject areas organized according to Institute needs.

Ed 458—Health Education—3 cr. (3 and 0)

A study of the information needed for effective cooperation with parents, physicians and public health agencies in the promotion and improvement of community health, including problems of personal hygiene, health records, immunization, and control of communicable disease.

Ed 459—Fundamentals of Basic Reading—3 cr. (3 and 0)

Study of reading skills in relation to the psychological bases; developmental principles; historical and current issues in reading practices.

Ed 460—Curriculum Development in the Elementary School—3 cr. (3 and 0)

An analysis and evaluation of newer practices in curriculum planning in the elementary school.

Ed 461—Teaching Reading in the Elementary School—3 cr. (3 and 0)

Study of the various phases of reading and their relation to the elementary program. Emphasis on modern practices in the classroom teaching of reading.
ED 462—Reading Diagnosis and Remediation—3 cr. (2 and 3)
A clinical course in diagnostic and remedial procedures in the teaching of reading. Practice in the use of diagnostic instruments, interpretation of results, and case studies, with recommended remediation. Laboratory hours to be arranged with each individual. Prerequisite: 3 semester hours in reading or permission of the instructor.

ED 465—Secondary School Curriculum—3 cr. (3 and 0)
A study of the principles, techniques, and trends in second school curriculum development and evaluation.

ED 466—Curriculum for Early Childhood Education—3 cr. (3 and 0)
Critical study of early childhood curriculum for nursery schools, kindergarten and early elementary grades.

ED 471—The Exceptional Child—3 cr. (3 and 0)
Survey of exceptionality including handicapped and gifted children; nature, cause, and treatment of difficulties; educational problems.

ED 472—Psychology of Mental Retardation—3 cr. (3 and 0)
Psychological aspects of mental retardation; learning, motivation, and personality development.

ED 473—Teaching the Mentally Retarded—3 cr. (3 and 0)
Study, selection, and preparation of curricular materials; methods of teaching retarded children within the pre-adolescent and adolescent range. Prerequisite: Ed 472 or equivalent.

ED 480—Methods and Materials in the Elementary School—3 cr. (3 and 0)
Study of the elementary program with emphasis upon materials, curriculum and methodology.

ED 481—Directed Teaching in the Elementary School—6 cr. (1 and 15)
Supervised observation and teaching experiences in cooperation with selected elementary schools. (Enrollment is subject to individual approval of the instructor and is limited to seniors or graduates who have completed prerequisite courses and who have the accumulated grade-point ratio for graduation.)

ED 483—Methods and Materials for Early Childhood Education—3 cr. (3 and 0)
Study of methods and materials applicable to nursery schools, kindergarten and early elementary grades.

ED 484—Directed Teaching in Early Childhood Education—6 cr. (1 and 15)
Supervised observation and teaching experiences in cooperation with nursery, kindergartens and early elementary schools. (Enrollment is limited to seniors or graduates who have completed prerequisite courses and who have the accumulated grade-point ratio for graduation.)

ED 487—Methods and Materials in Speech Development—3 cr. (3 and 0)
Approved methods of teaching speech development; study of materials; experience in clinical methodology.
Description of Courses

Ed 491—Descriptive Statistics—3 cr. (3 and 0)
Basic descriptive statistics and research methodology applicable to education, psychology and other social sciences.

Ed 494—School and Community Relationships—3 cr. (3 and 0)
A study of the interdependence of the school and community, with emphasis on educational implications.

Ed 497—Audio-Visual Aids in Education—3 cr. (3 and 0)
The techniques and uses of audio-visual aids in improving teaching effectiveness.

Ed 498—Teaching Secondary School Reading—3 cr. (3 and 0)
Methods and materials of teaching basic and developmental reading skills; programming special services in reading instruction. Demonstrations of tests and devices.

Ed 601—The Community College—3 cr. (3 and 0)
Ed 605—Principles of Guidance—3 cr. (3 and 0)
Ed 606—History and Philosophy of Education—3 cr. (3 and 0)
Ed 631—Special Institute Course: Early Childhood Education—3 cr. (3 and 0)

Ed 632—Special Institute Course: Elementary School—3 cr. (3 and 0)
Ed 633—Special Institute Course: Secondary School—3 cr. (3 and 0)
Ed 634—Special Institute Course: Current Problems in Education—3 cr. (3 and 0)

Ed 635—Special Institute Course: Curriculum—3 cr. (3 and 0)
Ed 636—Special Institute Course: Supervision and Administration—3 cr. (3 and 0)

Ed 660—Curriculum Development in the Elementary School—3 cr. (3 and 0)

Ed 662—Reading Diagnosis and Remediation—3 cr. (2 and 3)
Ed 665—Secondary School Curriculum—3 cr. (3 and 0)
Ed 671—The Exceptional Child—3 cr. (3 and 0)
Ed 672—Psychology of Mental Retardation—3 cr. (3 and 0)
Ed 673—Teaching the Mentally Retarded—3 cr. (3 and 0)

Ed 687—Methods and Materials in Speech Development—3 cr. (3 and 0)

Ed 694—School and Community Relationships—3 cr. (3 and 0)
Ed 697—Audio-Visual Aids in Education—3 cr. (3 and 0)
Ed 698—Teaching Secondary School Reading—3 cr. (3 and 0)
Ed 801—Seminar in Human Growth and Development—3 cr. (3 and 0)

ELECTRICAL AND COMPUTER ENGINEERING

Assistant Professors: D. C. Amoss, H. J. Helgert, R. D. Stinaff

Instructors: J. R. Fraker, C. W. Malstrom

EE 298—Digital Computation; Systems and Programs—1 cr. (1 and 0)
An introduction to digital computation and digital computer systems: Historical background; components of the computer system; information flow; storage; basic algorithms; flow charting; and introduction to instruction writing.

EE 299—Digital Computation—2 cr. (1 and 2)
A programming course designed to prepare students for the efficient use of digital computers. Fortran and PL-1 languages are used. An ideal course for those desiring a short but comprehensive introduction to computing. Prerequisite: EE 298.

EE 307—Basic Electrical Engineering—3 cr. (3 and 0)
Electrical engineering for students who need a strong background in the subject, but who are not planning to specialize in the field. A firm foundation in circuit theory is provided in this course. Prerequisite: Math 206, Phys 221, and Phys 223.

EE 312—Electromechanics—3 cr. (2 and 2)
The principles of energy conversion are introduced with emphasis on electromagnetic and electromechanical devices. From these, the mathematical and equivalent circuit models are developed, considering nonlinear magnetic characteristics and linear approximation. These models facilitate representation of the devices in extended systems. In-laboratory studies are made on the characteristics of saturable reactors, magnetic amplifiers, loudspeakers, transformers, d-c motors and generators, and a-c motors and generators. These characteristics are compared with those of the mathematical models. Prerequisite: EE 330, 331 and 340.

EE 315—Information Theory—3 cr. (3 and 0)
A course designed for those interested in developing a precise definition of information, and then applying this definition to the study of communication. Coding and the effect of noise on the system will be discussed. In the last part of the course upper bounds on the rate at which a process can transmit information will be obtained. Prerequisite: Approval of department.

EE 320—Electronics I—2 cr. (2 and 0)
The fundamental principles of solid-state electronic devices including the structural properties of semi-conductors, charge carrier motion, p-n junction theory, and electrical circuit models of transistors. Emphasis is given to the physical principles describing the operation of modern electronics components. Prerequisite: Phys 221, 222.

EE 321—Electronics II—2 cr. (2 and 0)
Solid-state circuit theory covering the design of small signal—low frequency amplifiers and multistage and feedback systems; applications involving opera-
tional amplifiers, field effect transistors and integrated circuits are covered.  
Prerequisite: EE 320, 330, 331.

EE 325—Electronics and Electromagnetics Laboratory I—1 cr.  
(0 and 2)  
Laboratory projects dealing with instrumentation and measurement procedures associated with solid-state electronic devices and electromagnetic fields.  
Prerequisite: Concurrent enrollment in EE 320 and 340.

EE 326—Electronics and Electromagnetics Laboratory II—1 cr.  
(0 and 2)  
Experimentation in electronics circuits design and electronic systems analysis, including integrated circuits. Projects relating to studies of time varying fields, transmission lines, wave guides, and antennas are included.  
Prerequisite: EE 325. Concurrent enrollment in EE 321 and 341.

EE 327—Engineering Applications of Probability and Random Variables—3 cr.  
(3 and 0)  
An introduction to probability and random variables with emphasis on engineering applications. Subjects which will be covered include: probability space, conditional probabilities, independent events, Bernoulli trials, random variables, distribution functions, functions of random variables, and correlation and power spectrum of stationary random processes.  
Prerequisite: Math 208.

EE 329—Logic and Computing Devices—3 cr.  
(2 and 2)  
A study of logic with an introduction to propositional calculus and Boolean Algebra. Number systems and representation of information. The use of electric devices to implement logic functions and computing elements. The organization and structure of computing systems.  
Prerequisite: Approval of department.

EE 330—Systems I—2 cr.  
(2 and 0)  
The systems concept and system analysis methods are developed. The system model is developed through the study of functions and data forms, perfect drivers, response, two terminal elements, system geometry, linear algebra and subsystems. Branch, node, mesh and state models are considered. Solution methods include the use of the analog and digital computer. Nonlinear components are introduced in simple systems.  
Prerequisite: Math 208 or approval of department.

EE H330—Systems I—2 cr.  
(2 and 0)  
A special honors course in which the systems concept and system analysis methods are developed. The system model is developed through the study of functions and data forms, perfect drivers, response, two terminal elements, system geometry, linear algebra and subsystems. Branch, node, mesh, and state models are considered. Solution methods include the use of the analog and digital computer. Nonlinear components are introduced in simple systems.  
Prerequisite: Math 208 or approval of department.

EE 331—Electrical Circuits Workshop I—2 cr.  
(0 and 4)  
Computational sessions, demonstrations and laboratory projects are coordinated with EE 330 (Systems I) in the area of electrical phenomenon. Electrical instrumentation and measurement procedures are introduced to illustrate component modeling and network response. Applications involving both con-
tinuous and discrete behavior are discussed. Problem solving using digital and analog computers is emphasized. *Prerequisite:* Concurrent enrollment with EE 330.

EE H331—**Electric Circuits Workshop I**—2 cr. (0 and 4)

A special honors workshop including computational sessions, demonstrations, and laboratory projects are coordinated with EE H330 (Systems I) in the area of electrical phenomenon. Electrical instrumentation and measurement procedures are introduced to illustrate component modeling and network response. Applications involving both continuous and discrete behavior are discussed. Problem solving using digital and analog computers is emphasized. *Prerequisite:* Concurrent enrollment with EE H330.

EE 332—**Systems II**—2 cr. (2 and 0)

A continuation of Systems I. Transforms of equations and functions and formulation of system equations in the S-domain. Two-part and N-terminal components studies include input-output and transfer parameters, measurement procedures, and system reduction methods. Solution methods include the use of transforms, analog computers and digital computers. Optimization methods are introduced. *Prerequisite:* EE 330.

EE 333—**Electric Circuits Workshop II**—2 cr. (0 and 4)

A continuation of EE 331. Transfer function concepts, multiterminal component modeling and computer simulations are among topics covered. A variety of electrical devices and systems are discussed including machinery and other energy conversion and solid-state devices. *Prerequisite:* Concurrent enrollment in EE 332.

EE 340—**Electric and Magnetic Fields I**—2 cr. (2 and 0)

An introduction to classical electromagnetics. Topics include vector analysis, Coulomb's law, electric field intensity, Gauss's law, potential theory, solution of Laplace's equation, D.C. magnetic fields, magnetic circuits and devices, and forces in magnetic fields. *Prerequisite:* Math 208.

EE 341—**Electric and Magnetic Fields II**—2 cr. (2 and 0)

Continuation of EE 340 to include time-varying fields, Maxwell's equations, transmission lines, waveguides, and antennas. *Prerequisite:* EE 340.

EE 350—**Digital Information Processing**—3 cr. (2 and 2)

Introduction to the basic characteristics of general purpose digital computer systems. The computer is viewed as a discrete sequential processor operating on discrete data rather than as a high speed calculating device. Topics include: general machine organization and operation, information flow within the machine, internal and external data types and structures, data transfers and communication with external devices, and interrelations between software and hardware. The various levels of programming systems are reviewed, but the main emphasis is placed on lower-level languages which provide the means for more flexible control and utilization of the digital system. *Prerequisite:* Junior standing in engineering or physical sciences and consent of instructor.

EE 351—**Real-Time Application of Digital Computers**—3 cr. (2 and 2)

An introduction of the application and operation of digital computers in a real-time or near real-time environment. An extension of the topics of EE 350 with the main emphasis on real-time applications and on-line data acquisition
and reduction. Topics include: hardware characteristics such as interrupt and data break facilities, analog-to-digital and digital-to-analog signal conversion, timing considerations, and programming systems. The utilization of the computer as a system control component is considered as well as its use in simulation. **Prerequisite:** EE 350 or approval of department.

EE 401—Seminar—1 cr. (1 and 0)

Emphasis is placed on methods of presenting engineering concepts appropriate to an industrial environment. Recent developments in the field of electrical engineering are discussed as examples with consideration being given to their economic as well as scientific significance. A library research paper is a required part of the course. **Prerequisite:** Senior standing.

EE 403—Energy Conversion—3 cr. (3 and 0)

Various methods of energy conversion, both electromechanical and direct. Fuel cells, magnetohydrodynamics, nuclear and other methods are discussed along with more conventional systems. **Prerequisite:** Approval of department.

EE 405—Special Problems—Variable credit.

Electrical Engineering problems assigned to the student according to his needs and capabilities. The purpose is to give students a chance to do projects, either theoretical or experimental, on subjects not covered in other courses. **Prerequisite:** Approval of department.

EE H405—Special Problems—Variable credit.

A special honors course of Electrical Engineering problems assigned to the student according to his needs and capabilities. The purpose is to give students a chance to do projects, either theoretical or experimental, on subjects not covered in other courses. **Prerequisite:** Approval of department.

EE 406—Introduction to Integrated Circuits—3 cr. (3 and 0)

Integrated circuit technology, devices and applications. Discussion of fabrication methods, survey of standard circuit characteristics, design and layout principles, linear and digital circuit applications. **Prerequisite:** Senior standing.

EE 410—Systems III—3 cr. (3 and 0)

An extension of Systems II into more advanced topics including flow concepts, stability, synthesis, optimization, and analysis with digital machines using—CSMP-ECAP and other simulation programs. **Prerequisite:** EE 332.

EE 411—Electrical Systems Workshop III—2 cr. (0 and 4)

A continuation of EE 333. Larger more complex systems are considered. Projects illustrating state space and classical control theory are undertaken. Network synthesis and analysis through digital simulations are also covered. **Prerequisite:** EE 333.

EE 412—Digital Control Systems—3 cr. (3 and 0)

A discussion of the technical and economic aspects of the field of digital control. Major emphasis is placed on the various hardware, installation, and use topics in the field as well as theoretical discussions of the theory of computer automatic control and systems optimization. A comprehensive preview of the status of current theoretical investigations and their place in the industrial control scene. Associated computer control hardware, such as process sensors, signal systems, and final control elements are also examined. Digital
Description of Courses

and hybrid simulation studies, as well as logic control system designs augment the theoretical presentations.

EE 419—Electrical Machinery Laboratory I—1 cr. (0 and 2)
A laboratory course designed to accompany EE 421. Includes measurements of A.C. and D.C. machine parameters, analog computer simulation with emphasis on control. Prerequisite: Enrollment in EE 421.

EE 420—Power Systems Analysis—3 cr. (3 and 0)
Study of electric power system operation. Subjects covered include transmission lines, load-flow studies, economic dispatching, symmetrical components, fault calculations, and introduction to power system stability. Prerequisite: EE 312.

EE 421—Electrical Machinery—3 cr. (3 and 0)
Characteristics of A.C. and D.C. machines are studied with emphasis on dynamic operation and control. Prerequisite: EE 333 and EE 341.

EE 422—Electronics III—2 cr. (2 and 0)
An introduction to logic circuits, switching devices, and electronic storage systems. Frequency response of electronic components and systems, oscillator fundamentals, principles of modulation and power supply design are also covered. Prerequisite: EE 321, EE 333.

EE 428—Communications Theory I—3 cr. (3 and 0)
A course in modern communications theory. Topics covered are Fourier transforms, power spectra, correlation, signals in linear networks, amplitude modulation, frequency modulation, sampling and pulse modulation. Prerequisite: EE 321.

EE 429—Fundamentals of Digital Computer Design—3 cr. (3 and 0)
This course is designed for senior engineering and science students who are interested in the organization, logic, and circuit aspects of digital computers. Preliminary investigation of algorithms for performing digital arithmetic operations is followed by a study of logic circuits, switching matrices, computer elements and computer organization. The course is concluded with the design of a digital computer. Prerequisite: EE 321.

EE 430—Communications Theory II—3 cr. (3 and 0)
A continuation of EE 428 with emphasis on the statistical properties of signals. Topics covered are random signals and noise, signal space and continuous channels, digital data systems, optimum detection theory. Prerequisite: EE 428 and 327.

EE 431—Digital Electronics—3 cr. (3 and 0)
Active and passive wave-shaping, memory, and switching circuits. Prerequisite: EE 422.

EE 432—Instrumentation—3 cr. (3 and 0)
Theory and analysis of transducers and related circuits and instrumentation. Generalized configurations and performance characteristics of instruments will be considered. Transduction devices for measuring physical parameters such as motion, force, torque, pressure, flow, and temperature will be discussed. Prerequisite: EE 321 or approval of department.
EE 433—Digital Electronics Laboratory—1 cr. (0 and 2)
A laboratory course designed to accompany EE 431. Prerequisite: Concurrent registration in EE 431.

EE 434—Power Electronics—3 cr. (3 and 0)
A study of electronic devices and systems which are designed to control or regulate large amounts of power. Included are SCR applications to inverters, motor controls, high-current power supplies, frequency converters, etc. Also, high-current switching systems, voltage stabilizers, and other power applications of electronics are considered. Prerequisite: EE 422.

EE 435—Communications Circuits—3 cr. (3 and 0)
Communication circuits used in amplification, modulation, detection and other signal processing in modern communication systems. Recent developments in electronic devices, such as integrated circuits, will be considered as circuit components along with other solid state and vacuum electronic devices. Prerequisite: EE 422.

EE 436—Radiation and Wave Propagation—3 cr. (3 and 0)
Electromagnetic waves, waveguides, and antennas. Prerequisite: EE 341.

EE 437—Laser Technology and Applications—3 cr. (3 and 0)
An introduction to the design factors and operating principles of solid-state, gas, and semiconductor lasers, couched in the language of electrical engineering and electron physics. Applications of laser technology to such areas as communications, computers, measurements, and medicine are presented. The theory and applications of holography are explored. Special problems and demonstrations relative to electrical engineering application of lasers are designed to augment the theoretical presentations.

EE 450—Systems IV—3 cr. (3 and 0)
A continuation of Systems III. Modern control system concepts including matrices and vector spaces, state equations, sample data systems, controllability and observability, nonlinear systems and synthesis. Also advanced computations in optimizing parametric programming and simulation are done using the analog, digital, and hybrid computers. Prerequisite: EE 410.

EE 451—System Design Workshop IV—2 cr. (0 and 4)
A project oriented course which brings together electrical engineering students of dissimilar training into teams or project groups. Assignments are made to each group which are designed to help develop an appreciation for individual and creative thinking as well as team effort. Prerequisite: EE 411.

EE 460—Computer-Aided Analysis and Design—3 cr. (3 and 0)
Principles and methods suited to the solution of engineering problems on the digital computer. Topics include widely used methods for the solution of the systems of algebraic and/or differential equations which arise in the modeling of engineering systems, data approximation and curve fitting, continuous system simulation languages, and design-oriented programming systems. Prerequisite: EE 332 or approval of department.

EE 461—Analog/Hybrid Computation and Simulation—3 cr. (2 and 2)
A continuation of the introductory analog concepts considered in EE 331 and 333. Topics include nonlinear modeling, function generation, signal
processing, and an introduction to hybrid computing. Prerequisite: EE 333 or approval of department.

EE 603—Energy Conversion—3 cr. (3 and 0)
EE 606—Introduction to Integrated Circuits—3 cr. (3 and 0)
EE 610—Systems III—3 cr. (3 and 0)
EE 611—Electrical Systems Workshop III—2 cr. (0 and 4)
EE 612—Digital Control Systems—3 cr. (3 and 0)
EE 619—Electrical Machinery Laboratory I—1 cr. (0 and 2)
EE 620—Power System Analysis—3 cr. (3 and 0)
EE 621—Electrical Machinery—3 cr. (3 and 0)
EE 622—Electronics III—2 cr. (2 and 0)
EE 628—Communications Theory I—3 cr. (3 and 0)
EE 629—Fundamentals of Digital Computer Design—3 cr. (3 and 0)
EE 630—Communications Theory II—3 cr. (3 and 0)
EE 631—Digital Electronics—3 cr. (3 and 0)
EE 632—Instrumentation—3 cr. (3 and 0)
EE 633—Digital Electronics Laboratory—1 cr. (0 and 2)
EE 634—Power Electronics—3 cr. (3 and 0)
EE 635—Communications Circuits—3 cr. (3 and 0)
EE 636—Radiation and Wave Propagation—3 cr. (3 and 0)
EE 637—Optics of Coherent and Noncoherent Electromagnetic Radiations—3 cr. (3 and 0)
EE 650—Systems IV—3 cr. (3 and 0)
EE 651—System Design Workshop IV—2 cr. (0 and 4)
EE 660—Computer-Aided Analysis and Design—3 cr. (3 and 0)
EE 661—Analog/Hybrid Computation and Simulation—3 cr. (2 and 2)
EE 801—Analysis of Linear Systems I—3 cr. (3 and 0)
EE 802—Analysis of Linear Systems II—3 cr. (3 and 0)
EE 803—Seminar—1 cr. (1 and 0)
EE 804—Network Synthesis I—3 cr. (3 and 0)
EE 805—Network Synthesis II—3 cr. (3 and 0)
EE 806—Nonlinear Networks and Systems I—3 cr. (3 and 0)
EE 807—Power System Stability—3 cr. (3 and 0)
EE 808—Energy Conversion—3 cr. (3 and 0)
EE 809—Advanced Computer Control Systems—3 cr. (3 and 0)
EE 810—Modern Control Theory I—3 cr. (3 and 0)
EE 811—Modern Control Theory II—3 cr. (3 and 0)
EE 812—Sampled Data Systems—3 cr. (3 and 0)
EE 814—Nonlinear Automatic Controls—3 cr. (3 and 0)
EE 815—Random Data Measurements and Analysis—3 cr. (3 and 0)
EE 819—Detection and Estimation Theory—3 cr. (3 and 0)
EE 820—Theory of Communications I—3 cr. (3 and 0)
EE 821—Theory of Communications II—3 cr. (3 and 0)
EE 822—Information Theory—3 cr. (3 and 0)
EE 823—Integrated Circuit Technology—3 cr. (3 and 0)
EE 824—Applications of Integrated Circuits—3 cr. (3 and 0)
EE 825—Solid-State Electronics—3 cr. (3 and 0)
EE 826—Large-Scale Integration—3 cr. (3 and 0)
EE 827—Instrumentation and Measurements—3 cr. (3 and 0)
EE 830—Electromagnetics I—3 cr. (3 and 0)
EE 831—Electromagnetics II—3 cr. (3 and 0)
EE 832—Antenna Theory I—3 cr. (3 and 0)
EE 833—Antenna Theory II—3 cr. (3 and 0)
EE 834—Microwave Electronics—3 cr. (3 and 0)
EE 836—Optical Electromagnetics and Quantum Electronics—3 cr. (3 and 0)
EE 850—Computation and Simulation—3 cr. (3 and 0)
EE 851—Theory and Design of Digital-Analog Machines—3 cr. (3 and 0)
EE 852—Digital Computers and Information Processing—3 cr. (3 and 0)
EE 855—Artificial Intelligence—3 cr. (3 and 0)
EE 856—Pattern Recognition—3 cr. (3 and 0)
EE 857—Coding Theory—3 cr. (3 and 0)
EE 858—Automata Theory—3 cr. (3 and 0)
EE 860—Engineering Application of Optimization—3 cr. (3 and 0)
EE 861—Foundation and Methodology of Systems Engineering—3 cr. (3 and 0)
EE 863—Advanced Physical Systems I—3 cr. (3 and 0)
EE 864—Advanced Physical Systems II—3 cr. (3 and 0)
EE 870—Biosystems Analysis—3 cr. (3 and 0)
EE 890—Selected Topics in Electrical Engineering—3 cr. (3 and 0)
EE 891—Research—3 cr.
EE 991—Doctoral Research—Credit to be arranged.
ENGINEERING

ENGR 101—ENGINEERING SYSTEMS—Non-credit (1 and 0)
A series of lectures outlining the role and scope of engineering in service to mankind. Emphasis is placed on the difference between science and engineering, the emerging role of engineering in new technology, the important technological needs of mankind, and the importance of the humanities and social studies to the engineer.

ENGR 491—SEMINAR—1-3 cr. (1-3 and 0)
A study of the dynamic role of engineering in relationship to man and his environment. Topics not covered in formal courses will be presented to keep students abreast of today’s rapidly changing technology. Prerequisite: Permission of instructor.

ENGINEERING GRAPHICS

Professor: E. Laitala, Head
Associate Professors: B. E. Dunkle, A. F. Hammond, L. H. Jameson, C. M. McHugh, R. L. Perry
Assistant Professors: C. W. Carter, C. D. Meeks
Instructor: C. O. Huey

EG 101—FREEHAND SKETCHING—1 cr. (0 and 3)
Principles of technical sketching, including the development of skills in technical lettering and freehand orthographic and pictorial drawing.

EG 103—ENGINEERING COMMUNICATIONS—3 cr. (1 and 6)
The role of engineering communication in engineering and management. Graphic communication includes lettering, sketching, orthographic projection, auxiliary projection, sections and conventional practices, dimensioning, working drawings. Architectural drawing, charts and graphs, presentation techniques. Manufacturing philosophy; interrelation between product design and production processes. For Industrial Management majors.

EG 104—ENGINEERING COMMUNICATION AND DESIGN—2 cr. (0 and 6)
The role of engineering communication from the manager’s point of view. Working drawings relating product design and production processes. Architectural drawing nomography, charts and graphs, presentation techniques. Prerequisite: EG 109 or consent of instructor.

EG 105—ENGINEERING GRAPHICS—2 cr. (0 and 6)
A course in graphical communication. Freehand sketching, orthographic and auxiliary projection, sectional views, and conventional practices, dimensioning, reading drawings.

EG 109—ENGINEERING GRAPHICAL COMMUNICATION—2 cr. (0 and 6)
Graphical methods of communicating ideas and information in engineering. Development of the student’s ability to visualize three dimensional forms and spatial relationships through the study of creative freehand sketching and basic fundamentals of engineering representation. Use of drafting aids, introduction to computer graphics, curve plotting, reproduction methods.
EG 110—Engineering Communication (For Technical Operations)—2 cr. (0 and 6)

EG 201—Engineering Graphics for Industrial Education—3 cr. (1 and 6)
A comprehensive study of Engineering Graphics fundamentals. The course includes lettering, use of instruments, technical sketching, multi-viewing drawing, auxiliary projection, descriptive geometry, sectional views, dimensioning, fasteners, detail and assembly drawings.

Prerequisite: EG 201.

EG 202—Graphical Technology for Industrial Education—3 cr. (1 and 6)
Continuation of EG 201 with emphasis on depth in graphical communication. Working drawings to include detail and assembly drawings. Intersections and developments. Specifications, standards. Architectural drawings. Production illustration, pedagogy of graphics, pragmatic and creative design.

Prerequisite: EG 201.

EG 301—Advanced Engineering Graphics—3 cr. (1 and 6)
Application of the fundamental principles of Engineering Graphics to the solution of three dimensional spatial problems in the design of various engineering systems. Creative-functional design, introduction to graphical kinematics and computer-aided design.

Prerequisite: EG 109 or 202.

EG 302—Graphical Computation—3 cr. (2 and 3)
Graphic layouts of empirical equations. The application of graphical solution of equations, nomography, and the graphical calculus to the solution of problems in engineering and science. Graphical solution of differential equations.

Prerequisite: EG 109, Math 106 or equivalent.

ENGINEERING MANAGEMENT

Professors: C. C. Davis, B. J. Todd, C. H. Whitehurst, Jr.
Assistant Professors: T. H. Gunter, Jr., J. A. Turner

EMgt 910—Seminar in Production Management—2 cr. (2 and 0)
EMgt 911—Seminar in Decision Theory—2 cr. (2 and 0)
EMgt 912—Seminar in Finance—3 cr. (3 and 0)
EMgt 913—Systems Analysis—3 cr. (3 and 0)
EMgt 991—Doctoral Research—Credit to be arranged.
ENGINEERING MECHANICS

Professors: N. R. Bauld, Jr., R. W. Moorman, Head
Associate Professors: W. E. Castro, R. E. Elling, J. G. Goree, A. G. Law,
R. F. Nowack, M. K. Richardson, P. B. Zielinski
Assistant Professor: C. R. Mitchell

EM 201—Engineering Mechanics (Statics)—3 cr. (3 and 0)
Forces and force systems and their external effect on bodies; principally the
condition of equilibrium. The techniques of vector mathematics are employed,
and the rigor of physical analysis is emphasized. Prerequisite: Phys 122, con-
current registration in Math 206.

EM H201—Engineering Mechanics (Statics)—3 cr. (3 and 0)
An honors section of EM 201; admission by invitation.

EM 202—Engineering Mechanics (Dynamics)—3 cr. (3 and 0)
A continuation of EM 201. The principal topics are kinematics and kinetics
of particles and bodies of finite size. Techniques of vector mathematics are
employed. Prerequisite: EM 201, Math 206.

EM H202—Engineering Mechanics (Dynamics)—3 cr. (3 and 0)
An honors section of EM 202; admission by invitation.

EM 211—Particle Mechanics: Statics and Dynamics—3 cr. (3 and 0)
Force and force systems and their effect on particles; the conditions of
equilibrium and the kinematics and kinetics of particle motion. The tech-
niques of vector mathematics are employed, and the rigor of physical analysis
is emphasized. Prerequisite: Phys 122, Math 206.

EM 304—Mechanics of Materials—3 cr. (3 and 0)
The relationships between external loads on solid bodies or members and
the resulting internal effects and dimension changes, including the derivation
of rational formulas for stresses and deformations and the identification and
use of important mechanical properties of engineering materials. Prerequisite:
EM 201 and Math 206.

EM H304—Mechanics of Materials—3 cr. (3 and 0)
An honors section of EM 304; admission by invitation.

EM 305—Mechanics of Materials Laboratory—1 cr. (0 and 3)
Theoretical relationships considered in EM 304 are verified. Students observe
the behavior under load and the failure of engineering materials identify and
evaluate mechanical properties of materials important to design and manu-
facturing processes; and are acquainted with various testing methods, testing
machines, and instruments. Prerequisite: Must be accompanied or preceded
by EM 304.

EM 320—Fluid Mechanics—3 cr. (3 and 0)
The behavior of fluids at rest or in motion, including the study of fluid
properties. Emphasis is placed upon a rational, analytical approach from
which are developed basic principles of broad applicability to all fields of
engineering. Prerequisite: EM 202 or EM 211.

EM H320—Fluid Mechanics—3 cr. (3 and 0)
An honors section of EM 320; admission by invitation.
EM 322—Fluid Mechanics Laboratory—1 cr. (0 and 3)

The principles developed in EM 320 are verified and demonstrated. Familiarization with orderly techniques in organizing and reporting results of experimental investigations and with the use of instruments and equipment is afforded. Prerequisite: Must be accompanied or preceded by EM 320.

EM 421—Hydrology and Hydraulics—2 cr. (2 and 0)

Elements of surface water and ground water hydrology are introduced and applied to engineering problems. Special topics of open channel hydraulics and water distribution systems are developed from the fundamentals of fluid mechanics. Prerequisite: EM 320.

EM 425—Advanced Mechanics of Materials—3 cr. (3 and 0)

A continuation of EM 304. This course includes traditional topics in strength of materials, such as shear center, unsymmetrical bending, torsion of non-circular sections, curved members, and elastic stability. Additionally, introduces topics from theory of elasticity as related to simple bending and torsion problems. Prerequisite: EM 304.

EM 450—Mechanical Vibrations—3 cr. (3 and 0)

Mathematical analysis of physical problems in the vibration of mechanical systems. Topics include: linear free vibrations, forced vibrations and damping in single degree of freedom systems, transient response, multidegree of freedom systems with lumped parameters, Lagrange's equations. Prerequisite: EM 202, 304, and Math 208.

EM 470—Experimental Stress Analysis I—3 cr. (2 and 3)

Experimental analysis of static and dynamic stress fields. Emphasis is on the techniques required to obtain data and the theoretical analysis required for proper interpretation. Methods and instrumentation associated with strain gages (including transducer applications), moiré girds, brittle coatings, birefringent coatings, and photoelasticity are studied.

EM 621—Hydrology and Hydraulics—2 cr. (2 and 0)

EM 625—Advanced Mechanics of Materials—3 cr. (3 and 0)

EM 650—Mechanical Vibrations—3 cr. (3 and 0)

EM 670—Experimental Stress Analysis I—3 cr. (2 and 3)

EM 802—Experimental Stress Analysis II—3 cr. (2 and 3)

EM 821—Continuum Mechanics—3 cr. (3 and 0)

EM 823—Dimensional Analysis and Dynamic Similarity—3 cr. (3 and 0)

EM 827—Topics in Analytical Mechanics—3 cr. (3 and 0)

EM 829—Energy Methods and Variational Principles—3 cr. (3 and 0)

EM 831—Theory of Elasticity I—3 cr. (3 and 0)

EM 832—Theory of Elasticity II—3 cr. (3 and 0)

EM 834—Theory of Elastic Stability—3 cr. (3 and 0)

EM 845—Intermediate Dynamics—3 cr. (3 and 0)

EM 851—Fluid Dynamics—3 cr. (3 and 0)
EM 852—Theory of Ideal Fluid Flow—3 cr. (3 and 0)
EM 853—Theory of Viscous Fluid Flow—3 cr. (3 and 0)
EM 856—Flow in Open Channels—3 cr. (3 and 0)
EM 881—Special Problems—3 cr. (3 and 0)
EM 889—Seminar—0 or 1 cr. (1 and 0)
EM 890—Seminar—0 or 1 cr. (1 and 0)
EM 891—Research—Credit to be arranged.
EM 932—Theory of Plasticity—3 cr. (3 and 0)
EM 980—Special Topics in Mechanics—3 cr. (3 and 0)
EM 981—Special Topics in Mechanics—3 cr. (3 and 0)
EM 982—Special Topics in Mechanics—3 cr. (3 and 0)
EM 983—Special Topics in Mechanics—3 cr. (3 and 0)
EM 991—Doctoral Research—Credit to be arranged.

ENGLISH

Professors: R. J. Calhoun, H. M. Cox, C. B. Green, M. A. Owings, Head
Associate Professors: C. O. Caskey, A. J. Fear, H. M. Felder, Jr., C. Gum,
C. H. Watson, J. P. Winter
Assistant Professors: R. E. Barfield, H. B. Bryant, R. L. Cross, T. E.
Douglass, H. B. Hannah, C. M. Israel, A. L. Recoulley III, R. O.
Rogers, Corinne H. Sawyer, J. B. Simms, B. N. Skardon, R. A. Under-
wood, M. O. Usrey, E. P. Willey, C. H. Woodell
Instructors: Mary S. Adams, Ottie W. Arrington, R. F. Barton, J. D.
Blanche, W. V. Bost, Joan T. Cross, S. K. Eisminger, Virginia L.
Ganim, D. N. Griffin, R. B. Heaton, Jr., W. B. Wood, Jr.

ENGL 011—English—5 cr. (5 and 0)
Writing centered around sentence structure and the single paragraph. Prose
readings to accompany class work.

ENGL 013—English—5 cr. (5 and 0)
Extensive writing of compositions longer than a paragraph. Prose, non-
fiction readings to accompany class work.

ENGL 101—English Composition—3 cr. (3 and 0)
Training in correct and effective expression, in brief expository essays; review
of the fundamentals of grammar and punctuation; instruction in common ex-
pository methods.

ENGL H101—English Composition—3 cr. (3 and 0)
Honors section of Engl 101; admission by invitation.

ENGL 102—English Composition—3 cr. (3 and 0)
Continued emphasis on correct and effective expression; an introduction to
non-fiction prose, fiction, drama, and poetry; training in the organization and
writing of the research report. Prerequisite: Engl 101.
ENGL H102—ENGLISH COMPOSITION—3 cr. (3 and 0)
Honors section of Engl 102; admission by invitation.

ENGL 105—FUNDAMENTALS OF ORAL COMMUNICATION—3 cr. (3 and 0)
Introduction to the problems of oral communication in the following areas: oral reading, listening, discussion, speaking, with emphasis on individual needs; oral exercises.

ENGL 111—ENGLISH FOR FOREIGN STUDENTS—3 cr. (3 and 2)
A special course for students learning English as a second language. Intensive study and drill in American English pronunciation and listening comprehension. Required of all foreign students who do not make a satisfactory grade on screening examinations in oral English.

ENGL 203—A SURVEY OF ENGLISH LITERATURE—3 cr. (3 and 0)
Chief British authors and works from Beowulf through the Romantic period; continued emphasis on composition. Prerequisite: Engl 102.

ENGL H203—SURVEY OF ENGLISH LITERATURE—3 cr. (3 and 0)
Honors section of Engl 203; admission by invitation.

ENGL 204—A SURVEY OF ENGLISH AND AMERICAN LITERATURE—3 cr. (3 and 0)
Chief British authors and works from the Victorian period to the present time, and selected readings from American literature. Proficiency in composition must be demonstrated. Prerequisite: Engl 203 or permission of the Department.

ENGL H204—SURVEY OF ENGLISH AND AMERICAN LITERATURE—3 cr. (3 and 0)
Honors section of Engl 204; admission by invitation.

ENGL 215—INTRODUCTION TO DRAMA—3 cr. (3 and 0)
Introduction to drama as a literary form through readings of representative plays from Aeschylus to Ibsen. Prerequisite: Engl 101, 102.

ENGL 217—VOCABULARY BUILDING—3 cr. (3 and 0)
Development of a useful, discriminating vocabulary for writing, speaking, and reading. Student notebooks and proficiency quizzes. Prerequisite: Engl 101 and 102.

ENGL 221—THE CLASSICS IN TRANSLATION—3 cr. (3 and 0)

ENGL 223—CONTINENTAL FICTION IN TRANSLATION—3 cr. (3 and 0)
Selected fiction of the European masters, primarily Russian, French, German, and Spanish. Prerequisite: Engl 101, 102.

ENGL 231—INTRODUCTION TO JOURNALISM—3 cr. (3 and 0)
Instruction and practice in writing for mass media; editorial responsibilities. Prerequisite: Engl 102.

ENGL 240—BLACK AMERICAN LITERATURE—3 cr. (3 and 0)
Black American literature from its beginning to the present. A critical examination of essays, short stories, novels, drama, and poetry produced by the Black American. Prerequisite: Engl 101 and 102.
ENGL 300—JOURNALISM WORKSHOP—1 cr. (1 and 0)
Responsibilities and duties of students editing uncensored publications; criticism of student publications. Open only to members of publication staffs. Prerequisite: Engl 102.

ENGL 301—PUBLIC SPEAKING—3 cr. (3 and 0)
Practical training in public speaking; attention to diction, voice, and platform presence; an introduction to parliamentary procedure; practice in writing and delivering short speeches. Prerequisite: Sophomore standing.

ENGL 302—PERSUASION—3 cr. (3 and 0)
The theories and art of ethical oral persuasion. The composition and delivery of speeches of a persuasive nature to convince, to stimulate, and to actuate. Prerequisite: Engl 301.

ENGL 303—VOICE AND DICTION—3 cr. (3 and 0)
Practical training in speech, with emphasis on clarity, vocal variety, and tone quality.

ENGL 304—ADVANCED COMPOSITION—3 cr. (3 and 0)
Supervised writing for students of advanced standing, each student undertaking projects according to his interest; some attention to reports, business letters, research methods and materials. Weekly papers and some larger exercises. Limited enrollment. Prerequisite: Engl 203 or 204.

ENGL 305—ORAL INTERPRETATION OF LITERATURE—3 cr. (3 and 0)
Analysis and oral interpretation of selected poetry and prose; training in development of effective tone production. Prerequisite: Engl 101, 102.

ENGL 306—DEBATING—1 cr. (1 and 0)
The application of debating to contemporary problems. May be repeated until a maximum of three credits has been earned. Prerequisite: Permission of the instructor.

ENGL 308—PRINCIPLES OF ACTING—3 cr. (3 and 0)
Acting for the stage, basic techniques of characterization, audition procedures, exercises in emotional recall and pantomime, experience in supervised performance. Prerequisite: Engl 101, 102.

ENGL 310—INTRODUCTION TO THE THEATRE—3 cr. (3 and 0)
The history of play production from the Greeks to modern times. The role of lighting, costuming, set design and other elements in play production. Prerequisite: Junior standing.

ENGL 311—THEATRE LABORATORY—1 cr. (0 and 3)
Participation in theatre production including stage management, direction, costume, makeup, lighting, sound, scenery, and business management. No formal class meetings. One credit. May be repeated for a total of three credits. Prerequisite: Sophomore standing and permission of the instructor.

ENGL 331—CREATIVE WRITING—3 cr. (3 and 0)
The technique of non-expository writing—narration, description, dramatization. Prerequisite: Sophomore standing or higher and permission of the instructor.

ENGL 332—CREATIVE WRITING—3 cr. (3 and 0)
A continuation of Engl 331. Prerequisite: Engl 331 or permission of the instructor.
ENGL 333—THE STRUCTURE OF FICTION—3 cr. (3 and 0)
A study of the short story, the novella, and the novel from the writer’s point of view. Prerequisite: Permission of the instructor.

ENGL 351—CHILDREN’S LITERATURE—3 cr. (3 and 0)
Wide reading in prose and verse suitable for children in elementary grades. Prerequisite: Engl 203 and 204.

ENGL 352—ADOLESCENT LITERATURE—3 cr. (3 and 0)
Wide reading in prose and verse suitable for children in secondary schools. Prerequisite: Engl 203 and 204.

ENGL 362—SPEECH IN THE ELEMENTARY CLASSROOM—3 cr. (3 and 0)
The development of oral communication skills in children and the use of speech improvement activities to motivate spontaneous, accurate self-expression. Prerequisite: Junior standing.

ENGL 402—THE ENGLISH LANGUAGE—3 cr. (3 and 0)
Studies in English usage and the historical development of the language. Prerequisite: Engl 203 and 204.

ENGL 404—THE STRUCTURE OF MODERN ENGLISH—3 cr. (3 and 0)
Structural linguistic analysis; principles of phonology, morphology, and syntax as related to traditional, structural, and transformational grammars. Recommended for English teachers. Prerequisite: Engl 203, 204.

ENGL 405—SHAKESPEARE—3 cr. (3 and 0)
An introduction to Shakespeare’s plays through a study of the tragedies Hamlet, Othello, King Lear, Macbeth, Anthony and Cleopatra, and of the two tragic plays Romeo and Juliet and Julius Caesar. Prerequisite: Engl 203, 204.

ENGL 406—SHAKESPEARE—3 cr. (3 and 0)
A selective study of Shakespeare’s comedies and histories. Prerequisite: Engl 203 and 204.

ENGL 409—CHAUCER—3 cr. (3 and 0)
Chaucer as an artist; the “Prologue” for historical and linguistic orientation; “The Canterbury Tales,” “House of Fame,” “Parliament of Fowls,” and “Troilus and Criseyde” as art forms. Prerequisite: Engl 203 and 204.

ENGL 413—CLASSICAL DRAMA—3 cr. (3 and 0)
Selected readings in the dramatic literature of classical Greece and Rome. Prerequisite: Engl 203 and 204.

ENGL 416—MODERN DRAMA—3 cr. (3 and 0)
Principles and progress of drama from Ibsen to the present; analysis of representative plays; critical reports; discussion of trends in contemporary drama. Prerequisite: Engl 203 and 204.

