The fact has been determined that a serious plant disease known as the Camellia Flower Blight (Sclerotinia camelliae), occurs in certain areas of other states.

This disease is not known to occur in South Carolina, and if it becomes established in the camellia gardens and nurseries of the state will cause serious losses to the camellia industry.

Bare rooted camellia plants that have been disbudded will be allowed entry from the regulated areas under proper certificate from the state of origin.

**PENALTIES:**
Camellia plants or flowers imported into the State of South Carolina in violation of these regulations are subject to destruction or return to the point of origin at the discretion of the South Carolina State Crop Pest Commission. Any person or firm who shall violate the regulations of this quarantine shall be deemed guilty of a misdemeanor and upon conviction will be punished by law as provided by the Crop Pest Commission Act of 1912.