ENGL 422—A SURVEY OF AMERICAN LITERATURE—3 cr. (3 and 0)
The Colonial Period to the Civil War, with emphasis on major authors. Prerequisite: Engl 203 and 204.

ENGL 423—A SURVEY OF AMERICAN LITERATURE—3 cr. (3 and 0)
From the Civil War to the early twentieth century, with emphasis on major authors. Prerequisite: Engl 203 and 204.
ENGL 424—A Survey of American Literature—3 cr. (3 and 0)
Twentieth century, with emphasis on major authors. (Not open to those who have passed Engl 488.) **Prerequisite:** Engl 203 and 204.

ENGL 425—The Romantic Revival—3 cr. (3 and 0)
The eighteenth-century forerunners of Romanticism; Wordsworth, Coleridge, Byron, Shelley, Keats. **Prerequisite:** Engl 203 and 204.

ENGL 427—Victorian Poetry—3 cr. (3 and 0)
Extensive readings from the poets of the Victorian Age. **Prerequisite:** Engl 203 and 204.

ENGL 429—Nineteenth Century Prose—3 cr. (3 and 0)
Readings in the fiction of the nineteenth century after Jane Austen and in the essays of the Romantic and Victorian periods. **Prerequisite:** Engl 203 and 204.

ENGL 431—The Restoration and Eighteenth Century—3 cr. (3 and 0)
Readings in Dryden, Swift, Pope, and Dr. Johnson. **Prerequisite:** Engl 203 and 204.

ENGL 435—Southern Literature—3 cr. (3 and 0)
The intellectual and literary achievement of the South from 1607 to the present, with emphasis upon the writers of the nineteenth century. **Prerequisite:** Engl 203 and 204.

ENGL 436—Milton and His Age—3 cr. (3 and 0)
The development of Milton’s thought and art in relation to his times and to the writings of his contemporaries. **Prerequisite:** Engl 203 and 204.

ENGL 437—The Eighteenth Century English Novel—3 cr. (3 and 0)
A critical and historical study of the English novel from Defoe to Jane Austen. **Prerequisite:** Engl 203 and 204.

ENGL 438—Twentieth Century Poetry—3 cr. (3 and 0)
The modern tradition in English and American poetry from Yeats to the present; relevant critical essays. (Not open to those who have completed Engl 424.) **Prerequisite:** Engl 203 and 204.

ENGL 439—Twentieth Century Fiction—3 cr. (3 and 0)
American and British novelists and short story writers of the twentieth century. **Prerequisite:** Engl 203 and 204.

ENGL 440—Applied Literary Criticism—3 cr. (3 and 0)
Major critical approaches to literature, in theory and practice, from Aristotle to the present. **Prerequisite:** Engl 203 and 204.

ENGL 441—A Survey of World Literature I—3 cr. (3 and 0)
Translations from the Hellenic, Hebraic, and Oriental worlds, with emphasis on major authors. **Prerequisite:** Engl 203 and 204.

ENGL 442—A Survey of World Literature II—3 cr. (3 and 0)
Translations from the Medieval, Renaissance and Modern worlds, with emphasis on major authors. **Prerequisite:** Engl 203 and 204.

ENGL 443—Seventeenth Century Poetry and Prose—3 cr. (3 and 0)
A survey of British authors of the seventeenth century other than Shakespeare and Milton. **Prerequisite:** Engl 203 and 204.
ENGL 445—Renaissance Non-Dramatic Literature—3 cr. (3 and 0)
Tudor and Elizabethan poetry, prose fiction, translations, essays, and criticism. Prerequisite: Engl 203 and 204.

ENGL 446—Tudor-Stuart Drama—3 cr. (3 and 0)
Selected readings in non-Shakespearean dramatic literature of the sixteenth and seventeenth centuries. Prerequisite: Engl 203 and 204.

ENGL 447—The American Novel—3 cr. (3 and 0)
A survey of the most significant forms and themes of the American novel from its beginnings to 1900. Prerequisite: Engl 203 and 204.

ENGL 461—Studies in English Literature to 1700—3 cr. (3 and 0)
Selected readings in English literature from the beginnings to 1700, with emphasis on social and intellectual backgrounds. Prerequisite: Engl 203, 204.

ENGL 462—Studies in English Literature Since 1700—3 cr. (3 and 0)
Selected readings in English literature from 1700 to the present, with emphasis on social and intellectual backgrounds. Prerequisite: Engl 203, 204.

ENGL H470—Senior Division Honors English—3 cr. (3 and 0)
An intensive study of a period, topic, genre, or figure. Papers, reports, reading list, examination. Prerequisite: Engl 203, 204 or H203, H204 and approval of the Honors Council. May be repeated by arrangement with the Department for a total of twelve credits.

ENGL 481—Directed Reading—1, 2, or 3 cr. (1, 2, or 3 and 0)
Class and tutorial work for students with special interests or projects in American, British, or European literature outside the scope of existing courses. May be repeated for a maximum of six credits. Prerequisite: Engl 203, 204 or H203, H204, and invitation of the department.

ENGL 602—The English Language—3 cr. (3 and 0)
ENGL 604—The Structure of Modern English—3 cr. (3 and 0)
ENGL 605—Shakespeare—3 cr. (3 and 0)
ENGL 606—Shakespeare—3 cr. (3 and 0)
ENGL 609—Chaucer—3 cr. (3 and 0)
ENGL 613—Classical Drama—3 cr. (3 and 0)
ENGL 616—Modern Drama—3 cr. (3 and 0)
ENGL 622—A Survey of American Literature—3 cr. (3 and 0)
ENGL 623—A Survey of American Literature—3 cr. (3 and 0)
ENGL 624—A Survey of American Literature—3 cr. (3 and 0)
ENGL 625—The Romantic Revival—3 cr. (3 and 0)
ENGL 627—Victorian Poetry—3 cr. (3 and 0)
ENGL 629—Nineteenth Century Prose—3 cr. (3 and 0)
ENGL 631—The Restoration and Eighteenth Century—3 cr. (3 and 0)
ENGL 635—Southern Literature—3 cr. (3 and 0)
ENGL 636—Milton and His Age—3 cr. (3 and 0)
Description of Courses

ENGL 637—The Eighteenth Century English Novel—3 cr. (3 and 0)
ENGL 638—Twentieth Century Poetry—3 cr. (3 and 0)
ENGL 639—Twentieth Century Fiction—3 cr. (3 and 0)
ENGL 640—Applied Literary Criticism—3 cr. (3 and 0)
ENGL 641—A Survey of World Literature—3 cr. (3 and 0)
ENGL 642—A Survey of World Literature—3 cr. (3 and 0)
ENGL 643—Seventeenth Century Poetry and Prose—3 cr. (3 and 0)
ENGL 645—Renaissance Non-Dramatic Literature—3 cr. (3 and 0)
ENGL 646—Tudor-Stuart Drama—3 cr. (3 and 0)
ENGL 647—The American Novel—3 cr. (3 and 0)
ENGL 651—Children’s Literature—3 cr. (3 and 0)
ENGL 661—Studies in English Literature to 1700—3 cr. (3 and 0)
ENGL 662—Studies in English Literature Since 1700—3 cr. (3 and 0)
ENGL 801—The Teaching of English—3 cr. (3 and 0)
ENGL 802—Studies in Middle English Literature—3 cr. (3 and 0)
ENGL 803—Studies in Renaissance English Literature—3 cr. (3 and 0)
ENGL 804—Studies in Neo-Classic and Romantic Literature—3 cr. (3 and 0)
ENGL 805—Studies in Victorian and Modern English Literature—3 cr. (3 and 0)
ENGL 810—Studies in Colonial and Revolutionary American Literature—3 cr. (3 and 0)
ENGL 811—Studies in Romantic and Realistic American Literature—3 cr. (3 and 0)
ENGL 812—Studies in Modern American Literature—3 cr. (3 and 0)
ENGL 820—Studies in Theoretical and Applied Literary Criticism—3 cr. (3 and 0)
ENGL 830—Studies in Linguistics—3 cr. (3 and 0)
ENGL 840—Studies in World Literature—3 cr. (3 and 0)
ENGL 890—Introduction to Research—1 cr. (1 and 0)
ENGL 891—Research—Credit to be arranged.
ENTOMOLOGY

Professors: T. R. Adkins, Jr., R. C. Fox, E. W. King, J. K. Reed

Associate Professor: S. B. Hays, Head

Assistant Professors: G. R. Carner, R. F. Nash, R. Noblet, T. E. Skelton

ENT 200—Insects—2 cr. (2 and 0)
An introduction to insects; their various relationships with man, other animals and plants. The general nature of this course makes it beneficial to all students regardless of specialty.

ENT 301—General Entomology—3 cr. (2 and 3)
A general introduction to entomology with emphasis on anatomy, metamorphosis, and description of the most common insect species. Methods of control are introduced and current control practices are explained for some of the most important species.

ENT 307—Forest Entomology—3 cr. (2 and 3) F
Insects of economic importance to forests, forest products and shade trees, and their role in the practice of good forest management as well as their significance in the natural environment.

ENT 308—Apiculture—3 cr. (2 and 3)
A detailed study of the honey bee and its economic importance in pollination and honey production. Attention will be given to bee behavior, colony management, equipment, honey plant identification, and honey production and processing. Prerequisite: Zool 102, 104 and permission of the instructor.

ENT 401—Field Crop and Stored Product Insects—3 cr. (2 and 3)
Common insect pests of the following are studied: cotton, corn, small grains, legume field crops, tobacco, stored grain and seed. Primary emphasis is placed on life histories, identification of destructive stages, recognition of damage, and current control measures.

ENT 402—Fruit, Nut, and Vegetable Insects—3 cr. (2 and 3)
Common insect pests of the following are studied: peaches, apples, grapes, pecans, sweet corn, cole crops, cucurbits, potatoes, sweet potatoes, peas and beans. Primary emphasis is placed on life histories, identification of destructive stages, recognition of damage, and current control measures.

ENT 405—Insect Morphology—4 cr. (3 and 3) F
A study of insect structure in relation to function and of the variation of form in insects. Prerequisite: Ent 301.

ENT H405—Insect Morphology—4 cr. (3 and 3) F
Honors option for Ent 405, admission by special arrangement.

ENT 410—Insect Taxonomy—3 cr. (1 and 6)
The identification of the principal families of the major orders of adult insects. Laboratory work consists of intensive practice of such identification; lecture material deals with necessary theoretical discussion of taxonomic features observed in the laboratory. Prerequisite: Zool 102, 104; Ent 301; Ent 405 desirable.

ENT 455—Medical and Veterinary Entomology—3 cr. (2 and 3) S
Insects and their arthropod relatives which are of considerable economic importance in their effect on man and animals.
ENT 461—Seminar—1 cr. (1 and 0) F
Students review the principal journals pertaining to insects and related animals; also review the lives and activities of prominent pioneer entomologists. Prerequisite: Zool 102, 104; Ent 301.

ENT 462—Seminar—1 cr. (1 and 0) S
Continuation of Ent 461.

ENT 468—Introduction to Research—2 cr. (1 and 3) S
Principles, developments and changes in research methods related to certain fields of biological and agricultural research. The students obtain practice in experimental techniques, scientific writing and the use and maintenance of various research instruments and equipment.

ENT 601—Field Crop and Stored Product Insects—3 cr. (2 and 3)
ENT 602—Fruit, Nut, and Vegetable Insects—3 cr. (2 and 3)
ENT 610—Insect Taxonomy—3 cr. (1 and 6)
ENT 655—Medical and Veterinary Entomology—3 cr. (2 and 3)
ENT 668—Introduction to Research—2 cr. (1 and 3)
ENT 805—Taxonomy of Immature Insects—3 cr. (1 and 6)
ENT 809—Recent Advances in Entomology I—1 cr. (1 and 0)
ENT 810—Recent Advances in Entomology II—1 cr. (1 and 0)
ENT 856—Medical Entomology—3 cr. (2 and 3)
ENT 860—Principles of Insect Control—3 cr. (3 and 0)
ENT 861—Insect Toxicology—3 cr. (2 and 3)
ENT 862—Insect Physiology—3 cr. (2 and 3)
ENT 863—Special Problems in Entomology—3 to 6 cr.
ENT 890—Research Techniques in Agriculture—3 cr. (2 and 3)
ENT 891—Research—Credit to be arranged.
ENT 991—Doctoral Research—Credit to be arranged.

ENVIRONMENTAL HEALTH

Associate Professor: R. F. Borgman, Program Director

EnH 471—Man and His Environment—2 cr. (2 and 0)
The interactions of man with his environment will be surveyed. Health factors such as urbanization, population growth, pathogens, insects and other vectors, ionizing radiation, and toxic chemical residues will be emphasized. The effects of air, water, food, and solid waste contacts will be considered. Prerequisite: Permission of instructor.

EnH 472—Environmental Planning and Control—2 cr. (2 and 0)
Application of planning and design to effective environmental control. Topics such as land use, water supply and treatment, waste water treatment and disposal, and solid waste disposal will be considered from the standpoint of control. Not intended for graduate students in Engineering. Prerequisite: Permission of the instructor.
ENH 671—MAN AND HIS ENVIRONMENT—2 cr. (2 and 0)
ENH 672—ENVIRONMENTAL PLANNING AND CONTROL—2 cr. (2 and 0)
ENH 893—ENVIRONMENTAL HEALTH SEMINAR I—1 cr. (1 and 0)

ENVIRONMENTAL SYSTEMS ENGINEERING

Professors: J. F. Andrews, Head; J. H. Austin, L. G. Rich
Associate Professors: A. R. Abernathy, B. C. Dysart
Assistant Professor: T. M. Keinath
Lecturer: G. M. McCallum

Adjunct Professors: D. W. Duttweiler, W. M. Sanders

ESE 443—ENVIRONMENTAL ENGINEERING CHEMISTRY I—2 cr. (2 and 0)
A study of those fundamental principles of physical and analytical chemistry that find application in the treatment of waters and waste-waters. Chemical thermodynamics, chemical kinetics, acid-base equilibria, solubility equilibria, complex equilibria, and electrochemistry, are several topics that are examined.

ESE 444—ENVIRONMENTAL ENGINEERING CHEMISTRY LABORATORY I—2 cr. (0 and 6)
Demonstration of the principles discussed in ESE 443 and laboratory exercises in those analytical methods used in water quality control. Typical wet-chemical analytical techniques demonstrated are residue analysis, turbidity, color, alkalinity, acidity, pH, hardness, iron, manganese, dissolved oxygen, and biochemical oxygen demand. Moreover, several modern instrumental and electroanalytical techniques that are commonly incorporated in environmental water quality monitors are discussed and demonstrated in detail.

ESE 643—ENVIRONMENTAL ENGINEERING CHEMISTRY I—2 cr. (2 and 0)
ESE 644—ENVIRONMENTAL ENGINEERING CHEMISTRY LABORATORY I—2 cr. (0 and 6)

ESE 842—SANITARY ENGINEERING PROCESSES—3 cr. (3 and 0)
ESE 843—UNIT OPERATIONS OF SANITARY ENGINEERING—3 cr. (3 and 0)
ESE 846—POLUTION OF THE AQUATIC ENVIRONMENT—3 cr. (2 and 3)
ESE 848—ENVIRONMENTAL ENGINEERING CHEMISTRY II—2 cr. (2 and 0)
ESE 849—ENVIRONMENTAL ENGINEERING CHEMISTRY LABORATORY II—2 cr. (1 and 3)

ESE 851—UNIT OPERATIONS AND PROCESSES LABORATORY—2 cr. (1 and 3)
ESE 852—WATER AND WASTEWATER TREATMENT SYSTEM:—3 cr. (2 and 3)
ESE 854—WATER AND WASTE TRANSPORT SYSTEMS—3 cr. (3 and 0)
ESE 861—ENVIRONMENTAL SYSTEMS ENGINEERING SEMINAR—0-1 cr. (1 and 0)
ESE 862—ENVIRONMENTAL QUALITY CASE STUDY—1 cr. (0 and 3)
ESE 874—RADIOLOGICAL HEALTH ENGINEERING—3 cr. (2 and 3)
ESE 881—Special Problems—1 to 4 cr.
ESE 883—Selected Topics in Environmental Engineering—3 cr. (3 and 0)
ESE 884—Selected Topics in Environmental Engineering—3 cr. (3 and 0)
ESE 891—Research—1-6 cr.
ESE 991—Doctoral Research—1-18 cr.

EXPERIMENTAL STATISTICS

Professor: W. P. Byrd
Assistant Professors: J. R. Holman, W. E. Johnston, J. S. Lytle

Ex St 301—Introductory Statistics—3 cr. (2 and 2) F, S, SS
Basic concepts and methods of statistical inference; organization and presentation of data, elementary probability, measures of central tendency and variation, tests of significance, sampling, simple linear regression and correlation. The role of statistics in interpreting research, and the general application of the methods are stressed.

Ex St 462—Statistics Applied to Economics—3 cr. (3 and 0) S
A continuation of Ex St 301 with emphasis on statistical methods used in the collection, analysis, presentation and interpretation of economic data. Special attention is given to time series analysis, the construction of index numbers and the designing of samples for surveys in the social science fields. Prerequisite: Ex St 301.

Ex St 662—Statistics Applied to Economics—3 cr. (3 and 0)
Ex St 801—Statistical Methods—4 cr. (3 and 3)
Ex St 803—Regression and Least Squares Analysis—3 cr. (3 and 0)
Ex St 804—Sampling—3 cr. (3 and 0)
Ex St 805—Design and Analysis of Experiments—3 cr. (3 and 0)

FOOD SCIENCE

Professors: J. H. Mitchell, Jr., W. P. Williams, Head
Assistant Professors: J. C. Acton, J. J. Jen, M. G. Johnson

Fd Sc 212—Man’s Food Resources—2 cr. (2 and 0) S, ’73 and alternate years.
Food material resources with reference to quality preservation, processing, and nutritional requirements. The role of science and technology in the modern food industry is emphasized. The need for food standards and grades is explained, and the functions of regulatory agencies are discussed. Prerequisite: Biol 101.

Fd Sc 305—Dairy and Food Engineering—3 cr. (2 and 3) F, ’72
A study of the basic engineering principles and their application to the dairy and food processing operations. The relationship between engineering principles and fundamentals of food processing is emphasized for the dairy and food technologist. Topics include material and energy balance, electricity and
power, steam generation, refrigeration, transfer of heat, flow and mechanics of fluids, evaporation and distillation, strength of materials and kinetics of biological reactions.

Fd Sc 311—Food Processing—3 cr. (3 and 0)
F, '71 and alternate years.
Principles of food handling and processing by refrigerated storage, freezing, canning, fermentation, sugar concentration, and food additives. Prerequisite: Organic Chemistry and Physics.

Fd Sc 312—Food Processing—3 cr. (3 and 0)
S, '72 and alternate years.
Principles of dehydration. Unit processes and manufacturing methods used in the processing of cereal grains, dairy products, meats and fish, vegetable oils, beverages, and confectioneries. Importance of water supply and waste disposal in food manufacture. Prerequisite: Organic Chemistry and Physics.

Fd Sc 313—Food Processing Laboratory—1 cr. (0 and 3)
F, '71 and alternate years.
Laboratory exercises dealing with equipment and processes used in food manufacture. Prerequisite: Registration in Fd Sc 311.

Fd Sc 314—Food Processing Laboratory—1 cr. (0 and 3)
S, '72 and alternate years.
A continuation of Fd Sc 313. Prerequisite: Registration in Fd Sc 312.

Fd Sc 412—Food Quality Control—2 cr. (2 and 0) S, '73
A comprehensive treatment of the philosophy and organization of and the responsibility for food quality control function. Major emphasis is placed on principles, quality attributes, government and trade standards of identity and their development, acceptance sampling (inspection), recording and reporting, and production and inventory control.

Fd Sc 413—Biochemistry of Foods—2 cr. (2 and 0)
F, '71 and alternate years.
Biochemical and enzymatic phenomena in relation to the color, texture, flavor, and nutritive value of foods, changes in biochemical constituents as a result of food processing and storage. Prerequisite: Ch 310 or Bioch 423 or permission of instructor.

Fd Sc 414—Food Quality Control Laboratory—2 cr. (1 and 3) S, '73
Fundamental aspects of sensory techniques employed in the quality evaluation of food products. A study of laboratory methods employed in product evaluation and grading of processed foods. A concept of quality is formed through examination of various grades of each food product. Actual practice in the selection and operation of taste panels illustrate their use in the industry.

Fd Sc 415—Human Nutrition—2 cr. (2 and 0)
F, '71 and alternate years.
Characteristics and functions of basic food nutrients and how they are affected by food processing, preservation and storage methods. Pathways for the conversion of nutrients into living tissue will be examined. Prerequisite: Ch 310 or Bioch 423 or permission of instructor.
310 Description of Courses

Fd Sc 416—Food Analysis—2 cr. (1 and 3)
S, '72 and alternate years.
Application of quantitative procedures to the analysis of food products. Procedures include solids, protein, carbohydrates, lipids, vitamins, fiber, pigments, and other components. Prerequisite: Quantitative analysis or permission of instructor.

Fd Sc 417—Seminar—1 cr. (1 and 0) F, '72
Literature research and oral presentation of current food science topics.

Fd Sc 418—Seminar—1 cr. (1 and 0) S, '73
Literature research and oral presentation of current food science topics.

Fd Sc 420—Special Topics in Food Science—1-3 cr. (1-3 and 0) S, '71
A comprehensive study of special topics in Food Science not covered in other courses. Special emphasis will be placed on independent investigations of contemporary developments.

Fd Sc 612—Food Quality Control—2 cr. (2 and 0)
Fd Sc 613—Biochemistry of Foods—2 cr. (2 and 0)
Fd Sc 614—Food Quality Control Laboratory—2 cr. (1 and 3)
Fd Sc 615—Human Nutrition—2 cr. (2 and 0)
Fd Sc 616—Food Analysis—2 cr. (1 and 3)

FORESTRY

Professors: R. M. Allen, Head; B. M. Cool, K. Lehotsky, J. R. Warner
Associate Professors: M. H. Bruner, R. E. Schoenike, W. A. Shain
Assistant Professors: C. L. Lane, T. E. Wooten

For 101—Introduction to Forestry—1 cr. (1 and 0) F
An informative sketch of forestry, forests, and forestry tasks of the nation; education in career opportunities of foresters.

For 102—Introduction to Forestry—1 cr. (1 and 0) S
A continuation of For 101.

For 205—Dendrology—4 cr. (3 and 3) F
Identification and nomenclature of the principal forest trees of the United States; their geographical distribution and economic importance; identification of many forest shrubs and commonly planted exotics. Prerequisite: Bot 102.

For 206—Silvics—2 cr. (2 and 0) S
Growth factors influencing the establishment and development of forest trees and stands. Prerequisite: Bot 102, Ch 102.

For 251S—Silvics—2 cr. (Summer Camp) SS
Field studies of growth factors influencing the establishment and development of forest stands. Prerequisite: Agron 202, Bot 356, For 205, For 206.

For 252S—Forest Engineering—2 cr. (Summer Camp) SS
Field surveying, establishment of boundary lines, planning and construction of forest trails and roads. Prerequisite: CE 201, EG 105.
FOR 253S—DENDROMETRY—4 cr. (Summer Camp) SS
Elements of mensuration dealing with volume determination of standing and harvested trees as well as forest stands. Prerequisite: CE 201, EG 105, For 205.

FOR 254S—FOREST PRODUCTS—1 cr. (Summer Camp) SS
Field studies of logging methods and equipment; trips to selected wood-using industries. Prerequisite: For 205 or permission of instructor.

FOR 302—DENDROMETRY—3 cr. (2 and 3) S
Volume determination of trees, logs, and stands; statistical procedures applied to forest measurements. Prerequisite: Ex St 301 and Forestry Summer Camp.

FOR 304—FOREST ECONOMICS—3 cr. (3 and 0) S
Economic problems and principles involved in the utilization of forest land and timber and in the distribution of forest products; cost analysis of integrated forest operations. Prerequisite: Econ 201.

FOR 306—IDENTIFICATION OF WOOD AND WOOD FIBERS—1 cr. (0 and 3) S
Macroscopic and microscopic identification, properties, and uses of selected economically significant timbers. Prerequisite: Bot 102, Ch 102 or permission of instructor.

FOR 307—ELEMENTS OF FORESTRY—3 cr. (2 and 3) F, S
A compendium of forestry subjects providing a broad view of the management and utilization of forests, especially those of South Carolina. Not open to Forestry majors. Prerequisite: Bot 102 or permission of instructor.

FOR 308—AERIAL PHOTOGRAPHS IN FORESTRY—3 cr. (2 and 3) S
Use of aerial photographs in forestry; elementary photographic measurements; aerial photo interpretations; mapping and timber estimating procedures. Prerequisite: CE 201 and Forestry Summer Camp or permission of instructor.

FOR 310—SILVICULTURE—4 cr. (3 and 3) S
Maintenance, harvesting, natural and artificial regeneration of forest stands based on the interrelation of biotic characteristics of stands and their environment. Prerequisite: For 206 and Forestry Summer Camp.

FOR 401—LOGGING AND MILLING—4 cr. (2 and 6) F
Logging and milling methods and costs, their administration; analysis of logging and milling operations; seasoning, grading, and marketing of lumber. Prerequisite: Senior standing.

FOR 403—FOREST SOILS SEMINAR—1 cr. (1 and 0)
Forest soil characteristics with respect to site evaluation, forest fertilization, planting problems, watershed management and tree-soil-microorganism interactions.

FOR 412—FOREST PROTECTION—2 cr. (2 and 0) S
Causative and control factors of forest fires; fire prevention and suppression. Protection of forest resources against damages caused by man and animals. Prerequisite: Senior standing.

FOR 414—MANAGEMENT PLANS—1 cr. (0 and 3) S
Analysis and assembling of factors entering into a forest working plan; drawing of maps corollary to forest regulation; preparation of management plans. Prerequisite: For 407.
312 Description of Courses

For 416—Forest Policy and Administration—2 cr. (2 and 0) S
Development of public and private forest policy in the United States; administrative and executive tasks in forestry; principles of organization, personnel management, and budget. Prerequisite: Senior standing.

For 417—Forest Regulation—4 cr. (3 and 3) F
Correlation of production factors and yields of forests; normal and empirical forests; rotations and cutting cycles; regulation of cuts and growing stock in sustained yield management. Prerequisite: For 302, 310.

For 418—Forest Valuation—3 cr. (3 and 0) S
Capital investments in forestry and the returns derivable from them; valuation of land, timber, and other resources associated with forestry; appraisal of damage and stumpage values. Prerequisite: For 304, 407.

For 420—Forest Products—3 cr. (2 and 3) S
Primary forest products other than sawlogs, e.g., poles, pulpwood, veneer stock, excelsior; secondary forest products, e.g., naval stores, maple syrup, Christmas trees; utilization and marketing of forest products. Prerequisite: Phys 208 and Senior standing.

For 421—Wood Properties I—3 cr. (2 and 3)
The formation of wood in forest trees; gross and minute characteristics of wood; defects in wood; variability in wood. Prerequisite: Bot 102, For 306 or permission of instructor.

For 422—Wood Properties II—3 cr. (2 and 3)
Wood in relation to moisture, heat, sound, light, and electricity; mechanical properties of wood; standard testing procedures for wood. Prerequisite: For 306 or permission of instructor.

For 601—Logging and Milling—4 cr. (2 and 6)
For 602—Dendrometry—3 cr. (2 and 3)
For 604—Forest Economics—3 cr. (3 and 0)
For 606—Identification of Wood and Wood Fibers—1 cr. (0 and 3)
For 607—Elements of Forestry—3 cr. (2 and 3)
For 608—Aerial Photographs in Forestry—3 cr. (2 and 3)
For 610—Silviculture—4 cr. (3 and 3)
For 612—Forest Protection—2 cr. (2 and 0)
For 614—Management Plans—1 cr. (0 and 3)
For 616—Forest Policy and Administration—2 cr. (2 and 0)
For 617—Forest Regulation—4 cr. (3 and 3)
For 618—Forest Valuation—3 cr. (3 and 0)
For 620—Forest Products—3 cr. (2 and 3)
For 621—Wood Properties I—3 cr. (2 and 3)
For 622—Wood Properties II—3 cr. (2 and 3)
For 801—Data Processing in Forestry Problems—3 cr. (2 and 3)
For 802—Dendrometry—3 cr. (2 and 3)
For 803—Photo-Interpretation—3 cr. (2 and 3)
For 804—Forest Economics—3 cr. (2 and 3)
For 805—Cost Studies in Harvesting and Processing—3 cr. (2 and 3)
For 806—Multiple Use Management—3 cr. (3 and 0)
For 807—Special Problems in Forestry—Credit to be arranged.
For 891—Research—Credit to be arranged.

FRENCH

Associate Professor: J. A. DEAN
Assistant Professors: D. Y. BRANNOCK, R. R. McGUIRE, JR., J. A. McNATT, J. B. MACY
Instructors: Irene A. Aiem, D. J. Calvez, M. A. KIRSCH, GERMAINE M. LAFITTE, H. A. LEWIS, ELKE M. MARON, G. A. STRADER

Fr 101—Elementary French—3 cr. (3 and 1)
A course for beginners in which, through conversation, composition, and dictation, the fundamentals of the language are taught and a foundation is provided for further study and the eventual ability to read and speak the language. Three hours a week of classroom instruction and one hour a week in the language laboratory.

Fr H101—Elementary French—3 cr. (3 and 1)
Honors section of Fr 101; admission by invitation.

Fr 102—Elementary French—3 cr. (3 and 1)
A continuation of Fr 101; three hours a week of classroom instruction and one hour a week in the language laboratory.

Fr H102—Elementary French—3 cr. (3 and 1)
Honors section of Fr 102; admission by invitation.

Fr 151—French for Graduate Students—0 cr. (0 and 0)
An intensive program for graduate students preparing to take the reading examination in French. Some previous study of the language is helpful but not essential.

Fr 201—Intermediate French—3 cr. (3 and 1)
Attention to grammar, with conversation, composition and dictation continued from Fr 102, and the beginning of more serious reading of French prose in short stories or novels. Three hours a week of classroom instruction and one hour a week in the language laboratory.

Fr H201—Intermediate French—3 cr. (3 and 1)
Honors section of Fr 201; admission by invitation.

Fr 202—Intermediate French—3 cr. (3 and 0)
While attention is paid to writing and speaking French, more stress is laid on the rapid reading of more difficult French prose than in the earlier courses. Prerequisite: Fr 201.

Fr H202—Intermediate French—3 cr. (3 and 0)
Honors section of Fr 202; admission by invitation.

* On leave.
Fr 303—Survey of French Literature I—3 cr. (3 and 0)
Literary movements and authors from the beginnings to the eighteenth century. Required of French majors. Prerequisite: Fr 201 and 202.

Fr 304—Survey of French Literature II—3 cr. (3 and 0)
Literary movements and authors of the nineteenth and twentieth centuries. Required of French majors. Prerequisite: Fr 201 and 202.

Fr 305—Conversational French—3 cr. (3 and 0)
Practice in the spoken language, with stress on vocabulary building, pronunciation, intonation, and comprehension; written work to increase accuracy. Assignments in the language laboratory. Required of French majors. Prerequisite: Fr 201 and 202.

Fr 306—Advanced Conversation with Composition—3 cr. (3 and 0)
A continuation of Fr 305, with additional emphasis on written composition. Prerequisite: Fr 305.

Fr 307—French Civilization—3 cr. (3 and 0)
A study of the significant aspects of the culture of France from its origins to the present. Prerequisite: Fr 202 or Departmental permission.

Fr 308—Contemporary French Culture—3 cr. (3 and 0)
A study of contemporary ideas, opinions and events through magazines, newspapers, scholarly journals of individual interest and essays of national and international import. Class discussions; oral and written reports. Prerequisite: Fr 202 or Departmental permission.

Fr 403—Twentieth Century Prose—3 cr. (3 and 0)
The outstanding authors of the first half of the twentieth century: Proust, Gide, Mauriac, Saint-Exupéry, Sartre, Camus, and others. Reading of selected works, discussions, and reports. Prerequisite: Fr 303 or 304.

Fr 404—Twentieth Century Drama—3 cr. (3 and 0)
The French theater since 1900, with emphasis on the period after 1930. Readings, discussions, and reports. Prerequisite: Fr 303 or 304.

Fr 405—Nineteenth Century French Romanticism—3 cr. (3 and 0)
The romantic movement as expressed in the works of Chateaubriand, Hugo, Merimée, Vigny, Stendhal, Sand, and others. Readings, discussions, and reports. Prerequisite: Fr 303 or 304.

Fr 406—Nineteenth Century French Realism—3 cr. (3 and 0)
Realism as expressed in the works of Balzac, Flaubert, Daudet, Maupassant, Zola, and others. Selected works, discussions, and reports. Prerequisite: Fr 303 or 304.

Fr 407—Eighteenth Century French Literature—3 cr. (3 and 0)
The principal literary figures of the eighteenth century, with particular emphasis on Voltaire and Rousseau. Selected works, discussions, and reports. Prerequisite: Fr 303 or 304.

Fr 408—Seventeenth Century French Drama—3 cr. (3 and 0)
The French classical drama, with emphasis on Corneille, Racine, and Molière. Selected works, discussions, and reports. Prerequisite: Fr 303 or 304.
GENETICS

Professor: C. M. Jones  
Assistant Professor: J. D. Maxwell

GEN 301—GENETICS—3 cr. (3 and 0) F  
An introduction to the basic principles of genetics and the relationship of these principles to man. To include deleterious genes, chromosome abnormalities, and mutations as these affect the human race; sex-linked, sex-influenced and sex-limited traits; and genetic predictions and population genetics in relation to society. Will not substitute for Gen 302.

GEN 302—GENETICS—4 cr. (3 and 3) F, S, SS  
A general coverage of the basic principles of genetics. Examples illustrating the fundamentals of heredity and variation are given for plants and animals, including man. Prerequisite: Biol 101, Bot 102, 104, and Zool 102, 104 or consent of instructor.

GEN 451—GENETICS—3 cr. (3 and 0) S  
Methods and concepts in classical and modern genetics. Topics will include advanced studies of linkage; variations in chromosome number and structure; natural and induced mutations; extranuclear inheritance; experimental evolution; population, biochemical and medical genetics. Principles will be illustrated by examples from plants, animals (including man), and microorganisms. Prerequisite: Gen 302.

GEN 602—GENETICS—4 cr. (3 and 3)  
GEN 651—GENETICS—3 cr. (3 and 0)  
GEN 801—CYTOGENETICS—3 cr. (2 and 3)

GEOGRAPHY

GEOG 201—INTRODUCTION TO GEOGRAPHY—3 cr. (3 and 0)  
An introduction to the study of geography, including maps, the physical elements of the natural environment and their distribution, and world cultural patterns.

GEOG 301—ECONOMIC GEOGRAPHY—3 cr. (3 and 0)  
The geographic conditions fundamental to the world’s resources—agricultural, mineral, commercial and industrial, and the conditions which affect the utilization, marketing, consumption and strategic significance of these resources.

GEOG 302—POLITICAL GEOGRAPHY—3 cr. (3 and 0)  
The geographic basis for and the geographic problems of the modern state; the relevance of geographical patterns to international affairs. Prerequisite: Junior standing or permission of the instructor.
GEOLOGY

Associate Professors: P. K. Birkhead, V. S. Griffin, Jr., R. D. Hatcher, Jr.
Assistant Professors: G. M. Haselton, D. S. Snipes

Geol 201—Physical Geology—4 cr. (3 and 3)
A study of the minerals and rocks which compose the earth's crust, their origins and transformations. Emphasis is placed upon geological processes, both internal and external, by which changes are produced on or in the earth. Laboratory instruction is provided in the interpretation of geologic processes through study of topographic maps. Field trips provide direct observation of processes and results.

Geol 202—Historical Geology—4 cr. (3 and 3)
Evolution, both organic and inorganic, is traced from the beginning of the record up through time to the present. Laboratory instruction and field trips provide practice in the identification and study of plants and animals which have left their record as fossils in the rocks of the earth's crust. Emphasis is placed upon geologic structures and the interpretation of geologic maps. Prerequisite: Geol 201.

Geol 306—Mineralogy—3 cr. (2 and 3)
The student gains a working knowledge of crystallography and a comprehensive knowledge of determinative mineralogy. Identification of the minerals is based on their physical and chemical properties. Prerequisite: Geol 201 or 406.

Geol 309—Petrology—3 cr. (2 and 3)
The genesis, evolution, and classification of rocks through lectures, laboratory exercises, and field trips. The occurrences, chemical relationships, and distribution of rock types are emphasized. Prerequisite: Geol 306.

Geol 310—Optical Mineralogy—3 cr. (2 and 2)
The purpose of this course is to enable the student to identify minerals under the microscope on the basis of their optical properties. Prerequisite: Geol 306.

Geol 313—Stratigraphy and Sedimentation—3 cr. (3 and 0)
The process by which sediments are eroded, transported, and deposited (sedimentation), with major emphasis on relationships of the areal and time distribution of stratified rocks and their historical significances (stratigraphy). Prerequisite: Geol 201 or 406.

Geol 402—Structural Geology—3 cr. (2 and 2)
The diverse geological structures of the earth, their description, origin, and field recognition. Practical problems in interpreting geologic structures are utilized, in addition to theoretical considerations of the mechanics and causes of tectonism. Prerequisite: Geol 201 or 406.

Geol 403—Invertebrate Paleontology—3 cr. (2 and 3)
A study of life of past geologic ages, as shown by fossilized remains of ancient animals, with emphasis on the invertebrates. Prerequisite: Geol 201 or permission of the instructor.

Geol 404—Economic Geology—3 cr. (3 and 0)
This course concerns the description and classification of ore deposits and commercial non-metallic mineral deposits. The origin of mineral deposits and
their occurrence is emphasized. Problem studies and field trips to nearby mines and quarries. Prerequisite: Geol 306

**Geol 405—Geomorphology—4 cr. (3 and 3)**
A study of the surface features of the earth—their form, nature, origin, development, and the change they are undergoing. Prerequisite: Geol 201 and 202 or Geol 406 or permission of the instructor.

**Geol 406—Engineering Geology—3 cr. (2 and 3)**
This course is similar to Geol 201 except that progress is faster and emphasis is on the relationship of geology to engineering.

**Geol 407—Glacial Geology—3 cr. (2 and 2)**
Study of the types of glaciers, their distribution, nourishment and wastage. Continental and mountain glaciation, past and present, and the forms and deposits associated therewith. Ice contact forms, their significance and origins. Prerequisite: Geol 201 and 202, or Geol 406.

**Geol 408—Geohydrology—3 cr. (3 and 0)**
Study of the hydrologic cycle, aquifer characteristics, theory of ground water movement, mechanics of well flow, experimental methods, and subsurface mapping. Prerequisite: Geol 201 and 202, or Geol 406.

**Geol 411—Research Problems—3 cr. (0 and 9)**
A field, laboratory, or library study of an approved topic in geology. The topic would be one not normally covered in formal course offering, but may be an extension of a course. Prerequisite: Senior standing in geology or approval of the Department Head.

**Geol 412—Research Problems—3 cr. (0 and 9)**
A continuation of Geol 411.

**Geol 602—Structural Geology—3 cr. (2 and 2)**

**Geol 603—Invertebrate Paleontology—3 cr. (2 and 3)**

**Geol 604—Economic Geology—3 cr. (3 and 0)**

**Geol 605—Geomorphology—4 cr. (3 and 3)**

**Geol 606—Mineralogy—3 cr. (2 and 3)**

**Geol 607—Glacial Geology—3 cr. (2 and 2)**

**Geol 608—Geohydrology—3 cr. (3 and 0)**

**Geol 609—Petrology—3 cr. (2 and 3)**

**Geol 610—Optical Mineralogy—3 cr. (2 and 2)**

**Geol 611—Research Problems—1-3 cr. (0 and 3-9)**

**Geol 613—Stratigraphy and Sedimentation—3 cr. (3 and 0)**

**Geol 800—Earth Science I—3 cr. (2 and 3)**

**Geol 850—Earth Science II—3 cr. (2 and 3)**
GERMAN

Assistant Professor: Patricia W. Wannamaker

Instructors: E. P. Arnold, Margaret S. Graham, H. L. Laws, Jr.

GER 101—Elementary German—3 cr. (3 and 1)
A course for beginners in which, through conversation, composition and dictation, the fundamentals of the language are taught and a foundation is provided for further study and the eventual ability to read and speak the language. Three hours a week of classroom instruction and one hour a week in the language laboratory.

GER H101—Elementary German—3 cr. (3 and 1)
Honors section of Ger 101; admission by invitation.

GER 102—Elementary German—3 cr. (3 and 1)
A continuation of Ger 101; three hours a week of classroom instruction and one hour a week in the language laboratory.

GER H102—Elementary German—3 cr. (3 and 1)
Honors section of Ger 102; admission by invitation.

GER 151—German for Graduate Students—0 cr. (0 and 0)
An intensive program for graduate students preparing to take the reading examination in German.

GER 201—Intermediate German—3 cr. (3 and 1)
A short review of grammar, with conversation, composition and dictation continued from Ger 102, and the beginning of more serious reading of German prose in short stories or novels. Three hours a week of classroom instruction and one hour a week in the language laboratory.

GER H201—Intermediate German—3 cr. (3 and 1)
Honors section of Ger 201; admission by invitation.

GER 202—Intermediate German—3 cr. (3 and 0)
While attention is paid to writing and speaking German, more stress is laid on the rapid reading of more difficult German prose than in the earlier courses. Prerequisite: Ger 201.

GER H202—Intermediate German—3 cr. (3 and 0)
Honors section of Ger 202; admission by invitation.

GER 251—Scientific German—3 cr. (3 and 0)
An alternate course to Ger 202; readings in general science and some review of grammar and syntax. Prerequisite: Ger 201.

GER 303—Survey of German Literature I—3 cr. (3 and 0)
Chief authors and works from the Hildebrandslied through the Aufklärung. Required of German majors. Prerequisite: Ger 201 and 202.

GER 304—Survey of German Literature II—3 cr. (3 and 0)
Literary movements and works from Heine through Brecht. Required of German majors. Prerequisite: Ger 201 and 202.

GER 305—Conversational German—3 cr. (3 and 0)
Practice in the spoken language, with emphasis on vocabulary, pronunciation, and comprehension; written exercises for accuracy; assignments in the language laboratory. Required of German majors. Prerequisite: Ger 202 or 251.
GER 306—ADVANCED CONVERSATION WITH COMPOSITION—3 cr. (3 and 0)
The prerequisite is Ger 305 with additional emphasis on written composition.

GER 307—CONTEMPORARY GERMAN CULTURE I—3 cr. (3 and 0)
A study of significant aspects of the contemporary culture of Germany through readings in current German periodicals on a wide variety of subjects: art, music, literature, economics, travel and human interest topics. Prerequisite: Ger 202 or 251, or departmental permission.

GER 308—CONTEMPORARY GERMAN CULTURE II—3 cr. (3 and 0)
A continuation of Ger 307. Prerequisite: Ger 202 or 251, or departmental permission.

GER 403—NINETEENTH CENTURY GERMAN LITERATURE—3 cr. (3 and 0)
Selected works of Heine, Hebbel, Grillparzer, Keller, Meyer, Hauptmann, Schnitzler, and Hofmannsthal. Readings, discussions, and reports. Prerequisite: Ger 303 or 304.

GER 404—20TH CENTURY GERMAN LITERATURE—3 cr. (3 and 0)
Selected works from authors of the twentieth century. Prerequisite: Ger 303 and 304.

GER 405—THE AGE OF GOETHE—3 cr. (3 and 0)
The development of German literature during Goethe's lifetime, 1749-1832; Aufklärung, Sturm und Drang, Klassik, Romantik. Prerequisite: Ger 303 or 304.

GER 406—FAUST—3 cr. (3 and 0)
An intensive reading of Goethe's masterpiece accompanied by extensive critical research. Prerequisite: Ger 303 and 304.

HISTORY

Professors: C. W. Bolen, R. S. Lambert,* E. M. Lander, Jr.*

Hist 101—AMERICAN HISTORY—3 cr. (3 and 0)
The political, economic and social development of the American people from the period of discovery to the end of Reconstruction.

Hist H101—AMERICAN HISTORY—3 cr. (3 and 0)
Same as Hist 101 except that this honors section is open to students only by invitation.

Hist 102—AMERICAN HISTORY—3 cr. (3 and 0)
The political, economic and social development of the American people from the end of Reconstruction to the present.

Hist H102—AMERICAN HISTORY—3 cr. (3 and 0)
Continuation of Hist H101.

* On leave.
HIST 171—Western Civilization—3 cr. (3 and 0)
The political, economic, and social movements of Western Civilization from ancient times to A.D. 900.

HIST 172—Western Civilization—3 cr. (3 and 0)
The political, economic and social movements of Western Civilization from A.D. 900 to 1715.

HIST H172—Western Civilization—3 cr. (3 and 0)
Same as Hist 172 except that this honors section is open to students only by invitation.

HIST 173—Western Civilization—3 cr. (3 and 0)
The political, economic, and social movements of Western Civilization from 1715 to the present.

HIST H173—Western Civilization—3 cr. (3 and 0)
Same as Hist 173 except that this honors section is open to students only by invitation.

HIST 306—American Economic Development—3 cr. (3 and 0)
The history of the economic development of the United States from 1492 to the present with emphasis on agriculture, transportation, banking, commerce, economic policies of the national government, and particularly the industrial revolutions. Prerequisite: Hist 101 and 102.

HIST 307—Recent U. S. Diplomatic History—3 cr. (3 and 0)
The history of American foreign policy from the late 19th century to the present, showing the rise of America's world interests and gradual involvement in global affairs. Emphasis is placed on the role of public opinion in foreign policy. Not open to students who have taken Hist 413. Prerequisite: Hist 101, 102.

HIST 313—History of South Carolina—3 cr. (3 and 0)
The political, economic and social development of South Carolina from 1670 up to the present. Prerequisite: Junior standing.

HIST 314—History of the South—3 cr. (3 and 0)
Origins and development of political, economic, and cultural institutions of the South from the Colonial period to the present; and the role of the South in the nation's development. (Formerly Hist 403.)

HIST 315—Black History in America—3 cr. (3 and 0)
This course is an effort to define and understand the relationship of Black Americans with White Americans within American society after 1619. Prerequisite: Permission of the instructor.

HIST 331—Pre-Modern History of East Asia—3 cr. (3 and 0)
A survey of the history of China and Japan from earliest times to the arrival of Europeans in the sixteenth century.

HIST 332—Modernization of East Asia—3 cr. (3 and 0)
A survey of the history of China and Japan from the Sixteenth Century to the present, with emphasis on the impact of Western culture.

HIST 340—Indigenous and Colonial Latin America—3 cr. (3 and 0)
An introduction to the geography of the region; structure and accomplishments of pre-Columbian societies; Iberian background to overseas expansion;
conquest and settlement of the New World; political, economic, and social patterns in the colonial era leading to the Wars of Independence. *Prerequisite:* Junior standing or permission of the instructor.

**Hist 341—Mexico, Central America, and the Caribbean Since 1800—3 cr. (3 and 0)**
An introduction to the geography of the region; origins and progress of the Independence movements; political, economic and social developments after 1825; current domestic and international problems. *Prerequisite:* 6 hours of history or permission of instructor.

**Hist 342—South America Since 1800—3 cr. (3 and 0)**
An introduction to the geography of the region; origins and progress of the Independence movements; political, economic and social developments after 1825; current domestic and international problems. *Prerequisite:* 6 hours of history or permission of instructor.

**Hist 361—History of England to 1603—3 cr. (3 and 0)**
The history of England to 1603. *Prerequisite:* Junior standing.

**Hist 363—History of England Since 1603—3 cr. (3 and 0)**
A continuation of History 361. *Prerequisite:* Junior standing.

**Hist 371—Ancient Civilization—3 cr. (3 and 0)**
A survey of the history of the Near East, Greece, and Rome to A.D. 476. *Prerequisite:* Hist 171, 172. (Formerly Hist 310.)

**Hist 385—History of Russia to 1905—3 cr. (3 and 0)**
A survey of Russian history from earliest times to 1905, emphasizing Kiev and Appanage Russia, the rise of the Moscow state, and Imperial Russia. *Prerequisite:* Junior standing.

**Hist 386—History of Russia Since 1905—3 cr. (3 and 0)**
Continuation of Hist 385. *Prerequisite:* Junior standing.

**Hist 410—History of Colonial America—3 cr. (3 and 0)**
The development of American institutions and customs in the period before 1776. Considerable emphasis is placed on the imperial relations between Great Britain and her colonies and upon the movement towards, and the philosophy of, the American revolution. *Prerequisite:* Hist 101, 102.

**Hist 411—United States, 1783-1850—3 cr. (3 and 0)**
The formation and growing pains of the new nation through the Federal and Middle periods of its history, with emphasis on economic and political development, the westward movement, and the conflicting forces of nationalism and sectionalism. *Prerequisite:* Hist 101, 102.

**Hist 412—United States, 1850-1900—3 cr. (3 and 0)**
A course dealing with the background causes of developments during, and broad problems after, the Civil War in American history. *Prerequisite:* Hist 101, 102.

**Hist 413—United States History Since 1900—3 cr. (3 and 0)**
The history of the United States from 1900 to the present. *Prerequisite:* Hist 101, 102.
Hist 473—Medieval History—3 cr. (3 and 0)
A survey of the period from the eclipse of Rome to the advent of the Renaissance, emphasizing human migrations, feudalism, rise of towns, and cultural life. Prerequisite: Hist 172 or permission.

Hist 475—The Renaissance—3 cr. (3 and 0)
An examination of the transitional period of European civilization (ca. 1300-1500) with emphasis on institutional, cultural, and intellectual developments. Prerequisite: Hist 172 or permission.

Hist 476—Early Modern Europe—3 cr. (3 and 0)
The evolution of Modern Europe (ca. 1500-1660), as affected by the Reformation, wars of religion, and growth of nation-states. The study will include intellectual advances and the beginnings of European expansion overseas. Prerequisite: Hist 172 or permission.

Hist 477—Absolutism and the Age of Reason—3 cr. (3 and 0)
A study of the quest for order and the consolidation of the European state system between 1660 and 1789 with emphasis on the idea of absolutism, the question of French hegemony, and the synthesis of the eighteenth century Enlightenment. Prerequisite: Hist 172 or permission.

Hist 479—Europe, 1789-1850—3 cr. (3 and 0)
A history of Europe from the outbreak of the French Revolutions through the Revolutions of 1848, with emphasis on the conflict between the forces of change and those of conservatism within the states and in Europe in general. (Formerly Hist 356.) Prerequisite: Hist 173 or permission.

Hist 480—Europe, 1850-1914—3 cr. (3 and 0)
A history of Europe from the mid-nineteenth century to the outbreak of the First World War, with emphasis on the social, economic and political development of the European states and the forces of nationalism, imperialism, and liberalism. (Formerly Hist 357.) Prerequisite: Hist 173 or permission.

Hist 481—Nineteenth Century European Diplomacy, 1815-1914—3 cr. (3 and 0)
A study of 19th century European diplomacy from the Congress of Vienna to the outbreak of the First World War, with emphasis on the functioning of the Concert System, the effects of nationalism, industrialism, popular democracy and imperialism on the character of diplomacy and the relations of the Great Powers. Prerequisite: Hist 172, 173.

Hist 482—International Relations Since 1914—3 cr. (3 and 0)
The great powers and world politics since 1914. Prerequisite: Hist 173 or permission.

Hist 483—Europe in the Twentieth Century—3 cr. (3 and 0)
A study of the political, economic, and social institutions of the European peoples from 1914 to the present. Attention will be given to the world wars and to the collapse of the European state-system.

Hist 484—European Intellectual History Since 1789—3 cr. (3 and 0)
A survey, based upon representative works, of the major intellectual currents in Europe from the Enlightenment to the present. Prerequisite: Hist 173 or permission.
Hist 499—STUDIES IN HISTORY—3 cr. (3 and 0)
An attempt to integrate the students’ knowledge and understanding of the field of history by lectures, discussions, and readings on the broad themes of history and their relevance to particular periods and geographical areas. Required of all history majors. Prerequisite: Hist 101, 102, 172, 173, and permission of the history adviser.

Hist 610—HISTORY OF COLONIAL AMERICA—3 cr. (3 and 0)
Hist 611—UNITED STATES, 1783-1850—3 cr. (3 and 0)
Hist 612—UNITED STATES, 1850-1900—3 cr. (3 and 0)
Hist 613—UNITED STATES SINCE 1900—3 cr. (3 and 0)
Hist 673—MEDIEVAL HISTORY—3 cr. (3 and 0)
(Formerly Hist 702)
Hist 675—THE RENAISSANCE—3 cr. (3 and 0)
(Formerly Hist 704)
Hist 679—EUROPE, 1789-1850—3 cr. (3 and 0)
(Formerly Hist 356)
Hist 680—EUROPE, 1850-1914—3 cr. (3 and 0)
(Formerly Hist 357)
Hist 682—INTERNATIONAL RELATIONS SINCE 1914—3 cr. (3 and 0)
Hist 807—UNITED STATES DIPLOMATIC HISTORY SINCE 1877—3 cr. (3 and 0)
Hist 811—INTRODUCTION TO HISTORICAL RESEARCH—3 cr. (3 and 0)
Hist 812—UNITED STATES HISTORIOGRAPHY—3 cr. (3 and 0)
Hist 813—MEDIEVAL HISTORIOGRAPHY—3 cr. (3 and 0)
Hist 814—MODERN EUROPEAN HISTORIOGRAPHY—3 cr. (3 and 0)
Hist 824—SEMINAR IN THE AMERICAN SOUTH—3 cr. (3 and 0)
Hist 825—SEMINAR IN THE CIVIL WAR AND RECONSTRUCTION—3 cr.
(3 and 0)
Hist 861—SEMINAR IN MEDIEVAL ENGLAND—3 cr. (3 and 0)
Hist 862—SEMINAR IN MEDIEVAL ENGLAND TO 1485—3 cr. (3 and 0)
Hist 863—SEMINAR IN TUDOR ENGLAND—3 cr. (3 and 0)
Hist 864—SEMINAR IN STUART ENGLAND—3 cr. (3 and 0)
Hist 865—SEMINAR IN MODERN ENGLAND SINCE 1715—3 cr. (3 and 0)
Hist 866—SEMINAR IN MODERN ENGLAND SINCE 1715—3 cr. (3 and 0)
Hist 891—RESEARCH—Credit to be arranged.
HORTICULTURE

Professors: L. O. Van Blaricom, W. L. Ogle, T. L. Senn, Head
Assistant Professors: J. P. Fulmer, C. R. Johnson, W. S. Jordan, F. B. Ledeboer

HORT 201—GENERAL HORTICULTURE—3 cr. (2 and 2) F, S
A working knowledge of the fundamental plant processes is developed, showing the influence of light, temperature, water and nutrients upon vegetative growth and reproduction of horticultural plants. Production practices, harvesting, storage and marketing of the principal fruit, vegetable and ornamental crops are discussed with demonstrations and practice in greenhouse and orchard. Prerequisite: Bot 102 and Ch 101.

HORT 302—PRINCIPLES OF VEGETABLE PRODUCTION—3 cr. (2 and 3) F
The general principles of vegetable growing and handling. Phases receiving special emphasis are economic importance, producing areas, management practices, plant forcing, cultural practices, irrigation, quality factors, harvesting, grading, packing, storage, market inspection, transportation, refrigeration, exhibition and seed production. Prerequisite: Hort 201.

HORT 303—PLANT MATERIALS I—3 cr. (2 and 3) F
Woody, ornamental plants and their aesthetic and functional uses in landscape developments. The study covers habit of growth, ultimate size, texture effect, period of bloom, color, and cultural requirements.

HORT 304—PLANT MATERIALS II—3 cr. (2 and 3) S
Herbaceous, ornamental plants which are commonly used as garden flowers. This study covers habit of growth, size, period of bloom, color and cultural requirements.

HORT 305—PLANT PROPAGATION—3 cr. (2 and 3) F
Methods of propagation; time, manner and material for making cuttings; temperature and media for rooting cuttings or ornamental trees, shrubs and flowering plants; propagating structures, soils and fertilizers. Practical instruction given in field and greenhouse. Prerequisite: Hort 201.

HORT 308—LANDSCAPE DESIGN—3 cr. (2 and 3) S
Landscape planning of residential and public properties in order to achieve best use and most enjoyment from a given piece of ground. Prerequisite: Hort 303.

HORT 310—FLORICULTURE—3 cr. (2 and 3) S
Greenhouse production of commercial flower crops; soils; fertilizers; greenhouse diseases and insects; flower crops to be grown on benches and as pot plants; marketing and costs of production. Prerequisite: Hort 201.

HORT 352—COMMERCIAL POMOLOGY—3 cr. (2 and 3) F
Fruit bud formation, rest period and water relations of fruit plants, soils, fruit setting; orchard soil management and responses of various fruits to fertilizers; principles of pruning, effect of climatic differences, freezing of tissues and means of avoiding injury; harvesting, transportation and storage. Prerequisite: Hort 201.
HORT 405—Nut Tree Culture—2 cr. (2 and 0) F, ’72 and alternate years. The production, harvesting and marketing of the principal nut crops with emphasis on the pecan. **Prerequisite:** Hort 201.

HORT 406—Nursery Technology—3 cr. (2 and 3) S
Principles and techniques in handling nursery crops. **Prerequisite:** Hort 303 and Hort 305.

HORT 407—Landscape Design—3 cr. (2 and 3) F
The first half of this course is a study of trees, shrubs, vines and ground covers used in landscape planting. Attention is given to cultural requirements, growth habits, period of bloom, texture and fall color. The second half of the course is devoted to landscape planning for small residential properties.

HORT 408—Floral Design and Retail Marketing—2 cr. (1 and 3) F
Studies of the retail flower business with relation to financing, floor plan, equipment, personnel, supplies, salesmanship, advertising, and other important areas. Floral designing for the retail trade will include table arrangements, funeral and wedding designs, as well as corsage and wreath construction.

HORT 409—Seminar—1 cr. (1 and 0) F
Recent research work on various phases of horticulture, methods of conducting investigations, and preparation of report of investigations.

HORT 410—Seminar—1 cr. (1 and 0) S
A continuation of Hort 409.

HORT 412—Turf Management—3 cr. (2 and 3) F
Studies of warm and cool season turfgrasses in relation to regional adaptation, soils, fertilization, general maintenance practices, diseases and insects. Identification of grass and weed species and specific management program for home lawns, golf courses, parks and roadsides. **Prerequisite:** Junior standing.

HORT 451—Small Fruit Culture—3 cr. (2 and 3) S
Varieties, soils, sites, culture, fertilizers, harvesting and preparation for marketing of grapes, strawberries, dewberries, blackberries, raspberries and other small fruits. **Prerequisite:** Hort 201.

HORT 456—Vegetable Crops—3 cr. (3 and 0) S, ’73 and alternate years. The principles and practices employed in the commercial growing and marketing of vegetable crops. Emphasis is placed on temperature requirements, plant characteristics, varieties, soils, fertilizers, weed control, harvesting and preparation for market.

HORT 460—Problems in Landscape Design—5 cr. (3 and 6) F
Landscape planning for larger residential properties, schools, industrial plants, real estate developments; detailed finished plans, costs; further study of materials used; original problems; field study. **Prerequisite:** Hort 308 or 407.

HORT 464—Post Harvest Horticulture—3 cr. (2 and 2) F
The handling of fruits, vegetables, and ornamental crops after harvesting. Subjects include spoilage problems, hydrocooling, common and cold storage of crops, packaging and processing procedures.

HORT 468—Introduction to Research—2 cr. (1 and 3) S
Principles, developments and changes in research methods related to certain fields of agricultural research. The students obtain practice in experimental
techniques, scientific writing and the use and maintenance of various research instruments and equipment. *Prerequisite:* Senior standing.

HRT 605—Nut Tree Culture—2 cr. (2 and 0)
HRT 606—Nursery Technology—3 cr. (2 and 3)
HRT 607—Landscape Design—3 cr. (2 and 3)
HRT 608—Floral Design and Retail Marketing—2 cr. (1 and 3)
HRT 610—Floriculture—3 cr. (2 and 3)
HRT 612—Turf Management—3 cr. (2 and 3)
HRT 651—Small Fruit Culture—3 cr. (2 and 3)
HRT 652—Commercial Pomology—3 cr. (2 and 3)
HRT 656—Vegetable Crops—3 cr. (3 and 0)
HRT 660—Problems in Landscape Design—5 cr. (3 and 6)
HRT 664—Post Harvest Horticulture—3 cr. (2 and 3)
HRT 668—Introduction to Research—2 cr. (1 and 3)
HRT 801—Problems in Small Fruit Production—3 cr. (3 and 0)
HRT 802—Research Systems in Horticulture—3 cr. (2 and 3)
HRT 803—Experimental Olericulture—3 cr. (3 and 0)
HRT 804—Scientific Advances in Ornamental Horticulture—3 cr. (3 and 0)
HRT 805—Physicochemical Procedures for Determining Quality in Horticultural Crops—3 cr. (2 and 3)
HRT 808—Post-Harvest Physiology and Handling of Horticulture Crops—3 cr. (3 and 0)
HRT 807—Pomology—3 cr. (3 and 0)
HRT 808—Special Investigations in Horticulture—2 cr. (2 and 0)
HRT 809—Seminar I—1 cr. (1 and 0)
HRT 810—Seminar II—1 cr. (1 and 0)
HRT 811—Quantitative Exposition of Plant Development—2 cr. (1 and 3)
HRT 891—Research—Credit to be arranged.
HRT 991—Doctoral Research—Credit to be arranged.

**HOSPITAL AND HEALTH SERVICES ADMINISTRATION**

*Professor:* F. A. Burtner  
*Associate Professor:* C. O. Shuler  
*Adjunct Professor:* R. E. Toomey

HADM 308—Hospital and Health Services Administration—3 cr. (3 and 0)

An introduction to the organization and operation of modern American hospitals, separate clinics and public health services. Included will be legal
status, organizational peculiarities, and specific legislation effecting such agencies. Prerequisite: Junior standing.

H ADM 410—Hospital Internship—3 cr. (0 and 9)
The student will spend nine hours per week on a specified program of observing, practicing and experiencing the duties of hospital administrators in selected local hospitals. The course will be specifically outlined along with the amount of time the student will spend in each phase or department of the hospital. Student progress will be constantly monitored by University faculty and hospital staff. Prerequisite: H ADM 308.

H ADM 610—Hospital Internship—3 cr. (0 and 9)
The student will spend approximately nine hours per week following a detailed plan of study consisting of observing, practicing and experiencing the duties of hospital administrators in selected local hospitals. Progress will be periodically evaluated by University and hospital staffs.

H ADM 800—The Function and Organization of Hospitals and Health Services Administration—3 cr. (3 and 0)
An overview of organization, function, place in the community and society of hospitals, individual health services and public health services. This course in conjunction with an administrative internship will prepare the student for major responsibilities in the area of health service administration.

HUMANITIES

HUM 201—Introduction to the Humanities—3 cr. (3 and 0)
A general introduction to humanistic studies, stressing the interrelatedness of various humanistic disciplines. Such fields as art, architecture, music, literature, philosophy, and drama will be considered as they interact with, support, and develop each other in various cultural settings.

HUM 202—Introduction to the Humanities—3 cr. (3 and 0)
A continuation of Hum 201. Prerequisite: Hum 201.

HUM 203—Critical Judgment of the Cinema—3 cr. (3 and 0)
The historical development of the aims and techniques of the cinema; the theory of cinematography, its artistic values, and its critical standards. Prerequisite: Sophomore standing.

INDUSTRIAL EDUCATION

Professor: A. F. Newton, Head
Associate Professors: D. E. Maurer, H. E. Morgan, Jr.
Assistant Professors: F. A. Bosdell, P. C. Caley, J. P. Crouch, H. P. Pate, W. E. West

In Ed 101—Introduction to Industrial Education—1 cr. (1 and 0)
An introduction to the field of Industrial Education in terms of the underlying philosophies, the aims and goals, and the specific objectives of each of the Industrial Education options.

In Ed 102—Woodworking I—2 cr. (1 and 3)
A study of wood, its properties and the requisite skills necessary for understanding the use of wood in our technological way of life. Prerequisite: In Ed 101.
In Ed 202—Woodworking II—2 cr. (1 and 3)
A continuation of In Ed 102 in the study of wood, its properties, skills in machine and tool use with wood, project design, project costs and finishing processes necessary for teachers of industrial subjects. Prerequisite: In Ed 102.

In Ed 203—Basic Metal Processes—3 cr. (1 and 6)
Material separating, forming and combining practices in the metals industries, through the study of basic casting, welding and sheet metal techniques. Prerequisite: In Ed 101.

In Ed 204—Graphic Arts—3 cr. (1 and 6)
Major emphasis is placed on the basic principles underlying the graphic arts. Major areas of study include general photography, graphic layout and design, process photography, offset lithography, screen processing printing, and bindery. Modern industrial applications are stressed throughout. Prerequisite: In Ed 101.

In Ed 205—Power Technology—3 cr. (2 and 2)
A study of power in terms of energy sources, and the generation, transmission and utilization of power. Emphasis is placed on the development of insights and understandings of the scientific and operational principles involved in the production, transmission, and utilization of power. Prerequisite: In Ed 101.

In Ed 220—Recreational and Avocational Crafts—3 cr. (2 and 3)
Provides exploratory experiences in the performance of a variety of arts and crafts activities, and encourages the development of an understanding of the purpose of arts and crafts in the comprehensive recreational program.

In Ed 302—Dwelling Materials and Construction Methods—2 cr. (1 and 2)
This course is designed as an introduction to the commonly used building materials and the methods of combining them in present day construction. Prerequisite: In Ed 102.

In Ed 303—Electricity—3 cr. (1 and 6)
A laboratory inquiry into the theory and application of components, circuits, and instrumentation associated within the realm of electricity. Prerequisite: In Ed 101.

In Ed 304—Photographic Techniques—3 cr. (1 and 6)
Emphasis is placed on applications of black and white and color photography as activities for vocation and avocation. Sufficient laboratory experiences are provided to assure confidence in the use of photographic techniques. The tools and materials of image preparation are also used in conjunction with several graphic reproduction processes to enrich the effectiveness of visual presentations. Problems encountered in action, portrait, still-life, and character study photography are considered.

In Ed 305—Machining Practices—3 cr. (1 and 6)
Basic practical shop experiences on the lathe, drill press, milling machine and shaper. Benchwork, measuring tools, theory and demonstrations related to a survey of fundamental machining practices. Prerequisite: In Ed 101.

In Ed 310—Methods of Trade Teaching—3 cr. (3 and 0)
This course is designed to give basic instruction to beginning teachers in trade work. Psychological factors of learning; individual differences; methods
of teaching subjects; the special methods used in teaching skills; grading of students and keeping of proper records and reports. (Offered in Summer Sessions only.)

In Ed 312—Metal Processes in the General Shop—3 cr. (3 and 0)
Major emphasis is placed on planning and development of projects in wrought iron, sheet metal, art metal, metal spinning, welding, heat treating and other aspects of metal work that fit into a general shop program. (Offered in Summer Sessions only.)

In Ed 313—Arts and Crafts—3 cr. (2 and 3)
Emphasis on knowledge and skills in the industrial crafts by lecture, discussion and laboratory experiences. Stress is placed on several crafts basic to industrial production and popularity. Laboratory experience is required in at least four craft areas with an additional experience in one minor craft.

In Ed 314—Basic Electronics—3 cr. (1 and 6)
Basic principles of electronics as applied in radio, television, and automatic controls involving vacuum tubes, semiconductors, integrated circuits, and other electronic devices and materials. Prerequisite: In Ed 303.

In Ed 315—Construction Practices—3 cr. (3 and 0)
This course is a study of industrial practices commonly employed in the construction industry. Included will be the use of brick, tile, concrete, metal, wood, and other construction materials. (Offered in Summer Sessions only.)

In Ed 316—Plastics and Plastic Processes in the General Shop—3 cr. (3 and 0)
The industrial, commercial and personal uses of plastics are discussed and demonstrated. In addition, the kinds of plastics, their properties, and special uses are studied. (Offered in Summer Sessions only.)

In Ed 318—Industrial Technology Techniques—3 cr. (3 and 0)
Major emphasis is placed on casting, stamping and forming processes, forging and extrusion processes, machining processes, metal spraying or metallurgy, blast cutting, heating and case hardening, assembly processes, bending, finishing processes, inspection gaging. (Offered in Summer Sessions only.)

In Ed 320—Machine Woodworking—2 cr. (1 and 3)
Basic characteristics of woodcutting, shaping, and finishing operations by use of machinery and auxiliary tools. Includes project work. Prerequisite: Junior standing. (Not for Industrial Education Students.)

In Ed 325—Industrial Organizations and People—3 cr. (3 and 0)
A study of the relationships of personnel to the kinds of tasks they are asked to perform in industrial situations and the ways such situations affect workers. Emphasis is placed on methods of personnel, organization, evaluation, working conditions, and safety.

In Ed 333—Design—3 cr. (2 and 2)
The study of the principles of form and design elements in two or three dimensions as related to products in the several industrial arts areas. Lectures and laboratory projects stress creativity in the use of materials in reaching design solutions and in developing a personal design philosophy. Limited market and engineering research is conducted along with the study of significant figures in the field. Prerequisite: Basic courses in laboratory methods.
In Ed 350—Industrial Cooperative Experience—6 cr.
A full-time work experience program in industry for industrial vocational-technical education degree candidates. The student, under the cooperative supervision of the University instructor and an industrial supervisor, is placed in industry to receive planned experiences in the technical specialty which he is preparing to teach. The University instructor will coordinate placement, supervision, and evaluation of the student. The course is offered during the summer only and students are required to register with the instructor one semester prior to the summer in which he plans to enroll. Prerequisite: Junior standing in the industrial vocational-technical education program and approval of the instructor.

In Ed 372—Arts and Crafts for the Elementary Child—3 cr. (2 and 3)
Provides the elementary teacher with an opportunity to develop skills and knowledge in the use of a variety of media suitable for integrating the study of industry and industrial technology into the usual classroom procedures.

In Ed 402—Directed Teaching—6 cr. (0 and 18)
Supervised observation and teaching in cooperation with selected public schools in which opportunities are provided for securing experience in teaching industrial subjects. Prerequisite: In Ed 416, 425, and grade-point ratio required for graduation.

In Ed 405—Course Organization and Evaluation—3 cr. (3 and 0)
Problems, techniques and procedures in the preparation, selection and organization of subject matter for instructional purposes. Methods, techniques and preparation of materials used in the evaluation of student achievement in industrial education subjects.

In Ed 408—Training Programs in Industry—3 cr. (3 and 0)
Basic concepts of supervision, administration, and management of training programs. Emphasis on determining training requirements, planning, directing, and evaluating training programs.

In Ed 416—Design and Operation of Industrial Education Laboratories—3 cr. (2 and 2)
This course deals with laboratory design requirements of unit laboratories as well as multi-activity laboratories. Selection and procurement of tools and equipment, budgeting management and the coordination of activities in the laboratory are considered. Prerequisite: In Ed 313.

In Ed 421—Vocational Cooperative Programs—2 cr. (2 and 0)
A study of the developments, objectives and principles of industrial cooperative training programs. Emphasis is on the organization, promotion, and management of programs in this area of vocational education.

In Ed 422—History and Philosophy of Industrial and Vocational Education—3 cr. (3 and 0)
A study of industrial and vocational education programs with the intent of developing a sound individual philosophy of industrial and vocational education. General topics covered: history; local, state, and federal legislation; types of vocational-technical programs; professional organizations; manpower utilization, vocational guidance, and training; industry, labor, and school relationships.
In Ed 425—Teaching Industrial Subjects—3 cr. (3 and 0)
Effective methods and techniques of teaching industrial subjects. Emphasis is given to class organization, preparation of lesson outlines, and audio-visual aids. Prerequisite: Ed 335.

In Ed 432—Advanced Woodworking—2 cr. (1 and 3)
An advanced consideration of machine methods and developments, materials, quality factors, and evaluation of instructional materials and problems. Inspection trips and reports. Prerequisite: In Ed 102, In Ed 202.

In Ed 435—Advanced Welding—2 cr. (1 and 3)
An advanced consideration of studies originated in In Ed 203, new theories and developments in welding technology. Inspection trips, written and oral reports. Prerequisite: In Ed 203.

In Ed 436—Advanced Material Forming—2 cr. (1 and 3)
Advanced consideration of studies initiated in In Ed 203, development and evaluation of instructional materials and problems. Inspection trips and reports. Prerequisite: In Ed 203.

In Ed 438—Advanced Machining—2 cr. (0 and 6)
Advanced experiences in the set-up, operation and maintenance of machine tools and equipment. Project and product design. Study and reports of recent machining technological developments. Prerequisite: In Ed 305.

In Ed 440—Advanced Techniques of the Graphic Arts—3 cr. (1 and 6)
Students selecting to pursue the area of graphic arts will gain experience in the development of advanced techniques of layout and design; photographic copy preparation; cold type composition; line, halftone, duotone, and special effects photography, and advanced platemaking and pressmanship.

In Ed 441—Comprehensive General Shop Practices—2 cr. (2 and 0)
This course deals with the problems in the administration of the multiple activity programs in the comprehensive laboratory. Consideration and planning of multi-activity laboratory programs of instruction for the secondary schools is the major focus. Prerequisite: In Ed 313.

In Ed 442—Competency Testing in Vocational Subjects—3 cr. (8 and 0)
This course is especially designed for trade teachers who have assisted in making trade tests for S. C. Certification program. Teachers who expect to assist in making trade tests are also urged to enroll in this course. The course is devoted to revising present trade tests and developing tests in new fields. (Offered in Summer Sessions only.)

In Ed 444—Graphic Arts Production Control—3 cr. (2 and 3)
A study of commercial and industrial printing control. Emphasis is placed upon considerations for decision making in the areas of process and equipment selection, capital investment, and plant layout. Other topics include production flow, cost analysis, personnel supervision and training, and recent developments as they affect production. Prerequisites: In Ed 204, In Ed 440, and permission of the instructor.

In Ed 450—Industrial Cooperative Experience—6 cr.
Continuation of In Ed 350. Summer only. Prerequisite: Senior standing, In Ed 350, and approval of the instructor.
Description of Courses

In Ed 451——Special Projects—3 cr. (3 and 0)
The student is assigned a project in accordance with his needs and capabilities. Projects are either experimental, theoretical or developmental and cover subjects not thoroughly covered in other courses.

In Ed 496——Public Relations—3 cr. (3 and 0)
This course emphasizes the techniques and methods of effective public and industrial relations which contribute to understanding and cooperation of labor, business, professional, educational, and industrial groups.

In Ed 605——Course Organization and Evaluation—3 cr. (3 and 0)

In Ed 608——Training Programs in Industry—3 cr. (3 and 0)

In Ed 616——Design and Operation of Industrial Education Laboratories—3 cr. (2 and 2)

In Ed 622——History and Philosophy of Industrial and Vocational Education—3 cr. (3 and 0)

In Ed 625——Teaching Industrial Subjects—3 cr. (3 and 0)

In Ed 632——Advanced Woodworking—2 cr. (1 and 3)

In Ed 635——Advanced Welding—2 cr. (1 and 3)

In Ed 636——Advanced Material Forming—2 cr. (1 and 3)

In Ed 638——Advanced Machining—2 cr. (1 and 3)

In Ed 640——Advanced Techniques of the Graphic Arts—3 cr. (1 and 6)

In Ed 641——Comprehensive General Shop Practices—2 cr. (2 and 0)

In Ed 644——Graphic Arts Production Control—3 cr. (2 and 3)

In Ed 696——Public Relations—3 cr. (3 and 0)

In Ed 815——Seminar in Industrial Education—1 cr. (1 and 0)

In Ed 820——Recent Process Developments—3 cr. (3 and 0)

In Ed 840——School Shop Design—3 cr. (3 and 0)

In Ed 845——Curriculum Development in Industrial Education—3 cr. (3 and 0)

In Ed 860——Curriculum Planning and Development in Industrial Arts—3 cr. (3 and 0)

In Ed 861——Administration and Supervision of Vocational Education—3 cr. (3 and 0)

In Ed 865——American Industries—3 cr. (3 and 0)

In Ed 891——Research in Industrial Education—Credit to be arranged.

In Ed 895——Special Problems I—3 cr. (3 and 0)

In Ed 896——Special Problems II—3 cr. (3 and 0)
INDUSTRIAL ENGINEERING

Professor: E. Laitala, Head
Associate Professor: J. H. Couch

IE 301—Process Planning I—3 cr. (2 and 3)
Study of methods of conversion of raw materials into finished products. Emphasis is from the viewpoint of management and control of manufacturing operations. Includes basic terminology, interpretation and use of engineering plans, impact of production volume. This course will examine various manufacturing processes including material removal, casting, joining and forming of materials, and associated measurement techniques. Prerequisite: EG 103 or 109 and Phys 122.

IE 303—Job Evaluation and Wage Incentives—3 cr. (3 and 0)
Job description, specification, and classification. Systems employed for establishing relative ranks of jobs. Basic wage and salary determination. Wage incentive methods. Prerequisite: IE 307, 410 or consent of instructor.

IE 304—Methods and Standards—3 cr. (2 and 3)
Fundamentals relating to work methods design and analysis. Includes study of techniques necessary for determining efficient work methods. Work measurement as a basis for control of costs and scheduling. Prerequisite: Junior standing.

IE 306—Process Planning II—3 cr. (2 and 3)
Study of recent process developments and impact on planning and control of manufacturing operations. Numerical control of machines, computer-aided design, zero defects program, and others. Special laboratory investigations, and value engineering project. Prerequisite: IE 301.

IE 307—Survey of Engineering—3 cr. (3 and 0)
An examination of engineering in terms of fundamentals employed, criteria governing engineering decisions, basic functions, and plans created. The kinds of interactions and interdependencies between engineering and non-engineering functions are identified as a basis for optimum organization design. Open to students planning employment in industry including both engineering and non-engineering majors. Prerequisite: Phys 208 or 221 and junior standing.

IE 403—Process Planning III—3 cr. (3 and 0)
Continuation of IE 306; study of latest process developments. Prerequisite: IE 306.

IE 405—Plant Layout and Material Handling—3 cr. (2 and 3)
Fundamentals underlying the planning of factory layout for new products and increases in production volume. Layout by product and process. Scale model, template, and other planning techniques. Materials handling analysis and equipment decisions. Prerequisite: IE 301 and IM 408 or consent of instructor.

IE 407—Industrial Application of Statistics—3 cr. (2 and 3)
Application of statistical principles of analysis and control to production processes, studies of process capabilities, quality control, work sampling, reliability analysis, and machine interference. Prerequisite: Math 208 and Math 301.
IE 408—Plant Design—2 cr. (1 and 3)
Integration of unit operations into a total production system. Study of analytical procedures for determining layout of production and other facilities, line balance, manner in which operations shall be linked or material moved between them. Creation and analysis of alternative designs. Prerequisite: IE 304 and Senior standing.

IE 410—Engineering and Organization—3 cr. (3 and 0)
The nature of industrial enterprise in terms of purpose, organization structure, governing criteria, responsibilities and relationships of various functional groups. Project engineering and organization. Analysis and coordination of engineering functions as foundation for engineering management.

IE 412—Seminar—1 cr. (1 and 0)
Library search and oral reports covering recent technological developments in the field of industrial engineering. Consideration of professional responsibilities and post graduation plans. A major term paper is required. Prerequisite: Senior standing in Industrial Engineering.

IE 413—Seminar—1 cr. (1 and 0)
Continuation of IE 412. Prerequisite: IE 412.

IE 610—Engineering and Organization—3 cr. (3 and 0)

**INDUSTRIAL MANAGEMENT**

**Professors:** C. C. Davis, B. J. Todd, C. H. Whitehurst, Jr., Head
**Associate Professors:** E. A. LaRoche, F. R. Gray, J. L. Richardson, G. D. Riggs, C. O. Shuler, C. R. Smith, J. M. Wannamaker
**Assistant Professors:** R. W. Barron, Susan H. Brown, C. L. Dyer, T. H. Gunter, Jr., D. M. Swanson, J. A. Turner, R. F. Zant
**Instructor:** B. M. White
**Adjunct Professors:** R. E. Toomey, R. L. Brown

**IM 100—Introduction to Industrial Management—0 cr. (1 and 0)**
A series of lectures by University and industry speakers in which the role of the industrial manager in society is examined and explained. Particular emphasis is placed on orienting the student to understanding the manager's function in a market system economy.

**IM 201—Introduction to Industrial Management—3 cr. (3 and 0)**
An introductory survey of management's role as a fourth factor of economic production.

**IM 299—Computer Programming I—1 cr. (0 and 3)**
An elementary operating course primarily designed to familiarize the student with the various capabilities of electronic computers. A demonstrated ability to write basic programs applicable to management areas is required. Prerequisite: Permission of instructor.

**IM 304—Quality Control—3 cr. (3 and 0)**
Basic control techniques in the field of industrial production, inspection and experimentation. Various sampling, control and inspection problems are studied
with special reference to practical applications. Underlying theory, assumptions and limitations are presented. Prerequisite: Math 301.

**IM 306—Corporation Finance—3 cr. (3 and 0)**

The organization and operation of corporations with emphasis on the nature and influences of the various sources of funds. Prerequisite: Junior standing.

**IM 307—Personnel Management—3 cr. (3 and 0)**

An introductory course dealing with the principles and policies governing present day employee-employer relationships. Attention directed to methods of electing, training, placing, and promoting of employees to develop sound personnel techniques. Prerequisite: Junior standing.

**IM 308—Marketing Strategy—3 cr. (3 and 0)**

This course is designed to explore the development of current marketing concepts and their use in a strategic business situation. Emphasis is placed upon the qualitative aspects of promotional strategy, product design and development, concept testing, methods of distribution, and pricing. The student is introduced to the controllable and uncontrollable variables in marketing and begins to develop an understanding of how each may be used to best advantage in a competitive situation.

**IM 312—Commercial Law—3 cr. (3 and 0)**

An introduction to business law with primary attention given to contracts, agency, negotiable instruments and sales. Prerequisite: Junior standing.

**IM 313—Commercial Law—3 cr. (3 and 0)**

Continuation of IM 312 with emphasis on business organization, personal and real property, estates and bankruptcy and security services.

**IM 322—Legal Environment of Business—3 cr. (3 and 0)**

A comprehensive study of the development of governmental regulation of business including both state and national regulations. Attention is given to the constitutional source and limitation of power in both governments; specific areas in which the governments have acted (production, labor, combinations, prices, etc.) and the regulations that have been imposed in these areas; and the scope of the administrative process.

**IM 401—Marketing Analysis I—3 cr. (3 and 0)**

An examination of the activities involved in the flow of goods and services from producer to consumer. Stressed will be the application of quantitative techniques for predicting sales and evaluating alternative promotional strategies. Prerequisite: Senior standing in IM or permission of instructor.

**IM 402—Operations Planning and Control—3 cr. (3 and 0)**

The application of modern statistical and mathematical techniques to the planning and control of industrial operations. Emphasis will be placed on applications in forecasting, inventory, production scheduling and control, equipment selection and replacement, maintenance and materials handling. Prerequisite: IM 304 and senior standing.

**IM 403—Special Problems—2 cr. (2 and 0)**

Each student will plan and develop a research project related to the field of management. Prerequisite: Senior standing in Industrial Management.
IM 404—Managerial Economics—3 cr. (3 and 0)
The objective of this course is to bridge the gap between theory and managerial practices. Its stress is on the use of tools of economic analysis in classifying problems, in organizing and evaluating information, and in comparing alternative courses of action. Prerequisite: Mgt Sc 311, or permission of instructor.

IM 405—Economics of Transportation—3 cr. (3 and 0)
History and structure of transportation systems of the United States; the nature of transportation costs and rates. Transportation systems as factors in industrial location. Government policy towards transportation. Prerequisite: Senior standing and permission of the instructor.

IM 406—Theory of Industrial Location—3 cr. (3 and 0)
A theoretical study of the general factors which determine plant location in a capitalist society. Particular attention is paid to surveying current literature. A comparison of location theory and actual location patterns is stressed. Prerequisite: Senior standing and permission of instructor.

IM 407—Directed Research—1 cr. (1 and 0)
Each student will plan and develop a research project related to the field of management. Prerequisite: Senior standing in Industrial Management.

IM 408—Work Simplification and Standardization—3 cr. (2 and 3)
Principles and practices of motion and time as it is applied to industry. Emphasis is given to its application and its influence on methods, material handling, plant layout, and time study procedures.

IM 409—Management Simulation—0-1 cr. (0 and 3)
Practice in managerial decision-making under simulated competitive industry conditions. Guidance is furnished by the staff member administering the requirement. The model is designed to derive maximum benefit from previous courses in economics, econometrics and statistics. Prerequisite: Senior standing and permission of instructor.

IM 410—Marketing Research I—1 cr. (1 and 0)
A directed research course oriented toward those students interested in a career in marketing.

IM 411—Marketing Research—2 cr. (2 and 0)
A directed research course oriented toward those students interested in a career in marketing.

IM 412—Marketing Analysis II—3 cr. (3 and 0)
A continuation of Marketing Analysis, IM 401. Prerequisite: IM 308 or permission of instructor.

IM 413—Marketing Communications—3 cr. (3 and 0)
The vital role of advertising and public relations in today's marketing strategy is examined. Promotional mixes will be designed so as to be a blend of the markets, media, and messages by which corporate communications are maintained with buyers. Communications theory is explored and then the communications process is analyzed with emphasis on its effect upon the flow of goods and services to the consuming public. Prerequisite: IM 308.
IM 415—Managerial Decision Making—3 cr. (3 and 0)
Management problems and methods involved in the operation of manufacturing institutions, including location, equipment investment, organization structure, and budgets. Attention is given primarily to the above areas by the use of the case method. Emphasis on oral and written communication. Prerequisite: Permission of instructor.

IM 416—Management of Human Resources—3 cr. (3 and 0)
A course designed to orient the student toward recent developments in enlightened uses of human resources with emphasis on procurement, training, development, rewarding and retention of such resources. Prerequisite: Permission of instructor.

IM 417—Manufacturing Logistics—3 cr. (3 and 0)
A study of more advanced manufacturing and production techniques including predetemined motion time data systems, micromotion study analysis, work sampling or ratio delay studies, zero defects, materials handling techniques, machine interference, time study formula construction, machinery and equipment replacement calculations, economic lot size determination, development and use of standard data, cost reduction programs, operator training methods, charting of time study data, problems of machinery and equipment layout, and developing of complex time standards. Prerequisite: IM 408 or permission of instructor.

IM 418—Management Information Systems—3 cr. (3 and 0)
A study of the design and use of communication processes in which data are recorded, transmitted and revised as an aid in management decision making in operations planning and controlling.

IM 420—Management of Defense Expenditures—3 cr. (3 and 0)
Examines the various components and budget classifications of the Department of Defense. Responsibility for the management of these expenditures and methods employed are treated extensively. Prerequisite: Econ 419, Economics of Defense, or permission of instructor.

IM 499—Computer Programming II—1 cr. (0 and 3)
Each student will complete a research project relating to the accomplishment of some management function in which a computer program is now— or is expected to be—of cardinal importance. Prerequisite: IM 299 or equivalent.

IM 601—Marketing Analysis I—3 cr. (3 and 0)
IM 602—Operations Planning and Control—3 cr. (3 and 0)
IM 604—Managerial Economics—3 cr. (3 and 0)
IM 605—Economics of Transportation—3 cr. (3 and 0)
IM 606—Theory of Industrial Location—3 cr. (3 and 0)
IM 608—Work Simplification and Standardization—3 cr. (2 and 3)
IM 612—Marketing Analysis II—3 cr. (3 and 0)
IM 615—Managerial Decision Making—3 cr. (3 and 0)
IM 617—Manufacturing Logistics—3 cr. (3 and 0)
IM 620—Management of Defense Expenditures—3 cr. (3 and 0)
MANAGEMENT
Mgt 800—Management Simulation—1 cr. (0 and 3)
Mgt 801—Quantitative Economic Analysis—3 cr. (3 and 0)
Mgt 802—Finance—3 cr. (3 and 0)
Mgt 803—Operations Management—3 cr. (3 and 0)
Mgt 804—Managerial Policy—3 cr. (3 and 0)
Mgt 805—Quality Control—3 cr. (3 and 0)
Mgt 811—Advanced Marketing Analysis—3 cr. (3 and 0)
Mgt 816—Management of Human Resources—3 cr. (3 and 0)
Mgt 891—Thesis—3 cr.

MANAGEMENT SCIENCE

Professors: B. J. Todd, C. H. Whitehurst
Associate Professors: E. A. LaRoche, G. D. Riggs
Assistant Professors: C. L. Dyer, D. M. Swanson, R. F. Zant

Mgt Sc 311—Introduction to Econometrics—3 cr. (3 and 0)
An introduction to economic measurement. Emphasis is placed upon the mathematical formulation of economic theory, the application of calculus to economic theory, and the application of statistics with particular emphasis on the use of regression analysis in economics. Elementary econometric models are introduced. Prerequisite: Math 301 and Econ 314.

Mgt Sc 413—Management Science I—3 cr. (3 and 0)
The role and uses of management science techniques in decision making in business and industry; the problems of internal operation of a business enterprise in static and dynamic settings under conditions of certainty, risk and uncertainty. Deterministic models will be emphasized, and topics include classical optimization, marginal analysis, programming, the transportation problem, allocation and assignment, the game theory. Attention will also be given to input-output, network analysis, and decision theory. Prerequisite: Consent of instructor.

Mgt Sc 414—Statistical Analysis—3 cr. (3 and 0)
This course is designed to provide the student with sufficient understanding of modern statistical methods to make judicious application of statistics in management decision making. Emphasis is placed on the proper design, analysis and interpretation of planned experiences in internal operations. Topics include single factor through fractional factorial experiments, response surface methodology and evolutionary operations. Prerequisite: Math 301 or equivalent.

Mgt Sc 611—Introduction to Econometrics—3 cr. (3 and 0)
Mgt Sc 613—Management Science I—3 cr. (3 and 0)
Mgt Sc 614—Statistical Analysis—3 cr. (3 and 0)
Mgt Sc 806—Regional Science Methods—3 cr. (3 and 0)
Mgt Sc 807—Econometric Methods I—3 cr. (3 and 0)
Mgt Sc 808—Econometric Methods II—3 cr. (3 and 0)
Mgt Sc 812—Management Science II—3 cr. (3 and 0)
MATERIALS ENGINEERING

Associate Professors: M. J. Eitel, S. F. Hulbert, Program Coordinator; J. S. Wolf

Assistant Professors: J. J. Klawitter, J. E. Lemons

MatE 301—Introduction to Metallurgical Engineering—3 cr. (3 and 0)

An introduction to the structure and properties of engineering materials. Topics included are bonding in solids, mechanical behavior, equilibrium and non-equilibrium behavior of mixtures and alloys, material-environment interaction, selection of materials for engineering uses, and analysis of material failures. Emphasis is placed on metals and polymers. Prerequisite: Junior standing in engineering or the physical sciences, Ch 102, Phys 221.

MatE 302—Materials Engineering Laboratory—2 cr. (1 and 3)

Laboratory practice in the determination and analysis of the properties of engineering materials. Topics included are specimen selection and preparation, microscopy, photography, temperature measurement, thermal analysis, and mechanical testing. Prerequisite: MatE 301 or CrE 310.

MatE 307—Introduction to Polymer Engineering—3 cr. (3 and 0)

An introduction to the materials engineering of organic polymers. Principles and practice of synthesis of macromolecules; polymerization through addition and condensation; copolymerization; block and graft polymerization. Characterization of polymers in solution; molecular weight averages and polymericity. Structure and properties of polymers in the condensed state; crystalline-amorphous system; theory of rubber elasticity, mechanical, thermal, optical, and electrical behavior. Prerequisite: Freshman Chemistry.

MatE 312—Materials Engineering Thermodynamics—3 cr. (3 and 0)

An introduction to the thermodynamics of materials with special emphasis on metallic systems. Topics included are atomic and crystalline properties of metals, solid solutions and intermetallic compounds, the thermodynamic laws and their relation to solution theory and phase equilibria, and applications of the above to the phase equilibria in unary, binary, and ternary metallic systems with special regard to microstructural evolution. Prerequisite: MatE 301 or CrE 310.

MatE 405—Physical Metallurgy I—3 cr. (3 and 0)

A comprehensive treatment of electron theory, lattice defects, diffusion, solutions and phase equilibria, phase transformations, creep and fracture applied to metals and simple alloys, with emphasis on structure-property relationships. Prerequisite: MatE 301 or CrE 310.

MatE 406—Physical Metallurgy II—3 cr. (3 and 0)

A continuation of MatE 405. Prerequisite: MatE 405.

MatE 408—Principles of Polymer Science I—3 cr. (3 and 0)

An introduction to the materials science of organic polymers. The structures for many types of polymers are surveyed and correlated with macroscopically observable characteristics. The general properties of pure and coexisting polymer phases are defined, and thermally dependent phase transitions are discussed. Further considerations are devoted to swelling phenomena, degradation and stabilization mechanisms, surface modification methods, and to
properties of composite structures. Prerequisite: MatE 307 or MatE 301 or CrE 310 or an equivalent course.

MatE 409—Principles of Polymer Science II—3 cr. (3 and 0)
A continuation of the introductory course in polymer science. Polymerization methods are surveyed, and the polymerization kinetics of one type of system is dealt with in detail. Quantitative treatments are presented for various experimental procedures that involve dilute polymer solutions. Further considerations are concerned with important testing techniques, and with the unique behavior of some polyelectrolyte systems. Prerequisite: MatE 408 or an equivalent course.

MatE 411—Materials Engineering Kinetics—3 cr. (3 and 0)
An introduction to the important rate processes in solid materials. Topics included are homogeneous and heterogeneous phase transitions, solidification and other nucleation processes, recrystallization and grain growth, and sintering reactions. Emphasis is placed upon the effects of these phenomena on the properties of engineering materials. Prerequisite: A course in thermodynamics.

MatE 421—Mechanical Metallurgy—3 cr. (3 and 0)
A comprehensive treatment of the concepts of the atomic and microstructural processes which govern the mechanical behavior of metals, alloys, metal oxides, and composite structures. The theories of plastic deformation, creep, and fatigue are applied to metal working processes and the selection of materials for loadbearing applications. Prerequisite: MatE 301 or CrE 310.

MatE 450—Special Topics in Materials Engineering—1-3 cr. (1-3 and 0)
A comprehensive study of a topic of current interest in the field of materials engineering. May be taken for credit more than one time. Prerequisite: Consent of instructor.

MatE 451—Corrosion of Materials—3 cr. (3 and 0)
An introduction to the aqueous and gaseous corrosion of metals and alloys. Topics included are ion migration in solid and liquid phases, Pourbaix diagrams, theory and application of corrosion rate measurements, and special corrosion process as they apply to metal degradation and failure. Prerequisite: A course in thermodynamics.

MatE 620—Mechanical Properties of Materials—3 cr. (3 and 0)
MatE 800—Seminar in Materials Research—1 cr. (1 and 0)
MatE 802—Research Techniques in Physical Metallurgy—3 cr. (2 and 3)

MatE 805—Physical Metallurgy I—3 cr. (3 and 0)
MatE 806—Physical Metallurgy II—3 cr. (3 and 0)
MatE 807—Physical Properties of Polymers—3 cr. (3 and 0)
MatE 808—Mechanical Properties of Polymers—3 cr. (3 and 0)
MatE 810—Diffusion in Solids—3 cr. (3 and 0)
MatE 811—Kinetics of Heterogeneous Reactions—3 cr. (3 and 0)
MatE 812—Metallurgical Thermodynamics—3 cr. (3 and 0)
MAT 814—Surface Chemistry of Materials—3 cr. (3 and 0)
MAT 815—Application of Heterogeneous Equilibria—3 cr. (3 and 0)
MAT 820—Deformation Mechanisms in Solids—3 cr. (3 and 0)
MAT 821—Strength Mechanisms in Solids—3 cr. (3 and 0)
MAT 831—Quantum Theory of Metals I—3 cr. (3 and 0)
MAT 835—X-Ray Metallography—3 cr. (2 and 3)
MAT 841—Sintering and Related Phenomena—3 cr. (3 and 0)
MAT 850—Special Topics in Materials Engineering—3 cr. (3 and 0)
MAT 851—Oxidation of Metals and Alloys—3 cr. (3 and 0)
MAT 891—Research—Credit to be arranged
MAT 991—Doctoral Research—Credit to be arranged

MATHEMATICS

Professors: C. V. Aucoin, F. M. Cholewinski, A. T. Hind, Jr., J. W. Kenelly, Head; A. Sobczyk

Instructors: Eugenie V. Bartmess,* Louise G. Fulmer, Jeuel G. LaTorre

Math 011—Mathematics—5 cr. (5 and 2)
Basic algebraic methods. A general review and development of fundamental mathematical concepts. Basic numerical processes and techniques of algebra. Designed to prepare students for college courses.

Math 012—Mathematics—5 cr. (5 and 2)
Basic geometric concepts. A general review and development of elementary geometric and spacial concepts. Mensuration formulas and elementary properties of spacial figures. Designed to prepare students for college courses.

Math 100—College Algebra—2 cr. (5 and 0)
Required of all freshmen who fail to make a satisfactory grade on the Mathematics Test, Level I (Standard). An intensified review of high school algebra and the topics listed under Math 103. Students enrolled in Math 100 must receive a passing grade in this course before they are eligible to enroll in any other mathematics course. Math 100 may be substituted for Math 103.

* On leave.
Math 101—Mathematical Analysis I—3 cr. (3 and 0)
Topics include: probability spaces, conditional probabilities and discrete random variables. Prerequisite: A satisfactory score on the Mathematics Test, Level I (Standard) or consent of the instructor.

Math 102—Mathematical Analysis II—3 cr. (3 and 0)
Topics include: intuitive calculus (differentiation and integration), continuous random variables, normal distribution and other probability densities. Prerequisite: Math 101 or consent of the instructor.

Math 103—College Algebra—2 cr. (3 and 0)
Algebraic processes, functions, equations, inequalities, mathematical induction, theory of equations, determinants, and logarithms. Prerequisite: A satisfactory score on the Mathematics Test, Level I (Standard).

Math 104—Trigonometry—2 cr. (3 and 0)
Trigonometric functions, equations, identities, and solution of triangles. Logarithms and complex numbers. Prerequisite: A satisfactory score on the Mathematics Test, Level I (Standard).

Math 106—Calculus of One Variable—4 cr. (5 and 0)
Topics include: analytic geometry, introduction to derivatives, computation and application of derivatives, integrals, techniques of integration, and approximations. Prerequisite: Math 103, 104, or a satisfactory score on the Mathematics Test Level I (Standard) or consent of the instructor.

Math H106—Calculus of One Variable—4 cr. (5 and 0)
Same as Math 106 except that this honors section is open to students only by invitation.

Math 108—Calculus and Linear Algebra—4 cr. (5 and 0)
Topics include: matrices and vectors, transformation and matrices, representations of linear transformations and the topics in calculus are infinite series, limits, differentiation and integration. Prerequisite: Math 106.

Math H108—Calculus and Linear Algebra—4 cr. (5 and 0)
Same as Math 108 except this honors section is open to students only by invitation.

Math 115—Contemporary Mathematics for Elementary School Teachers I—3 cr. (3 and 0)
Logic, sets, and the properties of the counting numbers, numeration systems.

Math 116—Contemporary Mathematics for Elementary School Teachers II—3 cr. (3 and 0)
A continuation of Math 115. Subtraction, properties of the integers, elementary number theory, rational number system, real number system. Prerequisite: Math 115.

Math 203—Elementary Statistical Inference—3 cr. (3 and 0)
A survey course in fundamental statistical principles with applications to social sciences and other fields. The development of the course will assume knowledge of finite probability. Major topics include: empirical frequency distributions, computation of descriptive statistics, basic statistical inference including estimation and z, t, and F tests, regression and correlation analysis, contingency tables, analysis of variance. Prerequisite: Math 102 or a 3-credit course in finite probability or consent of the instructor.
MATH 206—CALCULUS OF SEVERAL VARIABLES—4 cr. (5 and 0)
Topics include: real valued functions of several variables, multiple integration, differential calculus of functions of several variables, applications, vector field theory. Prerequisite: Math 108.

MATH H206—CALCULUS OF SEVERAL VARIABLES—4 cr. (5 and 0)
Same as Math 206 except this honors section is open to students only by invitation.

MATH 207—MULTIPLE DIMENSION CALCULUS—3 cr. (3 and 0)
Principal topics include differential and integral calculus for functions of several variables, extreme values of functions, Lagrangian multipliers, differential equations and difference equations. Examples from the managerial and social sciences. Prerequisite: Math 108.

MATH 208—ENGINEERING MATHEMATICS I—4 cr. (5 and 0)
This course presents an introduction to the study of differential equations, complex variables, and the Laplace transforms. Prerequisite: Math 206.

MATH H208—ENGINEERING MATHEMATICS I—4 cr. (5 and 0)
Same as Math 208 except that this honors section is open to students only by invitation.

MATH 215—ALGEBRA FOR ELEMENTARY SCHOOL TEACHERS—3 cr. (3 and 0)
Linear equations and linear inequalities in one variable, functions and graphs, systems of linear equations and linear inequalities, quadratic equations, complex number system. Finite number systems, algebraic structures.

MATH 216—GEOMETRY FOR ELEMENTARY SCHOOL TEACHERS—3 cr. (3 and 0)
An informal treatment of the basic concepts of geometry.

MATH 295—FOUNDATION OF ANALYSIS—3 cr. (3 and 0)
An introduction to the language and use of symbolic logic and the properties of the real number system with applications to the calculus. Prerequisite: Math 108.

MATH 301—STATISTICAL THEORY AND METHODS I—3 cr. (3 and 0)
Principal topics include: elementary probability theory, discrete and continuous random variables, expected values, normal distribution, chi-square distribution, t-distribution, F-distribution, test of hypothesis, point and interval estimation, curve fitting. Prerequisite: Math 206.

MATH H301—STATISTICAL THEORY AND METHODS I—3 cr. (3 and 0)
Same as Math 301 except that this honors section is open to students only by invitation.

MATH 308—COLLEGE GEOMETRY—3 cr. (3 and 0)
Theorems and concepts more advanced than those of high school geometry. A treatment of the various properties of the triangle, including the notable points, lines, and circles associated with it. Prerequisite: Math 106.

MATH 309—ENGINEERING MATHEMATICS II—3 cr. (3 and 0)
A continuation of Math 208. An introduction to Fourier Series, numerical methods, partial differential equations and certain special functions is given. Prerequisite: Math 208.
Math H309—Engineering Mathematics II—3 cr. (3 and 0)
Same as Math 309 except that this honors section is open to students only by invitation.

Math 402—Theory of Probability—3 cr. (3 and 0)
Principal topics include: combinatorial theory, probability axioms, random variables, expected values; special discrete and continuous distributions, jointly distributed random variables, correlation, conditional expectation, law of large numbers, central limit theorem. Prerequisite: Math 206.

Math H402—Theory of Probability—3 cr. (3 and 0)
Same as Math 402 except that this honors section is open to students only by invitation.

Math 403—Statistical Inference—3 cr. (3 and 0)
Principal topics include: sampling distributions, point and interval estimation, maximum likelihood estimators, method of moments, least squares estimators, tests of hypothesis, likelihood ration methods, regression and correlation analysis, introduction to analysis of variance. Prerequisite: Math 402.

Math H403—Statistical Inference—3 cr. (3 and 0)
Same as Math 403 except that this honors section is open to students only by invitation.

Math 404—Introduction to Stochastic Processes—3 cr. (3 and 0)
Principal topics include—random variables, counting processes, stationary processes, ergodic processes, spectral distribution function, examples from scientific fields to indicate the use of stochastic processes in construction of models of physical and behavioral phenomena. Prerequisite: Math 402.

Math 405—Statistical Theory and Methods II—3 cr. (3 and 0)
Principal topics include contingency tables, goodness of fit, rank-sum tests. Kolmogorov-Smirnov tests, analysis of variance, factorial experimentation, applications to reliability and life testing, applications to quality assurance. Prerequisite: Math 301.

Math 407—Partial Differential Equations—3 cr. (3 and 0)
Partial differentiation and space geometry, origins of partial differential equations, linear and non-linear equations of the first order, Fourier series, linear equations of the second and higher orders. Prerequisite: Math 208.

Math 408—Topics in Geometry—3 cr. (3 and 0)
An introduction to topics in special geometries which include non-Euclidean space concepts, such as projective geometry, finite geometries, and intuitive elementary topology. A brief introduction to vector geometry. Prerequisite: Math 206.

Math 409—Statistical Theory and Methods III—3 cr. (3 and 0)
A continuation of Math 405 with equal emphasis on both the mathematical foundations and practical applications of advanced statistical methods. Principal topics include: experimental designs, fractionally replicated experiments, multiple regression and response surface analysis, evolutionary operations, simultaneous inference, analysis of covariance, and time series analysis. Prerequisite: Math 405.
Math 411—Linear Algebra—3 cr. (3 and 0)
An introduction to the algebra of matrices, vector spaces, polynomials and linear transformations. Prerequisite: Math 206.

Math 412—Introduction to Modern Algebra—3 cr. (3 and 0)
An introduction to the concepts of algebra. Topics included are the number system; elementary theory of groups; rings, integral domains, and fields; matrices over a field; determinants and matrices; groups, rings, and ideals. Prerequisite: Math 206.

Math H412—Introduction to Modern Algebra—3 cr. (3 and 0)
Same as Math 412 except that this honors section is open to students only by invitation.

Math 413—Modern Algebra—3 cr. (3 and 0)
A continuation of Math 412.

Math H413—Modern Algebra—3 cr. (3 and 0)
Same as Math 413 except that this honors section is open to students only by invitation.

Math 415—Introduction to Topology—3 cr. (3 and 0)
An introduction to point set topology; Hausdorff, regular and normal spaces; metric connected and compact spaces; continuous mappings and homeomorphisms. Prerequisite: Math 295.

Math H415—Introduction to Topology—3 cr. (3 and 0)
Same as Math 415 except that this honors section is open to students only by invitation.

Math 417—Mathematics Programs—3 cr. (3 and 0)
Aspects of the new high school programs in mathematics. Open only to in-service teachers or students in the Mathematics Teacher Training Program. Prerequisite: Math 308; corequisite: Math 408.

Math 419—Applied Combinatorial Algebra I—3 cr. (3 and 0)
This course applies theoretical concepts of sets, functions, binary relations, graphs, Boolean algebras, propositional logic, semigroups, groups, homomorphisms, and permutation groups to computer characterization and design, words over a finite alphabet and concatenation, binary group codes, and other communication or computer problems. Computer algorithms for listing permutations, combinations, compositions, and partitions and for representation and processing of digital information are considered. Prerequisite: Math 206.

Math 420—Applied Combinatorial Algebra II—3 cr. (3 and 0)
This course applies graph theory, ring and field theory, cardinality of sets, and difference equations to Nim games and other perfect information games, transport networks, shortest route problems, polynomial codes, Bose-Chandhuri-Hoquenghem codes, machine computability, mathematical linguistics, classification of programming languages, and different codes. Prerequisite: Math 419, or Math 412, or consent of instructor.

Math 422—Mathematical Logic—3 cr. (3 and 0)
A detailed and rigorous study of a logical system as a foundation for mathematics. An analysis of basic concepts occurring in the foundations of mathematics. Prerequisite: Sufficient mathematical background.

**Description of Courses**

**Math 424—Foundations of Mathematics—3 cr. (3 and 0)**

Naive set theory, cardinal and ordinal numbers, and axiom of choice and equivalents. A study of the set theoretic fundamentals of abstract mathematics.

**Math 425—Intermediate Differential Equations—3 cr. (3 and 0)**

Second order linear differential equations, regular singular points, Bessel, Legendre and hypergeometric functions, general linear equations, existence and uniqueness theorems, plane autonomous systems and phase plane concepts, Sturm-Louville systems. *Corequisite:* Advanced Calculus.

**Math 429—Numerical Analysis I—3 cr. (3 and 0)**

Difference and summation calculus, round off noise, finite Fourier series, polynomial approximation, numerical solution of differential equations. *Prerequisite:* Math 453 or Math 463.

**Math 435—Complex Variables—3 cr. (3 and 0)**

**Math H435—Complex Variables—3 cr. (3 and 0)**

Same as Math 435 except that this honors section is open to students only by invitation.

**Math 452—Linear Programming—3 cr. (3 and 0)**

An introduction to linear programming, using elementary matrix algebra and the theory of convex polygons. Applications to managerial problems, operations research, economic behavior, the theory of games and military strategy are considered. *Prerequisite:* Math 206 or permission of the instructor.

**Math 453—Advanced Calculus I—3 cr. (3 and 0)**

Limits, continuity, and differentiation of functions of one and several variables, the Riemann integral, and vector analysis. *Prerequisite:* Math 208 and Junior standing.

**Math 454—Advanced Calculus II—3 cr. (3 and 0)**

A continuation of Math 453. Transformations, multiple integrals, line and surface integrals, infinite sequences and series, and improper integrals.

**Math 457—Applied Mathematics I—cr. (3 and 0)**

Determinants and matrices, review of differential equations, finite differences, Fourier series and integrals, Laplace transformations, a large selection of applications. *Prerequisite:* Math 208.

**Math 458—Applied Mathematics II—3 cr. (3 and 0)**

**Math 463—Mathematical Analysis I—3 cr. (3 and 0)**

Basic properties of the real number system, sequences and limits; continuous functions, uniform continuity and convergence. Integration, differentiation, functions of several real variables, implicit function theory. *Prerequisite:* Math 295.
Mathematics 347

Math H463—Mathematical Analysis I—3 cr. (3 and 0)
Same as Math 463 except that this honors section is open to students only by invitation.

Math 464—Mathematical Analysis II—3 cr. (3 and 0)
A continuation of Math 463.

Math H464—Mathematical Analysis II—3 cr. (3 and 0)
A continuation of Math H463. This honors section is open to students only by invitation.

Math 471—Applied Statistical Decision Theory—3 cr. (3 and 0)
An introduction to statistical decision theory emphasising the Bayesian approach. Behavioral axioms, characterizing the "Rational decision maker," lead to the laws of probability theory and utility theory. Topics include: axioms of subjective probability and utility, extensive and normal form analysis, likelihood principle, conjugate distributions. Prerequisite: Math 402.

Math 473—Introduction to Nonlinear Optimization—3 cr. (3 and 0)
An introduction to the application and theory of nonlinear optimization problems. The primary topics include: classical optimization based on the calculus, approximation techniques, separable programming, quadratic programming, gradient methods, and dynamic programming. Prerequisite: Math 452, 453.

Math H481—Honors Seminar in Mathematics—Credit to be arranged
(3 and 0)
At the discretion of the instructor, attention will be focused upon mathematical areas in which nonroutine problems can be posed with comparative ease. Emphasis will be upon independent study and student use of previously acquired mathematical skills and his own ingenuity in the examination, presentation or preparation of mathematical papers. These papers may be expository or creative in content and may deal with applications of the mathematics under investigation. This honors course is open to students only by invitation for not more than three hours credit.

Math H482—Honors Seminar in Mathematics—Credit to be arranged.
(3 and 0)
A continuation of Math H481.

Math 601—Statistical Theory and Methods I—3 cr. (3 and 0)
Math 602—Theory of Probability—3 cr. (3 and 0)
Math 603—Statistical Inference—3 cr. (3 and 0)
Math 604—Introduction to Stochastic Processes—3 cr. (3 and 0)
Math 605—Statistical Theory and Methods II—3 cr. (3 and 0)
Math 607—Partial Differential Equations—3 cr. (3 and 0)
Math 608—Topics in Geometry—3 cr. (3 and 0)
Math 609—Statistical Theory and Methods III—3 cr. (3 and 0)
Math 611—Linear Algebra—3 cr. (3 and 0)
Math 612—Introduction to Modern Algebra—3 cr. (3 and 0)
Math 613—Modern Algebra—3 cr. (3 and 0)

MECHANICAL ENGINEERING

Professors: D. W. Bradbury, J. L. Edwards, Acting Head; T. C. Hardin, E. Harrison, A. D. Lewis, S. M. Watson, T. Yang

ME 201—Engineering Design and Production—3 cr. (2 and 3)
An introduction to engineering design with emphasis on creativity, synthesis, participation in a realistic experience in design to satisfy human needs, experimentation and analysis commensurate with the student's background in mathematics and science. Problems are authentic. The building of a prototype, at least of critical parts, is the consummation of the design. Nontechnical aspects of engineering such as cost, market, contracts, and ethics are stressed. Engineering materials and methods of production are introduced to assist the student in making decisions concerning material selection and methods of production. Corequisite: EG 109, Phys 122, and Sophomore standing.

ME 299—Digital Computation—1 cr. (0 and 3)
An introduction to digital computer programming for students majoring in mechanical engineering. Emphasis is placed on the computer languages in use at Clemson University, and their application to the solution of simple problems in mechanical engineering. Prerequisite: Sophomore standing.
ME 304—Heat Transfer I—3 cr. (3 and 0)
A comprehensive study of the principles of heat transmission with applications to engineering problems. Special emphasis is given to the following topics: heat conduction in the steady and unsteady states; dimensional analysis of convection; free and forced convection; the combined efforts of conduction, convection and radiation. Prerequisite: Junior standing, ME 311, or ChE 331, and Math 208.

ME 307—Mechanical Engineering Laboratory—1 cr. (0 and 2)
For those curriculums requiring one course in Mechanical Engineering Laboratory. The course is intended to illustrate mechanical engineering theory and to develop experimental technique. Experiments in the first and second laws of thermodynamics are covered. Prerequisite: ME 311.

ME 311—Engineering Thermodynamics I—3 cr. (3 and 0)
A study of thermodynamics as an engineering science. Topics stressed are the first and second laws of thermodynamics, properties of the pure substance, ideal gases, and gaseous mixtures. Prerequisite: Math 208, Phys 222, and Junior standing.

ME H311—Engineering Thermodynamics I—3 cr. (3 and 0)
Honors section of ME 311; admission by invitation.

ME 312—Engineering Thermodynamics II—3 cr. (3 and 0)
Chemical reactions and combustion, chemical equilibrium; analyses of processes and cycles; introduction to statistical thermodynamics, kinetic theory of gases, and irreversible thermodynamics. Prerequisite: ME 311.

ME 313—Instrumentation and Measurements—2 cr. (1 and 2)
Principles of measurements, accuracy of instruments, and data analysis. Modern instruments for measuring and recording static and dynamic pressures, temperatures, fluid flow, speed, power, and torque. Prerequisite: Enrollment in ME 311.

ME 314—Engineering Experimentation—2 cr. (1 and 2)
Theoretical, analytic and statistical aspects of basic engineering experimentation. Error analysis, dimensional analysis, experimental plans, and data analyses. Prerequisite: Math 301 and ME 313.

ME 316—Dynamic System Analysis—4 cr. (3 and 3)
Principles of dynamic system response with emphasis on the determination of mathematical models for mechanical, electrical, electromechanical, fluid and thermal systems. Differential equations are developed from a consideration of physical laws, system arrangement, and constraints. The Lagrangian state function and Lagrange's equation are introduced. Transient and steady-state analyses make use of Laplace transforms and frequency response techniques. Computers are used extensively. Prerequisite: Math 208, Phys 221, EM 202. Corequisite: EE 330, EE 331.

ME 321—Fluid Dynamics—3 cr. (3 and 0)
A study of the theory of fluids in motion. Topics include: review of concepts from thermodynamics as applied to the governing equations of fluids in motion; wave propagation in a fluid; types of fluid flow; one dimensional adiabatic flow with variable area; normal and oblique shocks and expansion fans; attached and detached shocks; shock-boundary layer interaction; one
dimensional flow with friction and heat transfer; introduction to viscous flow theory; introduction to potential flow theory; selected applications. Prerequisite: EM 320, ME 311.

ME 401—Principles of Mechanical Engineering Design—3 cr. (3 and 0)
Stress, strain and strength considerations in engineering design. Theories of failure for yielding, brittle fracture and fatigue fracture are presented. Design considerations for impact, creep, elastic deflection, stress concentration, contact stresses and reliability are studied. Engineering problems are assigned to implement applications of principles of design. Prerequisite: EM 304, ME 316. Corequisite: CrE 310, Senior standing.

ME 402—Mechanical Engineering Analysis and Design—3 cr. (1 and 6)
The student is given the opportunity to apply creatively his general knowledge and his knowledge of engineering in the analysis and design of one or more engineering systems, machines, or devices. Problems may be selected from two sources: A meritorious problem of the student's own choice or a problem assigned by appropriate authority. Corequisite: ME 401, Senior standing.

ME 404—Automatic Control—3 cr. (3 and 0)
Principles and techniques for the analysis and design of feedback control systems. State variable notation and modern control theory are introduced but emphasis is on the classical frequency domain and root locus techniques. Applications to electromechanical, hydraulic, and pneumatic systems. Prerequisite: ME 316, EE 332.

ME 406—Physical Systems Analysis and Design—3 cr. (3 and 0)
A general approach to the analysis and synthesis of physical systems based on state variable representation, Lagrange's equations, matrix solution to state equations, and the calculus of variations. Computer solutions are obtained for application to mechanical, electrical, fluid, and thermal systems. Prerequisite: ME 316.

ME 408—Introduction to Computer-Aided Design—3 cr. (3 and 0)
Introduction to computer aided design, reliability, figures of merit, optimization techniques, search for extremes, and decision theory in design. Computer aided optimum design of engineering systems and the writing and use of problem-oriented languages will be emphasized. Prerequisite: Senior standing.

ME 411—Gas Power—3 cr. (3 and 0)
A study of the effects of variation in specific heat, some fundamentals of compressible flow, the combustion process, and chemical dissociation. The theoretical and actual processes associated with the gas turbine, the thermal jet, the thermal rocket, and the spark ignition and compression ignition reciprocating engines are analyzed. Prerequisite: ME 312 and Senior Engineering.

ME 412—Applied Thermodynamics—3 cr. (3 and 0)
Basic principles of first and second laws of thermodynamics applied to areas such as cryogenics, nonconventional energy conversion process, industrial process heat and electric power systems, etc. Prerequisite: ME 312.

ME 413—Mechanical Engineering Laboratory—1 cr. (0 and 2)
Experimental investigations in a wide variety of mechanical engineering areas, such as fluid dynamics, automatic control, heat and mass transfer, combustion, thermodynamics, and solid mechanics. Prerequisite: ME 313 and 314.
ME 414—MECHANICAL ENGINEERING LABORATORY—1 cr. (0 and 2)
Continuation of ME 413.

ME 415—UNDERGRADUATE RESEARCH—1 to 3 cr.
Individual research projects to be conducted under the direct supervision and
guidance of a faculty member. Prerequisite: Consent of instructor.

ME H415—UNDERGRADUATE RESEARCH—1 to 3 cr.
Honors section of ME 415; admission by invitation.

ME 416—UNDERGRADUATE RESEARCH—1 to 3 cr.
Individual research projects to be conducted under the direct supervision and
guidance of a faculty member. Prerequisite: Consent of instructor.

ME 422—PRINCIPLES OF TURBOMACHINERY—3 cr. (3 and 0)
The guiding principles underlying all forms of turbomachinery. A unified
treatment of turbomachinery to include pumps, fans, compressors and steam,
gas and hydraulic turbines. Dimensional analysis as applied to turbomachinery,
Euler’s Equation, concepts of specific speed and thermodynamics of turbomachinery processes and allied topics are covered. Prerequisite: ME 312, EM 320, and Senior standing.

ME 424—ENGINEERING ANALYSIS—3 cr. (2 and 3)
A senior-level course requiring the student to utilize his knowledge of
mathematics, fluid and solid mechanics, thermodynamics, heat transfer, and
other background work in solving engineering problems. Both analog and
digital computers are utilized as tools contributing to these solutions. Pre-
requisite: ME 299, ME 312, ME 304, EM 320.

ME 429—AIR CONDITIONING—3 cr. (3 and 0)
A study of the principles of heating and air conditioning, including calculation
of heat loss and heat gains for buildings, heating and cooling systems,
psychrometric principles, air distribution, refrigeration and automatic control
apparatus. Prerequisite: ME 304, 312, and Senior standing.

ME 430—AIR CONDITIONING DESIGN—1 cr. (0 and 3)
An application of the theory covered in ME 429 to the design of airconditioning systems. Prerequisite: Enrollment in ME 429.

ME 441—AEROELASTICITY—3 cr. (3 and 0)
Two and three dimensional theory of structural vibration and wing flutter.
Lagrangian equations, energy methods, matrix methods and computer tech-
niques for vibration analysis will be presented. Structural damping, aero-
dynamic forces, and flutter stability will be studied. Vertical bending, torsional
vibration and flutter of fuselages, ailerons and stabilizers will be analyzed.

ME 480—METHODS OF OPERATIONS RESEARCH I—3 cr. (3 and 0)
Applications and elementary theory of selected topics from Operations Research. Topics included are linear algebra, linear programming, transportation and assignment problems, network analysis, and game theory. Prerequisite:
ME 229 or equivalent.

ME 481—METHODS OF OPERATIONS RESEARCH II—3 cr. (3 and 0)
A continuation of ME 480. Topics included are nonlinear programming,
dynamic programming, queuing theory, and markov processes. Prerequisite:
Math 301 or equivalent.
ME 484—ENGINEERING ECONOMIC ANALYSIS—3 cr. (3 and 0)
Basic principles and techniques of economic analysis of engineering projects. Consideration of time value of money, short- and long-term investments, replacement analysis, depreciation methods, cost allocation and measures of cost effectiveness. Prerequisite: Senior standing in Engineering or consent of instructor.

ME 485—INDUSTRIAL APPLICATION OF STATISTICS—3 cr. (3 and 0)
Application of statistical principles of analysis and control to production processes, studies of process capabilities, quality control, work sampling, reliability and analysis, and machine interference. Prerequisite: Math 301.

ME 486—WORK FLOW SYSTEMS AND CONTROL—3 cr. (3 and 0)
Fundamentals underlying the determination of production capacity requirements, economic lot sizes, and the regulating of flow and storage of materials to, within, and from the production system. Elements of forecasting, determination of materials requirements, scheduling, inventory control, etc. Consideration of data processing methods. Prerequisite: Math 301, consent of instructor.

ME 491—SELECTED TOPICS IN MECHANICAL ENGINEERING—3 cr. (3 and 0)
A comprehensive study of any topic in the field of Mechanical Engineering not covered in other courses.

ME 601—PRINCIPLES OF MECHANICAL ENGINEERING DESIGN—3 cr. (3 and 0)
ME 602—MECHANICAL ENGINEERING ANALYSIS AND DESIGN—3 cr. (1 and 6)
ME 604—AUTOMATIC CONTROL—3 cr. (3 and 0)
ME 606—PHYSICAL SYSTEMS ANALYSIS AND DESIGN—3 cr. (3 and 0)
ME 608—COMPUTER-AIDED DESIGN—3 cr. (3 and 0)
ME 611—GAS POWER—3 cr. (3 and 0)
ME 680—METHODS OF OPERATIONS RESEARCH I—3 cr. (3 and 0)
ME 681—METHODS OF OPERATIONS RESEARCH II—3 cr. (3 and 0)
ME 684—ENGINEERING ECONOMIC ANALYSIS—3 cr. (3 and 0)
ME 685—INDUSTRIAL APPLICATION OF STATISTICS—3 cr. (3 and 0)
ME 686—WORK FLOW SYSTEMS AND CONTROL—3 cr. (3 and 0)
ME 808—FLUID MECHANICS—3 cr. (3 and 0)
ME 809—AERODYNAMICS—3 cr. (3 and 0)
ME 810—ADVANCED THERMODYNAMICS—3 cr. (3 and 0)

MEDICAL TECHNOLOGY

Anderson—Lecturers: J. W. Black, R. E. Jones, Jr., N. L. Long

Teaching Supervisor: Kay Little

Greenville—Lecturers: E. C. Cox, E. A. Dreskin, D. G. Kilgore, Jr.,
J. H. McCarter, W. M. Waters

Teaching Supervisor: Patricia Thompson

MED TECH 101—An Introduction to Medical Technology—1 cr.
(1 and 0)

An introduction to the operation and practices in a medical laboratory. This
course is designed to integrate the academic year with the clinical year. In-
cluded will be lectures on current laboratory practices, a visit to a modern
medical laboratory, current training of laboratory personnel and seminars on
areas of specialization.

MED TECH 401—SEROLOGY AND IMMUNOLOGY—4 cr. (21,10,49)*

Presents the basic principles of serology and immunology and the tests
utilizing these principles to detect abnormalities helpful in the diagnosis of
disease.

MED TECH 402—MICROBIOLOGY—7 cr. (59,6,470)

The principles of microbiology-bacteriology, mycology, and parasitology.
Emphasis is placed on human pathogenic organisms, using both fresh and
prepared organisms.

MED TECH 403—HEMATOLOGY—5 cr. (12,32,276)

Information on blood as a tissue, the theory of hematological tests, factors
that affect test reliability. Knowledge of test results and knowledge of blood
dyscrasias. Skill in the performance of hematological tests is emphasized and
the use of automation techniques is covered.

MED TECH 404—BLOOD BANK—3 cr. (8,20,132)

History and principles of blood group systems and methods of cross match-
ing. Testing for, and quantitative determination of, Rh antibodies with all
available techniques. Selection, pre-testing and bleeding of donors and process-
ing of blood for transfusions.

MED TECH 405—CYTOLOGY—1 cr. (2,12,26)

An introduction to cytology and cytologic techniques in the diagnosis of
cancer. Definition and brief history, sources of material, collection and
preservation of specimens, together with practice in interpretation.

MED TECH 406—HISTOLOGY—3 cr. (20,30,190)

Histologic preparation, including actual preparation of tissue specimens
derived from surgical procedures and autopsies. Routine and special staining,
together with experience using the Cryostat.

MED TECH 407—URINALYSIS—2 cr. (10,8,102)

The study of renal function together with principles of urine analysis,
pregnancy tests and anatomy of the urinary system. Emphasis is placed on
laboratory procedures and their utilization to detect abnormalities helpful in
the diagnosis of disease.

* First figure represents lecture hours, second figure represents seminar hours, and the
third figure represents clinical practice hours.
MED TECH 408—CHEMISTRY—10 cr. (40,50,470)
Introduction to the chemistry of carbohydrates, nitrogen, calcium, and phosphorus compounds, acid-base balance, etc., with emphasis on the chemistry of blood and urine using both qualitative and quantitative procedures in the laboratory.

MED TECH 409—RADIOISOTOPES—1 cr. (2,0,7)
Introduction to principles of diagnostic radioisotope procedures and the use of the scintillation detector, the well counter, and the scaler.

METALLURGICAL ENGINEERING

Associate Professors: S. F. Hulbert, Program Coordinator; J. S. Wolf
Assistant Professor: J. E. Lemons

METE 402—METALLURGICAL LITERATURE—1 cr. (0 and 3)
To acquaint students with sources of information on metallurgy and to develop a background for the senior thesis. Prerequisite: Senior standing in Metallurgical Engineering.

METE 408—HEAT TREATING—3 cr. (2 and 3)
The phase changes in both ferrous and non-ferrous metals caused by changes in environment at significant times in the processing. Studies relating the time-temperature changes in metals with their physical properties. Prerequisite: MetE 302 or MetE 304.

METE 425—SENIOR THESIS—2 cr. (0 and 6)
The independent investigation of a project in Metallurgical Engineering. A competent bachelor thesis is required. Prerequisite: Senior standing in Metallurgical Engineering.

METE 480—POWDER METALLURGY—3 cr. (2 and 3)
The production of metal powders and of articles from these powders. By powder metal techniques it is possible to produce controlled porosity, unconventional alloys and to produce complex parts of limited size rapidly, accurately, and economically. Combinations of metals and non-metals may be produced. Prerequisite: MetE 302 or MetE 304.

METE 440—METALLURGY OF REACTOR MATERIALS—3 cr. (2 and 3)
The metallurgy of materials used in reactor construction. The physical metallurgy of metallic fuels, controls, reflectors, and shielding. The effects of radiation on structural metals will be considered. Prerequisite: Senior standing and the consent of the instructor.

METE 450—METALLIC CORROSION—3 cr. (2 and 3)
The corrosion of metallic materials and means of preventing such corrosion. Environmental factors in corrosion are considered. Prerequisite: MetE 302 or MetE 304.

METE 455—ELECTROMETALLURGY—3 cr. (2 and 3)
The electrowinning and electrefining of metals. Electrothermic cells will be studied. The principles and operation of electric furnaces will be considered. Electroplating, electroetching and electromachining will be studied. Prerequisite: MetE 302 or MetE 304 and EE 308.

METE 608—HEAT TREATING—3 cr. (2 and 3)

METE 650—METALLIC CORROSION—3 cr. (2 and 3)
MICROBIOLOGY
(See also Biology)

Professor: R. K. Guthrie
Associate Professors: J. H. Bond, M. J. B. Paynter, Chairman
Assistant Professors: Ann W. Baxter, M. G. Johnson

Micro 305—General Microbiology—4 cr. (3 and 0) F, S, SS
Morphology, physiology, classification, distribution, and cultivation of microorganisms and health. Prerequisite: Bot 102 or Zool 102 and 104; Ch 101; Ch 102.

Micro 401—Advanced Bacteriology—4 cr. (2 and 6) F
Metabolism, nutrition, growth, and death of bacteria; microbiological assays and industrial fermentation; emphasis on laboratory procedures for the identification of the more common taxonomic groups. Prerequisite: Micro 305; Ch 220 or 223 and 227.

Micro H401—Advanced Bacteriology—4 cr. (2 and 6) F
Honors option for Micro 401, admission by special arrangement.

Micro 402—Dairy Microbiology—3 cr. (2 and 3)
S, '70 and alternate years.
Morphology, physiology, and culturing of microorganisms of importance in dairy products; standard methods for the determination of numbers of bacteria, yeasts, and molds in various dairy products. Prerequisite: Micro 305.

Micro H402—Dairy Microbiology—3 cr. (2 and 3)
S, '70 and alternate years.
Honors option for Micro 402, admission by special arrangement.

Micro 404—Food Microbiology—3 cr. (2 and 3)
S, '71 and alternate years.
The microbiology of natural and processed foods. The nature of microorganisms involved in food processing, food spoilage, and food poisoning. Methods of isolating, enumerating and identifying these organisms are conducted in the laboratory. Prerequisite: Micro 305.

Micro H404—Food Microbiology—3 cr. (2 and 3)
S, '71 and alternate years.
Honors option for Micro 404, admission by special arrangement.

Micro 410—Soil Microbiology—3 cr. (2 and 3)
S, '70 and alternate years.
The role of microorganisms in the decomposition of organic substances; transformation of nitrogen and mineral substances in the soil; interrelationships between higher plants and microorganisms; importance of microorganisms in soil fertility. Prerequisite: Micro 305.

Micro H410—Soil Microbiology—3 cr. (2 and 3)
S, '70 and alternate years.
Honors option for Micro 410, admission by special arrangement.

Micro 411—Pathogenic Bacteriology—3 cr. (2 and 3) S
A study of pathogenic bacteria, their morphology, cultural requirements and classification; diagnostic tests, methods of differentiation, and the diseases caused. Prerequisite: Micro 305.
Micro H411—Pathogenic Bacteriology—3 cr. (2 and 3) S
Honors option for Micro 411, admission by special arrangement.

Micro 412—Bacterial Physiology—4 cr. (3 and 3) S
A consideration of the cytology, physiology, metabolism, and genetics of bacteria. Included will be studies of growth and death, reproduction and mutation, nutrition and metabolic pathways, regulatory mechanisms, and effects of environment. Prerequisite: Micro 305, Organic Chemistry

Micro H412—Bacterial Physiology—4 cr. (3 and 3) S
Honors option for Micro 412, admission by special arrangement.

Micro 413—Industrial Microbiology—3 cr. (2 and 3)
Microbial aspects of large scale processes for the production of foods, antibiotics, enzymes, fine chemicals, and beverages. Topics include strain selection, culture maintenance, biosynthetic pathways, continuous cultivation and production of single cell protein. Prerequisite: Micro 305.

Micro H413—Industrial Microbiology—3 cr. (2 and 3)
Honors option for Micro 413, admission by special arrangement.

Micro 414—Basic Immunology—3 cr. (2 and 3)
A consideration of the nature, production, and function of basic immune responses in animals. Procedures and mechanisms of antigenantibody and other immune reactions. Prerequisite: Micro 305, Organic Chemistry.

Micro H414—Basic Immunology—3 cr. (2 and 3)
Honors option of Micro 414, admission by special arrangement.

Micro 415—Microbial Genetics—4 cr. (3 and 3)
The cytological basis of bacterial genetics; some molecular aspects; mutation and mutagenic agents; population changes; mechanisms of genetic transfers; bacterial viruses as genetic systems; episomes and plasmids. The genetics of certain fungi and of animal and plant viruses will also be considered. Prerequisite: Micro 305, Gen 302, Ch 224.

Micro H415—Microbial Genetics—4 cr. (3 and 3)
Honors option for Micro 415, admission by special arrangement.

Micro 416—Introductory Virology—3 cr. (3 and 0)
a general introduction to the field of virology, including animal, bacterial, and plant viruses. Topics will include nomenclature and classification, biochemical and biophysical characteristics, mechanisms of replication, chemotherapy, and techniques for isolation, assay and purification. Prerequisite: Micro 305.

Micro H416—Introductory Virology—3 cr. (3 and 0)
Honors option for Micro 416, admission by special arrangement.

Micro 601—Advanced Bacteriology—4 cr. (2 and 6)

Micro 602—Dairy Microbiology—3 cr. (2 and 3)

Micro 604—Food Microbiology—3 cr. (2 and 3)

Micro 605—General Microbiology—4 cr. (3 and 3)

Micro 610—Soil Microbiology—3 cr. (2 and 3)

Micro 611—Pathogenic Bacteriology—3 cr. (2 and 3)
Micro 612—Bacterial Physiology—4 cr. (3 and 3)
Micro 613—Industrial Microbiology—3 cr. (2 and 3)
Micro 614—Basic Immunology—3 cr. (2 and 3)
Micro 615—Microbial Genetics—4 cr. (3 and 3)
Micro 616—Introductory Virology—3 cr. (3 and 0)
Micro 801—Bacterial Taxonomy—3 cr. (2 and 3)
Micro 802—Bacteriological Technic—4 cr. (2 and 6)
Micro 803—Special Problems in Microbiology—Credit to be arranged.
Micro 807—Seminar—1 cr. (1 and 0)
Micro 810—Soil Microbiology—3 cr. (2 and 3)
Micro 811—Bacterial Cytology and Physiology—4 cr. (4 and 0)
Micro 812—Bacterial Metabolism—3 cr. (3 and 0)
Micro 813—Bacterial Cytology and Physiology Laboratory—2 cr. (0 and 6)
Micro 814—Bacterial Metabolism Laboratory—2 cr. (0 and 6)
Micro 815—Advanced Microbial Genetics—3 cr. (3 and 0)
Micro 891—Research—Credit to be arranged.

MILITARY SCIENCE

Professor: Colonel George K. Maertens

MS 101—Fundamentals (Basic)—1 cr. (2 and 1)
A study of the evolution, organization, and mission of the Reserve Officers’ Training Corps, individual weapons and marksmanship and the evolution of weapons and warfare. An introduction to First Aid, mass casualty treatment and discussion seminar on current events. Laboratory periods provide training in basic drill, discipline, and leadership.

MS 102—The National Defense (Basic)—1 cr. (2 and 1)
A study of the organization of the Department of Defense and its role in national security. An introduction to the history, organization, equipment and mission of the United States Army, with detailed study of small units. A look at the principles and types of war and leadership traits. Current events seminar. Leadership laboratory.

MS 201—American Military History (Basic)—1 cr. (2 and 1)
A survey of American military history from the origins of the American Army to the present, with emphasis on the factors which led to the organizational, tactical, logistical, operational, strategic, social and similar patterns found in our present-day Army.
MS 202—Introduction to Operations and Basic Tactics and Map and Aerial Photograph Reading (Basic)—1 cr. (2 and 1)

An introduction to the organization, composition, and mission of infantry rifle squad and small infantry-tank teams. Interpretation and use of maps and aerial photographs in study and evaluation of terrain.

MS 300—Military Science (Advanced)—6 cr. (ROTC 3, Elective 3)

Study and practical application of Leadership; Military Teaching Principles; Branches of the Army; Small Unit Tactics and Communications. Further training for duty as officers by application of principles of leadership in actual command during drills, parades, reviews, inspections and ceremonies. One three-hour elective or required normal academic curriculum subject, presented by appropriate department, approved by the PMS to be of value in furthering the the professional qualifications of the student as a prospective commissioned officer in the United States Army. Students have the option of taking the elective course or Advanced ROTC during either semester but must participate in Leadership Laboratory Training throughout the school year.

Three class hours and two laboratory hours (presented by Military Science Department) each week in one semester and three class hours (elective presented by appropriate department) and two laboratory hours (presented by Military Science Department) each week in the other semester.

MS 400—Military Science (Advanced)—6 cr. (ROTC 3, Elective 3)

A study of Military Operations; Logistics; Administrative Management; Military Law; Service Orientation; World Change and Military Implications; Internal Defense/Development; and Leadership Laboratory. One three-hour elective or required normal academic curriculum subject, presented by appropriate department, approved by the PMS to be of value in furthering the professional qualifications of the student as a prospective commissioned officer in the United States Army. Students have the option of taking the elective or Advanced ROTC during either semester but must participate in Leadership Laboratory Training throughout the school year.

Three class hours and two laboratory hours (presented by Military Science Department) each week in one semester and three class hours (elective presented by appropriate department) and two laboratory hours (presented by Military Science Department) each week in the other semester.

Music

Associate Professor: J. H. Butler, Head
Assistant Professors: B. F. Cook, E. A. Freeman
Instructors: G. A. Benson, Edith B. Card, J. E. Jackson, E. W. Winston

Mus 151—Applied Music—1 cr. (1 and 0)

Individual study in performance medium (voice, piano, flute, oboe, clarinet, saxophone, bassoon, cornet, trumpet, French Horn, trombone, baritone, tuba, percussion). One hour-long private lesson each week, for which a minimum of four hours' practice is required. The student is guided in a continuing advance of his technical and artistic proficiency, and is required to perform an appropriate solo in a student recital each semester. May be repeated for credit with departmental approval to allow for the study of differing per-

* On leave.
formance media. **Prerequisite:** Consent of instructor, based on a qualifying audition.

**Mus 152—Applied Music—1 cr. (1 and 0)**

A continuation of Mus 151. **Prerequisite:** Mus 151.

**Mus 205—Music Theory—3 cr. (3 and 0)**

The terminology and notation of traditional music are reviewed, and the techniques of sight-singing and sight-reading are practiced. Harmonic practices are studied, relating to the principal diatonic triads in all inversions. **Prerequisite:** Consent of instructor, based on musical literacy.

**Mus 206—Music Theory—3 cr. (3 and 0)**

Continuation of Music 205 with emphasis on secondary chord structure, modulation, and non-diatonic harmony. Advanced sight-singing and melodic dictation are practiced. **Prerequisite:** Music 205.

**Mus 210—Music Appreciation: Music in the Western World—3 cr. (3 and 0)**

Designed to deepen the student's appreciation of his musical heritage through a study of the elements of the musical language and its development in western culture.

**Mus 315—Music History—3 cr. (3 and 0)**

The development of Western music from antiquity to 1750, emphasizing representative literature from various styles and periods.

**Mus 316—Music History—3 cr. (3 and 0)**

Continuation of Mus 315. Music from 1750 to present. **Prerequisite:** Mus 315.

**Mus 361—Marching Band—1 cr. (0 and 3)**

**Ensembles:** Devoted to the musical training of ensemble members through reading and rehearsal of appropriate music; public performances given periodically in addition to the minimum rehearsal time; may be repeated for credit, with a maximum of four hours of ensemble credit allowable toward a degree. Fall semester only. **Prerequisite:** Consent of director.

**Mus 362—Concert Band—1 cr. (0 and 3)**

**Ensembles:** Devoted to the musical training of ensemble members through reading and rehearsal of appropriate music; public performances given periodically in addition to the minimum rehearsal time; may be repeated for credit, with a maximum of four hours of ensemble credit allowable toward a degree. Spring semester only. **Prerequisite:** Consent of director.

**Mus 365—University Chorus—1 cr. (0 and 3)**

**Ensembles:** Devoted to the musical training of ensemble members through reading and rehearsal of appropriate music; public performances given periodically in addition to the minimum rehearsal time; may be repeated for credit, with a maximum of four hours of ensemble credit allowable toward a degree. **Prerequisite:** Consent of director.

**Mus 400—Music in the Elementary School Classroom—3 cr. (3 and 0)**

Designed to give the teacher in the elementary school a familiarity with music suitable for use with children at the elementary level. Recordings of
appropriate music, pre-band instruments, unison and part singing will be included. No previous training in music is required.

Mus 401—Methods and Materials in Elementary School Music—3 cr. (3 and 0)
Materials, methods, and techniques in elementary school. Prerequisite: Mus 400.

Mus 411—American Music: Music Appreciation—3 cr. (3 and 0)
Music in America from 1620 to the present. Indigenous and borrowed influences will be examined.

Nursing

Associate Professor: Leon Roswal, Director
Assistant Professor: Aileen S. Prevost
Instructors: Edith G. Gunter, Esther B. Privette, Sara Stokes, Harriett E. Whitley

Nurs 100—Orientation—1 cr. (1 and 0)
Series of lectures and discussions on nursing and careers in nursing; personal and professional guidance.

Nurs 101—Fundamentals of Nursing I—6 cr. (3 and 9)
This introductory course is oriented to the normal health needs of all people, sick and well. Study of the concepts and scientific principles of the biosocio-psychological sciences that are applicable in the nursing practices common to all patients. College and hospital laboratory learning experiences provide an opportunity to adapt these principles and develop beginning skill in selected technical and interpersonal aspects of nursing.

Nurs 102—Fundamentals of Nursing II—6 cr. (3 and 9)
In this course, sequential to Nurs 101, the skills, knowledge and principles are further developed. A patient-centered orientation to basic-nursing practices is continued in assisting the individual to attain and/or maintain homeostasis. Dietary, pharmacological, fluid and electrolyte balance and mental concepts are integrated and correlated. Prerequisite: Nurs 101 with grade of C or better.

Nurs 104—Medical-Surgical Nursing I—5 cr. (3 and 6)
A continuation of Nurs 102. It is concerned with nursing care of adult patients with long term illnesses and focuses on disruption of family living. Prerequisite: Second semester courses in Nursing with C standing.

Nurs 105—Integrated Science I—4 cr. (3 and 3)
A general course surveying chemistry, human anatomy, physiology, and microbiology, and emphasizing the physical and chemical bases for physiology.

Nurs 106—Integrated Science II—4 cr. (3 and 3)
Continuation of Nurs 105.

Nurs 201—Psychodynamic Nursing—5 cr. (3 and 6)
Designed to develop basic understandings and skills in the nursing care of patients with behavioral and anxiety problems. Lectures, discussions, field trips and clinical experiences are used concurrently. Prerequisite: Nurs 202 and Nurs 206 with C standing.
Nurs 202—Pediatrics—5 cr. (3 and 6)
This course presents the nursing care of children from infancy to adolescence. It considers disease processes that cause deviations from normal through all stages of growth and development. Prerequisite: Nurs 104 with C standing.

Nurs 204—Maternal and Newborn Care—5 cr. (3 and 6)
This course deals with prenatal, labor, delivery, postpartum care of the mother, and needs of the newborn infant. Prerequisite: Nurs 202 and Nurs 206 with C standing.

Nurs 206—Medical-Surgical Nursing II—6 cr. (3 and 9)
This is a continuation of Nurs 104. Emphasis is placed on the planning and executing care plans for groups of patients in conjunction with various co-workers present in hospital settings today. The student is introduced to her responsibilities as a graduate nurse. Prerequisite: Nurs 104 with C standing.

**NURSING**
(Baccalaureate Degree Program)

Professor: Geraldine Labecki, Director
Associate Professors: Elizabeth J. Hall, Rose A. Godbout
Assistant Professors: Melba Cather, Regina Thompson
Instructors: Opal S. Hipps, Susan Rockwell
Lecturers: Marilyn B. Chassie, D. K. Freeman, Juanita F. Woods

Nurs 207—Dynamics of Human Relations—3 cr. (2 and 3)
The nursing appraisal of theoretical and clinical approaches to the understanding of the dynamics of human behavior. The identification of behaviors through observing and participating in laboratory experiences in community agencies providing service to adults and children. Incorporates the beginning of a longitudinal study of a selected family.

Nurs 208—Problem Solving in Nursing—3 cr. (2 and 3)
Introduction to the concept of problem solving in nursing throughout health-illness cycle. Selected models are presented and analyzed. Relevant technical skills identified in the analysis are learned. Emphasis on creative approach to solving nursing problems and the utility of the technic to the solution. Laboratory experience in the classroom and with hospitalized patients.

Nurs 309—Human Values in Nursing—3 cr. (3 and 0)
The values guiding nursing theory and practice, including common human needs; the nature of man and his community.

Nurs 310—Perspectives in Nursing Intervention—3 cr. (3 and 0)
Analysis of processes used in making nursing judgments. Emphasis on planning, intervention and evaluation.

Nurs 311—Nursing During Alterations in Life Patterns—4 cr. (1 and 9)
Study of the ways in which people perceive and cope with changes in their life patterns; emphasis on the synthesis of knowledge from the arts and sciences as a basis for deliberative nursing action. Laboratory experience in a variety of settings with all age groups.
Nursing 312—Nursing of the Acutely and Chronically Distressed—4 cr. (1 and 9)
Nursing concepts based on a broad patho-psychophysiologic approach toward understanding changes in functions as a result of stress and/or disease. Laboratory experience in agencies providing care for the mentally and physically distressed.

Nursing 313—The Promotion of Health—3 cr. (2 and 3)
Role of the nurse in the teaching of health in the home and in agencies concerned with the prevention of illness. Emphasis on nutrition as a positive approach to the improvement of health throughout the life cycle. Laboratory experience in clinics, homes, and selected community programs.

Nursing 314—Nursing in the Home—3 cr. (2 and 3)
The dimensions of caring for the ill in the home; includes early detection, treatment, and the use of resources with emphasis on continuity of care. Laboratory experience with agencies providing home care.

Nursing 415—Nursing as a Social Force—3 cr. (3 and 0)
Role of professional nursing in comprehensive health planning related to changing social forces.

Nursing 417—Intensive Nursing—4 cr. (1 and 9)
Nursing in highly stressful situations. Assisting individuals and families in coping with life-threatening experiences. Laboratory experience in the home and acute care facilities.

Nursing 419—The Multiproblem Family—3 cr. (2 and 3)
Focus on the family as a unit of care. Use of the epidemiologic approach as a tool in understanding conditions influencing the family. Laboratory experience through community care facilities.

Nursing 421—History and Philosophy of Nursing—3 cr. (3 and 0)
Analysis of the development of modern nursing. Emphasis will be placed on how the nursing profession articulates with society and the role of nurses as change agents. Consideration will be given to the legal and ethical implications in nursing practice.

Nursing 422—Current Research in Nursing—3 cr. (3 and 0)
A study of approaches to problematic situations in nursing, with emphasis on interpretation of findings.

Nursing 425—Independent Study in Nursing—7 cr. (3 and 12)
Opportunity for in-depth study in an area of special interest in clinical nursing. Laboratory experience arranged.
**NUTRITION**

Assistant Professors: L. Crook, J. J. Jen

(See courses listed under Animal Science, Biochemistry, Dairy Science, Food Science, and Poultry Science)

**Nutr 103—PRINCIPLES OF NUTRITION—4 cr. (3 and 3)**
Nutrition is discussed in relation to the requirement and role of nutrients in mammalian metabolism—nutrition and disease are emphasized. Laboratory exercises demonstrate nutrient assay methods and the importance of selected nutrients in mammalian diets.

**Nutr 401—FUNDAMENTALS OF NUTRITION—3 cr. (3 and 0) F**
Biochemical and physiological fundamentals of nutrition applicable to domestic animals and man. Considered are digestive processes, and absorption and metabolism of carbohydrates, lipids, proteins, water, minerals and vitamins. Energy metabolism and comparative anatomy and physiology of digestive systems are discussed.

**Nutr 601—FUNDAMENTALS OF NUTRITION—3 cr. (3 and 0)**

**Nutr 801—TOPICAL PROBLEMS IN NUTRITION—1-3 cr.**

**Nutr 808—MONOGASTRIC NUTRITION—3 cr. (3 and 0)**

**Nutr 809—POLYGAUSTRIC NUTRITION—3 cr. (3 and 0)**

**Nutr 812—METABOLISM OF NUTRIENTS—3 cr. (3 and 0)**

**Nutr 813—NUTRITION TECHNIQUES WITH LARGE ANIMALS—2 cr. (1 and 3)**

**Nutr 814—NUTRITION TECHNIQUES WITH LABORATORY ANIMALS—2 cr. (1 and 3)**

**Nutr 816—AMINO ACIDS AND PROTEIN NUTRITION—2 cr. (2 and 0)**

**Nutr 818—VITAMINS AND MINERALS—4 cr. (3 and 3)**

**Nutr 851—NUTRITION SEMINAR I—1 cr. (1 and 0)**

**Nutr 852—NUTRITION SEMINAR II—1 cr. (1 and 0)**

**Nutr 891—RESEARCH—Credit to be arranged.**

**Nutr 991—DOCTORAL RESEARCH—Credit to be arranged.**

**PHILOSOPHY**

Assistant Professors: J. L. McColloough, D. F. White, Jr.

Instructor: W. M. Phair, Jr.

**Phil 201—INTRODUCTION TO PHILOSOPHY—3 cr. (3 and 0)**

An introduction to the basic issues involved in philosophical thinking, with special emphasis upon these issues as they occur in Greek philosophy. The systems of Plato and Aristotle will be considered in some detail.

**Phil 211—PHILOSOPHY AND CURRENT ISSUES—3 cr. (3 and 0)**

An exercise in developing the beginner’s philosophic skills and his ability to think critically and reflectively about the problems he encounters. Selections
from contemporary writing will be compared with philosophic classics in order to analyze familiar moral and social problems of current importance as well as the intellectual issues underlying many prevailing conflicts of opinion.

**PHIL 302—LOGIC—3 cr. (3 and 0)**
Introduction to the theory and practice of evaluating arguments; reduction of ordinary language to logical form and the relation of statement and inference; use of the rules of natural deduction and proof of their consistency and completeness for the logic of propositions (truth-functions) and the logic of predicates (quantification).

**PHIL 303—PHILOSOPHY OF RELIGION—3 cr. (3 and 0)**
An analytical and critical consideration of the philosophical foundations of religion. Such topics as the existence of God, the problem of evil, theism and atheism, prayer, and immortality will be considered.

**PHIL 304—INTRODUCTION TO ETHICAL THEORY—3 cr. (3 and 0)**
An examination of moral judgment; its concepts, criteria and relations to factual judgment. Classical theories and current issues are searched for an ideal of the good man and the life we prize. Construction of a model theory of obligation, value, justice, and punishment is attempted.

**PHIL 305—AESTHETICS—3 cr. (3 and 0)**
A study of the function of art in human life along with a consideration of the various philosophical elements involved in art and art criticism. Various historical types of aesthetic theory will be considered. **Prerequisite:** Junior standing or permission of the instructor.

**PHIL 309—RELIGIONS OF THE FAR EAST—3 cr. (3 and 0)**
A study of the origin, evolution, and contemporary status of Hinduism, Buddhism, Confucianism, and Taoism. **Prerequisite:** Junior standing.

**PHIL 312—MODERN PHILOSOPHY—3 cr. (3 and 0)**
The development of the modern mind as seen in the Renaissance and Eighteenth Century philosophers. The writings of Hobbes, Locke, Spinoza, Leibniz, Hume, and Kant will be considered along with the development of Rationalism and Empiricism.

**PHIL 318—CONTEMPORARY PHILOSOPHY—3 cr. (3 and 0)**
A study of some of the recent schools and movements in philosophy. Pragmatism, Existentialism, Vitalism, Recent Realism, and some of the linguistic schools will be considered.

**PHIL 322—SYMBOLIC LOGIC—3 cr. (3 and 0)**
A consideration of the necessary logical structure of a very exact language in terms of modern relational logic. Quantification, Truth Functions, Propositional Functions, Properties of Relations, Arguments Involving Relations, and some non-formal logical systems will be considered. **Prerequisite:** Phil 302 or Math 108 or a computer programming course.

**PHIL 344—CURRENT ETHICAL THEORY—3 cr. (3 and 0)**
An examination of present trends in ethical and meta-ethical theory for their bearing upon the criteria of our judgments of human conduct and character and upon current moral issues. Selected topics from the logic, epistemology, and psychology of ethical judgment will be considered, with review of relevant journal literature. **Prerequisite:** Phil 304 or permission of the instructor.
PHIL 422—MATHMATICAL LOGIC—3 cr. (3 and 0)
A detailed and rigorous study of a logical system as a foundation for mathematics. An analysis of basic concepts occurring in the foundations of mathematics. Prerequisite: Phil 322 or sufficient mathematical background.

PHIL 425—PHILOSOPHY OF SCIENCE—3 cr. (3 and 0)
A study of the presuppositions, categories, and implications of the physical and social sciences with special reference to the concepts of Space and Time, Matter, Causation, and Relativity. The logic of “scientific method” and the unity of the sciences are considered. Prerequisite: Junior standing and permission of the instructor.

PHIL 825—SEMIMAR IN PHILOSOPHY OF SCIENCE—3 cr. (3 and 0)

PHYSICAL SCIENCE
(Jointly administered by the Chemistry and Physics Departments)

PHY Sc 101—PHYSICAL SCIENCE I—4 cr. (3 and 2)
An introduction to the physical sciences. Selected topics will be discussed to illustrate the structure and meaning of the physical sciences. Course cannot be taken for credit by students who have completed one year of a course in the physical science area.

PHY Sc 102—PHYSICAL SCIENCE II—4 cr. (3 and 2)
A continuation of Phy Sc 101. Course cannot be taken for credit by students who have completed one year of a course in the physical science area.

PHYSICS

Professors: L. D. Huff, M. J. Skove, E. P. Stillwell, H. E. Vogel, Head
Assistant Professors: T. F. Collins, J. A. Gilreath, J. R. Manson, J. R. Ray, P. A. Steiner, R. C. Turner, C. W. Ulbrich

Phys 101—CURRENT TOPICS IN MODERN PHYSICS—1 cr. (0 and 2)
Demonstrations and lectures supplemented by slides and motion pictures on current topics in physics, such as superfluids, lasers, superconductors, elementary particles, etc., chosen from the fields of atomic, nuclear, solid state physics, and astrophysics. Several members of the staff will participate.

Phys 122—MECHANICS AND WAVE PHENOMENA—3 cr. (3 and 0)
Vectors; laws of motion; rotation; vibratory and wave motion; mechanical properties of materials. Prerequisite: Registration in Math 108.

Phys H122—MECHANICS AND WAVE PHENOMENA—3 cr. (3 and 0)
Honors section of Phys 122. Open by invitation only.

Phys 132—GENERAL PHYSICS FOR PHYSICS MAJORS I—3 cr. (3 and 0)
Introduction to physical quantities, linear and rotational motion, conservation laws, gravitational and electric fields, and kinetic theory. Prerequisite: Registration in Math 108.
Phys 205—Descriptive Astronomy—3 cr. (3 and 0)
An elementary survey of the astronomical universe primarily for students not majoring in physical science, mathematics or engineering.

Phys 207—General Physics—4 cr. (3 and 2)
An introductory course for students who are not majoring in a pure science or engineering. Includes mechanics, light, and astronomy. Corequisite: A course that includes trigonometry.

Phys 208—General Physics—4 cr. (3 and 2)
Continuation of Phys 207. Includes electricity, magnetism, thermal phenomena, and quantum theory. Prerequisite: Phys 207.

Phys 221—Thermal and Electrical Phenomena—3 cr. (3 and 0)
Thermal properties of matter; electric and magnetic fields; electric currents and circuits; motions of charged particles in fields. Prerequisite: Phys 122.

Phys H221—Thermal and Electrical Phenomena—3 cr. (3 and 0)
Honors section in Phys 221. Open by invitation only.

Phys 222—Optics and Modern Physics—3 cr. (3 and 0)
Theory of light waves and photons; optical instruments; relativity; atomic particles; nuclear physics. Prerequisite: Phys 221.

Phys H222—Optics and Modern Physics—3 cr. (3 and 0)
Honors section in Phys 222. Open by invitation only.

Phys 223—Electron Physics Laboratory—1 cr. (0 and 3)
An introduction to physical experimentation employing the Berkeley A laboratory course. Experiments are performed in acceleration and deflection of electrons, measurement of electron charge to mass ratio by helical motion and time of flight, oscillating systems involving capacitance, resistance and inductance, resonance, modulation, negative resistance and relaxation oscillations. Prerequisite: Registration in Phys 221 or 231.

Phys 224—Modern Physics Laboratory—1 cr. (0 and 3)
Continuation of Phys 223. Experiments in the areas of solid state, optical and modern physics. Experiments are performed on electrical carrier mobility in solids, minority carrier lifetime, transistor action, microwave optics, interference and diffraction, light polarizer, gas laser optics, optical spectra, electron and X-ray diffraction, radioactive particle counting, Compton scattering of X-rays, radioactivity decay and Mossbauer effect. Prerequisite: Registration in Phys 222 or 232.

Phys 231—General Physics for Physics Majors II—3 cr. (3 and 0)
A continuation of Phys 132. An introduction to the magnetic field, electric circuits, wave motion, reflection, refraction, diffraction of waves, electromagnetic waves. Prerequisite: Phys 132, registration in Phys 223.

Phys 232—General Physics for Physics Majors III—3 cr. (3 and 0)
A continuation of Phys 231. An introduction to thermodynamics, relativity, particle and wave descriptions of matter and light. Includes a description of experiments which were crucial to recent developments in physics. Prerequisite: Phys 231, registration in Phys 224.
Phys 240—Physics of the Atmospheric Environment—3 cr. (3 and 0)
An introduction to meteorological processes with emphasis placed on qualitative descriptions. Includes thermodynamics of the atmosphere, solar radiation and the heat budget, circulation of the atmosphere, force laws governing air mass motions, fronts, condensation processes, synoptic prediction. Special topics would consider the effects of environmental pollution on weather and the effects of weather on health.

Phys 301—General Astronomy—3 cr. (3 and 0)
A study of the universe, particularly of the solar system. Prerequisite: One year of college physics.

Phys 302—General Astronomy—3 cr. (3 and 0)
A study of the sidereal universe of stars, galaxies, etc. Prerequisite: Phys 301.

Phys 305—Physics for High School Teachers I—4 cr. (3 and 3)
Introduction to the fundamental physical notions of time, space, and matter. Motion, optics, and waves discussed. Laboratory experiments form an integral part of the course.

Phys 306—Physics for High School Teachers II—4 cr. (3 and 3)
Continuation of Physics 305—Newton's laws of motion, universal gravitation, laws of conservation of momentum and of energy. Electricity and magnetism. Prerequisite: Phys 305 or permission of instructor.

Phys 321—Mechanics I—3 cr. (3 and 0)
Statics; motions of particles and rigid bodies; vibratory motion; gravitation; properties of matter, flow of fluids. Prerequisite: Phys 221 or 231.

Phys 322—Mechanics II—3 cr. (3 and 0)
Dynamics of particles and of rigid bodies, Lagrangian and Hamiltonian formulations, vibrations of strings, wave propagation. Prerequisite: Phys 321 or permission of instructor.

Phys 325—Experimental Physics I—4 cr. (2 and 6)
Introduction to laboratory techniques, measurement of fundamental constants, and performance of some of the experiments (Stern-Gerlach, Zeeman, Photoelectric, specific charge of electrons and protons, etc.) which are crucial to the development of our present concepts of physics. Prerequisite: Phys 321 or equivalent or enrollment in Phys 321 or by permission of the instructor.

Phys 326—Experimental Physics II—4 cr. (2 and 6)
Continuation of Phys 325.

Phys 340—Electricity and Magnetism I—3 cr. (3 and 0)
Electric potential and electrostatic fields; solutions of Laplace's and Poisson's equations; properties of dielectrics and of capacitors; electrostatic energy; current and treatment of circuit problems. Vector analysis is used throughout after introduction. Prerequisite: Phys 221 or 231.

Phys 401—Senior Thesis—3 cr. (1 and 6)
The senior thesis is a semi-original piece of work performed under the direction of a member of the physics staff. Theoretical fields available include
relativity, statistical mechanics, nuclear physics and astrophysics. Experimental work may be done in the fields of X-ray diffraction elasticity, low-temperature thermal conductivity, super-conductivity, radiation damage in metals, and electron paramagnetic resonance. **Prerequisite:** At least three physics courses beyond General Physics.

**Phys 402—Senior Thesis II—3 cr. (1 and 6)**
A continuation of Phys 401.

**Phys 404—Astrodynamics—3 cr. (3 and 0)**
Astronomical coordinate systems, orbit determinations, multiple body problems, perturbations, non-gravitational and relativistic effects and observational theory. Special attention to problems of artificial satellites. **Prerequisite:** Phys 321.

**Phys 432—Physical Optics and Introduction to Spectroscopy—3 cr. (3 and 0)**
Theory and application of interference and diffraction phenomena, polarized light, magneto-optics and electro-optics. Introductory theory of spectroscopy. **Prerequisite:** Phys 222 or 232.

**Phys 441—Electricity and Magnetism II—3 cr. (3 and 0)**
A continuation of Phys 341. Magnetic fields and energy; magnetic properties of materials; electromagnetic induction; A.C. circuit problems with vector methods and complex numbers; Maxwell’s field equations with applications. **Prerequisite:** Phys 341 or equivalent.

**Phys 446—Solid State Physics—3 cr. (3 and 0)**
An introductory treatment of the crystal structure of solids and the properties of solids which depend on crystal structure; free electron model of metals; band theory of solids; Brillouin zones, crystalline defects and diffusion. **Prerequisite:** Phys 222 or 232 or permission of instructor.

**Phys 452—Introductory Nuclear Physics—3 cr. (3 and 0)**
Various phases of nuclear physics including natural and induced radioactivity; properties of alpha, beta and gamma-rays; cosmic rays; nuclear energy levels and decay schemes; particle accelerators, fission, fusion and nuclear reactors. **Prerequisite:** Phys 222 or 232.

**Phys 454—Nuclear Physics Laboratory—1 cr. (0 and 3)**
Techniques and instruments used in detection and measurement of nuclear radiation. Experiments include half-life determination, absorption measurements, neutron activation, coincidence measurements, decay schemes, and gamma-ray spectroscopy. **Prerequisite:** Registration in Phys 452.

**Phys 455—Quantum Physics I—3 cr. (3 and 0)**
Discussion of solution of the Schroedinger equation for free particles, the hydrogen atom and the harmonic oscillator. **Prerequisite:** Phys 322 and 341 or permission of instructor.
Phys 456—Quantum Physics II—3 cr. (3 and 0)
Continuation of Physics 455. Application of principles of quantum mechanics as developed in Physics 455 to atomic, molecular, solid state and nuclear systems. Prerequisite: Phys 455.

Phys 460—Modern Physics for High School Teachers—3 cr. (3 and 0)
A study of later developments including the measurements of atomic particles. The formulation of new laws and the modifications of old ideas needed to describe the interactions of these particles.

Phys 465—Thermodynamics and Statistical Mechanics—3 cr. (3 and 0)
A study of temperature, development of the laws of thermodynamics and their application to thermodynamic systems. An introduction to low temperature physics is given. Prerequisite: Six hours of physics beyond Phys 222 or permission.

Phys 471—Electron Microscopy—3 cr. (2 and 3)
The theory and operation of the electron microscope. Magnetic lens theory. The technique of specimen mounting and the interpretation of electron micrographs and diffraction patterns. Each student may choose specimens from his major field. Prerequisite: General Physics, Math 206 and permission of instructor.

Phys 473—X-ray Crystallography—3 cr. (2 and 3)
A study of crystal symmetry, elementary space group theory, diffraction of X-rays by electronic charge distribution. Experimental methods of optical goniometry, powder diffraction and single crystal techniques are used to obtain diffraction intensities from a simple crystalline solid and electron charge distribution is determined. Applications of X-ray diffraction to chemical, physical and metallurgical investigations are discussed.

Phys 604—Astrodynamics—3 cr. (3 and 0)

Phys 605—Physics for High School Teachers I—4 cr. (3 and 3)

Phys 606—Physics for High School Teachers II—4 cr. (3 and 3)

Phys 621—Mechanics I—3 cr. (3 and 0)

Phys 622—Mechanics II—3 cr. (3 and 0)

Phys 625—Experimental Physics I—4 cr. (2 and 6)

Phys 626—Experimental Physics II—4 cr. (2 and 6)

Phys 632—Physical Optics and Introduction to Spectroscopy—3 cr. (3 and 0)

Phys 640—Electricity and Magnetism I—3 cr. (3 and 0)

Phys 641—Electricity and Magnetism II—3 cr. (3 and 0)

Phys 646—Solid State Physics—3 cr. (3 and 0)

Phys 652—Introductory Nuclear Physics—3 cr. (3 and 0)

Phys 655—Quantum Physics I—3 cr. (3 and 0)

Phys 656—Quantum Physics II—3 cr. (3 and 0)

Phys 660—Modern Physics for High School Teachers—3 cr. (3 and 0)
Phys 665—Thermodynamics and Statistical Mechanics—3 cr. (3 and 0)
Phys 671—Electron Microscopy—3 cr. (2 and 3)
Phys 673—X-ray Crystallography—3 cr. (2 and 3)
Phys 801—Physics for High School Teachers I—3 cr. (3 and 0)
Phys 802—Physics for High School Teachers II—3 cr. (3 and 0)
Phys 803—Modern Physics for High School Teachers—3 cr. (3 and 0)
Phys 804—Astronomy for High School Teachers—3 cr. (3 and 0)
Phys 811—Methods of Theoretical Physics I—3 cr. (3 and 0)
Phys 812—Methods of Theoretical Physics II—3 cr. (3 and 0)
Phys 813—Advanced Thermodynamics and Statistical Mechanics I—3 cr. (3 and 0)
Phys 814—Advanced Thermodynamics and Statistical Mechanics II—3 cr. (3 and 0)
Phys 821—Classical Mechanics I—3 cr. (3 and 0)
Phys 822—Classical Mechanics II—3 cr. (3 and 0)
Phys 841—Electrodynamics I—3 cr. (3 and 0)
Phys 842—Electrodynamics II—3 cr. (3 and 0)
Phys 845—Solid State I—3 cr. (3 and 0)
Phys 846—Solid State II—3 cr. (3 and 0)
Phys 853—Nuclear Physics I—3 cr. (3 and 0)
Phys 854—Nuclear Physics II—3 cr. (3 and 0)
Phys 856—Crystallography—3 cr. (3 and 0)
Phys 875—Seminar in Contemporary Physics—1 or 2 or 3 cr. (1 or 2 or 3 and 0)
Phys 885—Colloquium—1 cr. (1 and 0)
Phys 891—Research—Credit to be arranged.
Phys 922—Hydrodynamics—3 cr. (3 and 0)
Phys 951—Quantum Mechanics I—3 cr. (3 and 0)
Phys 952—Quantum Mechanics II—3 cr. (3 and 0)
Phys 955—Advanced Modern Physics I—3 cr. (3 and 0)
Phys 956—Advanced Modern Physics II—3 cr. (3 and 0)
Phys 966—Relativity—3 cr. (3 and 0)
Phys 991—Doctoral Research and Dissertation—Credit to be arranged.
PLANT PATHOLOGY

Professors: L. W. Baxter, W. M. Epps, Head; J. E. Halpin, W. Witcher
Associate Professor: G. C. Kingsland
Assistant Professors: O. W. Barnett, E. I. Zehrer
Lecturer: W. M. Dowler *

Pl Pa 401—PlANT Pathology—3 cr. (2 and 3) F, S
The principles of the interrelationships between plant pathogens, their hosts, and the environment. Economically important plant diseases are used to illustrate these principles and the application of these principles to disease control. Prerequisite: Bot 102.

Pl Pa H401—PlANT Pathology—3 cr. (2 and 3) F, S
Honors option for Pl Pa 401, admission by special arrangement.

Pl Pa 405—Forest Pathology—3 cr. (2 and 3) F
Principles of plant pathology as related to forest tree diseases; casual agents and their effects on the suspect; prevention and control and minimizing losses; relation of disease control to silviculture, management, and forest products utilization. Prerequisite: Bot 102 and Bot 352 or permission of instructor.

Pl Pa H405—Forestry Pathology—3 cr. (2 and 3) F
Honors option for Pl Pa 405, admission by special arrangement.

Pl Pa 451—Bacterial PlANT Pathogens—3 cr. (2 and 3) S, ’73 and alternate years.
The nature, development and control of plant diseases caused by bacteria. Taxonomic considerations, host-parasite relations and techniques used in isolating, identifying, and preserving bacterial plant pathogens. Prerequisite: Pl Pa 401 or 405, Micro 305, or permission of instructor.

Pl Pa 456—PlANT Virology—3 cr. (3 and 0) S, ’72 and alternate years
Plant viruses with emphasis on their morphology, biochemistry, purification and transmission; symptoms resulting from virus infection; virus-vector relationships; and serological procedures. The importance and control of plant virus diseases will be discussed. Prerequisite: Bot 102.

Pl Pa H456—PlANT Virology—3 cr. (3 and 0) S, ’72 and alternate years
Honors option for Pl Pa 456, admission by special arrangement.

Pl Pa 458—PlANT Parasitic Nematodes—3 cr. (2 and 3) F, ’72 and alternate years.
Morphology and taxonomy of stylet bearing nematodes and their relationship with plant diseases. Prerequisite: Bot 102 and Zool 102.

Pl Pa H458—PlANT Parasitic Nematodes—3 cr. (2 and 3) F, ’72 and alternate years.
Honors option for Pl Pa 458, admission by special arrangement.

Pl Pa 601—PlANT Pathology—3 cr. (2 and 3)
Pl Pa 605—Forest Pathology—3 cr. (2 and 3)
Pl Pa 651—Bacterial PlANT Pathogens—3 cr. (2 and 3)
Pl Pa 656—PlANT Virology—3 cr. (3 and 0)

* On leave.
PL Pa 658—Plant Parasitic Nematodes—3 cr. (2 and 3)
PL Pa 800—Advanced Plant Pathology I—3 cr. (3 and 0)
PL Pa 801—Advanced Plant Pathology II—3 cr. (3 and 0)
PL Pa 804—Physiological Plant Pathology—3 cr. (3 and 0)
PL Pa 805—Special Problems in Plant Pathology—Credit to be arranged.
PL Pa 807—Seminar—1 cr. (1 and 0)
PL Pa 808—Techniques and Methods in Plant Pathology I—1 cr. (0 and 3)
PL Pa 809—Techniques and Methods in Plant Pathology II—1 cr. (0 and 3)
PL Pa 811—Plant Disease Diagnosis I—1 cr. (0 and 3)
PL Pa 812—Plant Disease Diagnosis II—1 cr. (0 and 3)
PL Pa 891—Research—Credit to be arranged.
PL Pa 991—Doctoral Research—Credit to be arranged.

**POLITICAL SCIENCE**

**Associate Professor:** J. E. Tuttle

**Assistant Professors:** H. E. Albert, W. H. Owens, Jr., R. A. Rimkus, M. W. Slann

POL Sc 101—Introduction to Political Science I, American Government—3 cr. (3 and 0)

A general introduction to public administration, political behavior, and public law, with a concentrated treatment of American institutions. (Formerly Pol Sc 202.)

POL Sc 201—Introduction to Political Science II—3 cr. (3 and 0)

A basic introduction to the study, analysis, scope, and sources of government. Emphasis is given to the comparative institutions of government, the international relations of government, the theoretical conceptions man has entertained about government, and analysis of the ways in which man has behaved in response to government. *Prerequisite:* Pol Sc 101 (or 301) or permission of instructor.

POL Sc 301—American Government and Political Parties—3 cr. (3 and 0)

The Constitution: powers and functions of the governmental activities; political parties and elections. Not open to those who have completed Pol Sc 101 or 202.

POL Sc 302—State and Local Government—3 cr. (3 and 0)

The structural features, functions, and legislative, executive and judicial processes of American state and local governments.

POL Sc 321—General Public Administration—3 cr. (3 and 0)

An introduction to public administration including the elements of organization, personnel and financial management, and administrative law and administrative responsibility. *Prerequisite:* Pol Sc 101 (or 301) and 201.
376 Description of Courses

Pol Sc 331—CONSTITUTIONAL DEVELOPMENT OF THE UNITED STATES—3 cr. (3 and 0)
The origin and growth of the Constitution of the United States. Prerequisite: Pol Sc 101 (or 201).

Pol Sc 341—POLITICAL BEHAVIOR—3 cr. (2 and 3)
An introduction to behavioral methods. Identification of regularities in the type, degree, and direction of political participation. Laboratory training and field work in interviewing. Prerequisite: Junior standing and permission of instructor.

Pol Sc 351—CLASSICAL POLITICAL THOUGHT—3 cr. (3 and 0)
Political philosophy from the pre-Socratic period to Machiavelli. Prerequisite: Pol Sc 101 (or 301) and 201.

Pol Sc 352—MODERN POLITICAL THOUGHT—3 cr. (3 and 0)
The early theories of the nation state in the sixteenth century and the major political thinkers, problems and movements through the twentieth century. Prerequisite: Pol Sc 101 (or 301) and 201.

Pol Sc 361—INTERNATIONAL POLITICS—3 cr. (3 and 0)
An introduction to foreign policy, international law, and international organizations. Prerequisite: Pol Sc 101 (or 301) and 201.

Pol Sc 371—COMPARATIVE EUROPEAN GOVERNMENTS I; CONSTITUTIONAL SYSTEMS—3 cr. (3 and 0)
Major emphasis on the United Kingdom, France, Germany, and the U.S.S.R., with brief attention given to Italy and Switzerland. Current methods of comparison will be studied and applied to the formal and informal functioning of these governments. Prerequisite: Pol Sc 101, 201.

Pol Sc 372—COMPARATIVE EUROPEAN GOVERNMENT II; TOTALITARIAN SYSTEMS—3 cr. (3 and 0)
A continuation of Pol Sc 371. This course will deal specifically with the Soviet Union as an example of totalitarian political systems, with references made to Nazi Germany and the present Eastern European political systems. Prerequisite: Pol Sc 101 (or 301) and 201.

Pol Sc 403—LEGISLATIVE PROCESS—3 cr. (3 and 0)
Individual behavior and the decision-making process within legislatures; legislative functions; the relationship of legislatures to the Executive and other entities in the political system. Prerequisite: Pol Sc 101, 201.

Pol Sc 409—DIRECTED STUDY IN AMERICAN INSTITUTIONS—3 cr. (3 and 0)
Supervised reading and/or research in selected areas of American government. Prerequisite: 18 semester hours in political science and permission of the instructor.

Pol Sc 422—PROBLEMS OF PUBLIC ADMINISTRATION—3 cr. (3 and 0)
Selected views of public administration and the problems involved. Prerequisite: Pol Sc 101 or permission of the instructor.

Pol Sc 423—MUNICIPAL ADMINISTRATION—3 cr. (3 and 0)
Interaction of political, technical, and administrative processes in urban America. Prerequisite: Pol Sc 101 or permission of the instructor.
**Pol Sc 432—American Constitutional Law I—3 cr. (3 and 0)**

A brief introduction to the judicial process followed by a detailed examination of leading cases pertaining to the Judiciary, the Congress, the Presidency, and the federal system. **Prerequisite:** Pol Sc 101 (or 301), 201, and preferably 331.

**Pol Sc 433—American Constitutional Law II—3 cr. (3 and 0)**

An examination of the relationship of the individual to his government; focusing on the safeguards of liberty and property including freedoms of speech, press and religion, and criminal procedure. **Prerequisite:** Pol Sc 101 (or 301), 201, and preferably 331.

**Pol Sc 434—The Judicial Process and Jurisprudence—3 cr. (3 and 0)**

Courts as political subsystems; judicial decision-making; the development of public policy through the judicial process; theories of law and jurisprudence. **Prerequisite:** Pol Sc 101, 201.

**Pol Sc 442—Political Parties and Politics—3 cr. (8 and 0)**

A study of the historical development of political parties, and the role they play in the organization and functions of our national government, and the influence of politics in policy making. **Prerequisite:** Pol Sc 101 (or 301) and 201.

**Pol Sc 443—Public Opinion and Propaganda—3 cr. (3 and 0)**

This course examines the nature of public opinion, its social and political context, the social-psychological processes basic to it, the dynamics of its formation and change and its measurement. **Prerequisite:** Pol Sc 341, IM 410, or permission of the instructor.

**Pol Sc 462—International Organizations—3 cr. (3 and 0)**

Emphasis on international organizations. Analysis of current problems and proposed solutions. **Prerequisite:** Pol Sc 101 (or 202 or 301) and 201.

**Pol Sc 463—United States Foreign Policy—3 cr. (3 and 0)**

Focus on foreign policy in its historical perspective, examining the decision-making process in foreign policy; evaluates contemporary American capabilities, and analyzes specific issues. **Prerequisite:** Pol Sc 101 (or 202 or 301) and 201.

**Pol Sc 464—International Law—3 cr. (3 and 0)**

An examination of cases and other legal materials on the nature of international law, recognition of states, succession, the territory of states, and nationality. **Prerequisite:** Pol Sc 101, 201.

**Pol Sc 469—Proseminar in International Studies—3 cr. (3 and 0)**

Assessment of various theories and methods employed in the systematic study of International Relations; class discussions, readings, and reports. **Prerequisite:** Pol Sc 101, 201, and permission of the instructor.

**Pol Sc 473—Politics of the Developing Nations—3 cr. (3 and 0)**

A comparative analysis of the political and social problems of the developing nations of Africa, the Near East, East Asia and Latin America. **Prerequisite:** Pol Sc 101 and 201 or permission of the instructor.

**Pol Sc 632—American Constitutional Law I—3 cr. (3 and 0)**

**Pol Sc 662—International Organizations—3 cr. (3 and 0)**
POULTRY SCIENCE

Professors: B. D. Barnett, Head; M. A. Boone
Associate Professors: J. B. Cooper, D. E. Turk
Assistant Professors: J. E. Jones, J. Solis

PS 201—INTRODUCTION TO POULTRY SCIENCE—3 cr. (2 and 3) F, S
The application of the physical and biological sciences to modern poultry production and utilization. A study of the anatomy and physiology of the fowl and the economic aspects of poultry enterprises.

PS 354—POULTRY BREEDING—3 cr. (2 and 3) S, '72 and alternate years.
The application of genetics to the improvement of poultry and a study of the physiology related to breeding. Prerequisite: Gen 302.

PS 355—POULTRY PRODUCTS GRADING AND TECHNOLOGY—3 cr. (2 and 3) F, '71 and alternate years.
Factors important in the quality of poultry products will be considered. The effects of production, handling, packaging and storage on consumer acceptability will be discussed. Quality evaluation will be considered from the standpoint of tenderness, flavor, microbiology, and USDA grades.

PS 356—INCUBATION AND BROODING—2 cr. (2 and 0) F, '72 and alternate years.
Principles and practice of incubation of chicken, turkey, quail, and waterfowl eggs with consideration of hatchery management and avian embryology.

PS 357—INCUBATION AND BROODING LABORATORY—1 cr. (0 and 3) F, '72 and alternate years.
Demonstration of subjects covered in PS 356. Must be concurrently enrolled in PS 356.

PS 401—ANIMAL ENVIRONMENTAL TECHNOLOGY—2 cr. (2 and 0) F, '72 and alternate years.
Demonstration of measurement and control of certain environmental factors with emphasis on light, temperature, and ventilation. Demonstration of physiological response of animals to different environments. All domestic livestock will be considered.

PS 403—ANIMAL ENVIRONMENTAL TECHNOLOGY LABORATORY—1 cr. (0 and 3) F, '72 and alternate years.
Demonstration of subjects covered in PS 401.

PS 451—POULTRY NUTRITION—2 cr. (2 and 0) S, '72 and alternate years.
Nutrient requirements of the various classes of poultry and the use of feedstuffs in meeting these needs. Prerequisite: An Sc 301.

PS 458—AVIAN MICROBIOLOGY AND PARASITOLOGY—4 cr. (3 and 3) F, '72 and alternate years.
Agents causing poultry diseases; the diagnosis, prevention, and treatment of specific diseases and their economic and public health significance.

PS 460—SEMINAR—2 cr. (2 and 0) S, '71 and alternate years.
Current research reported in journals covering the various areas of poultry science. Students will practice scientific writing and interpretation of technical material for lay readers. Prerequisite: Permission of instructor.
PS 601—ANIMAL ENVIRONMENTAL TECHNOLOGY—2 cr. (2 and 0)
PS 603—ANIMAL ENVIRONMENTAL TECHNOLOGY LABORATORY—1 cr. (0 and 3)
PS 651—POULTRY NUTRITION—2 cr. (2 and 0)
PS 654—POULTRY BREEDING—3 cr. (2 and 3)
PS 655—POULTRY PRODUCTS GRADING AND TECHNOLOGY—3 cr. (2 and 3)
PS 656—INCUBATION AND BROODING—2 cr. (2 and 0)
PS 657—INCUBATION AND BROODING LABORATORY—1 cr. (0 and 3)
PS 658—AVIAN MICROBIOLOGY AND PARASITOLOGY—4 cr. (3 and 3)
PS 660—SEMINAR—2 cr. (2 and 0)
PS 804—POULTRY PATHOLOGY—3 cr. (1 and 6)
PS 805—SEMINAR—1 cr. (1 and 0)
PS 891—RESEARCH—Credit to be arranged.

PSYCHOLOGY

Associate Professors: C. B. Caffrey, J. D. Davenport, E. E. Waite, Jr.
Assistant Professors: S. N. Cole, T. G. Titus, W. B. Turpin
Lecturer: D. K. Freeman, Jr.

PSYCH 201—GENERAL PSYCHOLOGY—3 cr. (3 and 0)
A survey of the field of psychology: development and adjustment, motivation, emotions, intelligence, personality, the sensory experiences, perception, learning, thinking, imagination and mental hygiene.

PSYCH 202—EXPERIMENTAL PSYCHOLOGY I—3 cr. (2 and 2)
This course places emphasis on theoretical and practical problems of reporting research. Required of psychology majors (and minors after May, 1969). Not open to those who have had Psych 362. Prerequisite: Psych 201.

PSYCH 211—GROWTH AND DEVELOPMENT—3 cr. (3 and 0)
The course will focus on changes in personal and social behavior throughout the human life span. Prerequisite: Psych 201.

PSYCH 302—SOCIAL PSYCHOLOGY—3 cr. (3 and 0)
The interaction between the individual and the forces of society: the classical theories, the psychobiological bases of human behavior, the sociocultural bases of behavior, types of human behavior, overt and covert experiences, symbolism, personality and social interaction. Prerequisite: Psych 201.

PSYCH 303—THE PSYCHOLOGY OF ADJUSTMENT—3 cr. (3 and 0)
A course in personal adjustment dealing with the appropriate and inappropriate reactions to frustration and stress, including ways of handling conflicts, anxiety, fears, and the promotion of personal emotional adjustment. Prerequisite: Psych 201, 202, or permission of instructor. Not open to psychology majors.

PSYCH 321—DEVELOPMENTAL PSYCHOLOGY—3 cr. (3 and 0)
A survey of current theory and research concerned with the psychological aspects of human growth and development. Prerequisite: Psych 201, 202.
PSYCH 331—THEORIES OF LEARNING—3 cr. (3 and 0)
An historical approach to the study of the major modern learning theories. Prerequisite: Psych 201, 202.

PSYCH 341—PHYSIOLOGICAL PSYCHOLOGY—3 cr. (3 and 0)
The study of human neuroanatomy, with an emphasis on the functions of the nervous system. Treats of the biological bases of behavior in both normal and abnormal dimensions.

PSYCH 351—HISTORY AND SYSTEMS OF PSYCHOLOGY—3 cr. (3 and 0)
A treatment of the science of psychology as understood in the light of the ideas of men who have been responsible for its development. Prerequisite: Psych 201, 202.

PSYCH 361—MOTIVATION—3 cr. (3 and 0)
The various aspects of motivation are considered through a study of contributions of biologists, sociologists, anthropologists, and psychologists. The orientation is empirical rather than theoretical, with emphasis on pertinent research and research methods, and on the measurement of motives. Prerequisite: Psych 201, 202.

PSYCH 363—EXPERIMENTAL PSYCHOLOGY II—4 cr. (3 and 3)
A continuation of Experimental Psychology I, with a stress on the carrying out of original research in the scientific study of human and animal behavior. Laboratory periods stress the refinement of techniques and the execution of research in a guided setting. Prerequisite: Psych 201, 202.

PSYCH 380—COGNITIVE PROCESSES—3 cr. (3 and 0)
The study of higher cognitive functioning which includes such areas as memory, concept acquisition, the acquisition and use of language, speech perception, pattern recognition and problem solving.

PSYCH 401—APPLIED PSYCHOLOGY—3 cr. (3 and 0)
A study of the concepts of psychology as applied to individual, business, and professional behavior. Prerequisite: Psych 201.

PSYCH 402—ABNORMAL PSYCHOLOGY—3 cr. (3 and 0)
Mental and emotional disorders: theories of causation and problems of treatment; special phenomena of consciousness and unconsciousness, e.g., dreams, dissociation, hypnosis; analysis of pathological behavior: alcoholism, drug addiction, suicide, criminality, neurosis, and psychoneurosis. Prerequisite: Psych 201.

PSYCH 403—PERSONALITY—3 cr. (3 and 0)
An analysis of the theories of personality: Freud, Adler, Jung, Sullivan, Horney, Allport, et al. Prerequisite: Psych 201, 202 and permission of instructor.

PSYCH 422—CROSS CULTURAL STUDIES IN DEVELOPMENTAL PSYCHOLOGY—3 cr. (3 and 0)
A comparative study of the development of human behavior and personality emphasizing the contributions of learning theory, psychoanalysis, role theory, and cultural anthropology. Prerequisite: Psych 201, 202, 321, 331 or 361, 402 or 403, or permission of the instructor.

PSYCH 432—CONDITIONING AND LEARNING—3 cr. (3 and 0)
A comprehensive study of the principles of learning. Includes classical, instrumental, and operant conditioning paradigms. A detailed study of rein-
forment, acquisition, generalization, discrimination, and extinction of behavioral responses. Prerequisite: Psych 201, 202, 331, Math 203.

**Psych 442—Sensation and Perception—3 cr. (3 and 0)**
Current experimental findings in the field of perception and sensation, along with theories of vision, audition, kinesthesia, vestibular function, the skin and chemical senses and theories of perception. Prerequisite: Psych 201, 202 and 341.

**Psych 471—Psychometrics—3 cr. (3 and 0)**
An introduction to the theory of psychological testing. Emphasis is on essentials of testing with experience in administering, scoring and interpreting test, including those of scholastic achievement, mental ability, scholastic aptitude, interests and personality. Prerequisite: Nine hours of psychology including 201, 202).

**Psych 490—Special Topics in Psychiatry and Neurology, 3 cr. (3 and 0)**
Selected aspects of medical sciences related to clinical psychology—psychiatric examination and nosology, central nervous system pathology, psychopharmacology, child psychiatry, etc.—designed to assist the psychologist in working effectively with representatives of these disciplines. Prerequisite: Psych 201, 202, 402, 403 and/or permission of the instructor.

**Psych 495—Directed Research in Behavior—2 cr. (2 and 0)**
Consists of individual research projects carried out by students under the direct guidance of a particular faculty member. The research will be conducted in psychology or in a related field, provided that key variables are related to human or animal behavior. Prerequisite: Psych 363 completed; status as a senior.

**Psych 498—Seminar in Current Research in Psychology—2 cr. (2 and 0)**
Reading and discussion of research being published in current psychological and related journals. For advanced psychology students. Prerequisite: Psych 201, 202, and 363 or permission of the instructor.

**Psych 499—Seminar in Current Research in Psychology II—3 cr. (3 and 0)**
Reading and discussion of research being published in current psychological and related journals. For advanced psychology students. Prerequisite: Psych 201, 202, and 363, or permission of the instructor.

**Recreation and Park Administration**

Professor: H. Brantley, Head
Associate Professor: J. L. Stevenson
Lecturer: J. A. Broaddbooks

RPA 101—Introduction to Community Recreation—3 cr. (3 and 0)
History and foundations of Community Recreation in public, private and commercial settings; job opportunities, specifications and demands.
RPA 102—History and Principles of Outdoor Recreation—3 cr. (3 and 0)
Includes the study of the history, present status and the principles of operation of parks and park systems in America; Outdoor Education Programs; implications for continued growth of this leisure phenomenon.

RPA 203—Personal and Community Health—3 cr. (3 and 0)
The course deals with health problems, disease prevention and control, school health practices, public health administration, and other health information which may enable one to live intelligently in today’s complex society.

RPA 204—Sports in Recreation—3 cr. (2 and 3)
Administrative and supervisory skills indigenous to public and/or private agency athletic programs are considered. Group instruction is given in individual and team sports and officiating techniques applicable to these sports are taught.

RPA 205—Program Planning for Recreation—3 cr. (2 and 3)
Course includes fields of activity available to participants; principles and methods of program development; utilization of time-blocks and facilities. (Formerly RPA 303.) Prerequisite: Junior standing.

RPA 302—Camp Organization and Administration—3 cr. (2 and 3)
Surveys the development and trends of camping in America. Considers programming for the operations of agency and private camps. Enables student to master the techniques of group living. Laboratory offers practical experience in camp craft including trips and outdoor cooking.

RPA 304—Recreation in Modern Society—3 cr. (3 and 0)
An historical study of the growth of leisure with special attention given to the utilization of community resources for recreation.

RPA 305—Physical Aspects of Sports in Recreation—3 cr. (2 and 3)
The course considers the physiology of exercise as it relates to safety in recreational sports programs, the practice of first aid, and the treatment of athletic injuries.

RPA 306—Principles of Outdoor Education—3 cr. (3 and 0)
A study of the development of outdoor education in public, private and professional agencies with special emphasis on schools and park and recreation departments. Attention will be focused on our National land problems and on land needs for tomorrow.

RPA 307—Park Maintenance and Operation—4 cr. (3 and 3)
Maintenance techniques and materials, interpretive programs, job planning and scheduling, problems of overuse and preventive maintenance are included. (Formerly RPA 401.)

RPA 308—Methods and Techniques of Recreation Leadership—3 cr. (3 and 0)
Considers characteristics of the several levels of recreation leadership with special emphasis on supervision. Examination is made of the Group Processes. Also includes a study of community resources for leadership in specialized program areas.
RPA 402—Recreation Administration—3 cr. (3 and 0)
An analysis of the internal organization of a recreation department dealing with finances and accounting; records and reports; publicity and public relations; state and federal legislation; staff organization; coordination of community resources. Prerequisite: Senior standing.

RPA 403—Facility and Site Planning—3 cr. (2 and 3)
Trends in recreation facility development, planning principles involved in design of recreation buildings, and orientation of facilities to given area are integrated into sound planning programs. Prerequisite: RPA 307 or permission of instructor.

RPA 404—Methods of Recreation Research—3 cr. (3 and 0)
An analysis of the principal methods of recreation research; the development of experiments; use of questionnaires; research problem under the guidance of the instructor is developed. Prerequisite: Senior standing and Ed 491.

RPA 405—Field Training in Recreation—8 cr.
The student, in a ten-week program, has the opportunity to observe recreation programs in operation. He will also have responsibilities of organizing and conducting activities under supervision. Maintenance and operation of facilities will be observed and practiced. Total of 360 hours required. Prerequisite: Senior standing.

RPA 406—Recreation for the Ill and Handicapped—3 cr. (3 and 0)
Surveys the recreational opportunities and benefits available to the ill and handicapped citizens. Designed to provide the student with an awareness of the role of the professional recreator in serving the needs of such special groups as the mentally retarded, cerebral palsied, emotionally disturbed—institutionalized, hospitalized, etc. Particular emphasis will be given to program development applicable to each specific situation.

RPA 408—The Application of Recreation Therapy—3 cr. (3 and 0)
The study of the responsibility and role of the recreator as a member of the therapeutic team.

RELIGION

Assistant Professor: D. F. White, Jr.

Rel 301—The Old Testament—3 cr. (3 and 0)
A survey of books of the Old Testament with special consideration given to the development of the concepts, institutions, and theology of the ancient Hebrews.

Rel 302—A Survey of New Testament Literature—3 cr. (3 and 0)
A study of the books of the New Testament from the standpoint of their occasion, content, literary form and basic theology.

Rel 306—Religions of the West—3 cr. (3 and 0)
A study of the origin, evolution, and contemporary status of Judaism, Christianity, and Islam. Prerequisite: Junior standing.

Rel 309—Religions of the Far East—3 cr. (3 and 0)
A study of the origin, evolution, and contemporary status of Hinduism, Buddhism, Confucianism, and Taoism. Prerequisite: Junior standing.
**RURAL SOCIOLOGY**

*Professor: W. J. Lanham, Head*

*Associate Professor: V. A. Boyd*

*Assistant Professor: E. L. McLean*

**RS 301—RURAL SOCIOLOGY—3 cr. (3 and 0) F, S**

A study of human social relationships as influenced by life in the open country and in small towns and villages including considerations of the rural population, rural social institutions, processes of change in agricultural technology, and community area planning and development.

**RS 359—THE COMMUNITY—3 cr. (3 and 0) F**

An examination of the sociological aspects of contemporary communities and of their growth and development. The structural relations of social class, status and power and the relationships among social institutions within the community are examined. Emphasis is placed on the organization and development of communities in a constantly changing environment.

**RS 461—RURAL LEADERSHIP—3 cr. (3 and 0) S**

A consideration of the social and psychological factors involved in leadership including an examination and analysis of characteristics of the successful leader. Particular attention is paid to the role of the leader in the process of economic and social development of rural communities and small towns.

**RS 659—THE COMMUNITY—3 cr. (3 and 0)**

**RS 661—RURAL LEADERSHIP—3 cr. (3 and 0)**

**RS 801—RURAL SOCIAL SYSTEMS—3 cr. (3 and 0)**

**RUSSIAN**

*Lecturer: Ludmila A. Savitsky*

**Russ 101—ELEMENTARY RUSSIAN—3 cr. (3 and 1)**

Training in pronunciation, grammatical forms, and syntax with a view of giving the student the fundamentals necessary to read simple Russian texts. Three hours a week classroom instruction and one hour a week in the language laboratory.

**Russ 102—ELEMENTARY RUSSIAN—3 cr. (3 and 1)**

A continuation of Russ 101; three hours a week classroom instruction and one hour a week in the language laboratory.

**Russ 201—INTERMEDIATE RUSSIAN—3 cr. (3 and 1)**

The reading of simple Russian prose; a review of grammar and syntax. Drill on vocabulary and idiom. Three hours a week classroom instruction and one hour a week in the language laboratory. **Prerequisite:** Russ 101 and 102.

**Russ 202—INTERMEDIATE RUSSIAN—3 cr. (3 and 0)**

A continuation of Russ 201.
SOCIOMETRY

Professor: F. A. Burtner
Assistant Professors: W. C. Capel, Jr., R. J. Knapp, G. S. Rent
Instructors: K. D. Birtman, R. N. Pippin, D. A. Smith

Soc 201—Introductory Sociology—3 cr. (3 and 0)
The basic principles of sociology: culture, biological factors, the influence of geographical environment, human nature, group life, social stratification, communities, social institutions and social change. Prerequisite: Sophomore standing.

Soc 202—Social Problems—3 cr. (3 and 0)
A survey of the major social problems, including problems of industry, education, religion, disease and public health, poverty, dependency and factors affecting social adjustment. Required of all students presenting Sociology as the primary or secondary field of concentration. Prerequisite: Soc 201.

Soc 306—Contemporary Socio-environmental Problems—3 cr. (2 and 2)
A multidisciplinary study of national, social and environmental issues. Topics will include: regional population concerns, housing needs, regional health problems, the environment—air, water, land—delivery of justice, automation and technological change. Prerequisite: Junior standing or consent of instructor.

Soc 311—The Family—3 cr. (3 and 0)
The family as one of the basic institutions of society. The history of the family, and a study of its functions in early and modern social structures. A comparative study of family life in other cultures is made. Prerequisite: Soc 201, 202.

Soc 321—Cultural Anthropology—3 cr. (3 and 0)
Recent and contemporary man, as a social and culture-bearing animal, with emphasis on the constants and variants in human behavior involved in technology, social relations, language, religion, art, and other aspects of cultures. Prerequisite: Soc 201, 202.

Soc 322—Cultural Anthropology—3 cr. (3 and 0)
A continuation of Sociology 321. Prerequisite: Soc 321.

Soc 324—Social and Cultural Change—3 cr. (3 and 0)
An examination of theory and research on the processes of change; factors inducing or inhibiting change; the character, mechanisms, rate, extent, direction, and relative stabilization of change at different levels of social phenomena. Prerequisite: Soc 201, 202.

Soc 331—Urban Sociology—3 cr. (3 and 0)
A survey of the history and development of modern urban organization; rise of the city; problems of modern urban life. Prerequisite: Soc 201, 202 (for Sociology majors and minors).

Soc 341—Population Analysis—3 cr. (3 and 0)
Soc 351—**Industrial Sociology**—3 cr. (3 and 0)

Industry as a social organization; the factory as a social system; personality in industrial relations; power groupings within industry; and industry and the community. **Prerequisite:** Soc 201 and permission of the instructor.

Soc 361—**Collective Behavior**—3 cr. (3 and 0)

Examination of the nature, development and consequences of human behavior in situations where usual social norms and behavior do not apply. Particular attention to such collective behavior phenomena as crowds, mobs, mass, cults, publics, and the initial states of social movements. **Prerequisite:** Soc 201, 202.

Soc 371—**Research Methods**—3 cr. (3 and 0)

Analysis of scientific methods in social research and consideration of various techniques, methodological approaches and research designs. Required of all Sociology majors. **Prerequisite:** Soc 201, 202, Ex St 301.

Soc 381—**Society and Socialization**—3 cr. (3 and 0)

The relationship between social structure and personality. **Prerequisite:** Soc 201, 202.

Soc 391—**Sociology of Deviant Behavior**—3 cr. (3 and 0)

Analysis of advanced theory and research on the social processes by which behavior becomes defined as deviant, the conditions promoting such behavior, and the career patterns of deviant persons. **Prerequisite:** Soc 201, 202.

Soc 411—**Classical Sociological Theory**—3 cr. (3 and 0)

A survey of sociological theory from Comte to Durkheim. Required of all sociology majors. **Prerequisite:** 9 semester hours in sociology.

Soc 421—**Contemporary Sociological Theory**—3 cr. (3 and 0)

A survey of sociological theory from Durkheim to the present. Required of all sociology majors. **Prerequisite:** Soc 201, 202, 411.

Soc 431—**Complex Organizations**—3 cr. (3 and 0)

An examination and comparison of theories of formal organization; and analysis of the structure and function of specific organizations illustrating various theoretical approaches. **Prerequisite:** Soc 201, 202.

Soc 441—**Social Stratification**—3 cr. (3 and 0)

Analysis of social structure in terms of class, status, prestige, rank and function. Attention is given to the social role of the elite, bureaucracies, the professional, and middle classes. **Prerequisite:** Soc 201, 202.

Soc 451—**Sociology of Medicine**—3 cr. (3 and 0)

Consideration of the major contributions of sociology to medicine; an exploration of patterned social relationships in the field of health and medicine. **Prerequisite:** Soc 201, 202.

Soc 481—**Race Relations**—3 cr. (3 and 0)

The study of the problem of racial and ethnic groups in adjusting to American society. The nature and causes of prejudice and discrimination. Programs for the reduction of intergroup tensions and conflicts are evaluated in the light of observed facts and sociological principles. **Prerequisites:** Soc 201, 202 (or permission of the instructor).
Soc 499—Seminar in Selected Topics in Contemporary Sociology—3 cr. (3 and 0)
Required of all sociology majors. Prerequisite: Soc 201, 202, 411, 421, or permission of senior adviser.

Soc 611—Classical Sociological Theory—3 cr. (3 and 0)
Soc 621—Contemporary Sociological Theory—3 cr. (3 and 0)
Soc 631—Complex Organizations—3 cr. (3 and 0)
Soc 641—Social Stratification—3 cr. (3 and 0)
Soc 651—Sociology of Medicine—3 cr. (3 and 0)

SPANISH

Instructors: B. G. Durham, L. T. Perry
Lecturer: Elena G. Fernandez

Span 101—Elementary Spanish—3 cr. (3 and 1)
A course for beginners in which the essentials of grammar are taught and a foundation is provided for a conversational and reading knowledge of the language. Three hours a week of classroom instruction and one hour a week in the language laboratory.

Span H101—Elementary Spanish—3 cr. (3 and 1)
Honors section of Span 101; admission by invitation.

Span 102—Elementary Spanish—3 cr. (3 and 1)
A continuation of Span 101; three hours a week of classroom instruction and one hour a week in the language laboratory.

Span H102—Elementary Spanish—3 cr. (3 and 1)
Honors section of Span 102; admission by invitation.

Span 201—Intermediate Spanish—3 cr. (3 and 1)
Grammar, vocabulary, and idioms; conversation, composition, and translation. Three hours a week classroom instruction and one hour a week in the language laboratory. Prerequisite: Span 102.

Span H201—Intermediate Spanish—3 cr. (3 and 1)
Honors section of Span 201; admission by invitation.

Span 202—Intermediate Spanish—3 cr. (3 and 0)
Introduction to Spanish literature: representative short stories, essays, novels, poetry, and plays. Prerequisite: Span 201.

Span H202—Intermediate Spanish—3 cr. (3 and 0)
Honors section of Span 202; admission by invitation.

Span 303—Survey of Spanish Literature I—3 cr. (3 and 0)
Literary movements, influences, and authors from the beginnings to the end of the seventeenth century. Representative works, discussions. Required of Spanish majors. Prerequisite: Span 201 and 202.
Description of Courses

SPAN 304—SURVEY OF SPANISH LITERATURE II—3 cr. (3 and 0)
Literary movements, influences, and authors from the eighteenth century to the present. Required of Spanish majors. Prerequisite: Span 201 and 202.

SPAN 305—CONVERSATIONAL SPANISH—3 cr. (3 and 0)
Practice in spoken Spanish with emphasis on vocabulary, pronunciation, intonation, and comprehension. Some written work to increase accuracy. Required of Spanish majors. Assignments in the language laboratory. Prerequisite: Span 201 and 202.

SPAN 306—ADVANCED CONVERSATION WITH COMPOSITION—3 cr. (3 and 0)
A continuation of Span 305 with more emphasis on written Spanish. Prerequisite: Span 305.

SPAN 307—SPANISH CIVILIZATION—3 cr. (3 and 0)
A study of the significant aspects of the culture of Spain from its origins to the present. Prerequisite: Span 202 or permission.

SPAN 308—SPANISH AMERICAN CIVILIZATION—3 cr. (3 and 0)
A study of the significant aspects of the culture of Spanish American countries from the colonial period to the present. Prerequisite: Span 202 or permission.

SPAN 401—CONTEMPORARY SPANISH LITERATURE—3 cr. (3 and 0)
Literary trends and representative authors since 1898. Prerequisite: Span 303 or 304.

SPAN 402—CONTEMPORARY SPANISH DRAMA—3 cr. (3 and 0)
The Spanish theater from Benavente to the present. Prerequisite: Span 303 or 304.

SPAN 405—NINETEENTH CENTURY SPANISH LITERATURE—3 cr. (3 and 0)
Representative authors and movements of the nineteenth century; romanticism, costumbrismo, and the regional novel. Prerequisite: Span 303 and 304.

SPAN 406—CERVANTES AND THE GOLDEN AGE—3 cr. (3 and 0)
A study of Cervantes and the theater of the Golden Age of Spanish literature. Prerequisite: Span 303 or 304.

TECHNICAL OPERATIONS

Professor: E. Laitala, Program Director

TO 301—MECHANICS I—3 cr. (2 and 3)
A study of statics including force systems and friction, dynamics of particles and rigid bodies; and, kinetics including forces, mass and acceleration, work and energy, impulse and momentum. Prerequisite: Phys 208, concurrent registration in Math 206.

TO 302—MECHANICS II—3 cr. (2 and 3)
Mechanical properties of solids and fluids. Stress analysis in solids; beams, columns and cylinders. Hydrostatic systems. Energy and flow characteristics of fluid dynamic systems. Prerequisite: TO 301.
TO 311—ELECTRICAL CIRCUITS I—3 cr. (3 and 0)
A study of direct and alternating current circuits. Circuit theorems are introduced in the direct current coverage and are reinforced during the study of alternating currents. Emphasis is placed on steady state conditions and power relationships in circuits with sinusoidal excitation. Prerequisite: Phys 208, concurrent registration in Math 206.

TO 312—ELECTRICAL CIRCUITS II—3 cr. (3 and 0)
Continuation of Electrical Circuits I. A thorough coverage of polyphase circuits is included. Prerequisite: TO 311.

TO 321—HEAT POWER I—3 cr. (3 and 0)
First and second laws of thermodynamics, thermodynamic properties, gas mixtures and thermodynamic processes. Prerequisite: Phys 208, concurrent registration, Math 206.

TO 322—HEAT POWER II—3 cr. (3 and 0)
Internal combustion engines, gas turbines, air compressors, flow in nozzles, refrigeration and steam power plant cycles, and heat transfer. Prerequisite: TO 321.

TO 331—HEAT POWER LABORATORY—1 cr. (0 and 3)
The course is intended to illustrate theory covered in heat power and in air conditioning; to develop experimental technique; to interpret data and results; and to develop basic skills in technical report writing. Prerequisite: TO 321 and registration in TO 322.

TO 341—KINEMATICS OF MACHINES—2 cr. (1 and 3)
A study of displacements, velocities, and accelerations encountered in the design of machines using the graphical approach to the solution of problems. The use of these principles applied to the study of cams, gears, and miscellaneous mechanisms. Prerequisite: TO 301.

TO 411—ELECTRICAL MACHINERY—3 cr. (3 and 0)
Coverage includes the theory of operation and application of D-C and A-C machines and transformers. External characteristics are depicted from the machine equivalent circuit. Prerequisite: TO 312.

TO 412—ELEMENTS OF ELECTRONICS—2 cr. (2 and 0)
Theory and operation of electronic circuits and control with emphasis on equipment for industrial application. Prerequisite: TO 311.

TO 421—HEATING AND AIR CONDITIONING—2 cr. (2 and 0)
Psychrometric properties and processes; heating and cooling load calculations; selection and layout of major equipment for heating systems and air conditioning systems, refrigeration and automatic controls. Prerequisite: TO 322.

TO 431—ELECTRICAL LABORATORY—1 cr. (0 and 3)
A laboratory course designed to complement instruction in TO 311, TO 312, and TO 411. Prerequisite: TO 311, TO 312, and concurrent registration in TO 411.

TO 441—MACHINE AND COMPONENT DESIGN—3 cr. (2 and 3)
Basic instruction in the design and analysis of machine and machine components with emphasis on realistic and functional application.
Kinematic and dynamic characteristics of the mechanical system together with wear, fatigue, structural soundness, safety, etc., will be a major consideration of the analysis. *Prerequisite:* TO 302, TO 341.

**TEXTILE CHEMISTRY**

*Professors:* T. D. Efland, J. C. Hubbard, F. T. Simon  
*Associate Professors:* R. H. Barker, J. L. Lundberg, Head; D. W. Lyons, E. S. Olson, J. J. Porter, C. W. Roberts  

TC 303—Textile Chemistry—3 cr. (3 and 0)  
A study of the properties and reactions of aliphatic and aromatic organic compounds. Emphasis will be placed on mechanistic interpretations and the development of synthetic schemes leading to polyfunctional compounds of the types encountered in the textile industry. *Prerequisite:* Ch 102, Math 206.

TC 304—Textile Chemistry—3 cr. (3 and 0)  
Fundamental principles of physical and organic chemistry with emphasis on those areas most frequently encountered in the textile industry including thermodynamics, kinetics, and solution properties. These concepts will be applied to the study of aliphatic organic compounds and organic reaction mechanisms. The basic principles of stereochemistry and conformational analysis will be developed. *Prerequisite:* TC 303.

TC 305—Textile Chemistry Laboratory—1 cr. (0 and 3)  
An introduction to the techniques used in the synthesis and characterization of organic compounds. To be taken concurrently with TC 303.

TC 306—Textile Chemistry Laboratory—1 cr. (0 and 3)  
The techniques used in the synthesis of organic compounds and the measurement of their physio-chemical properties. To be taken concurrently with TC 304.

TC 315—Introduction to Polymer Science and Engineering—3 cr. (3 and 0)  
The chemistry of monomers and polymers and the chemical and physical properties of polymers are discussed emphasizing fiber forming, synthetic polymers. Kinetics of polymerization, molecular characterization, structure, morphology, and mechanical properties of polymers are studied demonstrating design of polymer systems for end use in textiles.

TC 316—Chemical Preparation of Textiles—3 cr. (2 and 3)  
The chemicals used in the preparation of fabric for dyeing and finishing. Oxidizing and reducing agents and their control and effect on various fibers. Colloidal and surface active properties of various compounds and the fundamental factors influencing these properties. *Prerequisite:* TC 315.

TC 317—Polymer and Fiber Laboratory—1 cr. (0 and 3)  
High polymers, prepared from monomers, are characterized and spun to make fibers. Chemical and physical properties of fiber forming polymers are measured as functions of parameters critical to properties of textiles.

TC 457—Dyeing and Finishing I—3 cr. (3 and 0)  
A study of the different classes of dyestuffs and the chemistry of their applications to different fibers. The theories, principles and mechanisms for the dyeing of textile fibers and fabrics will be presented as well as the reaction
mechanisms of various finishing agents applied to different substrates. **Prerequisite:** TC 315.

TC 458—**Dyeing and Finishing II**—3 cr. (3 and 0)
The kinetics and equilibria of dyeing processes. The use of conductivity, diffusion and other methods useful for measuring absorption isotherms and dyeing rates and the general thermodynamic relationships applicable to dyeing operations. Fiber properties such as zeta potential dye sites, relative amorphous area available will be included.

TC 459—**Dyeing and Finishing Laboratory I**—1 cr. (0 and 3)
To be scheduled concurrently with TC 457. The course will introduce the student to common dyeing and printing methods and to some of the machinery necessary to carry out dyeing operations.

TC 460—**Dyeing and Finishing Laboratory II**—1 cr. (0 and 3)
To be scheduled concurrently with TC 458. The course will cover finishing in addition to dyeing operations and their instrumental control.

TC 461—**Seminar and Research**—3 cr. (1 and 6)
An original investigation of a problem in textile or polymer chemistry under the direct supervision of a faculty member. After completing his experimental work, the student prepares a formal, written report which he defends before the textile faculty. **Prerequisite:** Senior standing or permission of the instructor.

TC 466—**Textile Unit Operations**—3 cr. (3 and 0)
Designed to cover some of the principles behind textile equipment operation such as heat transfer in drying and dyeing processes and fluid flow in pressure and open dye operations and polymer production.

TC 475—**Cellulose Chemistry**—2 cr. (2 and 0)
The organic chemistry of cellulose and its derivatives is developed from the basic principles of carbohydrate chemistry. Emphasis is placed in the substitution and degradation reactions which are of particular importance in textile applications. Fiber morphology is treated in relation to its effect on textile chemical processing. **Prerequisite:** TC 315 or permission of instructor.

TC 615—**Introduction to Polymer Science and Engineering**—3 cr. (3 and 0)

TC 616—**Chemical Preparation of Textiles**—3 cr. (2 and 3)

TC 657—**Dyeing and Finishing I**—3 cr. (3 and 0)

TC 658—**Dyeing and Finishing II**—3 cr. (3 and 0)

TC 659—**Dyeing and Finishing Laboratory I**—1 cr. (0 and 3)

TC 666—**Textile Unit Operations**—3 cr. (3 and 0)

TC 675—**Cellulose Chemistry**—2 cr. (2 and 0)

TC 811—**Polymer Science I**—3 cr. (3 and 0)

TC 812—**Polymer Science II**—3 cr. (3 and 0)

TC 821—**Chemistry of Natural Polymers**—3 cr. (3 and 0)

TC 831—**The Physical Chemistry of Dyeing**—3 cr. (3 and 0)

TC 891—**Research**—Credit to be arranged.
TEXTILE SCIENCE

Professors: T. D. Efland, J. C. Hubbard, Jr., F. T. Simon, J. V. Walters
Associate Professors: J. L. Lundberg, Head; D. W. Lyons, J. H. Marvin, Jr., E. S. Olson, J. J. Porter
Assistant Professors: T. H. Gunter, E. A. Vaughn
Visiting Associate Professor: H. M. El-Behery

TEXT 122—INTRODUCTION TO TEXTILES—1 cr. (1 and 0)
An introduction to the various areas involved in the scientific processing of fibrous materials, and the production of yarns and fabrics. The finishing, fabrication and market potential textile materials.

TEXT 301—FIBER PROCESSING I—3 cr. (2 and 3)
A study of fibrous materials and their relationship to the fiber processing systems. The objectives, theories, principles, and mechanisms of the machines used in the earlier stages of fiber processing. The course is directed primarily to the staple fiber processing systems. Mechanical and mathematical fundamentals are applied to the machines concerned.

TEXT 302—FIBER PROCESSING II—3 cr. (2 and 3)
Continuation of Text 301 emphasizing the later stages of fiber processing for the ultimate yarn strand. Prerequisite: Text 301.

TEXT 305—BASIC FIBERS—3 cr. (3 and 0)
A thorough survey of the origin, characteristics and properties of various textile fibers, both natural and man-made. The classification, identification, and the principal fields of applications will be studied.

TEXT 306—YARN FORMATION—3 cr. (3 and 0)
A fundamental study of the various systems of yarn formation from natural and man-made fibers and their blends. The course provides for the basic understanding of machines, theories and operations.

TEXT 311—FABRIC DEVELOPMENT I—3 cr. (2 and 3)
A study of the basic theory underlying the operation of the primary and secondary motions of the cam loom weaving machine. Students learn the principles of designs of the basic plain, twill, and sateen fabrics; and other weaves derived from these basic weaves. Special weaves such as the honeycomb, the mock leno, and the huckaback weave. Weave analysis and preparation of necessary drafts are essential parts of the study of elementary textile design.

TEXT 312—FABRIC DEVELOPMENT II—3 cr. (2 and 3)
A study of the theory and operation of the dobby head, Knowles head, Staubli dobby, Jacquard head, and multi-color selection for the above looms. Weave design for compound fabrics using two or more systems of warp and filling threads for three dimensional weaves, weave analysis, and preparation drafts are covered. Prerequisite: Text 311.

TEXT 313—FABRIC FORMATION—3 cr. (3 and 0)
An examination of the theories involved in the assembly of fibers and yarns into fabrics. The application of design, analysis and production of woven, knitted and non-woven fabrics. A brief survey of the fabric producing machines.
TEXT 314—DYEING AND FINISHING—3 cr. (3 and 0)
The concepts of current procedures and future trends in the textile finishing industry are examined. The preparation of fabrics, dye processes and the application of various materials used in the finishing process are presented.

TEXT 321—FIBER SCIENCE—3 cr. (2 and 3)
Fiber properties and the scientific evaluation of these properties. Dimensional, mechanical, optical, electrical, thermal, and moisture relationships are established and investigated.

TEXT 322—PROPERTIES OF TEXTILE STRUCTURES—3 cr. (2 and 3)
Yarn and fabric properties, their scientific significance and analysis. Dimensional, structural, and mechanical interrelationships are established and evaluated.

TEXT 324—TEXTILE STATISTICS—3 cr. (3 and 0)
An introduction to statistics with particular application to the Textile Industry. Measures of central value and variation, probability, the normal curve, tests of hypotheses, elementary correlation and regression. Prerequisite: Junior standing.

TEXT 333—THE TEXTILE ARTS—3 cr. (2 and 3)
A survey of the textile arts from prehistoric times to the present with emphasis on the correlation between man’s accomplishments in these arts and his progress from the simple tools of ancient origin to the automated systems currently employed in industry.

TEXT 401—POLYMER AND FIBER MECHANICS—3 cr. (3 and 0)
Study of elasticity theory and viscoelasticity applied to polymers and extended to non-linear behavior of fibers and non-linear rheological behavior of polymers with application to extrusion and fiber spinning.

TEXT 403—FIBER PROCESSING III—3 cr. (2 and 3)
The concepts of current fiber processing machines, techniques, practices, and their validity are investigated. Student group and individual problems are assigned that require use of acquired knowledge, textile testing equipment, and processing machines. Study and examination of the cause and effect relations of fibrous material properties and processing dynamics on the fiber assemblies produced. Prerequisite: Text 301 and 302.

TEXT 404—FIBER PROCESSING IV—3 cr. (2 and 3)
Continuation of Text 403 with respect to the various fiber assemblies and yarn structures encountered in the fiber processing systems. Emphasis is placed on the machines and their fiber assemblies. Prerequisite: Text 301, 302, and 403.

TEXT 411—FABRIC DEVELOPMENT III—3 cr. (2 and 3)
A study of specifications and loom details for the production of fabrics woven to the customer’s order to include multi-color layouts. Warp and filling preparation are covered as well as size formulations and their methods of application. Warping and dressing plans are developed for warper and the slasher. Prerequisite: Text 312.

TEXT 412—FABRIC DEVELOPMENT IV—3 cr. (2 and 3)
A study of factors that a designer or fabric developer must consider in making of new fabrics or designs. Factors and how they control the con-
struction of cloth, blending of natural and synthetic fibers and the functional use they impart to fabrics, Worth Street rules to govern the selling and buying of cloth, cloth order and loom assignment problems, and analysis of woven fabrics to obtain necessary construction details. Students produce a fancy fabric in the laboratory. Prerequisite: Text 411.

**Text 413—Fabric Development V—3 cr. (2 and 3)**
Designing and development of fabrics from the leno mechanism, the Jacquard head motion, and the plussom including tufting and weaving techniques for carpets. Each student will develop an original Jacquard design, prepare and punch cards, and produce the fabric.

**Text 414—Non-Woven and Knitted Structures—3 cr. (3 and 0)**
A survey of non-woven and knitted structures dealing with the principles and mechanisms involved. Various systems are covered with emphasis on yarn requirements and fabric properties.

**Text 421—Textile Costing I—3 cr. (2 and 3)**
Actual and standard cost principles as they apply to the manufacture of textiles. Allocating the cost of material, labor and overhead; determining the cost of individual yarns and fabrics; valuing the inventory; making of cost reports, payroll analysis and the use of data processing. Prerequisite: Acct 201 and Senior standing or permission of instructor.

**Text 426—Instrumentation—3 cr. (3 and 0)**
The principles of industrial and process instrumentation and process control. Static and dynamic characteristics of measurement devices. Transducer techniques for measurement of physical properties such as pressure, temperature, flow, weight, etc. Principles of process controllers.

**Text 428—Textile Research—0 to 3 cr.**
An original investigation of a problem in textile, fiber, or polymer science under the direct supervision of a faculty member. After completing his experimental work, the student prepares a formal, written report which he defends before the textile faculty. Prerequisite: Senior standing or permission of the instructor.

**Text 429—Textile Research—0 to 3 cr.**
Same as Text 428.

**Text 440—Color Science—3 cr. (2 and 3)**
The application of the science of color to industrial practice in textiles, plastics, paints, lighting and ceramics. The laboratory work will be performed on modern instruments and computers.

**Text 460—Textile Processes—3 cr. (3 and 0)**
Survey of machinery and processes of textile manufacturing from fiber formation through fabric finishing. (For students with a non-textile background.)

**Text 475—Textile Marketing—3 cr. (3 and 0)**
An examination of the activities involved in the distribution of textile products in today’s market. Emphasis will be placed on the role of consumer research and the analysis of fashion in the design and promotion of textile products.

**Text 601—Polymer and Fiber Mechanics—3 cr. (3 and 0)**
**Text 603—Fiber Processing III—3 cr. (2 and 3)**

VISUAL STUDIES

Professor: R. H. Hunter, Head

Associate Professors: J. T. Acorn, I. G. Regnier, S. Wang

Vis 203—Visual Arts Studio—2 cr. (0 and 6)
Studio work in visual elements and their organization; form, line, texture, space, light and color. Principles of design and formal organization of visual arts. Prerequisite: Permission of instructor.

Vis 205—Drawing—2 cr. (0 and 6)
Studio work in drawing and related media. Prerequisite: Arch 102 or Vis 203 or permission of instructor.

Vis 207—Beginning Painting—2 cr. (0 and 6)
Studio work in painting and related media. Prerequisite: Arch 102 or Vis 203 or permission of the instructor.

Vis 209—Beginning Sculpture—2 cr. (0 and 6)
Studio work in sculpture and related media. Prerequisite: Arch 102 or Vis 203 or permission of instructor.

Vis 211—Beginning Printmaking—2 cr. (0 and 6)
Studio work in lithography, silk screen, wood cuts, and graphics and related media. Prerequisite: Arch 102 or Vis 203 or permission of instructor.
Vis 213—Beginning Photography—2 cr. (0 and 6)
Studio work in photography and related media. Prerequisite: Arch 102 or Vis 203 or permission of instructor.

Vis 215—Beginning Graphics—2 cr. (0 and 6)
Studio work in graphic composition, letterpress, photo lithography, silk screen process and related media. Prerequisite: Arch 102 or Vis 203 or permission of instructor.

Vis 305—Life Drawing—2 cr. (0 and 6)
Studio work in drawing and related material. Prerequisite: Vis 205, or Vis 207, or Vis 209.

Vis 306—Life Drawing—2 cr. (0 and 6)
Continuation of Vis 305. Prerequisite: Vis 305.

Vis 307—Painting—2 cr. (0 and 6)
Studio work in painting and related media. Prerequisite: Vis 207.

Vis 308—Painting—2 cr. (0 and 6)
Continuation of Vis 307. Prerequisite: Vis 307.

Vis 309—Sculpture—2 cr. (0 and 6)
Studio work in sculpture and related media. Prerequisite: Vis 209.

Vis 310—Sculpture—2 cr. (0 and 6)
Continuation of Vis 309. Prerequisite: Vis 309.

Vis 311—Printmaking—2 cr. (0 and 6)
Studio work in lithography, silk screen, etching, wood cuts and related media. Prerequisite: Vis 211.

Vis 312—Printmaking—2 cr. (0 and 6)
Continuation of Vis 311. Prerequisite: Vis 311.

Vis 313—Photography—2 cr. (0 and 6)
Studio work in still photography and related media. Prerequisite: Vis 213.

Vis 314—Photography—2 cr. (0 and 6)
Continuation of Vis 313. Prerequisite: Vis 313.

Vis 315—Graphics—2 cr. (0 and 6)
Studio work in graphic composition, letterpress, photo lithography, silk screen process, and related media. Prerequisite: Vis 215.

Vis 316—Graphics—2 cr. (0 and 6)
Continuation of Vis 316. Prerequisite: Vis 316.

Vis 317—Beginning Ceramic Arts—2 cr. (0 and 6)
Applied studio work in ceramic sculpture and pottery; creative experience in process of forming, decorating, glazing, and firing. Prerequisite: Cr Ar 101.

Vis 318—Ceramic Arts—2 cr. (0 and 6)
Continuation of Vis 317. Prerequisite: Vis 317.

Vis 405—Drawing—3 cr. (0 and 9)
Studio work in advanced drawing and related media. Prerequisite: Vis 306 or Vis 308 or Vis 312 or Vis 316.

Vis 406—Drawing—3 cr. (0 and 9)
Continuation of Vis 405. Prerequisite: Vis 405.
Vis 407—Painting—3 cr. (0 and 9)
Studio work in advanced painting and related media. Prerequisite: Vis 308
or Vis 312 or Vis 314, Vis 316.

Vis 408—Painting—3 cr. (0 and 9)
Continuation of Vis 407. Prerequisite: Vis 407.

Vis 409—Sculpture—3 cr. (0 and 9)
Advanced studio work in sculpture and related media. Prerequisite: Vis 310.

Vis 410—Sculpture—3 cr. (0 and 9)
Continuation of Vis 409. Prerequisite: Vis 409.

Vis 411—Printmaking—3 cr. (0 and 9)
Advanced studio in Printmaking and related media. Prerequisite: Vis 312.

Vis 412—Printmaking—3 cr. (0 and 9)
Continuation of Vis 411. Prerequisite: Vis 411.

Vis 413—Photography—3 cr. (0 and 9)
Advanced studio work in photography. Prerequisite: Vis 314.

Vis 414—Photography—3 cr. (0 and 9)
Continuation of Vis 413. Prerequisite: Vis 413.

Vis 415—Graphics Matrix—3 cr. (0 and 9)
Advanced studio work in visual media. Prerequisite: 8 credit hours in Visual
Studies courses and permission of instructor.

Vis 416—Graphics Matrix—3 cr. (0 and 9)
Continuation of Vis 415. Prerequisite: Vis 415 and permission of instructor.

Vis 417—Advanced Ceramic Arts—3 cr. (0 and 9)
Advanced applied studio work in ceramic sculpture and pottery. Pre-
requisite: Vis 318.

Vis 418—Advanced Ceramic Arts—3 cr. (0 and 9)
Continuation of Vis 417. Prerequisite: Vis 417.

Vis 503—20th Century Visual Arts—3 cr. (3 and 0)
A seminar course dealing with Twentieth Century visual art forms in rela-
tion to the factors that have influenced the artist and the consequence of his
production on society. Prerequisite: Vis 305 or 307 or 309 or 311 or 313 or
Arch 415 or permission of instructor.

WATER RESOURCES ENGINEERING

Professor: L. G. Rich, Program Director

WRE 460—Physical Oceanography—3 cr. (3 and 0)
An integrated treatment of the fluid dynamic, ecologic, geologic, and re-
source aspects of physical oceanography. The basic principles of the physical
aspects of the oceans are presented together with techniques for the appli-
cation of these fundamentals. Primary emphasis is placed on relating the
oceanographic phenomena to relevant problems in the marine environment.
Prerequisite: Ch 102 and Phys 222, and permission of instructor.

WRE 461—Oceanographical Engineering—3 cr. (3 and 0)
An integrated coverage of various facets of coastal and ocean engineering.
Emphasis is placed on introducing the student to selected areas of oceano-
graphical engineering and indicating the basic principles and current applications in these areas. Although the course is engineering oriented, the interaction of the engineer and the marine environment is included where applicable. Prerequisite: EM 320.

WRE 660—Physical Oceanography—3 cr. (3 and 0)
WRE 661—Oceanographical Engineering—3 cr. (3 and 0)
WRE 811—Climatology—3 cr. (3 and 0)
WRE 812—Meteorology—3 cr. (3 and 0)
WRE 822—Water Movement in Soils—3 cr. (3 and 0)
WRE 861—Hydrology—3 cr. (3 and 0)
WRE 862—Advanced Hydrology—3 cr. (3 and 0)
WRE 864—Ground-Water Hydrology—3 cr. (3 and 0)
WRE 865—Hydrology I—3 cr. (3 and 0)
WRE 866—Hydrology II—3 cr. (3 and 0)
WRE 870—Stream and Estuarine Analysis—3 cr. (3 and 0)
WRE 875—River Basin Planning—2 cr. (2 and 0)
WRE 876—Water Resources Systems—2 cr. (2 and 0)
WRE 881—Special Problems in Water Resources Engineering—1-4 cr. (1-4 and 0)
WRE 883—Selected Topics in Water Resources Engineering—1-3 cr. (1-3 and 0)
WRE 891—Research—Credit to be arranged.
WRE 981—Special Topics in Water Resources—3 cr. (3 and 0)
WRE 982—Special Topics in Water Resources—3 cr. (3 and 0)
WRE 991—Doctoral Research—Credit to be arranged.

WILDLIFE BIOLOGY

Associate Professors: S. B. Hays, R. E. Ware, L. G. Webb
Assistant Professor: H. A. Loyacano, Jr.

WB 306—Wildlife Resources of the Southeastern United States—2 cr. (2 and 0) F, S
A study of the wildlife resources of the Southeastern States, including population trends, life histories and economic importance. Conservation and proper utilization by man is emphasized.

WB 412—Wildlife Management—3 cr. (2 and 3) F, S
Basic principles and general practices of wildlife management and conservation will be covered. This course deals with the major problems concerning the management of wildlife resources, with emphasis on upland game species. The laboratory work includes practical work on the Clemson University Woodlands and field trips to several areas where wildlife management is being practiced.
WB 612—Wildlife Management—3 cr. (2 and 3)
WB 809—Wildlife Biology Seminar I—1 cr. (1 and 0)
WB 810—Wildlife Biology Seminar II—1 cr. (1 and 0)
WB 815—Principles of Wildlife Biology—3 cr. (2 and 3)
WB 816—Applied Wildlife Biology—3 cr. (2 and 3)
WB 863—Special Problems—1-6 cr.
WB 891—Research—1-6 cr.

ZOOLOGY

(See also Biology)

Professors: E. W. King, J. K. Reed
Associate Professors: G. W. Anderson, A. S. Tombes, Chairman; R. E. Ware
Assistant Professors: W. E. Bachop, E. D. Brodie, S. A. Gauthreaux, Ruth L. Hays, W. K. Willard

Instructor: B. R. Ingram

Zool 100—The Biology of Human Survival—1 cr. (1 and 0)
A biological overview of those aspects of contemporary life which constitute threats to the individual and the social welfare of man now and in the future: rampant reproduction, venereal disease, illegitimacy, sterility, crowding, famine, death control, genetic engineering, and hallucinogenic drugs.

Zool 102—Principles of Zoology—2 cr. (2 and 0) F, S, SS
The application of biological principles to animals as exemplified by the structures and functions of invertebrates and vertebrates. Followed by a survey of the animal kingdom. Prerequisite: Biol 101.

Zool 104—Laboratory Exercises in Zoology—1 cr. (0 and 2) F, S, SS
Demonstrations and experiments to illustrate the structures and functions of animals considered in Zool 102.

Zool 201—Invertebrate Zoology—4 cr. (3 and 3) F, S
A survey of the phyla of invertebrate animals, including their taxonomy, morphology, development and evolution. Prerequisite: Zool 102, 104 or permission of instructor.

Zool 202—Vertebrate Zoology—4 cr. (3 and 3)
A study of vertebrates with an emphasis on systematic relationships and evolutionary advances. Laboratory will be concerned with basic morphological traits of each group as well as the ecology, life history, and identification of local forms. Prerequisite: Zool 102, 104.

Zool 301—Comparative Vertebrate Anatomy—3 cr. (2 and 3) F, S, SS
Advanced training in zoological principles, physiology and comparative vertebrate anatomy. Prerequisite: Zool 102, 104.

Zool 302—Vertebrate Embryology—3 cr. (2 and 3) F, S, SS
Fundamentals of developmental anatomy of the organ systems as illustrated by the chick and pig. Students prepare histological sections and mounts to acquire practice in laboratory procedures and knowledge of vertebrate micro-
scopic anatomy. Identification of the various tissues is stressed. Prerequisite: Zool 102, 104 and 301 or permission of the instructor.

Zool H302—VETERINARY EMBRYOLOGY—3 cr. (2 and 3) F, S, SS
Honors option for Zool 302, admission by special arrangement.

Zool 304—ANIMAL ECOLOGY—3 cr. (2 and 3) F
Marine, fresh water and land animal communities as they exist in South Carolina. Students will gain a knowledge of the common animal associations as they are related to land use through lectures, reading, films and field trips.

Zool H304—ANIMAL ECOLOGY—3 cr. (2 and 3) F
Honors option for Zool 304, admission by special arrangement.

Zool 307—ANIMAL ANATOMY AND PHYSIOLOGY—3 cr. (2 and 3) F
Anatomy, and physiological processes of ingestion, secretion, excretion, respiration, circulation, reproduction and metabolism of warm-blooded animals. This course is designed for students majoring in Pre-medicine, Pre-veterinary, Animal Science, Dairy Science, and Poultry Science. Prerequisite: Zool 102, 104.

Zool 403—PROTOZOOLOGY—3 cr. (2 and 3) S
Taxonomy of the sub-kingdom protozoa with special reference to the parasitic forms directly affecting man. Representative types of free-living forms are surveyed with emphasis on their morphology, physiology and distribution. Prerequisite: Zool 102, 104.

Zool H403—PROTOZOOLOGY—3 cr. (2 and 3) S
Honors option for Zool 403, admission by special arrangement.

Zool 404—ANIMAL PATHOLOGY—3 cr. (2 and 3) S
Designed to inform students in the causes, treatments, and prevention of animal diseases. Those transmissible to man are considered in detail. Emphasis is placed on hygiene and care of the sick.

Zool 405—ANIMAL HISTOLOGY—3 cr. (2 and 3) F
Microscopic structures of tissues and organs of the animal body. This course is for students in Pre-veterinary, Pre-medicine and the Animal Science courses. Prerequisite: Zool 102, 104.

Zool 408—PHYSIOLOGY AND DEVELOPMENT OF INVERTEBRATES—3 cr. (2 and 3) F
A study of the developmental and functional characteristics of invertebrates.

Zool 410—LIMNOLOGY—3 cr. (2 and 3) F
This course is designed to familiarize the student with interrelationships between fresh-water organisms and their abiotic environment. Prerequisite: Zool 102, 104.

Zool H410—LIMNOLOGY—3 cr. (2 and 3) F
Honors option for Zool 410, admission by special arrangement.

Zool 411—ANIMAL ECOLOGY—3 cr. (2 and 3)
A fundamental approach to basic ecological principles underlying the interrelationships of organisms with their abiotic environment. A variety of aquatic and terrestrial ecosystems will be studied both in the field and in the laboratory.

Zool H411—ANIMAL ECOLOGY—3 cr. (2 and 3)
Honors option for Zool 411, admission by special arrangement.
Zool 456—Parasitology—3 cr. (2 and 3) F
An introduction to the phenomenon of parasitism in the animal kingdom with emphasis on basic principles. Classical and experimental approaches to the study of parasitism are examined in reference to the protozoa, helminths and arthropods.

Zool H456—Parasitology—3 cr. (2 and 3) F
Honors option for Zool 456, admission by special arrangement.

Zool 458—Cell Physiology—3 cr. (2 and 3) F
An introduction to the fundamental processes of physiology as exemplified by the cell. Dynamic cellular environment, organelles, respiration, metabolism, protein synthesis, and basic thermodynamics as it applies to the cell, will be covered. Laboratory will include an introduction to techniques in study of cellular physiology. Prerequisite: Zool 102, 104, Organic Chemistry.

Zool H458—Cell Physiology—3 cr. (2 and 3) F
Honors option for Zool 458, admission by special arrangement.

Zool 460—General Physiology—3 cr. (2 and 3) S
Systematic study of the physiology of nervous activity, hormonal control, neuro-hormonal interrelations, circulation, respiration, digestion, renal control, muscular activity and reproduction. Effort in the laboratory will be concentrated toward acquainting the student with methods of obtaining information about these systems. Prerequisite: Zool 102, 104 or permission of instructor.

Zool 461—Anatomy—3 cr. (3 and 0) F
Those aspects of anatomy related to the skeletal, circulatory, muscular, nervous, endocrine, respiratory, digestive and excretory systems will be covered. Emphasis will be placed on gross anatomy with some work in micro-anatomy. Prerequisite: Zool 102, 104 or permission of instructor.

Zool 462—Herpetology—3 cr. (2 and 3)
Systematics, life history, distribution, ecology, and current literature of amphibians and reptiles. Laboratory study of morphology and identification of world families and U. S. genera, as well as all southeastern species. Field trips will be required. Prerequisite: Vertebrate Zoology or approval of instructor.

Zool 463—Ichthyology—3 cr. (2 and 3)
Systematics, life history, distribution, ecology, and current literature of fish. Laboratory study of morphology and identification of U. S. genera, as well as all southeastern species. Field trips will be required. Prerequisite: Vertebrate Zoology or approval of instructor.

Zool 464—Mammalogy—3 cr. (2 and 3)
Systematics, life history, distribution, ecology, and current literature of mammals. Laboratory study of morphology and identification of U. S. genera, as well as all southeastern species. Field trips will be required. Prerequisite: Vertebrate Zoology of approval of instructor.

Zool 465—Ornithology—3 cr. (2 and 3)
The identification, life history and ecology of birds. Field trips, work with bird specimens and correlated reading will give the student a working knowledge of at least 100 species of the common birds.

PUBLIC SERVICE ACTIVITIES
COLLEGE OF AGRICULTURE AND BIOLOGICAL SCIENCES STAFF

PUBLIC SERVICE ACTIVITIES

Agricultural Regulatory Committee of Board of Trustees
L. D. HOLMES, Chairman ........................................ Johnston
ROBERT R. COKER .................................................. Hartsville
WINCHESTER SMITH ................................................ Williston
T. KENNETH CRIBB .................................................. Spartanburg
FRANK J. JERVEY .................................................. Clemson

Administration
R. C. EDWARDS, B.S., LL.D .................................. President
VICTOR HURST, PH.D ............................................. Vice President for Academic Affairs
S. M. WILLIS, PH.D ............................................... Dean of University Extension
W. H. WILEY, PH.D ............................................... Dean of the College of Agriculture and Biological Sciences
C. E. BOYD, D.V.M ................................................ Director, Livestock-Poultry Health Dept., Columbia
L. H. SENN, PH.D ................................................ Director, Division of Regulatory and Public Service Programs
O. B. GARRISON, PH.D ........................................... Director of Agricultural Experiment Station, Director of Research in Agriculture
J. E. HALPIN, PH.D .............................................. Associate Director of Agricultural Experiment Station
J. W. JONES, PH.D .............................................. Director of Resident Instruction
P. K. GABLE, Jr., B.S .............................................. Administrative Assistant, Agricultural Experiment Station and Resident Instruction
W. T. O’DELL, PH.D ............................................... Director of Extension
J. B. COPELAND, PH.D ........................................... Associate Director of Extension
G. H. Bonnette, B.S .............................................. Administrative Assistant, Extension Service
M. S. CELY, Jr., M.S .............................................. Coordinator, State Extension Management Information System
D. A. SHELLEY, B.S ................................................ Coordinator, Training, Development and Recruitment

Extension State Program Leaders
L. P. ANDERSON, PH.D ............................................ State Leader, Extension Agricultural Programs
G. H. BAKER, B.S .............................................. State Leader, 4-H and Youth Development Programs
RUBY M. CRAVEN, PH.D ........................................ State Leader, Extension Home Economics Programs
B. L. CUNNINGHAM, M.S ....................................... State Leader, Extension Special Programs

Extension Supervisors
L. B. MASSEY, B.S ................................................... District Agent, Piedmont District, Clemson
G. H. LIEBENROOD, M.Ed ................................... District Agent, Pee Dee District, Clemson
W. H. FUNCHESS, M.S ........................................... District Agent, Savannah Valley District, Clemson
CURTYS BALLENTINE, M.S .................................. Associate District Agent, Piedmont District, Clemson
ELIZABETH B. BERRY, B.S ................................... Associate District Agent, Savannah Valley District, Clemson
Sarah S. Knox, B.S .............................................. Associate District Agent, Pee Dee District, Clemson

Superintendents Branch Experiment Stations
Wayne R. Sitterly, Ph.D.— Truck Station, P. O. Box 3158, St. Andrews Branch, Charleston
D. F. COHOON, PH.D ........................................ P. O. Box C, Edisto Station, Blackville
J. B. PITNER, PH.D ............................................. P. O. Box 271, Pee Dee Station, Florence
W. H. RHODES, B.S ............................................ Sandhill Station, P. O. Box 1771, Columbia

Agricultural Chemical Services
N. R. PAGE, PH.D ................................................ Head of Department, Professor
J. S. Boswell, B.A ................................................ Chemist

* Teaching staff.
† Research staff.
College of Agricultural and Biological Sciences Staff

P. A. Bellew, B.S.† ......................................................... Chemist
Dorothy Brock † .......................................................... Chemist
V. O. Childers, B.S.† ..................................................... Chemist
J. T. Gillingham, Ph.D.† .............................................. Associate Chemist
B. L. Holst, B.S.† ......................................................... Chemist
N. J. LeMaster, B.S.† ................................................... Chemist
E. E. Leslie, B.S.† ......................................................... Chemist
W. R. McCaskill, M.S.† ................................................ Chemist
Mary Lee McCrackan, A.B.† .......................................... Chemist
J. J. Starnes, B.S.† ......................................................... Chemist

Agricultural Communications

R. C. Hubbard, Jr., M.S.†† .............................................. Head of Department, Editor
L. C. Hamilton, M.S.† .................................................. Extension Information Specialist
W. B. Earle, Jr.† .......................................................... Extension Artist
J. E. Kingman, B.A.† .................................................... Assistant Radio-Television Editor
J. R. Mattison, B.S.† ..................................................... Assistant Radio Editor
Ann Lee A. McPhail, B.A.†† ........................................ Assistant Radio-Television Editor
L. W. Riley †† .............................................................. Visual Instruction Editor
J. H. Rogers, B.A.† ....................................................... Associate Extension Editor
Doris A. Timmerman, M.S.†† ........................................ Assistant Home Economics Editor

Agricultural Economics and Rural Sociology

W. J. Lanham, Ph.D.†† ................................................... Head of Department, Professor
L. M. Bauknight, M.S.ª ................................................ Professor
V. A. Boyd, M.S.A.ª ...................................................... Associate Professor
T. A. Burch, M.S.† ........................................................ Assistant Agricultural Economist
C. P. Butler, M.S.† ........................................................ Agricultural Economist (USDA)
A. B. Carroll, Ph.D.ª ................................................... Associate Professor
D. E. Crawford, M.S.† .................................................. Associate Agricultural Economist
R. K. DeHaven, Ph.D.ª ................................................. Assistant Professor
B. L. Dillman, Ph.D.ª ................................................... Associate Professor
W. I. Golden, Ph.D.†† ................................................... Associate Professor and Principal Extension Specialist
J. C. Hite, Ph.D.ª .......................................................... Assistant Professor
J. W. Hubbard, Ph.D.ª ................................................ Associate Professor
O. W. Lloyd, M.S.† ...................................................... Associate Extension Specialist (Community and Resource Development), Principal Specialist
T. M. Long, Jr., M.S.† .................................................... Extension Assistant (Marketing)
M. I. Loyd, M.S.†† ....................................................... Associate Extension Specialist (Marketing)
J. S. Lytle, Ph.D.ª ....................................................... Assistant Professor
J. W. McAlhany, M.S.† ............................................... Extension Assistant (Marketing)
J. V. McElveen, M.S.† .................................................. Agricultural Economist (USDA)
E. L. McLean, Ph.D.†† .................................................. Assistant Professor
L. D. Malphrus, Ph.D.† ................................................ Associate Professor
J. F. Miles, Ph.D.† ........................................................ Associate Professor
W. O. Mizelle, Jr., M.S.†† .............................................. Extension Assistant (Marketing)
J. E. Nix, M.S.† .......................................................... Agricultural Economist (USDA)
J. F. Pittman, Ph.D.†† ................................................... Principal Extension Specialist (Marketing)
M. C. Rochester, Ph.D.† ............................................... Extension Specialist
E. W. Siedschlag, A.B.† ................................................ Assistant Extension Specialist (Marketing), Columbia
L. J. Smith, M.S.†† ...................................................... Research Assistant (Marketing)
H. C. Spurlock, Ph.D.ª ............................................... Associate Professor
J. M. Stepp, Ph.D.ª ..................................................... Alumni Professor
M. H. Sutherland, M.S.† .............................................. Associate Extension Specialist
J. S. Taylor, B.S.† ........................................................ Agricultural Statistician, Columbia (USDA)

* Teaching staff.
† Research staff.
‡ Extension staff.
G. R. von Tungeln, M.S.†† .......................................... Associate Professor
C. H. Whitworth, B.S.A.†  Agricultural Statistician, Columbia (USDA)
P. S. Williamson, M.S.‡  Associate Extension Specialist

Agricultural Education

L. H. Davis, Ph.D.®  Head of Department, Professor
W. C. Bowen, M.S.®  Associate Professor
E. T. Carpenter, Ed.D.®†  Associate Professor
J. A. Hash, Ed.D.®  Assistant Professor
A. K. Jensen, Ph.D.®  Associate Professor
F. E. Kirkley, M.S.®  Associate Professor

Agricultural Engineering

A. W. Snell, Ph.D.®‡†  Head of Department, Professor
J. C. Alphin, Ph.D.¶  Associate Professor, Pee Dee Station
W. A. Balk, B.S.¶  Associate Agricultural Engineer, Edisto Station
C. L. Barth, M.S.®  Associate Professor
J. B. Cocke, B.S.¶  Agricultural Engineer (USDA)
J. T. Craig, M.S.¶  Assistant Professor
D. G. Dickson, M.S.¶  Research Assistant
C. W. Doty, M.S.¶  Agricultural Engineer, Pee Dee Station (USDA)
T. H. Garner, Ph.D.®¶§  Professor
W. E. Garner, M.S.¶  Agricultural Engineer (USDA)
W. P. Gladden, B.S.¶†  Assistant Extension Specialist
F. H. Hedden, M.S.¶†  Associate Extension Specialist
C. E. Hood, Ph.D.®¶  Associate Professor
J. R. Lambert, Ph.D.®¶  Associate Professor
J. T. Ligon, Ph.D.®¶  Associate Professor
H. P. Lynn, M.S.¶  Associate Extension Specialist
M. C. McKenzie, B.S.¶  Extension Specialist, Principal Specialist
F. C. Patten, B.S.¶  Assistant Agricultural Engineer, Pee Dee Station
C. V. Privette, M.S.¶  Assistant Extension Specialist
E. B. Rogers, Jr., M.S.®¶  Associate Professor
B. K. Webb, Ph.D.®¶  Associate Professor
R. A. Wesley, B.S.¶  Agricultural Engineer (USDA)
W. K. Whitehead, M.S.¶  Research Assistant
J. M. Williams, M.S.¶  Agricultural Engineer (USDA)
T. V. Wilson, M.S.¶  Professor

Agronomy and Soils

U. S. Jones, Ph.D.®¶†  Head of Department, Professor
L. R. Allen, Ph.D.¶†  Associate Extension Specialist
D. A. Benton, B.S.¶  Associate Extension Specialist, Florence
C. C. Chen, Ph.D.¶  Visiting Professor
G. R. Craddock, Ph.D.®¶  Professor
T. W. Culp, Ph.D.¶  Research Agronomist (USDA)
R. E. Currin III, M.S.¶  Assistant Professor, Pee Dee Station
E. B. Eskew, M.S.®¶  Associate Professor
Z. T. Ford, B.S.¶  Associate Agronomist, Pee Dee Station (USDA)
A. D. Fore, B.S.¶  Assistant, Pee Dee Station
P. B. Gibson, Ph.D.¶  Research Agronomist (USDA)
B. J. Gossett, Ph.D.®¶  Associate Professor
W. D. Graham, Jr., Ph.D.®¶  Assistant Professor
D. C. Harrell, B.S.¶  Associate Agronomist, Pee Dee Station (USDA)
F. M. Harrell †  Supervisor, Pee Dee Station
L. H. Harvey, Ph.D.®‡†  Extension Specialist
C. M. Jones, Ph.D.®  Professor
M. W. Jutras, Ph.D.®¶  Associate Professor
K. S. LaFleur, Ph.D.®¶  Associate Professor

* Teaching staff.

* Teaching staff.
† Research staff.
‖ Extension staff.
†† Part time.
Home Economics
Veronica D. Carmack, M.S.‡ Assistant Extension Specialist (Home Management)
Rose J. Davis, M.S.‡ Associate Extension Specialist (Nutrition)
Marie S. Hindman, M.S.† Extension Specialist (Nutrition)
Ursula A. Holahan, M.S.† Extension Specialist (Clothing)
Frances H. Odom, M.S.† Extension Specialist (Housing)
Julia B. Taylor, M.S.‡ Extension Specialist (Home Furnishings)

Horticulture
T. L. Senn, Ph.D.¶ †‡ Head of Department, Professor
W. C. Barnes, Ph.D.‡ Professor, Truck Station
R. A. Baumgardner, Ph.D.¶ †‡ Associate Extension Specialist
Guy L. Buckner‡ Horticultural Assistant, Truck Station
W. P. Cook, M.S.‡ Assistant Extension Specialist
J. H. Crawford, M.S.‡ Assistant Horticulturist
D. O. Ezell, Ph.D.¶ †‡ Assistant Extension Specialist
R. J. Ferree, M.S.† Extension Specialist, Principal Specialist
J. P. Fulmer, M.S.¶ †‡ Assistant Professor
C. E. Gambrell, Jr., M.S.¶ †‡ Assistant Horticulturist, Sandhill Station
M. G. Hamilton, Ph.D.¶ †‡ Associate Professor, Edisto Station
M. B. Hughes, Ph.D.¶ †‡ Professor, Edisto Station
C. R. Johnson, Ph.D.¶ †‡ Assistant Professor
E. V. Jones, M.S.¶ †‡ Associate Extension Specialist
W. S. Jordan, Ph.D.¶ †‡ Assistant Professor
F. B. Ledeboer, Ph.D.¶ †‡ Assistant Professor
J. A. Martin, B.S.¶ †‡ Associate Professor
W. L. Ogle, Ph.D.¶ †‡ Professor
H. J. Sefick, M.S.¶ †‡ Associate Professor
E. T. Sims, Jr., Ph.D.¶ †‡ Associate Professor
B. J. Skelton, Ph.D.¶ †‡ Associate Professor
G. E. Stembridge, Ph.D.¶ †‡ Associate Professor
F. W. Thode, M.S.¶ †‡ Associate Professor
L. O. Van Blaricom, M.S., Ch.E.¶ †‡ Professor

Plant Pathology and Physiology
W. M. Epps, Ph.D.¶ †‡ Head of Department, Professor
P. A. Backmon, Ph.D.¶ †‡ Plant Pathologist (USDA)
O. W. Barnett, Ph.D.¶ †‡ Assistant Professor
L. W. Baxter, Ph.D.¶ †‡ Professor
C. W. Blackmon, Ph.D.¶ †‡ Assistant Professor, Edisto Station
N. D. Camper, Ph.D.¶ †‡ Assistant Professor
D. F. Cohoon, Ph.D.¶ †‡ Superintendent and Professor, Edisto Station
W. M. Dowler, Ph.D.¶ †‡ Lecturer, Plant Pathologist (USDA)
R. A. Flowers, Ph.D.¶ †‡ Associate Extension Specialist (Plant Pathology)
T. W. Graham, Ph.D.¶ †‡ Plant Pathologist, Pee Dee Station (USDA)
J. E. Halpin, Ph.D.¶ †‡ Professor
G. C. Kingsland, Ph.D.¶ †‡ Associate Professor
W. C. Nettles, M.S.¶ †‡ Principal Extension Specialist—Entomology and Plant Pathology
W. R. Sitterly, Ph.D.¶ †‡ Superintendent and Professor, Truck Station
F. H. Smith, Ph.D.¶ †‡ Associate Extension Specialist—Plant Pathology
Wesley Witcher, Ph.D.¶ †‡ Professor
E. I. Zehr, Ph.D.¶ †‡ Assistant Professor

Plant Pest Regulatory Service
L. H. Senn, Ph.D.¶ †‡ Head of Department, State Entomologist
W. M. Epps, Ph.D.¶ †‡ State Plant Pathologist
R. C. Fox, Ph.D.¶ †‡ Professor

* Teaching staff.
† Research staff.
‡ Extension staff.
§ On leave.
412 Public Service Activities

D. M. Gaydon, M.S. † Assistant Entomologist
F. J. Howard, Jr., M.S. † District Entomologist
V. H. McCaskill, M.S. † Assistant Entomologist
J. E. McDonald, B.S. † Entomology Assistant
L. R. Morgan, B.S. † Entomology Assistant
D. C. Weeks, M.S. † District Supervisor
Wesley Witcher, Ph.D. ‡ Associate Professor

Poultry Science

B. D. Barnett, Ph.D. ‡ Head of Department, Professor
B. W. Bierer, V.M.D. ‡ Professor, Laboratory Director, Columbia
M. A. Boone, Ph.D. † Professor
J. B. Cooper, M.S. † Associate Professor
J. E. Jones, Ph.D. ‡ Assistant Professor
C. F. Risher, B.S. † Associate Extension Specialist, York
J. Solis, Ph.D. ‡ Assistant Professor
T. C. Stewart, Sr., B.S. † Associate Extension Specialist
D. E. Turk, Ph.D. ‡ Associate Professor
W. S. Walker, M.Ed. † Associate Extension Specialist, Columbia
J. F. Welter, M.S. † Assistant Extension Specialist

Seed Certification

R. H. Garrison, B.S. † Head of Department, Associate Plant Breeder
J. O. Black, Jr., M.S. † Seed Certification Specialist
R. A. Jameson, M.S. † Seed Certification Specialist

COLLEGE OF FOREST AND RECREATION RESOURCES STAFF

Wm. H. Davis McGregor, Ph.D. Dean
Herbert Brantley, Ph.D. Associate Dean

Forestry

R. M. Allen, Ph.D. ‡ Head of Department, Professor
W. J. Barker, B.S. † Principal Extension Specialist
M. H. Bruner, M.F. ‡ Associate Professor
B. M. Cool, Ph.D. ‡ Professor
T. E. Gaylord, B.S.F. † Assistant in Forestry
N. B. Goebel, M.F. † Associate Forester
C. L. Lane, Ph.D. ‡ Assistant Professor
K. Lehotsky, Ph.D. ‡ Professor
A. C. Malcolm, M.F. † Assistant Extension Specialist
S. A. Marbut, B.S. † Associate Extension Specialist
L. D. Reamer, M.S. † Assistant in Forestry
R. E. Schoenike, Ph.D. ‡ Associate Professor
W. A. Shain, Ph.D. ‡ Associate Professor
A. T. Shearin, M.S. † Baruch Resident Research Forest Manager
J. R. Warner, D.F. ‡ Professor
T. E. Wooten, Ph.D. ‡ Assistant Professor

* Teaching staff.

THE SOUTH CAROLINA AGRICULTURAL EXPERIMENT STATION

The South Carolina Agricultural Experiment Station is the research branch of the College of Agriculture and Biological Sciences. The nucleus of its research planning and efforts are performed by scientists in 16 departments and two special units located on the campus at Clemson. Each department conducts specific research projects in its own field. The findings from these projects are made known to the public through special publication and news releases. Five branch experiment stations, each located in a different area of the state, operate as separate units under the direction and organization of the Clemson station.

The goal of the station is to provide, through research, needed materials, techniques, and information which can result in more effective agricultural production and marketing. The farmer's work can be made easier, cheaper, and more profitable by applying the information obtained through research designed to learn what effect current farm practices have on the financial return he gets. Newer agricultural methods, not yet put into use by farmers, are also studied with the appropriate release of findings.

The opportunity is available, to a limited number of undergraduate students in most of the departments, to work and gain experience in research methods and procedures. Many of the departments also offer Graduate Research Assistantships to students interested in working on a research program while pursuing a graduate degree program in the corresponding discipline.

Laboratories of the station are open for inspection by students, farmers, and the public in general. Information may be requested on any specific problem encountered in Agriculture by writing to the station Director. A full report of the work and expenditures of the South Carolina Agricultural Experiment Station is published annually. This and other publications of the station will be sent, upon request, free of charge.

REGULATORY AND PUBLIC SERVICE PROGRAMS

The Division of Regulatory and Public Service Programs functions as one of the five divisions in the College of Agriculture and Biological Sciences and includes the Departments of Fertilizer Inspection and Analysis, Seed Certification and Foundation Seed, and Plant Pest Regulatory Service.

Fertilizer Inspection and Analysis

The Fertilizer Inspection and Analysis Department is organized under the Regulatory and Public Service Programs Division of the
College of Agriculture and Biological Sciences. The inspecting and analyzing of fertilizer began as early as 1893. Responsibilities of the Department include procuring official samples and analyzing them to see that the guaranteed analysis has been met and inspecting for proper bag printing and weights of fertilizer. Before any fertilizer is offered for sale in South Carolina, it must be registered with the Fertilizer Inspection and Analysis Department. The department head, two inspectors, and six part-time inspectors, who are also deputized as economic poison inspectors, visit all fertilizer and pesticide manufacturing plants. Samples are procured at plants, farms and dealers' warehouses and, as far as possible, in proportion to the sales of individual companies. Functions of the department not only afford consumer protection, but also assist the fertilizer industry in quality control.

Some 6,000 fertilizer samples and 1,800 to 2,000 economic poison samples are procured annually. Normally, the percentage of samples deficient in analysis for fertilizers is in the 8 to 12 percent range, with refunds amounting to some $79,000. The penalty refund is made to the ultimate user. In the case of a deficiency in nitrogen, the penalty is three times the actual value of the shortage, while for phosphoric acid and potash it is four times the value of the shortage.

The Annual Bulletin contains the following principal items: Fertilizer usage data; the average analytical findings by brand and grades of those samples meeting the guarantee and those not meeting the guarantees. The names, addresses and telephone numbers of all inspectors are also listed.

Fertilizer usage data are very useful to fertilizer manufacturers and government agencies in evaluating sales and educational programs as well as establishing trends on which to base future fertilizer manufacture.

The Agricultural Chemical Services Department performs the analytical work for both fertilizers and economic poisons.

**Foundation Seed and Seed Certification**

The South Carolina Foundation Seed Association is charged with the responsibility of increasing breeder seed of adapted Experiment Station and USDA varieties to foundation and registered seed in order that seedsmen and farmers might obtain these varieties at the earliest possible time. There are 18 crops and 51 varieties in the Foundation Seed Program.
The South Carolina Crop Improvement Association inspects and certifies for farmers where foundation and registered seed is planted in order that certified seed can be produced.

The South Carolina State Crop Pest Commission (Plant Pest Regulatory Service)

The State Crop Pest Act was passed by the legislature in 1912 and designated five members of the Board of Trustees of Clemson University to compose the South Carolina State Crop Pest Commission.

The purpose of the act is to prevent, as far as possible, the introduction into South Carolina of injurious plant pests and to limit the spread of those already within the state. The Commission is also charged with the enforcement of the South Carolina Economic Poisons Law, the Bee Disease Act, and the Abandoned Orchard Act.

The work is performed by the promulgation and enforcements of certain rules, regulations and quarantines which, in the judgement of the Commission, are necessary to protect the agricultural interests of South Carolina.

The State Entomologist, the State Plant Pathologist, and their agents are responsible for the enforcement of the regulations and have been designated by the Commission as the Plant Pest Regulatory Service.

THE CLEMSON UNIVERSITY EXTENSION SERVICE

The Clemson University Extension Service is a branch of Clemson University and is a cooperative service supported by the counties, the State, and the Federal government. The Extension Service is responsible for conducting, with all people of South Carolina, the cooperative educational and demonstration programs in agriculture and home economics of Clemson University and the United States Department of Agriculture.

The function of the Extension Service is to make available to farmers, homemakers, and rural boys and girls, through on-the-farm service, demonstrations, meetings, newspaper articles, publications, radio and television broadcasts, and other suitable methods, the results of research and successful farm and home experiences. The Service also assists, through interpretation, practical demonstrations and otherwise, in applying and using this information to improve farms, farm homes, and communities, to the end that a safe, sound, and progressive rural life and agriculture may be built.
The annual plan of agricultural and home economics extension work is developed and carried out with close cooperation between the Extension Service and the farm and home leadership of the State, the counties, and the rural communities and neighborhoods.

The Staff of Cooperative Extension Workers includes the director, associate director, an administrative assistant, a coordinator for training, development and recruitment, a coordinator for the Extension Management Information System, 5 state program leaders, an assistant to the state home economics leader, 3 district supervisory agents, 3 associate district supervisory agents, 46 county agents, 46 county home economists, 56 associate county agents, 18 associate home economists, 52 assistant county agents, 52 assistant home economists, 10 area agents, and 78 specialists in agricultural economics, home economics, agricultural engineering, agronomy, 4-H club work, dairying, crop insects and diseases, cotton ginning, forestry, horticulture, animal science, marketing, poultry and turkeys, publications, community and resource development, soil conservation, visual instruction, and television.

**LIVESTOCK-POULTRY HEALTH DEPARTMENT**

The Clemson University Livestock-Poultry Health Department is consolidated under one Director with the United States Department of Agriculture, Agricultural Research Service, Animal Disease Eradication Division, and is known as the State-Federal Livestock Disease Eradication Program. This department is charged with the control and eradication of contagious, infectious and communicable diseases of livestock and poultry, and with the inspection of meat and meat by-products at slaughtering and processing plants under state inspection. When requested, investigations are made, consultations are held and assistance in diagnosis is rendered. This department further organizes, develops, and carries on education programs for the control and eradication of diseases. Quarantine measures are employed to prevent, as far as possible, the introduction or spread of livestock diseases into this state.

The Clemson Livestock Laboratory, a fully equipped modern laboratory staffed with highly trained personnel, is maintained 14 miles northeast of Columbia on U. S. Highway No. 1, at the site of the Sandhill Experiment Station. This laboratory is prepared to assist veterinarians and owners of livestock and poultry in making postmortem laboratory examinations and bacteriological and pathological studies to aid in the diagnosis of diseases. If necessary, suf-
Public Service Activities

Sufficient equipment can be sent into the field to diagnose and control disease on the spot.

The administrative office is located in the Livestock Laboratory. Adequate records and identification of livestock are kept. A staff of veterinarians works from the Columbia office, and field veterinarians are located in various sections of the State. In addition to the regular field force of veterinarians directly connected with the Columbia office, practicing veterinarians are commissioned as State-Federal Accredited Veterinarians and assist in the eradication of infectious diseases of livestock. At present there are 146 veterinarians so commissioned and their locations are such that the Clemson University Livestock-Poultry Health Department is in a position to control and eradicate disease promptly and completely in all sections of the State.

This department is required by legislative enactment and supported by legislative appropriation.

THE OFFICE OF ENGINEERING RESEARCH

The Office of Engineering Research of Clemson University was established in the College of Engineering in July 1962. Its purpose is to coordinate and stimulate the research activities in the College of Engineering. These activities include the contribution of new knowledge in engineering science by prosecuting a vigorous program of basic research, the conduct of programs of developmental and applied research as a service to the industries of the State, and the determination of uses for the material resources of the State and thereby to encourage the growth of new industries.

The active research staff consists essentially of the faculty members of the College of Engineering and other divisions of the University. The laboratories of all departments, as well as the newly constructed 60,000-square-foot Rhodes Engineering Research Center, are available to the Office of Engineering Research in its investigations.

Research is the foundation for progress in a modern society. The well-equipped physical facilities and the thoroughly competent professional staff available to the Office of Engineering Research constitute extremely valuable resources for continuing and expanding this research effort.
Seminars, workshops, symposiums, institutes, short courses, and conferences are conducted for engineers of South Carolina and neighboring states. These activities are designed to keep the engineer abreast of changes in modern technology through a non-credit continuing engineering education program sponsored by the Departments of the College of Engineering and coordinated by the Office of Industrial and Municipal Relations.

All engineering departments participate in the Junior Engineers’ Scientists’ Summer Institute (JESSI) in which talented high school students receive a 2-week orientation in the Sciences and Engineering.

Refresher courses are coordinated for the National Engineer-in-Training and the Professional Engineer examinations for engineers employed in the Piedmont region of South Carolina.

With the assistance and support of the Department of Environmental Systems Engineering, continuing education programs in environmental control are made available to state, county and municipal agencies and professional organizations such as the South Carolina Water and Pollution Control Association. These programs take various forms, such as the writing of correspondence manuals for water and wastewater treatment plant operators, and conducting schools, workshops and seminars on various topics in environmental control for both the practicing technician and the official charged with the program administration. A national workshop has been co-sponsored with the Federal Water Pollution Control Administration on “Educational Systems for Operators of Water Pollution Control Facilities.”
THE OFFICE OF PROFESSIONAL DEVELOPMENT
AND INDUSTRIAL RELATIONS

COLLEGE OF INDUSTRIAL MANAGEMENT
AND TEXTILE SCIENCE

One-fourth of the population of the United States will go back to school this year. More and more people including educators, have abandoned the idea that education is something that takes place during a block of time between six and eighteen (or twenty-two). It is lifelong.

The Professional Development Program is one answer to this “fourth dimension” of education. Now over thirteen years old, the program has served over 1,500 persons in one- and two-week long seminars plus hundreds more in various one- and two-day short courses.

The primary aim of the program is to provide a means and a place for business and industrial people from all levels and all areas to come back to the campus and retread their professional skills, to learn new ones, and to sharpen up old ones in the labs, classroom and during “midnight oil” sessions with other professionals.

Drawing on the full resources and faculty of Clemson University, the Professional Development Program for 1969 offered courses from introductory management to high level computer technology. It served an enrollment from 22 different states and two foreign countries, who represented 101 various business and industrial firms. The staff and faculty were secured from 10 different states and represented 5 universities and 25 different corporations.

A high percentage of participants in several of these courses already held their Ph.D., while quite a few had not completed their baccalaureate programs. This further emphasized the realization among professional people that “learning knows no age limit, nor does it know any skill level.”

COLLEGE OF EDUCATION

The College of Education offers a variety of professional services to educational agencies.

OFFICE OF EDUCATIONAL SERVICES

The Office of Educational Services was established in the College of Education in August 1969. In broad terms, its mission is to focus the resources of the University upon problems and needs of
public school systems. Among the activities implied in this mission are (1) assisting school systems with their teacher-recruitment programs, (2) assisting school systems with their in-service training needs, (3) cooperating with other institutions of higher education in teacher-education programs.

In-service training needs of school systems may be met either through recommending and arranging consultants for short-term programs, or through the establishing of specially designed courses taught in the school district. These courses include subject areas as well as professional courses required for certification.

The Office of Educational Services also distributes applications for teacher certification in South Carolina and coordinates the administration of the National Teacher Examination in western South Carolina.

Inquiries about the Office of Educational Services activities should be directed to Dr. Myrton A. Packer, Coordinator of Educational Services, College of Education, Godfrey Hall, Clemson University, Clemson, South Carolina 29631.

The following is an official record of the Special Institute courses conducted by the College of Education.

**Abbeville School District #50**

Summer—1970  
Ed 735—Curriculum  .. Dr. Joseph W. Davis
Fall—1970  
Ed 734—Human Growth and Development—  Dr. Joseph W. Davis
Ed 734—Group Action in Administration—  Dr. John Stevenson

**Anderson District #1**

Summer—1970  
Ed 762—Reading Diagnosis and Remediation—  Dr. Jean Hice
Ed 863—Practicum in Reading  .. Dr. Jean Hice

**Anderson District #2**

Fall—1969  
Ed 733—Secondary Education (Reading Diagnosis & Remediation)  .. Dr. Gordon Gray
Spring—1970  
Ed 732—Methods and Materials of Teaching Reading  .. Mrs. E. Galloway
Ed 734—Special Institute Course (Group Action in Administration)  .. Dr. William Pennscott
Summer—1970  
Ed 732—Special Institute Course (Fundamentals of Basic Reading)  .. Mrs. E. Galloway
Ed 863—Practicum in Reading  .. Dr. Gordon Gray
Fall—1970  
Ed 662—Reading Diagnosis and Remediation—  Dr. Gordon Gray
Ed 634—Group Action in Administration—  Dr. William Pennscott
Ed 673—Teaching the Mentally Retarded  .. Dr. Wieters
Anderson District #4

Fall—1970
Ed 662—Reading Diagnosis and Remediation—
Dr. Everett Putney

Anderson District #5

Summer—1968
Ed 462/762—Reading Diagnosis and Remediation—
Dr. Joseph Culhane
Ed 487/787—Methods and Materials of Speech Improvement 
Mrs. Edith Shelton

Summer—1969
Ed 432/732—SIC Elementary School (Art in the Elementary School) 
Mrs. Jean Williams
Ed 433/733—SIC Secondary School (Voice and Diction) 
Mr. James M. Dorris
Ed 432/732—SIC Elementary School (Teaching Mathematics) 
Mrs. Betty Riechert
Ed 434/734—SIC Current Problems in Education (Problems in Teaching Reading) 
Dr. Gray

Fall—1969
Ed 434/734—SIC Secondary Education (Adolescent Growth and Development) 
Dr. Chester R. Freeze

Spring—1970
Ed 732—SIC Elementary School (Arts & Crafts in the Elementary School) 
Dr. W. W. West
Ed 797—SIC Audio-visual Aids in Education—
Dr. R. Benson

Summer—1970
Ed 732—SIC Elementary Education (Teaching Reading in the Elementary School)
Ed 732—SIC Elementary Education (Teaching Social Studies in the Elementary School) 
Dr. O'Tuel
Ed 733—SIC (New Trends in Secondary English) 
Dr. John Idol
Ed 733—SIC (Teaching English to Slow Learners) 
Mr. N. B. Somers

Fall—1970
Ed 881—Individual Testing 
Dr. Jack Harris

Commission on Higher Education

Spring—1970
Ed 436/736—Supervision 
Dr. L. L. Byrd

Summer—1970
Ed 732—Advanced Elementary School Methods—
Dr. Oren McClure
Ed 735—Individual and Program Evaluation—
Dr. Oren McClure

Greenwood (ESEA Region III)

Summer—1969
Ed 431/731—SIC Early Childhood Ed. (Growth and Development) 
Dr. Jack Harris
Ed 431/731—SIC Early Childhood Ed. (Practicum) 
Mrs. Anne Stafford

Fall—1969
Ed 431/731—SIC Early Childhood Ed. (Curriculum for Early Childhood Education) 
Dr. Jack Harris

Spring—1970
Ed 431/731—SIC Early Childhood Ed. (Methods & Materials for Early Childhood) 
Dr. Thomas Parry
Agricultural Education. The members of the staff of Agricultural Education visit all beginning teachers for the purpose of assisting them on the job and also for the purpose of collecting information which may prove helpful in improving the work of teacher education at the University. In addition, conferences of teachers are held and consulting services made available in the interest of the professional growth of agricultural teachers, the rendering of service to agricultural communities, and the development of leadership among agricultural youth through the program of the Future Farmers of America.
Information concerning any phase of the in-service education activities in Agricultural Education may be secured by contacting the Head, Department of Agricultural Education, Clemson University.

**Trades and Industrial Education.** The University, in cooperation with the State Department of Education, is glad to assist those who teach vocational subjects in day trade schools and evening trade and industrial classes by supplying a trained man to assist in the work of organizing classes, organizing courses of study, making plans for teaching evening classes, and actually teaching vocational subjects. Requests for information regarding this service should be addressed to Dr. A. F. Newton, Head, Department of Industrial Education, Clemson University, Clemson, South Carolina 29631.

---

**THE SOUTH CAROLINA RESEARCH COORDINATING UNIT FOR VOCATIONAL EDUCATION**

The South Carolina Research Coordinating Unit for Vocational Education is a cooperative venture of Clemson University and the Office of Vocational Education, State Department of Education. The Unit was originally funded under a USOE Grant in 1966. Research Coordinating Unit personnel are currently engaged with educational agencies in survey activities to aid realistic educational programming, research and developmental activities to improve guidance services, development of educational programs to enhance effectiveness of education for disadvantaged youth, and research and developmental activities to impact on the dropout problem. Consultant services are available together with an active program of disseminating research findings to aid public schools interested in developing innovative techniques and approaches.

In cooperation with the Clemson University Library, the RCU has developed an outstanding collection of vocational education research materials. The library maintains a continuing subscription for all ERIC microfiche which are immediately available to all vocational education personnel in the state. This service is available through the RCU capability to duplicate the microfiche. Other research reports and related materials, together with curriculum materials are collected, cataloged and filed from across the Nation.

The RCU dissemination activities have focused on the information needs of teachers, supervisors, administrators, teacher educators and others within the state. Drawing upon the total resources of information systems including ERIC, DDC and DATRIX, a viable information system has been developed.
Other activities of the Research Coordinating Unit include providing technical assistance in research design and proposal preparation, evaluating vocational curriculum materials and equipment, participating in workshops for vocational personnel and developing research competencies. Requests for information and/or service should be addressed to Director, Research Coordinating Unit, Clemson University, Clemson, South Carolina 29631.

VOCATIONAL EDUCATION MEDIA CENTER

The Vocational Education Media Center was designed to prepare and produce instructional materials for all of the vocational education services in South Carolina. This involves all types of instructional materials that can be mass produced and distributed by the service to all teachers teaching the particular subject. The materials are produced in accordance with priorities established between the vocational service and the Vocational Education Media Center. The materials are then distributed by the vocational service.

When materials are distributed, members of the staff conduct workshops with the teachers regarding the utilization of the materials in their classes.

Materials consist of curriculum guides, overhead transparencies, slides, audio tapes, filmstrips and other visual and audio materials. At the present time, the Vocational Education Media Center serves agriculture, distributive education, home economics education, health education, office occupations and trades and industrial education.

For more information regarding this service, contact Director, Vocational Education Media Center, Clemson University, Clemson, S. C. 29631.

SHORT COURSES AND CONFERENCES

The facilities of the University are made available for special meetings, such as farm groups, rural ministers, religious organizations, and scientific societies; and arrangements are made for special short courses in poultry science, beekeeping, food preservation, cotton classing, dairy science, forestry, water supply and sanitation, ornamental nurseries, etc. Such activities, undertaken in the interest of the general welfare, are encouraged by the University.

CERAMIC ENGINEERING FORUM

The Ceramic Engineering Department, in cooperation with North Carolina State University, sponsors an annual Ceramic Engineering
Forum for Ceramic Manufacturers of the Southeast. The meeting place alternates between Clemson University and North Carolina State. This meeting is intended to provide the latest scientific and engineering developments pertinent to Ceramic Manufacturers and to provide a forum for the stimulation of creative thinking.

THE CLEMSON FOREST

This forest area of approximately 17,500 acres lies immediately adjacent to the Clemson University campus. It is a teaching, research, and demonstration facility of the College of Forest and Recreation Resources, and is used extensively as an outdoor laboratory. Numerous research plots and demonstrations are located in the forest, which is an outstanding asset in teaching multiple-use forest resource management.

MASTERS' DEGREES CONFERRED MAY 8, 1970

COLLEGE OF AGRICULTURE AND BIOLOGICAL SCIENCES

MASTER OF SCIENCE

Agronomy
Benjamin Crane Morton, Jr. Pendleton

Animal Science
Samuel Baylis Shackelford, Jr. Spartanburg

Entomology
John Chapman Morse Winston-Salem, N. C.

Forestry
Bobby Lamar Lanford Woodruff

Horticulture
Joseph Frank Garofalo Tickfaw, La.
Alex Joseph Kish Youngstown, Ohio
Archie Jefferson Lewis III McCormick

Microbiology
Donald Lyle Ewert Inkster, Mich.

Poultry Science
Virgil Ernest Kummero, Jr. Fort Worth, Texas

Zoology
Laura Freeman Bishop Dahlonega, Ga.

COLLEGE OF ARCHITECTURE

MASTER OF CITY AND REGIONAL PLANNING
Michael Keith Bantz North Charleston

COLLEGE OF EDUCATION

MASTER OF AGRICULTURAL EDUCATION
(Agricultural Education is jointly administered by the College of Agriculture and Biological Sciences and the College of Education.)

Everett Joseph Butler Lexington

MASTER OF EDUCATION

John William Caldwell Greenville
Lewis Paul Coffey Blowing Rock, N. C.
Martha Ledbetter Daniels Belton
Anne Beall Godbee Ft. Walton, Fla.
James Irby Hightower, Jr. Greer
John Robert Hilley Greenwood

Frances Cheatham James McCormick
Johnnie Campbell Lowry Pelzer
Richard Leon Mobley Savannah, Ga.
Rebecca Burgess Murray Greenback, Tenn.
Sara Martin Thornton Anderson
Margaret Monroe Wagener Clemson

MASTER OF INDUSTRIAL EDUCATION
Micah John LaRoche III Wadmalaw Island

COLLEGE OF ENGINEERING

MASTER OF SCIENCE

Bioengineering
Tommy Lee Bridges Greenville

Francis Martin King, Jr. Greenville
Student Register 443

Ceramic Engineering
Robert Lane Mitchell  Atlanta, Ga.

Chemical Engineering
William Daniel Holder  Greenwood  William Macon Sheppard  Orangeburg
Ferald Paul Peterson  Syracuse, Ind.  Dave Robinson Stokely, Jr.  Kingsport, Tenn.

Civil Engineering
Jim David Rabon  Aynor

Electrical Engineering
Raymond Rees Glenn  Barberton, Ohio

Engineering Mechanics
Joseph George Neuwirth  Greenville

Materials Engineering
Furman Houston Brown  Laurens

Mechanical Engineering
James Alexander Fowler  Bennettsville  Thomas Andy Grizzle  North Charleston

Water Resources Engineering
Robert Fredrick Edmonds, Jr.  Pickens

COLLEGE OF INDUSTRIAL MANAGEMENT AND TEXTILE SCIENCE

MASTER OF ARTS
Economics
Andy Hubbard Barnett  Westminster

MASTER OF SCIENCE
Management
----------------------------------  ----------------------------------  McKeesport, Pa.

Textile Chemistry
Carroll Monroe Carter, Jr.  Lumber City, Ga.  Hsuan-wen Sabrina Wu  Taipei, Taiwan

Textile Science
Pierre Lucien Seveno  Lachute, Quebec

COLLEGE OF LIBERAL ARTS

MASTER OF ARTS
English
Edythe Rutherford Lambert  Clemson

COLLEGE OF PHYSICAL AND MATHEMATICAL SCIENCES

MASTER OF SCIENCE
Chemistry
James Francis Cope  Greenville

Mathematics
Alexia Broughton Latimer  Columbia  Nicholas Mark Stavrakas  Charlotte, N. C.
Julia Karlton Polk  Hammond, La.  Becky Joyner Tallon  Nashville, N. C.

Physics
Charles Edward Kennedy II  Roanoke, Va.
DOCTORS' DEGREES CONFERRED MAY 8, 1970

COLLEGE OF AGRICULTURE AND BIOLOGICAL SCIENCES

DOCTOR OF PHILOSOPHY

Animal Physiology

Thomas Mikell Leland
B.S., Presbyterian College; M.S., Clemson University
Dissertation: The Fine Structure of Lutein Cells from the Cyclic and Pregnant Bovine

Entomology

Robert Rhea Nash
A.B., Wesleyan Methodist College; M.S., Clemson University
Dissertation: Isocitrate lyase activity in the alfalfa weevil, Hypera postica (Gyllenhal), during summer diapause

Robert Irving Van Hook, Jr.
B.S., Clemson University
Dissertation: Energy and nutrient dynamics of predator and prey arthropod populations in a grassland ecosystem

Plant Pathology

Harley Furman Cantrell
B.S., Furman University; M.S., N. C. State College of A&E at University of North Carolina
Dissertation: The Effects of Temperature and pH on Growth, Physiology, and Metabolic Activities of Pythium irregulare and Pythium vexans

COLLEGE OF ENGINEERING

DOCTOR OF PHILOSOPHY

Engineering

Clifford Noel Click
B.Ch.E., Ohio State University; M.S., University of Toledo
Dissertation: Some Critical Factors Relating to the Performance of a Pilot-Sized Deep Facultative Lagoon (Field of Specialization: Bioengineering)

William Jay Huffman
B.S., West Virginia University; M.S., Clemson College
Dissertation: The Effect of Forced and Natural Convection During Ultrafiltration of Protein-Saline Solutions in Thin, Horizontal Channels (Field of Specialization: Chemical Engineering)

Calvin Boyd Parnell, Jr.
B.S., New Mexico State University; M.S., Clemson University
Dissertation: Electrostatic Force and Charge on Cotton Fibers As Influenced by Absolute Humidity, Dry Bulb Temperature, Fiber Length, and Electric Field Intensity (Field of Specialization: Environmental Systems Engineering)

James Harvey Turner
B.S., M.S., University of Maine
Dissertation: Fluid Bed Adsorption of Low Concentrations of Sulfur Dioxide in Air Onto Activated Carbon (Field of Specialization: Chemical Engineering)
COLLEGE OF INDUSTRIAL MANAGEMENT AND TEXTILE SCIENCE

DOCTOR OF PHILOSOPHY
Engineering Management
Elmer Earl Burch, Jr. .......................................................... Spartanburg
B.S., M.S., Clemson University
Dissertation: A Factor Analysis Model for Evaluating and Comparing Company Performance

COLLEGE OF PHYSICAL AND MATHEMATICAL SCIENCES

DOCTOR OF PHILOSOPHY
Chemistry
James Easton Hendrix ........................................................ Pensacola, Fla.
B.T.S., Alabama Institute of Technology; M.S., Clemson University
Dissertation: Thermal Degradation of Cellulose and Related Carbohydrates in the Presence of Selected Organic Phosphates

Homer Clyde Odom, Jr. ...................................................... Laurel, Miss.
B.A., University of Southern Mississippi
Dissertation: Synthetic Approaches to the Eremophilane Sesquiterpene Group

Philip Andrew Spanninger ................................................. Quakertown, Pa.
B.S., Philadelphia College of Textiles and Science; M.S., Clemson University

HONORARY DEGREES CONFERRED MAY 8, 1970

DOCTOR OF HUMANE LETTERS
Paul Hardin III ............................................................... Spartanburg, S. C.

DOCTOR OF LAWS
William Jennings Bryan Dorn ............................................ Greenwood, S. C.
States Rights Gist Finley ................................................... Lookout Mountain, Tenn.

DOCTOR OF SCIENCE
Edward Fred Knipling ...................................................... Arlington, Va.
BACHELORS' DEGREES CONFERRED AUGUST 8, 1970

COLLEGE OF AGRICULTURE AND BIOLOGICAL SCIENCES

BACHELOR OF SCIENCE

Agricultural Economics
Charles Michael Cornish  Greenville  Robert Marvin Segars  Darlington
Roger William Mudd  Bennettsville

Agronomy
Samuel David Bass, Jr.  Bennettsville  Willibough Wilkerson Whaley, Jr.  Marion
Bates Riley Houck  Cameron

Biology
Harvey Allan Brand  Charleston  Edward Francis Irick III  Columbia
Keith Darwin Chandler  North Charleston  Gary Thomas Moore  Sumter
Thomas Gratton Gambill  Fayetteville, N. C.  Kenneth William Schneider  Clifton, N. J.
Suzanne Elizabeth Harte  Beaufort  John Edward Settle, Jr.  Hopkins
James Morrison Hills, Jr.  Georgetown  Dale Lindenberg Theiling  Charleston

Dairy Science
Richard Francis Classey  Guelph, Ontario  Harvey Smith Peeler, Jr.  Gaffney
Henry Raymond Jameson  Orangeburg

Entomology
Richard Scott Needham  Milford, Conn.

Horticulture
Thomas Lewis Blake  Burgaw, N. C.  Frederick Post  Aiken
George Morrell  Matawan, N. J.

COLLEGE OF ARCHITECTURE

BACHELOR OF ARTS

Pre-Architecture
Emma Jean Jackson  Marion

BACHELOR OF SCIENCE

Building Construction
*William Everette Cline, Jr.  Elnora, N. Y.  Thomas Ferguson Rowand  Oaklyn, N. J.
Thomas Edwin Grimes III  Columbia  Donald Edward Rutland  North Augusta

BACHELOR OF ARCHITECTURE

Warren Willingham Gresham  Spartanburg  William Bailey Kauric  Columbia
Gregory Scott Hyatt  Wayne, Pa.  Peter Edwin Sherratt  Toms River, N. J.

COLLEGE OF EDUCATION

BACHELOR OF ARTS

Elementary Education
*Rachel Ann Byrd  Greenville  Sandra Stevens Harper  Clemson
Carole Rebecca Cone  Denver, Colo.  **Susan McCartney Shelton  Asheboro, N. C.
Secondary Education

Katherine DuPre Belcher — New Orleans, La.
Ruth Martha Lynn Butts ——— Westminster
William Ronald Cann ——— Anderson
*Janice Roberts Goldstein ——— Greenville

COLLEGE OF EDUCATION

MASTER OF EDUCATION

Elizabeth West Aiken  Easley
Charlotte Laverne Barrett  Selma, Ala.
Shirley Jean Bonham  Seneca
Helen Kaese Boucher  Rutherfordton, N. C.
Wilma Bonham Bowie  Chesnee
Samuel Major Brock  Hodges
Hattie Eugenia Burts  Laurens
Margaret Wright Cain  Sumter
Teryle Wilder Carpenter  Racine, Wis.
Shirley Couch Chappell  Williamson
Carl Thomas Cloer, Jr.  Jacksonboro, Tenn.
Katherine Shannon Devenny  Piedmont
William Ernest DeWitt  Darlington
William Clayton Dillard  Seneca
Nancy Anderson Glackin  Anderson
Margaret Lee Harden  Eastman, Ga.
Seth Schafer Heimlich  Timmonsville
Allan Lee Lang  Cincinnati, Ohio

Suzanne Florence Lehotsky  Clemson
Doris McMillan Littlejohn  Clemson
Thomas Wesley McGinity  Cowpens
Anne Knight Mullikin  Piedmont
Elizabeth Larsen Neumeister  Charleston
Sylvia Evans Nichols  Spartanburg
Roy Samuel Parker  Asheboro, N. C.
James Fredrick Reames, Jr.  Bishopville
Russell Gordon Rice, Jr.  Teaneck, N. J.
Sandra Floyd Riddle  Lake City
John Kelley Segars  Bishopville
Patricia Mae Snoddy  Greenville
Martha Nalley Stansell  Liberty
Elizabeth Lewis Stanzione  Hartsville
Barbara Ballentine Stuckey  Easley
Helen Ann Wild  North Charleston
Jane Williams Williams  Easley
Vivian Lee Wommack  Easley

MASTER OF INDUSTRIAL EDUCATION

Steward Lynwood Baylor  Kingstree
Richard Martin Cash  Cowpens

Harry Charles Golderer, Jr.  Brevard, N. C.
COLLEGE OF ENGINEERING
MASTER OF SCIENCE

Ceramic Engineering
David Taylor Ballenger  Gray Court

Civil Engineering
Fulton Vandiver Clinkscales, Jr. Greenville

Environmental Systems Engineering

COLLEGE OF INDUSTRIAL MANAGEMENT AND TEXTILE SCIENCE
MASTER OF ARTS
Economics
John Doyle Corbin Enka, N. C.

MASTER OF SCIENCE
Management
Samuel Boyd Daniels, Jr. Dillon
Frederick Francis Forte Utica, N. Y.
Theodore Edward Jones, Jr. Anderson
Robert Edward Pruett North Augusta

William Carl Smyre, Jr. Columbia
Harry Houston Whitfield, Jr. Greenville
Robert Ray Wilson Anderson

Textile Science
Roland Lee Connelly Spartanburg
John Thomas Dukes, Jr. Waterloo

COLLEGE OF LIBERAL ARTS
MASTER OF ARTS

History
Ralph William French Ithaca, N. Y.

COLLEGE OF PHYSICAL AND MATHEMATICAL SCIENCES
MASTER OF SCIENCE

Chemistry
Barry Rufus Edwards Greenwood
Ralph Bruce Ferguson Graniteville
David Jack Stanford Atlanta, Ga.

Mathematics
Angela Gannon Buzzett Atlanta, Ga.
Joanne Rea Duvall Salem, Ohio
Carolyln Claire Freeman Dahlonega, Ga.
Margaret McArthur Griffin Williston

Physics
Henry Baxter Odom III Florence
Ernest Webster Sawyer Sophia, N. C.

**Total Degrees Awarded 1896-1971** 24,454
ASSOCIATE AND BACHELORS' DEGREES CONFERRED
DECEMBER 17, 1970

COLLEGE OF AGRICULTURE AND BIOLOGICAL SCIENCES

BACHELOR OF SCIENCE

Agricultural Economics
Randal Larry Bell Greenville
Murray Joel Cormor Miami Beach, Fla.
Steve Radley Edwards Johnston

George Charles Manos Pennsauken, N. J.
*James Russell Sursavage Andrews, N. C.

Agronomy
*John Carrol Carrington Swansea
Thomas Davis Holstein Monetta

James Manly Kelley Darlington
Bradley Joel O’Neal Fairfax

Animal Science
John Calhoun Cornwell Chester
Horace David Gilliam, Jr. Pelzer
John Andrews Patterson Easley

Earle Rowland II Wedgesfield
Alice Tillman Woodside Columbia
Michael Clarens Workman Woodruff

Biology
James Luther Alverson, Jr. Pelzer
Robert Estes Bailey Eatontown, N. J.
George Wayne Brockington Columbia
William Thomas Brooks Decatur, Ga.
Charles Alan Collum Monetta
Dennis David Donohue Cedar Grove, N. J.
Marianne Eismann Greenville
Alexander Faulkner Fewell, Jr. Rock Hill
William Earl Fowler, Jr. Wadmalaw Island
David Ruple Hutto Orangeburg

James Arnold Lehmann North Charleston
Casper Fred Marcinak, Jr. McClellanville
Johnny Frederick Milton, Jr. Lake City, Fla.
Pau Charles Myers Winter Haven, Fla.
Charles William Pate Charleston
Everett William Siedschlag, Jr.
West Columbia
Geraldine Wojecik Stanford Marietta
Paul Nicholas Valeria Hamburg, N. Y.
Angus Hammett Warren Charleston

Dairy Science
Samuel Kirk McKeown Roebuck

Horticulture
James Cleveland Carey, Jr. Clemson
William Roger Crenshaw Clemson

*Louis Bernard Lynn Darlington

Poultry Science
Thomas Waring Acker Anderson

COLLEGE OF ARCHITECTURE

BACHELOR OF ARTS

Pre-Architecture
Jack O’Dell Walker Columbia

BACHELOR OF SCIENCE

Building Construction
John Howard Frank III Darlington

*Morris Rea Ritch III Charlotte, N. C.

BACHELOR OF ARCHITECTURE

Ira Vincent Hager Laurel, Del.
Robert Theodore Matthew, Jr.

--------------------------------- North Charleston
COLLEGE OF EDUCATION

BACHELOR OF ARTS

Elementary Education

*Peggy Marie Batson ............... Greenville
*Doris Mitchell Bradberry ............. Williamson
Rebecca Harper DeFoor ............. Westminster
Jane Lee Fife .................................. Clemson
Edith Anne Glenn ................... Anderson
Bonnie McGee Lewis .................. Anderson
*Carolyn Moore Phillips ............ Greensboro, N. C.

Jerrie Geel Shaw .......... Ft. Lauderdale, Fla.
Shirley Rogers Smith ................. Seneca
**Margaret Scott Snellings Spradlin
........................................ Bluefield, W. Va.
Emily Bennett Warren .............. Mauldin
Erica Jean Wilson ................. Greenville

Secondary Education

**Peggy Reynolds Alverson ........ Canon, Ga.
George August Anderson, Jr. .... Columbus
James Richard Bowen ............. Blackwood, N. J.
Patrick Marshall Brown ............. Lawrence, N. Y.

Cathy Dunn Elder ............... Greenville
William Henry Gaines ............. North
Pamela Craft Keeter ............. Travelers Rest
*Paula Elizabeth Sloan ............ Union

BACHELOR OF SCIENCE

Agricultural Education

(Agricultural Education is jointly administered by the College of Agriculture and Biological Sciences and the College of Education.)

Clayburn Smith Barrette, Jr. .... Rock Hill
John Alan Cunningham .... Pleasantville, N. J.
Guy Arvin Jenkins ........ Asheville, N. C.
Thomas Elden Lee ................. Alcolu

Gary Alan Lillis ................. Greenville
Joseph Wayne Logan .............. Chester
John Mart Simmons, Jr. .......... Mountville

Industrial Education

Samuel Harry Childers ............ Greenville
Ernest Lerand Gandy ............. Florence
John Martin Hamrick, Jr. ........ Gaffney
Kenneth William Lake ............. Hicksville, N. Y.

Sanford Harold Loef ............. Gainesville, Ga.
Kirk Morgan McCloskey ........... Washington, D. C.
Richard Byron Witter ............. Skaneateles, N. Y.

Science Teaching

Larry Lester Lawson ............. High Point, N. C.
Charles Edward McGee, Jr. ..... Wheaton, Md.
Ray Maria McNamara ............... Greenville

Donald Wayne Richardson ........ Conway
Robert Ronald Thornton .......... Glenn Springs
William David Webb ............... Columbia

COLLEGE OF ENGINEERING

BACHELOR OF SCIENCE

Agricultural Engineering

(Agricultural Engineering is jointly administered by the College of Agriculture and Biological Sciences and the College of Engineering.)

Thomas Cooper Bethea, Jr. ........ Dillon

Kenneth Vinton King .............. Madison

Ceramic Engineering

Wayne Franklin Brimer ........ College Park, Ga.

Chemical Engineering

Constantine Yates Stevens ........ Wadmalaw Island
Civil Engineering

Joseph Preston Carter III  Startex
Harold Richard Davis  Orangeburg
Richard Champion Davis, Jr.  Mt. Pleasant
Richard John Dorey  Aiken
Richard Brown Haddock  Kingstree
Haskell David Hardy, Jr.  Laurens
Perry Dean Holcombe  Spartanburg
Warden Winborn Hughes  Hartsville
Robert Stanley Jones  Lake Lure, N. C.
*James Madison Longshore, Jr.  Newberry
David Craig Lynch  Willingboro, N. J.

Robert Daniel Ogletree  Cayce
Robert Harvey Robey, Jr.  Bethesda, Md.
**Dan Milton Earl Rogers  Williamson
Richard Anthony Rydarowski  East Meadow, N. Y.
Robert Charles Sharpton  Orangeburg
Jimmie Ralph Smith  Greenville
Ronald Delano Smith  Piedmont
Charles Kirkland Smoak, Jr.  Orangeburg
William Walter Thompson  Dover, Del.

Electrical Engineering

Thomas Norman Bradley  Greer
James Larry Chandler  Greer
**James Louise Coleman, Jr.  Ridgeway
Thomas Hudson Collins  Winnsboro
Brian Edward Doyle  Spartanburg
*Ronald Edward Glenn  Ravenel
Ronald Lester Green, Jr.  Birmingham, Ala.
Larry Clifford James  Columbia

Robert Arnold Knoerr  Seneca
Thomas Charles Meier  Easley
Bruce Edwin Rayle  Richmond, Ind.
Jeff Willard Rowell, Jr.  Easley
William LeRoy Strong, Jr.  Hanahan
Jerry Wayne Traynham  Honea Path
Walter Larry Williams  Greenville

Mechanical Engineering

Robert Wisler Beachy  Atlanta, Ga.
Melvin Neel Browne  Troy
George John Fredrick Bullwinkel, Jr.  Mt. Pleasant
David Ray Dover, Jr.  Spartanburg
Ian Frazer Eisenbrey  Elmer, N. J.
Boyce Tyndall Estes, Jr.  Rock Hill
Charles Fenton Fadeley, Jr.  Lexington Park, Md.
Foster Mitchell Garner  Rock Hill

William James Grayson III  Charlotte, N. C.
David Maxie Hardin  Laurens
Robert Cody Lenhardt  Charleston
Robert Errol Martin  Gray Court
Henry Laurens Mellichamp III  Mt. Pleasant
Russell Paul Muschick  Mt. Pleasant
Dale Roy Schielke  Titusville, N. J.
Andrew George Sidroney  Metuchen, N. J.
Samuel Robert Spann, Jr.  Myrtle Beach

Metallurgical Engineering

Ralph James Brackett  Tampa, Fla.
Vanderbilt Carl Pundt  Chester

COLLEGE OF FOREST AND RECREATION RESOURCES
BACHELOR OF SCIENCE
Forestry

John Carroll Chapman  Winnsboro
*Thomas Daniel Dreher  Summerville

John Edwin Miller  Anderson
John Wotring Tucker, Jr.  Charleston

Recreation and Park Administration

Ransome Williams Anderson  Myrtle Beach
Rex Alan Brown  Cayce
Valerie Jean Carson Bryan  Walterboro
Oscar Lee Grant Carter  Dillon
Ted Eugene Carter  Fort Mill
Ronnie Wayne Cauthen  Heath Springs
William Patrick Charping  Iva
Richard Warren Gardner  Cinnaminson, N. J.

Jon Ashford Giles  Greer
Frederick Louis Hiser, Jr.  Bel Air, Md.
Michael Andrew Ingles  Charleston, W. Va.
James Edward Leon  Chatham, Va.
Jewell Pierce McLaurin  Dillon
John Lyon McMurray, Jr.  Greenville
*Robert Gene Patterson  Clinton
James Goodlette Taylor  Greenville
John Leon Wade  Hartford, Ark.
COLLEGE OF INDUSTRIAL MANAGEMENT AND TEXTILE SCIENCE

BACHELOR OF ARTS

Arts and Sciences

Ernest Lynn Adams .................. Edgemoor
Norwood Leslie Alessandro ........ Sumter
John Vincent Bonnet III ........... Asheville, N. C.
Roger Dale Bullard ................. Sumter
Kenneth Butler ..................... Bergenfield, N. J.
Charles Eugene Cauble ............. Columbia
Jonathan James Couchell .......... Spartanburg
Adriano Demori ..................... Cliffside Park, N. J.
Ernest McCullough Duvall .......... Cheraw
Tommy Collins Dykes ............... Anderson
Gerald William Hill ............... Pine Hill, N. J.
Edward Joseph Holland, Jr. ....... Islip, N. Y.
James Edward Lockery, Jr. ........ Spartanburg
Richard Claude Miller, Jr. ........ Greenville
Harry Galt Moore, Jr. ............. Chattanooga, Tenn.
Francis Mitchell Ott, Jr. .......... Columbia
Everette Orwig Page III ........... Spartanburg
Robert Michael Plante ............. Hanover, N. J.
Phillip Daniel Rogers ............. Easley
Lawrence Ray Tew .................. Greenville
David Vernon White ............... Cheraw
William David Wilburn, Jr. ...... Greenwood
James Michael Woodall .......... Rock Hill

BACHELOR OF SCIENCE

Industrial Management

Andrew Arthur Abbott ............... Wakefield, Mass.
Alan John Anderson ................ Baldwin, N. Y.
John Law Anderson ................. Clinton
Paul Walker Askins ................. Hartsville
Paul Rudolph Bazemore, Jr. ...... Beaufort
Johnny Link Cagle .................. Cayce
Henry Laib Cogan .................. Washington, D. C.
Shannon Kathleen Green ............ Sumter
Robert Benjamin Hooks, Jr. ...... Winter Park, Fla.
Robert Wynne Houseman .......... Greenville
James Howard Jones ............... Danville, Va.
William Halbert Keeter, Jr. ..... Aiken

Textile Science

James Irby Brown, Jr. ............. Belvedere

Textiles

Ronald Joe Hogg .................... Greenville

James Edward O'Connor .......... Anderson

COLLEGE OF LIBERAL ARTS

BACHELOR OF ARTS

John William Barrett ............... Central
**Dale Evelyn Bebko ............... Spartanburg
William Larry Bendt ............... Charlotte
Stephen Anthony Bowie ............. Liberty
David Matthew Brown .............. Burlington, N. J.
Charles Donald Cann .............. Anderson
Norman Douglas Crain ............. Westminster
Wess MacLand Dobson .............. Central
Robert Martin Donnelly .......... Cranford, N. J.
Wallace Rockwell Evans III ...... Rock Hill
*Ellen Ann Johnson Hall .......... Clemson

Marian Eileen Langford .......... Orangeburg
Allan Winfield Libby .............. Huntington Station, N. Y.
Joseph Stanley Michalowski, Jr. .. Sumter
Mary Whitaker Nuckols ............ Aiken
**Ida Louise Powell ............... Fairfax, Va.
*Kathy Wilson Putnam ............. Seminole, Fla.
Donald Lewis Rozier .............. Dillon
John Wesley Webb, Jr. ............ Greenville
Diana Sara Wright ................. Clemson
SCHOOL OF NURSING
ASSOCIATE IN ARTS
Nursing
Audrey Dianne Cockfield ______ Honea Path

COLLEGE OF PHYSICAL AND MATHEMATICAL SCIENCES
BACHELOR OF ARTS
Arts and Sciences
William Burton Anderson ______ Greenville
*Phyllis Ann White ______ West Columbia
*Judith Anne Kossler _______ Charleston

BACHELOR OF SCIENCE
Chemistry
**Stephen Michael Blanton _______ Easley
Joseph David Melnik ______ Stratford, Conn.

Geology
William Miley Rivers, Jr. ______ Moncks Corner

Mathematics
Richard Jonathon Dill _______ Charleston
Mary Jane Dobbins _______ Townville

Medical Technology
*Evon Hart Baker _______ Wedgefield
Lewis Charles Dase _______ Gaffney
Marika Ann Ellenburg _______ Liberty

Physics
Henry Charles Brown _______ Sumter

Pre-Medicine
**Lyman Ashurst Ducworth, Jr. ______ Williamson
Russell Eugene Porges ______ Highland Park, N. J.
Ronald Keith Stephens ______ Spartanburg
Thomas William Talbert, Jr. ______ Columbia

*With honor
**With high honor
***With highest honor
MASTERS' DEGREES CONFERRED DECEMBER 17, 1970

COLLEGE OF AGRICULTURE AND BIOLOGICAL SCIENCES

MASTER OF SCIENCE

Animal Science
Joe White Nickles  Donalds

Biochemistry
Donald James Tindall  Columbia

Botany
Margaret Anne Boulware  Winnsboro

Horticulture
Alia Randall Kingman  Rock Hill
Cecilia Shun-Tseng Lin  Taipei, Taiwan

Microbiology
Lawrence Willis Blakely  Simpsonville
Frank Warren Breazeale  Anderson
William Seaphus Brewer, Jr.  Belton

Poultry Science
John Falconer Knechtges  Newark, Ohio

Wildlife Biology
Larry Edward Warlick  Hickory, N. C.

Zoology
Robert Bernard Moorehead, Jr.  Charleston

COLLEGE OF EDUCATION

MASTER OF AGRICULTURAL EDUCATION

(Agricultural Education is jointly administered by the College of Agriculture and Biological Sciences and the College of Education.)

Donald Daniel Durham  Piedmont

MASTER OF EDUCATION

Mary Finley Babb  Easley
Lois Turner Blackwell  Duncan
Joe Kirkpatrick Brown  Hickory Grove
Ryland David Crews  Richmond, Va.
Barbara Ann Dorrah  Taylors
Ruth Lee Elizabeth Lam  Columbia
Betty Dickson Long  Piedmont
Caroline Sturgis Reese  Ware Shoals
Jane Arndt Shulenburger  Newton, N. C.
Judith Chapman Slaughter  Sandy Springs
Roston Miels Smith, Jr.  Anderson
Marjorie Ussery Stokes  Seneca
Thomas Jefferson Tisdale, Jr.  Sumter
Roger Thomas Titus  Gloversville, N. Y.
Ellen Nix Torrence  Atlanta, Ga.
Teresa Gwen Van Duyn  Ft. Walton Beach, Fla
Jerry Wayne Wise  Pamplico

MASTER OF INDUSTRIAL EDUCATION

Raymond Sylvester Fedele  Somerville, N. J.
Oscar Napoleon Vick III  Georgetown

COLLEGE OF ENGINEERING

MASTER OF SCIENCE

Agricultural Engineering

(Agricultural Engineering is jointly administered by the College of Agriculture and Biological Sciences and the College of Engineering.)

Lang Ruey Wang  Chang-hwa, Taiwan
Tan-Chung Young  Taipei, Taiwan
Bioengineering
Denton McKendree Harold, Jr. __ New Smyrna Beach, Fla.

DOCTORS' DEGREES CONFERRED DECEMBER 17, 1970

COLLEGE OF AGRICULTURE AND BIOLOGICAL SCIENCES

DOCTOR OF PHILOSOPHY

Agricultural Economics

Eugene Anderson Laurent .................................................. Bartow, Fla.
B.S., University of Georgia; M.S., University of Nebraska
Dissertation: An Input-Output Study: Economic-Ecologic Analysis in the Charleston Metropolitan Region

Agronomy

Shashi Mohan Rishi .......................................................... Jabalpur, India
B.S., M.S., University of Allahabad, India
Dissertation: Manganese Availability In Soils As Affected By Fumigants

Animal Physiology

Carlos Frederico Lam, Jr. .................................................. Panama City, Panama
B.S., M.S., Clemson University
Dissertation: Milk Secretion of Beef Cows Injected with Estradiol-valerianate During Pregnancy

Chen-Hau Poon .............................................................. Hong Kong
B.S., M.S., Clemson University
Dissertation: The Ultrastructure of Bovine Endometrial Cells at 3, 8, and 18 Days Post Mating

Nutrition

Sherman Thomas Mayne ..................................................... Paducah, Ky.
B.S., Southeast Missouri State College; M.S., Southern Illinois University
Dissertation: Isolation and Partial Characterization of Zinc Binding Proteins Found in the Circulatory Systems of Chicks Immediately After Absorption

COLLEGE OF ENGINEERING

DOCTOR OF PHILOSOPHY

Engineering

Nuri Akkas ................................................................. Tavsanli, Turkey
B.S., Robert College, Turkey; M.S., Clemson University
Dissertation: Buckling, Initial Post-Buckling, and Axisymmetric Dynamic Buckling Behavior of Shallow Spherical and Conical Shells (Field of Specialization: Engineering Mechanics)

William Jacob Craft .......................................................... Rutherfordton, N. C.
B.S., North Carolina State University; M.S., Clemson University
Dissertation: Stress Singularities in an Elastic Matrix Containing Either a Broken or Short Elastic Fiber (Field of Specialization: Engineering Mechanics)

Frederick Adair Dunlap III .................................................. Rock Hill
B.S., M.S., Clemson University
Dissertation: Electronically Programmable Physical Testing Instrumentation Applied to Textile Yarns (Field of Specialization: Electrical Engineering)
Rudolf Othmar Friederich  
Wadenswil, Switzerland  
B.S., Winterthur College of Technology, Switzerland; M.S., Clemson University  
Dissertation: Determination of Binary Adsorption Equilibria of Ethylene-Ethane, Ethane-Propane, and Propylene-Propane of Highly Graphitized Carbon at 25.0°C and Pressures Below One Atmosphere (Field of Specialization: Chemical Engineering)

Frank Louis Lambert  
Metairie, La.  
B.S., Tulane University; M.S., Clemson University  
Dissertation: An Investigation of the Dynamic Parameters of the Adsorption of Selected Hydrocarbons on a Fixed Bed of Activated Carbon Using a Pulse Chromatographic Technique (Field of Specialization: Chemical Engineering)

COLLEGE OF INDUSTRIAL MANAGEMENT AND TEXTILE SCIENCE  
DOCTOR OF PHILOSOPHY  
Engineering Management

Norman Charles Schaffer  
Ormond Beach, Fla.  
B.S., Furman University; M.S., Clemson University  

COLLEGE OF PHYSICAL AND MATHEMATICAL SCIENCES  
DOCTOR OF PHILOSOPHY  
Chemistry

Ibrahim Moayyad Ibrahim  
Haifa, Israel  
B.A., Shorter College; M.S., Clemson University  
Dissertation: The Effect of Water on the Permeation of Some Permanent Gases in Ethocel

Larry Grant Robinson  
Mulga, Ala.  
B.A., Howard College  
Dissertation: Part I: A Deuteration Technique and Its Application to the NMR Spectra of Nitrobenzene and Aniline  
Part II: Solvent Effects on the Proton Chemical Shifts of Some Monosubstituted Benzenes

James Robert Stout  
Kure Beach, N. C.  
B.S., High Point College; M.S., Clemson University  
Dissertation: The Configurational Preference in Some Substituted Bicyclic Ketones and Esters

Mathematics

Marilyn Janet Breen  
Anderson  
B.A., Agnes Scott College; M.S., Clemson University  
Dissertation: A Determination of the Combinatorial Type of a Polytope by Radon Partitions

Billy Joe Holmes  
Robert, La.  
B.S., Southeastern Louisiana College  
Dissertation: Convergence Theorems for Series of Bessel Functions

Physics

Clarence Rufus Green  
Butler, Tenn.  
B.S., East Tennessee State University; M.S., Clemson University  
Dissertation: Effects of Bismuth Impurity on the Critical Magnetic Field Curve of Superconducting Tin

*College of Forest and Recreation Resources established July 1, 1970.

**Forestry and Recreation and Park Administration transferred to College of Forest and Recreation Resources July 1, 1970.

† Includes one professional degree.
